Harrisburg, PA 17120

**Re: Universal Service & Energy Conservation Plan for Years 2015-2018
Pennsylvania Power Company; Docket No. M-2014-2407731 - REVISED**

Dear Secretary Chiavetta:

Consistent with the Secretarial Letter of May 25, 2017, enclosed please find a copy of Pennsylvania Power Company's ("Penn Power") revised Universal Service & Energy Conservation Plan for the years 2015 through 2018. Please note that the only changes made from the filing at this docket on June 15, 2017 relate to the Penn Power docket number information for the 2016 base rate case (Docket No. R-2016-2537355).

Very truly yours,

Teresa Schmittberger

Enclosure

Introduction

Pennsylvania Power Company's ("Penn Power" or the "Company") Amended Universal Service and Energy Conservation Plan is provided to the Pennsylvania Public Utility Commission ("Commission") in accordance with Universal Service and Energy Conservation Reporting Requirements at 52 Pa. Code §§ 54.71-54.78 and pursuant to the Final Order of the Commission entered May 19, 2015.¹

The Company is committed to providing customer-focused, quality-driven, results-oriented Universal Service and Energy Conservation Programs² in a cost-effective and holistic manner. The goals of the Company's Universal Service and Energy Conservation Programs are to:

- Protect consumers' health and safety by helping low-income customers maintain affordable utility service;
- Provide for affordable utility service by making available payment assistance to low-income customers;
- Help low-income customers conserve energy and reduce residential utility bills; and
- Ensure Universal Service and Energy Conservation Programs are operated in a cost-effective and efficient manner.

To assist with achieving these goals and with developing the Company's portfolio of assistance and energy conservation programs, the Company has enlisted the services of stakeholder panels.

Universal Service Programs Stakeholders – Eastern Pennsylvania

- | | |
|--|--------------|
| 1. Caring Company | – York |
| 2. Community Progress Council of Hanover | – Hanover |
| 3. Community Progress Council of York | – York |
| 4. TREHAB - Wellsboro | – Wellsboro |
| 5. New Hope Ministries | – Dover |
| 6. Pike County Human Development | – Milford |
| 7. Salvation Army | – Reading |
| 8. Salvation Army | – York |
| 9. South Central Community Action | – Gettysburg |

¹ The amended Universal Service and Energy Conservation Plans were further revised on March 28, 2017, consistent with the rate case Opinion and Order entered on January 19, 2017, at the following dockets: Met-Ed, Docket No. R-2016-2537349; Penelec, Docket No. R-2016-2537352; Penn Power, Docket No. R-2016-2537355; and WPP, Docket No. R-2016-2537359.

² As defined in Section 2803 of the Electricity Generation Customer Choice and Competition Act, 66 Pa. C. S. § 2803, Universal Service and energy conservation refers to those "policies, protections and services that help low-income customers to maintain electric service. The term includes customer assistance programs, termination of service protection and policies and services that help low-income customers to reduce or manage energy consumption in a cost-effective manner, such as the low-income usage reduction programs, application of renewable resources and consumer education."

Consumer Group Representation

1. Pennsylvania Utility Law Project
2. Community Legal Services of Philadelphia
3. Office of Consumer Advocate

Regulatory Representation

1. Bureau of Consumer Services

Beginning in 2017, the Company will establish a Universal Service Advisory Committee (“USAC”) comprising representatives from the Company, the OCA, CAUSE-PA, I&E, the Commission’s Bureau of Consumer Service (“BCS”) and the organizations that administer the Company’s universal service and energy conservation program (“USECP”), which will hold meetings at least twice a year with respect to the Company’s USECP. The USAC’s purpose is intended to explore opportunities for enhancements to the Company’s USECP, as well as opportunities for outreach and education, language access, notification to low income customers regarding security deposit waivers and bill clarity. At the Company’s sole discretion, process or program changes raised through the USAC may be filed for approval by the Commission as proposed revisions to the Company’s USECP on a case-by-case basis. The first meeting will be held no later than June 1, 2017.

The Company will continue to work with eligible customers in establishing affordable payment agreements that maintain electric service and move them toward self-sufficiency in paying their electric bill.

Retail shopping will not preclude participation in Universal Service and Energy Conservation Programs or the protections afforded to residential customers pursuant to the provisions of 52 Pa. Code Chapter 56, and 66 Pa. C. S. Chapter 14 (Responsible Utility Customer Protection Act).

This plan describes the Company's portfolio of Universal Service and Energy Conservation programs for Calendar Years 2015, 2016, 2017 and 2018, including program enhancements and modification as directed in the order. The Company may file for an extension of the timelines if necessary.

Customer Assistance and Referral Evaluation Services (“CARES”)

A. Overview and Objectives

The CARES Program provides assistance on a short-term basis to payment-troubled residential customers. Based upon the circumstances, Company CARES representatives make referrals to social service agencies and provide information on appropriate Company and/or external programs. Many CARES referrals are subsequently enrolled into the Pennsylvania Customer Assistance Program (“PCAP”). However, the Company continues to track its CARES customers via Chronicles and additional follow-up when necessary in cooperation with the social service agencies whose services are required.

B. Eligibility

Any customer experiencing a recent hardship such as:

- Serious illness or injury to a member of a household,
- Death of a wage earner,
- Marital or family problems,
- Handicapped or disabled person,
- Sudden loss of income to the household, or
- Any customer 60 years of age or over requiring special assistance.

C. Tracking

The Chronicles automated case management system will be used to track referrals to the CARES Program and the actions taken in response to customers’ situations. Chronicles tracks CARES referrals separately from PCAP.

D. CARES Organizational Structure

A portion of the following employees’ time supports this program.

Manager – Compliance and Human Services
Supervisor – Human Services-Universal Service
Business Analyst (4) – Various Levels

(Note that due to periodic staffing level changes as a result of promotions, retirements, or new employees, the designation for the level of the positions is excluded.)

Dollar Energy Fund

A. Overview and Objectives

The Dollar Energy Fund ("Fund") is an emergency hardship fund designed to help residential customers who have suffered a recent financial hardship and need temporary help in paying their electric bill. The bulk of program funding is provided by contributions from FirstEnergy stockholders, Company employees and customers, and the Dollar Energy Fund. The application for funds is administered by community-based organizations throughout the Company's service territory.

B. Dates of Operation

The Fund accepts applications in accordance with pre-established account status guidelines, or as long as funds remain available. Program dates are as follows:

- October 1 through November 30 - Service Terminated or Pending Termination
- December 1 through January 31 - Service Terminated
- February 1 through February 28 - Service Terminated or Pending Termination
- March 1 through September 30 - Open to All Customers*; or
- Service Terminated or Pending Termination; or
- Service Terminated; or
- Closed

* pending availability of funds

C. Maximum Grant Amount

One maximum grant of \$500 may be awarded to a customer during a program year.

