Final Rulemaking Order of Public Utility Commission,  
adopting Amended Section 59.18, Sep. 13, 2014, 44 Pa.B 5835.....3-4, 21, 25-26

**I. CONCISE STATEMENT OF THE CASE**

The Formal Complaints of the City of Reading (the “City”) and the Centre Park Historic District, Inc. (“CPHD”), referred to collectively herein as “City Parties”, allege, in short, that UGI Utilities, Inc. (“UGI”) did not consider interior meter placements in historic districts as required by 52 Pa. Code § 59.18 (“Section 59.18”) and that UGI did not comply with the safety provisions of Section 59.18 when they relocated meters from the inside to the outside of buildings in the City of Reading. UGI now brings this Motion for Summary Judgment to dispose of a number of issues based on arguments alleging that the Public Utility Commission (“Commission” or “PUC”) does not have jurisdiction over the matter and that certain factual issues, allegedly, do not require a hearing. The Commission should deny UGI’s Motion for Summary Judgment as set forth herein because: (1) UGI’s arguments that the City Parties’ Complaints and relief sought are not within the jurisdiction of the PUC are inconsistent with the law; (2) UGI’s arguments with regard to the facts show there are factual disputes that must proceed to hearing; and (3) on the legal issues raised in UGI’s Motion for Summary Judgment, UGI is not entitled to judgment as a matter of law.<sup>1</sup>

**II. PROCEDURAL HISTORY**

On November 25, 2015, CPHD filed a Formal Complaint which alleged that UGI violated Section 59.18 regarding the placement of meters in the historic districts of the City of Reading. UGI filed an answer to CPHD’s formal complaint on December 15, 2015.

On February 17, 2016, the City filed a Formal Complaint against UGI, also challenging UGI’s meter relocation program within the City’s historic districts on the basis that UGI violated Section 59.18. The City also challenged UGI’s outside meter placements on the basis that UGI

---

<sup>1</sup> As set forth below, City Parties agree to withdraw certain challenges in an effort to limit the scope of the issues before the Administrative Law Judge.

placed meters in dangerous locations/conditions, in violation of Section 59.18 and 49 CFR § 192.353. UGI filed an Answer to the City's Formal Complaint on March 14, 2016, as well as Preliminary Objections which were denied by Interim Order dated March 29, 2016. The Formal Complaints of CPHD and the City were consolidated by Order dated March 30, 2016. UGI then filed a Petition for Interlocutory Review, which was denied by the PUC by Opinion and Order dated February 9, 2017.

By her Sixth Prehearing Order dated March 21, 2017, the Honorable Mary D. Long ordered the City and CPHD to prepare a spreadsheet listing the meters contested by the City Parties, and indicating (1) the date a permit was issued, if any, by the City and (2) the date the meter was relocated. The prehearing order directed UGI to respond and either stipulate or object to the data provided. The City Parties were excused from providing "the date the meter was relocated" by the Eighth Prehearing Order in this matter, on the basis that they did not have sufficient information to provide the date. The Eighth Prehearing Order directed UGI to provide the date of service installation for each of the contested meters.

The City and CPHD served their spreadsheet containing the contested meters on April 27, 2017 (the "Matrix"). UGI filed its objections/stipulations to the City's data on May 15, 2017, and provided additional data reflecting (1) the date gas service was installed and (2) providing additional permit data, if available. The City filed its objections/stipulations to UGI's response on May 24, 2017, and the Matrix is now complete.

Discovery in this matter has closed. On July 6, 2017, City Parties and UGI filed Motions for Summary Judgment in this matter. In its Motion, UGI asserts that there are certain issues ready for disposition. In an effort to narrow the issues before the Administrative Law Judge, City Parties agree to withdraw their complaints with respect to a limited number of meter violations, which are

detailed herein. On the remaining issues, there are genuine issues of fact that must be reconciled by the Administrative Law Judge. On the substantive legal issues raised in UGI's Motion for Summary Judgment, UGI is not entitled to judgment as a matter of law.

UGI has also filed a Complaint in the Commonwealth Court seeking a declaratory judgment striking down an ordinance and a resolution issued by the City with respect to the installation and relocation of gas meters. This matter is captioned *UGI Utilities, Inc. v. City of Reading and Pennsylvania Public Utility Commission*, No. 499 M.D. 2015. This action shall be referenced herein as the "Commonwealth Court Action."

### **III. STATEMENT OF FACTS**

In September 2014, the PUC adopted a final rulemaking order ("Final Rulemaking Order") amending Section 59.18 and providing regulatory requirements for the placement of meters, regulators, and service lines. Section 59.18 provides, as a general rule, that meters and regulators being relocated pursuant to 52 Pa.Code § 59.18 be placed *outside and aboveground*, but also identifies situations where inside meter locations must be considered by the utility. More specifically, Section 59.18(d) explicitly states that inside meter placement "shall be considered" where a meter is in a historic district. 52 Pa.Code § 59.18(d).

The PUC specifically stated in the Final Rulemaking Order that the revised regulation was motivated, at least in part, by situations where regulated "utilities provide service in historic districts where municipal laws may require the meter to be located inside structures." *See* Final Rulemaking Order, Sep. 13, 2014, 44 Pa.B. 5835, p. 5. In responding to the myriad comments received from historical commissions and boards, private citizens, preservation groups, civic associations, and government entities and officials related to the placement of meters in historic districts, the PUC stated:

Although we believe that it is necessary that, due to its public safety obligations, the utility be allowed to make the final decision, this decision to locate a meter inside is not without direction. The regulation does provide, in effect, guidelines that must be followed. If an outside meter is not going to become available because of certain restrictions, then an inside meter location must be considered, and that does not appear to us to be ambiguous.

Final Rulemaking Order, p. 27 (emphasis added). Furthermore, the PUC stated that utilities have an obligation to determine whether a building is located within a historic area, and, if it is, obtain the municipality's approval where required:

We do believe...that the utility, in applying the regulation, has an obligation to know whether gas line improvements and meter location projects are located in historic areas. This is a burden that any property owner or contractor would probably have in undertaking exterior improvements in an historic district, since the local municipality may require prior approval before a building permit is issued.

Final Rulemaking Order, p. 18 (emphasis added).

The Commission's response indicates that it amended Section 59.18 with the express intent of providing "guidelines that must be followed" by utilities when installing gas meters in historic districts. These guidelines include the requirement that, where applicable, the utility obtain "prior approval before a building permit is issued." *Id.* The City of Reading contains six (6) designated historic districts in which the inside placement of gas meters must be considered pursuant to Section 59.18(d).

According to its Amended Complaint in the Commonwealth Court Action, UGI files periodic infrastructure improvement plans, known as "LTIP." [Appendix 1, Amended Complaint, ¶ 27.] UGI states that the PUC approved its most recent LTIP on July 31, 2014. [Appendix 1, Amended Complaint, ¶ 27.] UGI used this most recent LTIP to schedule the replacement of many miles of gas mains, and, in replacing those gas mains, asserts that it is mandated to also relocate interior gas meters to exterior locations pursuant to Section 59.18 as amended. [*Id.* at ¶ 26, 29.]

In a Petition for a Preliminary Injunction filed in the Commonwealth Court Action, UGI described certain “betterment” projects that it is scheduled to perform in the City, and again asserted that, during those “betterment projects” it is required to relocate meters to exterior locations under Section 59.18. [See Appendix 1, Petition for Preliminary Injunction.] UGI claims, in essence, that it must relocate meters to exterior locations under a mandate set by the Commission in Section 59.18.

In its rush to relocate meters to the outside of properties as part of its “betterment” projects in the City of Reading, UGI has failed to consider inside meter placement in the City’s historic districts and has relocated meters to locations which violate safety regulations contained within Section 59.18. These violations are set forth in greater detail on the Matrix, in the City Parties’ Motion for Summary Judgment, and below.

#### **IV. STANDARD OF REVIEW**

Section 5.102 of the Commission’s regulations, 52 Pa. Code §§ 5.102(d)(1), (2), provides the standard of review for summary judgment motions, as follows:

- (1) *Standard for grant or denial on all counts.* The presiding officer will grant or deny a motion for judgment on the pleadings or a motion for summary judgment, as appropriate. The judgment sought will be rendered if the applicable pleadings, depositions, answers to interrogatories and admissions, together with affidavits, if any, show that there is no genuine issue as to a material fact and that the moving party is entitled to a judgment as a matter of law.
- (2) *Standard for grant or denial in part.* The presiding officer may grant a partial summary judgment if the pleadings, depositions, answers to interrogatories and admissions, together with affidavits, if any, show that there is no genuine issue as to a material fact and that the moving party is entitled to judgment as a matter of law on one or more but not all outstanding issues.

52 Pa. Code §§ 5.102(d)(1), (2).

The Commission may only grant summary judgment “if there is no genuine issue as to a material fact, and... the moving party is entitled to judgment as a matter of law. *United Transp. Union v. Pennsylvania Public Utility Commission*, 68 A.3d 1026, 1033 (Pa. Commw. Ct. 2013); *Lehigh Valley Power Committee. v. Pa. Pub. Util. Comm’n*, 563 A.2d 548 (Pa. Commw. Ct. 1989); *Edan Transp. Corp. v. Pa. Public Utility Comm’n*, 623 A.2d 6 (Pa. Commw. Ct. 1993). The Commission must view the record “in the light most favorable to the non-moving party, giving that party the benefit of all reasonable inferences.” *United Transp. Union*, 68 A.3d at 1033. Therefore, “[a]ll doubts as to existence of a genuine issue of material fact must be resolved against the moving party.” *United Transp. Union*, 68 A.3d at 1033.

As set forth below, UGI is not entitled to summary judgment because (1) there remain genuine issues of material fact and (2) UGI is not entitled to judgment as a matter of law.

V. **QUESTIONS PRESENTED**

- A. SHOULD UGI’S MOTION FOR SUMMARY JUDGMENT BE DENIED ON THE BASIS THAT THERE REMAIN GENUINE ISSUES OF MATERIAL FACT REGARDING WHETHER 631 METERS, CHALLENGED BY CITY PARTIES AS HAVING BEEN RELOCATED TO EXTERIOR LOCATIONS IN HISTORIC DISTRICTS IN VIOLATION OF SECTION 59.18, WERE RELOCATED PRIOR TO THE EFFECTIVE DATE OF SECTION 59.18, SEPTEMBER 13, 2014?

Suggested Answer: **[Yes.]**

- B. SHOULD UGI’S MOTION FOR SUMMARY JUDGMENT BE DENIED ON THE BASIS THAT THERE REMAIN GENUINE ISSUES OF MATERIAL FACT REGARDING WHETHER 1147 METERS, CHALLENGED BY CITY PARTIES AS HAVING BEEN RELOCATED TO DANGEROUS LOCATIONS IN VIOLATION OF SECTION 59.18’S SAFETY REQUIREMENTS, WERE RELOCATED PRIOR TO THE EFFECTIVE DATE OF SECTION 59.18, SEPTEMBER 13, 2014?

Suggested Answer: **[Yes.]**

C. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT WITH RESPECT TO 337 METERS LOCATED BENEATH OR IN FRONT OF A WINDOW BE DENIED ON THE BASIS THAT THE METERS VIOLATE SECTION 59.18(A)(8)(I) OR, AT THE VERY LEAST, THERE REMAINS A GENUINE QUESTION OF MATERIAL FACT REGARDING WHETHER THE METERS VIOLATE SECTION 59.18(A)(8)(I)?

Suggested Answer: [**Yes.**]

D. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT WITH RESPECT TO 163 METERS IDENTIFIED BY CITY PARTIES AS HAVING BEEN INSTALLED IN CONTACT WITH SOIL OR OTHER POTENTIALLY CORROSIVE MATERIALS IN VIOLATION OF SECTION 59.18(A)(8)(VI), ENUMERATED ON APPENDIX "E" AND APPENDIX "F" TO UGI'S MOTION FOR SUMMARY JUDGMENT BE DENIED ON THE BASIS THAT CITY PARTIES WITHDRAW THOSE CHALLENGES?

Suggested Answer: [**Yes.**]

E. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT WITH RESPECT TO THOSE METERS IDENTIFIED BY CITY PARTIES AS HAVING BEEN RELOCATED UNDER AN EXTERIOR STAIRWAY IN VIOLATION OF SECTION 59.18(A)(8)(III) BE DENIED ON THE BASIS THAT 5 OF THE METERS CHALLENGED ARE INSTALLED UNDER AN EXTERIOR STAIRWAY AND THE CITY PARTIES WITHDRAW THEIR CHALLENGES TO THE REMAINING 2 METERS?

Suggested Answer: [**Yes.**]

F. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT ON THE BASIS THAT CERTAIN PROPERTIES ONLY CONTAIN METER INFRASTRUCTURE AND NO METER (AT PRESENT) BE DENIED?

Suggested Answer: [**Yes.**]

G. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT ON THE BASIS THAT THE CITY'S FORMAL COMPLAINTS RAISE CLAIMS BEYOND THE COMMISSION'S JURISDICTION BE DENIED?

Suggested Answer: [**Yes.**]

H. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT WITH RESPECT TO COMPLIANCE WITH THE CITY'S LOCAL ORDINANCES BE DENIED ON THE BASIS OF THE PLAIN LANGUAGE OF SECTION 59.18?

Suggested Answer: [**Yes.**]

- I. SHOULD UGI'S MOTION FOR SUMMARY JUDGMENT BE DENIED ON THE BASIS THAT CITY COMPLAINANTS HAVE LIMITED THEIR REQUESTED RELIEF TO RELIEF WITHIN THE POWER OF THE ADMINISTRATIVE LAW JUDGE?

Suggested Answer: **[Yes]**

**VI. SUMMARY OF ARGUMENT**

UGI's Motion for Summary Judgment should be denied. As set forth herein, there remain genuine issues of material fact for resolution by the Administrative Law Judge. Moreover, on the substantive legal issues UGI is not entitled to judgement as a matter of law.

UGI's Motion for Summary Judgment makes several unsubstantiated assertions that certain facts are no longer in dispute in this matter, even going so far as to say that City Parties have made certain concessions or stipulations that *have not* been made. In reality, the facts identified by UGI remain in dispute in this matter and must be resolved by the Administrative Law Judge, rendering summary judgment inappropriate.

First, UGI asserts that City Parties have stipulated that the service installation dates provided with UGI's response to the City's Matrix equate to the date the meters were relocated. On that basis, UGI argues that it is entitled to summary judgment with respect to any meter with a service installation date prior to the effective date of Section 59.18, September 13, 2014. There is no support in the record for this assertion. To the contrary, the June 15, 2017 conference transcript, quoted by UGI in its own Motion, demonstrates that City Parties *never stipulated* that the service installation date equated to the meter relocation date. Moreover,, by e-mail dated April 18, 2017, UGI's counsel acknowledged that UGI *did not track the date any given meter was relocated either*. The date that any given meter was relocated remains a disputed fact to be determined by the Administrative Law Judge or, as in many cases, is a fact more accurately established by permit data also included in the Matrices prepared for this case.

Second, UGI asserts that City Parties have conceded that certain meters located under windows are not in violation of Section 59.18 because City Parties' surveyors failed to separately indicate on the Matrix that the meters were also located under an opening that could be used as a fire exit. As explained in the Affidavit of John Slifko, Councilman, filed herewith, where a surveyor indicated that a meter was located under a window, the meter was (by virtue of its location under the window) also located under a fire exit—the window itself. Moreover, Section 59.18 prohibits placement of meters “beneath or in front of windows” without reference to whether the window can serve as a fire exit—although the windows at issue here could.

Third, UGI asserts that certain pictures taken by City Parties' surveyors conclusively establish that 5 of the 7 meters (challenged on the basis that the meter has been located under an exterior stairway) are not, in fact, located under an exterior stairway. To the contrary, the pictures demonstrate that the meters *are located* under an exterior stairway, or that, at a minimum, there remains a question of fact for determination by the Administrative Law Judge.

Fourth, UGI asserts that it is entitled to summary judgment on the basis that certain properties do not presently contain a meter. UGI's disingenuous argument assumes facts not in evidence—(1) the reason that the infrastructure exists and (2) that the infrastructure identified by City Parties will never be used to install exterior meters. If UGI intends to locate a meter in the same location as the infrastructure, questions of fact regarding whether the location violates Section 59.18, as alleged by City Parties, must be answered by the Administrative Law Judge.

UGI limits its substantive arguments to allegations that the City's Formal Complaints raise issues and seek relief beyond the Commission's jurisdiction. City Parties merely seek a determination from the Commission regarding whether UGI has failed to comply with Section 59.18. Included in that determination will necessarily be a determination regarding whether UGI

was required to comply with the City’s historic district requirements as part of its compliance with Section 59.18 and, if so, whether UGI did comply with the City’s historic district requirements. These issues are all based on the Commission’s own regulation—Section 59.18—and are the appropriate subject of a Formal Complaint proceeding before the Commission.

Finally, in an effort to focus the issues before the Administrative Law Judge, City Parties agree to withdraw certain challenges. Specifically, City Parties withdraw their challenges to the 163 meters (challenged by City Parties as being in contact with soil or other potentially corrosive materials) identified on Appendices “E” and “F” of UGI’s Motion for Summary Judgment. City Parties also agree to withdraw their challenge (on the basis that the meter has been located under an exterior stairway) with respect to 601 North Third Street and 506 West Douglass Street. UGI’s Motion for Summary Judgment with respect to these meters is therefore mooted.

Furthermore, City parties clarify that they are not, in the matter before the Administrative Law Judge, challenging UGI’s meter relocations on the basis that UGI has failed to obtain required City permits. Therefore, UGI’s Motion for Summary Judgment should be denied on the basis that this issue is not before the Administrative Law Judge.

For the foregoing reasons, as set forth in further detail below, UGI’s Motion for Summary Judgment should be denied.

**VII. ARGUMENT**

- A. UGI is not entitled to judgment as a matter of law on the basis that 631 of the meters identified by City Parties as having been relocated in violation of Section 59.18’s historic district requirements have a “service installation” date prior to the effective date of Section 59.18, September 13, 2014. The service installation date does not equate to the date the meter was relocated.**

UGI has identified 631 of those meters challenged by City Parties on the basis that the meters were relocated without regard to, and in violation of, Section 59.18’s historic district

requirements, with “service installation” dates prior to the effective date of Section 59.18, September 13, 2014. In sum, UGI argues that the “service installation” date is synonymous with the date of a meter relocation at each of the 631 disputed meters and, since the “service installation” predates the effective date of the current Section 59.18, UGI could never be found to have violated Section 59.18 in regard to these meters. UGI’s argument rests on a faulty premise and, as such, cannot support its claim for summary judgment.

Notwithstanding UGI’s argument concerning the “service installation” date, there remains a genuine issue of material fact regarding the date on which the meters at each property were actually relocated to an exterior location. More specifically, in its Motion for Summary Judgment, UGI alleges that because the “service installation” dates for these meters is prior in time to September 13, 2014, that Section 59.18 does not apply. In making its argument, UGI conflates the service installation date with the *date the meter was relocated to an exterior location*, and avers that because City Parties stipulated to the service installation date they somehow also stipulated that the service installation date is equivalent to the date each meter was relocated to an exterior location. UGI is simply mistaken.

While UGI is correct that Section 59.18 became effective on September 13, 2014, the City *never stipulated* that the service installation date constituted the date the meter was relocated to any exterior location. UGI quotes the relevant portion of the transcript from the June 15, 2017 conference with the Honorable Mary D. Long in its Motion for Summary Judgment:

**JUDGE LONG:** Mr. Savona, the May 24, 2017 spreadsheet does not include a stipulation regarding the installation date of the **service lines** for the meter placements. Do the complainants intend to stipulate to those dates?

**MR. SAVONA:** Your Honor, we don’t have any independent information. So at this point, I have no issue with stipulating because the city simply does not maintain that information and there

is no way I can contest it. So, in the interest of just moving it forward, we will stipulate to the dates supplied by UGI.

[UGI Motion for Summary Judgment, p. 13 (emphasis added).]

UGI's position is made all the more troubling by its previous representation to Administrative Law Judge Mary D. Long, and City Parties, that UGI *does not keep data regarding the date of meter relocation*. Specifically, by e-mail dated April 18, 2017, counsel for UGI represented:

Similar to the City of Reading, UGI's records do not track the specific date that each meter was installed or relocated...Although UGI does not track the specific date each meter was installed or relocated, the Company does record the date of service line installation.

[Appendix "2", April 18, 2017 e-mail from D. Ryan, Esq.] The dates of (1) service installation and (2) meter relocation, are separate and distinct dates.

It is the City's understanding, therefore, that the service installation date constitutes the date that a gas service line (or lateral) was originally "installed" at each property—*i.e.* the date the property was first connected to gas service—*not the date any given meter was relocated to an exterior location*. Even a cursory review of Appendix "A" to UGI's Motion for Summary Judgment demonstrates that for many of the 631 properties a permit, or permits (whether a street cut permit, Building and Trades permit, or both), was/were issued *after* September 13, 2014.<sup>2</sup>

---

<sup>2</sup> See, for example, the following properties, all with Building and Trades and/or Street Cut permits issued after September 13, 2014, notwithstanding a service installation date prior to September 13, 2014:

1711 Alsace Street	218 Jameson Place
514 Chestnut Street	243 Jameson Place
657 Clinton Street	1221 Linden Street
219 Greenwich Street	733 McKnight Street
1100 Hampden Blvd	739 North Front Street

Moreover, in the Commonwealth Court Action, UGI vehemently argues that it is relocating meters to exterior locations *pursuant to* the new Commission mandate under Section 59.18 and that, in essence, it has no choice in the matter. [See Appendix “1”, Amended Complaint and Petition for Preliminary Injunction.] UGI now represents, inconsistently, that it had *already* relocated meters to exterior locations prior to the effective date of Section 59.18, with no proof of the accuracy of the representation. UGI’s conflicting representations are irreconcilable, and cannot support any inference that there are no issues of material fact to be decided in this proceeding.

UGI obtained the permits identified on the Matrix as a part of its “betterment projects,” and in advance of the relocation of meters to the exterior of residences throughout the City. As such, UGI cannot credibly argue that it is entitled to judgment as a matter of law. The evidence supports the City’s contention that, while a service line may have been installed at a given house prior to September 13, 2014, meter relocation occurred at that same residence subsequent to the service line installation and pursuant to the permits issued by the City.

Even where the Matrix data indicates that no permits were obtained post September 13, 2014, there remains a question of fact regarding whether UGI simply failed to obtain a permit for any given meter relocation, since UGI, as the moving party, has not provided any definitive dates for each meter relocation so as to establish their entitlement to judgment as a matter of law, and, in fact, has affirmatively represented in the Commonwealth Court Action that the meters that have been relocated to date within the City were done specifically because of the change in 59.18

Because there remain genuine issues of material fact regarding the meter relocation date of the 631 meters identified by UGI, UGI is not entitled to summary judgment.

---

[See Appendix 3, Affidavit of John Slifko at Exhibit “B”; Appendix “A” to UGI’s Motion for Summary Judgment.]

**B. UGI is not entitled to judgment as a matter of law on the basis that 1147 meters, in either historic districts or outside of historic districts, with identified violations of Section 59.18’s safety requirements have a “service line installation” date prior to the effective date of Section 59.18, September 13, 2014. The service installation date does not equate to the date the meter was relocated.**

Similarly, UGI argues that because 1147 meters challenged by City Parties on the basis that the meters are located in dangerous locations in violation of Section 59.18’s safety requirements, have “service installation” dates prior to September 13, 2014, it is entitled to judgment as a matter of law.<sup>3</sup> As discussed at length, *supra*, UGI’s argument again rests on a faulty premise that the “service installation” date is synonymous to the date any given meter was relocated to an exterior location. For the same reasons set forth more fully in Section VII.A, *supra*, which is incorporated herein, there remain genuine issues of material fact regarding the time and date of the relocation of each of the contested meters identified in the Matrices, many of which contain affirmatively contradictory evidence (permits issued by the City to UGI post-September 13, 2014) and many of which are clearly within the scope of Section 59.18. The Commission should deny UGI’s Motion for Summary Judgment.

