TRM	Technical Reference Manual

1 Overview of Portfolio

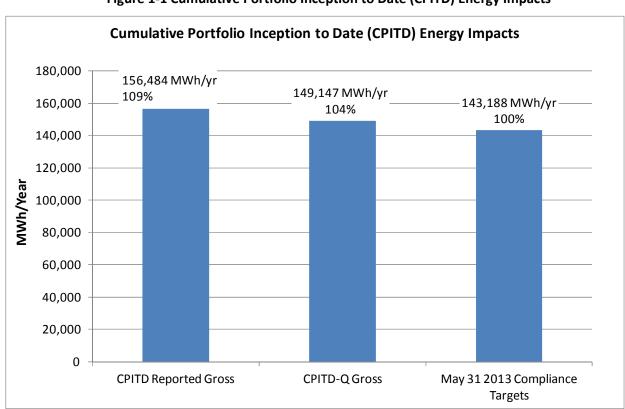

Pennsylvania Act 129 of 2008 signed on October 15, 2008, mandated energy savings and demand reduction goals for the largest electric distribution companies (EDCs) in Pennsylvania. Each EDC submitted energy efficiency and conservation (EE&C) plans—which were approved by the Pennsylvania Public Utility Commission (PUC)—pursuant to these goals. This report documents the progress and effectiveness of the EE&C accomplishments for Pennsylvania Power Company ("Penn Power" or "Company") in the third quarter of Program Year Four (PY4) defined as December 1, 2012 through February 28, 2013, as well as the cumulative accomplishments of the programs since inception.

1.1 Summary of Achievements

Penn Power has achieved 109 percent of the May 31, 2013 energy savings compliance target, based on cumulative program inception to date (CPITD) reported gross energy savings¹, and 104 percent of the energy savings compliance target, based on verified CPITD gross energy savings through Plan Year 3 and PYTD gross energy savings achieved through Quarter 3 (CPITD-Q)², as shown in **Figure 1-1**.

¹ CPITD Reported Gross Savings = CPITD Reported Gross Savings through PY3 + PYTD Reported Gross Savings. All savings reported as CPITD reported gross savings are computed this way.

² CPITD-Q Gross Savings = CPITD Verified Gross Savings through PY3 + PYTD Reported Gross Savings. All savings reported as CPITD-Q gross savings are computed this way. CPITD-Q savings provide the best available estimate of savings achieved through the current quarter. CPITD Verified Gross Savings will be reported in the annual report.

Based on preliminary results, Penn Power has achieved 49 MW of load reductions during the Top 100 hours of 2012, representing 100 percent of the May 31, 2013 demand reduction compliance target as shown in **Figure 1-2**³. Please note that this includes contributions from energy efficiency programs contributions from demand reduction programs operated during the summer of 2012. When including all measures installed to date, the Company achieved 50 MW of cumulative peak load reductions based on verified CPITD reported gross demand reductions through Plan Year 3 and PYTD gross demand reductions achieved through Quarter 3 (CPITD-Q).

³ These figures include contributions from energy efficiency programs through PY4Q3. The peak demand coincidence factor for all residential CFLs distributed CPITD has been updated to 8.8% from 5.0%. The figures also include line loss factors, calculated as functions of actual and reconstructed (for Act 129 "addbacks") loads for each hour.

