**LIST OF CHANGES MADE BY THIS TARIFF**

**RULE 37 – ENERGY EFFICIENCY AND CONSERVATION RIDER – PAGE 43W:**

The Energy Efficiency and Conservation Rider has been modified to include cost recovery for expenses related to the development and implementation of the Customer Account Number Access Mechanism.

**RULES AND REGULATIONS (continued)**

**37. ENERGY EFFICIENCY AND CONSERVATION RIDER**

37-a General. The Company shall recover costs related to the Company's Energy Efficiency and Conservation Plan ("EECP") for 2012-2015 through an Energy Efficiency and Conservation Rider ("EEC Rider"). In addition, the Company shall recover costs related to the development and implementation of a Customer Account Number Access Mechanism through the EEC Rider. The rates under the EEC Rider shall be computed separately for each of the three customer classes listed below. The EEC Rider Rate for each class shall be as follows: (C)

Customer Class	Rate Schedules	EEC Rider Rate ( $\$/kWh$ )
Class 1 – Residential	R, RWT, RTU, GS-5 and the residential portion of Rate Schedules CWH, OL, SOL, MHOL, or successor rate schedules	0.182
Class 2 – Non Residential	All Non-Residential Rate Schedules except for Rate Schedules LP and IH	0.163
Class 3 – Non Residential	LP and IH	0.007

The EEC Rider shall apply to all customers whether they are receiving generation service from the Company or not, and shall be subject to the Tax Adjustment Surcharge.

37-b Calculation. The EEC Rider shall be determined as follows:

1. Costs to be recovered shall include Company incurred costs to implement its Commission approved EECP during each plan year, including all costs incurred to develop and administer the Company's EECP. The costs of each EECP program shall be directly assigned to the applicable customer class. Costs which can not be directly assigned to a particular residential or non-residential customer class shall be allocated based on sales. Additional costs to be recovered include the costs incurred to develop and implement the Commission approved Customer Account Number Access Mechanism. These additional costs shall be allocated to the customer class based on the number of customers in each class. (C)
2. The Residential EEC Rider rate shall be calculated in accordance with the formula below and shall be rounded to the third decimal:

$$\text{Residential EEC Rider Rate} = ((Cr / Sr) - (Er / Sr)) / (1-T) \text{ where}$$

Cr = Projected Annual Residential EECP Costs.

Sr = Projected Annual Residential Class Sales.

Er = Net over or under collection of the Residential EEC Rider resulting from the difference between the EEC Rider revenues received and the EECP costs incurred. The over or under collection shall be calculated annually and include the actual over or under collection where actual data is known for the reconciliation period and an estimate for those revenues and costs still unknown for the reconciliation period. The difference between the actual net over or under collection related to the estimate shall be included in the net over or under collection in the following year.

T = Total Pennsylvania gross receipts tax rate as reflected in the Company's base rates, expressed in decimal form.

(C) Indicates Change