---

<sup>3</sup> See, for example, the following properties, all with Building and Trades and/or Street Cut permits issue after September 13, 2014, notwithstanding a service installation date prior to September 13, 2014:

223 South 4th Street	1406 Cotton Street
1471 Cotton Street	1825 Cotton Street
1200 Hampden Blvd	323 South 4th Street
514 Chestnut Street	657 Clinton Street
667 Clinton Street	609 Eisenbrown Steet

[See Appendix 3, Affidavit of John Slifko at Exhibit “B”; Appendix “A” and Appendix “B” to UGI’s Motion for Summary Judgment.]

**C. UGI is not entitled to judgment as a matter of law with respect to the 337 meters identified on the Matrix as being beneath or in front of a window but not separately identified as being located “beneath or in front of an opening that could be used as a fire exit.”**

UGI would have the Administrative Law Judge find that simply because City Parties’ surveyors did not separately indicate on the Matrix that meters violating Section 59.18(a)(8)(i) (located beneath or in front of windows) were located in such a manner as to “directly obstruct emergency fire exits” the identified meters do not violate Section 59.18(a)(8)(i). UGI’s argument fails for two reasons: first, because UGI misreads Section 59.18(a)(8)(i) and second, because the factual basis of UGI’s argument is incorrect.

To begin, Section 59.18(a)(8)(i) provides that “[m]eters and service regulators may not be installed”:

- (i) Beneath or in front of windows or other building openings that may directly obstruct emergency fire exits.

52 Pa.Code § 59.18(a)(8)(i). Section 59.18(a)(8)(i) thus prohibits meter locations in two general areas: (1) beneath or in front of windows and (2) beneath or in front of other building openings that may directly obstruct emergency fire exits. To the extent this section is intended to prevent the obstruction of emergency fire exits, it follows that windows can and do serve as emergency fire exits. For purposes of determining whether a meter has been placed in violation of Section 59.18(a)(8)(i), it is sufficient that the meter be located beneath or in front of a window. City Parties’ surveyors did not need to make a separate determination that the window could also serve as an emergency fire exit.

Second, UGI’s argument attempts to manipulate the data in the City’s Matrix by assuming: (1) that City Parties’ surveyors conceded that the meters were not located in such a manner as to obstruct emergency fire exits and (2) that the meters do not, *in reality*, block emergency fire exits.

City Parties' surveyors never conceded that the meters located beneath or in front of windows did not, by virtue of their location beneath or in front of a window, obstruct an emergency fire exit. To the contrary, City Parties' surveyors made an objective observation: that the meter was located beneath or in front of a window. City Parties' surveyors never intended, by not independently noting that the meters also blocked an emergency fire exit (the window), to indicate that the meters did not, in fact, block an emergency fire exit. [See Appendix 3, Affidavit of John Slifko.] It goes without saying that these meters, due to their location beneath or in front of a window, also obstruct an emergency fire exit—the window. [See *id.*]

Moreover, even if the Administrative Law Judge interprets Section 59.18(a)(8)(i) as only prohibiting meters in front of or beneath windows that may serve as an emergency fire exit, two questions of material fact arise: (1) could the subject windows serve as an emergency fire exit and (2) may the meter location “directly obstruct” that exit? Those factual questions, by definition, must be determined by the Administrative Law Judge through further fact finding, as the information contained in the Matrices and relied upon by UGI cannot, in and of itself, prove UGI's entitlement to judgment as a matter of law with respect to the disputed meter locations. As such, UGI is not entitled to judgment as a matter of law with respect to the meters located beneath or in front of windows.

**D. City Parties will agree to withdraw their challenges on the basis that certain meters violate Section 59.18(a)(8)(vi) on the basis that the meters have been installed “in contact with soil or other potentially corrosive materials”, with respect to the 163 meters identified by UGI on Appendix “E” and Appendix “F”.**

Given the breadth of issues raised by City Parties, and in an effort to limit the scope of issues before the Administrative Law Judge, City Parties agree to withdraw their challenges on the basis that certain meters have been installed “in contact with soil or other potentially corrosive

materials”, with respect to the 163 meters identified by UGI on Appendix “E” and Appendix “F” to their Motion for Summary Judgment only. While City Parties do not concede that UGI has appropriately protected these 163 meters from soil or other potentially corrosive materials, see for example the meter located at 1503 Palm Street [CityCPHD\_02848], City Parties instead focus on the remaining 103 meters in contact with soil or other corrosive materials not challenged by UGI in its Motion for Summary Judgment and the myriad other safety issues raised in City Parties’ Formal Complaints and identified on the Matrix.

Because City Parties no longer contest the location of the 163 meters identified by UGI on Appendix “E” and Appendix “F”, on the basis that the meters were installed “in contact with soil or other potentially corrosive materials,” UGI’s motion for summary relief can alternatively be granted or denied as moot.

**E. UGI is not entitled to judgment as a matter of law with respect to the 5 of the 7 meters identified as being under an exterior stairway in violation of Section 59.18(a)(8)(iii).**

The pictures attached as part of Appendix “G” to UGI’s Motion for Summary Judgment demonstrate that UGI is not entitled to judgment as a matter of law on 5 of the 7<sup>4</sup> meters identified as being “under exterior stairways,” as there remain genuine questions of material fact regarding whether the meters are located under an exterior stairway. UGI argues that whether the 7 meters are located under an exterior staircase can be determined “simply by reviewing the photographs” attached as part of Appendix “G” to UGI’s Motion for Summary Judgment. A review of Appendix “G” demonstrates that 5 of the 7 meters identified *are located under an exterior stairway*:

---

<sup>4</sup> Although UGI’s Motion for Summary Judgment states that only 6 properties were identified as having meters under an exterior staircase, Appendix “G” lists, and contains pictures for, 7 properties.

812 Ritter Street

[UGI Motion, Appendix "G", p. 5.]

816 Ritter Street

[*Id.* at p. 9.]

818 Ritter Street

[*Id.* at p. 13.]

820 Ritter Street

[*Id.* at p. 15.]

823 Ritter Street

[*Id.* at p. 22.]

The foregoing pictures speak for themselves. Each meter is located under an exterior stairway, in an area that would impede access to an opening. At a minimum, there remain questions of fact to be resolved by the Administrative Law Judge as to whether the locations of

the foregoing meters constitutes location “under exterior stairways” as prohibited by Section 59.18(a)(8)(iii).

With respect to the remaining 2 meters, 601 North Third Street and 506 West Douglass Street, City Parties agree to withdraw their challenges to those meters with respect only to the location of those meters under an exterior stairway.

Because 5 of the 7 properties contain meters located under an exterior stairway, and because City Parties withdraw their challenges to the remaining 2 meters (on the sole issue of whether the meters are located under an exterior staircase), UGI’s Motion for Summary Judgment should be denied and/or granted only as to the meters located at 601 North Third Street and 506 West Douglas Street with regard to the placement of the meter “under exterior stairways.”

**F. UGI is not entitled to summary judgment on the basis that certain properties identified on the Matrix do not presently contain a meter.**

UGI argues that the Commission should dismiss claims related to locations where meter infrastructure has been installed, but no meter was connected at time of survey for the Matrix or is currently connected. UGI’s argument assumes a fact not in evidence—namely that the infrastructure documented by the Matrix will never be used to install an exterior meter.

At its simplest, the City Parties submit that UGI would not install meter infrastructure at any property in any location where it does not intend to install a meter if a customer orders gas service. Therefore, and contrary to the summary nature of UGI’s dismissal of the significance of the infrastructure placement, it is easily assumable that exterior pipes and meter infrastructure on any given property is located in the position that any exterior meter ultimately will be installed on that property. If so, then issues of fact exist, including the reason for the current infrastructure placement and UGI’s future intent to utilize the documented infrastructure. As such, summary judgment is not appropriate.

Further, if UGI does intend to locate a meter in the same location as the existing infrastructure, and if that infrastructure is located in such a manner that it violates Section 59.18 or other applicable regulations, it is appropriately the subject of this Formal Complaint proceeding. Because of all of the foregoing, the Commission should deny UGI's Motion for Summary Judgment.<sup>5</sup>

**G. The claims raised in City Parties' Formal Complaints are not beyond the Commission's jurisdiction.<sup>6</sup>**

The PUC has broad jurisdiction to determine matters related to its regulations, including, as cited by UGI, whether UGI "violated any law which the [C]ommission has jurisdiction to administer," or with respect to "any regulation or order of the [C]ommission." 66 Pa.C.S. § 701.

The root issue in this case is whether UGI has violated Section 59.18, and the sub-parts of this issue, including those addressed below, fall squarely within the jurisdiction of the Commission.

In answering this question, Courts have found:

That the PUC should have primary jurisdiction to determine when its rules have been disregarded is not only a statutory mandate but a precept recognizing the sometimes esoteric and technical nature of and reasons for the agency's rules. We have found salutary the legislative intent to install the PUC, rather than the courts, as the initial arbiters in these complex matters.

*DeFrancesco v. W. Pennsylvania Water Co.*, 499 Pa. 374, 377 (1982).

---

<sup>5</sup> Summary judgment may be appropriate on this count if UGI, in effect, is stipulating that it has no intention of installing any exterior meter at the location of any currently existing documented infrastructure. To the extent that we do not discern such point from UGI's motion, summary judgment is inappropriate.

<sup>6</sup> With respect to UGI's argument that its failure to obtain local permits is outside of the subject matter jurisdiction of the Commission, the City has never advanced UGI's failure to obtain any given permit as a theory in this case. UGI's request for summary judgment on that basis should be denied, as the issue is not before the Commission.

UGI argues that the Commission has no jurisdiction with regard to: (1) compliance with the City's historic district regulations, (2) compliance with City ordinances and resolutions, and (3) the legality of the City's historic district regulations. In so arguing, UGI ignores the fact that, as part of its amendment to Section 59.18, the Commission *chose* to include terms and provisions that require public utilities to give consideration to inside meter placement in historic districts, precisely because those placements were to occur in historic districts. To ignore the provisions of Section 59.18 which the Commission approved is to fail to give full import and effect to the regulation as promulgated. Furthermore, UGI consistently ignores the Commission's statement in its Final Rulemaking Order amending Section 59.18 that (1) utilities have an obligation to determine whether a meter is located in a historic district and (2) that a municipality may require a utility, like any other contractor performing work in a historic district, to obtain approval before performing work visible from the public right-of-way. *See* Final Rulemaking Order, p. 18. Despite the best effort of UGI to nullify the placement of these provisions in Section 59.18, these terms cannot be ignored or interpreted to amount to a nullity.

The foregoing provisions of the Final Rulemaking Order represent an incorporation of some local historic district requirements *within* the overall requirements that are part of Section 59.18, as well as an incorporation of the protections afforded historic resources by federal law, state law, and the Pennsylvania Constitution. To the extent the Commission has exclusive jurisdiction to promulgate rules and regulations for the allocation of natural or artificial gas supply by a public utility, the Commission also has the authority and duty to include some level of local historic district requirements applicable to those rules and regulation.

In their Formal Complaints, City Parties assert that (1) the Commission did incorporate local historic district requirements into Section 59.18; (2) the City has enacted historic district

requirements applicable to public utilities (and any contractor performing work visible from City rights-of-way in the City's historic districts); (3) UGI has failed to comply with those historic district requirements; and (4) UGI's failure to comply with the City's historic district requirements constitutes a violation of Section 59.18 (which incorporates those requirements). These arguments are squarely within the subject matter jurisdiction of the PUC in this Formal Complaint Proceeding.

In order to determine whether UGI failed to comply with Section 59.18, including any of the City's historic district requirements which are incorporated into Section 59.18, the Commission must first determine whether the City's historic district requirements are permissible. UGI's argument that the Commission is somehow precluded from making this initial determination continues to ignore the Commission's incorporation of local historic district requirements into Section 59.18.

With respect to the question whether some application of the City's historic district requirements are, as a matter of law, permissible under Section 59.18, this proceeding presents an issue not previously encountered in the classic preemption cases in the field of public utility regulation. Previous preemption holdings of our appellate courts have dealt strictly with the interaction of the Commission's jurisdiction and a local municipality's right to regulate within its rights-of-way. *See Penn. Power v. Pine*, 926 A.2d 1241 (Pa. Commw. Ct. 2007) (Commission jurisdiction preempts municipal/utility agreement for underground power lines); *PECO Energy v. Upper Dublin*, 922 A.2d 996 (Pa. Commw. Ct. 2007) (Commission jurisdiction preempts municipal vegetation management ordinance); *PPL Elec. Util. v. Lancaster*, 125 A.3d 837 (Pa. Commw. Ct. 2015) (annual maintenance fee upheld, Commission's jurisdiction preempts requirements for

submission of maps and engineering specifications and inspection requirements). This is not a classic preemption case.

Historic resources, such as the six historic districts located within the City of Reading, are protected under Article I, Section 27 of the Pennsylvania Constitution, which decrees that “[t]he people have the right to...the preservation of the natural, scenic, historic and esthetic values of the environment”<sup>7</sup>. This same Constitutional provision imposes a duty upon the City, as trustee, to “conserve and maintain” those values “for the benefit of all the people.”

Although commonly referred to as the “Environmental Rights Amendment”, Article I, Section 27 includes “historic” resources among the resources which must be protected. *United Artists’ Theater Circuit, Inc. v. City of Philadelphia*, 635 A.2d 612 (Pa. 1993); *Com. v. Nat’l Gettysburg Battlefield Tower, Inc.*, 302 A.2d 886, 895, *aff’d sub nom. Com. by Shapp v. Nat’l Gettysburg Battlefield Tower, Inc.*, 454 Pa. 193 (1973) (“Parklands and historical sites as ‘natural resources’ are subject to the same consideration” as strictly environmental resources”).

The Constitutional protection afforded to historic resources, and the power conferred upon local municipalities to protect historic resources, was confirmed by the Pennsylvania Supreme Court in *United Artists Theater Circuit, Inc. v. City of Philadelphia*, 635 A.2d 612 (Pa. 1993), a case involving the historic Boyd Theater in the City of Philadelphia. Although the case involved

---

<sup>7</sup> Article I, Section 27 reads in full:

The people have a right to clean air, pure water, and to the preservation of the natural, scenic, historic and esthetic values of the environment. Pennsylvania's public natural resources are the common property of all the people, including generations yet to come. As trustee of these resources, the Commonwealth shall conserve and maintain them for the benefit of all the people.

Pa. Const., Art. I, § 27.

the specific issue of whether Philadelphia’s historic preservation ordinance affected a taking of the Boyd Theater by requiring its preservation, our Supreme Court engaged in a lengthy discussion of the state policy established under Article I, Section 27. *Id.* at 619. In balancing the private property rights of the Boyd Theater owner with the City’s right, and duty, to protect its historic resources, the Court determined that the Philadelphia historic preservation ordinance “was consistent with our state policy [established in Article I, Section 27] to preserve historic or aesthetic resources,” and held that “the designation of a privately owned building as historic without the consent of the owner is not a taking under the Constitution of the Commonwealth.” *Id.* at 620. The power of a local municipality to protect its historic resources transcends, therefore, even the most basic and fundamental of rights—private property rights.

Laws at the federal and state levels uniformly underscore the transcendent nature of historic preservation. At the Federal level, the National Historic Preservation Act identifies the general public interest in historic preservation. 54 U.S.C.A. § 300101. Pennsylvania’s Historic Preservation Act states, “[i]t is in the public interest for the Commonwealth, its citizens and its political subdivisions to engage in comprehensive programs of historic preservation for the enjoyment, education and inspiration of all the people, including future generations.” 37 Pa. Stat. Ann. § 102(h). The Local Historic District Act (“LHDA”) grants authority to local municipalities to regulate changes to historically designated structures or districts. Under the LHDA the governing body of a political subdivision within Pennsylvania is empowered to create historic districts after notifying and being certified by the PHMC. 53 Pa. Stat. Ann. § 8002.

As explained above, in adopting Section 59.18, the Commission appears to have engaged in an effort to protect historic resources by providing the possibility of an exception to required outside meter locations in historic districts, and by declining to completely exclude mention of

local historic district ordinances from any application under its regulatory discretion. Any interpretation that the Commission chose to flatly ignore the significance of historic districts in promulgating Section 59.18 would be to suggest that the Commission chose to ignore the explicit requirements of Article 1, Section 27. This conclusion is unsupported by the regulatory history of Section 59.18, and would be grossly inconsistent with the legal duties imposed under Article I, Section 27. As such, the Commission cannot adopt UGI's suggested interpretation of Section 59.18—whereby UGI alone has final say regarding the placement of facilities in historic districts which impact the historic resources of the Commonwealth. Rather, the Commission must interpret Section 59.18's historic district requirements broadly to require UGI to protect the Commonwealth's historic resources—including those found in the historic districts of the City of Reading.

UGI is not entitled to judgment as a matter of law. The issues raised in the City Parties' formal complaints with respect to UGI's failure to comply with Section 59.18 by failing to comply with the City's historic district requirements are squarely within the PUC's jurisdiction. Moreover, the City's historic district requirements are appropriate pursuant to Article I, Section 27 and the state and federal laws discussed, *supra*. UGI's Motion for Summary Judgment should be denied.

**H. UGI is not entitled to summary judgment on the basis that the Commission's meter regulations do not require compliance with local ordinances.**

For the reasons set forth more fully in Section VII.G, *supra*, which is incorporated herein, UGI is not entitled to judgment as a matter of law on the basis that the Commission's meter regulations do not require compliance with local ordinances. To the contrary, Section 59.18, by its very terms and as explained in the Final Rulemaking Order, specifically incorporated local historic district regulations. UGI's argument is based solely on the theory that the PUC did not incorporate, and that PUC regulations do not permit nor sanction, local historic district

requirements. This is simply incorrect under the plain terms of Section 59.18 itself, and the Final Rulemaking Order, and as discussed, would result in an interpretation of the Commission's regulations that is at odds with Article I, Section 27 of the Pennsylvania Constitution. UGI's Motion for Summary Judgment on this point should be denied.

**I. UGI is not entitled to judgment as a matter of law on the basis that City Parties have requested relief that cannot be granted in this proceeding.**

This is the third time that UGI has argued that City Parties have requested relief that cannot be granted in this proceeding—the first being its Preliminary Objections to the City's Formal Complaint, which were dismissed, and the second being its Petition for Interlocutory Review, which was denied. While UGI is correct that it may be subject to Civil Penalties pursuant to 66 Pa.C.S. § 3301, it ignores the breadth of authority vested in the Administrative Law Judge in resolving controversies. This includes the power to consider Formal Complaints alleging “violation of any law which the commission has jurisdiction to administer, or of any regulation or order of the commission” 66 Pa.C.S. § 701, as well as the power to “enforce, execute and carry out” the provisions of the Public Utility Code. 66 Pa.C.S. § 501(a).

This is precisely what the City asks the Commission to do: determine whether UGI has violated Section 59.18 in connection with the manner in which UGI has been applying that regulation. The City simply asks the PUC to determine *what* constitutes compliance with Section 59.18, *whether* UGI has complied with such requirements, and *how* UGI should move forward in order to act appropriately under Section 59.18.

UGI's Motion for Summary Judgment should be denied on this point.

**VIII. CONCLUSION**

In consideration of the foregoing, the City and CPHD respectfully request that the Commission dismiss UGI's Motion for Summary Judgment, for the reasons set forth above and consistent with the proposed form of Order filed herewith.

**EASTBURN AND GRAY, P.C.**

## **APPENDIX "1"**

**IN THE COMMONWEALTH COURT OF PENNSYLVANIA**

**UGI UTILITIES, INC.  
2525 N. 12th Street, Suite 360  
Post Office Box 12677  
Reading, PA 19612-2677**

**Petitioner,**

**v.**

**CITY OF READING  
815 Washington Street  
Reading, PA 19601**

**Respondent,:**

**and**

**PENNSYLVANIA PUBLIC UTILITY COMMISSION:  
400 North Street  
Keystone Building  
Harrisburg, PA 17120**

**Respondent/Indispensable Party :**

**NO. 499 M.D. 2015**

**DECLARATORY  
JUDGMENT**

**PETITIONER UGI UTILITIES, INC.'S APPLICATION FOR RELIEF IN THE  
NATURE OF A PETITION FOR ISSUANCE OF A PRELIMINARY INJUNCTION  
AGAINST RESPONDENT CITY OF READING**

AND NOW, comes the Petitioner in this proceeding, UGI UTILITIES, INC. ("Petitioner" or "UGI"), and hereby respectfully applies for relief in the nature of a preliminary injunction, and in support thereof states and avers the following:

1. Petitioner UGI initiated this original-jurisdiction action by filing a Petition for Review in the Nature of a Complaint ("Petition for Review") on October 13, 2015.

2. Subsequently, in response to Preliminary Objections filed by Respondent City of Reading (hereafter "Respondent" or "the City"), UGI filed an Amended Petition for Review, following which the City filed an Answer and New Matter.

3. Attached hereto as Exhibit "A" is a true and correct copy of UGI's Amended Petition for Review filed in this proceeding.

4. UGI has joined the Pennsylvania Public Utility Commission ("PUC") as a party Respondent in this proceeding given its exclusive jurisdiction over the implementation and enforcement of the Pennsylvania Public Utility Code, which preempts local regulation of public utility charges, facilities and services, as well as monitoring and enforcement of Orders issued by the PUC.

5. Part of the impetus for UGI's commencement of this action was the City of Reading's adoption of its Ordinance No. 45-2015, a copy of which is attached to UGI's Amended Petition for Review as Exhibit "B," (hereafter "the August 2015 Meter Ordinance"), attempting to

regulate the placement of UGI's gas metering equipment within the City of Reading.

6. In that regard, and as alleged in Paragraph 26 of UGI's Amended Petition for Review, under 52 Pa. Code § 59.18 which became effective September 14, 2014 -- a copy of that regulatory provision appearing as Exhibit "A" to UGI's Amended Petition for Review -- the PUC has directed all Pennsylvania natural gas distribution companies, including UGI, to relocate gas meters and regulators currently located inside buildings to outside locations, over a twenty-year period, with limited exceptions.

7. The PUC's adoption of 52 Pa. Code § 59.18 was unquestionably motivated by public safety concerns, particularly the desire to have gas metering equipment and connections located outdoors, as opposed to being within enclosed indoor space where there would be a greater likelihood of a catastrophic event if there would be a gas leak.

8. UGI believes and avers that the PUC conducted an extensive review, study and analysis prior to adopting that regulation, and it therefore reflects the position of the regulatory agency directed to

oversee, among other things, the safe and efficient provision of public utility service.

9. UGI alleged in its Amended Petition for Review filed January 4, 2016 that, to comply with its obligations under 52 Pa. Code. § 59.18, UGI made City of Reading representatives aware of the fact that it had a number of projects within City limits for which it would be scheduling meter relocations, and in connection therewith applying for applicable Permits from the City. UGI believes and avers that the City adopted the August 2015 Meter Ordinance in response to that notification.

10. The August 2015 Meter Ordinance is null, void and illegal on its face, as an attempt by local government to interfere with the jurisdiction and authority of the Pennsylvania Public Utility Commission over regulated natural gas service within the City of Reading. In that regard, UGI is filing a separate Application for Partial Summary Relief, including supporting Memorandum of Law, in this proceeding, seeking summary relief on the declaratory judgment claim alleged in Count I of its Amended Petition for Review, striking the August 2015 Meter Ordinance as illegal, void and unenforceable.

11. The illegality of the August 2015 Meter Ordinance,

particularly in Section 295-106(f), stems from the fact that it is an attempt to regulate the placement of gas metering equipment, including requiring public utilities to obtain what the City refers to as a Certificate of Appropriateness from a City employee, referred to as a Preservation Officer, as a condition of installing gas metering equipment, as well as imposing what UGI contends to be inappropriate and illegal conditions and construction/installation requirements, as well as penalties for any violation of that ordinance.

