1 Overview of Portfolio

Pennsylvania Act 129 of 2008 signed on October 15, 2008, mandated energy savings and demand reduction goals for the largest electric distribution companies (EDCs) in Pennsylvania for Phase I (2008 through 2013). In 2009, each EDC submitted energy efficiency and conservation (EE&C) plans—which were approved by the Pennsylvania Public Utility Commission (PUC)—pursuant to these goals. The PUC established energy savings and demand reduction goals for Phase II (June 2013 through May 2016) of the Act 129 programs. Each EDC filed new EE&C plans with the PA PUC in late 2012 for Phase II. These plans were subsequently approved by the PUC in early 2013.

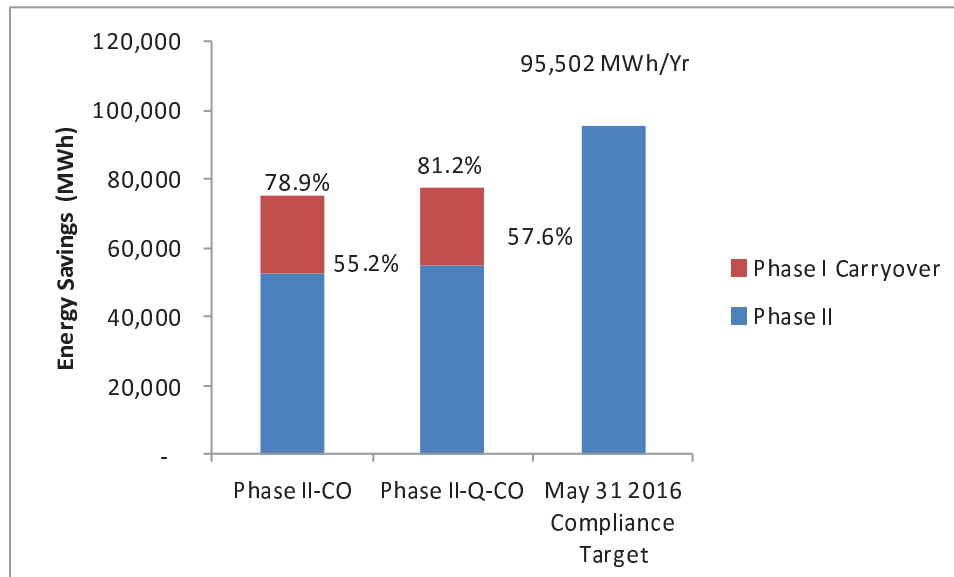

Implementation of Phase II of the Act 129 programs began on June 1, 2013. This report documents the progress and effectiveness of the Phase II EE&C accomplishments for Pennsylvania Power Company (Penn Power or Company) in the 2nd quarter of Program Year 6 (PY6), defined as September 1, 2014 through November 30, 2014, as well as the cumulative accomplishments of the programs since inception of Phase II. This report also includes the energy savings carried over from Phase I that will be applied towards the Company's savings compliance targets for Phase II. The Phase I carryover values as listed in this quarterly report are based on the Company's Final Phase I report to the Commission.

The Company's EM&V contractor, ADM Associates, is evaluating the programs, which includes measurement and verification of program savings.

1.1 Summary of Achievements

Penn Power has achieved 55.2 percent of the May 31, 2016 energy savings compliance target, based on cumulative program inception to date (Phase II) reported gross energy savings¹, and 81.2 percent of the energy savings compliance target, based on Phase II-Q-CO² “(or Phase II-CO until verified savings are available for PY5) gross energy savings achieved through PY6Q2, as shown in Figure 1-1. (Phase II-Q)³ is also shown in Figure 1-1.

Figure 1-1: Cumulative Portfolio Phase 2 Inception to Date (Phase II) Energy Impacts

Penn Power has achieved 5.4 MW of demand reduction through PY6Q2⁴.

¹ Phase II Reported Gross Savings = Phase II Reported Gross Savings from the beginning of Phase II through the end of the current quarter. All savings reported as Phase II reported gross savings are computed this way.

