

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

**ESTE INFORME CONTIENE INFORMACION MUY IMPORTANTE SOBRE SU AGUA DE BEBER. TRADUZCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BEIN.**

### **Monitoring Requirements Not Met for Aqua Pennsylvania, Inc., Washington Park Water System, PA2660016**

Aqua Pennsylvania, Inc. (Aqua) acquired the Washington Park Water System on March 31, 2009. Prior to this date, several drinking water reporting requirements were not met by the previous owners. Even though this was not an emergency, as our customers, you have a right to know what happened and what we did to correct these situations.

Public water systems are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During the months of January and February 2009, the samples for chlorine residual were not collected as required. In March 2009, the samples for chlorine residual as well as Total Coliform Bacteria were not collected as required. Monthly samples have been taken since Aqua acquired this system beginning in April 2009 confirming that adequate chlorine residual is being maintained and no coliform bacteria have been detected.

There is nothing you need to do at this time.

#### **Corrective Action Taken:**

Now that we own the system, Washington Park will be subject to Aqua's internal procedures to ensure that these samples are collected and submitted by the date required in compliance with all regulations. For more information, please contact Dave Quinn at 570.443.7099.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (For example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

This notice is being sent to you by Washington Park Water System.