12. With respect to the August 2015 Meter Ordinance, UGI respectfully directs this court's attention to the following allegations in Paragraphs 37 through 41 of its Amended Petition for Review filed in this proceeding.

37. The August 2015 Meter Ordinance is illegal on its face, as being in direct violation of the exclusive jurisdiction and authority vested in the Public Utility Commission, particularly under the Public Utility Code, and as representing an attempt by a local governmental agency to impose requirements on the provision of regulated public utility service, particularly concerning a topic, i.e. location and relocation of gas metering equipment, in connection with which the PUC has promulgated a specific regulation which the City of Reading is attempting to circumvent and/or to impose its

own interpretational requirements.

38. UGI alleges and avers that: (a) the issues involved in this declaratory judgment action -- concerning the legality and enforceability of various Ordinances adopted by the City of Reading, as described in this Count I as well as in the two Counts which follow, are issues which are capable of repetition, and likely to be repeated, in future situations involving UGI and/or other utilities seeking permission to engage in PUC-regulated activities within the City of Reading, *including but not limited to relocation of utility meters from inside to outside buildings and other structures*, as well as requests by UGI and/or others seeking permission to open local highways/roads located within the City of Reading, (b) the questions presented are of significant importance and dimension, and (c) it is inevitable that similar situations will arise in the future, as to which there will be a need to obtain judicial review, those situations also very likely involving an urgency on UGI's (or some other person's or entity's) part to promptly install and/or relocate its facilities, which would be seriously and adversely affected if UGI (or that other person or entity) would be forced to await judicial review. As such, immediate judicial review and declaratory relief with respect to all issues raised herein is appropriate under the circumstances.

39. Based on the foregoing, there is a justiciable controversy and dispute between UGI and the City of Reading concerning the legality and enforceability of the Ordinance provisions challenged in this proceeding, including but not

limited to (i) Ordinance No. 45-2015, (ii) Sections 508-702(I), 508-703, and 508-704 of the July 2015 Ordinance (referenced in Count II below), (iii) the requirements under the City of Reading's new Street Excavation Application form (also referenced in Count II below), and (iv) the provisions of the Fee Schedule Ordinance (which is the subject of Count III below), as those Ordinances seek to impose requirements on regulated public utility companies which will materially interfere with the public utility services provided by each such utility.

40. Petitioner UGI brings this action pursuant to the Pennsylvania Declaratory Judgments Act, 42 Pa. C. S. A. Section 7531 et seq., and also Pennsylvania Rule of Civil Procedure 1601 et seq., to hear and decide the claims alleged in this Amended Petition, to determine the rights of the parties, and to determine the legality and enforceability of the challenged provisions of the three Ordinances referred to herein.

13. In addition to having commenced this proceeding challenging the August, 2015 Meter Ordinance, UGI is also participating in certain proceedings initiated by the City of Reading, and various residents, presently pending before the Pennsylvania Public Utility Commission ("the City of Reading PUC Proceedings") relating to meter relocations. The City of Reading PUC Proceedings were initiated by Complaint filed by the City of Reading, a copy of which (without

exhibits) is attached hereto as Exhibit "B."

14. In addition to the facial legality of the August 2015 Meter Ordinance, on Monday, February 13, 2017, Reading City Council passed a Resolution – a copy of the pertinent meeting Minutes are attached hereto as Exhibit "C" -- ("the February 13, 2017 Resolution"), directing the City Administration to "cease to issue any new trades [sic] permits to UGI for any proposed gas meter relocation project until further notice and further requests that the Administration only consider approving new trades permits to UGI for projects related to new service requests (switching the property's heating source to natural gas) or projects directly related to prove any emergencies." The February 13, 2017 Resolution is a flagrant attempt by the City to illegally regulate and control public utility service within the City of Reading by prohibiting the relocation of gas meters owned by UGI.

15. City Council passed the February 13, 2017, Resolution knowing full well that UGI was challenging in this case not only the provisions of the City's August 2015 Meter Ordinance, but also, in general, a local municipality's lack of jurisdiction or authority to legislatively or otherwise attempt to regulate public utility service

within this Commonwealth.

16. Attached hereto as Exhibit "D" is a true and correct copy of an article which appeared in the Reading Eagle on Tuesday, February 14, 2016; the language in that article relating to the February 13, 2017 Resolution is bracketed for this Court's attention and convenience; Councilman John Slifko stated in that article that "outside counsel representing the City advised passing the Resolution," and that this Resolution would supposedly "save us [the City] the cost of having to remove these things [meters] if we prevail in the litigation."

17. Based on the exhibits attached hereto as Exhibits "C" and "D," the City's reasoning in adopting the February 13, 2017 Resolution is that a local municipality has the authority to adopt, legislatively or otherwise, requirements and/or prohibitions relating to matters exclusively within the jurisdiction and authority of the Pennsylvania Public Utility Commission.

18. To the extent though that UGI has relocated any meters consistent with 52 Pa. Code § 59.18, to which the City or any residents have objected, and/or which the City is challenging in the City of Reading PUC Proceeding, the appropriateness of any prior meter

relocations, the City of Reading already has an administrative forum in which it is litigating that issue; further, for the reasons stated in UGI's Application for Partial Summary Relief to be filed in this proceeding, as well as its related Memorandum of Law, the City's August, 2015 Meter Ordinance is void and illegal on its face, and is preempted by the exclusive jurisdiction of the PUC.

19. Just as the August 2015 Meter Ordinance is void and unenforceable on its face, so too is the City's February 13, 2017 Resolution, both being in direct disregard of the exclusive jurisdiction and authority of the Pennsylvania Public Utility Commission, which adopted 52 Pa. Code Section 59.18, and which has sole jurisdiction over the application and interpretation of that regulation'; indeed, that Resolution is clearly an attempt by a local municipality to regulate public utility service, particularly the safety aspects thereof, by refusing to issue permits other than for emergencies and for conversion of other utilities to natural gas.

20. Any attempt by the City of Reading to enforce the February 13, 2017 Resolution and/or the August 2015 Meter Ordinance should not be permitted by this Court, as there is no legal basis or authority for

the adoption of either of them. Moreover, both of those enactments would have the direct effect of obstructing and preventing UGI's compliance with 52 Pa. Code § 59.18, thereby effectively overriding the enforceability of a validly adopted regulation of the Pennsylvania Public Utility Commission, and also impeding and impairing the progress of UGI work projects involving the relocation of meters from inside buildings to outside buildings.

21. Any action by the City to enforce the August 2015 Meter Ordinance and/or the February 13, 2017 Resolution --by refusing to allow UGI to perform meter relocations within any City Historic Districts, or located within fifteen feet of a City street or right-of-way, is not only void and unenforceable on its face as an attempt to regulate statewide public utility service, and also as it is implemented by the City of Reading, but it would also place the public at serious risk of damage and harm by blocking, for no legitimate or valid reason, the relocation of gas utility meters from inside buildings to outside buildings under any of the circumstances required under 52 Pa. Code § 59.18, thereby placing UGI's facilities, as well as the public, at substantial risk of irreparable injury, particularly if a catastrophic event

occurs in connection with any meters whose relocation to outside of buildings would be blocked by the City's actions.

22. UGI recently initiated what is referred to as a major betterment project, involving the replacement of gas mains, laterals from those mains serving residences, and also involving relocation of meters connected to those laterals, from inside buildings to outside buildings; that project would be located in the City's Centre Park Historic District ("the Centre Park Betterment Project"), and is being performed pursuant to the facts set forth in the following paragraphs of UGI's Amended Petition for Review filed in this proceeding.

25. In a February 13, 2013 Order at Docket No. C-2012-2308997 the PUC approved a settlement under which UGI and its two affiliated natural gas distribution companies are required to replace all in-service cast iron mains over a fourteen-year period and all bare steel mains over a thirty-year period beginning in March, 2013.

26. In its regulation appearing at 52 Pa. Code §59.18, which became effective on May 23, 2014 (copy attached hereto Exhibit "A") the PUC has also directed all Pennsylvania natural gas distribution companies, including UGI, to relocate all gas meters and regulators currently located inside buildings to outside locations over a twenty-year period, with limited exceptions.

27. In accordance with the provisions of 66 Pa.C.S. §§1352 and 1352, which became effective on April 16, 2012,

and the PUC's Final Implementation Order issued on August 2, 2012 at Docket No. M-2012-2293611 ("Act 11 Implementation Order"), UGI files periodic long-term infrastructure improvement plans ("LTIP") with the PUC for its approval, with proposed schedules for the replacement and improvement of its facilities, and annual asset optimization plans ("AAOP") on an annual basis reporting on its progress and plans for the upcoming twelve-month period.

28. UGI's most recent LTIP was approved by the PUC in an Opinion and Order at Docket No. P-2013-2398833 entered on July 31, 2014.

29. Under this most recent PUC-approved LTIP, UGI is scheduled to replace an average of approximately 33 miles of gas mains per year over a five-year period at an estimated cost of approximately \$51.2 million per year. UGI also committed to replacing all of its cast iron mains over a fourteen-year period and all of its bare steel pipes over a thirty-year period beginning in March, 2013.

30. In recognition of the disruptions that can occur as a result of LTIP projects, and the significant public benefits that can result from coordinating activities with PennDOT and local municipalities, UGI's PUC-approved LTIP also included a comprehensive outreach and coordination effort described in the PUC's July 31, 2014 LTIP Order as follows:

*UGI performs outreach to roadway authorities to identify planned roadway resurfacing and reconstruction projects. UGI issues template letter to highway stakeholders to gather information to better coordinate and align utility infrastructure replacement projects with transportation infrastructure plans. UGI offers that in addition to the written outreach, periodic*

*meetings are held with governmental officials to identify changes in project plans and to coordinate the efforts on major projects. UGI Engineering Staff has held follow-up meetings or discussions with larger municipalities including Allentown, Bethlehem, Carlisle, Easton, Harrisburg Lancaster, Lebanon, and Reading among others. UGI holds that it coordinates with PennDOT in a similar manner and actively participates in the Utility Highway Liaison Committee (UHLC) meetings to enhance project communication and infrastructure planning. UHLC is comprised of representatives of all the utility companies in Pennsylvania, each of the eleven PennDOT Engineering Districts and the PennDOT Central Office. UGI submits that in the communities of Allentown and Bethlehem, UGI utilizes an internet based tool, Envista, to facilitate project coordination and planning.*

*Upon review of the LTIP, and supplemental information, the Commission finds that the coordination activities requirements of the Final Implementation Order have been fulfilled.*

31. Consistent with this PUC-approved outreach effort, and to comply with its obligations under 52 Pa.C.S. §59.18, over the past six months UGI has made representatives of the City of Reading aware of the fact that it has a number of projects within the City limits for which it will be scheduling main repairs and/or meter relocations, in connection with which UGI intends to apply for applicable permits from the City of Reading, and for which it will notify customers affected thereby.

23. The Centre Park Betterment Project involves the installation

of approximately 6,200 feet of new pipeline, replacing approximately 4,980 feet of cast iron pipeline, the balance being coated steel and smaller diameter polyethylene pipe also being replaced; that project encompasses approximately 12 city blocks, and the construction timetable to complete that Project is estimated at three months. In connection therewith, and pursuant to 52 Pa. Code § 59.18 (G), UGI is to relocate approximately 141 meters from inside buildings to outside buildings, there already being approximately 37 meters located outside of buildings within the area of that Project prior to its commencement.

24. The City has not historically, at least recently, required UGI to obtain permits for installation of piping from any new or relocated meter back into a building to tie into the existing customer's fuel lines; instead, the City some time ago established a procedure pursuant to which UGI provides a list to the City at the end of each month identifying any new outside meter locations completed during the month, and also at that time UGI pays the applicable \$16.00-per address fee.

25. On or about April 13, 2017, UGI commenced work on the Centre Park Betterment Project. The preparation for and performance of the work associated with this Project –which is to include main and lateral replacements and approximately 141 meter relocations-- has involved a substantial expenditure of time, money and effort by UGI personnel and its contractors, to ensure prompt initiation of this Project and timely completion of the associated work. Further, given that Centre Avenue is a State highway, which PennDOT plans to repave commencing in or about June, 2017, if UGI is unable to complete its work prior to that date, and if PennDOT then repaves Centre Avenue prior to UGI performing this particular Betterment Project, UGI will be exposed to substantial and unnecessary costs and expense of having to repave PennDOT's repaved roadway.

As such, any disruptions to the scope and/or timing of that Project will have a substantial adverse impact on the costs (both direct and indirect) and timing of that betterment Project.

26. UGI previously applied for and obtained a street-opening Permit for the work to be performed within the streets and sidewalks of the Centre Park Betterment Project.

27. Notwithstanding the issuance of that Permit, on the morning of Monday, April 17, 2017, UGI personnel were advised by Kim Brautigan (Building Trades Inspector for the City of Reading) that the Centre Park Betterment Project was being "shut down" at the direction of the City's Managing Director, and that mechanical permits previously issued for work on that Project were being "revoked." UGI personnel were further advised that UGI and its contractors were required to stop all work on that Project, including work to be performed in the streets and sidewalks under the street-opening Permit previously issued by the City to UGI.

28. Further, on April 19, 2017, a City representative, Geoffrey Zolna, notified UGI personnel that "the City will not be issuing any street cut permits in Historic Districts until further notice."

29. In addition to the foregoing, City of Reading representatives have informed UGI that it will not be permitted to proceed with all aspects of the Centre Park Betterment Project, notwithstanding that Centre Street is a PennDOT highway under the jurisdiction of the Commonwealth of Pennsylvania Department of Transportation, and outside the City of Reading's jurisdiction.

30. The normal sequencing of work on a betterment project of this type is for UGI to first install the laterals and relocate the meters, and then install the main in the street. The City's refusal to allow UGI to install service laterals, involving cutting into sidewalks which are apparently within the City right of way, and relocating the meters, will effectively prevent and impede performance of any work on the Centre Park Betterment Project.

31. The City's demand that UGI effectively immediately cease all work on the Centre Park Betterment Project is unwarranted, unjustified, illegal and in violation of the Permit previously issued by the City to UGI for a number of reasons, including but not limited to the following:

(a) It is extremely inefficient and more costly for UGI to leave the meters involved in this Betterment Project --and for that matter all other betterment projects located in any City of Reading Historic District--, to replace gas mains, and replace service laterals, and to not at that point move the meters from inside buildings to outside the buildings, where they would be connected to the new service laterals;

(b) Leaving the meters inside the buildings at the same time the laterals are being replaced and worked on with the gas mains raises serious safety implications and concerns;

(c) It would be considerably more disruptive to UGI and its contractors to perform the work in two segments, i.e. first the main and lateral replacements, and then have to go back months later to relocate the meters, as well as disruptive to the community in the vicinity of this Project, and the public in general, not to mention the safety risk posed by leaving meters inside the buildings in direct violation of 52 Pa. Code Section 59.18;

(d) The City's attempt to block UGI's performance of work in connection with the Centre Park Betterment Project --if not enjoined and prohibited by this Court-- will prevent UGI from completing this work, particularly along Centre Avenue, before PennDOT's anticipated mid-June, 2017 repaving of Centre Avenue; if UGI's work is not completed before the start of PennDOT's work, UGI will be exposed to

substantial and unnecessary additional costs and expense in then having to reopen what will at that point have been the recently paved Centre Avenue, causing not only significant and unnecessary financial impact to UGI, but also disruption to the residents and users of Centre Avenue, as that street will have twice undergo the repaving process; and

(e) On or about December 6, 2016, UGI and the City resolved -- on the eve of a hearing scheduled before this Court -- a previous Application for Preliminary Injunction filed by UGI in this proceeding, by the City agreeing it would not withhold permits for street opening work associated with betterment projects such as the Centre Park, or if it did that it would provide UGI with sufficient advance notice of an intention to withhold any permits so UGI could seek relief from this Court; the City's demand that UGI cease and desist all further work on the Centre Park Betterment Project directly violates that agreement.

32. The applicability of 52 Pa. Code Section 59.18(G) to the Centre Park Betterment Project, particularly the relocation of meters in

conjunction with the other work being performed, is demonstrated by Subsection (g) to that regulation, which states as follows:

(G) APPLICATION OF REGULATION.

(1) UPON ITS EFFECTIVE DATE, UTILITIES SHALL COMPLY WITH THIS REGULATION FOR NEW METER, REGULATOR, AND SERVICE LINE INSTALLATIONS IN NEW LOCATIONS.

(2) UPON ITS EFFECTIVE DATE, UTILITIES SHALL COMPLY WITH THIS REGULATION WHEN REPLACING EXISTING METERS, REGULATORS **AND SERVICE LINE FACILITIES**.

(3) UTILITIES SHALL HAVE 20 YEARS FROM THE EFFECTIVE DATE OF THIS REGULATION TO COMPLETE REPLACEMENT OF EXISTING FACILITIES IN COMPLIANCE WITH THE REQUIREMENTS OF THE REGULATION OR INCORPORATE THE REQUIREMENTS OF THE REGULATION IN A DISTRIBUTION INTEGRITY MANAGEMENT PLAN, WHICHEVER OCCURS FIRST. (*emphasis added*)

33. The standard applicable to issuance of a preliminary injunction is well established.

Injunctive relief will lie where there is no adequate remedy at law. *Maritrans GP Inc. v. Pepper, Hamilton & Scheetz*, 529 Pa. 241, 259, 602 A.2d 1277, 1286 (1992). A preliminary injunction preserves the status quo as it existed before the acts complained of, while the Court decides on the merits of permanent injunctive relief. The essential prerequisites of a preliminary injunction are as follows:

(1) The injunction is necessary to prevent immediate and irreparable harm not compensable in money damages.

(2) Greater injury will result from refusing the injunction than from granting it.

(3) The injunction restores the parties to status quo ante.

(4) The activity sought to be restrained is actionable, and the plaintiff's right to relief is clear.

*John G. Bryant Co., Inc. v. Sling Testing and Repair, Inc.*, 471 Pa. 1, 7, 369 A.2d 1164, 1167 (1977). A party's right to relief is clear if the party seeking the preliminary injunction is likely to prevail on the merits of the permanent injunction. *Summit Towne Centre, Inc. v. Shoe Show of Rocky Mount, Inc.*, 573 Pa. 637, 647, 828 A.2d 995, 1001 (2003).

The standard of appellate review of a preliminary injunction is "any apparently reasonable grounds." In *Mazzie v. Commonwealth*, 495 Pa. 128, 133, 432 A.2d 985, 988 (1981), our Supreme Court explained:

On an appeal from the grant or denial of a preliminary injunction, we do not inquire into the merits of the controversy, but only examine the record to determine if there were any apparently reasonable grounds for the action of the court below. Only if it is plain that no grounds exist to support the decree or that the rule of law relied upon was palpably erroneous or misapplied will we interfere with the decision of the [Court].

*Id.* (citations omitted). A mandatory preliminary injunction, which commands performance of some positive act to preserve the status quo, receives closer scrutiny than does a preliminary injunction that restrains conduct. As has been explained by the

Supreme Court:

This Court has engaged in greater scrutiny of mandatory injunctions and has often stated that they should be issued more sparingly than injunctions that are merely prohibitory. Thus, in reviewing the grant of a mandatory injunction, we have insisted that a clear right to relief in the plaintiff be established.

*Mazzie*, 495 Pa. at 134, 432 A.2d at 988 (emphasis added).

***The Woods at Wayne Homeowner's Association v. Gambone Brothers Construction Company, Inc.***, 893 A.2d 196 (Pa. Cmwlth. 2006), *app. den.* 588 Pa. 767, 903 A.2d 1235 (2006).

34. For reasons stated previously and as follows in this

Application, the requirements for issuance of a mandatory preliminary injunction in this matter are met and satisfied.

35. First and foremost, the authority for UGI to open streets to perform utility work on betterment projects, such as the Centre Park Betterment Project, including the replacement of gas mains and laterals, is clear and cannot be disputed, and its right to relocate meters is pursuant to the PUC's regulation appearing at 52 Pa. Code § 59.18.

36. UGI's obligation to replace gas mains and laterals, and to relocate meters as directed by the PUC, is being and will be directly frustrated and violated by (i) any attempt by the City pronouncement

that it intends to prohibit street openings in historic districts, and (ii) any attempted enforcement of the August 2015 Meter Ordinance and/or the February 13, 2017 Resolution, particularly as relates to the Centre Park Betterment Project and other future betterment projects; perhaps most importantly, UGI believes and avers that there is no legal authority for the City to prohibit street openings in historic districts and/or to have adopted the August, 2015 Meter Ordinance and/or the February, 2017 Resolution, all of which represent efforts by the City to legislate utility activities by and within the City of Reading. If enforced, those municipal enactments impermissibly seek to interfere with a state-wide regulated public utility (UGI) exercising its rights under 15 Pa.C.S.A. Section 1511(e), and from complying with a regulation duly adopted by the Pennsylvania Public Utility Commission, i.e. 52 Pa. Code Section 59.18, the validity of which the City of Reading has not challenged and cannot challenge.

37. UGI, its customers and the public will be placed in a position of immediate and irreparable damage, injury and harm if a mandatory preliminary injunction is not promptly entered prohibiting the City from interfering with or obstructing UGI's performance of work in connection

with the Centre Park Betterment Project, and any other utility projects, particularly from the standpoint of public safety and risk; further, UGI will suffer immediate and irreparable damage, injury and loss if it is not permitted to perform all work related to that Project, and also to perform the meter relocations at the same time as the gas main and lateral replacements which are part of the Centre Park Betterment Project, in that there will be substantial lost economies of scale, as well as unrecoverable costs and time in remobilizing to return and perform work, including relocating those meters at a point long after the main and lateral replacements have occurred.

38. Conversely, there is no damage or harm to the City if it is enjoined by this Court from blocking UGI's performance of its work on this and other betterment Projects, and from attempting to enforce either the August 2015 Meter Ordinance and/or the February 13, 2017, Resolution, particularly since (a) UGI has a clear right to occupy public rights of way (streets) for installation of its facilities, (b) if UGI prevails in this litigation and the August 2015 Meter Ordinance, and/or the February 13, 2017, Resolution, is/are deemed to be invalid and unenforceable, then it will have been determined that any meters

relocated from inside buildings to outside to comply with 52 Pa. Code § 59.18, will have constituted valid and proper action, (c) the City is already involved in administrative proceedings pending before the Pennsylvania Public Utility Commission, in which it is attempting to challenge UGI's right to relocate meters within Historic Districts, and its contentions in that regard will be heard in that proceeding, and (c) even if the August 2015 Meter Ordinance and/or the February 13, 2017, Resolution did not constitute illegal and improper infringements upon the exclusive jurisdiction and authority of the Pennsylvania Public Utility Commission, then any meters which UGI has relocated from indoors to outdoors during the pendency of this litigation would be subject to review and determination by the PUC as to whether those meters should be relocated back inside of any buildings and at whose cost and expense.

39. UGI is without an adequate remedy at law, and therefore requests the equitable relief sought herein; in addition, UGI has attempted to amicably resolve this matter without seeking court intervention, but to no avail.

WHEREFORE, Petitioner/Applicant, UGI Utilities, Inc., respectfully

requests entry of an Order of this Court granting the following relief:

(a) Barring and precluding any attempt by the City of Reading to interfere with, impede or delay UGI's performance of all work encompassed by the Centre Park Betterment Project, including relocation of meters in connection with UGI's compliance with its duties and obligations under 52 Pa. Code § 59.18;

(b) Barring the City of Reading from attempting to enforce either the 2015 Meter Ordinance and/or the February 13, 2017 Resolution, as it relates to the Centre Park Betterment Project;

(c) Barring and precluding the City of Reading from interfering with UGI's attempts to comply with its obligations under 52 Pa. Code § 59.18 in connection with the Centre Park Betterment Project, and in connection therewith, the City shall issue all permits for which application is made pending the outcome of this litigation;

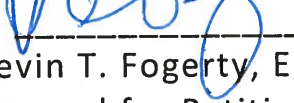

(d) Ordering and directing that any failure by the City of Reading to comply with the provisions of this Court's Order shall

be grounds for UGI to file an Application for Relief in the Nature of a Petition for Contempt; and

(e) Granting such additional and further relief as may be deemed necessary, just or appropriate, including an award of legal fees and costs to UGI for it having had to pursue this Application for Relief.

