Re: Docket No. M-00051865, L-00050174 and L-00050175 – Addendum Comments of Pennsylvania Farm Bureau

Dear Secretary McNulty:

On behalf of the over 42,000 rural and farm family members of Pennsylvania's largest general farming organization, thank you for the opportunity to submit the following comments regarding proposed rulemaking regarding Revisions to the Net Metering and Interconnection Regulations to conform with the Language of Act 35 of 2007. While we submitted comments on October 18, we would appreciate the opportunity to offer further comment on the issue of how 'full retail value' is defined.

As mentioned in our October 18 comments, economics is very important when farmers are considering the feasibility of net metering. Farm Bureau supports consumer-generators being compensated for excess generation on an annual basis at the full retail value for all energy produced. We believe compensation at the full retail value should mean that if it costs 10¢ to buy from the utility, then 10¢ should be the credit as a result of net metering.

We also respectfully request your adoption of these changes to ensure the success of this initiative.

Thank you for your consideration.

Sincerely,

Kristina L. Watson
Regulatory Reform Director

CC: Arthur Coccodrilli, Chairman, Independent Regulatory Review Commission
