RR1. Provide capitalization and capitalization ratios for the last 5-year period and projected through the next 2 years (with short-term debt and without short-term debt) for the company, parent and consolidated system.

a. Provide year-end interest coverages before and after taxes for the last 3 years and at the latest date, including indenture and Securities and Exchange Commission (SEC) bases, for the company, parent and consolidated system.

b. Provide year-end preferred stock dividend coverages for the last 3 years and at latest date, including charter and SEC bases.

A. Please see attached Schedule RR1(a) that shows the capitalization and capitalization ratios for the last five-year period (2013-2017) with short-term debt and without short-term debt for the Company, Parent and consolidated system. The forecasts for the Company for 2018 and 2019 is also included. The next two year period, 2018 and 2019, is not available for the Parent and consolidated system at the present time.

a. Please see attached Schedule RR1(b) that provides year-end interest coverage before and after taxes for the last three years (2015-2017) and at latest date (3/31/18), including Indenture and SEC Bases, for the Company, Parent and consolidated system.

b. There is no preferred stock outstanding for the Company, Parent and consolidated system for the last three years.

If the only securities being registered on this form are being offered pursuant to dividend or interest reinvestment plans, please check the following box. ☐

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, other than securities offered only in connection with dividend or interest reinvestment plans, check the following box. ☒

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this form is a registration statement filed pursuant to General Instruction I.D. or a post-effective amendment thereto that shall become effective upon filing with the Commission pursuant to Rule 462(e) under the Securities Act, check the following box. ☒

If this form is a post-effective amendment to a registration statement filed pursuant to General Instruction I.D. filed to register additional securities or additional classes of securities pursuant to Rule 413(b) under the Securities Act, check the following box. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

| | |
|---|---|
| Large accelerated filer ☒ | Accelerated filer ☐ |
| Non-accelerated filer ☐ (Do not check if a smaller reporting company) | Smaller reporting company ☐ |
| | Emerging growth company ☐ |

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of Securities Act. ☐

**CALCULATION OF REGISTRATION FEE**

| Title of Each Class Of Securities to be Registered | Amount to be Registered(1) | Proposed Maximum Offering Price Per Security | Proposed Maximum Aggregate Offering Price(2) | Amount of Registration Fee(3) |
|---|---|---|---|---|
| Common stock, par value $0.50 per share . . . . . . . . . . . . . . . . . . . . | 6,000,000 shares | $33.24 | $199,440,000 | $23,115.10 |

(1) Pursuant to Rule 416 under the Securities Act of 1933, the number of shares being registered shall be adjusted to include any additional shares that may become issuable as a result of stock splits, stock dividends, or similar transactions.

(2) Pursuant to Rule 457(c) under the Securities Act of 1933, the offering price is computed on the basis of the average of the high and low prices of the common stock of Aqua America, Inc., as reported on the New York Stock Exchange on July 25, 2017.

(3) Pursuant to Rule 415(a)(6) of the Securities Act of 1933, this registration statement carries over 3,125,000 unsold shares of common stock previously registered on a Registration Statement on Form S-3 (File No. 333-197805) filed with the Securities and Exchange Commission on August 1, 2014 (the "2014 Registration Statement"). The filing fee of $13,463.77 being paid herewith relates to the 2,875,000 newly registered shares of common stock. As a result, the offering of unsold securities registered under the 2014 Registration Statement will be deemed terminated as of the date of effectiveness of this registration statement.

**PROSPECTUS**

# Aqua America, Inc.

## Dividend Reinvestment and Direct Stock Purchase Plan

## 6,000,000
## Shares of Common Stock

---

- The Plan gives you a convenient, systematic way to purchase or invest in our common stock.
- You can increase your ownership by reinvesting dividends at a discount of between 0% and 5.0%, as designated from time to time in our sole discretion, and by making optional cash investments with brokerage fees and commissions paid by us.
- You do not need to be one of our existing shareholders to participate in the Plan.
- You can own and transfer shares without holding certificates.
- You can purchase shares through an IRA with a portion of the annual maintenance fee paid by us.

**IMPORTANT NOTE: Sales of shares through the Plan are subject to fees and commission charges for which you will be responsible. Please see the "Costs" section of this prospectus for further details regarding these fees and commission charges.**

---

**Our common stock is listed on the New York Stock Exchange under the symbol "WTR." Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489 and our telephone number is 610-527-8000.**

---

**Investing in our common stock involves risk. See "Risk Factors" on page 2 for certain risks to consider before participating in the Plan or purchasing shares of our common stock.**

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

---

**The date of this prospectus is July 28, 2017.**

## TABLE OF CONTENTS

**As used in this prospectus, the words “we,” “us,” “our,” and “Aqua America” refer to Aqua America, Inc. and its subsidiaries unless otherwise indicated or the context otherwise requires.**

## PLAN OVERVIEW

The Aqua America, Inc. Dividend Reinvestment and Direct Stock Purchase Plan (the “Plan”) provides you with a convenient and economical way to purchase shares of our common stock and to reinvest your cash dividends in additional shares. The Plan has various features and you can select those features that meet your investment needs.

The Plan is designed for long-term investors who wish to invest and build their share ownership over time. Unlike an individual stock brokerage account, the timing of purchases and sales is subject to the provisions of the Plan.

Please read this prospectus and the documents incorporated by reference herein carefully. If you are a shareholder of record of at least 5 shares of Aqua America common stock and wish to participate in the Plan, please sign and execute a Dividend Reinvestment and Direct Stock Purchase Plan Enrollment Form (the “Enrollment Form”). If your shares of Aqua America common stock are registered in a nominee name (such as in the name of a bank, broker or other nominee), please see the “Participation and Enrollment” section below for instructions on how to have such shares participate in the Plan. Investors wishing to make an initial investment of not less than $500 should complete the Dividend Reinvestment and Direct Stock Purchase Plan Initial Enrollment Form (the “Initial Enrollment Form”). When completed, the form should be mailed to Computershare Trust Company, N.A. (the “Administrator”). Employees of Aqua America who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company.

You can also enroll in the Plan and access your Plan account through the Internet at the Administrator’s web site, *www.computershare.com/investor*, at any time. In addition, you can authorize one-time initial and subsequent optional cash investments or establish recurring automatic withdrawals from your U.S. bank account.

## RISK FACTORS

*Investing in our common stock involves risks. Please see the risk factors described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed with the Securities and Exchange Commission (the "SEC"), which are all incorporated by reference in this prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this prospectus.*

## FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" "in the event" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;

- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;

- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans, and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. As you read this prospectus and the documents that we incorporate by reference into this prospectus, you should pay particular attention to the "Risk Factors" included in our most recent Annual Report on Form 10-K and in any filing we make with the SEC after the date of such Annual Report on Form 10-K that is incorporated by reference into this prospectus. We qualify all of our forward-looking statements by these cautionary statements.

## A SUMMARY OF IMPORTANT PLAN FEATURES

- *Participation*. You may participate in the Plan if you own at least 5 shares of Aqua America common stock that are registered in your name. You may also participate by making an initial minimum investment of at least $500 through automatic withdrawal from your U.S. bank account, by check or by a one-time online bank debit through the Administrator's web site, *www.computershare.com/investor*. Employees of Aqua America who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company. All U.S. citizens are eligible to join the Plan, whether or not they are currently shareholders. Foreign citizens are eligible to participate as long as their participation would not violate any laws in their home countries or other non-U.S. laws. If your shares of Aqua America common stock are registered in a nominee name (such as in the name of a bank, broker or other nominee), please see the "Participation and Enrollment" section below for instructions on how to have such shares participate in the Plan.

- *Automatic Dividend Reinvestment*. You can reinvest all or a portion of the cash dividends received on your first 100,000 shares toward the purchase of additional shares of our common stock, without paying trading fees or commissions. For purposes of the Plan, the term "full dividend reinvestment" means the reinvestment of dividends on all shares held by you in your name under the Plan up to a maximum of 100,000 shares.

- *Electronic Deposit of Cash Dividends*. You can authorize the Administrator to deposit your cash dividends directly into your U.S. bank account.

- *Optional Cash Investments*. As a shareholder, you can buy additional shares of our common stock at any time for as little as $50. The maximum optional cash investment you may make in any calendar year is $250,000. You can pay by check or by a one-time online bank debit through the Administrator's web site, *www.computershare.com/investor*, or have your payment automatically withdrawn from your U.S. bank account. Employees of Aqua America who wish to make optional cash investments should complete the Employee Enrollment Form provided by the Company.

- *IRAs*. You may establish a traditional IRA, a Roth IRA or a Coverdell Education Savings Account, which invests in common stock through the Plan. IRA contributions and rollovers do not count against a participant's $250,000 annual investment limitation. There is an annual maintenance fee of forty-five dollars ($45.00) charged by the IRA and Coverdell Education Saving Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty-five dollars ($25.00) of this annual fee will be charged to you, with the balance paid by us.

- *Full Investment*. Full investment of your funds is possible because any initial investment and optional cash investments will be used to buy whole and fractional shares. In addition, the full dividend earned on your shares (up to the first 100,000 shares you own), including fractional shares, will be reinvested or paid out as you designate.

- *Safekeeping of Certificates*. Shares purchased through the Plan for which you request certificates to be issued will be held by the Administrator for safekeeping. You may also deposit any Aqua America, or previously named Philadelphia Suburban Corporation, stock certificates that you hold for safekeeping, at no charge.

- *Transaction Reporting*. You will receive a statement following each transaction showing the details of, and your share balance in, your Plan account.

- *Internet Account Access*. You can also enroll in the Plan and access your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, at any time. In addition, you can authorize one-time initial and subsequent optional cash investments or establish recurring automatic withdrawals from your U.S. bank account.

## ADMINISTRATION

Computershare Trust Company, N.A., administers the Plan and acts as Agent for the participants. Computershare, Inc. acts as service agent to Computershare Trust Company, N.A. in performing certain services for the Plan. These companies purchase and retain shares of our common stock for Plan participants, keep records, send statements and perform other duties required by the Plan.

For information about the Plan, you can contact the Administrator by calling toll-free:

| | |
|---|---|
| Computershare Trust Company, N.A. | 800-205-8314 |
| Outside the United States call collect: | 781-575-3100 |
| web site address: | www.computershare.com/investor |

All written correspondence and optional cash investments submitted without a proper investment coupon, should be submitted to:

| | |
|---|---|
| By mail: | Computershare Trust Company, N.A.<br>Attn.: Aqua America, Inc. Dividend Reinvestment<br>and Direct Stock Purchase Plan<br>P.O. Box 505000<br>Louisville, KY 40233-5000 |
| By courier: | Computershare Trust Company, N.A.<br>Attn.: Aqua America, Inc. Dividend Reinvestment<br>and Direct Stock Purchase Plan<br>462 South 4th Street, Suite 1600<br>Louisville, KY 40202 |

You can contact the Aqua America, Inc. IRA Program Administrator by calling toll free 1-800-597-7736. All written correspondence concerning the IRA Program, should be submitted to:

| | |
|---|---|
| By mail: | The IRA Program<br>C/O Computershare Trust Company, N.A.<br>P.O. Box 2175<br>Milwaukee, WI 53201-2175 |
| By courier: | The IRA Program<br>C/O Computershare Trust Company, N.A. Attn.:<br>Aqua America, Inc. IRA<br>235 W. Galena Street<br>Milwaukee, WI 53212-3948 |

Make checks payable to "Computershare-Aqua America" in U.S. dollars and drawn on a U.S. bank. The Administrator will not accept cash, traveler's checks, money orders or third party checks for optional cash investments. Please use the cash investment form at the bottom of your statement.

## INTERNET ACCESS

You can also obtain information about your account via the Internet at the Administrator's web site, *www.computershare.com/investor*. At the web site, through Investor Center, you can access your share balance, enroll in the Plan, purchase shares (either as a one-time online bank debit or by recurring automatic monthly withdrawals from your U.S. bank account), sell shares, request a stock certificate, change dividend payment options and obtain online forms. To obtain access, click Create Log In, fill in the required information, accept the Terms & Conditions and select a User ID and password.

## PARTICIPATION AND ENROLLMENT

If you already own at least 5 shares of our common stock, you are eligible to participate in the Plan.

- If your shares are registered in your name, you can enroll in the Plan through the Internet at the Administrator's web site, *www.computershare.com/investor*, or you can fill out the Enrollment Form and return it to the Administrator.
- If your shares are registered in a nominee name but you wish to participate in the Plan you should instruct your bank, broker or other nominee to have some or all of your shares registered in your name. Simply instruct your bank, broker or other nominee to transfer at least 5 of your shares of our common stock electronically through the Direct Registration System from your brokerage account to a new book-entry account at the Administrator. Please contact your bank, broker or other nominee for more information. Once at least 5 of your shares of our common stock are moved from your brokerage account to a new book-entry account registered in your name with the Administrator, you may then participate in the Plan by enrolling in the Plan as set forth above. Alternatively, you may instruct your bank, broker or other nominee to arrange to have a paper stock certificate issued to you for at least 5 of your shares of our common stock. Once at least 5 shares are registered in your name, you may participate in the Plan by enrolling in the Plan as set forth above. If the shares that you hold are in certificated form, you can deposit these certificated shares in your Plan account for safekeeping. In each instance, any fees or charges assessed by your bank or broker are your responsibility and will not be paid by us.
- If your shares are held through our retirement plans or any of our other employee benefit plans (each, an "employee benefit plan") that participate in the Plan, your participation in the Plan will be through the administrator or trustee of the applicable employee benefit plan and you will be limited to the automatic dividend reinvestment feature of the Plan only. Please contact the administrator or trustee of the employee benefit plan to determine if the plan participates in the Plan. Your participation in the Plan will be subject to the terms and conditions of the applicable employee benefit plan and the administrator or trustee of such plan.

If you do not own any shares of our common stock, or if you wish to establish a separate account, you can go to the Administrator's website, *www.computershare.com/investor*, and follow the instructions provided. You may enroll in the Plan by authorizing a one-time online bank debit from your U.S. bank account for an initial investment of at least $500 or by establishing recurring automatic withdrawals from your U.S. bank account for a minimum of $50 per transaction for at least ten consecutive months. Automatic withdrawal is further described in the "Optional Cash Investments" section of this prospectus. You can also fill out the Initial Enrollment Form and return it to the Administrator. Enclose a check, in U.S. dollars, for at least $500 or, if you are an employee of Aqua America and wish to pay for your purchases through the withholding of compensation, fill out the Employee Enrollment Form provided to you by the Company. You can receive an Initial Enrollment Form by contacting the Administrator through the channels outlined in the "Administration" section of this prospectus. If you wish to make your initial investment through automatic withdrawals, you must agree to continue with the withdrawals until the $500 minimum initial investment is reached. Please note, such automatic withdrawals continue indefinitely beyond the initial investment until you notify the Administrator through the Internet, by telephone or in writing to stop such automatic withdrawals.

If you open an account for another person by transferring stock from your account, you must transfer a minimum of 5 shares into that account.

## DIVIDEND REINVESTMENT

You may choose to reinvest all or a portion of the dividends paid on your first 100,000 shares of our common stock held in your Plan account or participating in the Plan through our employee benefit plans. Your dividends will be used to buy additional shares of our common stock at a discount between 0% and 5.0%, as designated from time to time by us prior to the purchase of the shares with the reinvested dividends, from the prevailing market price. You have the following options for your dividends:

- *Full Dividend Reinvestment*. Your cash dividends received on shares you own up to 100,000 shares will be used to buy additional shares for you.
- *Partial Dividends Paid in Cash*. If you do not want full dividend reinvestment, select a lower number of full shares on which you want your dividends to be paid in cash. The balance of your dividends will be reinvested.
- *All Dividends Paid in Cash (no dividend reinvestment)*. Your dividends on all of your shares will be paid in cash.

If you do not indicate which reinvestment option you want on the enrollment form, you will be automatically enrolled in full dividend reinvestment.

You may change your reinvestment option at any time by completing and returning a new Enrollment Form (which can be obtained by contacting the Administrator), by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or by providing written instructions to the Administrator. Dividends will be reinvested or paid on cash in accordance with your most recent instructions received by the Administrator prior to the dividend record date applicable to such dividend.

The 100,000 share reinvestment limitation does not apply to our employee benefit plans.

## ELECTRONIC DEPOSIT OF CASH DIVIDENDS

If you are receiving all or a portion of your dividends in cash, you may have them electronically deposited into your U.S. bank account by completing an Authorization for Electronic Direct Deposit Form or by mailing a voided check or deposit slip to the Administrator. Contact the Administrator to receive an Authorization for Electronic Direct Deposit Form. You may also authorize electronic deposit through the Internet at the Administrator's web site, *www.computershare.com/investor*. This feature may be changed or discontinued at any time by notifying the Administrator. If you change your U.S. bank account and fail to notify the Administrator of the change, a check for your dividends will be issued and mailed only after the funds have been returned from the receiving bank.

## OPTIONAL CASH INVESTMENTS

Participants in the Plan may buy additional shares of our common stock at any time by investing at least $50. Your total optional cash investment may not exceed $250,000 in a calendar year. Interest will not be paid on amounts held pending investment. Optional cash investments may be made by:

- *One-time online bank debit*. At any time, you may make optional cash investments by going to the Administrator's web site, *www.computershare.com/investor*, and authorizing a one-time online bank debit from your U.S. bank account. Please refer to the online confirmation for your bank account debit date and investment date.

- *Check*. Mail your check with the cash investment form from the bottom of your account statement to the address on the cash investment form. Do not send cash, traveler's checks, money orders or third party checks. All checks should be in U.S. funds and drawn from a U.S. bank. All payments should be made payable to "Computershare-Aqua America".
- *Recurring automatic withdrawals from a U.S. bank account*. You can establish recurring automatic withdrawals through the Internet at the Administrator's web site, *www.computershare.com/investor*, or by filling out a Direct Debit Authorization Form for automatic withdrawals. You can receive a Direct Debit Authorization Form by contacting the Administrator through the channels outlined in the "Administration" section of this prospectus. All automatic withdrawal enrollment information must be received at least 30 days prior to the first debit date. Funds will be deducted from your bank account on the first business day of each month. These funds may be commingled with other optional cash investments. All funds automatically withdrawn from your bank account will be invested on the next optional cash investment date. Automatic withdrawals will continue at the level you set until you instruct the Administrator otherwise. You can change or stop automatic withdrawals by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314, by completing and returning a new Direct Debit Authorization Form or by giving written instructions to the Administrator. You must contact the Administrator at least 7 business days prior to the debit date to change or terminate automatic withdrawal.
- In the event that a one-time bank debit, check or an automatic withdrawal is not honored for any reason, the Administrator will consider the request for investment of that money null and void and shall immediately remove from the participant's account the shares, if any, purchased upon the prior credit of such money. A fee of $25 will also be assessed against the participant's account. The Administrator will then be entitled to sell those shares to satisfy any uncollected balance. If the net proceeds of the sale of those shares are insufficient to satisfy the balance of such uncollected amounts, the Administrator will be entitled to sell additional shares from the participant's account to satisfy the uncollected balance. Employees of Aqua America who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company.

## PURCHASE AND SOURCE OF SHARES

Shares of our common stock needed to meet the requirements of the Plan will either be purchased in the open market or issued directly by us. We will pay transaction fees and per share fees (which will include any brokerage commissions the Administrator is required to pay) incurred for the purchase of shares. The Administrator will invest your funds for the optional cash investments as promptly as practicable, at least once each week. However, funds automatically withdrawn from your U.S. bank account will be invested as specified above in "Optional Cash Investments – By automatic recurring withdrawals from a U.S. bank account." Funds may not be returned once they have been submitted to the Administrator. In the unlikely event that, due to unusual market conditions, the Administrator is unable to purchase shares of our common stock within 30 days (in the case of reinvested dividends) or within 35 days after receipt (in the case of cash investments), the funds will be returned to you by check. No interest will be paid on funds held by the Administrator pending investment. All dividends will be invested independently from optional cash investments. Please note that you will not be able to direct the Administrator to purchase shares at a specific time or at a specific price or through a specific broker or dealer.

## PRICE OF SHARES

Open market purchases for initial, optional and IRA investments will be at a price equal to 100% of the weighted average per share price of shares purchased by the Administrator to satisfy Plan requirements. If the

Administrator purchases shares to meet the dividend reinvestment requirement in the open market, your price per share will be 95% to 100% of the weighted average price of shares purchased, as designated from time to time by us prior to the purchase of the shares with the reinvested dividends. We will pay all transaction fees and per share fees in connection with open market purchases.

For original issue or treasury shares purchased from Aqua America for initial, optional and IRA investments (including investments made by employees through compensation withholding), the price per share will be 100% of the average of the daily high and low trading prices quoted on The New York Stock Exchange on the day of purchase (the investment date).