PA Supreme Court I. D. No. 36667

1. Petitioner, UGI Utilities, Inc. (hereafter "UGI") is a Pennsylvania public utility corporation maintaining its principal of business at 2525 N. 12th Street, Suite 360, Post Office Box 12677, Reading, PA 19612-2677.

2. Respondent, City of Reading, is a Third Class City organized and existing pursuant to applicable Pennsylvania law, having a place of business at 815 Washington Street, Reading, PA 19601.

3. Respondent/Indispensable Party, Pennsylvania Public Utility Commission (hereafter "PUC"), is a Commonwealth agency having offices at 400 North Street, Keystone Building, Harrisburg, PA 17120. The PUC has been named and joined as a Respondent herein because it is a necessary and indispensable party to this litigation, given the adjudication of claims for pre-emption, as alleged in all three Counts of this Amended Petition and the relief sought herein.

## **II. ORIGINAL JURISDICTION OF THE COMMONWEALTH COURT**

4. The Pennsylvania Commonwealth Court has original jurisdiction over this proceeding pursuant to 42 Pa. C. S. Section 761(a)(1), because the claims alleged herein involve matters within the

jurisdiction of the Pennsylvania Public Utility Commission, which, as alleged previously, is an indispensable and necessary party, particularly since the allegations and claims asserted herein pertain directly to the provision of regulated public utility services.

### **III. FACTUAL ALLEGATIONS COMMON TO ALL CLAIMS**

5. UGI is a “public utility” and a “natural gas distribution company” as those terms are defined in 66 Pa.C.S. §§102 and 2202, and a “public utility corporation” within the intendment of 15 Pa.C.S. §1511(e).

6. As a regulated public utility, UGI provides natural gas and other utility services to residential and business/commercial customers throughout eastern and central Pennsylvania.

7. More specifically, UGI is a certificated natural gas distribution company serving approximately 355,000 customers in a service territory encompassing portions of 16 counties in Pennsylvania.

8. UGI provides natural gas distribution service within the City of Reading to more than 19,500 customer accounts.

9. In order to transmit and distribute natural gas to its customers, UGI owns and operates a network of underground natural gas

distribution mains, service lines, and other facilities; more specifically, within the City of Reading, UGI has approximately 149 lineal miles of underground distribution mains, almost all of which are located within streets owned and operated by the City of Reading.

10. In deciding where to locate its underground distribution facilities, UGI typically has two alternatives, i.e. place the facilities either in the existing public rights-of-way (streets or other federal, state or municipal properties), or, if available, on private property.

11. UGI's right and entitlement to utilize public streets and other public ways and places for its gas distribution facilities is codified at 15 Pa. C. S. Section 1511(e), which provides as follows:

(e) Streets and other public places. -- A public utility corporation *shall have the right* to enter upon and occupy streets, highways, waters and other public ways and places for one or more of the principal purposes specified in subsection (a) and ancillary purposes reasonably necessary or appropriate for the accomplishment of the principal purposes, including the placement, maintenance and removal of aerial, surface and subsurface public utility facilities thereon or therein. *Before entering upon any street, highway or other public way, the public utility corporation shall obtain such permits as may be required by law and shall comply with the lawful and reasonable regulations of the governmental authority having responsibility for the maintenance thereof. (Emphasis added.)*

12. The Amended Committee Comment (1990) to Section 1511(e) states:

[R]eference in the last sentence of subsection (e) to "permits" is a codification of the prior law relating to the time and manner of opening a street, etc., and is not intended to imply a power to decide whether or not, and by whom, a type of utility service may be offered by means of the contemplated facilities. See generally Zeiter, "A Comparison of the Pennsylvania Business Corporation Law and the New Delaware Corporation Law in Light of the 198 Revision of the Pennsylvania Law," 74 Dick. L.Rev. 1, 40-52 (1969).

13. The Commonwealth Court has stated that "Section 1511 (e) is a grant of power to public utilities, not a limitation." ***PECO Energy Company v. Township of Upper Dublin***, 922 A.2d 996, 1007-08 (Pa.Cmwth. 2007).

14. 66 Pa. C.S. Section 1501 (titled "Character of Service and Facilities") provides as follows:

Every public utility shall furnish and maintain adequate, safe, and reasonable service and facilities, and shall make all such repairs, changes, alterations, substitutions, extensions, and improvements in or to such service and facilities as shall be necessary or proper for the accommodation, convenience, and safety of its patrons, employees, and the public. Such service also shall be reasonably continuous and without unreasonable interruptions or delay. Such service and facilities shall be in conformity with the regulations and orders of the commission. Subject to the provisions of this part and the regulations or orders of the commission, every public utility may have

reasonable rules and regulations governing the conditions under which it shall be required to render service. Any public utility service being furnished or rendered by a municipal corporation beyond its corporate limits shall be subject to regulation and control by the commission as to service and extensions, with the same force and in like manner as if such service were rendered by a public utility. The commission shall have sole and exclusive jurisdiction to promulgate rules and regulations for the allocation of natural or artificial gas supply by a public utility.

15. In order to fulfill its statutory obligation to provide reasonably continuous, safe, affordable and reliable natural gas service to customers within its service territory, UGI must construct, own, and maintain underground natural gas distribution lines and related facilities, and in particular, metering equipment, and it must do so in accordance with the Pennsylvania Public Utility Code, as well as regulations and orders of the PUC.

16. The General Assembly has vested in the PUC exclusive authority over the complex and technical service and engineering questions arising in the location, construction and maintenance of all public utility facilities. ***Duquesne Light Company v. Borough of Monroeville***, 449 Pa. 573, 298 A.2d 252 (1973); ***County of Chester v. Philadelphia Electric Company***, 420 Pa. 422, 218 A.2d 331 (1966); ***PECO***

***Energy Company v. Township of Upper Dublin***, 992 A.2d 996 (Pa. Cmwh. 2007).

17. Pursuant to the statutory authority granted by the Pennsylvania Public Utility Code, the PUC has:

(a) General administrative power and authority to supervise and regulate all public utilities doing business within the Commonwealth. 66 Pa. C.S. § 501(b).

(b) The power to prescribe as to service and facilities, including the crossing of facilities just and reasonable standards, classifications, regulations and practices to be furnished, imposed, observed and follow by any or all public utilities. 66 Pa. C.S. § 1504(1).

(c) The power to set through regulations, inspections, maintenance, repair and replacement standards and enforce those standards. 66 Pa. C.S. § 2203(1).

18. Pursuant to these powers, the PUC regulates the service provided by public utilities and the facilities they use to provide service on a uniform, state-wide basis pursuant to the intent of the General Assembly in adopting the Public Utility Code.

19. It has been consistently confirmed by the Pennsylvania courts that the PUC is the sole regulator of public utilities: "[t]he necessity for

conformity in the regulation and control of public utilities is as apparent as the electric lines which one views traversing the Commonwealth. If each county were to pronounce its own regulation and control over electric wires, pipe lines and oil lines, the conveyors of power and fuel could become so twisted as to affect adversely the welfare of the entire state. It is for that reason that the Legislature has vested in the [PUC] exclusive authority over the complex and technical service and engineering questions arising in the location, construction and maintenance of all public utilities facilities." ***County of Chester v. Philadelphia Electric Company***, 420 Pa. 422, 425-26, 218 A.2d 331, 333 (1966). *See also, PECO Energy Company v. Township of Upper Dublin*, 922 A.2d 996, 1001 (Pa. Cmwth. 2007).

20. The purpose of uniform, state-wide regulation is to prevent municipalities from regulating public utilities locally, because such local regulation would result in inconsistent rules, policies and procedures, as well as different conditions and requirements within different municipalities, which would prevent public utilities from providing essential services in a safe and efficient manner as intended by the

General Assembly. For these reasons, the Public Utility Code, and the interpretation and application thereof by the Pennsylvania Public Utility Commission and state courts, preempts local regulation of (a) services provided by public utilities and (b) the facilities used to provide service, including but not limited to preempting a municipality's ability to charge excessive and unreasonable fees and costs.

21. Municipalities, such as the City of Reading, are created by authority of the Commonwealth of Pennsylvania, and they do not possess powers not expressly delegated to them; in that same vein, if a municipality adopts an ordinance which exceeds its authority and/or the limits of its police powers, that ordinance is invalid. ***Hamilton Hills Group, LLC v. Hamilton Twp. Zoning Hearing Bd.***, 4 A.3d 788, 796 (Pa. Cmwth. 2010).

22. It is a well-established rule of law in this Commonwealth that local municipalities may not adopt ordinances or other rules, regulations, policies or procedures, whether under the guise of zoning, subdivision or otherwise, attempting to regulate or control any aspect of public utility service which is within the exclusive province and jurisdiction of the PUC,

particularly those aspects of public utility service under the authority of the Public Utility Code and related regulations. ***South Coventry Township v. Philadelphia Electric Company***, 44 Pa. Cmwth. 289, 504 A.2d 368 (1986).

23. It is a well-established rule of law in this Commonwealth that municipalities may not levy and extract extortionate fees and costs, particularly for the improper purpose of generating revenues for the municipality. See ***Raum v. Board of Supervisors of Tredyffrin Township***, 29 Pa. Cmwth. 9, 370 A.2d 777 (1976) (fee charged by municipality to process and review subdivision plan "bore no relation to the expense of the Township in reviewing and otherwise processing the plan").

24. It is also a well-established rule of law in this Commonwealth that municipalities may not impose and/or levy unreasonable fees and costs under the guise of regulating public utilities' use of public rights-of-way. See ***Pennsylvania Department of Highways v. Pennsylvania Public Utility Commission***, 185 Pa. Super. 1, 136 A.2d 473 (1957) ("the highways are primarily for the traveling public" and "their use by public utility

companies is a subordinate use, permitted by the Commonwealth without cost except for permit fees . . .").

25. In a February 13, 2013 Order at Docket No. C-2012-2308997 the PUC approved a settlement under which UGI and its two affiliated natural gas distribution companies are required to replace all in-service cast iron mains over a fourteen-year period and all bare steel mains over a thirty-year period beginning in March, 2013.

26. In its regulation appearing at 52 Pa. Code §59.18, which became effective on May 23, 2014 (copy attached hereto Exhibit "A") the PUC has also directed all Pennsylvania natural gas distribution companies, including UGI, to relocate all gas meters and regulators currently located inside buildings to outside locations over a twenty-year period, with limited exceptions.

27. In accordance with the provisions of 66 Pa.C.S. §§1352 and 1352, which became effective on April 16, 2012, and the PUC's Final Implementation Order issued on August 2, 2012 at Docket No. M-2012-2293611 ("Act 11 Implementation Order"), UGI files periodic long-term infrastructure improvement plans ("LTIP") with the PUC for its approval,

with proposed schedules for the replacement and improvement of its facilities, and annual asset optimization plans (“AAOP”) on an annual basis reporting on its progress and plans for the upcoming twelve-month period.

28. UGI’s most recent LTIP was approved by the PUC in an Opinion and Order at Docket No. P-2013-2398833 entered on July 31, 2014.

29. Under this most recent PUC-approved LTIP, UGI is scheduled to replace an average of approximately 33 miles of gas mains per year over a five-year period at an estimated cost of approximately \$51.2 million per year. UGI also committed to replacing all of its cast iron mains over a fourteen-year period and all of its bare steel pipes over a thirty-year period beginning in March, 2013.

30. In recognition of the disruptions that can occur as a result of LTIP projects, and the significant public benefits that can result from coordinating activities with PennDOT and local municipalities, UGI’s PUC-approved LTIP also included a comprehensive outreach and coordination effort described in the PUC’s July 31, 2014 LTIP Order as follows:

*UGI performs outreach to roadway authorities to identify planned roadway resurfacing and reconstruction projects. UGI issues template letter to highway stakeholders to gather information to better coordinate and align utility infrastructure replacement projects with transportation infrastructure plans. UGI offers that in addition to the written outreach, periodic meetings are held with governmental officials to identify changes in project plans and to coordinate the efforts on major projects. UGI Engineering Staff has held follow-up meetings or discussions with larger municipalities including Allentown, Bethlehem, Carlisle, Easton, Harrisburg Lancaster, Lebanon, and Reading among others. UGI holds that it coordinates with PennDOT in a similar manner and actively participates in the Utility Highway Liaison Committee (UHLC) meetings to enhance project communication and infrastructure planning. UHLC is comprised of representatives of all the utility companies in Pennsylvania, each of the eleven PennDOT Engineering Districts and the PennDOT Central Office. UGI submits that in the communities of Allentown and Bethlehem, UGI utilizes an internet based tool, Envista, to facilitate project coordination and planning.*

*Upon review of the LTIP, and supplemental information, the Commission finds that the coordination activities requirements of the Final Implementation Order have been fulfilled.*

31. Consistent with this PUC-approved outreach effort, and to comply with its obligations under 52 Pa.C.S. §59.18, over the past six

months UGI has made representatives of the City of Reading aware of the fact that it has a number of projects within the City limits for which it will be scheduling main repairs and/or meter relocations, in connection with which UGI intends to apply for applicable permits from the City of Reading, and for which it will notify customers affected thereby.

32. After having been made aware of UGI's intended projects and work within the City limits, on or about June 26, 2015, the City of Reading informed UGI that it was dissatisfied with the meter relocations in designated historical districts within the City and that it would be changing the permit application process used to obtain permits to perform system repair and gas meter relocation in the City.

33. UGI protested this demand by the City, noting that doing so would impede the ability of a PUC-regulated utility from performing one of its principal duties of maintaining safe conditions for gas meters, and complying with PUC regulations in connection therewith, and that there was no authority for this action under the City of Reading's existing Ordinances; nonetheless, UGI attempted to enter into negotiations with the City representatives to try to reasonably resolve the matter.

**COUNT I – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION  
(City of Reading Ordinance No. 45-2015)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

34. The allegations contained in Paragraphs 1 through 33 of this Amended Petition are incorporated herein by reference as through the same were fully set forth at length.

35. On or about Monday, August 24, 2015, Council for the City of Reading adopted its Ordinance No. 45-2015, a true and correct copy of which is attached hereto Exhibit "B" (hereafter "the August 2015 Meter Ordinance").

36. The August 2015 Meter Ordinance is null, void, and illegal on its face, as an attempt by local government to interfere with the jurisdiction and authority of the Pennsylvania Public Utility Commission over regulated natural gas service, such as provided by UGI within the City of Reading; more specifically, this Ordinance is an obvious attempt by the City, particularly in Amended Section 295-106(F), to regulate the placement of gas metering equipment, as well as requiring public utilities to obtain what is referred to as a Certificate of Appropriateness from a

City of Reading employee, referred to as a Preservation Officer, as a condition of installing gas metering equipment as well as imposing inappropriate and illegal conditions and construction/installation requirements, and imposing penalties for any violation of that Ordinance.

37. The August 2015 Meter Ordinance is illegal on its face, as being in direct violation of the exclusive jurisdiction and authority vested in the Public Utility Commission, particularly under the Public Utility Code, and as representing an attempt by a local governmental agency to impose requirements on the provision of regulated public utility service, particularly concerning a topic, i.e. location and relocation of gas metering equipment, in connection with which the PUC has promulgated a specific regulation which the City of Reading is attempting to circumvent and/or to impose its own interpretational requirements.

38. UGI alleges and avers that: (a) the issues involved in this declaratory judgment action -- concerning the legality and enforceability of various Ordinances adopted by the City of Reading, as described in this Count I as well as in the two Counts which follow, are issues which are capable of repetition, and likely to be repeated, in future situations

involving UGI and/or other utilities seeking permission to engage in PUC-regulated activities within the City of Reading, including but not limited to relocation of utility meters from inside to outside buildings and other structures, as well as requests by UGI and/or others seeking permission to open local highways/roads located within the City of Reading, (b) the questions presented are of significant importance and dimension, and (c) it is inevitable that similar situations will arise in the future, as to which there will be a need to obtain judicial review, those situations also very likely involving an urgency on UGI's (or some other person's or entity's) part to promptly install and/or relocate its facilities, which would be seriously and adversely affected if UGI (or that other person or entity) would be forced to await judicial review. As such, immediate judicial review and declaratory relief with respect to all issues raised herein is appropriate under the circumstances.

39. Based on the foregoing, there is a justiciable controversy and dispute between UGI and the City of Reading concerning the legality and enforceability of the Ordinance provisions challenged in this proceeding, including but not limited to (i) Ordinance No. 40-2015, (ii) Sections 508-

702(l), 508-703, and 508-704 of the July 2015 Ordinance (referenced in Count II below), (iii) the requirements under the City of Reading's new Street Excavation Application form (also referenced in Count II below), and (iv) the provisions of the Fee Schedule Ordinance (which is the subject of Count III below), as those Ordinances seek to impose requirements on regulated public utility companies which will materially interfere with the public utility services provided by each such utility.

40. Petitioner UGI brings this action pursuant to the Pennsylvania Declaratory Judgments Act, 42 Pa. C. S. A. Section 7531 et seq., and also Pennsylvania Rule of Civil Procedure 1601 et seq., to hear and decide the claims alleged in this Amended Petition, to determine the rights of the parties, and to determine the legality and enforceability of the challenged provisions of the three Ordinances referred to herein.

41. Based on the foregoing, the August 2015 Meter Ordinance should be declared illegal and void, and the City of Reading should be barred and precluded from attempting to enforce it.

WHEREFORE, Petitioner UGI Utilities, Inc. respectfully requests entry of an Order of this Court (i) declaring that City of Reading Ordinance No.

45-2015 is invalid and illegal per se, as preempted by the Pennsylvania Public Utility Code, and the jurisdiction of the Pennsylvania Public Utility Commission, (ii) directing that Respondent City of Reading cease attempting to enforce any provisions of that Ordinance, (iii) issuing a permanent injunction barring and precluding the City of Reading from attempting to enforce that Ordinance, and (iv) awarding and directing such additional and further relief as this Court may deem necessary, just and/or appropriate.

**COUNT II – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION  
(City of Reading Ordinance No. 40-2015 and Street Excavation  
Application Form)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

42. The allegations contained in Paragraphs 1 through 41 of this Amended Petition are incorporated herein by reference as through the same were fully set forth at length.

43. On or about July 13, 2015, Council for the City of Reading adopted Ordinance No. 40-2015, a true and correct copy of which is attached as Exhibit "C" to this Amended Petition ("the July 2015

Ordinance”), purporting to regulate public utilities' (and other users') occupation of rights-of-ways located within the City of Reading, particularly including but not necessarily limited to underground occupancy of streets for natural gas and other facilities.

44. The City's July 2015 Ordinance contained a number of provisions which are improper and illegal, some or all of which are preempted by the Pennsylvania Public Utility Code and the regulatory authority of the PUC.

45. The City's July 2015 Ordinance contained a number of provisions which are illegal and impermissible, in that they have a materially adverse impact on regulated public utility service within the City of Reading.

46. More specifically, the July 2015 Ordinance contained three (3) provisions, appearing in Sections 508-702(I), 508-703, and 508-704, which state as follows:

508-702(I). Revocation of Permit. All street cut or excavation permits are subject to revocation at any time by the Department of Public Works upon written notice served to whom the permit was granted, their agent, or employee. Such notice shall contain a brief statement detailing the revocation and be issued for failure to cure with three (3) days:

1. A violation of any condition of the permit.
2. A violation of this section or any other applicable City of Reading ordinance relating to the work.
3. The creation or failure to eliminate a condition or action that constitutes a nuisance or endangers the lives, property, or welfare of City residents.

508-703. Street Cut Permits shall not be issued to any person, firm or corporation indebted to the City due to a previously issued permit. Additionally, no permit shall be issued for non-emergency work commencing from September through November of any calendar year; . . .

. . . .

508-704. Permit applications shall be submitted not less than thirty (30) days prior to the start of the proposed street cut work, and construction work must commence within fifteen (15) calendar days of approval; failure to do so may result in permit revocation, or require the submission of a new application. The Permittee shall notify the city at least three days in advance of breaking the street. Each permit shall be valid for a period of four months. If deemed necessary, permit time extensions may be granted as specified in Section 508-709 Other related permits and fees; . . .

47. The effect of Section 508-702(I) of the July 2015 Ordinance was to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers, as it provides the City with broad discretionary authority to regulate a public utility corporation that is already under the exclusive

supervision of the PUC. Further, UGI believes and avers that it is the City's intent to utilize Section 508-702(l) as a back-door mechanism to attempt to interfere with and disrupt UGI's meter-relocation obligations and responsibilities under 52 Pa.C.S. §59.18, by revoking permits previously issued, and/or by refusing to issue permits to UGI based on any instances where UGI has notified the City of its intent to relocate indoor meters into outdoor areas in order to comply with that particular PUC regulation.

48. The effect of Section 508-703 of the July 2015 Ordinance was to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers which may request it during the three-month period between September and November, as this provision of the City's Ordinance would unreasonably preclude UGI from excavating and opening any public property, including streets, which may be necessary to provide natural gas service, either to existing customers and/or to new customers.

49. The effect of Section 508-704 of the July 2015 Ordinance is to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers, in

requiring work to start within a 15-day period after the issuance of a permit, when in fact the utility can and should have the right to determine the scheduling of its utility installation work once it has obtained a permit therefor, as a consequence of which this provision would create an unreasonable and burdensome responsibility for a public utility, which could adversely impact or even prevent the utility from timely and efficiently providing natural gas to existing and/or to new customers.

50. In its original Petition for Review filed in this proceeding, UGI objected to certain aspects of Ordinance No. 40-2015, as set forth in Count II of that pleading; however, in an apparent but unsuccessful attempt to cure UGI's objections, the City of Reading, on November 23, 2015, enacted and adopted its Ordinance No. 77-2015, a copy of which is attached hereto as Exhibit "D."

51. The problem with the City's adoption of Ordinance No. 77-2015, is that the changes made to Ordinance No. 40-2105 are cosmetic in nature, particularly with respect to Sections 508-702 and 508-703 of Ordinance No. 40-2015; more specifically, the deletion of the word

“nuisance” from Section 508-702(1)(3) and the addition of the phrase “violation of applicable Americans with Disabilities Act compliances guidelines [sic],” does not alter the fact that Section 508-702 continues to contain language pursuant to which the City has unreasonably and impermissibly broad discretionary authority to regulate the provision of public utility service, particularly as a mechanism to interfere with and disrupt UGI's meter-relocation obligations and responsibilities under 52 Pa.C.S. §59.18, by revoking permits previously issued, and/or by refusing to issue permits to UGI based on any instances where UGI has notified the City of its intent to relocate indoor meters into outdoor areas in order to comply with that particular PUC regulation.

Further, the inclusion of the language “. . . unless a special exception is granted by the Public Works Director,” to Section 508-703 does not cure the impermissible effect of that provision, which is that a public utility, such as UGI, is barred from installing its facilities utilizing City rights of way, if the project would begin in November, December or January of a particular year, absent special dispensation having been

granted by that City official, particularly with there being no objective criteria for such an evaluation.

52. Based on the forgoing, UGI believes and avers that Sections 508-702(I), 508-703, and 508-704 of the July 2015 Ordinance, as amended by Ordinance No. 77-2015, are preempted by the applicable provisions of the Pennsylvania Public Utility Code and related regulations, particularly as interfering directly with the provision of public utility service, and they are therefore improper and illegal.

53. On or about August 5, 2015, UGI learned that the City of Reading had adopted a new Street Excavation Application form, which it was requiring UGI -- as well as other utilities -- to sign as a condition of the issuance of any Permits to occupy City of Reading rights of way. A true and correct copy of that Street Excavation Application form is attached hereto as Exhibit "E" and incorporated herein by reference.