D. Contacts and Administering Agencies

The Company contact person is:

Ms. Leonard Howell
FirstEnergy
5001 Nasa Blvd
Fairmont, WV 26554
Telephone: 681-753-5518
Email: lhowell@firstenergycorp.com

The Dollar Energy Fund contact person is:

Mr. Chad Quinn, Executive Director
The Dollar Energy Fund, Inc.
P. O. Box 42329
Pittsburgh, PA 15203-0329
Telephone: 412-390-3863
Email: cquinn@dollarenergy.org

E. Eligibility Guidelines

- Residential single home or apartment
- Name on account must be an adult resident³
- Total household income (gross) must be at or below 250% of the Federal Poverty Income Guidelines (exceptions will be made based on circumstances)
- Must have paid a minimum of \$150 on their account within the past 90 days (minimum of \$100 if over age 62)
- Account balance must be at least \$100 (senior citizens age 62 and over may have a \$0 balance, but not a credit balance) (exceptions will be made based on circumstances)
- Must provide income information

Note: The Fund is a “fund of last resort” with regard to the Pennsylvania Low Income Home Energy Assistance Program (“LIHEAP”). Customers must first apply for LIHEAP through the Pennsylvania Department of Human Services, when available, and must first participate in PCAP, when eligible. Additionally, the Company reserves the right to exclude PCAP-eligible customers from receiving a grant, depending on funding levels for the program.

F. Dollar Energy Fund Organizational Structure

A portion of the following employees’ time supports this program.

Manager – Compliance and Human Services

Administrative Assistant

Supervisor – Human Services-Universal Service

Business Analyst (2) – Various Levels

Customer Accounting Associate (2) – Various Levels

Note that due to periodic staffing level changes as a result of promotions, retirements, or new employees, the designation for the level of the positions is excluded.

³ Residency exception will be made for ratepayers assigned to active military duty.

G. Needs Assessment for Hardship Fund:

Penn Power Hardship Needs Assessment		
FPL	2013	2014
201 - 250 %	1,021	1,000
151-200%	1,715	1,660
< 150%	8,173	8,429
Total	10,909	11,089

Gatekeeper Program

A. Overview and Objectives

Gatekeeper is a program designed to recruit Company field personnel to recognize and report customers who may be in "distress" (as described in Section "B" below).

B. Eligibility Guidelines

Situations include, but are not limited to, the following:

- Communication – A person who appears confused or disoriented.
- Economic Condition – Someone expresses difficulty with paying bills.
- Social Condition – Older persons living alone or socially isolated.
- Physical Limitations – Severe difficulty seeing, speaking, hearing, or moving about.
- Condition of Home – In need of repair, neglected yard, accumulation of newspapers, offensive odors, or unattended pets.

C. Gatekeeper Organizational Structure

A portion of the following employees' time supports this program.

Manager – Compliance and Human Services
Supervisor – Human Services-Universal Service
Business Analyst (3) – Various Levels

Note that due to periodic staffing level changes as a result of promotions, retirements, or new employees, the designation for the level of the positions is excluded.)

PA Customer Assistance Program ("PCAP")

A. Overview and Objectives

PCAP helps residential customers maintain electric service and eliminate past-due balances. PCAP offers a reduced bill to customers, based on a percentage of income payment plan ("PIPP") and debt forgiveness. The objectives of PCAP are to:

- Improve a customer's payment ability and consistency;
- Reduce a customer's consumption of electricity; and
- Eliminate debt.

B. Eligibility Requirements

For both Monthly Bill Subsidy Credits and Debt Forgiveness Benefits:

- Total gross household income at or below 150% of the federal poverty income guidelines;
 - Residential account with an active account status;
 - Total energy burden (most recent 12 months) greater than 3% (non-electric heat) or 9% (electric heat) of total gross household income to qualify for monthly bill subsidy credits and debt forgiveness benefits;
 - Applicant/Ratepayer must reside at the service address (primary residence)⁴;
 - If eligible, must agree to participate in the WARM Program (a LIURP Program (Low Income Usage Reduction Program)); and
 - If eligible, must agree to participate in PA LIHEAP – regardless of heat type.
 - Must agree to participate in Equal Payment Plan.
- The company plans to implement this change on or before October 2016.

For Debt Forgiveness Benefits Only:

- Total gross household income at or below 150% of the federal poverty income guidelines;
 - Residential account with an active account status;
 - Total energy burden (most recent 12 months) less than 3% (non-electric heat) or 9% (electric heat) of total gross household income to qualify for debt forgiveness benefits only;
 - Applicant/Ratepayer must reside at the service address (primary residence)⁵;
 - If eligible, must agree to participate in the WARM Program (LIURP); and
 - If eligible, must agree to participate in PA LIHEAP – regardless of heat type.
 - Must agree to participate in Equal Payment Plan.
- The company plans to implement this change on or before October 2016.

⁴ Residency exception will be made for ratepayers assigned to active military duty.

⁵ Residency exception will be made for ratepayers assigned to active military duty.

Participants may only have one residential account (primary residence) in their name at any given time, and only one account on PCAP at any given time.⁶

When a CAP applicant or participant reports zero income, the Company requires households reporting zero income to complete a no-income form. The form requires the household to report how long the household has been living without income and to explain how certain household expenses are met. Applicants claiming zero income for the first time are required to recertify for PCAP after 90 days and then on an annual basis.

C. Intake Processes

A variety of intake processes will be pursued or employed to facilitate effective and efficient program expansion and for purposes of customer convenience. Customers may call Dollar Energy Fund, Inc. at 888-282-6816 to apply by phone.

- 1st Preference
 - Community Based Organization (“CBO”) Interviews
 - Used for processing participant enrollments and recertifications.
- 2nd Preference
 - Telephone Interviews
 - Used for processing participant enrollments and recertifications.
- 3rd Preference
 - WARM Program Referrals
 - Customers referred to appropriate CBO.
 - Used for processing participant enrollments and recertifications.

D. Bill Subsidy Credits Calculation and Payment Requirements

PCAP participants will pay the difference between their total monthly bill and their monthly PCAP bill subsidy credit, which will be applied at the time of billing. PCAP participants must remain in the Company’s standard residential billing cycle (20-day due date) in order for bill subsidy credits to be awarded by the host computer system.

The monthly PCAP bill subsidy credit will be determined based on total gross household income, primary heat source and energy burden (total of previous twelve months’ bills).