For original issue or treasury shares purchased from Aqua America to meet the dividend reinvestment requirement under the Plan, the price per share will be 95% to 100% of the average of the daily high and low trading prices quoted on The New York Stock Exchange for the five trading days preceding the dividend payment date, as designated from time to time by us prior to the dividend payment date.

The discount between 0% and 5.0% on the shares purchased or issued to meet the dividend reinvestment requirement will be designated by us in our sole discretion prior to the purchase or issuance of such shares. We reserve the right to change, reduce or discontinue any discount at any time without notice. We will provide the Administrator with notice of the applicable discount and any change in such discount. Please contact the Administrator with any questions about the discount then in effect. We may also provide notice on our website, but have no obligation to do so. As of the date of this prospectus, the discount is 5.0%.

## SALE OF SHARES

You can sell some or all of the shares held in your Plan account by contacting the Administrator. You have choices when making a sale, depending on how you submit your sale request, as follows:

- *Market Order*: A market order is a request to sell shares promptly at the current market price. Market order sales are only available at *www.computershare.com/investor* through Investor Centre or by calling the Administrator directly at 1-800-205-8314. Market order sale requests received at *www.computershare.com/investor* through Investor Centre or by telephone will be placed promptly upon receipt during market hours (normally 9:30 a.m. to 4:00 p.m. Eastern time). Any orders received after 4:00 p.m. Eastern time will be placed promptly on the next day the market is open. The price shall be the market price of the sale obtained by the Administrator’s broker, less applicable fees. The Administrator will use commercially reasonable efforts to honor requests by participants to cancel market orders placed outside of market hours. Depending on the number of shares being sold and current trading volume in the shares, a market order may only be partially filled or not filled at all on the trading day in which it is placed, in which case the order, or remainder of the order, as applicable, will be cancelled at the end of such day. To determine if your shares were sold, you should check your account online at *www.computershare.com/investor* or call the Administrator directly at 1-800-205-8314. If your market order sale was not filled and you still want the shares to be sold, you will need to re-enter the sale request. For a market order sale, you will be charged a transaction fee of $25, plus $0.12 per share.
- *Batch Order*: A batch order is an accumulation of all sales requests for a security submitted together as a collective request. Batch orders are submitted on each market day, assuming there are sale requests to be processed. Sale instructions for batch orders received by the Administrator will be processed no later than five business days after the date on which the order is received (except where deferral is required under applicable federal or state laws or regulations), assuming the applicable market is open for trading and sufficient market liquidity exists. Batch order sales may only be submitted in writing. All sales requests received in writing will be submitted as batch order sales, including sale requests for IRA Plan accounts and Coverdell Education Savings Accounts, will be submitted as batch order sale.

The Administrator will cause your shares to be sold on the open market within five business days of receipt of your request. To maximize cost savings for batch order sale requests, the Administrator will seek to sell shares in round lot transactions. For this purpose the Administrator may combine each selling Plan participant's shares with those of other selling Plan participants. In every case of a batch order sale, the price to each selling Plan, participant shall be the weighted average sale price obtained by the Administrator's broker for each aggregate order placed by the Administrator and executed by the broker, less applicable fees. For a batch order sale, you will be charged a transaction fee of $15, plus $0.12 per share.

- *Day Limit Order*: A day limit order is an order to sell shares of our common stock when and if they reach a specific trading price on a specific day. The order is automatically cancelled if the price is not met by the end of that day (or, for orders placed aftermarket hours, the next day the market is open). Depending on the number of shares of our common stock being sold and the current trading volume in the shares, such an order may only be partially filled, in which case the remainder of the order will be cancelled. The order may be cancelled by the applicable stock exchange, by the Administrator at its sole discretion or, if the Administrator's broker has not filled the order, at your request made online at *www.computershare.com/investor* or by calling the Administrator directly at 1-800-205-8314. For a day limit order sale, you will be charged a transaction fee of $25, plus $0.12 per share.
- *Good-Till-Cancelled ("GTC") Limit Order*: A GTC limit order is an order to sell shares of our common stock when and if the shares reach a specific trading price at any time while the order remains open (generally up to 30 days). Depending on the number of shares being sold and current trading volume in the shares, sales may be executed in multiple transactions and over more than one day. If shares are traded on more than one day, a separate fee will be charged for each such day. The order (or any unexecuted portion thereof) is automatically cancelled if the trading price is not met by the end of the order period. The order may be cancelled by the applicable stock exchange, by the Administrator at its sole discretion or, if the Administrator's broker has not filled the order, at your request made online at *www.computershare.com/investor* or by calling the Administrator directly at 1-800-205-8314. For a GTC limit order sale, you will be charged a transaction fee of $25, plus $0.12 per share

General: All sales requests processed over the telephone by a customer service representative entail an additional fee of $15.00. All per share fees include any brokerage commissions the Administrator is required to pay. Any fractional share will be rounded up to a whole share for purposes of calculating the per share fee. Fees are deducted from the proceeds derived from the sale. The Administrator may, under certain circumstances, require a transaction request to be submitted in writing. Please contact the Administrator to determine if there are any limitations applicable to your particular sale request. Proceeds are normally paid by check, which are distributed within 24 hours of after your sale transaction has settled.

The Administrator reserves the right to decline to process a sale if it determines, in its sole discretion, that supporting legal documentation is required. In addition, no one will have any authority or power to direct the time or price at which shares for the Plan are sold, and no one, other than the Administrator, will select the broker(s) or dealer(s) through or from whom sales are to be made.

If you elect to sell shares online at *www.computershare.com/investor*, you may utilize the Administrator's international currency exchange service to convert the sale proceeds to your local currency prior to being sent to you. Receiving sales proceeds in a local currency and having your check drawn on a local bank avoids the timely and costly "collection" process required for cashing U.S. dollar checks. This service is subject to additional terms and conditions and fees, which you must agree to online. We are not responsible for any costs or fees associated with your use of this service.

If your holdings in any account fall below 5 shares, the Administrator may close that account out of the Plan as described in the "Minimum Account" section of this prospectus.

## INDIVIDUAL RETIREMENT ACCOUNTS ("IRA")

You may establish a Traditional IRA, Roth IRA or Coverdell Education Savings Account of our common stock by returning completed Enrollment Forms together with your contribution to the IRA and Coverdell Education Savings Account Trustee. If you are already a shareholder of at least 5 shares, you may open an IRA or Coverdell Education Savings Account with as little as $50. If you are not a shareholder, the minimum contribution to open an account is $500.

You may also open an IRA or Coverdell Education Savings Account to receive a cash rollover or a transfer of Aqua America shares from another IRA or qualified retirement plan. The IRA and Coverdell Savings Account Trustee will invest the cash rollovers into shares of our common stock.

There is an annual maintenance fee of $45.00 charged by the IRA and Coverdell Education Savings Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty- five dollars ($25.00) of this annual fee will be charged to you, with the balance paid by us.

IRA and Coverdell Education Savings Account contributions and rollovers will not count against the $250,000 maximum investment limit under the Plan.

If you are interested in opening a Traditional IRA, Roth IRA or Coverdell Education Savings Account, you may obtain the enrollment and a disclosure statement from Computershare Trust Company, N.A., which will administer the IRA and Coverdell Education Savings Account. For information, call the Computershare IRA Department at its toll-free number, 1-800-597-7736.

## SAFEKEEPING OF CERTIFICATES AND BOOK ENTRY

For your convenience, shares purchased under the Plan will be maintained by the Administrator in your name in book-entry form. You may, however, request a stock certificate by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or by providing written instructions to the Administrator. There is a $25 fee for certificate issuance.

If you are holding certificates for Aqua America, Inc., or previously named Philadelphia Suburban Corporation common stock, you may use the Plan's "safekeeping" service to deposit those stock certificates at no cost. Safekeeping protects your shares against loss, theft or accidental destruction and provides a convenient way for you to keep track of your shares. Only shares held in safekeeping or in book-entry form may be sold through the Plan.

To use the safekeeping service, send your certificates to the Administrator at the address listed on page 6 of this prospectus by registered or certified mail, with a return receipt requested or some other form of traceable mail, and properly insured. **YOU SHOULD NOT ENDORSE THE STOCK CERTIFICATE BEFORE YOU SEND IT IN.**

## TRACKING YOUR INVESTMENT

The Administrator will send a statement confirming the details of each transaction you make. For market order transactions, the time of sale will be provided. If you continue to be enrolled in the Plan, but have no transactions, the Administrator will mail you an annual statement reflecting your holdings. For shares acquired in the Plan after January 1, 2011, specific cost basis information will be included in your statement in accordance with applicable law.

You should notify the Administrator promptly of any change in address since all notices, statements and reports will be mailed to your address of record.

Please retain your statements to establish the cost basis of shares purchased under the Plan for income tax and other purposes. A $20 flat fee per year requested will be charged for all prior year duplicate statement requests.

You may also view year-to-date transaction activity in your Plan account for the current year, as well as activity in prior years, by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*.

## OBTAINING A STOCK CERTIFICATE

To obtain a stock certificate for all or a portion of your full shares, you can contact the Administrator by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314, by making a written request of the Administrator or by completing the transaction form at the bottom of your statement and submitting it to the Administrator. There is a $25 fee for certificate issuance. No fractional shares of common stock will be issued; instead, the then-current market value of any fractional share sold, less any transaction fees and per share fees, will be paid in cash.

If you want the certificate issued in a name other than your Plan account registration, the Administrator may require you to have your signature guaranteed by a financial institution in the Medallion Guarantee program.

## TRANSFERS

You may transfer or give our common stock to anyone you choose by:

- Making an initial $500 cash investment to establish a new account in the recipient's name; or
- Making an optional cash investment on behalf of an existing shareholder in the Plan in an amount not less than $50 nor more than $250,000 in one calendar year; or
- Transferring at least 5 shares from your account to the recipient.

If you would like transfer instructions please visit the Administrator's Transfer Wizard at www.computershare.com/transferwizard. The Transfer Wizard will guide you through the transfer process, assist you in completing the transfer form, and identify other necessary documentation you may need to provide.

## DIVIDEND PAYMENT AND RECORD DATES

Normal dividend payment dates are expected to be on the first day of March, June, September and December. The record date usually precedes the dividend payment date by 10 business days.

In order to be the owner of record and eligible to receive the quarterly dividend, your shares must have been purchased and the transaction settled three trading days prior to the record date (the ex-dividend date). We can give no guarantee whatsoever that we will declare dividends in the future.

## TERMINATION OF PARTICIPATION

If you wish to stop reinvesting your dividends or to stop automatic monthly investments, please use the transaction form attached to your statement or contact the Administrator by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or by providing written instructions to the Administrator.

In the event you have been reinvesting your dividends and your notice of termination is received by the Administrator near a record date for a dividend payment, the Administrator, in its sole discretion, may either distribute that dividend in cash or reinvest it in shares on your behalf. In the event the dividend is reinvested, the Administrator will process your withdrawal from the Plan as soon as practicable, but in no event later than five business days after the purchase is completed.

## MINIMUM ACCOUNT

After you have made your initial contribution of $500 by automatic withdrawals, check or one-time online bank debit, or had at least 5 shares transferred into an account registered in your name under the Plan, you must, at all times you are enrolled in the Plan, keep a minimum number of 5 shares of our common stock in your account. If you keep less than 5 shares in your account, the Administrator will code the account for future dividends to be paid in cash.

## COSTS

We pay for all transaction fees and per share fees (which include any brokerage commissions the Administrator is required to pay) associated with the reinvestment of dividends and the making of optional cash investments.

For each batch order sale of whole shares from your Plan account, you will be charged a $15.00 transaction fee and a per share fee of $0.12.

For each market order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

For each limit order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

For each GTC limit order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

All sales requests processed over the telephone by a customer service representative entail an additional fee of $15.00.

There is an annual maintenance fee of $45.00 charged by the IRA and Coverdell Education Savings Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty-five dollars ($25.00) of this annual fee will be charged to you, with the balance of the annual fee paid by us. Fees are collected by the Administrator from your account.

## TAXES

All dividends paid to you – whether or not they are reinvested – are considered taxable income to you in the year they are paid. The total amount will be reported to you, and to the Internal Revenue Service, shortly after the close of each year. If you are reinvesting your dividends, the value of the applicable discount from the purchase price of the shares (the calculated fair market value) will also be reported as taxable income.

If you are an employee of Aqua America and are paying for shares by having compensation withheld, the amounts withheld will be subject to taxation as ordinary income on the same basis as the portion of your compensation that is not withheld.

All shares of stock that are sold through the Administrator will also be reported to the IRS as required by law. Any profit or loss you incur should be reflected when you file your income tax returns.

In addition, the Internal Revenue Service may require that any per share fees (which include any brokerage commissions the Administrator is required to pay incurred in the purchase of shares and paid by us on your behalf be treated as dividend income to you, in which case such amounts can be included in your cost basis of shares purchased.

Be sure to keep your statements of account for income tax purposes. A fee of $20.00 per year requested may be incurred to furnish historical information. If you have questions about the tax basis of any transactions, please consult your own tax advisor.

## VOTING

We will forward to you, either electronically or by mail based on your preference, a proxy for shares of our common stock for which you hold certificates and shares of our common stock credited to your Plan account. The Administrator shall not vote shares of our common stock that it holds for your Plan account except as directed by you.

## HANDLING OF STOCK SPLITS AND OTHER DISTRIBUTIONS

In the event we issue a stock dividend or declare a stock split, your Plan account will be adjusted to reflect the receipt of shares paid or distributed. Any stock dividend or stock split shares of our common stock issued with respect to both certificated and book-entry (whole and fractional) shares will be credited automatically to your Plan account in book-entry form.

In the event of a stock subscription or other offering of rights to shareholders, your rights will be based on your total registered holdings (the shares held in the Plan and outside of the Plan). A single set of materials will be distributed that will allow you to exercise your rights.

## CHANGES TO THE PLAN

We may add to or modify the Plan at any time. Similarly, we may, at any time, waive, suspend or terminate the Plan, or any provision of the Plan. We will send you written notice of any significant changes, suspensions or termination. The current prospectus is filed with the SEC and available on our website *at http://ir.aquaamerica.com/divreinvest.cfm* and modifications to the Plan will be reflected in an updated prospectus on our website.

Any modification made to, or waiver, suspension or termination of, the Plan will apply to a participant's holdings in the Plan at the time the modification, waiver, suspension or termination becomes effective and to transactions occurring thereafter, regardless of when or how the shares were acquired. However, any modification, waiver, suspension or termination of the Plan will not affect your rights as a shareholder in any way, and any book-entry shares you own will continue to be credited to your account with the Administrator unless you specifically request otherwise.

We and the Administrator reserve the right to change any administrative procedure of the Plan.

## INTERPRETATION OF THE PLAN

We may interpret and regulate the Plan as deemed necessary or desirable in connection with the operation of the Plan and resolve questions or ambiguities concerning the various provisions of the Plan.

## RESPONSIBILITIES OF AQUA AMERICA AND THE ADMINISTRATOR

Neither we nor the Administrator shall be liable for any act performed in good-faith or for any good-faith omission to act, including, without limitation, any claims or liability: (a) for failure to terminate your account upon your death prior to receiving written notice of such death or (b) with respect to the prices at which shares of our common stock are purchased or sold for your Plan account and the times when such purchases or sales are made or (c) for any fluctuation in the market value after purchases or sale of shares of our common stock.

Neither we nor the Administrator can assure you a profit or protect you against a loss on the shares you purchase under the Plan.

## USE OF PROCEEDS

The proceeds from the sale of newly-issued or treasury shares offered by us will be used for general corporate purposes. All other shares of common stock acquired under the Plan will be purchased in the open market, not from us, and we will not receive any proceeds from such purchases.

## EXPERTS

The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting), incorporated in this prospectus by reference to our Annual Report on Form 10-K for the year ended December 31, 2016, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

Ballard Spahr LLP, our outside counsel, has given its opinion regarding the validity of the common stock covered by this prospectus.

## ANTIDILUTION PROVISION

The aggregate number of shares of common stock registered for issuance and purchase under the Plan, as provided in the Registration Statement, of which this prospectus forms a part, the maximum number of shares that may be purchased by a participant and the calculation of the purchase price per share may be appropriately adjusted by us to reflect any increase or decrease in the number of issued shares of common stock resulting from a subdivision or consolidation of shares or other capital adjustment, or the payment of a stock dividend, or other increase or decrease in such shares, if effected without receipt of consideration by us.

## WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's public reference room at 100 F Street N.E., Washington, D.C. 20549. Copies of such materials can be obtained by mail at prescribed rates from the public reference room. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. You may also obtain our SEC filings from the SEC's web site at www.sec.gov or from our web site at *http://ir.aquaamerica.com/*.

This prospectus is part of a Registration Statement on Form S-3 that we filed with the SEC to register the stock offered under the Plan. As allowed by SEC rules, this prospectus does not contain all information you can find in the Registration Statement or the exhibits to the Registration Statement. The SEC allows us to "incorporate by reference" information into this prospectus, which means that we can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be part of this prospectus and later information filed with the SEC will update and supersede this information. Any statement so updated or superseded shall not be deemed, except as so updated or superseded, to constitute a part of this prospectus. We incorporate by reference the documents listed below and any future filings made with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, until our offering is completed.

- Our Annual Report on Form 10-K for the year ended December 31, 2016, including portions of our definitive Proxy Statement for our 2016 Annual Meeting of Shareholders incorporated therein by reference;
- Our Quarterly Report on Form 10-Q for the quarter ended March 31, 2017;
- Our Current Reports on Form 8-K filed with the SEC on May 5, 2017 and June 29, 2017; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

You may request a copy of any documents that we incorporate by reference at no cost by telephoning 1-610-527-8000 or writing us at the following address:

Aqua America, Inc.
Investor Relations
762 W. Lancaster Avenue
Bryn Mawr, PA 19010

You should rely only on the information contained or incorporated by reference into this prospectus. We have authorized no one to provide you with different information. You should not assume that the information in the prospectus or incorporated by reference into this prospectus is accurate as of any date other than the date on the front of this prospectus or the date of those documents. Our business, financial condition, results of operations and prospects may have changed since those dates.

## PART II

## INFORMATION NOT REQUIRED IN PROSPECTUS

### ITEM 14. Other Expenses of Issuance and Distribution.

The following table sets forth an estimate of the costs and expenses payable by the Registrant in connection with the offering described in this registration statement. All of the amounts shown are estimates except the Securities and Exchange Commission registration fee.

| | |
|---|---|
| Securities and Exchange Commission registration fee | $23,115 |
| Printing and Engraving | 5,000 |
| Accounting fees and expenses | 12,000 |
| Legal fees and expenses | 12,000 |
| Miscellaneous | 2,885 |
| Total | $55,000 |

### ITEM 15. Indemnification of Directors and Officers.

The Registrant is a Pennsylvania corporation. Sections 1741 and 1742 of the Pennsylvania Business Corporation Law of 1988, as amended (the "PBCL"), provide that, unless otherwise restricted in its bylaws, a business corporation may indemnify directors and officers against liabilities they may incur as such, provided that the particular person acted in good faith and in a manner he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal proceeding, had no reasonable cause to believe his or her conduct was unlawful. In general, the power to indemnify under these sections does not exist in the case of actions against a director or officer by or in the right of the corporation if the person otherwise entitled to indemnification shall have been adjudged to be liable to the corporation unless it is judicially determined that, despite the adjudication of liability, but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnification for specified expenses. Section 1743 of the PBCL requires a business corporation to indemnify directors and officers against expenses they may incur in defending actions against them in such capacities if they are successful on the merits or otherwise in the defense of such actions.

Section 1713 of the PBCL permits the shareholders to adopt a bylaw provision relieving a director (but not an officer) of personal liability for monetary damages except where (i) the director has breached the applicable standard of care, and (ii) such conduct constitutes self-dealing, willful misconduct or recklessness. This Section also provides that a director may not be relieved of liability for the payment of taxes pursuant to any federal, state or local law or of liability or responsibility under a criminal statute. Section 4.01 of the Registrant's bylaws limits the liability of any director of the Registrant to the fullest extent permitted by Section 1713 of the PBCL.

Section 1746 of the PBCL grants a corporation broad authority to indemnify its directors, officers and other agents for liabilities and expenses incurred in such capacity, except in circumstances where the act or failure to act giving rise to the claim for indemnification is determined by a court to have constituted willful misconduct or recklessness. Article VII of the Registrant's bylaws provides indemnification of directors, officers and other agents of the Registrant, which is broader than the indemnification permitted by Section 1741 of the PBCL and pursuant to the authority of Section 1746 of the PBCL.