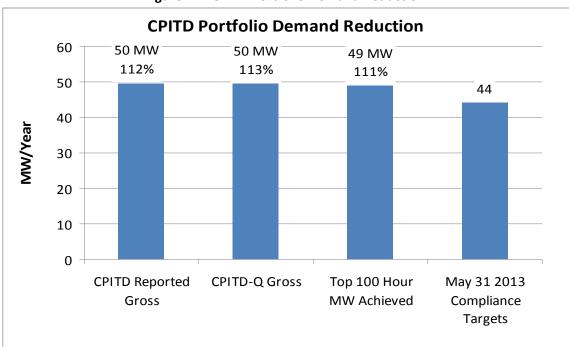

Figure 1-2. CPITD Portfolio Demand Reduction⁴

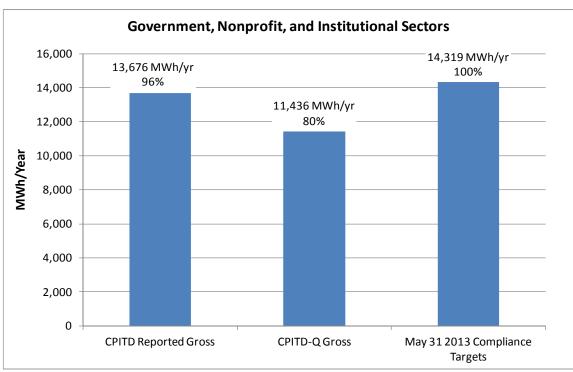

There are 7 measures available to the low-income sector. The measures offered to the low-income sector therefore comprise 17 percent of the total measures offered. As required by Act 129, this exceeds the fraction of the electric consumption of the utility's low-income households divided by the total electricity consumption in the Penn Power territory. (11 percent).⁵ The CPITD reported gross energy savings achieved in the low-income sector is 16,555 MWh/yr; this is 11 percent of the CPITD total portfolio reported gross energy savings⁶.

⁴ CPITD reported and CPITD-Q numbers include line losses and impacts for all programs through PY4Q3. The top 100 hour achieved MW reflect preliminary verified values achieved during the top 100 hours of the summer of 2012 (defined as June 1 through September 30, 2012), and include impacts of demand response programs, line losses, and impacts from EE measures installed prior to the top 100 hours.

⁵ Act 129 includes a provision requiring electric distribution companies to offer a number of energy efficiency measures to low-income households that are "proportionate to those households' share of the total energy usage in the service territory." 66 Pa.C.S. §2806.1(b)(i)(G). The legislation contains no provisions regarding targets for participation, or energy or demand savings.

⁶ The Energy Savings achieved in the low-income sector in the PY4Q2 report are calculated according to the procedure in the PY3 Annual report (page 14). This is a shift from the previous calculation procedure that was used for the PY4Q1 report, and the new methodology results in smaller claimed impacts, thus the adjustment from the PY4Q1 report.

Penn Power achieved 96 percent of the May 31, 2013, energy reduction compliance target for government, nonprofit and institutional sector, based on CPITD reported gross energy savings, and 80 percent of the target based on verified CPITD gross energy savings through Plan Year 3 and PYTD gross energy savings achieved through Quarter 3 (CPITD-Q)⁷, as shown in **Figure 1-3**.

1.2 Program Updates and Findings

- **Residential Demand Reduction Program**: This program was operated between June 1 and September 30, 2012. As of this writing, the gross / net impact evaluation effort is underway.
- **Residential Home Energy Audits and Outreach Program**: There are three (3) components to this program. The Online audit and Whole House Comprehensive audit components for all PA companies were not changed during PY4 Q3. There was one slight change to the Walk Thru audit program; the \$50 participation fee was waived beginning in October 2012 in an effort to boost participation and will continue through May 31, 2013.
- **Residential Appliance Turn-In Program:** No changes to this program during PY4 Q3.
- **Residential Energy Efficiency HVAC Program:** No changes to this program during PY4 Q3.

⁷ Reference footnote 2 on page 4.

- **Residential Energy Efficient Products Program:** No changes to this program during PY4 Q3.
- **Residential New Construction Program:** No changes to this program during PY4 Q3.
- **Residential Behavioral Modification and Education Program:** The CSP for the Behavior Modification Program is evaluating the savings calculation at this time.
- **Residential Multiple Family Program:** No changes to this program during PY4 Q3.
- Residential Low-Income (WARM) Programs: No changes to this program during PY4Q3.
- **Commercial / Industrial Small Sector Equipment Program:** No changes to this program during PY4 Q3.
- **Commercial / Industrial Large Sector Performance Contracting / Equipment Program**: No changes to this program during PY4 Q3.
- Commercial / Industrial Large Sector Demand Response Program CSP Mandatory and Voluntary Curtailment Program ("PJM Demand Response"): This program was operated between June 1 and September 30, 2012. As of this writing, the gross / net impact evaluation effort is underway.
- Governmental / Non-Profit Street Lighting Program: No changes to this program during PY4 Q3.
- Governmental / Non-Profit Program: No changes to this program during PY4 Q3.
- Governmental / Remaining Non-Profit Program: No changes to this program during PY4 Q3.

