Sunoco's Petition to Lift the Emergency Order

Dear PUC Commissioners,

For the first time since Sunoco Pipeline LP first changed the Mariner East transmission product in December 2014 my family has been carefree from fear of pipeline complications. I do not own an easement but live about 2 miles northwest of the West Whiteland border in Uwchlan Township. My home is 450 ft from the Mariner line. Here it only has 18 inches depth of cover regulations suggest it should be 36 inches plus 12. This is an unacceptable amount of risk my family is in, you have been asked by Uwchlan Township Officials to evaluate their rights to intervention under this matter.

Being that, here in Uwchlan, we have the same land formations as in West Whiteland and Mariner One is not properly covered please continue the Emergency Injunction until the safety of this pipeline running through Uwchlan has been evaluated. Our family lives in fear and under your authority your agency alone is responsible for the safe transmission of pipelines under PA State Title 66 section 1501.

Sincerely,

Rebecca Britton