Article VII of the Registrant's bylaws provides, except as expressly prohibited by law, an unconditional right to indemnification for expenses and any liability paid or incurred by any director or officer of the Registrant, or any other person designated by the board of directors as an indemnified representative, in connection with any actual or threatened claim, action, suit or proceeding (including derivative suits) in which he or she may be involved by reason of being or having been a director, officer, employee or agent of the Registrant or, at the request of the Registrant, of another corporation, partnership, joint venture, trust, employee benefit plan or other entity. The bylaws specifically authorize indemnification against both judgments and amounts paid in settlement of derivative suits, unlike Section 1742 of the PBCL which authorizes indemnification only of expenses incurred in defending and in settlement of a derivative action. In addition, Article VII of the bylaws also allows indemnification for punitive damages and liabilities incurred under the federal securities laws.

Unlike the provisions of PBCL Sections 1741 and 1742, Article VII does not require the Registrant to determine the availability of indemnification by the procedures or the standard of conduct specified in Sections 1741 or 1742 of the PBCL. A person who has incurred an indemnifiable expense or liability has a right to be indemnified independent of any procedures or determinations that would otherwise be required, and that right is enforceable against the Registrant as long as indemnification is not prohibited by law. To the extent indemnification is permitted only for a portion of a liability, the bylaw provisions require the Registrant to indemnify such portion. If the indemnification provided for in Article VII is unavailable for any reason in respect of any liability or portion thereof, the bylaws require the Registrant to make a contribution toward the liability. Indemnification rights under the bylaws do not depend upon the approval of any future board of directors.

Section 7.04 of the Registrant's bylaws also authorizes the Registrant to further effect or secure its indemnification obligations by entering into indemnification agreements, maintaining insurance, creating a trust fund, granting a security interest in its assets or property, establishing a letter of credit, or using any other means that may be available from time to time. Section 1747 of the PBCL also enables a business corporation to purchase and maintain insurance on behalf of a person who is or was serving as a representative of the corporation or is or was serving at the request of the corporation as a representative of another entity against any liability asserted against that representative in his capacity as such, whether or not the corporation would have the power to indemnify him against that liability under the PBCL. The Registrant maintains, on behalf of its directors and officers, insurance protection against certain liabilities arising out of the discharge of their duties, as well as insurance covering the Registrant for indemnification payments made to its directors and officers for certain liabilities. The premiums for such insurance are paid by the Registrant.

**ITEM 16. Exhibits.**

A list of exhibits filed herewith or incorporated by reference is contained in the Exhibit Index to this prospectus, which is incorporated herein by reference.

**ITEM 17. Undertakings.**

The undersigned Registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement.

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

*Provided, however*, that paragraphs (1)(i), (1)(ii) and (1)(iii) of this section do not apply if the registration statement is on Form S-3 and the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Commission by the registrant pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the registration statement, or is contained in a form of prospectus filed pursuant to Rule 424(b) that is part of the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser:

(A) Each prospectus filed by the Registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement; and

(B) Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5), or (b)(7) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to Rule 415(a)(1)(i), (vii), or (x) for the purpose of providing the information required by section 10(a) of the Securities Act of 1933 shall be deemed to be part of and included in the registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of the registration statement relating to the securities in the registration statement to which that prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such effective date, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such effective date; or

(5) That, for the purpose of determining liability of the Registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities:

The undersigned Registrant undertakes that in a primary offering of securities of the undersigned Registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned Registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

(i) Any preliminary prospectus or prospectus of the undersigned Registrant relating to the offering required to be filed pursuant to Rule 424;

(ii) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned Registrant or used or referred to by the undersigned Registrant;

(iii) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned Registrant; and

(iv) Any other communication that is an offer in the offering made by the undersigned Registrant to the purchaser.

The undersigned Registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the Registrant's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the Registration Statement shall be deemed to be a new Registration Statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

## SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form S-3 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Bryn Mawr, Commonwealth of Pennsylvania, on the 28th day of July, 2017.

## POWER OF ATTORNEY

Each person whose signature appears below hereby appoints David P. Smeltzer, Chief Financial Officer of Registrant, and Christopher P. Luning, Senior Vice President, General Counsel and Corporate Secretary of Registrant, and each of them acting individually, as his or her true and lawful attorneys-in-fact, with full power of substitution and resubstitution, with the authority to execute in the name of each such person, and to file with the Securities and Exchange Commission, together with any exhibits thereto and other documents therewith, any and all amendments to this registration statement (including post-effective amendments and all other related documents) necessary or advisable to enable the registrant to comply with the Securities Act of 1933, and any rules, regulations and requirements of the Securities and Exchange Commission in respect thereof, which amendments may make such changes in the registration statement as the aforesaid attorney-in-fact executing the same deems appropriate.

Pursuant to the requirements of the Securities Act of 1933, as amended, this registration statement has been signed below by the following persons on behalf of the Registrant and in the capacities indicated, as of July 28, 2017.

RE: Aqua America, Inc.—Registration Statement on Form S-3, Filed on July 28, 2017, relating to the Aqua America, Inc. Dividend Reinvestment and Direct Stock Purchase Plan

Ladies and Gentlemen:

We have acted as counsel to Aqua America, Inc., a Pennsylvania corporation (the "Company"), in connection with the filing of the referenced Registration Statement (the "Registration Statement") under the Securities Act of 1933, as amended (the "Act"), with the Securities and Exchange Commission (the "SEC"). The Registration Statement relates to the proposed offering and sale of up to 6,000,000 shares of common stock, par value $0.50 per share, of the Company (the "Shares") pursuant to the Company's Dividend Reinvestment and Direct Stock Purchase Plan (the "Plan").

In connection with this opinion, we have examined the Registration Statement and originals, or copies certified or otherwise identified to our satisfaction, of the Company's Amended and Restated Articles of Incorporation, the Company's Amended and Restated Bylaws, resolutions adopted by the Company's Board of Directors on July 25, 2017, the Plan as described in the prospectus, and such other documents, records and other instruments as we have deemed appropriate for purposes of the opinion set forth herein.

We have assumed the genuineness of all signatures, the legal capacity of all natural persons, the authenticity of the documents submitted to us as originals, the conformity with the originals of all documents submitted to us as certified, facsimile or photostatic copies and the authenticity of the originals of all documents submitted to us as copies.

Based upon the foregoing, we are of the opinion that the Shares (i) have been duly authorized by the Company and, (ii) when issued and sold by the Company and delivered by the Company against receipt of the purchase price therefor, in the manner contemplated by the Registration Statement, will be validly issued, fully paid and non-assessable.

The opinions expressed herein are limited to the laws of the Commonwealth of Pennsylvania.

We hereby consent to the use of this opinion as Exhibit 5 to the Registration Statement and to the reference to us under the caption "Experts" in the prospectus included in the Registration Statement. In giving such consent, we do not hereby admit that we are acting within the category of persons whose consent is required under Section 7 of the Act or the rules or regulations of the SEC thereunder.

Very truly yours,

/s/ Ballard Spahr LLP

EXHIBIT 23.2

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We hereby consent to the incorporation by reference in this Registration Statement on Form S-3 of our report dated February 24, 2017 relating to the financial statements and the effectiveness of internal control over financial reporting, which appears in Aqua America Inc.'s Annual Report on Form 10-K for the year ended December 31, 2016. We also consent to the reference to us under the heading "Experts" in such Registration Statement.

**FILING REQUIREMENTS**

**G. Rate of Return**

RR6. Provide AFUDC charged by company at historic test year-end and latest date, explain method by which rate was calculated and provide workpaper showing derivation of the company's current AFUDC rate.

A. AFUDC is $10,107,463 for the twelve months ended March 31, 2018. The Company utilizes the short-term debt rate for cost of capital used during construction. However, when CWIP exceeds short-term debt, a blended rate reflecting both debt and equity is utilized. The current monthly AFUDC debt rate is 0.185121% and the current monthly AFUDC equity rate is 0.288667%.

**FIFTY-THIRD SUPPLEMENTAL**

**INDENTURE**

DATED AS OF JUNE 1, 2018

TO

INDENTURE OF MORTGAGE

DATED AS OF JANUARY 1, 1941

AQUA PENNSYLVANIA, INC.

TO

THE BANK OF NEW YORK MELLON TRUST COMPANY, N. A., as Trustee

---

SECTION 3. All cash deposited with the Trustee as part of any Maintenance or Improvement Deposit provided for in Section 1 of this Article, may, at the option of the Company, be applied to the purchase of bonds under the provisions of Section 2 of Article X of the Original Indenture or to the redemption of bonds under the provisions of Section 3 of Article X of the Original Indenture or may be withdrawn by the Company at any time to reimburse the Company for the cost of a Net Amount of Available Permanent Additions (excluding, however, from any such Available Permanent Additions all Permanent Additions included in any certificate delivered to the Trustee for the purpose of obtaining a credit against any Maintenance or Improvement Deposit provided for in Section 1 of this Article to the extent that such Permanent Additions have been used for any such credit). The Trustee shall pay to or upon the written order of the Company all or any part of such cash upon the receipt by the Trustee of:

(a) A Resolution requesting such payment; and

(b) The documents specified in paragraphs 2, 5, 6 and 7 of subdivision (B) of Section 3 of Article IV of the Original Indenture, with such modifications, additions and omissions as may be appropriate in the light of the purposes for which they are used.

## ARTICLE III.

### Covenants of the Company

SECTION 1. The Company hereby covenants and agrees with the Trustee, for the benefit of the Trustee and all the present and future holders of the Bonds, that the Company will pay the principal of and premium, if any, of and interest on all bonds issued or to be issued as aforesaid under and secured by the Original Indenture as hereby supplemented, as well as all bonds which may be hereafter issued in exchange or substitution therefor, and will perform and fulfill all of the terms, covenants and conditions of the Original Indenture and of this Fifty-third Supplemental Indenture with respect to the additional bonds to be issued under the Original Indenture as hereby supplemented.

SECTION 2. The Company covenants and agrees that so long as any of the Bonds are outstanding (a) the Company will not make any Stock Payment if, after giving effect thereto, its retained earnings, computed in accordance with generally accepted accounting principles consistently applied, will be less than the sum of (i) Excluded Earnings, if any, since December 31, 2017, and (ii) $20,000,000; (b) Stock Payments made more than forty (40) days after the commencement, and prior to the expiration, of any Restricted Period shall not exceed 65% of the Company's Net Income during such Restricted Period; and (c) the Company will not authorize a Stock Payment if there has occurred and is continuing an event of default under subsections (a) or (b) of Section 1 of Article XI of the Original Indenture.

For the purposes of this Section 2 the following terms shall have the following meanings:

"Capitalization" shall mean the sum of (i) the aggregate principal amount of all Debt at the time outstanding, (ii) the aggregate par or stated value of all capital stock of the Company of all classes at the time outstanding, (iii) premium on capital stock, (iv) capital surplus, and (v) retained earnings.

"Debt" means (i) all indebtedness, whether or not represented by bonds, debentures, notes or other securities, for the repayment of money borrowed, (ii) all deferred indebtedness for the payment of the purchase price of property or assets purchased (but Debt shall not be deemed to include customer advances for construction or any bonds issued under the Indenture which are not Outstanding Bonds), (iii) leases which have been or, in accordance with generally accepted accounting principles, should be recorded as capital leases and (iv) guarantees of the obligations of another of the nature described in clauses (i), (ii) or (iii) which have been or, in accordance with generally accepted accounting principles, should be recorded as debt.

"Determination Date" shall mean the last day of each calendar quarter. Any calculation with respect to any Determination Date shall be based on the Company's balance sheet as of such date.

"Excluded Earnings" shall mean 35% of the Company's Net Income during any Restricted Period.

"Net Income" for any particular Restricted Period shall mean the amount of net income properly attributable to the conduct of the business of the Company for such period, as determined in accordance with generally accepted accounting principles consistently applied, after payment of or provision for taxes on income for such period.

"Outstanding Bonds" shall mean bonds which are outstanding within the meaning indicated in Section 20 of Article I of the Original Indenture except that, in addition to the bonds referred to in clauses (a), (b) and (c) of said Section 20, said term shall not include bonds for the retirement of which sufficient funds have been deposited with the Trustee with irrevocable instructions to apply such funds to the retirement of such bonds at a specified time, which may be either the maturity thereof or a specified redemption date, whether or not notice of redemption shall have been given.

"Restricted Period" shall mean a period commencing on any Determination Date on which the total Debt of the Company is, or as the result of any Stock Payment then declared or set aside and to be made thereafter will be, more than 70% of Capitalization, and continuing until the third consecutive Determination Date on which the total Debt of the Company does not exceed 70% of Capitalization.

"Stock Payment" shall mean any payment in cash or property (other than stock of the Company) to any holder of shares of any class of capital stock of the Company as such holder, whether by dividend or upon the purchase, redemption, conversion or other acquisition of such shares, or otherwise.

SECTION 3. The Company covenants and agrees that so long as any of the Bonds are outstanding neither the Company nor any subsidiary of the Company will, directly or indirectly, lend or in any manner extend its credit to, or indemnify, or make any donation or capital contribution to, or purchase any security of, any corporation which directly or indirectly controls the Company, or any subsidiary or affiliate (other than an affiliate which is a subsidiary of the Company) of any such corporation.

IV 3 (f)

pany to permit the legal and valid issue and authentication and delivery of the bonds which have been applied for has been duly had and taken;

4. An Officers' Certificate, as herein defined, stating the aggregate principal amount of all bonds at the time outstanding under this Indenture, and, unless the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*) shall state that the amount of indebtedness or bonded indebtedness which may be incurred by the Company is not then limited by law or by corporate action, also stating that the total amount of indebtedness or bonded indebtedness of the Company outstanding, including the aggregate principal amount of bonds issued and outstanding, as herein defined, under this Indenture plus the aggregate principal amount of bonds applied for in the accompanying application, does not exceed an amount which shall be specified in the Certificate; — p. 264

5. The officially authenticated certificates or other documents, if any, specified in the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*), including evidence satisfactory to the Trustee of the payment or provision for payment of any taxes therein referred to;

6. If the bonds, the authentication and delivery of which are then applied for, are not a part of any series then existing, a Resolution or Resolutions and an indenture supplemental hereto, creating the series of which such bonds are a part.

Section 3. (*A*) Subject to the provisions of Section 2 of this Article bonds in addition to those provided for in any other Section hereof may from time to time be executed by the Company and delivered to the Trustee and shall be authenticated and delivered by the Trustee upon the basis of Available Permanent Additions, subject to the conditions, provisions and limitations set forth in this Section. The aggegate principal amount of bonds that may be authenticated and delivered from time to time under the provisions of this Section is limited to seventy per cent. (70%) of the Net Amount of Available Permanent Additions, made the basis of the authentication and delivery thereof certified or provided in subdivision (*B*) of this Section.

No bonds shall be authenticated and delivered under this Section unless the Net Earnings of the Company as shown by a Net Earnings Certificate for a period of twelve (12) consecutive calendar months within the fifteen (15) calendar months next preceding the application for authentication and delivery of bonds, shall have been not less than one and three-quarters (1¾) times the interest requirements for a period of one year upon (*a*) the bonds applied for, (*b*) all bonds outstanding, as herein defined, on the date of such application, and (*c*) all indebtedness outstanding on the date of such application which is secured by any lien for the payment of money or its equivalent prior to or on a parity with the lien of this Indenture other than Permitted Liens, as herein defined.

(*B*) No application by the Company to the Trustee for the authentication and delivery of bonds under this Section shall be granted by the Trustee, until the Trustee shall have received:

1. The documents provided for in Section 2 of this Article;

2. An Engineer's Certificate, as herein defined, dated not more than thirty (30) days preceding the

p. 263

## ARTICLE III.

### Covenants of the Company.

SECTION 1. The Company hereby covenants and agrees with the Trustee, for the benefit of the Trustee and all the present and future holders of the Bonds, that the Company will pay the principal of and premium, if any, and interest on all bonds issued or to be issued as aforesaid under and secured by the Original Indenture as hereby supplemented, as well as all bonds which may be hereafter issued in exchange or substitution therefor, and will perform and fulfill all of the terms, covenants and conditions of the Original Indenture and of this Twenty-Seventh Supplemental Indenture with respect to the additional bonds to be issued under the Original Indenture as hereby supplemented.

SECTION 2. The Company covenants and agrees that so long as any of the Bonds are outstanding (a) the Company will not make any Stock Payment if, after giving effect thereto, its retained earnings, computed in accordance with generally accepted accounting principles consistently applied, will be less than the sum of (i) Excluded Earnings, if any, since December 31, 1991, and (ii) $20,000,000; (b) Stock Payments made more than 40 days after the commencement, and prior to the expiration, of any Restricted Period shall not exceed 65% of the Company's Net Income during such Restricted Period; and (c) the Company will not authorize a Stock Payment if there has occurred and is continuing an event of default under subsections (a) and (b) of Section 1 of Article XI of the Original Indenture.

For the purposes of this Section 2 the following terms shall have the following meanings:

"Stock Payment" shall mean any payment in cash or property (other than stock of the Company) to any holder of shares of any class of capital stock of the Company as such holder, whether by dividend or upon the purchase, redemption, conversion or other acquisition of such shares, or otherwise.

"Excluded Earnings" shall mean 35% of the Company's Net Income during any Restricted Period.

"Restricted Period" shall mean a period commencing on any Determination Date on which the total Debt of the Company is, or as the result of any Stock Payment then declared or set aside and to be made thereafter will be, more than 70% of Capitalization, and continuing until the third consecutive Determination Date on which the total Debt of the Company does not exceed 70% of Capitalization.

"Net Income" for any particular Restricted Period shall mean the amount of net income properly attributable to the conduct of the business of the Company for such Period, as determined in accordance with generally accepted accounting principles consistently applied, after payment of or provision for taxes on income for such Period.

"Determination Date" shall mean the last day of each calendar quarter. Any calculation with respect to any Determination Date shall be based on the Company's balance sheet as of such date.

"Debt" means (i) all indebtedness, whether or not represented by bonds, debentures, notes or other securities, for the repayment of money borrowed, (ii) all deferred indebtedness for the payment of the purchase price of property or assets purchased (but Debt shall not be deemed to include Customer Advances for Construction or any bonds issued under the Indenture which are not Outstanding Bonds), (iii) leases which have been or, in accordance with generally accepted accounting principles, should be recorded as capital leases and (iv) guarantees of the obligations of another of the nature described in clauses (i), (ii) or (iii) which have been or, in accordance with generally accepted accounting principles, should be recorded as debt.

"Outstanding Bonds" shall mean bonds which are outstanding within the meaning indicated in Section 20 of Article I of the Original Indenture except that, in addition to the bonds referred to in clauses (a), (b) and (c) of said Section 20, said term shall not include bonds for the retirement of which sufficient funds have been deposited with the Trustee with irrevocable instructions to apply such funds to the retirement of such bonds at a specified time, which may be either the maturity thereof or a specified redemption date, whether or not notice of redemption shall have been given.

"Capitalization" shall mean the sum of (i) the aggregate principal amount of all Debt at the time outstanding, (ii) the aggregate par or stated value of all capital stock of the Company of all classes at the time outstanding, (iii) premium on capital stock, (iv) capital surplus, and (v) retained earnings.

SECTION 3. The Company covenants and agrees that so long as any of the Bonds are outstanding neither the Company nor any subsidiary of the Company will, directly or indirectly, lend or in any manner extend its credit to, or indemnify, or make any donation or capital contribution to, or purchase any security of, any corporation which directly or indirectly controls the Company, or any subsidiary or affiliate (other than an affiliate which is a subsidiary of the Company) of any such corporation.

# NOTE PURCHASE AGREEMENT

DATED AS OF NOVEMBER 3, 2016

Default or Event of Default would exist under the terms of this Agreement, and *provided, further,* that once a Subsidiary has been designated an Unrestricted Subsidiary, it shall not thereafter be redesignated as a Restricted Subsidiary on more than one occasion. Within ten days following any designation described above, the Company will deliver to each Purchaser a notice of such designation accompanied by a certificate signed by a Senior Financial Officer of the Company certifying compliance with all requirements of this **Section 9.6** and setting forth all information required in order to establish such compliance.

*Section 9.7. Subsidiary Guaranty.* (a) If at any time any Subsidiary of the Company shall become a co-obligor under, or guarantor of Debt outstanding under, any Material Credit Facility (a *"Subsidiary Guarantor"*), then concurrently with any such event the Subsidiary Guarantor shall execute and deliver to the holders of the Notes an unconditional guarantee of the Notes which shall be in form and substance satisfactory to the Required Holders, and (b) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Company pursuant to **Section 4** on the Closing Date or as the Required Holders shall have reasonably requested.

## SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

*Section 10.1. Limitation on Debt.* The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 65% of Consolidated Total Capitalization as of such date.