PCAP bill subsidy credits will be calculated quarterly to allow for participants’ most recent 12-month energy burden history to be reflected in monthly bill subsidy credits. Per the Order and Opinion entered January 19, 2017, Docket No. R-2016-2537355, the maximum bill-subsidy credit levels are as follows:

⁶ Multiple account exceptions will be made for ratepayers living at a premises with multiple electric meters when they are occupying the entire premises, and when ratepayers move from one premises to another and have temporary concurrent service – 1 month maximum, and ratepayers with an outdoor light metered separately.

Non-Electric Heat Accounts:

Benefit Calculation Based on 3% Electric Bill Burden

Maximum Bill Subsidy Credit = \$1,090.00 Annually or \$90.83 Monthly

Electric Heat Accounts:

Benefit Calculation Based on 9% Electric Bill Burden

Maximum Bill Subsidy Credit = \$2,700.00 Annually or \$225.00 Monthly

Accounts with electric bill burdens of less than 3% (non-electric heat) and 9% (electric heat) will not qualify for PCAP monthly bill subsidy credits, but will qualify for PCAP debt forgiveness benefits for unpaid pre-program debt balances.

To control program costs and institute minimum payment requirements the following monthly, minimum gross income amounts will be used for benefit calculations:

- \$400 Assumed Income for Non-Heat Accounts = \$12 Minimum Monthly Payment
- \$500 Assumed Income for Heat Accounts = \$45 Minimum Monthly Payment

The following is an example of how a PCAP benefit will be calculated for a customer with non-electric heat:

- Annual Income, Family of Four = \$ 16,500
- Annual Electric Bill = \$ 1,020

Step #1 – Determine what the household should be paying for electric under PCAP

Annual Household Income	\$ 16,500	
CAP Electric Bill Burden	x <u>3% of income</u>	
	= \$	495

Step #2 – Determine the household’s current electric bill burden

Annual Electric Bill	<u>\$ 1,020</u>	(previous 12 months)
Actual Electric Bill Burden	= \$	1,020 (more than 3% of income)

Step #3 – PCAP will pay the difference

Actual Electric Bill Burden	\$ 1,020	
Minus CAP Electric Bill Burden	<u>\$ 495</u>	
Annual CAP Benefit	= \$	525 ÷ 12 = \$ 43.75 per month

The following is an example of how a PCAP benefit will be calculated for a customer with electric heat:

- Annual Income, Family of Four = \$ 16,500
- Annual Electric Bill = \$ 2,200

Step #1 – Determine what the household should be paying for electric under PCAP

Annual Household Income	\$ 16,500	
CAP Electric Bill Burden	x <u>9% of income</u>	
	= \$	1,485

Step #2 – Determine the household’s current electric bill burden

Annual Electric Bill	<u>\$ 2,200</u>	(previous 12 months)
Actual Electric Bill Burden	= \$	2,200 (more than 9% of income)

Step #3 – CAP will pay the difference

Actual Electric Bill Burden	\$ 2,200	
Minus CAP Electric Bill Burden	<u>\$ 1,485</u>	
Annual CAP Benefit	= \$	715 ÷ 12 = \$ 59.58 per month

E. Debt Forgiveness Guidelines

When entering PCAP for the first time, all pre-program debt will be deferred and included in the PCAP Debt Forgiveness Component.

When re-entering or recertifying into/for PCAP following the first enrollment, only the remaining (not yet forgiven) pre-program debt from the first PCAP enrollment will be re-deferred and included in the PCAP Debt Forgiveness Component. All other past-due ask-to-pay amounts on the bill must be paid prior to either re-enrollment or re-certification into the program.

Debt forgiveness credits (1/36 of pre-program debt) will be awarded retroactively in response to customer payments⁷ of in-full monthly PCAP bills, whenever those payments occur, regardless of CAP arrears. PCAP participants must remain in the Company's standard residential billing cycle (20-day due date) in order for debt forgiveness credits to be awarded by the host computer system.

F. Default Provisions

Universal Service imposes a requirement on the electric distribution companies ("EDCs") to offer assistance and a responsibility on customers for wise consumption and prompt payment. The Company agrees with the Commission that the consequences for nonpayment should be loss of service⁸.

Dunning notices, including termination notices, will be issued for any unpaid current bills. Deferred pre-program debt balances will not be included in dunning notices. PCAP participants who do not make payments in accordance with the terms of the program will remain in PCAP and be subject to PCAP Dunning Processes, up to and including service termination. PCAP Dunning Processes will include all of the notification and procedural steps required in Chapter 56, Standards and Billing Practices for Residential Utility Service, and Chapter 14, Responsible Utility Customer Protection Act, in addition to:

- 5 Days After Due Date of 1st Invoice
Payment Counseling Telephone Call Placed to Customer
- 6 Days After Due Date of 1st Invoice
Payment Counseling Follow-Up Letter Mailed to Customer

Note: Following the 1st invoice, payment counseling telephone call and follow-up letter, if the overdue bill is \$100 or greater or greater than 60 days in arrears, the account will fast-track to the 10-day termination notice process.

⁷ Although LIHEAP, emergency hardship fund grants, or any other non-customer payments will not cause debt forgiveness credits to be awarded, debt forgiveness will be calculated retroactively (and applied to obligations paid by non-customer payments) following the receipt of a subsequent customer payment.

⁸ Docket No. M-00960890F0010—Final Order Re: Guidelines for Universal Service and Energy Conservation Programs entered July 10, 1997. Under Customer Assistance Programs, Default Provisions: "The Commission believes that the consequences for nonpayment should be loss of service; therefore, we recommend that participants who do not make payments should be returned to the regular collection cycle."

If the overdue bill is less than 60 days in arrears, the account will proceed to the 2nd invoice payment counseling telephone call and follow-up letter process.

- 5 Days After Due Date of 2nd Invoice
Payment Counseling Telephone Call Placed to Customers that are less than 60 days in arrears.
- 6 Days After Due Date of 2nd Invoice
Payment Counseling Follow-Up Letter Mailed to Customers that are less than 60 days in arrears.
- 8 Days After Due Date of 2nd Invoice
If greater than \$25 and 60 Days Past Due, or If \$100 or Greater
10-Day Service Disconnection Notice is Issued to Customer

Payment requirements to avoid termination of service:

- PCAP Bills Brought Current.

Payment requirements for restoration of service following service termination:

- PCAP Bills Brought Current; and
- Reconnection Fee as per Current Tariff

G. Dismissal from PCAP and Re-entry into PCAP

Participants may be dismissed from PCAP for any of the following reasons:

1. Refusing to participate in WARM (LIURP) if eligible (re-entry is dependent on completion of WARM program in addition to payment requirement below).
2. Failing to re-certify as scheduled, or upon request (re-entry is dependent on completion of re-certification procedures in addition to payment requirement below).
3. Establishing multiple residential electric service accounts (re-entry only after all other active accounts have been closed, in addition to payment requirement below).⁹
4. Theft of service (re-entry prohibited for 6 months in addition to payment requirement below).
5. Other actions deemed to be intentional and fraudulent (re-entry prohibited for 6 months in addition to payment requirement below).
6. Failure to apply for LIHEAP and direct benefits to Penn Power when main source of heating is electric (re-entry in accordance with payment requirement below).
7. Other actions, including but not limited to, failure to permit scheduled meter readings, unreasonable and/or increased consumption post-WARM measures installation, and failure to make monthly CAP payments/pattern of returned checks (re-entry in accordance with payment requirement below).
8. Refusal to participate in Equal Payment Plan.

