Attention Commissioners:

I wish to tell you why you should approve the requested electric rate increase by PECO. The electric rates requested by the company may be found in Electric Tariff no. 5.

I have been buying PECO stock for 55 years for my retirement years. I am 82 years old and PECO dividend is a major part of my income. I have watched the PUC strangle the company by limiting the rate increases to a point there is not enough profit to pay a decent dividend return on investment. PECO has been forced to lower the dividend and the value of the stock has gone from a high of \$90 a share to around the mid 30's a share. You can't operate a company without paying a proper return on money invested. If you want a good service pay a decent return on money invested. No profit! No service!

Respectfully:
John A. Lauer