*Section 10.2. Limitation on Liens.* The Company will not, and will not permit any of its Restricted Subsidiaries to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any such Restricted Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided,* any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in

(xi) Investments in addition to the Investments permitted by the preceding clauses (i) through (x); *provided* that the aggregate principal amount of Investments outstanding pursuant to this clause (xi) shall not at any time exceed 25% of Consolidated Net Worth.

In valuing Investments for purposes of applying the limitations set forth in clause (xi) of this **Section 10.6**, such Investments shall be taken at the original cost thereof, without allowance for any subsequent write-offs or appreciation or depreciation therein, but less any amount repaid or recovered on account of capital or principal.

*Section 10.7. Nature of Business.* Neither the Company nor any Restricted Subsidiary will engage in any business, other than, when taken as a whole, the general nature of the business in which the Company and its Restricted Subsidiaries are engaged on the date of this Agreement and other energy related regulated business activities and non-regulated business activities that are complementary to the foregoing.

*Section 10.8. Transactions with Affiliates.* The Company will not and will not permit any Restricted Subsidiary to enter into directly or indirectly any Material transaction or group of related transactions (including without limitation the purchase, lease, sale or exchange of properties of any kind or the rendering of any service) with any Affiliate (other than the Company or another Restricted Subsidiary), except upon fair and reasonable terms no less favorable to the Company or such Restricted Subsidiary than would be obtainable in a comparable arm's-length transaction with a Person not an Affiliate. In addition, the Company will not, and will not permit any Restricted Subsidiary to, make any loan or advance to the Company or any Restricted Subsidiary except in the ordinary course of business and in accordance with the reasonable requirements of the business of the Company or any such Restricted Subsidiary.

*Section 10.9. Acquisitions.* The Company will not, and will not permit any Restricted Subsidiary to, make any acquisition of all or substantially all of the assets or capital stock of any business entity if at the time of such acquisition and after giving effect thereto, a Default or Event of Default shall exist.

*Section 10.10. Unrestricted Subsidiaries.* The Company will not at any time permit Unrestricted Subsidiaries to (i) own more than 40% of the Consolidated Total Assets of the Company and its Subsidiaries, or (ii) account for more than 40% of the consolidated gross revenues of the Company and its Subsidiaries, determined in each case in accordance with GAAP.

*Section 10.11. Interest Coverage Covenant.* Section 6.1(b) (the *"Interest Coverage Covenant"*) of the Bank Credit Agreement in effect on the date of this Agreement (as such covenant may be amended or modified from time to time whether pursuant to an amendment to the Bank Credit Agreement in effect on the date of this Agreement or any new, restated or replacement Bank Credit Agreement) is hereby incorporated by reference into this **Section 10.11**. The Interest Coverage Covenant shall continue in effect until such time as the Interest Coverage Covenant shall have been eliminated from the Bank Credit Agreement or all indebtedness under the Bank Credit Agreement is repaid in full and all commitments related thereto are terminated; *provided,* that if at the time of any such repayment or the termination of any such commitment a Default or Event of Default shall exist under this Agreement, then the Interest Coverage Covenant shall continue in full force and effect so long as such Default or Event of Default continues to exist. If at any time a Default or Event of Default exists under the Interest Coverage Covenant, no modification or waiver of the Interest Coverage Covenant shall be effective unless the Required Holders shall have consented thereto. Promptly, but in no event more than 5 Business Days following the execution of any Bank Credit Agreement (or any amendment thereto) which changes or eliminates the Interest Coverage Covenant, the Company shall furnish each holder of the Notes with a copy of such agreement.

*Section 10.12. Economic Sanctions, Etc.* The Company will not, and will not permit any Controlled Entity to (a) become (including by virtue of being owned or controlled by a Blocked Person), own or control a Blocked Person or (b) directly or indirectly have any investment in or engage in any dealing or transaction (including any investment, dealing or transaction involving the proceeds of the Notes) with any Person if such investment, dealing or transaction (i) would cause any holder or any affiliate of such holder to be in violation of, or subject to sanctions under, any law or regulation applicable to such holder, or (ii) is prohibited by or subject to sanctions under any U.S. Economic Sanctions Laws.

## SECTION 11. EVENTS OF DEFAULT.

An *"Event of Default"* shall exist if any of the following conditions or events shall occur and be continuing:

(a) the Company defaults in the payment of any principal or Make-Whole Amount, if any, on any Note when the same becomes due and payable, whether at maturity or at a date fixed for prepayment or by declaration or otherwise; or

(b) the Company defaults in the payment of any interest on any Note for more than five Business Days after the same becomes due and payable; or

(c) the Company defaults in the performance of or compliance with any term contained in **Section 8.5, 10.1, 10.2, 10.3, 10.4, 10.5** or **10.11**; or

(d) the Company defaults in the performance of or compliance with any Material term contained herein (other than those referred to in paragraphs (a), (b) and (c) of this **Section 11**) and such default is not remedied within 30 days after the earlier of (i) a Responsible Officer obtaining actual knowledge of such default and (ii) the Company receiving written notice of such default from any holder of a Note (any such written notice to be identified as a "notice of default" and to refer specifically to this paragraph (d) of **Section 11**); or

(e) any representation or warranty made in writing by or on behalf of the Company or by any officer of the Company in this Agreement or in any writing required thereof at the interest rate implicit in such rentals and otherwise in accordance with GAAP) under the lease relating to such Sale-and-Leaseback Transaction.

*"Bank Credit Agreement"* means the bank credit agreement dated as of March 23, 2012, between the Company and PNC Bank National Association, as agent, and the banks party thereto, as from time to time amended or restated or any replacement facility which constitutes the primary bank credit facility of the Company.

*"Blocked Person"* means (a) a Person whose name appears on the list of Specially Designated Nationals and Blocked Persons published by OFAC, (b) a Person, entity, organization, country or regime that is blocked or a target of sanctions that have been imposed under U.S. Economic Sanctions Laws or (c) a Person that is an agent, department or instrumentality of, or is otherwise beneficially owned by, controlled by or acting on behalf of, directly or indirectly, any Person, entity, organization, country or regime described in clause (a) or (b).

*"Business Day"* means (a) for the purposes of **Section 8.6** only, any day other than a Saturday, a Sunday or a day on which commercial banks in New York City are required or authorized to be closed, and (b) for the purposes of any other provision of this Agreement, any day other than a Saturday, a Sunday or a day on which commercial banks in Philadelphia, Pennsylvania or New York, New York are required or authorized to be closed.

*"Capital Lease"* means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

*"Capital Lease Obligation"* means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

*"Change in Control"* is defined in **Section 8.7**.

*"Closing"* is defined in **Section 3**.

*"Code"* means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

*"Company"* means Aqua America, Inc., a Pennsylvania corporation.

*"Confidential Information"* is defined in **Section 20**.

*"Consolidated Debt"* means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"*Consolidated Funded Debt*" means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"*Consolidated Net Worth*" means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"*Consolidated Total Assets*" means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"*Consolidated Total Capitalization*" means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

"*Controlled Entity*" means (i) any of the Subsidiaries of the Company and any of their or the Company's respective Controlled Affiliates and (ii) if the Company has a parent company, such parent company and its Controlled Affiliates. As used in this definition, "*Control*" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"*Debt*" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

## SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

*Section 10.1. Limitation on Debt.* The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 62% of Consolidated Total Capitalization as of such date.

*Section 10.2. Limitation on Liens.* The Company will not, and will not permit any Subsidiary to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided*, any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in good faith by appropriate proceedings diligently conducted) and Liens to secure the performance of bids, tenders, leases, or trade contracts, or to secure statutory obligations (including obligations under workers compensation, unemployment insurance and other social security legislation), surety or appeal bonds or other Liens incurred in the ordinary course of business and not in connection with the borrowing of money;

(d) leases or subleases granted to others, zoning restrictions, easements, rights-of-way, restrictions and other similar charges or encumbrances, in each case incidental to the ownership of property or assets or the ordinary conduct of the business of the Company or any of its Subsidiaries, *provided* that such Liens do not, materially impair the use of such property and which are not violated in any material respect by the existing or proposed use by the Company and its Subsidiaries of the properties subject to such Liens;

(e) Liens securing Debt of a Subsidiary to the Company or to a Subsidiary;

(f) Liens created under indentures, mortgages and deeds of trust securing Debt of the Company or a Subsidiary;

*"Capital Lease"* means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

*"Capital Lease Obligation"* means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

*"Change in Control"* is defined in **Section 8.7**.

*"Closing"* is defined in **Section 3**.

*"Code"* means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

*"Company"* means Aqua Pennsylvania, Inc., a Pennsylvania corporation.

*"Confidential Information"* is defined in **Section 20**.

*"Consolidated Debt"* means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

*"Consolidated Funded Debt"* means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

*"Consolidated Net Worth"* means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

*"Consolidated Total Assets"* means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

*"Consolidated Total Capitalization"* means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

*"Debt"* means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

*"Default"* means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

*"Default Rate"* means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

*"Environmental Laws"* means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

*"ERISA"* means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"Debt"* means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

*"Default"* means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

*"Default Rate"* means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

*"Environmental Laws"* means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

*"ERISA"* means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

**AMENDED AND RESTATED CREDIT AGREEMENT**

**among**

**AQUA PENNSYLVANIA, INC.**

**and**

**THE BANKS PARTY HERETO**

**and**

**PNC BANK, NATIONAL ASSOCIATION**
**as Agent**

**Dated as of November 17, 2016**

5.9 Taxes. Pay when due all taxes, assessments and governmental charges imposed upon it or any of its properties or that it is required to withhold and pay over, except where contested in good faith and where adequate reserves have been set aside to the extent required under GAAP.

5.10 Covenants of the Indenture. Comply at all times with the covenants contained in the Indenture, as last supplemented by the Supplemental Indenture, without regard to any amendment of or supplement to the Indenture occurring after October 15, 2010.

5.11 Guarantees of Obligations. It is the intent of the parties hereto that all of the obligations of the Borrower hereunder shall be unconditionally guaranteed by all of its Material Subsidiaries to the maximum extent permitted under any Requirement of Law applicable to any such Material Subsidiary. Accordingly, in the event that any Material Subsidiary shall be formed, acquired or come into existence after the date hereof then the Borrower will cause such Material Subsidiary to (i) execute and deliver a Guaranty Agreement in form and substance satisfactory to the Agent pursuant to which such Material Subsidiary will become a "Guarantor" hereunder, and guarantee the obligations of the Borrower hereunder and under the Notes and other Loan Documents and (ii) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Borrower pursuant to Section 4.1 on the Closing Date or as the Agent shall have reasonably requested.

5.12 Anti-Money Laundering/International Trade Law Compliance. No Covered Entity will become a Sanctioned Person. No Covered Entity, either in its own right or through any third party, will (a) have any of its assets in a Sanctioned Country or in the possession, custody or control of a Sanctioned Person in violation of any Anti-Terrorism Law; (b) do business in or with, or derive any of its income from investments in or transactions with, any Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law; (c) engage in any dealings or transactions prohibited by any Anti-Terrorism Law or (d) use the Loans to fund any operations in, finance any investments or activities in, or make any payments to, a Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law. The funds used to repay the Loans will not be derived from any unlawful activity. Each Covered Entity shall comply with all Anti-Terrorism Laws. The Borrower shall promptly notify the Agent in writing upon the occurrence of a Reportable Compliance Event.

## SECTION 6. NEGATIVE COVENANTS

The Borrower hereby agrees that, so long as the Commitments remain in effect, any Note remains outstanding and unpaid or any other amount is owing to any Bank or the Agent hereunder, the Borrower shall not directly or indirectly:

6.1 Financial Covenants.

(a) Equity to Capital Ratio. Permit as of the end of any fiscal quarter the Equity to Capital Ratio to be less than thirty eight percent (38%).

(b) Interest Coverage Ratio. Permit as of the end of any fiscal quarter the Interest Coverage Ratio to be less than 1.8 to 1.

6.2 Limitation on Certain Debt. Except for the Loans and Commitments under the Loan Documents and the Term Loan Facilities, at any time enter into, assume or suffer to exist lines of credit or comparable extensions of credit from one or more commercial banks (or their Affiliates) under which the Borrower has incurred or may incur aggregate Debt in excess of $15,000,000.

6.3 Limitation on Liens. Create, incur, assume or suffer to exist any Lien upon any of its property, assets or revenues, including, without limitation, the stock of its Subsidiaries, whether now owned or hereafter acquired, except for:

(a) The following, (i) if the validity or amount thereof is being contested in good faith by appropriate and lawful proceedings diligently conducted so long as levy and execution thereon have been stayed and continue to be stayed or (ii) if a final judgment is entered and such judgment is discharged within thirty (30) days of entry, and in either case they do not materially impair the ability of the Borrower to perform its obligations hereunder or under the other Loan Documents:

(A) Claims or Liens for taxes, assessments or charges due and payable and subject to interest or penalty, provided that the Borrower maintains such reserves or other appropriate provisions as shall be required by GAAP and pays all such taxes, assessments or charges forthwith upon the commencement of proceedings to foreclose any such Lien;

(B) Claims, Liens or encumbrances upon, and defects of title to, real or personal property including any attachment of personal or real property or other legal process prior to adjudication of a dispute on the merits; and

(C) Claims or Liens of mechanics, materialmen, warehousemen, carriers, or other statutory nonconsensual Liens;

(b) pledges or deposits in connection with workers' compensation, unemployment insurance and other social security legislation;

(c) deposits to secure the performance of bids, trade contracts (other than for borrowed money), leases, statutory obligations, surety and appeal bonds, performance bonds and other obligations of a like nature incurred in the ordinary course of business of the Borrower;

(d) easements, rights-of-way, restrictions and other similar encumbrances incurred in the ordinary course of business which, in the aggregate, are not substantial in amount and which do not interfere with the ordinary conduct of the business of the Borrower;

(e) Liens which were in existence on the date hereof and shown on Schedule 6.3 and replacements, extensions or replacements thereof;

"Covered Entity": (a) the Borrower, each of the Borrower's Subsidiaries and all Guarantors and (b) each Person that, directly or indirectly, is in control of a Person described in clause (a) above. For purposes of this definition, control of a Person shall mean the direct or indirect (x) ownership of, or power to vote, 25% or more of the issued and outstanding equity interests having ordinary voting power for the election of directors of such Person or other Persons performing similar functions for such Person, or (y) power to direct or cause the direction of the management and policies of such Person whether by ownership of equity interests, contract or otherwise.

"Daily LIBOR Rate" shall mean, for any day, the rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100$^{th}$ of 1%) (x) the Published Rate by (y) a number equal to 1.00 minus the Eurocurrency Reserve Requirements. The Published Rate shall be adjusted as of each Business Day based on changes in the Published Rate or the Eurocurrency Reserve Requirements without notice to the Borrower, and shall be applicable from the effective date of any such change. Notwithstanding the foregoing, if the Daily LIBOR Rate as determined above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

"Debt": with respect to any Person, at any time, without duplication, all of (i) its liabilities for borrowed money, (ii) liabilities secured by any Lien existing on property owned by such Person (whether or not such liabilities have been assumed), (iii) its liabilities in respect to Capital Leases; (iv) its liabilities under Contingent Obligations; and (v) all other obligations which are required by GAAP to be shown as liabilities on its balance sheet but excluding (x) deferred taxes and other deferred or long-term liabilities and other amounts not in respect of borrowed money and (y) the aggregate amount of accounts receivable sold, factored or otherwise transferred for value without recourse (other than for breach of representations).

"Default": any of the events specified in Section 7, whether or not any requirement for the giving of notice, the lapse of time, or both, or any other condition precedent therein set forth, has been satisfied.

"Defaulting Bank": any Bank, as determined by the Agent, that has (a) failed to fund any portion of its Revolving Credit Loans or participations in Swing Line Loans within three Business Days of the date required to be funded by it hereunder, (b) notified the Borrower, the Agent, the Swing Line Bank or any Bank in writing that it does not intend to comply with any of its funding obligations under this Agreement or has made a public statement to the effect that it does not intend to comply with its funding obligations under this Agreement or under other agreements in which it commits to extend credit, (c) failed, within three Business Days after request by the Agent, to confirm that it will comply with the terms of this Agreement relating to its obligations to fund prospective Revolving Credit Loans or participations in Swing Line Loans, (d) otherwise failed to pay over to the Agent or any other Bank any other amount required to be paid by it hereunder within three Business Days of the date when due, unless the subject of a good faith dispute, or (e) (i) become or is insolvent or has a parent company that has become or is insolvent, (ii) become the subject of a Bail-In Action, or (iii) become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment or has a parent company that has become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment (it being understood that a Defaulting Bank shall cease to be a Defaulting Bank if the Borrower, the Agent and the Swing Line Bank shall each agree that such Defaulting Bank has adequately remedied all matters that caused such Bank to be a Defaulting Bank).

"Distribution": in respect of any corporation, (a) dividends, distributions or other payments on account of any capital stock of the corporation (except distributions in common stock of such corporation); (b) the redemption or acquisition of such stock or of warrants, rights or other options to purchase such stock (except when solely in exchange for common stock of such corporation); and (c) any payment on account of, or the setting apart of any assets for a sinking or other analogous fund for, the purchase, redemption, defeasance, retirement or other acquisition of any share of any class of capital stock of such corporation or any warrants or options to purchase any such stock.

"Dollars" and "$": dollars in lawful currency of the United States of America.

"EEA Financial Institution": (i) any credit institution or investment firm established in any EEA Member Country which is subject to the supervision of an EEA Resolution Authority, (ii) any entity established in an EEA Member Country which is a parent of an institution described in clause (i) of this definition, or (iii) any financial institution established in an EEA Member Country which is a subsidiary of an institution described in clauses (i) or (ii) of this definition and is subject to consolidated supervision with its parent.

"EEA Member Country": any of the member states of the European Union, Iceland, Liechtenstein and Norway.

"EEA Resolution Authority" any public administrative authority or any person entrusted with public administrative authority of any EEA Member Country (including any delegee) having responsibility for the resolution of any EEA Financial Institution.

"Environmental Laws": any and all applicable foreign, Federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or binding requirements of any Governmental Authority, or binding Requirement of Law (including common law) regulating, relating to or imposing liability or standards of conduct concerning protection of the environment or public health, remediation of environmental conditions, or damages arising from such conditions, as now or may at any time hereafter be in effect.

"Equity to Capital Ratio": at the date of determination, the ratio of Consolidated Shareholders' Equity to the sum of (i) Consolidated Funded Debt and (ii) Consolidated Shareholders' Equity.

"ERISA": the Employee Retirement Income Security Act of 1974, as amended from time to time.

"EU Bail-In Legislation Schedule": the EU Bail-In Legislation Schedule published by the Loan Market Association (or any successor person), as in effect from time to time.

"Eurocurrency Reserve Requirements": for any day as applied to a Eurodollar Loan, the aggregate (without duplication) of the rates (expressed as a decimal fraction) of reserve requirements in effect on such day (including, without limitation, basic, supplemental, marginal and emergency reserves under any regulations of the Board of Governors of the Federal Reserve System or other Governmental Authority having jurisdiction with respect thereto) dealing with reserve requirements prescribed for eurocurrency funding (currently referred to as "Eurocurrency Liabilities" in Regulation D of such Board) maintained by a member bank of such System.

"Eurodollar Rate": with respect to the Loans comprising any Eurodollar Borrowing for any Interest Period, the interest rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1% per annum) (a) the rate which appears on the Bloomberg Page BBAM1 (or on such other substitute Bloomberg page that displays rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market), or the rate which is quoted by another source selected by the Agent as an authorized information vendor for the purpose of displaying rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market (for purposes of this definition, an "Alternate Source"), at approximately 11:00 a.m., London time, two (2) Business Days prior to the commencement of such Interest Period as the London interbank offered rate for U.S. Dollars for an amount comparable to such Eurodollar Borrowing and having a borrowing date and a maturity comparable to such Interest Period (or if there shall at any time, for any reason, no longer exist a Bloomberg Page BBAM1 (or any substitute page) or any Alternate Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)), by (b) a number equal to 1.00 minus the Eurocurrency Reserve Requirements; provided, however, that if the Eurodollar Rate determined as provided above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

The Eurodollar Rate shall be adjusted with respect to any Eurodollar Borrowing that is outstanding on the effective date of any change in the Eurocurrency Reserve Requirements as of such effective date. The Agent shall give prompt notice to the Borrower of the Eurodollar Rate as determined or adjusted in accordance herewith, which determination shall be conclusive absent manifest error.

"Eurodollar Borrowing": a Borrowing comprised of Eurodollar Loans.

"Eurodollar Loan": any Revolving Credit Loan bearing interest at a rate determined by reference to the Eurodollar Rate in accordance with the provisions of Section 2.

"Event of Default": any of the events specified in Section 7, provided that any requirement for the giving of notice, the lapse of time, or both, or any other condition, has been satisfied.

"Excluded Taxes": as defined in subsection 2.12(a).

