

We are in the process of making the following updates and informational changes.

Our customers' December bills will include an insert detailing the changes made to the Lifeline program. It encourages our customers to contact our office for further information and details.

We have updated our customer applications and they will now include the updated Lifeline benefit options and criteria.

Since Venus Telephone offers both landline and high speed internet services we are anticipating an increase in interest from the expanded benefit offering.

At this time we are not planning any additional offers or promotional discounts. Our internet is delivered via fiber optic directly to the home so additional equipment such as modems are not necessary.