² Phase II-Q-CO Gross Savings = Phase II verified gross savings from the beginning of Phase II including verified Carry Over Savings from Phase I + PYTD reported gross savings. The carryover portion of the Phase II-Q-CO Gross Savings listed herein is based on verified impacts reported in the Company’s Final Phase I report to the Commission.

³ Phase II-Q Gross Savings = CPITD Verified Gross Savings from the beginning of Phase II + PYTD Reported Gross Savings. This excludes Phase I carry over savings. All savings reported as Phase II-Q gross savings are computed this way. Phase II Verified Gross Savings will be reported in the annual report. For the first quarter of each program year, the Company reports Phase II-Q Gross Savings as Phase II Savings as verified savings will not be reported until November 15.

⁴ There is no compliance target for demand reduction in Phase II.

Figure 1-2: Phase II Portfolio Demand Reduction

There are six broad groups of measures available to the low-income sector at no cost to the customer, compared to a total of 40 broad measure categories included in the Company’s EE&C Plan. These groups of measures offered to the low-income sector therefore comprise 15.0% of the total measures offered. As required by the Phase II goal, this exceeds the fraction of the electric consumption of the utility’s low-income households divided by the total electricity consumption in the Penn Power territory which is 10.6%.⁵ The Phase II reported gross energy savings achieved in the low-income sector is 8,843 MWh/yr⁶; this is 16.8% percent of the Phase II total portfolio reported gross energy savings. This exceeds the goal of 4.5% of the Phase II savings.

Penn Power has also achieved 40.7% of the May 31, 2016, energy reduction compliance target for government, nonprofit and institutional sector, based on Phase II reported gross energy savings, and 46.0% of the target based on Phase II-Q-CO gross energy savings achieved through PY6Q2, as shown in Figure 1-3.

⁵ Act 129 includes a provision requiring electric distribution companies to offer a number of energy efficiency measures to low-income households that are “proportionate to those households’ share of the total energy usage in the service territory.” 66 Pa.C.S. §2806.1(b)(i)(G). The Company’s Act 129 EE&C Plan includes hundreds of distinct measures that are consolidated into 128 archetypal measures and 40 broad measure categories. For low-income reporting purposes, six of these 40 broad measure categories are offered at no cost to the Company’s low-income residential customers.

⁶ These estimates are extrapolated from official PY5 verified results, which were calculated through participant surveys.

1.2 Program Updates and Findings

- Appliance Turn-in:**
 Residential participation is tracking to PY6 forecasts. Penn Power continues to market the program through bill inserts, television commercials, newspaper advertisements, and internet advertisements. Over 450 appliances were picked up and recycled during PY6Q2.
- Energy Efficient Products:**
 Program continues to track ahead of goal in Penn Power primarily due to POS lighting sales and the consumer electronics program.
- Home Performance:**
 New Construction: During the quarter, 82 ENERGY STAR rated homes were completed under the program. We continued seeing opportunities for program promotions such as the articles in At Home in Berks Magazine.

 Online Audit: Penn Power continues to send Energy Conservation Kits to customers as a result of completing an Online Audit. During PY6Q2, over 130 kits were delivered to Penn Power customers.

 Comprehensive Audit: Penn Power continues to recruit new contractors into program and market program to customers. Penn Power also continues to host bi-monthly program webinars with contractors to go over best practices and program updates.
 Behavior Modification: Customers continue to receive Home Energy Reports with energy savings tips. Penn Power customers received Home Energy Reports highlighting the WARM period in this timeframe.

Opt-in Kits: During PY6Q2, over 2,200 Opt-In Kits were shipped to customers in Penn Power upon enrollment into the program.

Schools Kits: The “Energized Guyz” was performed in elementary schools across Penn Power and corresponding curriculum sent to the schools.