"Existing Credit Agreement": as defined in the Background to this Agreement.

"Exposure": as to any Bank at any date, an amount equal to the sum of (a) the aggregate principal amount of all Loans made by such Bank then outstanding and (b) the principal amount of such Bank's pro rata share of Swing Line Loans then outstanding based on its Commitment Percentage.

"FATCA": Sections 1471 through 1474 of the Code, as of the date of this Agreement (or any amended or successor version that is substantially comparable and not materially more onerous to comply with), any current or future regulations or official interpretations thereof and any agreement entered into pursuant to Section 1471(b)(1) of the Code.

"Federal Funds Effective Rate": for any day, the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers, as published on the next succeeding Business Day by the Federal Reserve Bank of New York, or, if such rate is not so published for any day which is a Business Day, the average of the quotations for the day of such transactions received by the Agent from three Federal funds brokers of recognized standing selected by it.

"Federal Funds Open Rate" for any day shall mean the rate per annum which is the daily federal funds open rate as quoted by ICAP North America, Inc. (or any successor) as set forth on the Bloomberg Screen BTMM for that day opposite the caption "OPEN" (or on such other substitute Bloomberg Screen that displays such rate), or as set forth on such other recognized electronic source used for the purpose of displaying such rate as selected by the Agent (an "Alternate Federal Funds Source") (or if such rate for such day does not appear on the Bloomberg Screen BTMM (or any substitute screen) or on any Alternate Federal Funds Source, or if there shall at any time, for any reason, no longer exist a Bloomberg Screen BTMM (or any substitute screen) or any Alternate Federal Funds Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)); provided, that if such day is not a Business Day, the Federal Funds Open Rate for such day shall be the Federal Funds Open Rate on the immediately preceding Business Day."

"Fee Letter": the letter from the Agent to the Borrower dated November 14, 2016 regarding certain fees payable by the Borrower.

"Fees": as defined in subsection 2.4(a).

"Foreign Bank": any Bank that is not created or organized under the Laws of the United States, any State thereof or the District of Columbia.

"GAAP": at any time with respect to the determination of the character or amount of any asset or liability or item of income or expense, or any consolidation or other accounting computation, generally accepted accounting principles as applied to the public utility industry, as such principles shall be in effect on the date of, or at the end of the period covered by, the financial statements from which such asset, liability, item of income, or item of expense, is derived, or, in the case of any such computation, as in effect on the date when such computation is required to be determined, subject to Section 1.3(b).

"Governmental Authority": shall mean the government of the United States of America or any other nation, or of any political subdivision thereof, whether state or local, and any agency, authority, instrumentality, regulatory body, court, central bank or other entity exercising executive, legislative, judicial, taxing, regulatory or administrative powers or functions of or pertaining to government (including any supra-national bodies such as the European Union or the European Central Bank) and any group or body charged with setting financial accounting or regulatory capital rules or standards (including, without limitation, the Financial Accounting Standards Board, the Bank for International Settlements or the Basel Committee on Banking Supervision or any successor or similar authority to any of the foregoing).

"Guarantor": any Material Subsidiary which becomes a "Guarantor" after the date hereof pursuant to Section 5.11.

"Guaranty": any Guaranty Agreement entered into by a Guarantor pursuant to Section 5.11.

"Indenture": means the Indenture of Mortgage dated as of January 1, 1941 between the Borrower and Chase Manhattan Trust Company, National Association, as successor Trustee, as amended and supplemented.

"Insolvency": with respect to any Multiemployer Plan, the condition that such Plan is insolvent within the meaning of Section 4245 of ERISA.

"Insolvent": pertaining to a condition of Insolvency.

"Interest Coverage Ratio": at the date of determination, the ratio of Consolidated EBIT to Consolidated Interest Expense, in each case for the prior four (4) consecutive fiscal quarters.

"Interest Payment Date": (a) as to any Base Rate Loan or Swing Line Loan, the last day of each month, (b) as to any Eurodollar Loan having an Interest Period of three months or less, the last day of such Interest Period, and (c) as to any Eurodollar Loan having an Interest Period longer than three months, each day which is three months, or a whole multiple thereof, after the first day of such Interest Period and the last day of such Interest Period.

"Interest Period": with respect to any Eurodollar Loan:

(i) initially the period commencing on the borrowing or conversion date, as the case may be, with respect to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower in their notice of borrowing or notice of conversion, given with respect thereto; and

(ii) thereafter, each period commencing on the last day of the next preceding Interest Period applicable to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower by irrevocable notice to the Agent not less than three Business Days prior to the last day of the then current Interest Period with respect thereto;

provided that, the foregoing provisions relating to Interest Periods are subject to the following:

(i) if any Interest Period would end on a day other than a Business Day, such Interest Period shall be extended to the next succeeding Business Day unless such next succeeding Business Day would fall in the next calendar month, in which case such Interest Period shall end on the next preceding Business Day;

(ii) any Interest Period that begins on the last Business Day of a calendar month (or on a day for which there is no numerically corresponding day in the calendar month at the end of such Interest Period) shall end on the last Business Day of a calendar month;

(iii) an Interest Period that otherwise would extend beyond the Termination Date shall end on the Termination Date; and

(iv) the Borrower shall select Interest Periods so as not to require a payment or prepayment of any Eurodollar Loan during an Interest Period for such Loan.

"Investments": investments (by loan or extension of credit, purchase, advance, guaranty, capital contribution or otherwise) made in cash or by delivery of Property, by the Borrower (i) in any Person, whether by acquisition of stock or other ownership interest, indebtedness or other obligation or Security, or by loan, advance or capital contribution, or (ii) in any Property or (iii) any agreement to do any of the foregoing.

"Law": any law(s) (including common law), constitution, statute, treaty, regulation, rule, ordinance, opinion, issued guidance, release, ruling, order, executive order, injunction, writ, decree, bond, judgment, authorization or approval, lien or award of or any settlement arrangement, by agreement, consent or otherwise, with any Governmental Body, foreign or domestic.

Execution Version

**AMENDED AND RESTATED CREDIT AGREEMENT**

**Dated as of June 7, 2018**

**among**

**AQUA AMERICA, INC.**

**and**

**THE BANKS PARTY HERETO**

**and**

**PNC BANK, NATIONAL ASSOCIATION,**
**as Agent**

**PNC CAPITAL MARKETS, LLC,**
**as Lead Arranger**

6.1 Financial Covenants.

(a) Leverage Ratio. Permit as of the end of any fiscal quarter the Leverage Ratio to be greater than sixty-five percent (65%).

(b) Interest Coverage Ratio. Permit as of the end of any fiscal quarter the Interest Coverage Ratio to be less than 1.8 to 1.

6.2 Limitation on Certain Debt. Except for the Commitments under the Loan Documents, at any time enter into, assume or suffer to exist lines of credit or comparable extensions of credit from one or more commercial banks (or their Affiliates) under which the Borrower has incurred or may incur aggregate Debt in excess of $25,000,000.

6.3 Limitation on Liens. Create, incur, assume or suffer to exist any Lien upon any of its property, assets or revenues, including, without limitation, the Capital Stock of its Subsidiaries, whether now owned or hereafter acquired, except for:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by Section 5.9; provided, any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in good faith by appropriate proceedings diligently conducted) and Liens to secure the performance of bids, tenders, leases, or trade contracts, or to secure statutory obligations (including obligations under workers compensation, unemployment insurance and other social security legislation), surety or appeal bonds or other Liens incurred in the ordinary course of business and not in connection with the borrowing of money;

(d) leases or subleases granted to others, zoning restrictions, easements, rights-of-way, restrictions and other similar charges or encumbrances, in each case incidental to the ownership of property or assets or the ordinary conduct of the business of the Borrower or any of its Restricted Subsidiaries; provided, however, that such Liens do not, materially impair the use of such property or materially detract from the value of such property and which are not violated in any material respect by the existing or proposed use by the Borrower and its Restricted Subsidiaries of the properties subject to such Liens;

(e) Liens securing Debt of a Restricted Subsidiary to the Borrower or a Wholly-Owned Restricted Subsidiary;

"Code": the Internal Revenue Code of 1986, as amended from time to time.

"Commitment": as to any Bank, the obligation of such Bank to make Revolving Credit Loans, issue and/or acquire participating interests in Letters of Credit and make or participate in Swing Line Loans hereunder, in an aggregate amount at any one time outstanding not to exceed (a) as to any Bank which is an original signatory to this Agreement, the amount set forth opposite such Bank's name on Schedule I hereto under the caption "Commitment", as the same may be changed from time to time in accordance with the provisions of this Agreement or (b) as to any Bank which is not an original signatory to this Agreement but which becomes a Bank by executing an Assignment and Assumption, Increased Commitment and Acceptance or a New Bank Joinder, the Commitment for such Bank set forth on Schedule I to such Assignment and Assumption, Increased Commitment and Acceptance or New Bank Joinder, as such amount may be changed from time to time in accordance with the provisions of this Agreement.

"Commitment Percentage": as to any Bank at any time, the proportion (expressed as a percentage) that such Bank's Commitment bears to the Total Commitment at such time (or, at any time after the Commitments shall have expired or been terminated, the percentage which the amount of such Bank's Exposure constitutes of the aggregate amount of the Total Exposure at such time).

"Commitment Period": the period from, and including, the Closing Date to, but not including, the Termination Date.

"Commonly Controlled Entity": an entity, whether or not incorporated, which is under common control with the Borrower within the meaning of Section 4001 of ERISA or is part of a group which includes the Borrower and which is treated as a single employer under Section 414 of the Code.

"Compliance Certificate": as defined in subsection 5.2(a).

"Consolidated Assets": at any time, the amount at which all assets (including, without duplication, the capitalized value of any leasehold interest under any Capital Lease) of the Borrower and its Subsidiaries would be reflected on a consolidated balance sheet of the Borrower at such time.

"Consolidated EBIT": for any period, Consolidated Net Income for such period, plus the amount of income taxes and interest expense deducted from earnings in determining such Consolidated Net Income.

"Consolidated Funded Debt": at any time, all Debt of the Borrower and its Subsidiaries determined on a consolidated basis consisting of, without duplication (a) borrowed money Debt, including without limitation capitalized lease obligations, (b) reimbursement obligations in respect of letters of credit and the like, and (c) Debt in the nature of a Contingent Obligation, whether or not required to be reflected on a consolidated balance sheet of the Borrower in accordance with GAAP.

"Consolidated Interest Expense": for any period, the amount of cash interest expense deducted from the consolidated earnings of the Borrower and its Subsidiaries in determining Consolidated Net Income for such period in accordance with GAAP.

"Consolidated Net Income": for any fiscal period, net earnings (or loss) after income and other taxes computed on the basis of income of the Borrower and its Subsidiaries for such period determined on a consolidated basis in accordance with GAAP.

"Consolidated Shareholders' Equity": at a particular date, the net book value of the shareholders' equity of the Borrower and its Subsidiaries as would be shown on a consolidated balance sheet of the Borrower at such time determined in accordance with GAAP.

"Contingent Obligation": with respect to any Person (for the purpose of this definition, the "Obligor") any obligation (except the endorsement in the ordinary course of business of instruments for deposit or collection) of the Obligor guaranteeing or in effect guaranteeing any indebtedness of any other Person (for the purpose of this definition, the "Primary Obligor") in any manner, whether directly or indirectly, including (without limitation) indebtedness incurred through an agreement, contingent or otherwise, by the Obligor:

(a) to purchase such indebtedness of the Primary Obligor or any Property or assets constituting security therefor;

(b) to advance or supply funds

(i) for the purpose of payment of such indebtedness (except to the extent such indebtedness otherwise appears on Borrower's consolidated balance sheet as indebtedness), or

(ii) to maintain working capital or other balance sheet condition or any income statement condition of the Primary Obligor or otherwise to advance or make available funds for the purchase or payment of such indebtedness or obligation; or

(c) to lease Property or to purchase Securities or other Property or services primarily for the purpose of assuring the owner of such indebtedness or obligation of the ability of the Primary Obligor to make payment of the indebtedness or obligation; or

(d) to make any future "earnout" payment or similar payments in connection with a Permitted Acquisition.

For purposes of computing the amount of any Contingent Obligation, in connection with any computation of indebtedness or other liability, it shall be assumed that, without duplication, the indebtedness or other liabilities of the Primary Obligor that are the subject of such Contingent Obligation are direct obligations of the issuer of such Obligation.

"Contractual Obligation": as to any Person, any provision of any Security issued by such Person or of any agreement, instrument or other undertaking to which such Person is a party or by which it or any of its property is bound.

"Covered Entity" means (a) the Borrower and each of the Borrower's Subsidiaries, (including, in any event, all guarantors of the Obligations) and (b) each Person that, directly or indirectly, is in control of a Person described in clause (a) above. For purposes of this definition, control of a Person shall mean the direct or indirect (x) ownership of, or power to vote, 25% or more of the issued and outstanding equity interests having ordinary voting power for the election of directors of such Person or other Persons performing similar functions for such Person, or (y) power to direct or cause the direction of the management and policies of such Person whether by ownership of equity interests, contract or otherwise.

"Daily LIBOR Rate": shall mean, for any day, the rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100$^{th}$ of 1%) (x) the Published Rate by (y) a number equal to 1.00 minus the Eurocurrency Reserve Requirements. The Published Rate shall be adjusted as of each Business Day based on changes in the Published Rate or the Eurocurrency Reserve Requirements without notice to the Borrower, and shall be applicable from the effective date of any such change. Notwithstanding the foregoing, if the Daily LIBOR Rate as determined above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

"Debt": with respect to any Person, at any time, without duplication, all of (i) its liabilities for borrowed money, (ii) liabilities secured by any Lien existing on property owned by such Person (whether or not such liabilities have been assumed), (iii) Capitalized Lease Obligations; (iv) its liabilities under Contingent Obligations,(v) all reimbursement and other obligations of such Person in respect of letters of credit, bankers' acceptances and similar obligations created for the account of such Person, in each case whether or not matured, (vi) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business, but including, without limitation, seller's notes and all liabilities created or arising under any conditional sale or title retention agreement with respect to any such property), (vii) Swaps of such Person and (viii) all other obligations which are required by GAAP to be shown as liabilities on its balance sheet, but excluding (x) deferred taxes and other deferred or long-term liabilities and other amounts not in respect of borrowed money and (y) the aggregate amount of accounts receivable sold, factored or otherwise transferred for value without recourse (other than for breach of representations).

"Debt Rating": to the extent rated, the rating of the senior long-term Debt of the Borrower or any Significant Subsidiary by each of Moody's and S&P.

"Default": any of the events specified in Section 7, whether or not any requirement for the giving of notice, the lapse of time, or both, or any other condition precedent therein set forth, has been satisfied.

"Default Rate": as defined in Section 2.7.

"Defaulting Bank": any Bank, as determined by the Agent, that has (a) failed to fund any portion of its Revolving Credit Loans or participations in Letters of Credit or Swing Line Loans within three Business Days of the date required to be funded by it hereunder, unless such Bank notifies the Agent and the Borrower in writing that such failure is the result of such

Bank's good faith determination that one or more conditions precedent to funding (which conditions precedent, together with the applicable Event of Default, if any, shall be specifically identified in such writing) have not been satisfied, (b) notified the Borrower, the Agent, the Swing Line Bank or any Bank in writing that it does not intend to comply with any of its funding obligations under this Agreement or has made a public statement to the effect that it does not intend to comply with its funding obligations under this Agreement or under other agreements in which it commits to extend credit, (unless such writing or public statement relates to such Bank's obligation to fund a Loan hereunder and states that such position is based on such Bank's determination that a condition precedent to funding (which condition precedent, together with the applicable Event of Default, if any, shall be specifically identified in such writing or public statement) cannot be satisfied), (c) failed, within three Business Days after request by the Agent, to confirm that it will comply with the terms of this Agreement relating to its obligations to fund prospective Revolving Credit Loans or participations in Letters of Credit or Swing Line Loans (provided that such Bank shall cease to be a Defaulting Bank pursuant to this clause (c) upon receipt of such confirmation by the Agent), (d) otherwise failed to pay over to the Agent or any other Bank any other amount required to be paid by it hereunder within three Business Days of the date when due, unless the subject of a good faith dispute, or (e) (i) become or is insolvent or has a parent company that has become or is insolvent, (ii) become the subject of a Bail-In Action, or (iii) become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment or has a parent company that has become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment (it being understood that a Defaulting Bank shall cease to be a Defaulting Bank if the Borrower, the Agent, the Issuing Bank and the Swing Line Bank shall each agree that such Defaulting Bank has adequately remedied all matters that caused such Bank to be a Defaulting Bank).

"Distribution": in respect of any Person, (a) dividends, distributions or other payments on account of any Capital Stock of such Person (except distributions in Capital Stock of such Person); (b) the redemption or acquisition of such Capital Stock or of warrants, rights or other options to purchase such Capital Stock (except when solely in exchange for Capital Stock of such Person); and (c) any payment on account of, or the setting apart of any assets for a sinking or other analogous fund for, the purchase, redemption, defeasance, retirement or other acquisition of any share of any class of Capital Stock of such Person or any warrants or options to purchase any such Capital Stock.

"Dollars" and "$": dollars in lawful currency of the United States of America.

"EEA Financial Institution": (i) any credit institution or investment firm established in any EEA Member Country which is subject to the supervision of an EEA Resolution Authority, (ii) any entity established in an EEA Member Country which is a parent of an institution described in clause (i) of this definition, or (iii) any financial institution established in an EEA Member Country which is a subsidiary of an institution described in clauses (i) or (ii) of this definition and is subject to consolidated supervision with its parent.

"EEA Member Country": any of the member states of the European Union, Iceland, Liechtenstein and Norway.

"EEA Resolution Authority": any public administrative authority or any person entrusted with public administrative authority of any EEA Member Country (including any delegee) having responsibility for the resolution of any EEA Financial Institution.

"Environmental Laws": any and all applicable foreign, Federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or binding requirements of any Governmental Authority, or binding Requirement of Law (including common law) regulating, relating to or imposing liability or standards of conduct concerning protection of the environment, as now or may at any time hereafter be in effect.

"ERISA": the Employee Retirement Income Security Act of 1974, as amended from time to time.

"EU Bail-In Legislation Schedule": the EU Bail-In Legislation Schedule published by the Loan Market Association (or any successor person), as in effect from time to time.

"Eurocurrency Reserve Requirements": for any day as applied to a Eurodollar Loan, the aggregate (without duplication) of the rates (expressed as a decimal fraction) of reserve requirements in effect on such day (including, without limitation, basic, supplemental, marginal and emergency reserves under any regulations of the Board of Governors of the Federal Reserve System or other Governmental Authority having jurisdiction with respect thereto) dealing with reserve requirements prescribed for eurocurrency funding (currently referred to as "Eurocurrency Liabilities" in Regulation D of such Board) maintained by a member bank of such System.

"Eurodollar Borrowing": a Borrowing comprised of Eurodollar Loans.

"Eurodollar Loan": any Revolving Credit Loan bearing interest at a rate determined by reference to the Eurodollar Rate in accordance with the provisions of Section 2.

"Eurodollar Rate": with respect to the Loans comprising any Eurodollar Borrowing for any Interest Period, the interest rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1% per annum) (a) the rate which appears on the Bloomberg Page BBAM1 (or on such other substitute Bloomberg page that displays rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market), or the rate which is quoted by another source selected by the Agent as an authorized information vendor for the purpose of displaying rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market (for purposes of this definition, an "Alternate Source"), at approximately 11:00 a.m., London time, two (2) Business Days prior to the commencement of such Interest Period as the London interbank offered rate for U.S. Dollars for an amount comparable to such Eurodollar Borrowing and having a borrowing date and a maturity comparable to such Interest Period (or if there shall at any time, for any reason, no longer exist a Bloomberg Page BBAM1 (or any substitute page) or any Alternate Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)), by (b) a number equal to 1.00

minus the Eurocurrency Reserve Requirements; provided, however, that if the Eurodollar Rate determined as provided above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

The Eurodollar Rate shall be adjusted with respect to any Eurodollar Borrowing that is outstanding on the effective date of any change in the Eurocurrency Reserve Requirements as of such effective date. The Agent shall give prompt notice to the Borrower of the Eurodollar Rate as determined or adjusted in accordance herewith, which determination shall be conclusive absent manifest error.

"Euro-Rate Termination Date": has the meaning assigned to such term in subsection 2.10(d).

"Event of Default": any of the events specified in Section 7, provided that any requirement for the giving of notice, the lapse of time, or both, or any other condition, has been satisfied.

"Exchange Act": means the Securities and Exchange Act of 1934, as amended.

"Excluded Taxes": has the meaning assigned to such term in subsection 2.12(a).

"Existing Credit Agreement": as defined in the Background to this Agreement.