⁹ Multiple account exceptions will be made for ratepayers living at a premises with multiple electric meters when they are occupying the entire premises, and when ratepayers move from one premises to another and have temporary concurrent service – 1 month maximum, and ratepayers with an outdoor light metered separately.

Payment Requirement for re-entry:

Re-enrollment after removal for any reason may only occur when an account balance is paid current, with the exception of the original, remaining pre-program-debt amount – which will be re-deferred for future debt forgiveness upon reentry into PCAP. For example, if an account has an unpaid balance of \$800, and \$500 of that \$800 will be re-deferred upon reentry in PCAP, the customer must pay \$300 prior to re-entering PCAP.

H. Recertification Requirements

CAP participants are advised at the time of application that they are required to recertify annually or if there is a change in gross household income, household size or heat source. A notice to recertify is mailed to CAP participants 60 days prior to the benefit end date including information on when benefits will expire and contact information to complete the recertification process. If necessary, a message is printed on the participant's electric bill 30 days prior to the benefit end date. If a participant does not recertify before the benefit end date, automatic dismissal will occur for failure to recertify. Once removed, the customer will receive a letter that explains the account has been removed from CAP for failure to recertify and provides instructions on how to reapply.

Participant records in the SAP host system are updated at time of enrollment, or at each recertification, which extends the Benefits End Date to 12 months from that effective date. Customers will be able to recertify over the telephone,

To recertify, PCAP participants will be required to submit the appropriate details of income and household members as requested by the administering agency, either verbally, in person, by U.S. Mail or by FAX, as deemed necessary by the administering agency or Company representatives.

Additionally, PCAP participants will be required to be current with PCAP obligations for a recertification record to be processed. Otherwise, participant will be subject to dismissal for failure to recertify and remain current on PCAP.

I. Application of Customer Payments and Assistance Grants

Customer payments:

- First applied against delinquent bills (customer payment obligation);
- Then applied against current bill (customer payment obligation); and
- Then applied against future bills (customer payment obligation).

The company plans to implement these changes on or before January 2016.

Assistance Grants:

LIHEAP helps eligible customers on low or limited incomes pay their heating bills through energy assistance grants. A customer is not required to have an unpaid bill to receive energy assistance. The Department of Human Services ("DHS") administers LIHEAP and establishes dates in which LIHEAP is available. Various efforts, such as bill inserts, letters,

and customer referrals are attempted to encourage customers to pursue the LIHEAP funds when available. All eligible electric heating customers will be required to apply for and be in receipt of a LIHEAP benefit in order to participate in PCAP.

LIHEAP

- First applied against delinquent bills (customer payment obligation);
- Then applied against current bill (customer payment obligation); and
- Then applied against future bills (customer payment obligation or in accordance with Department of Human Services' directives stated in the annual LIHEAP State Plans).

Emergency Hardship Fund Grants

Applied against delinquent bills (customer payment obligation), to avoid service termination, if funds are available in accordance with guidelines set forth above for the Emergency Hardship Fund.

J. Program Delivery Partners

The Company will continue the use of CBOs for the daily administration of Universal Service and Energy Conservation Programs referenced in Attachment A of this plan. CBOs will perform energy conservation services, income verification, program applications, grant making and referrals to other assistance programs. CBO employees have access to the Human Services web site and Chronicles Case Management System to complete the tasks associated with the Universal Services programs.

The Company currently has contracts with CBOs for the purposes of performing program intake and recertification activities.

K. Quality Assurance Provisions

During each calendar year, a representative of the Company, or its designee shall audit each of the CBOs for the purpose of verifying that proper administrative processes have been performed in support of Pennsylvania Customer Assistance Program (PCAP) applications and recertifications. The areas of performance to be audited are:

- Auditor Received Requested Documents
- Case Note Documented in Chronicles for Each Customer Contact
- Intake Sheet Completed
- Account Status Document Reviewed
- Pre-Screen Performed
- Appointments Entered Into Chronicles As Appropriate
- Application Completed When Applicable
- Re-Certification Completed When Applicable
- Referred Clients to Other Program When Applicable

- Proper Documentation Retained
- Hardcopy Documentation Reflected Accurately in Chronicles
- Successfully Enrolled Clients Into PCAP When Applicable
- Measure CBO Level of Service

A combination of applications and recertifications shall be reviewed during each audit; a total of 24 for CBOs processing a large number (500 or more) of PCAP applications and recertifications, and 12 for CBOs processing a small number (500 or less).

L. Assessment of Security Deposits

Security deposits will not be assessed on PCAP accounts in accordance with updated Title 66, Chapter 14 of the Public Utility Code effective December 22, 2014.

M. PA Customer Assistance Program Organizational Structure

A portion of the following employees' time supports this program.

Manager – Compliance and Human Services

Administrative Assistant

Supervisor – Human Services – Universal Service

Business Analyst (5) – Various Levels

Customer Accounting Associate (2) – Various Levels

(Note that due to periodic staffing level changes as a result of promotions, retirements, or new employees, the designation for the level of the positions is excluded.)

WARM Program

A. Program Overview and Objectives

The WARM Program is the name of the FirstEnergy operating companies' Low Income Usage Reduction Program (LIURP). The program provides energy conservation measures and services to low-income customers.

In 1988 the Commission required that all covered electric and gas utilities in Pennsylvania establish a LIURP program for their customers. The Penn Power WARM program has expanded significantly from its inception. This is evident when comparing the first full program year spending of more than \$135,000 in 1989 to the Company's proposed spending in 2018 of more than \$2.8 million.

In addition, the Penn Power WARM program has served approximately 8,000 homes since its inception. During 2014 to 2018, the Company plans to serve an additional 4,225 homes, bringing the total number of homes completed to over 12,200.

The program targets low-income customers who participate in the Company's Customer Assistance Program or LIHEAP. The program's primary objectives are to:

1. Reduce the overall energy use, energy bills and arrearages of the Company's low-income customers;
2. Increase participants' health, safety and comfort in their homes; and
3. Make personalized referrals to Company Universal Service Programs and other assistance programs.