1.3 **Evaluation Updates and Findings**

• Residential Demand Reduction Program

Impact evaluation for this program is complete on a preliminary basis⁸. ADM has confirmed that the implementer, BPL Global, has calculated hourly impacts in accordance to the procedure described in the M&V plan.

⁸ The program's impacts at the hourly level have been verified on a preliminary basis. However the top 100 hour definitions and the hourly line loss factors may change based on the additional contributions from energy efficiency projects that are not yet evaluated.

• Residential Home Energy Audits and Outreach Program

This program has three distinct components: (i) conservation kits sent to customers that complete online or telephone home energy audits; (ii) direct installation of low cost measures; and (iii), comprehensive walk through audits with direct installation of low-cost measures coupled with incentives on capital cost improvements. The conservation kits have accounted for the vast majority of the program impacts in PY4. Preliminary realization rates have been constructed from information gained from the evaluation effort conducted for PY3, coupled with baseline changes in the 2012 TRM. These will be updated as PY4 evaluation survey results become available.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
Conservation Kits	Conduct up to 23 on-site visits and several hundred online surveys.	ADM has conducted desk reviews of the tracking data and has constructed preliminary realization rates that consider historical "in service rates" and successful delivery rates, as well as changes in the TRM protocols.
Direct Install of Low- Cost Measures	Sample once for entire PY4, conduct engineering review and verification surveys.	ADM has conducted a brief desk review of tracking data. So far, the direct install components contribute about 1% of total program savings.
Whole House Comprehensive Audits with Capital Cost Measures Installed	Sample once for entire PY4, conduct engineering review and verification surveys.	ADM has conducted a brief desk review of tracking data. So far, the direct install components contribute about 1% of total program savings.

Table 1.3.1 Residential Home Energy Audits and Outreach Program Evaluation Summary

• Residential Appliance Turn-In Program

Preliminary realization rates have been constructed from information gained from the evaluation effort conducted for PY3. These will be updated as PY4 evaluation survey results become available.

Table 1.3.2 Residential Appliance Turn-In Program Evaluation Summary

Program Component	Evaluation Activities Planned	Evaluation Activities Status
Refrigerator	Tracking System/TRM Review	ADM has conducted preliminary desk
Freezer	Verification Surveys	reviews. First sample will be drawn from the Q1 and Q2 populations.
Room air conditioner		

• Residential Energy Efficiency HVAC Program

The sampling scheme for this program includes four qualitative strata. Evaluation activities for the strata are listed below. Preliminary realization rates are based on information gained from the PY3 evaluation. These will be updated as PY4 evaluation results become available.

Program Component	Evaluation Activities Planned	Evaluation Activities Status	
Air Source Heat Pump	Invoice + calculation review (large sample) On-Site inspection (smaller sample)		
Ground Source Heat Pump	Invoice + calculation review (large sample) On-Site inspection (smaller sample)	PY4 evaluation activities to date include calculation and ex-ante reviews and assignment of preliminary realization rate based on desk review and application of updated TRM protocols. The average efficiencies and capacities from the PY3 evaluation are used to generate preliminary realization rates for this program.	
Central Air Conditioning	Invoice + calculation review (large sample) On-Site inspection (smaller sample)		
HVAC tune-ups	Invoice + calculation review (large sample) Telephone Verification Survey (smaller sample)		