"Existing Letters of Credit": shall mean those certain Letters of Credit issued by the Issuing Bank prior to the Closing Date and which remain outstanding as of the date hereof, a list of which is set forth on Schedule II hereto.

"Exposure": as to any Bank at any date, an amount equal to the sum of (a) the aggregate principal amount of all Loans made by such Bank then outstanding, (b) such Bank's Commitment Percentage multiplied by the aggregate Letter of Credit Obligations at such time and (c) such Bank's Commitment Percentage multiplied by the aggregate principal amount of Swing Line Loans then outstanding.

"Facility Fee": as defined in subsection 2.4(b).

"FATCA": Sections 1471 through 1474 of the Code, as of the date of this Agreement (or any amended or successor version that is substantially comparable and not materially more onerous to comply with), any current or future regulations or official interpretations thereof and any agreement entered into pursuant to Section 1471(b)(1) of the Code.

"FCPA": shall mean the Foreign Corrupt Practices Act of 1977, as amended, and the rules and regulations thereunder.

"Federal Funds Effective Rate": for any day shall mean the rate per annum (based on a year of 360 days and actual days elapsed and rounded upward to the nearest 1/100 of 1%) announced by the Federal Reserve Bank of New York (or any successor) on such day as being the weighted average of the rates on overnight federal funds transactions on the previous trading day, as computed and announced by such Federal Reserve Bank (or any successor) in substantially the same manner as such Federal Reserve Bank computes and announces the weighted average it refers to as the "Federal Funds Effective Rate" as of the date of this Agreement; provided, if such Federal Reserve Bank (or its successor) does not announce such rate on any day, the "Federal Funds Effective Rate" for such day shall be the Federal Funds Effective Rate for the last day on which such rate was announced.

"Fee Letter": that certain letter from the Agent to the Borrower dated April 23, 2018 regarding certain administrative fees.

"Fees": the Closing Fees, the Facility Fees, the Letter of Credit Fees and the Administrative Fees.

"Foreign Bank": any Bank that is not created or organized under the Laws of the United States, any State thereof or the District of Columbia.

"GAAP": at any time with respect to the determination of the character or amount of any asset or liability or item of income or expense, or any consolidation or other accounting computation, generally accepted accounting principles as applied to the public utility industry, as such principles shall be in effect on the date of, or at the end of the period covered by, the financial statements from which such asset, liability, item of income, or item of expense, is derived, or, in the case of any such computation, as in effect on the date when such computation is required to be determined, subject to subsection 1.3(b).

"Governmental Acts": as defined in subsection 2.5(j).

"Governmental Authority": shall mean the government of the United States of America or any other nation, or of any political subdivision thereof, whether state or local, and any agency, authority, instrumentality, regulatory body, court, central bank or other entity exercising executive, legislative, judicial, taxing, regulatory or administrative powers or functions of or pertaining to government (including any supra-national bodies such as the European Union or the European Central Bank) and any group or body charged with setting financial accounting or regulatory capital rules or standards (including, without limitation, the Financial Accounting Standards Board, the Bank for International Settlements or the Basel Committee on Banking Supervision or any successor or similar authority to any of the foregoing).

"Guarantor": as of the Closing Date, each Significant Unregulated Subsidiary and each Subsidiary now or hereafter, pursuant to Section 5.10, executing and delivering a Guaranty.

"Guaranty": any Guaranty Agreement executed and delivered to the Agent by a Guarantor substantially in the form of Exhibit E hereto.

"Increased Commitment and Acceptance": any Increased Commitment and Acceptance executed and delivered by a Bank, the Borrower and the Agent, substantially in the form of Exhibit F hereto, as amended, supplemented or otherwise modified from time to time.

"Insolvency": with respect to any Multiemployer Plan, the condition that such Plan is insolvent within the meaning of Section 4245 of ERISA.

"Insolvent": pertaining to a condition of Insolvency.

"Interest Coverage Ratio": at the date of determination, the ratio of (a) Consolidated EBIT to (b) Consolidated Interest Expense, in each case for the prior four (4) consecutive fiscal quarters then ending.

"Interest Payment Date": (a) as to any Base Rate Loan or Swing Line Loan, each March 31, June 30, September 30 and December 31, (b) as to any Eurodollar Loan having an Interest Period of three months or less, the last day of such Interest Period, and (c) as to any Eurodollar Loan having an Interest Period longer than three months; each day which is three months, or a whole multiple thereof, after the first day of such Interest Period and the last day of such Interest Period.

"Interest Period": with respect to any Eurodollar Loan:

(i) initially the period commencing on the borrowing or conversion date, as the case may be, with respect to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower in their notice of borrowing or notice of conversion, given with respect thereto; and

(ii) thereafter, each period commencing on the last day of the next preceding Interest Period applicable to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower by irrevocable notice to the Agent not less than three Business Days prior to the last day of the then current Interest Period with respect thereto;

provided that, the foregoing provisions relating to Interest Periods are subject to the following:

(i) if any Interest Period would end on a day other than a Business Day, such Interest Period shall be extended to the next succeeding Business Day unless such next succeeding Business Day would fall in the next calendar month, in which case such Interest Period shall end on the next preceding Business Day;

(ii) any Interest Period that begins on the last Business Day of a calendar month (or on a day for which there is no numerically corresponding day in the calendar month at the end of such Interest Period) shall end on the last Business Day of a calendar month;

(iii) an Interest Period that otherwise would extend beyond the Termination Date shall end on the Termination Date; and

(iv) the Borrower shall select Interest Periods so as not to require a payment or prepayment of any Eurodollar Loan during an Interest Period for such Loan.

"Investments": investments (by loan or extension of credit, purchase, advance, guaranty, capital contribution or otherwise) made in cash or by delivery of Property, by the Borrower or any of its Subsidiaries (i) in any Person, whether by acquisition of stock or other ownership interest, indebtedness or other obligation or Security, or by loan, advance or capital contribution, or (ii) in any Property or (iii) any agreement to do any of the foregoing.

"Issuing Bank": PNC, in its capacity as issuer of Letters of Credit, and any successor thereto.

"Joinder": a Joinder Agreement in form and substance acceptable to the Agent pursuant to which a Subsidiary of the Borrower should join the applicable Loan Documents in accordance with Section 5.10 hereto.

"Law": any law (including common law), constitution, statute, treaty, regulation, rule, ordinance, opinion, release, ruling, order, injunction, writ, decree, bond, judgment, authorization or approval, lien or award by or settlement agreement with any Governmental Authority.

"L/C Disbursement": shall mean a payment or disbursement made by the Issuing Bank pursuant to a Letter of Credit issued by the Issuing Bank.

"L/C Sublimit": $50,000,000.

"Letter of Credit Collateral Account": has the meaning assigned to such term in subsection 2.19(c)(iv).

"Letter of Credit Coverage Requirement": with respect to each Letter of Credit at any time, 105% of the maximum amount available to be drawn thereunder at such time (determined without regard to whether any conditions to drawing could be met at such time).

"Letter of Credit Fee": has the meaning assigned to that term in subsection 2.5(b).

"Letter of Credit Obligations": at any time, an amount equal to the sum of (a) 100% of the maximum amount available to be drawn under all Letters of Credit outstanding at such time (determined without regard to whether any conditions to drawing could be met at such time) and (b) the aggregate amount of drawings under Letters of Credit which have not then been reimbursed pursuant to subsection 2.5(d)(i).

"Letter of Credit Participant": in respect of each Letter of Credit, each Bank (other than the Issuing Bank) in its capacity as the holder of a participating interest in such Letter of Credit.

"Letters of Credit": collectively, the Existing Letters of Credit and any letters of credit issued by the Issuing Bank under Section 2.5, as amended, supplemented, extended or otherwise modified from time to time.

"Leverage Ratio": at the date of determination, the ratio of (a) Consolidated Funded Debt to (b) the sum of (i) Consolidated Funded Debt and (ii) Consolidated Shareholders' Equity.

"Lien": any mortgage, pledge, hypothecation, assignment, deposit arrangement, encumbrance, lien (statutory or other), charge, or other security interest or any preference, priority or other security agreement or preferential arrangement of any kind or nature whatsoever (including, without limitation, any conditional sale or other title retention agreement and any Capital Lease having substantially the same economic effect as any of the foregoing).

"Loan Documents": the collective reference to this Agreement, the Notes, the Guaranty, the Applications, the Letters of Credit, any New Bank Joinders, any Increased Commitment and Acceptances, any Joinder entered into with any Bank or any Affiliate thereof, and all other documents, instruments, agreements or certificates delivered in connection herewith, in each case as amended, supplemented or otherwise modified from time to time.

"Loan Parties": the Borrower and each of its Subsidiaries that is party to a Loan Document.

"Loans": the collective reference to the Revolving Credit Loans and the Swing Line Loans.

"Material": material in relation to the business, operations, affairs, financial condition, assets or properties of the Borrower and its Subsidiaries taken as a whole.

"Material Adverse Effect": a material adverse effect on (a) the validity or enforceability of this Agreement or any other Loan Document, (b) the business, Property, assets, financial condition or results of operations of the Borrower and its Subsidiaries taken as a whole, (c) the ability of the Borrower and the other Loan Parties to duly and punctually to pay their Debts and perform their obligations under the Loan Documents, or (d) the ability of the Agent or any of the Banks, to the extent permitted, to enforce their legal remedies pursuant to this Agreement or any other Loan Document.

"Materials of Environmental Concern": any gasoline or petroleum (including crude oil or any fraction thereof) or petroleum products or any hazardous or toxic substances, materials or wastes, defined or regulated as such in or under any Environmental Law, including, without limitation, asbestos, polychlorinated biphenyls, and ureaformaldehyde insulation.

"Moody's": Moody's Investors Service, Inc.

"Multiemployer Plan": a Plan which is a multiemployer plan as defined in Section 4001(a)(3) of ERISA.

"New Bank": as defined in subsection 9.6(f).

"New Bank Joinder": any New Bank Joinder executed and delivered by a financial institution desiring to become a Bank hereunder, the Borrower and the Agent,

**Proud to be part of our nation's water and wastewater infrastructure solution.**

Aqua America, Inc.

## Forward-Looking Information

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements are based on management’s beliefs and assumptions. Various factors may cause actual results to be materially different than the suggested outcomes within forward-looking statements. Accordingly, there is no assurance that such results will be realized. For details on the uncertainties that may cause the Company’s actual future results to be materially different than those expressed in our forward-looking statements, see our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q filed with the Securities and Exchange Commission (“SEC”) and available on the SEC’s website at www.sec.gov. In light of these risks, uncertainties, and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than described. Forward-looking statements speak only as of the date they are made. Aqua America, Inc. expressly disclaims an obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

# **Aqua America's Core Values:**
## Integrity, Respect and the Pursuit of Excellence.

At Aqua, our values are close to heart, embedded at the core of our company and reinforce the commitment we have to being exceptional. They are the principles that guide and inspire our work as a leader in the renewal of our nation's water and wastewater infrastructure for stronger communities.

**Integrity:** Aqua is a place of honesty, good character and trust. We care about one another, our customers and our mission of protecting and providing Earth's most essential resource.

**Respect:** We are committed to one another, our customers, the community and the environment. We respect our well-being and the importance of time with family and friends.

**Excellence:** Whether at home or at work, we seek growth and development opportunities and excel in safety and customer service. We work to uphold a successful company that maximizes shareholder value.

At Aqua, we approach every day with **integrity, respect and the pursuit of excellence** to be the best we can be.

# A message from the Chairman & CEO

**Christopher H. Franklin**
Chairman, President, and Chief Executive Officer

The year 2017 ushered in a renewed national dialogue on the state of our country's infrastructure. Throughout the year, the nation's roads, bridges, water and wastewater systems were a topic of conversation from the Oval Office to dining room tables across the country. From calls for urgent investment in rapidly deteriorating infrastructure to frank discussions over how to fund such a vast need, it's been a critically important conversation – and one that Aqua has long been championing.

### The state of our nation's water infrastructure

When it comes to water and wastewater infrastructure, the reality is that the United States has more than 1 million miles of underground pipe, much of which is nearly a century old and in dire need of replacement. According to the American Water Works Association, it will cost an estimated $1 trillion to maintain and expand drinking water service to meet demands over the next 20 years. There is no question that upgrading water and wastewater infrastructure is a major challenge facing our country, and Aqua is proud to be leading the charge when it comes to offering a viable solution. As one of the largest publicly regulated water companies in the country, we are actively renewing and improving infrastructure through thoughtful and continuous capital investment. In fact, in 2017 alone, we invested $478 million in water and wastewater infrastructure.

### Aqua America's role in infrastructure renewal

Most importantly, our investment has had a direct impact on the communities we serve across our eight-state footprint – communities like:

- University Park, Illinois, where we were able to significantly improve water quality with a 14-mile pipeline project
- Lakes of Mission Grove, Texas, which lacked its own wastewater plant
- Southeastern Pennsylvania, where main breaks were reduced by 70 percent following significant infrastructure investments

You can read more about the investment Aqua has made in these communities in the pages that follow.

In September, I had the great honor of addressing the U.S. House of Representatives' Transportation and Infrastructure Committee's Subcommittee on Water Resources and the Environment, where I explained to legislators why publicly regulated utilities like Aqua are well positioned to play a major role in helping more cities and towns across the country address their water and wastewater needs. As I told Congress, the road to repairing and replacing water and wastewater infrastructure in the country should include private capital going to work to help solve the problem. In speaking out on these issues, I hope to continue encouraging discourse on the importance of infrastructure investment, and about our willingness to be a part of the solution.

Investment in water infrastructure is an important component of our business strategy. It ensures that we can continue to provide safe and reliable water and wastewater services, which in turn leads to increased customer confidence and supports Aqua's excellent reputation. Additionally, this investment is the base from which we grow shareholder value.

## A three-pronged strategy for growth

Our work to continue building shareholder value manifests itself in our three-pronged growth strategy. The company has followed this strategy for two years and it is proving successful. The first prong of the strategy is our work to become the solution chosen by middle-market municipal water and wastewater utilities as they face the financial, compliance and operational challenges of running utility systems. Unlike elected officials who must share their daily focus beyond running a utility with responsibilities in human services, public safety, and roads and bridges, among other challenges, our dedicated employees at Aqua focus their undivided time improving and maintaining water and wastewater infrastructure.

Since we've applied our three-pronged strategy two years ago, we've acquired more customers from municipal systems than we had in the previous eight years, and our pipeline of opportunities is stronger than ever before.

The second prong of our strategy focuses on the acquisition of regulated utilities. Over many years, we've developed a deep expertise installing pipe and plant and successfully recovering the cost of the capital and return on the capital through the regulatory process. In fact, we've installed 538 miles of main, just in the past three years. Our expertise in this area can be more broadly applied to solve infrastructure rehabilitation issues faced by other utilities through a disciplined acquisition program. Management and the board continue to explore opportunities to apply our core expertise by seeking relationships that could lead to the acquisition of additional regulated operations.

While market premiums for mergers and acquisitions remain elevated, our work in this area remains active and the team is attentive to potential opportunities in the regulated market.

Our third prong in the growth strategy considers market-based opportunities. These are acquisition opportunities that are outside the regulated business but would complement the regulated business and capitalize on our core strengths.

Our activity in this area requires that any opportunity would be scalable, would come with a management team and would provide a product or service that would include regulated utilities as their customers. Although we have considered several market-based opportunities, the regulated market has been particularly active and has required the largest portion of management's time.

Since 2015, we have sold the small, market-based businesses that were determined not to be scalable and have focused almost entirely on the regulated business. While market-based opportunities remain in our strategy, our near-term activity will focus primarily on the regulated business.

## A strong commitment to stakeholders

For the last 25 years, I have been proud to work for a company that is driven by talented, motivated employees who give back to the communities in which we operate. On behalf of the senior leadership team and board of directors, I thank each employee who focuses every day on supporting Aqua's mission to protect and provide Earth's most essential resource. I'd also like to extend a special thanks to our shareholders for your continued confidence and support, which enables us to execute on our goals so successfully.

As Americans and as the current stewards of our country's infrastructure, we believe we have a responsibility not only to our company and our shareholders, but also to our fellow citizens, to invest in and maintain our infrastructure. Our infrastructure is basic to our quality of life, commerce and security – our commitment has never been stronger.

With appreciation,

***"According to the American Water Works Association, it will cost an estimated $1 trillion to maintain and expand drinking water service to meet demands over the next 20 years."***

# Renewed Infrastructure Benefits Customers and the Environment

Aqua Pennsylvania owns and is responsible for 5,800 miles of pipe—varying in size, type and age—in 32 counties. Much of this water infrastructure is approaching the end of its useful lifecycle, making it susceptible to main breaks, service interruptions and water discoloration. It also increases customer dissatisfaction and what's known as non-revenue water – water lost through leaks, breaks, and so on, before it passes through a customer meter. Managing a distribution system of this size requires substantial planning, expertise and foresight.

***"Over the past few years, Aqua has shown the Treasure Lake Property Owners Association their true ability in water supply service and customer care. Aqua has gone above and beyond in their efforts while working with the TLPOA including the assistance of traffic control, road closures and detours, and clean-up of work areas. The entire Aqua staff has shown us a great level of understanding and respect when it comes to our needs and requirements at Treasure Lake. We look forward to building a stronger and more efficient water system with Aqua in the future."***

**Shirley Elmore, CMCA, AMS, PCAM**
General Manager
Treasure Lake Property Owners Association

> ***When we purchased the Treasure Lake system, only 60 percent of the water leaving the well stations reached customers. We have since replaced 15 percent of the distribution system, increasing deliverability to nearly 80 percent with a goal to increase that further by the end of 2019.***
>
> **Patrick Burke**
> Director, Operations
> Aqua Pennsylvania

**SOLUTION** Aqua Pennsylvania has proactively focused on its main replacement program to better serve its customers. In 2017 alone, Aqua Pennsylvania completed nearly 200 projects, replacing 135 miles of main with an investment of $141 million. Over the life of the main replacement program, Aqua Pennsylvania has replaced more than 1,700 miles of pipe with an investment of $1.4 billion.

**OUTCOME** Aqua Pennsylvania's investment in the state's water and wastewater infrastructure continues to benefit customers and the environment alike. When the program started, the pipes were on a 900-year replacement cycle. Today, that has been significantly reduced to a 90-year replacement cycle. The benefits of the main replacement program have been most dramatic in its southeastern division—the largest with 4,600 miles of main that serve 1 million people. Main breaks there have been reduced by 70 percent to an all-time low of eight breaks per 100 miles of pipe, per year, and customer complaints have fallen by 59 percent. Non-revenue water also continues to trend downward, reducing expenses for power and treatment chemicals, which ultimately protects our ecosystem. In 2017, non-revenue water was 17.5 percent, which is excellent for a system the size and age of the southeast division.

# Expertise and Persistence Delivers for Illinois Residents and Businesses

Residents and businesses of University Park, Illinois were served by a water source that contained high levels of iron, calcium and magnesium, creating taste and hardness issues. Many relied on water softeners and filters to reduce hardness. While the water met all U.S. Environmental Protection Agency regulations, it fell short of customer expectations. The well source was simply not good, leaving Aqua Illinois with a complicated problem.

**SOLUTION** Aqua Illinois conducted a feasibility study to explore a set of potential solutions; enhancing wells, improving treatments or running a pipeline from a better water source to University Park. Extending the pipeline would be complex both physically and financially, requiring Aqua Illinois to navigate jurisdiction issues, obtain easements and design around waterways and farm fields. Thanks to the experienced and dedicated staff of Aqua Illinois, construction began in late 2016 and successfully concluded in November 2017. The 14 miles of new pipeline runs from Aqua Illinois' award-winning Kankakee plant to its customers in University Park.

***"A huge upside is the cost savings and no more lugging bags of salt down to the water softener. Now our water comes straight to the tap clean and ready to drink."***

**Joe Dascenzo**
Resident
Monee, IL

***Since Aqua started delivering filtered and softened water from the Kankakee Water Treatment Plant, Arctic Glacier Ice has seen the water quality characteristics improve dramatically. As a result of the improved water quality, Arctic Glacier Ice is now able to produce crystal clear ice of the highest quality for our customers.***

**Tim Teehan**
Operations Manager
Arctic Glacier Ice

**OUTCOME** Aqua Illinois is proud that both residents and businesses are benefiting from this expansive project. University Park customers have seen a **90 percent reduction in iron** and a **70 percent reduction in hardness.** The pipeline project also increased water capacity, which is attracting new economic development to the area.

***I have made it a top priority of my administration to improve water quality and attract growth to our community. Working with Aqua, University Park now has the best tasting water in the State and a reliable water system capable of promoting quality residential, commercial, and industrial growth in our community.***

**Vivian Covington**
Mayor
Village of University Park, IL

# New Texas Wastewater Plant Increases Capacity Five-Fold

When Aqua Texas acquired the Lakes of Mission Grove system, the community's population was so low that the volume of wastewater produced couldn't sustain its own treatment plant. This required Aqua Texas to haul wastewater to a treatment plant each day.