WARM achieves these objectives through two approaches. First, energy conservation improvements (including electric appliances) are evaluated and installed or replaced in the customer's home. Second, an energy conservation agency/contractor provides energy education to family members and refers them to other potentially beneficial social service programs. All work performed through the WARM program is provided at no additional cost to program participants. Costs of all Universal Service programs are funded through Universal Service Rider.

B. Eligibility Guidelines

Income Eligibility:

Residential customers are eligible for WARM if their household income is at or below 150 percent of the Federal Poverty Income Guidelines (FPIG).

The Company also provides WARM services to special needs customers whose household income is between 151 and 200 percent of FPIG. Commission regulations allow up to 20 percent of the WARM budget to be used for these customers. In the 2002 three-year Universal Service Plan, the Company proposed and was given approval to broaden the

definition of special needs customers. The definition has always included customers with overdue account balances, and the Company also includes those households with medical problems, personal crisis situations, and loss of income. This allows more customers under 200 percent of FPIG to participate in the program without requiring or encouraging an account arrearage.

Electric Use Eligibility:

As approved under the previous plan, customers who meet program income guidelines and have annual electric usage of 6,500 kWh annually will qualify.

No minimum usage will be required for customers who are having their services coordinated by an agency/contractor with the PA Weatherization Assistance Program (WAP) or with a Natural Gas Distribution Company (NGDC) when most services are being provided at the same time. In these cases and when a fossil fuel heating system is present, the majority of full-service weatherization measures must be paid for by the other program partners, and the costs of these measures must be documented in the WARM3 System.

The Company will review the list of confirmed low income customers with consumption exceeding 12,000 kWh during the prior year and prioritize those customers for weatherization when possible. Once this list has been exhausted, the Company will review confirmed low income customers with lower annual kWh usage as well as eligible customers requesting weatherization.

Residency Eligibility:

The customer must reside at the service address and have a minimum of 6 months of consecutive service. He/she must provide proof of ownership or secure landlord approval if renting.

The customer also agrees to allow the Company to share his or her electric bill and pre- and post-weatherization electric use records with agencies/contractors and evaluators and to allow contractors to have access to his or her home to perform appropriate program measures.

Homes previously served by the program may receive WARM services again within five years if the home continues to have significant electric use or at Company's discretion. Continuance of this policy will be dependent on positive annual evaluation results.

C. Marketing

In the Company's efforts to reach this customer segment which is most in need and sometimes difficult to contact, the Company partners with community-based organizations and contractors who are already working with customers on other programs.

Since 2004, as customers have met with community-based organizations to enroll in the PA Customer Assistance Program (PCAP), WARM applications have been automatically generated by the Chronicles Case Management System for those customers who were eligible for WARM. Chronicles software is used to match household member demographic and financial information

with available assistance programs. The majority of WARM participants also participate in PCAP. The Company plans to continue this cost-effective holistic approach to helping low-income customers who could benefit from these programs.

The Chronicles System is also used to generate a report of potential WARM participants at 151 to 200 percent FPIG based on the PCAP pre-screen process.

All letters and applications are available in Spanish, and the WARM program uses a translation service for customers who speak a language other than English. This supports the Company's goal to reach all eligible customers.

Geographic direct mail campaigns and community presentations are also used to inform customers about the program.

A bill insert about customer assistance programs, including the WARM program, is sent annually to all residential customers. Program information and eligibility requirements are also shared with customers during fall and winter collection activities and distributed in customer winter surveys.

Cross-marketing with Act 129 programs is optimized. Customers can obtain program information by: 1) accessing the Company's *energysavepa.com* website; 2) reviewing program materials provided to them when they participate in the Act 129 appliance recycling and Energy Conservation Kit programs; and 3) receiving program advertisements included in customized Home Energy Reports.

Efforts are being increased to attract customers who have not yet received program services by expanding the use of mass media advertising, electronic media, and by forming new alliances in the social service community to help identify and provide applications to customers in need.

D. Heating and Cooling Budget Calculation Per Home

The selection of measures designed to reduce electric heating and cooling is guided by a cost-effective budget calculation (seasonal allowance) for each home, based on past electric consumption with consideration given to the seven- to twelve-year regulatory payback requirement. This is a tool for contractors and agencies and is not an absolute or prescriptive target or cap. During the audit, if the site or customer needs are greater than the calculated budget, the contractor or agency will confer with the Company program manager after documenting reasons for proposing to go beyond the budget. The Company will decide to what extent additional work can be performed. This budget process was evaluated by Michael Blasnik and Associates, a third-party evaluation contractor, and was recognized as a best practice. This procedure allows higher budgets on higher-energy-use homes and prevents substantial use of funds on low-use homes where the potential for energy savings is less.

Increases in this seasonal allowance calculation are periodically implemented to keep pace with agency/contractor price increases.

Many times there are barriers to installing energy-saving measures because of serious health or structural issues. The program allows miscellaneous repairs and health and safety measures (such as carbon monoxide alarms) so that energy saving measures can be installed. Previously up to 30 percent of the total job cost was allowed to be spent on health

and safety measures. In this plan, the Company allows up to 50 percent of the seasonal allowance to be spent on health and safety measures contingent upon positive annual evaluation results. This will allow agencies/contractors to make repairs so they are able to proceed with the installation of critical energy-saving measures such as significant air sealing and insulation. Combustion safety testing costs would be in addition to the 50 percent health and safety measure spending. To determine the effectiveness of these seasonal and health and safety allowance changes, the Company shall track the impact and report the same to BCS as part of the annual LIURP reporting due to the Commission each April 30th.

Baseload electric measures and appliance replacements are based upon on-site auditing and monitoring of energy use of the existing appliances. The replacement thresholds and procedures are updated periodically to reflect changes in costs and/or efficiencies.

As a result of the downturn in the economy and fluctuating energy prices, the Company is finding that more than 50 percent of WARM participants are using supplemental electric heat in the winter even though the primary source of heat in the home is something other than electric. Since this is a frequent occurrence, the Company tries to reduce the customer's supplemental electric heat use by trying to coordinate services with the State Weatherization Assistance Program and gas LIURP programs to repair gas or oil heating systems. The Company also performs Combustion Safety Testing to ensure safe use of combustion appliances/systems and provides air sealing and insulating when other programs cannot assist.

E. Energy Saving Measures

Following is a list of some of the measures that customers may receive through the WARM program. The specific measures received and actions taken are dependent on the customer's heat type, electric use, testing of appliances and diagnostic audit results. Customers have the right to refuse recommended measures. Contractors and agencies are required to install measures according to the program priority list found in the WARM Policy and Procedures Manual. Custom measures that meet the seven- to twelve-year regulatory payback requirement are also encouraged. Agencies and contractors provide one-year warranties on most measures; manufacturers may provide additional warranties.

