

## Notice to Plead Written response

### Mission Statement

The Pa Public Utility Commission balances the needs of consumers and utilities, ensures safe and reliable utility service at reasonable rates, protects the public interest, educates consumers to make independent and informed utility choices.

In December of 2015 the PA Public Utility Commission gave Columbia Gas of Pa \$ 28 million. Now under tariff #9 Supplement # 241 Columbia Gas of Pa. want's \$55 million. For what? I seen the tariff and all I seen was classification. I tried to get legal help but couldn't I live on social security and get \$12,500. ~~I want~~ I want the tariff to order Columbia Gas of Pa workers to lay the lines as Kinsley Construction does. Not do a very good job. Contractors shouldn't be allowed. In August a contractor in Adams County bucked up and hit a valve and almost destroyed an entire neighborhood. The meters read in cubic feet not therms

I want the tariff to:  
give Columbia Gas of Pa. positions  
I want the bill to be read in cubic feet  
of gas as this is how it's traded on  
CME Group's website.

I want Columbia Gas workers to  
install the gas lines as there is too many  
problems with Kinsley Construction  
in regards to come backs. On Nov. 19  
a number of workers were standing around  
waiting for black top for about an  
hour. Just how much does the  
rate payer pay to have workers  
just to stand around.

Please start balancing your decisions

Mr. Altland