***"It's essential that we adequately plan for the growth of the systems for the families we serve."***

**Bob Laughman**
President
Aqua Texas

***The completion of the wastewater treatment plant makes the Lakes of Mission Grove subdivision one of the most desirable small communities in the county.***

**Carolyn Schiller**
Resident
Lakes of Mission Grove Homeowners Association

**SOLUTION** When the community's population started to rapidly grow, Aqua was able to plan for a new wastewater treatment plant that could serve current residents and new families to come. In 2016, Aqua Texas began the bidding process for the engineering of what would become a $1.2 million plant to serve the Lakes of Mission Grove residents.

**OUTCOME** The project successfully concluded in November 2017, providing a new treatment capacity of 135,000 gallons of wastewater per day, serving an additional 500 homes. The efficient new plant provides significant operational savings and increased environmental benefits.

## SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report (the "Annual Report") are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this Annual Report completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans, and beliefs only as of the date of this Annual Report. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see *Risk Factors* included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

## OVERVIEW

The following discussion and analysis of our financial condition and results of operations should be read together with our Consolidated Financial Statements and related Notes included in this Annual Report. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about our business, operations and financial performance. All dollar amounts are in thousands of dollars, except per share amounts.

### The Company

Aqua America, Inc., (referred to as "Aqua America", the "Company", "we", "us", or "our"), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and sewer line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within the Company's market-based subsidiary, Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016 we completed the sale of business units within Aqua Resources, which were reported as assets held for sale in the Company's consolidated balance sheets, which provided liquid waste hauling and disposal services, and inspection, and cleaning and repair of storm and sanitary wastewater lines.

### Industry Mission

The mission of the regulated water utility industry is to provide quality and reliable water service at reasonable rates to customers, while earning a fair return for shareholders. A number of challenges face the industry, including:

- strict environmental, health and safety standards;
- aging utility infrastructure and the need for substantial capital investment;
- economic regulation by state, and/or, in some cases, local government;
- declining consumption per customer as a result of conservation;
- lawsuits and the need for insurance; and
- the impact of weather and sporadic drought conditions on water sales demand.

### Economic Regulation

Most of our water and wastewater utility operations are subject to regulation by their respective state utility commissions, which have broad administrative power and authority to regulate billing rates, determine franchise areas and conditions of service, approve acquisitions, and authorize the issuance of securities. The utility commissions also generally establish uniform systems of accounts and approve the terms of contracts with affiliates and customers, business combinations with other utility systems, and loans and other financings. The policies of the utility commissions often differ from state to state, and may change over time. A small number of our operations are subject to rate regulation by county or city government. Over time, the regulatory party in a particular state may change, as was the case for our Texas operations where, in 2014, economic regulation changed from the Texas Commission on Environmental Quality to the Public Utility Commission of Texas. The profitability of our utility operations is influenced to a great extent by the timeliness and adequacy of rate allowances in the various states in which we operate. One consideration we may undertake in evaluating which states to focus our growth and investment strategy is whether a state provides for consolidated rates, a surcharge for replacing and rehabilitating infrastructure and other systems, and other regulatory policies that promote infrastructure investment and efficiency in processing rate cases.

***Rate Case Management Capability*** **–** We strive to achieve the industry's mission by effective planning, efficient investments, and productive use of our resources. We maintain a rate case management capability to pursue timely and adequate returns on the capital investments that we make in improving our distribution system, treatment plants, information technology systems, and other infrastructure. This capital investment creates assets that are used and useful in providing utility service, and is commonly referred to as rate base. Timely and adequate rate relief is important to our continued profitability and in providing a fair return to our shareholders; thus, providing access to capital markets to help fund these investments. Accordingly, the objective of our rate case management strategy is to provide that the rates of our utility operations reflect, to the extent practicable, the timely recovery of increases in costs of operations (primarily labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claims costs, and costs to comply with environmental regulations), capital, and taxes. In pursuing our rate case strategy, we consider the amount of net utility plant additions and replacements made since the previous rate decision, the changes in the cost of capital, changes in our capital structure, and changes in operating and other costs. Based on these assessments, our utility operations periodically file rate increase requests with their respective state utility commissions or local regulatory authorities. In general, as a regulated enterprise, our water and wastewater rates are established to provide full recovery of utility operating costs, taxes, interest on debt used to finance capital investments, and a return on equity used to finance capital investments. Our ability to recover our expenses in a timely manner and earn a return on equity employed in the business helps determine the profitability of the Company. As of December 31, 2017, the Company's rate base is estimated to be $4,125,000, which is comprised of:

- $2,874,000 filed with respective state utility commissions or local regulatory authorities; and
- $1,251,000 not yet filed with respective state utility commissions or local regulatory authorities.

Our water and wastewater operations are composed of 53 rate divisions, each of which requires a separate rate filing for the evaluation of the cost of service and recovery of investments in connection with the establishment of tariff rates for that rate division. When feasible and beneficial to our utility customers, we have sought approval from the applicable state utility commission to consolidate rate divisions to achieve a more even distribution of costs over a larger customer base. All of the eight states in which we operate currently permit us to file a revenue requirement using some form of consolidated rates for some or all of the rate divisions in that state.

***Revenue Surcharges*** **–** Six states in which we operate water utilities, and five states in which we operate wastewater utilities, permit us to add a surcharge to their respective bills to offset the additional depreciation and capital costs associated with capital expenditures related to replacing and rehabilitating infrastructure systems. In all other states, water and wastewater utilities absorb all of the depreciation and capital costs of these projects between base rate increases without the benefit of additional revenues. The gap between the time that a capital project is completed and the recovery of its costs in rates is known as regulatory lag. This surcharge is intended to substantially reduce regulatory lag, which often acts as a disincentive to water and wastewater utilities to rehabilitate their infrastructure. In addition, some states permit our subsidiaries to use a surcharge or credit on their bills to reflect allowable changes in costs, such as changes in state tax rates, other taxes and purchased water costs, until such time as the new costs are fully incorporated in base rates.

***Effects of Inflation*** **–** Recovery of the effects of inflation through higher water and wastewater rates is dependent upon receiving adequate and timely rate increases. However, rate increases are not retroactive and often lag increases in costs caused by inflation. On occasion, our regulated utility companies may enter into rate settlement agreements, which require us to wait for a period of time to file the next base rate increase request. These agreements may result in regulatory lag whereby inflationary increases in expenses may not yet be reflected in rates, or a gap may exist between when a capital project is completed and the start of its recovery in rates. Even during periods of moderate inflation, the effects of inflation can have a negative impact on our operating results.

**Growth-Through-Acquisition Strategy**

Part of our strategy to meet the industry challenges is to actively explore opportunities to expand our utility operations through acquisitions of water and wastewater utilities either in areas adjacent to our existing service areas or in new service areas, and to explore acquiring market-based businesses that are complementary to our regulated water and wastewater operations. To complement our growth strategy, we routinely evaluate the operating performance of our individual utility systems, and in instances where limited economic growth opportunities exist or where we are unable to achieve favorable operating results or a return on equity that we consider acceptable, we will seek to sell the utility system and reinvest the proceeds in other utility systems. Consistent with this strategy, we are focusing our acquisitions and resources in states where we have critical mass of operations in an effort to achieve economies of scale and increased efficiency. Our growth-through-acquisition strategy allows us to operate more efficiently by sharing operating expenses over more utility customers and provides new locations for future earnings growth through capital investment. Another element of our growth strategy is the consideration of opportunities to expand by acquiring other utilities, including those that may be in a new state if they provide promising economic growth opportunities and a return on equity that we consider acceptable. The ability to successfully execute this strategy and meet the industry challenges is largely due to our core competencies, financial position, and our qualified and trained workforce, which we strive to retain by treating employees fairly and providing our employees with development and growth opportunities.

During 2017, we completed four acquisitions, which along with the organic growth in our existing systems, represents 10,584 new customers. During 2016, we completed 19 acquisitions, which along with the organic growth in our existing systems, represents 15,282 new customers. During 2015, we completed 16 acquisitions, which along with the organic growth in our existing systems, represents 17,747 new customers.

We believe that utility acquisitions, organic growth, and a potential expansion of our market-based business will continue to be the primary sources of growth for us. With approximately 53,000 community water systems in the U.S., 82% of which serve less than 3,300 customers, the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water, and wastewater). In the states where we operate regulated utilities, we believe there are approximately 14,500 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems.

Although not as fragmented as the water industry, the wastewater industry in the U.S. also presents opportunities for consolidation. According to the U.S. Environmental Protection Agency's ("EPA") most recent survey of wastewater treatment facilities (which includes both government-owned facilities and regulated utility systems) in 2012, there are approximately 15,000 such facilities in the nation serving approximately 76% of the U.S. population. The remaining population represents individual homeowners with their own treatment facilities; for example, community on-lot disposal systems and septic tank systems. The vast majority of wastewater facilities are government-owned rather than regulated utilities. The EPA survey also indicated that there are approximately 4,000 wastewater facilities in operation in the states where we operate regulated utilities.

Because of the fragmented nature of the water and wastewater utility industries, we believe that there are many potential water and wastewater system acquisition candidates throughout the United States. We believe the factors driving the consolidation of these systems are:

- the benefits of economies of scale;
- the increasing cost and complexity of environmental regulations;
- the need for substantial capital investment;
- the need for technological and managerial expertise;
- the desire to improve water quality and service;
- limited access to cost-effective financing;
- the monetizing of public assets to support, in some cases, the declining financial condition of municipalities; and
- the use of system sale proceeds by a municipality to accomplish other public purposes.

We are actively exploring opportunities to expand our water and wastewater utility operations through regulated utility acquisitions or otherwise, including the management of publicly-owned facilities in a public-private partnership. We intend to continue to pursue acquisitions of government-owned and regulated water and wastewater utility systems that provide services in areas near our existing service territories or in new service areas. It is our intention to focus on growth opportunities in states where we have critical mass, which allows us to improve economies of scale through spreading our fixed costs over more customers – this cost efficiency should enable us to reduce the size of future rate increases. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, by acquiring businesses that provide water and wastewater or other utility-related services, and investing in infrastructure projects.

**Sendout**

Sendout represents the quantity of treated water delivered to our distribution systems. We use sendout as an indicator of customer demand. Weather conditions tend to impact water consumption, particularly during the late spring, summer, and early fall when discretionary and recreational use of water is at its highest. Consequently, a higher proportion of annual operating revenues are realized in the second and third quarters. In general, during this period, an extended period of hot and dry weather increases water consumption, while above-average rainfall and cool weather decreases water consumption. Conservation efforts, construction codes that require the use of low-flow plumbing fixtures, as well as mandated water use restrictions in response to drought conditions can reduce water consumption. We believe an increase in conservation awareness by our customers, including the increased use of more efficient plumbing fixtures and appliances, may continue to result in a long-term structural trend of declining water usage per customer. These gradual long-term changes are normally taken into account by the utility commissions in setting rates, whereas significant short-term changes in water usage, resulting from drought warnings, water use restrictions, or extreme weather conditions, may not be fully reflected in the rates we charge between rate proceedings.

On occasion, drought warnings and water use restrictions are issued by governmental authorities for portions of our service territories in response to extended periods of dry weather conditions, regardless of our ability to meet unrestricted customer water demands. The timing and duration of the warnings and restrictions can have an impact on our water revenues and net income. In general, water consumption in the summer months is affected by drought warnings and restrictions to a higher degree because discretionary and recreational use of water is highest during the summer months, particularly in our northern service territories. At other times of the year, warnings and restrictions generally have less of an effect on water consumption. Currently, portions of our northern and central Texas service areas have conservation water restrictions. Drought warnings and watches result in the public being asked to voluntarily reduce water consumption.

The geographic diversity of our utility customer base reduces the effect of our exposure to extreme or unusual weather conditions in any one area of the country. During the year ended December 31, 2017, our operating revenues were derived principally from the following states: approximately 52% in Pennsylvania, 13% in Ohio, 9% in Texas, 8% in Illinois, and 7% in North Carolina.

**Performance Measures Considered by Management**

We consider the following financial measures (and the period to period changes in these financial measures) to be the fundamental basis by which we evaluate our operating results:

- earnings per share;
- operating revenues;
- income from continuing operations;
- earnings before interest, taxes, and depreciation ("EBITD");
- earnings before income taxes as compared to our operating budget;
- net income; and
- the dividend rate on common stock.

In addition, we consider other key measures in evaluating our utility business performance within our Regulated segment:

- our number of utility customers;
- the ratio of operations and maintenance expense compared to operating revenues (this percentage is termed "operating expense ratio");
- return on revenues (income from continuing operations divided by operating revenues);
- rate base growth;
- return on equity (net income divided by stockholders' equity); and
- the ratio of capital expenditures to depreciation expense.

Furthermore, we review the measure of earnings before unusual items that are noncash and not directly related to our core business, such as the measure of adjusted earnings to remove the joint venture impairment charge, which was recognized in 2015. Refer to Note 1 – *Summary of Significant Accounting Policies – Investment in Joint Venture* in this Annual Report for information regarding the impairment charge. We review these measurements regularly and compare them to historical periods, to our operating budget as approved by our Board of Directors, and to other publicly-traded water utilities.

Our operating expense ratio is one measure that we use to evaluate our operating efficiency and management effectiveness of our regulated operations. Our operating expense ratio is affected by a number of factors, including the following:

- ***Regulatory lag*** **–** Our rate filings are designed to provide for the recovery of increases in costs of operations (primarily labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claim costs, and costs to comply with environmental regulations), capital, and taxes. The revenue portion of the operating expense ratio can be impacted by the timeliness of recovery of, and the return on capital investments. The operating expense ratio is further influenced by regulatory lag (increases in operations and maintenance expenses not yet recovered in rates or a gap between the time that a capital project is completed and the start of its cost recovery in rates). The operating expense ratio is also influenced by decreases in operating revenues without a commensurate decrease in operations and maintenance expense, such as changes in customer water consumption as impacted by adverse weather conditions, conservation trends, or as a result of utility rates incorporating the effects of income tax benefits derived from deducting qualifying utility asset improvements for tax purposes that are capitalized for book purposes in Aqua Pennsylvania and consequently forgoing operating revenue increases. During periods of inflation, our operations and maintenance expenses may increase, impacting the operating expense ratio, as a result of regulatory lag, since our rate cases may not be filed timely and are not retroactive.

- ***Acquisitions*** **–** In general, acquisitions of smaller undercapitalized utility systems in some areas may initially increase our operating expense ratio if the operating revenues generated by these operations are accompanied by a higher ratio of operations and maintenance expenses as compared to other operational areas of the company that are more densely populated and have integrated operations. In these cases, the acquired operations are characterized as having relatively higher operating costs to fixed capital costs, in contrast to the majority of our operations, which generally consist of larger, interconnected systems, with higher fixed capital costs (utility plant investment) and lower operating costs per customer. In addition, we operate market-based subsidiary companies, Aqua Resources and Aqua Infrastructure. The cost-structure of these market-based companies differs from our utility companies in that, although they may generate free cash flow, these companies have a higher ratio of operations and maintenance expenses to operating revenues and a lower capital investment and, consequently, a lower ratio of fixed capital costs versus operating revenues in contrast to our regulated operations. As a result, the operating expense ratio is not comparable between the businesses. These market-based subsidiary companies are not a component of our Regulated segment.

We continue to evaluate initiatives to help control operating costs and improve efficiencies.

(*In thousands of dollars, except per share amounts*)

**Consolidated Selected Financial and Operating Statistics**

Our selected five-year consolidated financial and operating statistics follow:

| Years ended December 31, | 2017 | 2016 | 2015 | 2014 | 2013 |
|---|---|---|---|---|---|
| Utility customers: | | | | | |
| Residential water | 807,872 | 801,190 | 791,404 | 779,665 | 771,660 |
| Commercial water | 40,956 | 40,582 | 40,151 | 39,614 | 39,237 |
| Industrial water | 1,338 | 1,349 | 1,353 | 1,357 | 1,368 |
| Other water | 19,430 | 19,036 | 17,420 | 17,412 | 17,230 |
| Wastewater | 113,253 | 110,108 | 107,538 | 102,071 | 98,705 |
| Total utility customers | 982,849 | 972,265 | 957,866 | 940,119 | 928,200 |
| Operating revenues: | | | | | |
| Residential water | $ 483,865 | $ 484,901 | $ 477,773 | $ 460,013 | $ 457,404 |
| Commercial water | 130,373 | 131,170 | 126,677 | 122,795 | 121,178 |
| Industrial water | 27,880 | 27,916 | 28,021 | 27,369 | 25,263 |
| Other water | 65,324 | 62,983 | 56,997 | 59,474 | 57,446 |
| Wastewater | 87,560 | 82,780 | 79,399 | 76,472 | 73,062 |
| Other utility | 9,903 | 10,357 | 10,746 | 9,934 | 10,174 |
| Regulated segment total | 804,905 | 800,107 | 779,613 | 756,057 | 744,527 |
| Other and eliminations | 4,620 | 19,768 | 34,591 | 23,846 | 17,366 |
| Consolidated operating revenues | $ 809,525 | $ 819,875 | $ 814,204 | $ 779,903 | $ 761,893 |
| Operations and maintenance expense | $ 287,206 | $ 304,897 | $ 309,310 | $ 288,556 | $ 283,561 |
| Joint venture impairment charge (1) | $ - | $ - | $ 21,433 | $ - | $ - |
| Income from continuing operations | $ 239,738 | $ 234,182 | $ 201,790 | $ 213,884 | $ 202,871 |
| Net income | $ 239,738 | $ 234,182 | $ 201,790 | $ 233,239 | $ 221,300 |
| Capital expenditures | $ 478,089 | $ 382,996 | $ 364,689 | $ 328,605 | $ 307,908 |
| **Operating Statistics** | | | | | |
| Selected operating results as a percentage of operating revenues: | | | | | |
| Operations and maintenance | 35.5% | 37.2% | 38.0% | 37.0% | 37.2% |
| Depreciation and amortization | 16.9% | 16.2% | 15.8% | 16.2% | 16.3% |
| Taxes other than income taxes | 7.0% | 6.9% | 6.8% | 6.5% | 6.9% |
| Interest expense, net | 10.9% | 9.8% | 9.4% | 9.8% | 10.1% |
| Income from continuing operations | 29.6% | 28.6% | 24.8% | 27.4% | 26.6% |
| Return on Aqua America stockholders' equity | 12.2% | 12.7% | 11.7% | 14.1% | 14.4% |
| Ratio of capital expenditures to depreciation expense | 3.5 | 2.9 | 2.9 | 2.7 | 2.6 |
| Effective tax rate | 6.6% | 8.2% | 6.9% | 10.5% | 9.5% |

(1) Represents a $21,433 ($32,975 pre-tax) joint venture impairment charge. This amount represents our share of the impairment charge recognized by our joint venture that operates a private pipeline to supply raw water to firms with natural gas well drilling operations.

## RESULTS OF OPERATIONS

Our income from continuing operations has grown at an annual compound rate of approximately 5.7% and our net income has grown at an annual compound rate of approximately 4.1% during the five-year period ended December 31, 2017. During the past five years, operating revenues grew at a compound rate of 1.5% and operating expenses grew at a compound rate of 2.1%.

**Operating Segments**

We have identified ten operating segments and we have one reportable segment based on the following:

- Eight segments are composed of our water and wastewater regulated utility operations in the eight states where we provide these services. These operating segments are aggregated into one reportable segment since each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution and/or wastewater collection methods, and the nature of the regulatory environment. Our single reportable segment is named the Regulated segment.