- Blower door with pressure diagnostics to guide air sealing and duct sealing
- Attic, duct, basement, crawlspace and perimeter air sealing (caulking, foam insulation & weather-stripping)
- Attic, wall, duct, floor, crawlspace and perimeter insulation
- Sealing and insulating attic hatches
- Boxing and damming of attic heat producing fixtures
- Refrigerator replacement
- Freezer replacement
- Water heater replacement
- Heat Pump Water Heaters
- Water heater pipe insulation
- Some aerator and showerhead replacement
- Some storm and prime window and door repair or replacement
- Reflective window tint to reduce cooling use
- Reflective roof coat to reduce cooling use
- Gravity Film Exchange -- drain water heat recovery system

- Window/Wall air conditioning unit replacement
- Some heating and air conditioning system replacement
- Electric dryer venting installation, repair or replacement
- Clothes line installation
- Heated waterbed mattress replacement
- Some plumbing and electrical repairs
- Repair and replacement of exhaust fans
- Thermostat replacement/repair
- Air conditioning/heating system filter replacement
- Appliance and water heater timers
- Smart power strips
- Furnace whistle
- Energy education
- Remedial education as needed
- Compact fluorescent light bulbs
- LED night lights
- Site specific health and safety measures, such as carbon monoxide detectors
- Custom measures, (i.e., dehumidifier replacements, well pump or holding tank replacements, etc.)

Two new energy-saving measures, heat pump water heaters and furnace whistles, were added during the last three years. In this plan, the Company will implement and study the feasibility of retaining the new measures and services listed below:

- Ductless mini split heating and cooling systems
- LED lighting
- Increasing the maximum attic R-value from R38 to R44
- Customized audit and energy education efforts for the highest electric use CAP customers

The Commission granted the Company a temporary partial waiver of the LIURP regulation of Section 58.11(a) that restricts each installed measure to a payback period of 7 or 12 years. The waiver shall apply only to heating jobs for which the audit indicates should receive comprehensive measures. The overall job must still be cost-effective and otherwise meet LIURP regulations.

The Company will coordinate with BCS on the timing and effect of this change. The Company will report full program-year findings to BCS as part of the annual LIURP reporting due April 30, 2018.

F. Energy Education

The Company and agencies/contractors use a proven partnership approach with the customer. The WARM program provides an energy education notebook to all auditors to engage the customer. The customer is asked to partner with the program agency/contractor in order to develop energy savings strategies designed specifically to address the highest energy use areas of that particular home and its occupants. The auditor and customer sign partnership and savings strategy agreements.

Approximately five months after the completion of WARM services, the Company sends customers congratulatory letters when usage has decreased more than 5 percent when compared to the same months before WARM services. A list of customers whose usage has increased more than 5 percent is provided to agencies/contractors for a follow-up phone call to the customer and visit if necessary. The agency/contractor will check if measures are working properly and whether or not the customer understands how to use them or if lifestyle or structure changes created the increased electric use.

Another education resource for WARM program participants is being implemented through the use of the Act 129 program Home Energy Reports that include customized energy education messaging. These reports will be sent to identify low-income customers, including WARM participants.

G. Company Organizational Structure

A portion of the following employees' time supports the program.

- Manager – Compliance and Human Services
 - Administrative Assistant
- Supervisor – Human Services – Energy Conservation
 - Business Analyst (3) – Various Levels
 - Administrative Technician
 - Customer Accounting Associate

(Note that due to periodic staffing level changes as a result of promotions, retirements, or new employees, the designation for the level of the positions is excluded.

H. Program Delivery Community Partnership

The Company contracts with a network of community-based organizations and energy conservation contractors referenced in Attachment A of this plan to perform program intake and installation of measures. Some of these agencies/contractors subcontract part of their work to specialists, such as electrical, plumbing and HVAC contractors.

Program auditors or crew members who make decisions about what measures will be installed in the home and who perform the combustion safety testing procedures must be Building Performance Institute (BPI) certified as Building Analyst Professionals. BPI is a national standards development and credentialing organization for residential energy efficiency retrofit work. It is a non-profit organization that also provides training through a network of training affiliate organizations. FirstEnergy sponsors agency and contractor attendance at national and regional ACI Home Performance Conferences so agencies/contractors can obtain continuing education credits needed to retain their BPI certification. The Company also holds WARM program training specific to procedural issues or to meet the training needs of auditors and crew members.

I. Quality Assurance Provisions

The Company plans to maintain the same level of third-party quality assurance inspections; however it plans to base it on 35 percent of total production. Previously, inspections were based on percent of job type (50 percent inspections on homes classified as electric heat and 15 percent inspections on water heat and baseload homes). The Company is finding a substantial increase in homes using supplemental and de facto electric heat that would have previously fallen under the former 15 percent category. This new process will allow quality assurance contractors to focus the majority of their inspections on homes that have electric heat as well as supplemental electric heating or air conditioning. Greater oversight is needed in these homes because of the installation of comprehensive measures and combustion safety testing.

These quality assurance contractors also provide or coordinate auditor, crew, and group training as needed, as well as BPI training/testing.

For the past thirteen years, the Company has had a WARM Advisory Panel that meets two to three times per year and is on call year round. The panel members consist of agency and contractor auditors, program managers, and quality assurance inspectors from across Pennsylvania. The members have direct contact with customers and other assistance programs in other states. They provide suggestions for program improvement, research new technologies, and test new measures and products. Their recommendations are part of the enhancements to the WARM program included in this plan.

Company program managers meet with all agencies and contractors annually to share specific energy saving results, program changes, and solicit feedback. Company program managers also meet with individual agencies and contractors to observe audits and crew work in the field.

The Company will strive to defer to the Department of Energy National Standard Work Specifications-based quality control inspection protocols on jobs coordinated with the Weatherization Assistance Program where possible and practical.

J. Coordination of Services

As recommended by the Commission, the Company will continue to direct agencies and contractors to coordinate delivery of WARM benefits with other programs. The Company will work with other State Weatherization Assistance Program (WAP) and gas company program managers to coordinate delivery. The Company has implemented this directive with contractors/agencies because it makes good business sense. However, coordination might impact the program's overall electric energy savings, because the customers identified by gas companies or WAP might not be the highest electric users targeted for participation in the WARM program. As per regulations, when a surplus of low-income customers exists, the Company prioritizes customers by highest energy use first.

The energy savings might be positively impacted because of additional funding sources working to address the entire home. The Company will also strive to minimize duplicated costs, such as audits and inspections.

The Company will continue to provide energy usage data to the Department of Community and Economic Development (DCED) to assist in their Weatherization Assistance Program energy saving studies.