54. UGI believes and avers that the City's inclusion of the "Historic District Impact" questions on its new Street Excavation Application form represent a continuing attempt by the City to enforce and/or oversee the application of 52 Pa. Code §59.18, notwithstanding that enforcement of

the said regulation is within the exclusive purview and jurisdiction of the Pennsylvania Public Utility Commission.

55. UGI believes and avers that the City's revised Street Excavation Application form is intended by City representatives to elicit unnecessary and inappropriate information regarding work performed in "Historic Districts," and in particular to compel the utility to demonstrate why any meters previously located inside a structure are being moved outside, and why any meters to be installed or relocated have not been given consideration for indoor placement.

56. UGI further believes and avers that a number of the Terms and Conditions appearing in Section 6 of that Application form are illegal on their face, or in the alternative, are overly broad and vague, and are intended to, will have the effect of and will be relied upon by City representatives to obstruct and interfere with UGI's already regulated public utility functions and operations.

57. More specifically:

-- It is not permissible for the City to make the permission granted to UGI to install its facilities " . . . revocable by order of the

Public Works Director . . . " at any time, or for any reason, or for no reason;

-- The second sentence of Section 6(A) improperly states that the issuance of the City's permit does not grant or assign to UGI any "property right or title in or to the right-of-way . . . " when in fact under 15 Pa. C.S.A. Section 1511 (e) UGI is vested with the right and entitlement to occupy public property, particularly street rights-of-way, conditioned only upon " . . . compl[iance] with the lawful and reasonable regulations of the governmental authority having responsibility for the maintenance [of that right-of-way];" and

-- Subsection (E) of Section 6 requires UGI to commence work to be performed pursuant to its Permit, within 15 days of its approval, which for reasons stated previously in this Amended Petition, is unreasonable, inappropriate, and illegal.

58. As alleged previously, the Pennsylvania Public Utility Code, and the PUC's implementation and enforcement of the provisions of that statute, and adoption of regulations pursuant thereto, preempt any local regulation of public utilities' charges, facilities and services, including but

not limited to a municipality adopting ordinances, rules or regulations directly impacting a utility's provision of utility services to the public.

59. Also as alleged previously, the PUC has full right and authority to enforce the provisions of the Public Utility Code and related regulations pursuant to the legislature's intent, as interpreted and applied by the PUC, and the PUC's standards and requirements preempt the field of local municipality public utility regulation, including preemption of any ordinances, rules or regulations which would have the effect of impacting a utility's ability to provide utility services to the public.

60. Based on the foregoing, UGI respectfully requests entry of an Order of this Court declaring invalid and unenforceable Sections 508-702(l), 508-703, and 508-704 of the City of Reading's July 2015 Ordinance, as amended by Ordinance No. 77-2015, as well as the requirement that utilities, such as UGI, complete and submit the new Street Excavation Application form, as directly and adversely impacting the provision of regulated public utility service within the City's geographical limits.

WHEREFORE, Petitioner, UGI Utilities, Inc., respectfully requests entry of an Order of this Court (i) declaring that Sections 508-702(I), 508-703, and 508-704 of the City of Reading's July 2015 Ordinance, as amended by Ordinance No. 77-2015, are invalid and illegal per se, as preempted by the Pennsylvania Public Utility Code, and the jurisdiction of the Pennsylvania Public Utility Commission, (ii) directing that Respondent City of Reading cease attempting to enforce those provisions of its Ordinance, (iii) issuing a permanent injunction barring and precluding Respondent City of Reading from attempting to enforce those provisions of the July 2015 Ordinance, as amended by Ordinance No. 77-2015, and (iv) declaring that the provisions in the Street Excavation Application form initiated by the City of Reading in or about July 20, 2015, which were referred to in Paragraphs 53 through 56 of this Amended Petition, are illegal and unenforceable, and barring and precluding the City from using that form until the offending provisions are removed, and (v) directing and awarding such additional and further relief as this Court may deem necessary, just and/or appropriate.

**COUNT III – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION AND  
UNREASONABLENESS OF MUNICIPALITY FEES AND CHARGES  
(City of Reading Ordinance No. 44-2015)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

61. The allegations contained in Paragraphs 1 through 60 of this Amended Petition are incorporated herein by reference as though the same were fully set forth at length.

62. On or about Monday, August 24, 2015, the City of Reading adopted Ordinance No. 44-2015 ("the Fee Schedule Ordinance"), purporting to establish a Fee Schedule in connection with the opening of public streets and rights of way; a true and correct copy of that Ordinance is attached hereto as Exhibit "F."

63. UGI believes and avers that the Fee Schedule Ordinance is illegal and unreasonable, in the following respects:

(a) The "Steel Placement Fees" are excessive, inappropriate and unwarranted and not reasonably related to legitimate costs or expenses of the City relating to work performed in public rights of way, or to proper public safety concerns; and

(b) The additional charges to be assessed under this Ordinance for "Pavement Restoration Fees" when work is done on a roadway within either five years of the road having been previously paving, or in the alternative, within six to ten years thereof, are in the nature of an unreasonable and unwarranted so-called "Premature Degradation Fee," for which there is no engineering or other basis or support;

64. The aforesaid provisions of the Fee Schedule Ordinance, being imposed against users of City of Reading rights-of-way, including public utilities such as UGI, (i) are having and will continue to have a material adverse impact on the ability of public utilities, such as UGI, to provide cost-effective utility service to customers, particularly with respect to costs and expenses that are typically passed on directly to customers, (ii) will result in substantial additional operating expenses which, if not capable of being passed on directly to those customers specifically involved with a particular project, will likely end up being factored into the rate-determination process, and (iii) are unreasonable, excessive and improperly designed as a revenue-enhancing measure,

particularly including but not necessarily limited to charging inordinate and illegal fees, costs and expenses for the occupancy by public utilities, such as UGI, of City of Reading rights-of-way, particularly streets and highways located within the City.

65. As noted previously in this Amended Petition, a municipality -- such as the City here -- may not impose unreasonable and excessive fees, charges, costs and assessments on public utilities which would materially impact utility rates and services.

66. For the following reasons the provisions of the Fee Schedule Ordinance will have a direct and material adverse impact and consequences on regulated public utility service within the Commonwealth of Pennsylvania:

(i) the excessive fees and other requirements will substantially hamper the ability to provide cost effective utility service, and will result in either increased charges and fees to customers, an inability to provide service to customers, and/or increased rates being charged to customers;

(ii) the Fee Schedule Ordinance creates the precedent, opportunity and likelihood that other municipalities will follow the same approach, and adopt similar-type ordinances imposing unreasonable and illegal fees and costs, and imposing operational requirements which unnecessarily disrupt and burden UGI's provision of utility services; and

(iii) other municipalities may be encouraged to adopt similarly inappropriate ordinances, attempting to raise revenues through the imposition of excessive and unreasonable fees and costs, thereby directly disrupting this Commonwealth's and the PUC's policy of uniform state-wide regulation of utilities and utility facilities.

67. For the reasons explained in this Amended Petition, the provisions of the Fee Schedule Ordinance being challenged herein (i) are preempted by the PUC's jurisdiction over rates and utility facilities and services, (ii) lack statutory authority, and (iii) violate 15 Pa. C.S. Section 1511(e), particularly through the imposition of illegal and unreasonable fees and charges, which not only are tantamount to an illegal tax, but

which have a direct and adverse impact and consequences on the provision of utility services at reasonable rates and charges.

68. More specifically, the Fee Schedule Ordinance represents an illegal and unauthorized enactment, which improperly regulates and affects the operation of public utilities, in the following particulars:

(a) The fees assessed by the City of Reading under the Fee Schedule Ordinance constitute excessive and unreasonable charges, representing in a number of respects alleged herein a substantial increase from fees which had been previously charged by the City of Reading under its prior Ordinance, as well as being substantially in excess of the corresponding fees and charges historically assessed by other municipalities; further, UGI believes and avers that these revenue-generating provisions will result in substantial costs to utilities which exercise their statutory right to use and occupy public rights of way;

(b) The requirements imposed on public utility companies under the provisions of the Fee Schedule Ordinance quoted in

Paragraph 63 above (i) are unfair and unreasonable, and (ii) are considerably greater than those charged by other generally comparable municipalities, as well as fees charged by PennDOT;

(c) The requirements for repaving are excessive, not reasonably related to the effect of holes being cut, are considerably more stringent than those of PennDOT and other roughly comparable municipalities, and they represent an attempt to force utilities such as UGI to repave City streets.

69. UGI has a direct, substantial and present interest in the determination of the lawfulness of the City of Reading's Fee Schedule Ordinance, particularly the reasonableness/unreasonableness of the charges and assessments required thereunder, and the provisions thereof as referred to previously in this Amended Petition.

70. The fees, charges and other duties and obligations imposed upon UGI and other utilities by the City of Reading, through the Fee Schedule Ordinance, particularly as referenced in preceding paragraphs of this Amended Petition, are in plain violation of applicable Pennsylvania law, including related case authority, and intrude upon the rates,

services, and facilities of public utilities, and therefore should be declared by this Court to be invalid and unenforceable.

71. There is no legal authority whatsoever for the City of Reading to impose unreasonable repaving requirements, and to charge such excessive fees in connection with a public utility's occupancy of public rights of way, the utilities' entitlement to which is granted under 15 Pa. C. S. Section 1511.

72. The excessive work, fees and assessments under the Fee Schedule Ordinance are not reasonably related to the act of opening and then repairing and repaving streets and public rights of way pursuant to permits issued to a public utility for occupancy of a City right-of-way, or to the act of inspecting the initiation and completion of construction work within a street cartway and/or sidewalk located within that right-of-way.

73. The excessive and unreasonable work, fees and charges imposed and/or assessed by the City of Reading, under the Fee Schedule Ordinance have a direct and adverse impact on public utility rates, customer charges and assessments, and services; further, the possibility -- indeed the likelihood -- of other municipalities adopting similarly

excessive and unreasonable charges, at the same time imposing a myriad of different requirements on public utilities, such as UGI, constitutes a direct infringement upon the exclusive jurisdiction of the PUC, and the intended state-wide uniformity of standards, fees, and charges as clearly intended by the Legislature, through the previously cited provisions of the Pennsylvania Corporation Law, (i.e., 15 Pa. C.S. Section 1511(e)) as well as the Pennsylvania Public Utility Code, 66 P.S. Section 101 et seq.

WHEREFORE, Petitioner, UGI Utilities, Inc., respectfully requests entry of an Order of this Court (i) declaring illegal, invalid and unenforceable all of the foregoing provisions of the Fee Schedule Ordinance, including but not necessarily limited to those provisions referenced in Paragraphs 62 and 67 of this Amended Petition, (ii) directing that the City of Reading cease and desist from attempting to enforce these provisions of that Ordinance, (iii) issuing a permanent injunction barring and precluding the City of Reading from attempting to enforce any of those provisions, and (iv) awarding such additional relief as this Court may deem necessary, just and/or appropriate.

PA Supreme Court I. D. No. 36667

1. Petitioner, UGI Utilities, Inc. (hereafter "UGI") is a Pennsylvania public utility corporation maintaining its principal of business at 2525 N. 12th Street, Suite 360, Post Office Box 12677, Reading, PA 19612-2677.

2. Respondent, City of Reading, is a Third Class City organized and existing pursuant to applicable Pennsylvania law, having a place of business at 815 Washington Street, Reading, PA 19601.

3. Respondent/Indispensable Party, Pennsylvania Public Utility Commission (hereafter "PUC"), is a Commonwealth agency having offices at 400 North Street, Keystone Building, Harrisburg, PA 17120. The PUC has been named and joined as a Respondent herein because it is a necessary and indispensable party to this litigation, given the adjudication of claims for pre-emption, as alleged in all three Counts of this Amended Petition and the relief sought herein.

## **II. ORIGINAL JURISDICTION OF THE COMMONWEALTH COURT**

4. The Pennsylvania Commonwealth Court has original jurisdiction over this proceeding pursuant to 42 Pa. C. S. Section 761(a)(1), because the claims alleged herein involve matters within the

jurisdiction of the Pennsylvania Public Utility Commission, which, as alleged previously, is an indispensable and necessary party, particularly since the allegations and claims asserted herein pertain directly to the provision of regulated public utility services.

### **III. FACTUAL ALLEGATIONS COMMON TO ALL CLAIMS**

5. UGI is a “public utility” and a “natural gas distribution company” as those terms are defined in 66 Pa.C.S. §§102 and 2202, and a “public utility corporation” within the intendment of 15 Pa.C.S. §1511(e).

6. As a regulated public utility, UGI provides natural gas and other utility services to residential and business/commercial customers throughout eastern and central Pennsylvania.

7. More specifically, UGI is a certificated natural gas distribution company serving approximately 355,000 customers in a service territory encompassing portions of 16 counties in Pennsylvania.

8. UGI provides natural gas distribution service within the City of Reading to more than 19,500 customer accounts.

9. In order to transmit and distribute natural gas to its customers, UGI owns and operates a network of underground natural gas

distribution mains, service lines, and other facilities; more specifically, within the City of Reading, UGI has approximately 149 lineal miles of underground distribution mains, almost all of which are located within streets owned and operated by the City of Reading.

10. In deciding where to locate its underground distribution facilities, UGI typically has two alternatives, i.e. place the facilities either in the existing public rights-of-way (streets or other federal, state or municipal properties), or, if available, on private property.

11. UGI's right and entitlement to utilize public streets and other public ways and places for its gas distribution facilities is codified at 15 Pa. C. S. Section 1511(e), which provides as follows:

(e) Streets and other public places. -- A public utility corporation *shall have the right* to enter upon and occupy streets, highways, waters and other public ways and places for one or more of the principal purposes specified in subsection (a) and ancillary purposes reasonably necessary or appropriate for the accomplishment of the principal purposes, including the placement, maintenance and removal of aerial, surface and subsurface public utility facilities thereon or therein. *Before entering upon any street, highway or other public way, the public utility corporation shall obtain such permits as may be required by law and shall comply with the lawful and reasonable regulations of the governmental authority having responsibility for the maintenance thereof. (Emphasis added.)*

12. The Amended Committee Comment (1990) to Section 1511(e) states:

[R]eference in the last sentence of subsection (e) to “permits” is a codification of the prior law relating to the time and manner of opening a street, etc., and is not intended to imply a power to decide whether or not, and by whom, a type of utility service may be offered by means of the contemplated facilities. See generally Zeiter, “A Comparison of the Pennsylvania Business Corporation Law and the New Delaware Corporation Law in Light of the 198 Revision of the Pennsylvania Law,” 74 Dick. L.Rev. 1, 40-52 (1969).

13. The Commonwealth Court has stated that "Section 1511 (e) is a grant of power to public utilities, not a limitation." ***PECO Energy Company v. Township of Upper Dublin***, 922 A.2d 996, 1007-08 (Pa.Cmwth. 2007).

14. 66 Pa. C.S. Section 1501 (titled “Character of Service and Facilities”) provides as follows:

Every public utility shall furnish and maintain adequate, safe, and reasonable service and facilities, and shall make all such repairs, changes, alterations, substitutions, extensions, and improvements in or to such service and facilities as shall be necessary or proper for the accommodation, convenience, and safety of its patrons, employees, and the public. Such service also shall be reasonably continuous and without unreasonable interruptions or delay. Such service and facilities shall be in conformity with the regulations and orders of the commission. Subject to the provisions of this part and the regulations or orders of the commission, every public utility may have

reasonable rules and regulations governing the conditions under which it shall be required to render service. Any public utility service being furnished or rendered by a municipal corporation beyond its corporate limits shall be subject to regulation and control by the commission as to service and extensions, with the same force and in like manner as if such service were rendered by a public utility. The commission shall have sole and exclusive jurisdiction to promulgate rules and regulations for the allocation of natural or artificial gas supply by a public utility.

15. In order to fulfill its statutory obligation to provide reasonably continuous, safe, affordable and reliable natural gas service to customers within its service territory, UGI must construct, own, and maintain underground natural gas distribution lines and related facilities, and in particular, metering equipment, and it must do so in accordance with the Pennsylvania Public Utility Code, as well as regulations and orders of the PUC.

16. The General Assembly has vested in the PUC exclusive authority over the complex and technical service and engineering questions arising in the location, construction and maintenance of all public utility facilities. *Duquesne Light Company v. Borough of Monroeville*, 449 Pa. 573, 298 A.2d 252 (1973); *County of Chester v. Philadelphia Electric Company*, 420 Pa. 422, 218 A.2d 331 (1966); *PECO*

***Energy Company v. Township of Upper Dublin*, 992 A.2d 996 (Pa. Cmwth. 2007).**

17. Pursuant to the statutory authority granted by the Pennsylvania Public Utility Code, the PUC has:

(a) General administrative power and authority to supervise and regulate all public utilities doing business within the Commonwealth. 66 Pa. C.S. § 501(b).

(b) The power to prescribe as to service and facilities, including the crossing of facilities just and reasonable standards, classifications, regulations and practices to be furnished, imposed, observed and follow by any or all public utilities. 66 Pa. C.S. § 1504(1).

(c) The power to set through regulations, inspections, maintenance, repair and replacement standards and enforce those standards. 66 Pa. C.S. § 2203(1).

18. Pursuant to these powers, the PUC regulates the service provided by public utilities and the facilities they use to provide service on a uniform, state-wide basis pursuant to the intent of the General Assembly in adopting the Public Utility Code.

19. It has been consistently confirmed by the Pennsylvania courts that the PUC is the sole regulator of public utilities: "[t]he necessity for

conformity in the regulation and control of public utilities is as apparent as the electric lines which one views traversing the Commonwealth. If each county were to pronounce its own regulation and control over electric wires, pipe lines and oil lines, the conveyors of power and fuel could become so twisted as to affect adversely the welfare of the entire state. It is for that reason that the Legislature has vested in the [PUC] exclusive authority over the complex and technical service and engineering questions arising in the location, construction and maintenance of all public utilities facilities." ***County of Chester v. Philadelphia Electric Company***, 420 Pa. 422, 425-26, 218 A.2d 331, 333 (1966). *See also, PECO Energy Company v. Township of Upper Dublin*, 922 A.2d 996, 1001 (Pa. Cmwh. 2007).

20. The purpose of uniform, state-wide regulation is to prevent municipalities from regulating public utilities locally, because such local regulation would result in inconsistent rules, policies and procedures, as well as different conditions and requirements within different municipalities, which would prevent public utilities from providing essential services in a safe and efficient manner as intended by the

General Assembly. For these reasons, the Public Utility Code, and the interpretation and application thereof by the Pennsylvania Public Utility Commission and state courts, preempts local regulation of (a) services provided by public utilities and (b) the facilities used to provide service, including but not limited to preempting a municipality's ability to charge excessive and unreasonable fees and costs.

21. Municipalities, such as the City of Reading, are created by authority of the Commonwealth of Pennsylvania, and they do not possess powers not expressly delegated to them; in that same vein, if a municipality adopts an ordinance which exceeds its authority and/or the limits of its police powers, that ordinance is invalid. ***Hamilton Hills Group, LLC v. Hamilton Twp. Zoning Hearing Bd.***, 4 A.3d 788, 796 (Pa. Cmwth. 2010).

22. It is a well-established rule of law in this Commonwealth that local municipalities may not adopt ordinances or other rules, regulations, policies or procedures, whether under the guise of zoning, subdivision or otherwise, attempting to regulate or control any aspect of public utility service which is within the exclusive province and jurisdiction of the PUC,

particularly those aspects of public utility service under the authority of the Public Utility Code and related regulations. ***South Coventry Township v. Philadelphia Electric Company***, 44 Pa. Cmwth. 289, 504 A.2d 368 (1986).

23. It is a well-established rule of law in this Commonwealth that municipalities may not levy and extract extortionate fees and costs, particularly for the improper purpose of generating revenues for the municipality. ***See Raum v. Board of Supervisors of Tredyffrin Township***, 29 Pa. Cmwth. 9, 370 A.2d 777 (1976) (fee charged by municipality to process and review subdivision plan "bore no relation to the expense of the Township in reviewing and otherwise processing the plan").

24. It is also a well-established rule of law in this Commonwealth that municipalities may not impose and/or levy unreasonable fees and costs under the guise of regulating public utilities' use of public rights-of-way. ***See Pennsylvania Department of Highways v. Pennsylvania Public Utility Commission***, 185 Pa. Super. 1, 136 A.2d 473 (1957) ("the highways are primarily for the traveling public" and "their use by public utility

companies is a subordinate use, permitted by the Commonwealth without cost except for permit fees . . .").

25. In a February 13, 2013 Order at Docket No. C-2012-2308997 the PUC approved a settlement under which UGI and its two affiliated natural gas distribution companies are required to replace all in-service cast iron mains over a fourteen-year period and all bare steel mains over a thirty-year period beginning in March, 2013.

26. In its regulation appearing at 52 Pa. Code §59.18, which became effective on May 23, 2014 (copy attached hereto Exhibit "A") the PUC has also directed all Pennsylvania natural gas distribution companies, including UGI, to relocate all gas meters and regulators currently located inside buildings to outside locations over a twenty-year period, with limited exceptions.

27. In accordance with the provisions of 66 Pa.C.S. §§1352 and 1352, which became effective on April 16, 2012, and the PUC's Final Implementation Order issued on August 2, 2012 at Docket No. M-2012-2293611 ("Act 11 Implementation Order"), UGI files periodic long-term infrastructure improvement plans ("LTIP") with the PUC for its approval,

with proposed schedules for the replacement and improvement of its facilities, and annual asset optimization plans (“AAOP”) on an annual basis reporting on its progress and plans for the upcoming twelve-month period.

28. UGI’s most recent LTIP was approved by the PUC in an Opinion and Order at Docket No. P-2013-2398833 entered on July 31, 2014.

29. Under this most recent PUC-approved LTIP, UGI is scheduled to replace an average of approximately 33 miles of gas mains per year over a five-year period at an estimated cost of approximately \$51.2 million per year. UGI also committed to replacing all of its cast iron mains over a fourteen-year period and all of its bare steel pipes over a thirty-year period beginning in March, 2013.

30. In recognition of the disruptions that can occur as a result of LTIP projects, and the significant public benefits that can result from coordinating activities with PennDOT and local municipalities, UGI’s PUC-approved LTIP also included a comprehensive outreach and coordination effort described in the PUC’s July 31, 2014 LTIP Order as follows:

*UGI performs outreach to roadway authorities to identify planned roadway resurfacing and reconstruction projects. UGI issues template letter to highway stakeholders to gather information to better coordinate and align utility infrastructure replacement projects with transportation infrastructure plans. UGI offers that in addition to the written outreach, periodic meetings are held with governmental officials to identify changes in project plans and to coordinate the efforts on major projects. UGI Engineering Staff has held follow-up meetings or discussions with larger municipalities including Allentown, Bethlehem, Carlisle, Easton, Harrisburg Lancaster, Lebanon, and Reading among others. UGI holds that it coordinates with PennDOT in a similar manner and actively participates in the Utility Highway Liaison Committee (UHLC) meetings to enhance project communication and infrastructure planning. UHLC is comprised of representatives of all the utility companies in Pennsylvania, each of the eleven PennDOT Engineering Districts and the PennDOT Central Office. UGI submits that in the communities of Allentown and Bethlehem, UGI utilizes an internet based tool, Envista, to facilitate project coordination and planning.*

*Upon review of the LTIIP, and supplemental information, the Commission finds that the coordination activities requirements of the Final Implementation Order have been fulfilled.*

31. Consistent with this PUC-approved outreach effort, and to comply with its obligations under 52 Pa.C.S. §59.18, over the past six

months UGI has made representatives of the City of Reading aware of the fact that it has a number of projects within the City limits for which it will be scheduling main repairs and/or meter relocations, in connection with which UGI intends to apply for applicable permits from the City of Reading, and for which it will notify customers affected thereby.

32. After having been made aware of UGI's intended projects and work within the City limits, on or about June 26, 2015, the City of Reading informed UGI that it was dissatisfied with the meter relocations in designated historical districts within the City and that it would be changing the permit application process used to obtain permits to perform system repair and gas meter relocation in the City.

