RE: Application of Preferred Medical Transport, Inc., A-2015-2468549; A-6415763
— SUPPLEMENTAL EXHIBITS FOR VERIFIED BUSINESS PLAN AND STATEMENT

Dear Secretariat:

Please accept the attached submissions as exhibit supplements on the verified plan submitted on or about January 11, 2016 for the above referenced application. The attached will supplement Ex. A (updated DPH Certificate); Ex. B (wheelchair protocols); Ex. E (financials). The affidavit of Val McMillion (previously omitted inadvertently), and the verified statement of FMC are also attached in support of the the public need for the services sought in this application. Please contact me with any questions at 888-491-0333 x2.

Very truly yours,

John J. Dorsey, Jr

Purpose:
Transporting/Safety Procedures

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

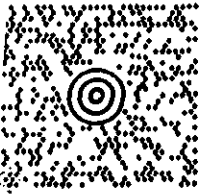

Scope: All employees and volunteers

- Because of liability, you may not physically assist a person into the wheelchair.
- If you push a wheelchair to a person, lock the brakes and let a family member/aide assist person into the wheelchair.
- Do not go to a vehicle to help a person into a wheelchair.
- Ensure the patient is in chair properly and secured.
- Ensure both footrests are in the proper position.
- Ensure the chair's brakes are unlocked before pushing patient to vehicle.
- Always back patient onto lift, making sure patient is face front.
- Lock brakes and secure patient onto lift.
- Visually view patient on lift to make sure all above procedures have been followed before lifting patient into vehicle
- Visually select your route to travel.
- It takes approximately fifteen pounds of body torque to start the chair to move.
- Always use both hands while transporting.
- When moving an individual in a wheelchair, push the wheelchair from behind.
- Always keep a sharp eye out for others while moving. Use the right side of the hall as if you were driving your car.
- Always prepare to stop suddenly if necessary.
- Proper footwear is a **MUST** while transporting. Improper shoes **WILL** cause injury to yourself and the individual being transported.
- Wheelchairs should be backed over any irregularities in the floor.
- On a level surface, an individual can push and control approximately three times his/her own body weight. It is less for a person that does not possess much upper body strength.
- When you reach your destination, reverse the procedures with which you began (i.e. raise the footrests in the proper position, lock brakes on both wheels). Do not physically assist the individual out of the chair.