Table 1.3.3 Residential Energy Efficiency HVAC Program Evaluation Summary

• Residential Energy Efficient Products Program

The sampling scheme for this program includes several qualitative strata for lighting and appliances. Evaluation activities for the strata are listed below.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
CFL Buydowns	Invoice + calculation review	
CFL Giveaways	Invoice + calculation review	PY4 evaluation activities to date include
Appliances	Invoice + calculation review (large sample, stratified by appliance type)	calculation and ex-ante reviews and assignment of preliminary realization rate based on desk review and application of updated TRM protocols.
	On-Site inspection (smaller sample, focus on clothes washers)	

• Residential New Construction Program:

This program accounts for less than 1% of the PYTD portfolio impacts.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
New Homes	Stratified Sample REM/Rate modeling and calculation review (largest sample) Implementer QC Inspection review (smaller sample) On-Site inspection (smallest sample)	ADM has met with the implementer to discuss the results of last year's evaluation. ADM has reviewed tracking data to identify projects that may have potential modeling issues related to ground source heat pumps. The projects approved so far do not appear likely to have such modeling issues.

Table 1.3.5 Residential New Construction Program Evaluation Summary

• Residential Behavioral Modification and Education Program

The impact evaluation effort for this program will involve billing analysis. M&V plans have been completed and initial data requests have been made by the M&V team.

• Residential Multiple Family Program

This program accounts for less than 1% of the PYTD portfolio impacts. The program recruits multifamily housing management or maintenance staff to distribute or install conservation kits that contain CFLs and LED night lights. The evaluation sample is stratified with multifamily housing complexes as the sampling units.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
Conservation Kits	Telephone Verification Surveys	No sampling or surveying has occurred yet. ADM will begin sampling for surveys when the program population size is sufficiently large relative to the expected PY4 population size.

Table 1.3.6 Residential Multiple Family Program Evaluation Summary

• Residential Low-Income (WARM) Programs

For the PY4 evaluation, ADM will conduct billing analysis of all WARM Plus participants from PY3. The results of the billing analysis will be averaged with the PY3 evaluation results to develop deemed savings for the PY4 installations.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
WARM Plus	Billing analysis planned on PY3 participants.	ADM has conducted desk reviews and has applied preliminary realization rates defined as the ratio of the verified per-unit savings from the PY3 evaluation to the reported per-unit savings in the PY4 tracking data.
WARM Extra Measures	Invoice + calculation review, verification survey.	ADM has conducted a preliminary review of the tracking data. Verification surveys will occur late in the evaluation cycle.

Table 1.3.7 Residential Low-Income (WARM) Programs Evaluation Summary

• Commercial / Industrial Small Sector Equipment Program

This program offers energy efficiency measures to small commercial/industrial customers. The impact evaluation utilizes stratified sampling. First, the population is stratified into qualitative strata that consist of standardized measure groups as listed below. Each qualitative stratum may contain several quantitative strata based on the expected magnitude of the impacts. The sample sizes are based on past program experience regarding the variability of the realization rates for sampled projects.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
"Lighting for Business" Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations. Desk review completed for C/I CFL kits.
Prescriptive HVAC, Motor, and Refrigeration Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Custom Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations. ADM conducts ongoing checks of evaluability for pending projects.

Table 1.3.8 Commercial / Industrial Small Sector Equipment Program Evaluation Summary

• Commercial / Industrial Large Sector Performance Contracting / Equipment Program

This program offers similar measures as the Small C/I and Government Equipment programs. The evaluation approach for this program is similar to the one employed for the Small C/I program.

Program Component	Evaluation Activities Planned	Evaluation Activities Status
"Lighting for Business" Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Prescriptive HVAC, Motor, and Refrigeration Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Custom Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations. ADM conducts ongoing checks of evaluability for pending projects.

 Table 1.3.9 Commercial / Industrial Large Sector Equipment Program Evaluation Summary

Commercial / Industrial Large Sector Demand Response Program – CSP Mandatory and Voluntary Curtailment Program ("PJM Demand Response")

Impact evaluation for this program is complete on a preliminary basis⁹. The evaluation effort involved stratified sampling and inspection of the hourly demand reduction calculations for selected projects. Projects that have base load estimation protocols accepted by and registered by PJM are evaluated on the basis of those protocols. Projects that do not have PJM registrations are evaluated with protocols that are identical to or similar to the PJM base load estimation protocols.