33. UGI protested this demand by the City, noting that doing so would impede the ability of a PUC-regulated utility from performing one of its principal duties of maintaining safe conditions for gas meters, and complying with PUC regulations in connection therewith, and that there was no authority for this action under the City of Reading's existing Ordinances; nonetheless, UGI attempted to enter into negotiations with the City representatives to try to reasonably resolve the matter.

**COUNT I – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION  
(City of Reading Ordinance No. 45-2015)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

34. The allegations contained in Paragraphs 1 through 33 of this Amended Petition are incorporated herein by reference as through the same were fully set forth at length.

35. On or about Monday, August 24, 2015, Council for the City of Reading adopted its Ordinance No. 45-2015, a true and correct copy of which is attached hereto Exhibit "B" (hereafter "the August 2015 Meter Ordinance").

36. The August 2015 Meter Ordinance is null, void, and illegal on its face, as an attempt by local government to interfere with the jurisdiction and authority of the Pennsylvania Public Utility Commission over regulated natural gas service, such as provided by UGI within the City of Reading; more specifically, this Ordinance is an obvious attempt by the City, particularly in Amended Section 295-106(F), to regulate the placement of gas metering equipment, as well as requiring public utilities to obtain what is referred to as a Certificate of Appropriateness from a

City of Reading employee, referred to as a Preservation Officer, as a condition of installing gas metering equipment as well as imposing inappropriate and illegal conditions and construction/installation requirements, and imposing penalties for any violation of that Ordinance.

37. The August 2015 Meter Ordinance is illegal on its face, as being in direct violation of the exclusive jurisdiction and authority vested in the Public Utility Commission, particularly under the Public Utility Code, and as representing an attempt by a local governmental agency to impose requirements on the provision of regulated public utility service, particularly concerning a topic, i.e. location and relocation of gas metering equipment, in connection with which the PUC has promulgated a specific regulation which the City of Reading is attempting to circumvent and/or to impose its own interpretational requirements.

38. UGI alleges and avers that: (a) the issues involved in this declaratory judgment action -- concerning the legality and enforceability of various Ordinances adopted by the City of Reading, as described in this Count I as well as in the two Counts which follow, are issues which are capable of repetition, and likely to be repeated, in future situations

involving UGI and/or other utilities seeking permission to engage in PUC-regulated activities within the City of Reading, including but not limited to relocation of utility meters from inside to outside buildings and other structures, as well as requests by UGI and/or others seeking permission to open local highways/roads located within the City of Reading, (b) the questions presented are of significant importance and dimension, and (c) it is inevitable that similar situations will arise in the future, as to which there will be a need to obtain judicial review, those situations also very likely involving an urgency on UGI's (or some other person's or entity's) part to promptly install and/or relocate its facilities, which would be seriously and adversely affected if UGI (or that other person or entity) would be forced to await judicial review. As such, immediate judicial review and declaratory relief with respect to all issues raised herein is appropriate under the circumstances.

39. Based on the foregoing, there is a justiciable controversy and dispute between UGI and the City of Reading concerning the legality and enforceability of the Ordinance provisions challenged in this proceeding, including but not limited to (i) Ordinance No. 40-2015, (ii) Sections 508-

702(I), 508-703, and 508-704 of the July 2015 Ordinance (referenced in Count II below), (iii) the requirements under the City of Reading's new Street Excavation Application form (also referenced in Count II below), and (iv) the provisions of the Fee Schedule Ordinance (which is the subject of Count III below), as those Ordinances seek to impose requirements on regulated public utility companies which will materially interfere with the public utility services provided by each such utility.

40. Petitioner UGI brings this action pursuant to the Pennsylvania Declaratory Judgments Act, 42 Pa. C. S. A. Section 7531 et seq., and also Pennsylvania Rule of Civil Procedure 1601 et seq., to hear and decide the claims alleged in this Amended Petition, to determine the rights of the parties, and to determine the legality and enforceability of the challenged provisions of the three Ordinances referred to herein.

41. Based on the foregoing, the August 2015 Meter Ordinance should be declared illegal and void, and the City of Reading should be barred and precluded from attempting to enforce it.

WHEREFORE, Petitioner UGI Utilities, Inc. respectfully requests entry of an Order of this Court (i) declaring that City of Reading Ordinance No.

45-2015 is invalid and illegal per se, as preempted by the Pennsylvania Public Utility Code, and the jurisdiction of the Pennsylvania Public Utility Commission, (ii) directing that Respondent City of Reading cease attempting to enforce any provisions of that Ordinance, (iii) issuing a permanent injunction barring and precluding the City of Reading from attempting to enforce that Ordinance, and (iv) awarding and directing such additional and further relief as this Court may deem necessary, just and/or appropriate.

**COUNT II – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION  
(City of Reading Ordinance No. 40-2015 and Street Excavation  
Application Form)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

42. The allegations contained in Paragraphs 1 through 41 of this Amended Petition are incorporated herein by reference as through the same were fully set forth at length.

43. On or about July 13, 2015, Council for the City of Reading adopted Ordinance No. 40-2015, a true and correct copy of which is attached as Exhibit "C" to this Amended Petition ("the July 2015

Ordinance”), purporting to regulate public utilities' (and other users') occupation of rights-of-ways located within the City of Reading, particularly including but not necessarily limited to underground occupancy of streets for natural gas and other facilities.

44. The City’s July 2015 Ordinance contained a number of provisions which are improper and illegal, some or all of which are preempted by the Pennsylvania Public Utility Code and the regulatory authority of the PUC.

45. The City's July 2015 Ordinance contained a number of provisions which are illegal and impermissible, in that they have a materially adverse impact on regulated public utility service within the City of Reading.

46. More specifically, the July 2015 Ordinance contained three (3) provisions, appearing in Sections 508-702(I), 508-703, and 508-704, which state as follows:

508-702(I). Revocation of Permit. All street cut or excavation permits are subject to revocation at any time by the Department of Public Works upon written notice served to whom the permit was granted, their agent, or employee. Such notice shall contain a brief statement detailing the revocation and be issued for failure to cure with three (3) days:

1. A violation of any condition of the permit.
2. A violation of this section or any other applicable City of Reading ordinance relating to the work.
3. The creation or failure to eliminate a condition or action that constitutes a nuisance or endangers the lives, property, or welfare of City residents.

508-703. Street Cut Permits shall not be issued to any person, firm or corporation indebted to the City due to a previously issued permit. Additionally, no permit shall be issued for non-emergency work commencing from September through November of any calendar year; . . .

. . . .

508-704. Permit applications shall be submitted not less than thirty (30) days prior to the start of the proposed street cut work, and construction work must commence within fifteen (15) calendar days of approval; failure to do so may result in permit revocation, or require the submission of a new application. The Permittee shall notify the city at least three days in advance of breaking the street. Each permit shall be valid for a period of four months. If deemed necessary, permit time extensions may be granted as specified in Section 508-709 Other related permits and fees; . . .

47. The effect of Section 508-702(I) of the July 2015 Ordinance was to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers, as it provides the City with broad discretionary authority to regulate a public utility corporation that is already under the exclusive

supervision of the PUC. Further, UGI believes and avers that it is the City's intent to utilize Section 508-702(I) as a back-door mechanism to attempt to interfere with and disrupt UGI's meter-relocation obligations and responsibilities under 52 Pa.C.S. §59.18, by revoking permits previously issued, and/or by refusing to issue permits to UGI based on any instances where UGI has notified the City of its intent to relocate indoor meters into outdoor areas in order to comply with that particular PUC regulation.

48. The effect of Section 508-703 of the July 2015 Ordinance was to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers which may request it during the three-month period between September and November, as this provision of the City's Ordinance would unreasonably preclude UGI from excavating and opening any public property, including streets, which may be necessary to provide natural gas service, either to existing customers and/or to new customers.

49. The effect of Section 508-704 of the July 2015 Ordinance is to directly and adversely interfere with and impede a regulated public utility, such as UGI, from providing natural gas service to customers, in

requiring work to start within a 15-day period after the issuance of a permit, when in fact the utility can and should have the right to determine the scheduling of its utility installation work once it has obtained a permit therefor, as a consequence of which this provision would create an unreasonable and burdensome responsibility for a public utility, which could adversely impact or even prevent the utility from timely and efficiently providing natural gas to existing and/or to new customers.

50. In its original Petition for Review filed in this proceeding, UGI objected to certain aspects of Ordinance No. 40-2015, as set forth in Count II of that pleading; however, in an apparent but unsuccessful attempt to cure UGI's objections, the City of Reading, on November 23, 2015, enacted and adopted its Ordinance No. 77-2015, a copy of which is attached hereto as Exhibit "D."

51. The problem with the City's adoption of Ordinance No. 77-2015, is that the changes made to Ordinance No. 40-2105 are cosmetic in nature, particularly with respect to Sections 508-702 and 508-703 of Ordinance No. 40-2015; more specifically, the deletion of the word

“nuisance” from Section 508-702(1)(3) and the addition of the phrase “violation of applicable Americans with Disabilities Act compliances guidelines [sic],” does not alter the fact that Section 508-702 continues to contain language pursuant to which the City has unreasonably and impermissibly broad discretionary authority to regulate the provision of public utility service, particularly as a mechanism to interfere with and disrupt UGI's meter-relocation obligations and responsibilities under 52 Pa.C.S. §59.18, by revoking permits previously issued, and/or by refusing to issue permits to UGI based on any instances where UGI has notified the City of its intent to relocate indoor meters into outdoor areas in order to comply with that particular PUC regulation.

Further, the inclusion of the language “. . . unless a special exception is granted by the Public Works Director,” to Section 508-703 does not cure the impermissible effect of that provision, which is that a public utility, such as UGI, is barred from installing its facilities utilizing City rights of way, if the project would begin in November, December or January of a particular year, absent special dispensation having been

granted by that City official, particularly with there being no objective criteria for such an evaluation.

52. Based on the forgoing, UGI believes and avers that Sections 508-702(I), 508-703, and 508-704 of the July 2015 Ordinance, as amended by Ordinance No. 77-2015, are preempted by the applicable provisions of the Pennsylvania Public Utility Code and related regulations, particularly as interfering directly with the provision of public utility service, and they are therefore improper and illegal.

53. On or about August 5, 2015, UGI learned that the City of Reading had adopted a new Street Excavation Application form, which it was requiring UGI -- as well as other utilities -- to sign as a condition of the issuance of any Permits to occupy City of Reading rights of way. A true and correct copy of that Street Excavation Application form is attached hereto as Exhibit "E" and incorporated herein by reference.

54. UGI believes and avers that the City's inclusion of the "Historic District Impact" questions on its new Street Excavation Application form represent a continuing attempt by the City to enforce and/or oversee the application of 52 Pa. Code §59.18, notwithstanding that enforcement of

the said regulation is within the exclusive purview and jurisdiction of the Pennsylvania Public Utility Commission.

55. UGI believes and avers that the City's revised Street Excavation Application form is intended by City representatives to elicit unnecessary and inappropriate information regarding work performed in "Historic Districts," and in particular to compel the utility to demonstrate why any meters previously located inside a structure are being moved outside, and why any meters to be installed or relocated have not been given consideration for indoor placement.

56. UGI further believes and avers that a number of the Terms and Conditions appearing in Section 6 of that Application form are illegal on their face, or in the alternative, are overly broad and vague, and are intended to, will have the effect of and will be relied upon by City representatives to obstruct and interfere with UGI's already regulated public utility functions and operations.

57. More specifically:

-- It is not permissible for the City to make the permission granted to UGI to install its facilities " . . . revocable by order of the

Public Works Director . . . " at any time, or for any reason, or for no reason;

-- The second sentence of Section 6(A) improperly states that the issuance of the City's permit does not grant or assign to UGI any "property right or title in or to the right-of-way . . . " when in fact under 15 Pa. C.S.A. Section 1511 (e) UGI is vested with the right and entitlement to occupy public property, particularly street rights-of-way, conditioned only upon " . . . compl[iance] with the lawful and reasonable regulations of the governmental authority having responsibility for the maintenance [of that right-of-way];" and

-- Subsection (E) of Section 6 requires UGI to commence work to be performed pursuant to its Permit, within 15 days of its approval, which for reasons stated previously in this Amended Petition, is unreasonable, inappropriate, and illegal.

58. As alleged previously, the Pennsylvania Public Utility Code, and the PUC's implementation and enforcement of the provisions of that statute, and adoption of regulations pursuant thereto, preempt any local regulation of public utilities' charges, facilities and services, including but

not limited to a municipality adopting ordinances, rules or regulations directly impacting a utility's provision of utility services to the public.

59. Also as alleged previously, the PUC has full right and authority to enforce the provisions of the Public Utility Code and related regulations pursuant to the legislature's intent, as interpreted and applied by the PUC, and the PUC's standards and requirements preempt the field of local municipality public utility regulation, including preemption of any ordinances, rules or regulations which would have the effect of impacting a utility's ability to provide utility services to the public.

60. Based on the foregoing, UGI respectfully requests entry of an Order of this Court declaring invalid and unenforceable Sections 508-702(I), 508-703, and 508-704 of the City of Reading's July 2015 Ordinance, as amended by Ordinance No. 77-2015, as well as the requirement that utilities, such as UGI, complete and submit the new Street Excavation Application form, as directly and adversely impacting the provision of regulated public utility service within the City's geographical limits.

WHEREFORE, Petitioner, UGI Utilities, Inc., respectfully requests entry of an Order of this Court (i) declaring that Sections 508-702(I), 508-703, and 508-704 of the City of Reading's July 2015 Ordinance, as amended by Ordinance No. 77-2015, are invalid and illegal per se, as preempted by the Pennsylvania Public Utility Code, and the jurisdiction of the Pennsylvania Public Utility Commission, (ii) directing that Respondent City of Reading cease attempting to enforce those provisions of its Ordinance, (iii) issuing a permanent injunction barring and precluding Respondent City of Reading from attempting to enforce those provisions of the July 2015 Ordinance, as amended by Ordinance No. 77-2015, and (iv) declaring that the provisions in the Street Excavation Application form initiated by the City of Reading in or about July 20, 2015, which were referred to in Paragraphs 53 through 56 of this Amended Petition, are illegal and unenforceable, and barring and precluding the City from using that form until the offending provisions are removed, and (v) directing and awarding such additional and further relief as this Court may deem necessary, just and/or appropriate.

**COUNT III – PREEMPTION BY STATUTORY AND REGULATORY AUTHORITY  
OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION AND  
UNREASONABLENESS OF MUNICIPALITY FEES AND CHARGES  
(City of Reading Ordinance No. 44-2015)  
(Petitioner UGI Utilities, Inc. v. Respondent City of Reading and  
Respondent/Indispensable Party Pennsylvania Public Utility  
Commission)**

61. The allegations contained in Paragraphs 1 through 60 of this Amended Petition are incorporated herein by reference as though the same were fully set forth at length.

62. On or about Monday, August 24, 2015, the City of Reading adopted Ordinance No. 44-2015 ("the Fee Schedule Ordinance"), purporting to establish a Fee Schedule in connection with the opening of public streets and rights of way; a true and correct copy of that Ordinance is attached hereto as Exhibit "F."

63. UGI believes and avers that the Fee Schedule Ordinance is illegal and unreasonable, in the following respects:

(a) The "Steel Placement Fees" are excessive, inappropriate and unwarranted and not reasonably related to legitimate costs or expenses of the City relating to work performed in public rights of way, or to proper public safety concerns; and

(b) The additional charges to be assessed under this Ordinance for "Pavement Restoration Fees" when work is done on a roadway within either five years of the road having been previously paving, or in the alternative, within six to ten years thereof, are in the nature of an unreasonable and unwarranted so-called "Premature Degradation Fee," for which there is no engineering or other basis or support;

64. The aforesaid provisions of the Fee Schedule Ordinance, being imposed against users of City of Reading rights-of-way, including public utilities such as UGI, (i) are having and will continue to have a material adverse impact on the ability of public utilities, such as UGI, to provide cost-effective utility service to customers, particularly with respect to costs and expenses that are typically passed on directly to customers, (ii) will result in substantial additional operating expenses which, if not capable of being passed on directly to those customers specifically involved with a particular project, will likely end up being factored into the rate-determination process, and (iii) are unreasonable, excessive and improperly designed as a revenue-enhancing measure,

particularly including but not necessarily limited to charging inordinate and illegal fees, costs and expenses for the occupancy by public utilities, such as UGI, of City of Reading rights-of-way, particularly streets and highways located within the City.

65. As noted previously in this Amended Petition, a municipality -- such as the City here -- may not impose unreasonable and excessive fees, charges, costs and assessments on public utilities which would materially impact utility rates and services.

66. For the following reasons the provisions of the Fee Schedule Ordinance will have a direct and material adverse impact and consequences on regulated public utility service within the Commonwealth of Pennsylvania:

(i) the excessive fees and other requirements will substantially hamper the ability to provide cost effective utility service, and will result in either increased charges and fees to customers, an inability to provide service to customers, and/or increased rates being charged to customers;

(ii) the Fee Schedule Ordinance creates the precedent, opportunity and likelihood that other municipalities will follow the same approach, and adopt similar-type ordinances imposing unreasonable and illegal fees and costs, and imposing operational requirements which unnecessarily disrupt and burden UGI's provision of utility services; and

(iii) other municipalities may be encouraged to adopt similarly inappropriate ordinances, attempting to raise revenues through the imposition of excessive and unreasonable fees and costs, thereby directly disrupting this Commonwealth's and the PUC's policy of uniform state-wide regulation of utilities and utility facilities.

67. For the reasons explained in this Amended Petition, the provisions of the Fee Schedule Ordinance being challenged herein (i) are preempted by the PUC's jurisdiction over rates and utility facilities and services, (ii) lack statutory authority, and (iii) violate 15 Pa. C.S. Section 1511(e), particularly through the imposition of illegal and unreasonable fees and charges, which not only are tantamount to an illegal tax, but

which have a direct and adverse impact and consequences on the provision of utility services at reasonable rates and charges.

68. More specifically, the Fee Schedule Ordinance represents an illegal and unauthorized enactment, which improperly regulates and affects the operation of public utilities, in the following particulars:

(a) The fees assessed by the City of Reading under the Fee Schedule Ordinance constitute excessive and unreasonable charges, representing in a number of respects alleged herein a substantial increase from fees which had been previously charged by the City of Reading under its prior Ordinance, as well as being substantially in excess of the corresponding fees and charges historically assessed by other municipalities; further, UGI believes and avers that these revenue-generating provisions will result in substantial costs to utilities which exercise their statutory right to use and occupy public rights of way;

(b) The requirements imposed on public utility companies under the provisions of the Fee Schedule Ordinance quoted in

Paragraph 63 above (i) are unfair and unreasonable, and (ii) are considerably greater than those charged by other generally comparable municipalities, as well as fees charged by PennDOT;

(c) The requirements for repaving are excessive, not reasonably related to the effect of holes being cut, are considerably more stringent than those of PennDOT and other roughly comparable municipalities, and they represent an attempt to force utilities such as UGI to repave City streets.

69. UGI has a direct, substantial and present interest in the determination of the lawfulness of the City of Reading's Fee Schedule Ordinance, particularly the reasonableness/unreasonableness of the charges and assessments required thereunder, and the provisions thereof as referred to previously in this Amended Petition.

70. The fees, charges and other duties and obligations imposed upon UGI and other utilities by the City of Reading, through the Fee Schedule Ordinance, particularly as referenced in preceding paragraphs of this Amended Petition, are in plain violation of applicable Pennsylvania law, including related case authority, and intrude upon the rates,

services, and facilities of public utilities, and therefore should be declared by this Court to be invalid and unenforceable.

71. There is no legal authority whatsoever for the City of Reading to impose unreasonable repaving requirements, and to charge such excessive fees in connection with a public utility's occupancy of public rights of way, the utilities' entitlement to which is granted under 15 Pa. C. S. Section 1511.

72. The excessive work, fees and assessments under the Fee Schedule Ordinance are not reasonably related to the act of opening and then repairing and repaving streets and public rights of way pursuant to permits issued to a public utility for occupancy of a City right-of-way, or to the act of inspecting the initiation and completion of construction work within a street cartway and/or sidewalk located within that right-of-way.

73. The excessive and unreasonable work, fees and charges imposed and/or assessed by the City of Reading, under the Fee Schedule Ordinance have a direct and adverse impact on public utility rates, customer charges and assessments, and services; further, the possibility -- indeed the likelihood -- of other municipalities adopting similarly

excessive and unreasonable charges, at the same time imposing a myriad of different requirements on public utilities, such as UGI, constitutes a direct infringement upon the exclusive jurisdiction of the PUC, and the intended state-wide uniformity of standards, fees, and charges as clearly intended by the Legislature, through the previously cited provisions of the Pennsylvania Corporation Law, (i.e., 15 Pa. C.S. Section 1511(e)) as well as the Pennsylvania Public Utility Code, 66 P.S. Section 101 et seq.

WHEREFORE, Petitioner, UGI Utilities, Inc., respectfully requests entry of an Order of this Court (i) declaring illegal, invalid and unenforceable all of the foregoing provisions of the Fee Schedule Ordinance, including but not necessarily limited to those provisions referenced in Paragraphs 62 and 67 of this Amended Petition, (ii) directing that the City of Reading cease and desist from attempting to enforce these provisions of that Ordinance, (iii) issuing a permanent injunction barring and precluding the City of Reading from attempting to enforce any of those provisions, and (iv) awarding such additional relief as this Court may deem necessary, just and/or appropriate.

# EXHIBIT "A"

**§ 59.18. Meter, regulator and service line location.**

*(a) General requirements for meter and regulator location.*

(1) Unless otherwise allowed or required in this section, meters and regulators must be located outside and aboveground.

(2) Except in the case of an emergency, a utility shall provide written notice to a utility customer by first class mail or by personal delivery at least 30 days prior to relocating and subsequently installing a meter or regulator outside the customer's building. The notice must request that if the customer is not the owner of the building, the customer shall forward the written notice to the owner of the building. If the utility knows the current address of the owner of the building, notice shall also be mailed or delivered to that address.

(3) The written notice must inform the customer and building owner of the equipment that the utility proposes to relocate, the planned new location and how to contact the utility to provide supplemental information that the utility may not have, such as the building's historic status. The written notice must include contact information for the Commission's Bureau of Consumer Services.

(4) When necessary to install meters at multiple locations on a premises, a utility shall provide a tag or other means to indicate there are multiple meter locations.

(5) When selecting a meter or service regulator location, a utility shall consider potential damage by outside forces.

(6) The meter location must accommodate access for meter reading, inspection, repairs, testing, changing and operation of the gas shut-off valve.

(7) When feasible and practical to do so, the meter location must accommodate the installation of the service line in a straight line perpendicular to the main.

(8) Meters and service regulators may not be installed in the following locations:

(i) Beneath or in front of windows or other building openings that may directly obstruct emergency fire exits.

(ii) Under interior stairways.

(iii) Under exterior stairways, unless an alternate means of egress exists and the meter and service regulator are installed in a well-vented location under stairs constructed of noncombustible material.

(iv) A crawl space.

(v) Near building air intakes under local or State building codes.

(vi) In contact with soil or other potentially corrosive materials.

(9) Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, a utility shall pay the costs of relocating a meter or regulator when the relocation is performed to meet utility or Commission safety requirements.

(10) Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, a utility shall pay the cost of extending customer-owned facilities to the new meter or regulator location when the relocation is performed to meet utility or Commission safety requirements.

(11) A customer or building owner requesting that a meter or regulator be moved shall pay the costs associated with relocation when the meter and regulator are currently situated in a suitable location under State and Federal regulations.

(12) Utilities shall address meter, regulator and service line location regulations in their tariffs.

(b) *Outside meter or service regulator locations.* Outside meters or service regulators shall be installed in one of the following locations:

(1) When feasible and practical to do so, aboveground in a protected location adjacent to the building served, or as close as possible to the point where a production or transmission line is tapped.

