**CONSERVATION SERVICE PROVIDER (“CSP”) APPLICATION
FOR REGISTRATION IN THE COMMONWEALTH OF PENNSYLVANIA**

Conservation Service Providers (“CSPs”) have a specific role under Act 129, which requires a covered Electric Distribution Company’s Energy Efficiency and Conservation (EE&C) plan to include one or more CSPs to implement at least a portion of the EE&C Plan. 66 Pa.C.S. § 2806.1(b)(1)(i)(E). CSPs provide information and technical assistance to EDCs on *measures* that enable a person to increase energy efficiency or reduce energy consumption. CSPs must have no direct or indirect ownership, partnership or other affiliated interest with an EDC. 66 Pa.C.S. § 2806.1 (m). Only registered CSPs may advise an EDC and/or provide consultation, design, or administration or management services to an EDC related to the implementation of the EDC’s EE&C Plan. As such, registration of business entities as approved CSPs is required before entering into a contractual agreement with an EDC exclusively for the provision of consultation, design, administration, management or advisory services regarding that EDC’s EE&C plan. This registry is not intended as a resource for business, whose sole purpose is the installation of measures, supplying of equipment or other contracting work for use by the general public and EDC customers. If providing such services, registration as a CSP is not required for entering into an agreement with an EDC.

Any CSP subcontractor with an annual contract cost that equals or exceeds 10% of the CSP annual contract cost and is directly performing services pursuant to a contract with a CSP which has contracted with an EDC after Commission approval should also register as a CSP. This does not include third party contractors which participate in or support an EE&C Plan but are not directly contracted with a CSP which has a direct contractual relationship with the EDC subject to Act 129.

To qualify an applicant must have at least two years of experience in providing program consultation, design, administration, management or advisory services related to energy efficiency and conservation services. CSP registration is not required of entities that limit their services to the installation of energy efficiency measures or the provision of equipment or materials to EDC customers or the public in general.

1. IDENTITY OF THE APPLICANT

k. Attach to this Application a brief biography or single page professional resume for all principal officers and management directly responsible for Applicant’s operations.

Curt Puckett has worked for over 34 years in the utility industry. Curt spent his early career with Consumers Energy, formerly Consumers Power Company located in Jackson, MI, in the areas of load research and energy efficiency/demand response evaluation. Curt was a key member of the DSM Working Group of the Michigan Electricity Options Study, 1986-87. He was actively involved in the development of the Company's demand-side management and integrated resource planning strategies, presenting expert testimony for the Company on these issues in Case No. U-9172 and Case No. U-8871.

In 1989, Curt started RLW Analytics with Dr. Roger L. Wright focusing on the growing need to evaluate the performance of energy efficiency and demand response programs using statistical techniques and engineering rigor. Curt began by establishing and managing the East Coast Operations with its primary office in Middletown, CT. In 2005, Curt was named President and Chief Executive Officer. During his tenure at RLW, Curt’s primary focus has been on the design and implementation of utility load research, end-use metering, marketing, and energy efficiency evaluation projects. Curt was responsible for the Company’s Load Research Service Bureau directed at providing design and analysis services to gas and electric utility clients. Recent emphasis in the area of load research project design has been the need to satisfy both the existing regulatory requirements and the anticipated requirements of the deregulated market. In addition, Curt helped develop innovative software applications including the SAS-based Load Research System that implements model-based statistical sampling (MBSS) sample design and interval load analysis techniques. In addition, Curt guided the development of Visualize-ITTM data visualization tool for analyzing and communicating whole premise and end-use load information.

FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented value, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time