⁹ Site-level hourly impacts verified on a preliminary basis are undergoing final quality assurance checks for a stratified sample of projects to meet ±15% relative precision at the 85% confidence level. However the top 100 hour definitions and the hourly line loss factors may change based on the additional contributions from energy efficiency projects that are not yet evaluated.

Governmental / Non-Profit Street Lighting Program

This program accounts for less than 1% of the PYTD portfolio impacts.

Table 1.3.10 Governmental / Non-Profit Street Lighting Program Evaluation Summary

Program Component	Evaluation Activities Planned	Evaluation Activities Status
"Street and Area Lights" Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.

• Governmental / Non-Profit Program:

This program accounts for less than 1% of the PYTD portfolio impacts.

Table 1.3.11 Governmental / Non-Profit Program Evaluation Summary

Program Component	Evaluation Activities Planned	Evaluation Activities Status
" Lighting for Business" Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Prescriptive HVAC, Motor, and Refrigeration Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Custom Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations. ADM conducts ongoing checks of evaluability for pending projects.

• Governmental / Remaining Non-Profit Program:

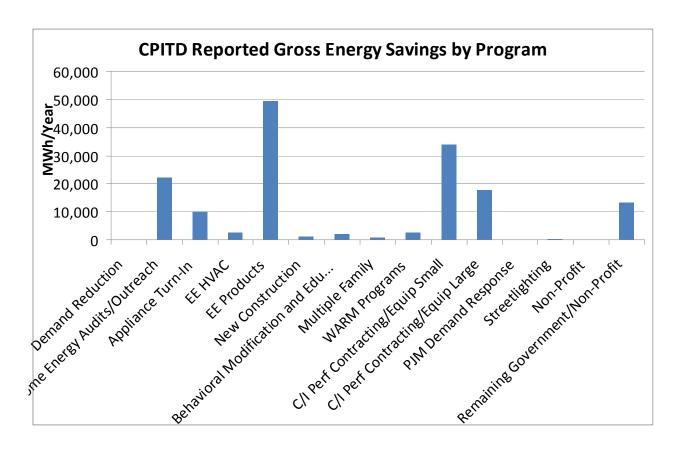

This program offers similar measures as the Large and Small C/I Equipment programs. The evaluation approach for this program is similar to the one employed for the Small C/I program.

Table 1.3.11 Governmental / Remaining Non-Profit Program Evaluation Summary	

Program Component	Evaluation Activities Planned	Evaluation Activities Status
"Lighting for Business" Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Prescriptive HVAC, Motor, and Refrigeration Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations.
Custom Applications	Stratified sampling and on-site visits	First sample to be drawn from Q1 and Q2 populations. ADM conducts ongoing checks of evaluability for pending projects.

2 Summary of Energy Impacts by Program

A summary of the reported energy savings by program is presented in **Figure 2-1**.

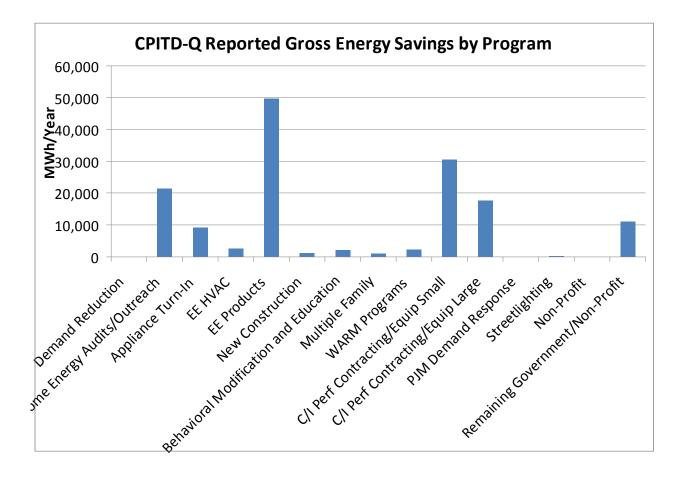

Figure 2-2. CPITD-Q Reported Gross Energy Savings by Program

A summary of energy impacts by program through PY4 Q3 is presented in **Table 2-1**.

