RE: Act 129 Energy Efficiency and Conservation Program Phase II
Docket Number M-2012-2289411

Dear Madam Secretary:

The purpose of this letter is to express support for the continuation of ACT 129 Energy Efficiency and Conservation Program without interruption for an additional five years.

The basis of my support for the continuation of ACT 129 was outlined to you in a letter from the Commonwealth Recycled Energy and Economic Development Alliance (CREEDA). CREEDA outlined for the PUC's consideration the, economic development, environmental impact reduction, and societal benefits all rate payers conclude receive from the deployment of energy efficiency combined heat and power (CHP) or co-generation.

The ACT has already provided electricity savings for many rate payers, but the program has only captured a fraction of the savings that can be realized by extending and modestly modifying the current program. CREEDA has advocated for a specific carve out for CHP projects to enable greater numbers of commercial and institutional customers to take advantage of savings offered by a continuation of the ACT.

Thank you for your consideration of my comments.

Sincerely,

A handwritten signature in cursive script that reads "Mark Fennell".