(2) In a buried vault or meter box.

(i) The vault or meter box must be located on a customer's or building owner's property, either adjacent to the building served or near the gas main.

(ii) Vaults may be located in a public right-of-way, subject to the consent of local jurisdictions as may be required.

(c) *General requirements for vaults or meter boxes.*

(1) A utility shall consider proper design and location criteria for a meter box, including:

(i) Ventilation.

(ii) Vehicular traffic.

(iii) Soil accumulation.

(iv) Surface water runoff.

(v) High water table.

(vi) Proximity to building air intakes or openings.

(vii) Proximity to an excessive heat source as defined in 49 CFR 192.353(c) (relating to customer meters and regulators: location).

(2) Piping installed through vault walls shall be properly coated to protect from corrosion.

(3) Vaults containing gas piping may not be connected by means of a drain connection to any other underground structure.

(4) When a meter box is located outside a paved surface, a utility shall consider fill, topsoil or sod being placed over the vault and, when feasible and practical to do so, choose an alternate location.

(d) *Inside meter locations.*

(1) Inside meter locations shall be considered only when:

(i) The service line pressure is less than 10 psig.

(ii) A meter is located in a building that meets one of the following criteria:

(A) A building is listed in the National Register of Historic Places or the customer or building owner notifies the utility that the building is eligible to be listed in the National Register of Historic Places and the eligibility can be readily confirmed by the utility.

(B) A building is located within a historic district that is listed in the National Register of Historic Places or the customer or building owner notifies the utility that the historic district is eligible to be listed in the National Register of Historic Places and the eligibility can be readily confirmed by the utility.

(C) A building has been designated as historic under the act of June 13, 1961 (P. L. 282, No. 167) (53 P. S. § 8001—8006), known as the Pennsylvania Historic District Act, the Pennsylvania Municipalities Planning Code (53 P. S. § § 10101—11202) or a municipal home rule charter.

(D) A building is located within a locally designated historic district or is eligible for the listing, or a building is individually designated under a local ordinance as a historic landmark or is eligible for the listing.

(iii) Protection from ambient temperatures is necessary to avoid meter freeze-ups.

(iv) A utility determines that a meter is subject to a high risk of vandalism based on the utility's prior experience.

(v) A utility determines that an outside meter location is neither feasible nor practical.

(2) Except for low pressure systems with service line pressure less than 10 psig, regulators must be located outside when a meter is located inside.

(3) Installed inside meters must be attached to an operable outside shut off valve.

(4) Meters installed within a building must be located in a ventilated place not less than 3 feet (914 millimeters) from a source of ignition or source of heat which may damage the meter.

(e) *Other meter or service regulator locations.* A utility may consider a specially constructed cabinet recessed in the building wall, sealed from inside the building and vented to and accessible from outside the building.

(f) *General requirements for new service lines.* When feasible and practical to do so:

(1) A building may not have more than one service line.

(2) A service line must terminate at the inlet valve of the meter set in the building in which the service line enters.

(3) The service line must be installed in a straight line perpendicular to the main.

(g) *Application of regulation.*

(1) Beginning September 13, 2014, utilities shall comply with this section for new meter, regulator and service line installations in new locations.

(2) Beginning September 13, 2014, utilities shall comply with this section when replacing existing meters, regulators and service line facilities.

(3) By September 13, 2034, utilities shall complete replacement of existing facilities in compliance with this section or incorporate the requirements of this section in a distribution integrity management plan, whichever occurs first.

BILL NO. 45 2015  
AN ORDINANCE

AN ORDINANCE AMENDING THE CITY CODE, CHAPTER 295,  
HISTORICAL AND CONSERVATION DISTRICTS BY ADDING  
REGULATIONS RELATING TO THE INSTALLATION OF GAS METERS  
WITHIN HISTORIC DISTRICTS

THE CITY OF READING CITY COUNCIL HEREBY ORDAINS AS FOLLOWS:

SECTION 1. An ordinance amending the City Code, Chapter 295, Historical and Conservation Districts by adding regulations relating to the installation of gas meters within historic districts, as follows:

§ 295-102. B. Definitions

*GAS MAIN* — the primary gas utility pipe typically located below a public right-of-way.

*GAS METER* — a specialized flow meter, used to measure the volume of fuel gases such as natural gas and propane.

*GAS METER ASSEMBLY* — a gas meter installation including, individually or jointly, associated gas pressure regulator, valves, and piping.

*GAS PRESSURE REGULATOR* — a valve that regulates the flow of gas at a specified pressure.

*GAS SERVICE* — gas piping between the gas main and the gas meter assembly.

§ 295-106 D. General administrative procedures.

(1) All persons or entities desiring to undertake an exterior alteration or modification, requiring a building permit under the presently enacted building code, to any building, structure, sign, or premises or install any *gas meter assembly*, satellite dish, antenna, or other modern device utilized to receive video programming signals as set forth in Subsection E below within any designated historic district, shall apply to the Preservation Officer for a certificate of appropriateness prior to obtaining the required

building permits as set forth in § 295-107. No application shall be accepted or deemed complete until such time as all forms, materials and plans are filed and any and all fees are fully paid.

*E. Placement of satellite dishes in historic districts.*

*(1) Installation.*

(a) No satellite dishes, antenna, or other similar modern device shall be installed or placed in front yards, front of buildings or along their facades that can be seen from a public right-of-way within historic districts. All satellite dishes, antenna, or other similar modern devices shall be located to the rear of the main dwelling unit. Antenna and satellite dishes shall be installed in the rear or on the roof of the main dwelling unit. A roof-mounted satellite dish or antenna shall not be visible from the public right-of-way. When being secured to a brick wall, anchoring for satellite dishes shall only occur within the mortar joints and not within the brick themselves.

(b) Satellite dishes that are placed in accordance with this chapter may be approved at staff level when submitted with a diagram of their proposed placement on the structure or building. Placement of satellite dishes on any other area of a structure or building shall be sent to the Reading Board of Historical Architectural Review for review.

(2) Exceptions. Satellite dishes, antenna, or other modern devices, as defined herein, may be installed in front of buildings in the historic district only if no other means of reception can be provided. In such cases where the proposed location of a satellite *dish* is visible from a public right-of-way, the owner or tenant of the property shall seek the issuance of a certificate of appropriateness as required in § 295-107 of this chapter. Such satellite dishes, antenna, or other modern devices shall be installed to be unobtrusive and shall be screened from view through the use of landscaping, fencing and/or architectural building features. The Building Inspector and Historic Preservation Specialist shall approve the installation to ensure there is no disruption to the historic nature and aesthetic value of the district.

(3) Removal. Any satellite dishes installed in the front of buildings before the enactment of this chapter shall be removed to meet the requirements of the ordinance or must be reviewed by the Reading Board of Historical Architectural Review to obtain a certificate of appropriateness as required per § 295-107 of this chapter within one year of the effective date of this chapter. Satellite dishes shall be removed when the owner or tenant who installed the device no longer inhabits the property.

(4) Violations and penalty. Placement of any satellite dish that does not conform to the guidelines of this section will constitute a violation and may be subject to penalty and enforcement per §§ 295-122 and 295-123.

*F. Placement of gas meters in historic districts.*

*(1) Installation.*

(a) No gas meters shall be installed or placed in front yards, front of buildings or along their facades that can be seen from a public right-of-way within any historic district designated by City ordinance or listed in the National Register of Historic Places. Such gas meters shall be located inside the building, at an exterior location that is not visible from a public right-of-way, or shall be installed within an exterior, below-grade vault that is covered by a flush, corrosion-resistant access hatch.

(b) Exposed gas pressure regulator installations shall be inconspicuously located outside the main dwelling unit.

(c) All exposed components of a gas meter assembly installation shall be fabricated of corrosion-resistant materials and painted along with associated visible valves and piping to match the color of the adjacent façade of the building.

(d) Gas meter assembly installations shall be resistant to tampering, vandalism, and protected from damage by moving vehicles.

(e) Gas meter assembly installations shall not encroach upon required sidewalk widths, so designated by City ordinance.

(f) Gas meter assembly installations shall maintain uniformity in overall size, elevation, and configuration with new or existing gas meter assembly installations located at each immediately adjacent property.

(g) Existing sidewalks and streets disturbed by installations or alterations of the gas main, gas service, or a gas meter assembly shall be repaved to applicable published City of Reading standards.

(h) Gas meters that are placed in accordance with this chapter may be approved by the Preservation Officer when submitted with a diagram of their proposed placement on the structure or building and relevant photographs of the building. Placement of gas meters on any other area of a structure or building shall be reviewed by the Historical Architectural Review Board.

(2) Exceptions. Gas meters, as defined herein, may be installed in front yards, front of buildings, or along their facades that can be seen from a public right-of-way within historic districts only if no other means of gas service can be provided. In such cases where the proposed location of a gas meter is visible from a public right-of-way, the public utility shall seek the issuance of a certificate of appropriateness as required in § 295-107 of this chapter. Such gas meters shall be unobtrusive and shall be screened from view through the use of landscaping, fencing and/or architectural building features. The Building Inspector and Historic Preservation Specialist shall approve the installation to ensure there is no disruption to the historic nature and aesthetic value of the district.

(3) Removal. Any existing gas meter assembly installed in front yards, front of buildings or along their facades that can be seen from a public right-of-way within historic districts before the enactment of this Section must be reviewed by the Historical Architectural Review Board to obtain a certificate of appropriateness as required per § 295-106 of this chapter within one year of the effective date of this

*chapter. The Historical Architectural Review Board may require removal and/or alterations to existing gas meter assemblies and adjacent construction to meet the requirements of this Section.*

*(4) Violations and penalty. Placement of any gas meter that does not conform to the guidelines of this section will constitute a violation and may be subject to penalty and enforcement per §295-122 and 295-123.*

§ 295-107. Required permits and certificates.

A. Building permit. No person shall erect, construct, reconstruct, alter, restore, demolish, raze or change in appearance in any manner any building, structure, object or site, in whole or in part, in any designated historic district, without first obtaining the required permits which have been issued on the strength of a certificate of appropriateness.

B. Certificate of appropriateness.

(1) Historic districts. No permit shall be issued or cause to be issued, for the construction, reconstruction, alteration, restoration, demolition or razing of any building, structure, or premises, in whole or in part, within a designated historic district until a certificate of appropriateness has been issued. Such certificate shall not be limited to work requiring a building permit according to the presently enacted building code, but shall include all work affecting general design, arrangement, texture, material and color of a structure which can be seen from a public street or way. This includes, but is not limited to, the following: painting; sandblasting; chemical cleaning; stucco or other applied textures; replacement or major repair of windows, cornices, trim or other nonstructural elements; signs; and other work affecting any building, structure or premises.

(2) Conservation districts.

(a) No permit shall be issued or cause to be issued, for new construction and additions to buildings or structures, including a porch or porch enclosure, that impacts the streetscape within a designated conservation district until a certificate of appropriateness has been issued, unless specifically listed as exempt below.

(b) Demolition activity impacting the streetscape, including demolition of any character defining porch, balcony, deck, cornice, dormer or roof, shall require the issuance of a certificate of appropriateness, unless specifically listed as exempt below.

(c) The following activities shall not require a certificate of appropriateness:

(1) Demolition or construction of any building or structure not visible from a

public right-of-way.

(2) Maintenance, repair, or alteration of a building or structure or part thereof.

(3) Installation of appurtenances and accessory elements of a decorative or ancillary nature, regardless of visibility from a public street, including but not limited to the following:

(a) Storm windows and doors, awnings and shutters.

(b) Signs, banners and flags.

(c) Downspouts and gutters.

(d) Flower boxes, light fixtures and mailboxes.

(e) Heating or cooling units, including solar heating fixtures.

(f) Fences, walls not exceeding four feet in height, gates, arbors and trellises.

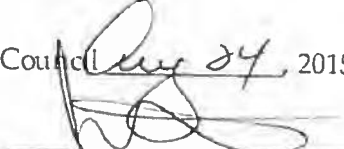

(g) Antennas and satellite dishes.

(h) Other ancillary or decorative elements.

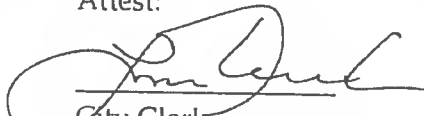

*[i] Gas meters that are not visible from a public right-of-way.*

SECTION 2. This ordinance shall become effective in ten (10) days of approval in accordance with Section 221 of the City of Reading Home Rule Charter.

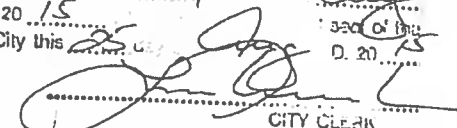

Enacted by Council Aug 24, 2015

**Chapter Street 508 Streets and Sidewalks  
Part 7 Street Cut Permits**

**§ 508-701. Purpose.**

No person, firm or corporation shall break the pavement or surface of any legally open street, between the curblines thereof, until a Street Cut Permit (Permit) is obtained from the Department of Public Works. It shall be the responsibility of the person receiving the Permit (the Permittee) to promptly restore the permitted street cut and any other affected facility in proper order and repair in accordance with this ordinance and associated guidance documents. When the street cut involves the use of a utility the Permittee shall be the owner of the utility or the owner's legal agent.

**§ 508-702. Application.**

Applications for a Permit to break the pavement or surface of any legally open streets shall be submitted on the form provided by the Department of Public Works, shall include all information and applicable fees, and shall be signed by the applicant. The application information and fees shall include the following:

- A. **Permit Fee.** Each application shall be accompanied by a permit fee as provided in Chapter 212, Fees.
- B. **Inspection Fee.** An inspection fee will be assessed for each separate street cut as provided in Chapter 212, Fees.
- C. **Pavement Restoration Fee.** *It shall be the duty of the party applying for the permit to restore to good order and repair in accordance with the City of Reading's specifications. The Permittee shall pay a permanent pavement restoration fee for those cuts where the permanent pavement restoration is provided by the City of Reading, in accordance with Chapter 212, Fees, unless otherwise stipulated. Refer to Section 508-706 Pavement cuts on recently paved streets for additional charges that may apply to recently paved streets.* Permittee's who prefer to have their contractor perform the permanent pavement restoration work must have completed a Letter of Agreement with the City to that effect and will not be assessed the permanent pavement restoration fee *except as noted in Section 508-706 and Section 508-709.C. Refer to Section 508-706 Pavement cuts on recently paved streets for premature degradation charges that will apply to cuts made on recently paved streets, and Section 508-709.C for permanent pavement restoration made Ahead of Paving in coordination with the City.*
- D. **Detailed Plan of the work.** *The applicant shall furnish a A scale plan shall accompany the application showing the extent and nature of the planned work at each street cut location within the right- of-way. The plan shall set forth, but is not limited to:*
  - 1) *The purpose for which the excavation is to be made;*
  - 2) *The Permittee shall include The dimensions and location of the proposed excavation including the nearest cross streets where the excavation or street opening is considered;*
  - 3) *The full scope of work to be included in the project;*
  - 4) *The date or dates during which the requested excavation is to be permitted;*

- 5) *The date such excavation is to be refilled and resurfaced in the manner hereinafter provided; and*
- 6) *A Traffic Impact Plan (TIP). As specified in §508-709, a TIP shall be submitted with any permit application for all proposed work that is to be conducted on a City roadway.*

~~all other important details on the plan that the Permittee is aware of and other information as required by this section and as directed by the City Engineer Public Works Director or his/her designee (City Engineer).~~

- E. **Letter of Agreement.** A properly executed Letter of Agreement will be required for all Permits with the exception of a single Permit application for one street cut by a non-utility applicant.
- F. **Bond Guaranty of Work.** *The Permittee shall guarantee and maintain the street cut, excavation, and any related work for twenty-four (24) months from the completion of the City approved final restoration. Within this twenty-four (24) month period, the Permittee shall correct or cause to be corrected all restoration work in the manner determined necessary by the Public Works Director within five (5) calendar days of receipt of the notification. Failure to perform within the five calendar days may be completed by the City and invoiced to the Permittee for all costs incurred in performance of the work. Payment not made within thirty (30) days of the invoice date will be enforceable against the posted bond, including any fees and costs involved in the collection thereof.*

Each street cut will require a bond *signed* or other acceptable form of surety before a Permit is issued. The bond shall be signed by the applicant in the amount as specified in Chapter 212, Fees. The bond shall accompany the Permit application and shall remain in effect for a period of *twenty-four months (24) two years* from the date of the acceptance of the final pavement restoration. Public utility companies shall provide a bond as specified in Chapter 212, Fees that will warrant all street cut work performed in that calendar year. Bonds for utility companies shall be renewable on an annual basis. If the condition is such that the Permittee fails to comply with this ordinance by not promptly completing the permitted work, including trench restorations and restoration of other affected facilities or fails to maintain such restorations in proper order and repair following construction, the ~~City Engineer~~ *Director of Public Works* shall have cause to remedy that condition by calling on the Permittee's bonding company to perform the work necessary to restore the street and other affected facilities to proper order.

- G. **Additional fees and information.** The size and type of street cut(s) may require payment of additional fees and submission of additional information as prescribed in this ordinance. All fees, plan information, bonding, application and Letter of Agreement must be provided and approved before the City will issue a Permit. Permits are issued subject to all other applicable ordinances of the City of Reading, and all applicable state and federal laws.
- H. **Display of permits and signage at work site.** *Unless otherwise authorized, permit(s) shall be kept at the work site for the duration of the project and made available for inspection upon request of any duly authorized City official. Such permits cannot be affixed to any temporary structure including fences, containers, or construction equipment.*
- I. **Revocation of Permit.** *All street cut or excavation permits are subject to revocation at any time by the Department of Public Works upon written notice served to whom the permit was granted, their agent, or employee. Such notice shall contain a brief statement detailing the revocation and be issued for failure to cure within three (3) days:*
1. *A violation of any condition of the permit.*

2. *A violation of this section or any other applicable City of Reading ordinance relating to the work.*
3. *The creation or failure to eliminate a condition or action that constitutes a nuisance or endangers the lives, property, or welfare of City residents.*

#### § 508-703. Rejection of application

Street Cut Permits shall not be issued to any person, firm or corporation indebted to the City due to a previously issued permit. *Additionally, no permit shall be issued for non-emergency work commencing from September through November of any calendar year.*

The ~~City Engineer~~ *Director of Public Works* may deny or delay issuance of a Permit if existing or anticipated conditions for the use of the street indicate that the street cut work will interfere with the safety and judicious use of the street and the Right-of-Way.

#### § 508-704. Permit issuance and schedule for construction of street cuts

Permit applications shall be submitted ~~a minimum of two weeks~~ *not less than thirty (30) days* prior to the start of the proposed street cut work, *and construction work must commence within fifteen (15) calendar days of approval; failure to do so may result in permit revocation, or require the submission of a new application.* The Permittee shall notify the City at least three days in advance of breaking the street. Each Permit shall be valid for a period of ~~six~~ *four* months. If deemed necessary, Permit time extensions may be granted as specified in Section 508-709 Other related permits and fees.

#### § 508-705. Charged surface

In computing the surface area of the permanent pavement restoration surface to be charged, *for small single cuts, twelve inches shall be added to all sides of the proposed cut. For Large Street Cuts (per 508-707.A), the charged surface shall include the combined area of each trench, plus, as a separate fee, the area of milling and overlay required to restore the overlying surface. For applicants where the Large Cuts are coordinated with the City for Ahead of Paving Permits, see Section 508-709.C.* If the Permittee or City inspector determines that the Permittee removed, disturbed or damaged a pavement area greater than what is stated on the Permit, the Permittee shall pay a proportionate amount to be fixed by the Department of Public Works.

#### § 508-706. Pavement cuts on recently paved streets

~~Final pavement restorations for s~~ *Street cuts on recently paved streets will be provided by the City, and are subject to additional charges to recover the premature degradation caused by the work. The restoration fee for pavement cuts on streets paved more than 10 years before the date of the application shall be calculated at the permanent pavement restoration rate specified in Chapter 212, Fees. The restoration premature degradation fee for pavement cuts on streets paved within ten years from the date of the application shall be issued based on the permanent pavement restoration rate specified in Chapter 212, Fees as follows following additional fees ; 100% additional for of the restoration fee for the current year through the fifth year, and 80% additional of the restoration fee for years six through ten. The premature degradation fee applies to all Permittees under these conditions whether they provide the pavement restoration or the City provides the restoration.*

§ 508-707. Special site conditions

Where, in the opinion of the ~~City Engineer~~ *Director of Public Works* and at his/her sole discretion, site conditions are determined to involve construction work beyond that required for a small single utility service connection, the Permittee shall provide additional information, and may be required to perform additional work and pay additional fees. Where additional work is required to restore the pavement and other features within the Rights-of-Way, those terms shall be included in the Letter of Agreement before issuance of the Permit.

Special site conditions include, but are not limited to, permanent restoration of the street surface by the applicant, permanent restoration of the street beyond the area of the trench cut opening, construction of features within the Rights-of-Way other than trench restoration, and other special site construction work determined during the application. Examples of special site conditions are described below:

- A. **Large cuts.** Additional restoration of the pavement wearing surface will be required for cuts larger than those made for small single utility service connections. Large street cuts include, but are not limited to, the following conditions:
1. Where two or more transverse or longitudinal cuts are made within a 100 foot long section of street *and the total area of the cuts is equal to or greater than 40.0 square feet.* (Transverse cuts are typically made for laterals that run across the street, and longitudinal cuts are typically made for mains running with the street.)
  2. *Where the area of a single cut is equal to or greater than 40.0 square feet.*
  3. ~~Where a single longitudinal cut exceeds 100 feet.~~

The additional restoration for these cuts shall comply with the City's ~~drawing~~ *standard engineering drawings* and specifications for Large Street Cut Restoration which shall include milling and overlaying of the wearing surface of the entire ~~travel lane(s)~~ between the curb and the street centerline within the area bounded by the cut(s).

- B. **Curb ramps.** For conditions where the Permittee proposes ~~a street cut an alteration to within a street intersection, or along, or through a pedestrian walkway~~ *crosswalk or other crosswalk* within the City's Rights-of-Way and where the existing curb ramps at that ~~intersection~~ *crosswalk* do not meet the current requirements of the Americans with Disabilities Act (ADA), the Permittee will be required to ~~install ADA compliant~~ *upgrade the crosswalk to meet current ADA standards including curb ramps at all corners within for that intersection crosswalk.* *Crosswalk and pedestrian access route alterations, as defined by the ADA and Penn DOT, shall include any project that will affect or could affect the accessibility or use of the accessible route. Alteration projects that meet these conditions shall be determined by the Director of Public Works on a case by case basis and shall follow the latest Penn DOT guidance, including Publication 13M, Chapter 6. Alterations include any extensive resurfacing or overlaying of the pavement within the crosswalk.* The area within a street intersection is the area delineated by the curb radii and the lines drawn across the streets that connect the termini of the curb radii, or the lines drawn parallel to the outside edge of the pedestrian walkways, whichever generates the larger area. This condition also applies where the work will disturb any street corner beyond the curbline. *City crosswalks are located at all street intersections whether or not crosswalk markings are present. Crosswalks are also located along sidewalks where the sidewalks cross alleys and driveways. For crosswalks that are not marked, the crosswalk area within a street intersection is the area delineated by the outside curb radii and the lines drawn across the streets that connect the termini of the curb radii, excluding the area of the interior*

*rectangle. The interior rectangle is formed by projecting the curblines into the intersection and the rectangle is defined by the corners of the intersecting projected curblines. Unmarked crosswalks include the area that is defined by the projection of the sidewalk across the street, alley or driveway.* For street cuts proposed under these conditions the Permittee will be required to construct, or reconstruct curb ramps at ~~the crosswalk each and every corner of the intersection or alley~~ to meet the current ADA and Penn DOT requirements. To facilitate the proper construction of the ramps, the Permittee shall include with their Permit application the following additional provisions:

1. An existing conditions survey that includes all of the curb ramps within the intersection, alley or other accessible route where the cut is proposed to determine compliance and/or non-compliance with ADA.
2. Curb ramp designs for construction of each new and non-compliant curb ramp. The curb ramp designs must comply with the most current applicable Penn DOT standard for curb ramps. The existing condition survey and the ramp designs must be sealed by a qualified engineer or surveyor registered in the Commonwealth of Pennsylvania.
3. An amendment to the Letter of Agreement that states that the Permittee will construct or replace curb ramps within the intersection or alley that does not currently meet ADA and Penn DOT requirements.
4. A bond, letter of credit or other form of appropriate surety that includes an amount equal to cost to construct the ramps per the approved design. The form of surety other than a bond must be approved by the City Solicitor. The amount of the surety must be approved by the ~~City Engineer~~ *Director of Public Works.*

Ramp designs will be reviewed by the ~~City Engineer~~ *Director of Public Works* for approval prior to issuance of the Permit. For projects that involve state and/or federal funding, additional Penn DOT approval shall be required.