Program	Participants		Reported Gross Impact (MWh/Year)				Preliminary Realization Rate ¹

Table 2.1 EDC Pa	ported Participatio	n and Groce Energy	y Savings by Program
Table 2-1. EDC Rej	porteu Participatio	n and Gross Energ	sy Savings by Program

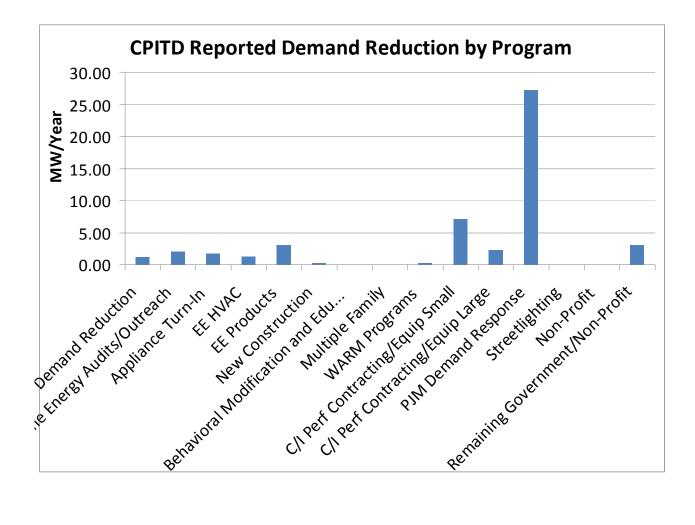

NOTES:

1. Preliminary Realization Rates are based on evaluation activities and findings conducted on a partial sample set. These realization rates are not based on a statistically significant sample and are subject to change until the full evaluation is complete at the end of the program year. In this report, the realization rates for residential programs are based on tracking system review, incorporation of TRM updates, and historical verification/in-service rates. For nonresidential programs, a preliminary placeholder of 95% is used based on historical program performance.

3 Summary of Demand Impacts by Program

A summary of the reported demand reduction by program is presented in **Figure 3-1**.

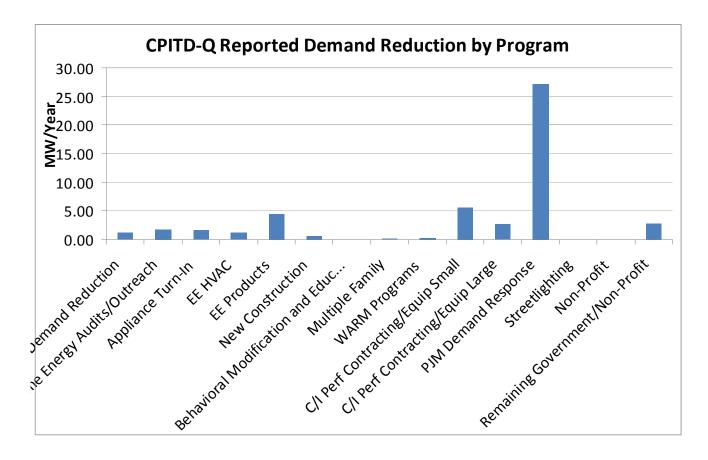

Figure 3-2. CPITD-Q Reported Demand Reduction by Program

A summary of demand reduction impacts by program through PY4 Q3 is presented in **Table 3-1**¹⁰.

Program		Participant	s		Reported G	Gross Impact	:	Preliminary Realization
				(MW)			Rate ¹	
	IQ	PYTD	CPITD	IQ	PYTD	CPITD	CPITD-Q	PYTD