K. Funding and Enrollment Goals

Year	Budget	Participant Goals
2015	\$2,167,000	835
2016	\$2,371,000	845
2017	\$2,600,000	855
2018	\$2,822,000 ¹⁰	865

In general the average cost of serving WARM participants' homes has increased over the years due to measure price increases and additional measures being installed in homes now using electric space heaters in lieu of fossil fuel heaters. Homes normally classified as water heat or baseload jobs that typically received lighting, refrigerator replacements and water heat reduction measures in the past now require attic air sealing, insulation and combustion safety tests. It also takes more days to serve these homes so agencies and contractors cannot serve as many homes in a year.

Some PCAP participants do not qualify for WARM because their electricity use does not meet the annual minimum energy use. Some customers cannot participate because their landlords will not agree to program services at their properties.

In addition to the WARM program, the Company has five low-income programs as part of PA Act 129 Phase II with funding of more than \$30 million over the next three years across the Pennsylvania operating companies. Some of the programs address low-income customers with low electric use that do not qualify for WARM.

The Commission, in its final Order, acknowledged that the Companies may have to slightly reduce the overall anticipated number of jobs to accommodate an increase in comprehensive heating jobs that may include measures that do not meet the current payback period. The Companies plan to strive to meet the participant goals as stated in the original plans and shall coordinate with BCS if a change is needed to future-year goals and the timing and effect of the change.

L. Reporting

The Company is required to submit the following reports to the PUC or Department of Human Services on an annual basis:

- LIURP Production, Expenditures, Cost of Jobs and Goals Report: March 1
- Universal Service Program (LIURP Section): April 1

¹⁰ Consistent with the Commission's Opinion and Order entered January 19, 2017 at Docket No. R-2016-2537355, funds not expended in 2017 will roll over and be added to the budget available for expenditure in 2018. This budget roll over will continue until the expiration of this Universal Service & Energy Conservation Plan. The Company will address the continuation of the roll over in its next regularly-filed plan.

- Conservation Economics and Energy Planning Bureau Report: April 30
- LIURP Annual Energy Savings Impact Evaluation: April 30
- LIHEAP Leveraging Report: October 31

M. LIURP Needs Assessment

Penn Power LIURP Needs Assessment - January 2015

Total Residential Customers (November 2014)	141,929
Number of Customers Below 150% of Federal Poverty Income Guidelines (FPIG)	37,838
Percent of Residential Customers Below 150% of FPIG	26.7%
Number Needing LIURP*	24,038
Estimated Number of Potential Program Participants**	19,777
Cost to Serve the Number Needing LIURP***	\$57,867,502

* Excludes customers not expected to meet the 6,500 kWh LIURP annual usage threshold

* Excludes customers or homes already served by LIURP

** Assumes revised stay-out provision (5 vs. 7 years)

** Excludes a percentage of customers unwilling or unable to participate in LIURP

** Excludes customers expected to be served by Act 129

** Assumes Act 129 will be in place through 2018

*** Uses average cost per job throughout four-year plan period

Penn Power currently projects there are about 19,777 potential LIURP participants, excluding lower kWh energy users and previously served customers or homes. Also factored into the potential estimate of participants are the following as noted in general above:

- Some customers are unwilling or unable to participate in WARM for a number of reasons, but the most common is landlords who don't return the WARM landlord agreement form.
- Other customers have or will receive energy conservation services through Act 129.
- A relatively small number of homes have structural problems where energy conservation service cannot be provided, because of pest infestations, other health and safety related problems or issues that are beyond the scope of the program.
- Some customers cite privacy concerns about having outsiders in their home, and others are reluctant to share documentation related to income.
- It is difficult for some low-income customers who work to make arrangements to be at home so services can be provided.
- While the Company contracts with a language translation firm for customer phone calls, language barriers can still make the provision of services by agencies and contractors more difficult.
- There are customers who simply do not endorse the concept of energy conservation, including some who are able to pay their bill in full and on time without participating in WARM.

Note: A more complete Needs Assessment with estimates of low-income customers by county appears on page 32.

Summary of Proposed Program Additions and Modifications

Introduction

Updated reference to Opinion and Order, Page 2.

Updated reference to Universal Service Advisory Committee (“USAC”), page 3.

Dollar Energy Fund

Company contact updated, Section D, page 6.

PA Customer Assistance Program (“PCAP”)

The following program modifications are included in this Plan for PCAP:

1. Added Dollar Energy Fund, Inc. phone number, Section C, page 10.
2. PCAP bill subsidy maximums were increased, Section D, Page 11.

Universal Service Participant and Budget Projections

Revised 2017 and 2018 PCAP projections, Page 34.

Inquiries

Updated Company contact list, Page 38.

WARM Program

The following program modifications are included in this Plan for WARM

1. Updated prioritization, Introduction, Section B, Subsection Electric Use Eligibility, Page 19.
2. Updated provision for roll over of unexpended funds consistent with the Commission’s Opinion and Order entered January 19, 2017 at Docket No. R-2016-2537355, Section K, Page 25.

Applied Technologies in Support of Universal Service Programs

The Company employs various technologies in the delivery of its Universal Service Programs, which greatly enhance their accessibility and effectiveness. Some of the more significant technologies are described below:

C-Net On-line Help System¹¹

C-Net provides the Company Customer Information Center (“CIC”), the Company’s Collection Center Vendor, Expert Global Solutions, and the Human Services Department employees with detailed on-line information on Federal, State and Company Universal Service Programs.

Chronicles Case Management Software

Chronicles is an on-line, web-based case management tool that has been provided to a wide network of Community-Based Organizations, WARM contractors, the Dollar Energy Fund and the Company’s Human Services Department employees. The software supports a holistic approach in the delivery of Company Universal Service Programs and Energy Conservation Programs by automatically matching household member demographic and financial information with available Federal, State and utility human services programs. Within this process, the Company’s Universal Service and Energy Conservation Program application forms and the LIHEAP application form are automatically produced by Chronicles.

SAP

SAP is the Company’s host computer system containing the customer master file.

Human Services Web Site

The Human Services Web Site allows community-based organizations administering the Company’s low-income programs to easily obtain current customer billing, payment, energy use and other information without Customer Information Center or Human Services involvement. Entry to the site is password protected. Approximately 2,600 individuals representing almost 300 different organizations across FirstEnergy service territories take advantage of this tool.

WARM3 System

WARM3 is a web-based system used to assist inspectors, contractors and Company administrators in their management of WARM. Some of WARM3’s features include:

- The ability to run in various Windows operating systems and browsers;
- User friendly screens that facilitate data entry;
- An invoice tool that allows contractors to invoice the Company electronically;
- Numerous reports and date fields to assist with job tracking, invoice payment, job inspections, and annual Commission-required program evaluation, etc.;
- A demographics panel where Commission-required demographics are housed;
- An automated post-completion customer survey letter;
- Liberal text fields for documentation and communication among contractors, inspectors and the Company program managers; and

¹¹ C-Net On-Line Help System is a Microsoft Office application called Sharepoint.

