Electric Bill Breakdown

Understanding Your Electric Bill

Res - Basic Service Charge A monthly basic delivery, or distribution, charge to cover costs for billing, meter reading, equipment, maintenance, and advanced metering when in use.

Default Service State Tax Adjustment - Electric A charge, or a credit, on default service costs to reflect changes in various Pennsylvania state taxes.

Delivery State Tax Adjustment - Electric A charge, or a credit, on electric rates to reflect changes in various Pennsylvania state taxes. The surcharge may vary by bill component.

Res – Electric Delivery Charge Charges for the infrastructure (i.e., local wires, transformers, substations, and other equipment) used to deliver the energy from the high voltage transmission lines to your premise.

Res – System Benefits Charge – Electric A small charge used to fund the company's approved universal service program costs for low-income assistance, energy conservation, outreach and education, and other public policy programs.

Res – Electric Supply Adjustment Charge

A charge, or a credit, on your bill depending on the wholesale price of electricity purchased on your behalf by PCLP.

Res – Market Price of Electric Supply

A charge reflecting the cost of the actual electricity used at your premise and purchased on your behalf via a wholesale market by PCLP or alternate supplier. If you are purchasing your supply from a supplier, it will be listed on the second page of your bill as 'Total Supplier Charges'.

(kWh (Kilowatt-hour) The basic unit of electric energy for which most customers are charged. The amount of electricity used by ten 100-watt lights left on for 1 hour. Customers are usually charged for electricity in cents per kilowatt-hour.

Choosing a competitive supplier for your electric generation

Electric customers in Pennsylvania were among the very first in the United States to have the ability to choose the company that supplies their electricity. You may be able to choose your electric generation supplier (EGS) in areas where competitive electricity supplies are being offered. Consumers may be able to secure supply rates below the prices offered by their utility or take advantage of other energy products, such as renewable energy. Generation supply costs comprise the majority of the average electric bill. Consumers are encouraged to proactively engage competitive suppliers – whose price is unregulated by the Pennsylvania Public Utility Commission (PUC) – to obtain pricing information for the generation portion of their bill. Competitive offers may not be available in all areas.

Why should I shop for electricity?

Just like you would shop for any household item, you can shop for your electricity to find the best deal and the best service for your needs. Remember, saving just one cent per kWh could translate into more than \$100 a year in savings, depending on usage, and may allow you to take advantage of other energy product offerings, such as renewable energy. Competitive offers may not be available in all areas. Log onto www. PAPowerSwitch.com to learn about suppliers in your area.

Will I still be able to take advantage of "budget billing"?

Yes – Be sure to tell Pike County Light & Power that you want budget billing, which allows you to pay a "fixed amount" each month, providing certainty in your bills. Budget billing averages bills out over 12 months, but does not guarantee an annual fixed rate as budget bills are subject to quarterly adjustments based on usage.

What is the "price to compare"?

The price to compare (PTC) is the price per kilowatt hour (kWh) your electric distribution company will charge. When asked, the competitive supplier also will provide you with a PTC, allowing you to make an apples-to-apples comparison on price for the generation portion of your bill. Be sure to ask how long the price is effective and verify if taxes or other fees are included in the PTC. The PTC includes the GRT and may include the STAS.

What is the Gross Receipts Tax and how is it factored into the Price to Compare?

The Gross Receipts Tax (GRT) is a Pennsylvania state tax imposed on the gross receipts from sales of electric energy within Pennsylvania and is included in the PTC. The Gross Receipts Tax is paid by both the electric distribution company (EDC) and the EGS on the basis of the company's or the supplier's gross receipts from the sale of generation supply within Pennsylvania. EDCs and EGSs include the GRT as part of the cost of electric generation supply.

Is the Gross Receipts Tax part of the State Tax Adjustment Surcharge (STAS)?

The GRT is usually partially collected in the STAS and partially in the base rates, but it may depend on the timing of any tax changes and rate cases.

My utility company has always been a good company. Why should I switch now?

Pike County Light & Power does not care if you choose a competitive supplier and is encouraging its customers to shop around. Pike County Light & Power will continue to deliver your electricity, provide reliable service and respond to outage problems. The quality, reliability, and maintenance of your electric service should not change as it is still monitored by the Commission. You may be able to save money or take advantage of other energy products, such as renewable energy with a competitive supplier or you can stay with Pike County Light & Power. It's your choice.
