Aqua America, Inc.

WTR - NEUTRAL

February 17, 2011

## Fourth Quarter Preview - Expect In-line **Results in Seasonally Slow Quarter**

#### **KEY POINTS:**

- Aqua will report fourth quarter and full year 2010 results on February 24th and hold a conference call with investors at 11am ET. Our earnings estimate of \$0.21/share reflects 6% growth vs. the same period in 2009 - in line with the consensus forecast.
- We expect 9% revenue growth in the fourth quarter, which will support similar growth assumptions we have for the full year. Recall that during 2010, the company benefited from hot, dry summer weather in the northeastern U.S. during the third quarter and a corresponding increase in incremental water usage.
- As typically seen in the seasonally slow fourth quarter, we expect operating and maintenance expenses to grow as a percentage of revenue. The "efficiency ratio" which we define as O&M expenses/revenue should increase to slightly over 40% as cold December weather in Southeastern Pennsylvania (Aqua's core service territory) drives an increase in distribution system main breaks and expenses associated with remediating such system disturbances. For the full year we expect the company's well-regarded cost discipline will be reflected in results with an impressive efficiency ratio of 38.9%
- For the full year 2010, our operating income growth expectation of 14% (off revenue growth of 9%) is a prime demonstrative example of how private water utilities benefit from incremental customer usage during favorable weather conditions as high fixed-cost operating leverage takes hold. Much of this annual growth stems from the third quarter, when 15% revenue growth translated into 25% operating income growth. We have not seen such a rapid pace of annual operating income growth since 2004.
- We expect the company will end the year having been awarded approximately \$50 million in annualized rate relief (driven in part by the large Pennsylvania case) and will have pending cases amounting to \$25-\$30 million across several states (larger cases in the southern states including Texas, North Carolina, and Florida). We expect sustained capital spending plans for approximately \$300 million in 2011 which will drive growth in future years and with internally generated cash providing funding support, we do not anticipate any immediate equity needs.
- We maintain our NEUTRAL rating on WTR shares, primarily due to valuation as the stock surged in 2010 by almost 30% and has continued to improve by 3% year-to-date. While we believe WTR shares deserve a premium valuation based upon the company's strong track record of operational execution and a favorable regulatory footprint, we believe upside to the current forward multiple (24 times our 2011 estimate) is limited.

**Research Analyst Certifications and Important Disclosures** are on pages 3 - 4 of this report