- The ability to attach audit, applications, material receipts, etc. and photos. This allows contractors, inspectors and the program managers to see and discuss the work (existing condition, best practices, missed opportunities, etc.) without inconveniencing the customer with future visits.

A complete rewrite of the WARM3 tracking system is being implemented to allow for more efficient program administration.

Penn Power Universal Service Eligibility Criteria

Program	Income Criteria	Other Criteria
CAP	At or below 150% of Federal Poverty Income Guideline (FPIG)	<p>For both Monthly Bill Subsidy Credits and Debt Forgiveness Benefits:</p> <p>Residential account with an active account status; Total energy burden (most recent 12 months) greater than 3% (non-electric heat) or 9% (electric heat) of total gross household income to qualify for monthly bill subsidy credits and debt forgiveness benefits; Applicant/Ratepayer must reside at the service address (primary residence)¹²; If eligible, must agree to participate in the WARM Program (a LIURP Program); and If eligible, must agree to participate in PA LIHEAP—regardless of heat type. Must agree to participate in Equal Payment Plan</p> <p>For Debt Forgiveness Benefits Only:</p> <p>Residential account with an active account status; Total energy burden (most recent 12 months) less than 3% (non-electric heat) or 9% (electric heat) of total gross household income to qualify for monthly bill subsidy credits and debt forgiveness benefits; Applicant/Ratepayer must reside at the service address (primary residence)¹³; If eligible, must agree to participate in the WARM Program (a LIURP Program); and If eligible, must agree to participate in PA LIHEAP—regardless of heat type. Must agree to participate in Equal Payment Plan</p> <p>Participants may only have one residential account (primary residence) in their name at any given time, and only one account on LIPURP at any given time.¹⁴</p>

¹² Residency exception will be made for ratepayers assigned to active military duty.

¹³ Residency exception will be made for ratepayers assigned to active military duty.

¹⁴ Multiple account exceptions will be made for ratepayers living at a premises with multiple electric meters when they are occupying the entire premises, and when ratepayers move from one premises to another and have temporary concurrent service – 1 month maximum, and ratepayers with an outdoor light metered separately.

LIURP	<p>At or below 150% of Federal Poverty Income Guideline (FPIG); up to 20% of budget used for special needs</p> <p>customers at 151%-200% FPIG.</p>	<p>Must reside at service address and have six months of consecutive electric service.</p> <p>Provide proof of ownership or secure landlord approval if renting.</p> <p>Minimum annual use of 6,500 kWh; 0 kWh for homes coordinated with state or gas weatherization.</p> <p>Home may receive services again after 5 years with significant use.</p>
Hardship Fund	<p>Total household income (gross) must be at or below 250% of the federal poverty income guidelines (exceptions will be made based on circumstances)</p>	<p>Residential single home or apartment</p> <p>Name on account must be an adult resident¹⁵</p> <p>Must have paid a minimum of \$150 on their account within the past 90 days (minimum of \$100 if over age 62)</p> <p>Account balance must be at least \$100 (senior citizens age 62 and over may have a \$0 balance, but not a credit balance) (exceptions will be made based on circumstances)</p> <p>Must provide income information</p>
CARES	None	<p>Payment-troubled customer experiencing a recent hardship such as:</p> <ul style="list-style-type: none"> -Serious illness or injury to a member of a household -Death of a wage earner -Marital or family problems -Handicapped or disabled person -Sudden loss of income to the household -Any customer 60 years of age or over requiring special assistance.

¹⁵ Residency exception will be made for ratepayers assigned to active military duty.

Pennsylvania Power Company Universal Service Needs Assessment

Statistics Based Upon the 2010 – 2012 American Community Survey – U.S. Census Bureau
 Estimated Residential Customers <150% of Poverty % to Total = 26.660%
 Estimated Eligible Customers = 37,607

County	Total Households	Households Under 150% of Poverty	Percent of Households Under 150% of Poverty	Res. Cust.	Estimated Residential Customers <150% of Poverty	Estimated Res. Cust. <150% of Poverty % to Total
Allegheny	522,238	133,459	25.56%	17,437	4,457

Gatekeeper		1,000		
WARM (LIURP)		2,822,000		
Totals		7,927,000		

Conclusion

With the approval of this updated plan, the Company will offer its Universal Service and Energy Conservation Programs in compliance with applicable Commission and other requirements, including the following:

- 52 Pa. Code Chapter 56 (Standards and Billing Practices for Residential Utility Service).
- 66 Pa. C. S. §1401 et seq. (Responsible Utility Customer Protection Act – Chapter 14).
- 52 Pa. Code §§54.71-54.78 (Reporting Requirements for Universal Service and Energy Conservation Programs).
- 52 Pa. Code §§58.1-18 (regarding LIURP).
- CAP Policy Statement of July 25, 1992, Docket No. M-00920345.
- 66 Pa. C. S. §§2801 et seq (Electricity Generation Customer Choice and Competition Act).
- Commission Universal Service and Energy Conservation Programs Guidelines, Docket No. M-00960890F0010 – July 10, 1997.
- Commission Universal Service and Energy Conservation Program Reporting Requirements, Docket No. L-00970130 – April 30, 1998.
- Customer Assistance Programs: Funding Levels and Cost Recovery Mechanisms, Docket No. M-00051923 entered December 18, 2006.
- Cost recovery of Universal Service Program costs via the Company's Universal Service Cost Rider as approved by the Commission's Order at Docket No. R-00072437 on April 11, 2008.
- Joint Petition for Partial Settlement of Rate Case Investigation as approved by the Commission's Opinion and Order entered January 19, 2017, Docket No. R-2016-2537355.

The Company has a long history of leadership in the creation, development and implementation of Universal Service and Energy Conservation Programs. Some of the leadership initiatives that have been implemented are:

- Developing a Human Services Web Site;
- Installing the Chronicles Case Management Software;
- Developing the WARM LIURP tracking system;
- Enhancing both Chronicles and WARM3 to operate as web-based systems;
- Collaborating with the Pennsylvania Department of Human Services to make LIHEAP more accessible (via Chronicles);
- Requiring WARM implementation contractors to obtain BPI Certifications and having third-party quality assurance contractors obtain BPI Trainer certifications;
- Requiring Combustion Safety Testing for WARM participants' homes to ensure customer safety when the primary heating system is not electric;
- WARM Advisory Panel in place for more than 13 years;
- Creation of Universal Service Advisory Panels; and
- Since 2001, added cooling load reducing measures to the WARM program and in 2013 added Heat Pump Water Heaters.

FirstEnergy will continue its commitment toward providing customer-focused, quality-driven and results-oriented Universal Service and Energy Conservation Programs.