- **Low Income / WARM:**

The Program continued its marketing efforts to identify and reach income-qualified customers throughout the Penn Power service territory during PY6Q2. WARM Extra Measures/WARM Plus: Peoples, Equitable and TW Phillips Gas Companies and WARM Program staff members met with WARM Extra Measures/WARM Plus program contractors to roll out coordination efforts in overlapping areas.

Multi Family: Penn Power continues to identify and serve Multi-Family units/customers for WARM Plus. WARM brochures and application packets were provided to “The ONE Stop Program Manager” at ACTION Housing. ONE Stop is a multi-family energy conservation project that provides owners/managers/landlords of multi-family dwellings with information and services that may be available to their tenants and/or their multi-family units. This project is available in the Penn Power, Penelec, and West Penn Power service territories.

Low Income Low Use: Penn Power distributed energy savings measures such as CFLs and showerheads at low income events which were held throughout the service area. In addition, a targeted Low Income Low Use (LILU) kit was mailed to 943 Penn Power customers.

- **C/I Small Energy Efficient Equipment:**

The Company continues to receive and process applications under Phase II for this program. The On-line Application Portal that was launched in June 2014 has been well accepted in the market place by customers and program allies. Through the end of September 2014, 99% of all applications received are through this Portal. The ICSP continues to provide direct assistance to customers that are unable to submit an online application. The ICSP has revised its 60-Day outlook marketing plan and, based on the year-to-date results in this sector, the ICSP is planning to do targeting mailing and outreach to program allies and customer in this sector.

- **C/I Small Energy Efficient Buildings:**

Penn Power has shipped out 3,142 kits to customers in this program. The On-line Application Portal that was launched in June 2014, has been well accepted in the market place by customers and program allies. To increase participation in this program, the ICSP has developed a Building Program Guidelines plus number of marketing pieces that are targeted at professionals and decision makers in this market segment. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build a momentum in this program. An uptick in new project applications coming through this program are also a result of outreach to upstream program allies.

- **C/I Large Energy Efficient Equipment:**

Penn Power continues to receive and process applications under Phase II. The On-line Application Portal that was launched in June 2014 has been well accepted in the market place by customers and program allies. Through the end of September 2014, 99% of all applications received are through this Portal. The ICSP continues to provide direct assistance to customers that are unable to submit an online application. Based on the year-to-date results, the ICSP has revised its 60-Day marketing plan to maintain the current momentum in this program.

- **C/I Large Energy Efficient Buildings:**

Penn Power has shipped out 20 kits to customers in this program. The On-line Application Portal that was launched in June 2014, has been well accepted in the market place by customers and program allies. To increase participation in this program, the ICSP has developed a Building Program Guidelines plus number of marketing pieces that are targeted at professionals and decision makers in this market segment. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build a momentum in this program. An uptick in new project applications coming through this program are also a result of outreach to upstream program allies.

- **Government & Institutional:**

Penn Power continues to receive and process applications under Phase II. The bonus program that was launched ended at the end of September, 2014. To continue to build momentum from the first bonus program, Penn Power launched a second bonus program that runs from November 1, 2014 through April 30, 2015. Through this new bonus program, Penn Power is offering an additional \$0.02/kWh saved for lighting and non-lighting projects.

The On-line Application Portal that was launched in June 2014 has been well received in the market place by customers and program allies. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build on the momentum achieved during the bonus period.

ADM has communicated to the Company's implementation staff the data collection requirements and calculation procedures outlined in the 2014 PA TRM for measures offered under each program. Nonresidential lighting projects with ex ante savings above 800 MWh and other nonresidential projects with ex ante savings above 400 MWh are sampled with certainty and evaluated on an ongoing basis by ADM. Nonresidential lighting projects with ex ante savings above 500 MWh and other nonresidential projects with ex ante savings above 250 MWh are reviewed for evaluability on an ongoing basis by ADM, and data acquisition requirements for these projects are communicated to the ICSP. ADM will launch PY5 verification surveys and will begin on-site verification work on smaller non-residential projects in late winter 2015.
