

PPL's Feedback to CHARGE Item 59 - Account Number Look up

Karen and OCMO staff,

During the CHARGE call on Thursday November 1, Item 59 regarding Green Mountain's account number look up proposal was discussed. During the call EDC's, including PPL, indicated that no discussion nor evaluation regarding technical feasibility had taken place and staff requested that participants review and submit a response by December 3, 2012. I am writing to correct and clarify the statements made by PPL representatives on the call as well as provide PPL's position on the proposal.

Beginning in August, Green Mountain sent to PPL a draft of their proposal for review and consideration. During that time, PPL reviewed the proposal and held conversations with Green Mountain which included an in-person meeting at PPL Corporate offices on 8/30/2012 to discuss and provide feedback into their proposal. Green Mountain has incorporated the feedback provided by PPL into the proposal which currently sits before CHARGE.

Given the internal evaluation which PPL has performed on this proposal and the collaborative nature under which Green Mountain developed it, PPL supports the proposed process and believes it is something which can be implemented as it is very similar to an existing process which PPL uses for internal operations. Likewise, PPL is agreeable to Green Mountain's proposed Letter of Authorization and sees no issue with their draft document.

I regret if PPL's initial miscommunication has cause any undo delays in the advancement of this proposal. Please feel free to contact me with any questions.

Respectfully,

Domenic Breininger