Following construction of the curb ramps, The Permittee shall submit to Public Works completed as-built (record) drawings of the work indicating that the ramps were properly inspected and were found to comply with the approved design.

- C. *Steel Plates. When a temporary surface is required the temporary installation and maintenance thereof shall be the responsibility of the Permittee until the permanent surface is completed and accepted.*
1. *Steel Plates shall only be used to secure open excavations when the Permittee is unable to backfill the same day excavation occurs and may be utilized for a period not to exceed four (4) business days, unless otherwise permitted by the City. In the event steel plates must be left unattended for a period exceeding 4 business days without prior approval, the Permittee is required to notify the City of Reading Public Works Department the reason(s) and necessity of the plate(s), as well as the estimated time before resuming their work.*
  2. *All steel plates shall be properly marked with the utility and contractor name, and a twenty-four (24) hour contact phone number in the event of a disturbance. Additionally, the steel plates shall be of sufficient thickness to resist bending and vibration under traffic loads and shall be anchored securely to prevent movement. If these conditions are not met, the Permittee shall be required to backfill, pave the excavation, or use alternative methods sufficient to remedy the disruption.*
  3. *Skid-resistant plates are required: from November and through April and in high-traffic locations including, but not limited to crosswalks near schools, hospitals or elderly housing, stop bars, handicapped ramps, on bridges and major intersections. The City does reserve the right to require skid-resistant plates when deemed necessary.*

4. *The plates shall be secured to prevent any lateral movement. If movement occurs, the Permittee will be notified to re-secure plating immediately; otherwise the Permittee shall be charged 115% of the cost incurred by the City to secure the Permittee's plates.*
5. *All plated locations must have ~~"Caution: Steel Plates Ahead" signs constructed with Retro Reflective Florescent Orange material (Type 4) bracketed 6 feet in height or greater on unobstructed poles or posts placed at approximately 100 feet in advance of the steel plate location, unless otherwise approved by the City of Reading Public Works Department.~~ "Steel Plates Ahead" signs must be taken down when plates have been removed from the work site, must utilize traffic control devices as defined to include, signs, signals, or markings generally used to warn, or guide vehicular traffic through streets, highways, or private roads open to public travel as regulated by the Manual on Uniform Traffic Control Devices (MUTCD).*

§ 508-708. Inspection 22

If the City of Reading determines that the permitted work is of sufficient magnitude or importance to warrant additional inspection beyond routine spot-inspection or due to noncompliance with the Permit conditions, the Permittee shall be charged for all expenses incurred by the City of Reading for the additional inspection(s).

§ 508-709. Other related permits and fees.

A separate Permit shall be issued for each individual street cut. In addition to the streets cut previously described, Street Cut Permits will be issued for the following:

A. **Bore holes.** Bore holes are small auger drilled excavations, up to 8 inches in diameter and no deeper than 18", made in the pavement section for the purpose of investigating pavement conditions, or to open the pavement for investigations below the pavement section. Bore holes made below the pavement section must utilize non-destructive excavation methods. Non-destructive excavation shall be limited to methods that use pressurized air and vacuum systems to excavate borings, up to 4 square feet in area, for visual examination of underground utilities and other subsurface conditions. Non-destructive methods other than air-vacuum systems must be approved in writing by the ~~City Engineer~~ *Director of Public Works* prior to issuance of the Permit. Bore holes are street cuts and a bore hole fee will be charged for each bore hole made, as specified in Chapter 212, Fees. A Permit will be required for each bore hole grouping. The Permittee shall restore the bore holes in the same manner as a standard street cut. The work shall be completed within 30 days of boring. If the applicant does not restore the bore holes within that time period, the City of Reading reserves the right to take any steps deemed necessary to repair the street and the associated costs shall then be paid by the Permittee.

B. **Emergency cuts.** Emergency street cuts and excavation required to access leaking utility mains or other installations that pose a potential hazard, or bore holes required to search out threatening conditions, may be made in advance of a Permit at the discretion of the utility company conducting the investigation and repairs. *Within two hours of commencing an emergency cut or excavation*, the City's Police Department shall be notified ~~immediately~~ at (610) 655-6111, as well as other potentially affected utilities and the PA One Call System. An authorized representative of the responsible party(ies) shall notify the Department of Public Works the next business day, and a proper Permit application accompanied by appropriate fees and other required documents shall be submitted to the City within seven business days of the commencement of the work.

- 1) *A Permittee shall perform emergency work until the emergency is eliminated, unless otherwise directed by the City.*
- 2) *Once obtained, the emergency permit shall be kept on site and presented upon the request of any City official authorized to enforce this part.*

C. **Ahead of Paving Permit.** Applicants proposing street cuts at locations that are scheduled for street improvements by the City of Reading will be charged at the Ahead of Paving Permit fee rate as specified in Chapter 212, Fees. A detailed construction plan must accompany each application for an Ahead of Paving Permit. ~~Excavation, backfilling and~~ *Temporary and street cut permanent trench restoration will be performed by the Permittee at his/her cost and in accordance with the schedule as directed by the City Engineer Director of Public Works. The Permanent pavement surface restoration will be coordinated with the Director of Public Works. The fee charged for this restoration shall be determined by applying typical costs for this construction work applied to the charged surface per Section 508-705.*

D. **A Traffic Impact Plan (TIP).** *The TIP shall detail the method by which vehicular and pedestrian traffic will be affected and controlled during a permitted project. The TIP shall also include any barricades, signs, lights or other approved safety devices necessary to facilitate a closure and where the work results in closing or diverting traffic into another lane, a Flag person shall at all times be posted while the work is actively being performed. For street closures within the City that also require PennDOT permits, the application must include a copy of the state issued permit and comply with all traffic control standards. In residential districts zoned R1, the Public Works Director may waive the requirement for a TI; however, all other traffic control regulations are enforced.*

E. **Time extension.** For conditions where the permitted work may not be completed, or has not been completed, on or before the Permit expiration date, the ~~City Engineer~~ *Director of Public Works* may, if he/she deems it advisable, take steps to backfill the trench and replace a permanent pavement over the opening. If an extension of time beyond the Permit expiration date is necessary for the Permittee to complete the work, then a written application must be submitted and signed by the Permittee at least two weeks prior to the expiration date. Permit time extensions will only be granted upon the timely submission of the Permit extension application and the payment of the time extension fee, as specified in Chapter 212, Fees. *Any Permittee that fails to request and receive an extension for permitted work and continues to work shall be in violation of this section.*

#### § 508-710. Construction Standards

A. **Plan and subsurface drawings and record drawings.** All applicants shall include with their application scale drawings that clearly and accurately shows the location of the proposed work with respect to existing facilities within the vicinity of the proposed work that will be, or could be, affected by the work. The scope of the drawings shall include as a minimum: all adjacent underground utilities, curb lines, sidewalks, traffic control loops, and similar features in both plan and cross section view. Upon completion of work, the Permittee shall furnish to the Director of Public Works record drawing(s) that indicates the as-constructed location, size and type of utility or feature installed or altered and its location with reference to the street surface and the adjacent curb lines. The standard of accuracy for the drawings shall be:

1. For standard single utility service connections: the same as those submitted for Final Plan under Chapter 515 Subdivision and Land Development Ordinance.
2. For large street cuts and cuts required for work other than a single service connection: as specified on the City of Reading's Street Cut Restoration drawing.

II. Work to conform to the City of Reading standards. The work shall be done at such time and in such manner as shall be consistent with the safety of the public and *in accordance with the City of Reading engineering standard drawings and specifications* ~~shall conform to all requirements and standards of the City of Reading.~~ If the City of Reading discovers that the work has been discontinued or has not been properly performed, the Permittee, upon being notified thereof in writing by the City of Reading, shall immediately take all necessary steps, at Permittee's own expense, to place the work in such condition, as to conform to the City's requirements or standards. If a dispute arises between the Permittee and the City of Reading's inspector, the City of Reading's inspector shall have the authority to suspend work until the matter can be referred to the ~~City Engineer~~ *Director of Public Works* for resolution.

§ 508-711 *Comprehensive General Liability and Indemnification.* The applicant for a street cut or excavation permit shall provide a certificate of insurance with general liability coverage, including any liability normally covered by a General Liability policy with limits of not less than \$1,000,000 per occurrence and \$2,000,000 in the annual aggregate. Prior to commencement of the performance of the excavation, Contractor shall furnish to the City a certificate of insurance evidencing required coverage in at least the limits required herein, naming the City of Reading, its elected officials, agents, and employees as Additional Insured for "ongoing operations" and "products and completed operations". Moreover, the applicant agrees, as a condition governing the issuance of permit that they shall hold harmless the City of Reading, its elected officials, agents, and employees from any and all claims and actions whatsoever arising under the execution of said permit.

§ 508-712 Violations and penalties.

Any person, firm or corporation who breaks or cuts in any manner the surface of any street of the City without first having obtained the proper permit and paid the application fee and charges hereinbefore set forth, including any time extension fee, or violates any of the other provisions of this section shall, upon conviction before Magisterial District Judge, be sentenced to pay a fine not exceeding \$300 for an initial offense and not to exceed \$1,000 for each subsequent violations offense, plus costs; and in default of the payment of such fine and costs, said person and/or the responsible agents or officers of firms or corporations, violating the provisions of this section, shall be imprisoned in the Berks County Prison for a period not exceeding 90 days.

## EXHIBIT A

### 508-702. Application

- (1) Revocation of Permit. All street cut or excavation permits are subject to revocation at any time by the Department of Public Works upon written notice served to whom the permit was granted, their agent, or employee. Such notice shall contain a brief statement detailing the revocation and be issued for failure to cure within three (3) days:
1. A violation of any condition of the permit.
  2. A violation of this section or any other applicable City of Reading ordinance relating to the work.
  3. The creation or failure to eliminate a condition or action that constitutes a ~~nuisance~~ *violation of applicable Americans with Disabilities Act compliances guidelines*, or endangers the lives, property, or welfare of City residents.

### § 508-703. Rejection of application

Street Cut Permits shall not be issued to any person, firm or corporation indebted to the City due to a previously issued permit. The Public Works Director, or his designee, shall review non-emergency applications anticipated to commence after September of the calendar year. The Public Works Director, or his designee, may permit the project to begin contingent upon the review of several factors, including but not limited to final restoration date, size of the cut, use of steel plates, and scope of the project, however no non-emergency projects shall begin in November, December, or January of a given year, *unless a special exception is granted by the Public Works Director.*

### 508-707. Special Site Conditions

(C) Steel Plates. When a temporary surface is required the temporary installation and maintenance thereof shall be the responsibility of the Permittee until the permanent surface is completed and accepted.

1. Steel Plates shall only be used to secure open excavations when the Permittee is unable to backfill the same day excavation occurs and may be utilized ~~as for a period not to exceed four (4) business days, unless otherwise permitted by the City.~~ In the event steel plates must be left unattended for a period exceeding ~~four (4)~~ *twenty (20)* business days without prior approval, the Permittee is required to notify the City of Reading Public Works Department the reason(s) and necessity of the plate(s), as well as the estimated time before resuming their work. *Failure to provide notice, remove the plates, resume or complete excavation constitutes a violation of this article and the appropriate fine shall be levied.*
2. All steel plates shall be properly marked with the utility and contractor name, and a twenty-four (24) hour contact phone number in the event of a disturbance. Additionally, the steel plates shall be of sufficient thickness to resist bending and vibration under traffic loads and shall be anchored securely to prevent movement. If these conditions are not met, the Permittee shall be required to backfill, pave the excavation, or use alternative methods sufficient to remedy the disruption.
3. ~~Skid resistant plates are required: from November and through April and in high traffic locations including, but not limited to crosswalks near schools, hospitals or elderly housing, stop bars, handicapped ramps, on bridges and major intersections. The City does reserve the right to require skid resistant plates when deemed necessary.~~

4. The plates shall be secured to prevent any lateral movement. If movement occurs, the Permittee will be notified to re-secure plating immediately; otherwise the Permittee shall be charged 115% of the cost incurred by the City to secure the Permittee's plates.
5. All plated locations ~~must have "Caution: Steel Plates Ahead" signs constructed with Retro Reflective Florescent Orange material (Type 4) bracketed 6 feet in height or greater on unobstructed poles or posts placed at approximately 100 feet in advance of the steel plate location, unless otherwise approved by the City of Reading Public Works Department. "Steel Plates Ahead" signs must be taken down when plates have been removed from the work site.~~ must utilize traffic control devices as defined to include, signs, signals, or markings generally used to warn, or guide vehicular traffic through streets, highways, or private roads open to public travel as regulated by the Manual on Uniform Traffic Control Devices (MUTCD).

**Desired Start Date** (mo/day/year): \_\_\_\_\_

**Anticipated Completion Date:** \_\_\_\_\_

*(If applying for a street & sidewalk permit, consider entirety of the project)*

*Note: The successful applicant contractor will receive a City issued work permit that must remain on site for the duration of the project. Work may not commence until said permit is received and shall be concluded at the permit expiration date absent a request for an extension, or a new application has been approved by the City. Failure to display, or present upon request by a City Official will result in violation of applicable City regulations. (Ord. 508-701)*

**6. TERMS AND CONDITIONS**

- (A) By granting this permit the City of Reading does not waive rights or powers of ownership, management, maintenance, and/or control over the public right-of-way, and any use of said right-of-way is revocable by order of the Public Works Director and shall be in accordance with all laws, rules, and regulations. This issuance of this permit by the City is not intended to, nor shall it, grant or assign any real or personal property right or title in or to the right-of-way in the City of Reading to the applicant.
- (B) Street pavement and sidewalk replacement, including trench fill material shall conform to the standards and specifications of the City current on the date of approval of this permit. The applicant shall restore all areas disturbed by his/her operations to their original or better condition. The Public Works Director, or designee, shall approve all work in the City in advance and upon final restoration.
- (C) A copy of this permit must be placed on site during the hours of activity for the duration of the period stated on the approved permit.
- (D) The Permittee agrees to defend, indemnify, and hold harmless the City of Reading, its officials, officers, employees, and agents against: (1) any liability, claims, causes of action, judgments, or expenses, including reasonable attorney fees, resulting directly or indirectly from any act or omission of the Permittee's use or occupancy of the sidewalk and/or public right of way; and (2) all loss by the failure of the Permittee to fully or adequately perform, in any respect, all authorizations or obligations under the Permit.
- (E) Permittee shall accept the terms, conditions, and requirements of the permit and agree to comply with them to the satisfaction of the City of Reading's applicable ordinances and all applicable requirements of state and federal law. Work shall begin within 15 calendar days from the date of approval unless other arrangements are made, otherwise the application may be voided.
- (F) Applicant/Permittee or Authorized Agent Statement: I declare under penalty of perjury under the laws of Pennsylvania that : I am the Applicant/Permittee OR the authorized agent of the Applicant/Permittee that the information provided is correct and complete; and that I have the authority to bind the Applicant/Permittee to this application

**Subject:** RE: CPHD/City of Reading v. UGI, Docket Nos. C-2015-2516051 and C-2016-2530475

Your Honor,

Apologies for the delay in responding to your email. Similar to the City of Reading, UGI's records do not track the specific date that each meter was installed or relocated. UGI suggests that the permit data already being compiled by the City and inputted into the spreadsheets provides a relative timeframe for each meter installation. Although UGI does not track the specific date each meter was installed or relocated, the Company does record the date of the service line installation. UGI submits that it can use the service line installation data to confirm the relative timeframe for each meter installation as identified by the permit data to be provided by the City.

Thank you.

Counsel –

In Paras. 12-15 the Complainants state that they cannot comply with the directive to supply the date that a meter was relocated. UGI does not state in its answer whether UGI can provide that information. Is that information available to UGI and can it be included with the spreadsheet by May 11, 2017?

vs.

Docket No. C-2015-2516051

UGI UTILITIES, INC.

---

CITY OF READING,

v.

Docket No. C-2016-2530475

UGI UTILITIES, INC.

---

**AFFIDAVIT OF JOHN SLIFKO**

**IN SUPPORT OF RESPONSE TO UGI'S MOTION FOR SUMMARY JUDGMENT**

John Slifko, being duly sworn, hereby deposes and says:

1. I am a Councilman appointed to the City Council of the City of Reading. I am familiar with the facts set forth herein.

2. I executed an affidavit dated July 5, 2017, previously filed (with exhibits) before the Public Utility Commission as part of the City of Reading's Motion for Summary Judgment. A true and correct copy of my July 5, 2017 affidavit is attached hereto as Ex. "A", less exhibits.

3. During August 2016 and April 2017 I supervised an effort to survey UGI's meter relocation program within the City's six historic districts, and selected non-historic areas.

4. I personally surveyed a large number of properties in the historic districts and all of the properties in the non-historic areas of the City.

5. I participated in the training of other City employees to do the same.

6. In addition to myself the City hired five other surveyors: Anita Donatelli, Beth Ireland, Maria Ballas, Melvyn Jacobson, and Nadine Smet-Weiss.

7. Surveyors visited each of the properties assigned to them and filled out the survey instrument for each property.

8. Surveys were taken each day from August 19 through August 31, 2016, with additional surveys being performed on April 3, April 4, April 7, and April 12, 2017.

9. Surveyors completed a spreadsheet of the type and nature attached hereto as Ex. "B".

10. Column 7 on the spreadsheet asked whether the observed meter was "[u]nder a window?" I intended that this column designate the meters that were placed under windows that could serve as a fire exit.

11. Column 9 on the spreadsheet separately asked whether the observed meter was "[u]nder an opening that could be a fire exit?" I intended that this column designate openings other than windows that could serve as a fire exit.

12. Included among the violations observed by the surveyors, and me, was the placement of meters "beneath or in front of windows" that could serve as fire exits.

13. If a surveyor observed that a meter was located beneath or in front of a window that could serve as a fire exit, the surveyor inserted a "Y" on the spreadsheet in column 7 ("Under a window?"); if not, the surveyor inserted an "N".

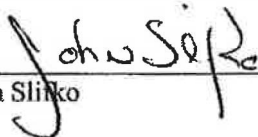

14. Although the windows could serve as a fire exit, Surveyors were not instructed to also place a "Y" in column 9, which was organized to be a different category, as stated above.

15. A "Y" in column 7 ("Under a window") also, therefore, indicates that the meter is located "[u]nder an opening that could be a fire exit."

16. Put another way, an "N" in column 9 does not indicate that the window above which any given meter is located could not serve as a fire exit.

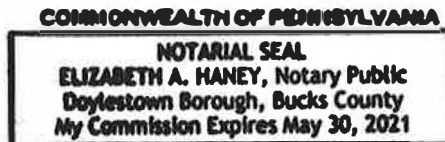

17. Additionally, with regard to the properties that I personally surveyed, when I observed that a meter was placed below a window that could serve as a fire escape, I only marked column 7 ("Under a window?") and not Column 9 ("Under an opening that could be a fire exit?").

18. I, John Slifko, being duly sworn according to law, depose and say that I am authorized to make this Affidavit on behalf of the City of Reading, being the holder of the office of City Councilman, and that the facts set forth above are true and correct to the best of my knowledge, information, and belief.

 :  
v. : Docket No. C-2016-2530475  
 :  
UGI UTILITIES, INC. :

---

**AFFIDAVIT OF JOHN SLIFKO**  
**IN SUPPORT OF MOTION FOR SUMMARY JUDGMENT**

John Slifko, being duly sworn, hereby deposes and says:

1. I am a member of the City Council of the City of Reading. I am familiar with the facts set forth herein.

2. UGI Utilities, Inc. (“UGI”) has undertaken a number of “betterment” projects in the City of Reading (the “City”).

3. During this process UGI replaced gas mains, laterals, and relocated gas meters from the interior of buildings to the exterior of buildings.

4. UGI has relocated a number of meters from interior to exterior locations both within and outside historic districts in the City of Reading (the “City”).

5. The City has six designated historic districts: the Callowhill Historic District (locally designated), the Centre Park Historic District (locally designated), the Heights Historic District (locally designated), the Prince Historic District (locally designated), the Penn’s Commons Historic District (locally designated), and the Queen Anne Historic District (nationally registered).

6. Between August 2016 and April 2017, I supervised an effort to survey all of the meter relocations in the City’s six historic districts, and selected non-historic areas.

7. I participated in the training of other City employees to do the same.

8. In addition to myself, the City hired five other surveyors: Anita Donatelli, Beth Ireland, Maria Ballas, Melvyn Jacobson, and Nadine Smet-Weiss.

9. After receiving training on the survey instrument, which was targeted at identifying specific violations with regard to 52 Pa. Code § 59.18, each surveyor was given a list of properties where City records indicated UGI had installed gas meters on the exterior of buildings in the historic districts.

10. Surveyors visited each of the properties assigned to them and filled out the survey instrument for each property.

11. While surveyors were reviewing their assigned properties, they also identified additional properties on the same streets where gas meters were found on the exterior of buildings.

12. Each surveyor was provided with a City-owned Amazon Fire tablet device that was capable of taking color photographs.

13. For any property where an exterior meter was found, the surveyor took pictures of the house number; the exterior meter; any specific violations of 59.18 noted on the survey instrument; and any alternative, less intrusive locations for an exterior meter.

14. In some cases this information was captured in a single photograph, and in some cases, multiple photographs were necessary.

15. After the surveyor completed their assigned areas, the surveyor returned the completed survey instrument forms and Amazon Fire to the City Clerk's office, where the pictures were downloaded and transmitted to our legal counsel.

16. Surveys were taken each day from August 19 through August 31, 2016, with additional surveys being performed on April 3, April 4, April 7, and April 12, 2017.

17. I personally surveyed 150 properties in the Centre Park, Heights, Penn's Commons, and Queen Anne Historic Districts, as well as all 673 properties in non-historic areas of the City on August 22, 23, 24, 26, and 27, 2016 and April 3, 4, 7, and 12, 2017.

18. The properties inspected by me as referenced in paragraph 17 are identified in the CITY OF READING GAS METER SURVEY RESULTS MATRIX (Historic District and Non-Historic Properties) attached hereto as Exhibit "A" to this Affidavit. Each meter that I inspected is noted on Exhibit "A," and the photographs identified by Bates number for each meter were

taken by me as a part of the survey of each property. These photographs are attached as part of Exhibit A.

19. Some of the most urgent violations that need to be addressed are safety violations. For the purposes of this affidavit, I have attached a spreadsheet with accompanying photographs documenting individual properties and the locations to which UGI relocated their gas meters as Exhibit "A."

20. I either personally took the photographs in these pictures or am familiar with the properties and current conditions thereon and verify that the photographs are a fair and accurate depiction of the properties and current conditions thereon. True and correct copies of these photographs are attached hereto as part of Exhibit "A", as Exhibits A-1, A-2, and A-3.

21. I am authorized to make this Affidavit on behalf of the City of Reading, being the holder of the office of City Councilman, and that the facts set forth above are true and correct to the best of my knowledge, information, and belief.

  
\_\_\_\_\_  
John Slifko

  
Sworn to and subscribed to me

this 5 day of July 2017.