- Two segments are not quantitatively significant to be reportable and are composed of Aqua Resources and Aqua Infrastructure. These segments are included as a component of "Other," in addition to corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

(*In thousands of dollars, except per share amounts*)

The following table provides the Regulated segment and consolidated information for the years ended December 31, 2017, 2016, and 2015:

| | 2017 | | | 2016 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other and Eliminations | Consolidated | Regulated | Other and Eliminations | Consolidated |
| Operating revenues | $ 804,905 | $ 4,620 | $ 809,525 | $ 800,107 | $ 19,768 | $ 819,875 |
| Operations and maintenance expense | 286,962 | 244 | 287,206 | 285,347 | 19,550 | 304,897 |
| Taxes other than income taxes | 54,524 | 2,104 | 56,628 | 53,916 | 2,469 | 56,385 |
| Earnings (loss) before interest, taxes, depreciation and amortization | $ 463,419 | $ 2,272 | 465,691 | $ 460,844 | $ (2,251) | 458,593 |
| Depreciation and amortization | | | 136,724 | | | 133,008 |
| Operating income | | | 328,967 | | | 325,585 |
| Other expense (income): | | | | | | |
| Interest expense, net | | | 88,341 | | | 80,594 |
| Allowance for funds used during construction | | | (15,211) | | | (8,815) |
| Gain on sale of other assets | | | (484) | | | (378) |
| Equity income in joint venture | | | (331) | | | (976) |
| Provision for income taxes | | | 16,914 | | | 20,978 |
| Net income | | | $ 239,738 | | | $ 234,182 |

| | 2015 | | |
|---|---|---|---|
| | Regulated | Other and Eliminations | Consolidated |
| Operating revenues | $ 779,613 | $ 34,591 | $ 814,204 |
| Operations and maintenance expense | 282,866 | 26,444 | 309,310 |
| Taxes other than income taxes | 52,361 | 2,696 | 55,057 |
| Earnings before interest, taxes, depreciation and amortization | $ 444,386 | $ 5,451 | 449,837 |
| Depreciation and amortization | | | 128,737 |
| Operating income | | | 321,100 |
| Other expense (income): | | | |
| Interest expense, net | | | 76,536 |
| Allowance for funds used during construction | | | (6,219) |
| Gain on sale of other assets | | | (468) |
| Gain on extinguishment of debt | | | (678) |
| Equity loss in joint venture | | | 35,177 |
| Provision for income taxes | | | 14,962 |
| Net income | | | $ 201,790 |

**Consolidated Results**

***Operating Revenues –*** Operating revenues totaled $809,525 in 2017, $819,875 in 2016, and $814,204 in 2015. Our Regulated segment's revenues totaled $804,905 in 2017, $800,107 in 2016, and $779,613 in 2015. The growth in our Regulated segment's revenues over the past three years is a result of increases in our water and wastewater rates and our customer base. Rate increases implemented during the past three years have provided additional operating revenues of $6,143 in 2017, $4,319 in 2016, and $8,503 in 2015. Negatively impacting revenues in 2017 was a decrease in customer water consumption primarily due to unfavorable weather conditions during the year. The number of customers increased at an annual compound rate of 1.4% over the past three years due to acquisitions and organic growth, adjusted to exclude customers associated with utility system dispositions. Acquisitions in our Regulated segment have provided additional water and wastewater revenues of $1,695 in 2017, $8,201 in 2016, and $8,900, in 2015.

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its last rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that historically had been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change which provides for the flow-through of income tax benefits that resulted in a substantial reduction in income tax expense and greater net income and cash flow. As a result, Aqua Pennsylvania was able to suspend its water Distribution System Improvement Charges from January 1, 2013 to September 30, 2017, when it resumed the use of a water Distribution System Improvement Charge on October 1, 2017. Aqua Pennsylvania was able to lengthen the amount of time until its next base rate case, which is expected to be filed in 2018. During 2017, 2016, and 2015, the income tax accounting change resulted in income tax benefits of $84,766, $78,530, and $72,944 that reduced the Company's current income tax expense and increased net income. The Company recognized a tax deduction on its 2012 Federal tax return of $380,000 for qualifying capital expenditures made prior to 2012. Based on the settlement agreement, beginning in 2013, the Company began to amortize 1/10$^{th}$ of these expenditures, or $38,000 annually, which reduced income tax expense and increased the Company's net income by $16,734, which is included in the income tax benefits noted previously. In accordance with the settlement agreement, this amortization is expected to reduce income tax expense during periods when qualifying parameters are met.

Our operating subsidiaries received rate increases representing estimated annualized revenues of $7,558 in 2017 resulting from five base rate decisions, $3,434 in 2016 resulting from six rate decisions, and $3,347 in 2015 resulting from four rate decisions. Revenues from these increases realized in the year of grant were $6,343 in 2017, $1,788 in 2016, and $2,887 in 2015. As of December 31, 2017, our operating subsidiaries have filed two rate requests, which are being reviewed by the state utility commissions, proposing an aggregate increase of $13,888 in annual revenues. During 2018, we intend to file five additional rate requests proposing an aggregate of approximately $80,000 of increased annual revenues; the timing and extent to which our rate increase requests may be granted will vary by state. Our planned rate filings for 2018 are subject to the issuance of procedural orders directing how the Federal tax law changes are to be reflected in our utility customer rates.

Currently, Pennsylvania, Illinois, Ohio, Indiana, New Jersey, and North Carolina allow for the use of a surcharge for replacing and rehabilitating infrastructure systems. The rate increases under this surcharge typically adjust periodically based on additional qualified capital expenditures completed or anticipated in a future period. This surcharge is capped as a percentage of base rates, generally at 5% to 12.75% of base rates, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. These surcharges provided revenues of $10,255 in 2017, $7,379 in 2016, and $3,261 in 2015.

Our Regulated segment also includes operating revenues of $9,903 in 2017, $10,357 in 2016, and $10,746 in 2015 associated with contract operations that are integrated into the regulated utility business and operations. These amounts vary over time according to the level of activity associated with the utility contract operations.

In addition to the Regulated segment operating revenues, we recognized market-based revenues that are associated with Aqua Resources and Aqua Infrastructure of $4,798 in 2017, $20,091 in 2016, and $34,909 in 2015. The decrease in revenues in 2017 and 2016 is due to the disposition of business units within Aqua Resources.

***Operations and Maintenance Expenses –*** Operations and maintenance expenses totaled $287,206 in 2017, $304,897 in 2016, and $309,310 in 2015. Most elements of operating costs are subject to the effects of inflation and changes in the number of customers served. Several elements are subject to the effects of changes in water consumption, weather, and the degree of water treatment required due to variations in the quality of the raw water. The principal elements of operating costs are labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claims costs, and costs to comply with environmental regulations. Electricity and chemical expenses vary in relationship to water consumption, raw water quality, and price changes. Maintenance expenses are sensitive to extremely cold weather, which can cause water mains to rupture, resulting in additional costs to repair the affected main.

Operations and maintenance expenses decreased in 2017, as compared to 2016, by $17,691 or 5.8%, primarily due to:

- decreases in market-based activities expenses of $15,933 due to the disposition of business units within Aqua Resources;
- a decrease in water production costs of $6,301 primarily due to a reduction in purchased water expense of $4,794 due to replacing a purchased water supply with the Company's own water supply source;
- a decrease in the Company's self-insured employee medical benefit program expense of $4,838;
- offset by $4,102 for the timing of expenses incurred for the maintenance of our utility systems and the purchase of supplies, as well as other increases in operations and maintenance expenses.

Operations and maintenance expenses decreased in 2016 as compared to 2015 by $4,413 or 1.4%, primarily due to:

- decreases in market-based activities expenses of $10,393 due to the disposition of business units within Aqua Resources;
- a decrease in water production costs of $3,156;
- the effects of the recognition in 2015 of:
    - leadership transition expenses of $2,510,
    - the recording of a reserve of $1,862 for water rights held for future use, and
    - the recording of a legal contingency reserve of $1,580;
- the reversal of a reserve for a legal contingency of $1,580;
- offset by an increase in postretirement benefits of $5,554; and
- additional operating costs associated with acquisitions of $4,538, as well as other increases in operations and maintenance expenses.

***Depreciation and Amortization Expenses –*** Depreciation expense was $136,302 in 2017, $130,987 in 2016, and $125,290 in 2015, and has increased principally as a result of the significant capital expenditures made to expand and improve our utility facilities, and our acquisitions of new utility systems.

Amortization expense was $422 in 2017, $2,021 in 2016, and $3,447 in 2015, and has decreased primarily due to the completion of the recovery of our costs associated with various rate filings. Expenses associated with filing rate cases are deferred and amortized over periods that generally range from one to three years.

***Taxes Other than Income Taxes –*** Taxes other than income taxes totaled $56,628 in 2017, $56,385 in 2016, and $55,057 in 2015. The increase in 2017 was primarily due to an increase in gross receipts, excise and franchise taxes of $949, and an increase in taxes assessed resulting from the pumping of ground water in Texas of $486 due to higher water production volume and rates, offset by a $978 decrease in property taxes primarily due to a favorable ruling on a property tax appeal in Ohio. The increase in 2016 was primarily due to an increase of $578 for pumping fees in Texas due to higher water production, a rate increase, and the addition of two water systems, and an increase in gross receipts, excise and franchise taxes of $502.

***Interest Expense, net*** – Net interest expense was $88,341 in 2017, $80,594 in 2016, and $76,536 in 2015. Interest income of $202 in 2017, $217 in 2016, and $272 in 2015 was netted against interest expense. Net interest expense increased in 2017 due to an increase in average borrowings of $157,768 and an increase in short-term and long-term interest rates. Net interest expense increased in 2016 due to an increase in average short-term borrowings of $9,808 at higher short-term interest rates and an increase in average outstanding fixed rate long-term debt of $98,006 partially offset by a decline in long-term interest rates. Interest income decreased in 2017 due to lower investment rates. The weighted average cost of fixed rate long-term debt was 4.35% at December 31, 2017, 4.26% at December 31, 2016, and 4.57% at December 31, 2015. The weighted average cost of fixed and variable rate long-term debt was 4.29% at December 31, 2017, 4.23% at December 31, 2016, and 4.44% at December 31, 2015.

***Allowance for Funds Used During Construction*** – The allowance for funds used during construction ("AFUDC") was $15,211 in 2017, $8,815 in 2016, and $6,219 in 2015, and varies as a result of changes in the average balance of utility plant construction work in progress, to which AFUDC is applied, changes in the AFUDC rate which is based predominantly on short-term interest rates, changes in the balance of short-debt, and changes in the amount of AFUDC related to equity. The increase in 2017 and 2016 is primarily due to an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity and in 2017 and 2016, and an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied. The amount of AFUDC related to equity was $11,633 in 2017, $6,561 in 2016, and $4,621 in 2015.

***Gain on Sale of Other Assets*** – Gain on sale of other assets totaled $484 in 2017, $378 in 2016, and $468 in 2015, and consists of the sales of property, plant and equipment and marketable securities.

***Gain on Extinguishment of Debt*** – The gain on extinguishment of debt of $678 in 2015 results from the recognition of the unamortized issuance premium for the early redemption of $95,985 of tax-exempt bonds at 5.00% that were originally maturing between 2035 and 2038.

***Equity (Earnings) Loss in Joint Venture*** – Equity (earnings) loss in joint venture totaled $(331) in 2017, $(976) in 2016, and $35,177 in 2015. The equity earnings in 2017 primarily resulted from the sale of raw water to firms in the natural gas drilling industry. The equity earnings in 2016 resulted from the recognition of a connection fee earned by the joint venture in 2016 for which our share was $1,831 and a reduction in depreciation expense resulting from the noncash impairment charge recognized by the joint venture on its long-lived assets in 2015. In 2015, a noncash impairment charge was recognized by the joint venture on its long-lived assets for which our share was $32,975. The impairment charge was recognized in 2015 as a result of a determination that the long-lived assets, primarily consisting of a pipeline and pump station, had become impaired due to a marked decline in natural gas prices in 2015, a distinguishable reduction in the volume of water sales by the joint venture which led to a lowered forecast in 2015 on future water sales volumes by the joint venture, as well as changes in the natural gas industry and market conditions. At the time of the impairment, these market conditions were largely associated with natural gas prices, which sharply declined in 2015 and this downturn no longer appeared to be temporary and instead was expected to be a long-term condition.

***Income Taxes*** – Our effective income tax rate was 6.6% in 2017, 8.2% in 2016, and 6.9% in 2015. The effective income tax rate for 2017, 2016, and 2015 was affected by the 2012 income tax accounting change for qualifying utility asset improvements at Aqua Pennsylvania which resulted in a $84,766, $78,530, and $72,944 net reduction to the Company's 2017, 2016, and 2015 Federal and state income tax expense, respectively. As of December 31, 2017, the Company has an unrecognized tax benefit related to the Company's change in its tax accounting method for qualifying utility asset improvement costs, of which up to $24,243 of these tax benefits would further reduce the Company's effective income tax rate in the event the Company does sustain all, or a portion, of its tax position in the period this information is determined. Offsetting this reduction was the effect of the revaluation of our deferred income tax assets and liabilities, triggered by the TCJA, which resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates.

(*In thousands of dollars, except per share amounts*)

***Summary –***

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Operating income | $ 328,967 | $ 325,585 | $ 321,100 |
| Net income | 239,738 | 234,182 | 201,790 |
| Diluted net income per share | 1.35 | 1.32 | 1.14 |

The changes in diluted net income per share in 2017 and 2016 over the previous years were due to the aforementioned changes.

Although we have experienced increased income in the recent past, continued adequate rate increases reflecting increased operating costs and new capital investments, are important to the future realization of improved profitability.

***Fourth Quarter Results –*** The following table provides our fourth quarter results:

| | Three Months Ended December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Operating revenues | $ 203,312 | $ 196,799 |
| Operations and maintenance | 79,243 | 77,550 |
| Depreciation | 34,794 | 33,342 |
| Amortization | 64 | 654 |
| Taxes other than income taxes | 12,238 | 13,291 |
| | 126,339 | 124,837 |
| Operating income | 76,973 | 71,962 |
| Other expense (income): | | |
| Interest expense, net | 23,217 | 20,458 |
| Allowance for funds used during construction | (4,641) | (2,369) |
| (Gain) loss on sale of other assets | (162) | 12 |
| Equity loss in joint venture | 71 | 167 |
| Income before income taxes | 58,488 | 53,694 |
| Provision for income taxes | 5,015 | 4,045 |
| Net income | $ 53,473 | $ 49,649 |

The increase in operating revenues of $6,513 was primarily due to an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $4,247, an increase in customer water consumption, and additional revenues of $438 associated with a larger customer base due to utility acquisitions, offset by a decrease in market-based activities revenue of $2,323 due to dispositions.

The increase in operations and maintenance expense of $1,693 is due primarily to $3,490 associated with the timing of expenses incurred for the maintenance of our utility systems and the purchase of supplies, an increase in postretirement benefits expense of $1,249, offset by a decrease in market-based activities expenses of $2,952, and a decrease in water production costs of $1,842 due to replacing a purchased water supply with the Company's own water supply source.

Depreciation expense increased by $1,452 primarily due to the utility plant placed in service since December 31, 2016.

The decrease in other taxes of $1,053 is primarily due to a decrease in property taxes of $1,466 due to a favorable property tax appeal in Ohio, offset by an increase in capital stock taxes of $199 due to the effect of a reversal of a reserve from the prior year, and an increase in taxes assessed resulting from the pumping of ground water in Texas of $166 due to higher water production volume and rates.

(*In thousands of dollars, except per share amounts*)

Interest expense increased by $2,759 due to an increase in the average outstanding debt balance.

AFUDC increased by $2,272 due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

The provision for income taxes increased by $970 primarily as a result of the revaluation of our deferred income tax assets and liabilities, triggered by the TCJA, which resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates, offset by the effect of additional tax deductions recognized in the fourth quarter of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

## LIQUIDITY AND CAPITAL RESOURCES

**Consolidated Cash Flow and Capital Expenditures**
Net operating cash flows from continuing operations, dividends paid on common stock, capital expenditures used in continuing operations, including allowances for funds used during construction, and expenditures for acquiring water and wastewater systems for our continuing operations for the five years ended December 31, 2017 were as follows:

| | Net Operating Cash Flows | Dividends | Capital Expenditures | Acquisitions |
|---|---|---|---|---|
| 2013 | $ 365,803 | $ 102,889 | $ 307,908 | $ 14,997 |
| 2014 | 364,888 | 112,106 | 328,605 | 14,616 |
| 2015 | 370,794 | 121,248 | 364,689 | 28,989 |
| 2016 | 396,163 | 130,923 | 382,996 | 9,423 |
| 2017 | 381,318 | 140,660 | 478,089 | 5,860 |
| | $ 1,878,966 | $ 607,826 | $ 1,862,287 | $ 73,885 |

Included in capital expenditures for the five-year period are: expenditures for the rehabilitation of existing water and wastewater systems, the expansion of our water and wastewater systems, modernization and replacement of existing treatment facilities, water meters, office facilities, information technology, vehicles, and equipment. During this five-year period, we received $31,657 of customer advances and contributions in aid of construction to finance new water mains and related facilities that are not included in the capital expenditures presented in the above table. In addition, during this period, we have made repayments of debt of $978,762, and have refunded $22,607 of customers' advances for construction. Dividends increased during the past five years as a result of annual increases in the dividends declared and paid and increases in the number of shares outstanding.

Our planned 2018 capital program, exclusive of the costs of new mains financed by advances and contributions in aid of construction, is estimated to be approximately $500,000 in infrastructure improvements for the communities we serve. The 2018 capital program is expected to include $213,200 for infrastructure rehabilitation surcharge qualified projects. On January 1, 2013, Aqua Pennsylvania reset its water infrastructure rehabilitation surcharge to zero resulting from the change in its tax method of accounting for qualifying utility asset improvements as described below. Although we were not eligible to use an infrastructure rehabilitation surcharge with our Aqua Pennsylvania water customers from January 1, 2013 to September 30, 2017, we were able to use the income tax savings derived from the qualifying utility asset improvements to maintain Aqua Pennsylvania's capital investment program. Our planned 2018 capital program in Pennsylvania is estimated to be approximately $337,000, a portion of which is expected to be eligible as a deduction for qualifying utility asset improvements for Federal income tax purposes. Our overall 2018 capital program, along with $113,769 of debt repayments and $160,973 of other contractual cash obligations, as reported in the section captioned

"Management's Discussion and Analysis of Financial Condition and Results of Operations – *Contractual Obligations*", has been, or is expected to be, financed through internally-generated funds, our revolving credit facilities, and the issuance of long-term debt.

Future utility construction in the period 2019 through 2020, including recurring programs, such as the ongoing replacement or rehabilitation of water meters and water mains, water treatment plant upgrades, storage facility renovations, and additional transmission mains to meet customer demands, exclusive of the costs of new mains financed by advances and contributions in aid of construction, is estimated to require aggregate expenditures of approximately \$875,000. We anticipate that approximately one-half of these expenditures will require external financing. We expect to refinance \$189,025 of long-term debt during this period as they become due with new issues of long-term debt, internally-generated funds, and our revolving credit facilities. The estimates discussed above do not include any amounts for possible future acquisitions of water and wastewater systems or the financing necessary to support them.

Our primary sources of liquidity are cash flows from operations (including the allowed deferral of Federal income tax payments), borrowings under various short-term lines of credit and other credit facilities, and customer advances and contributions in aid of construction. Our cash flow from operations, or internally-generated funds, is impacted by the timing of rate relief, water consumption, and changes in Federal tax laws with respect to the reduction in the corporate income tax rate, and accelerated tax depreciation or deductions for utility construction projects. We fund our capital and typical acquisitions through internally-generated funds, supplemented by short-term lines of credit. Over time, we partially repay or pay-down our short-term lines of credit with long-term debt. The ability to finance our future construction programs, as well as our acquisition activities, depends on our ability to attract the necessary external financing and maintain internally-generated funds. Timely rate orders permitting compensatory rates of return on invested capital will be required by our operating subsidiaries to achieve an adequate level of earnings and cash flow to enable them to secure the capital they will need to operate and to maintain satisfactory debt coverage ratios.

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that have historically been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change, which resulted in a substantial reduction in income tax expense and greater net income and cash flow, and as a result allowed Aqua Pennsylvania to suspend its water Distribution System Improvement Charges from January 1, 2013 to September 30, 2017, and lengthen the amount of time until the next Aqua Pennsylvania rate case, which is expected to be filed in 2018. As a result of the Pennsylvania rate order, income tax benefits reduced the Company's current income tax expense and increased net income by \$84,766 in 2017, \$78,530 in 2016, and \$72,944 in 2015. The Company recognized a tax deduction on its 2012 Federal tax return of \$380,000 for qualifying capital expenditures made prior to 2012, and based on the settlement agreement, beginning in 2013, the Company began to amortize $1/10^{th}$ of these expenditures or \$38,000 annually, which reduced income tax expense and increased the Company's net income by \$16,734. In accordance with the settlement agreement, this amortization is expected to reduce income tax expense during periods when qualifying parameters are met.

**Acquisitions**

As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of six municipalities for a total combined purchase price in cash of \$150,700. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur by the end of 2018, which is subject to the timing of the regulatory approval process. These acquisitions are expected to add approximately 16,325 customers in two of the states in which the Company operates.

During the past five years, we have expended cash of $73,885 and issued 439,943 shares of common stock, valued at $12,845 at the time of acquisition, related to the acquisition of utility systems, both water and wastewater utilities, as well as investments in supplying raw water to the natural gas drilling industry.

In 2017, we completed four acquisitions of water and wastewater utility systems for $5,860 in cash in two of the states in which we operate, adding 1,003 customers.

In January 2016, we acquired the water and wastewater utility system assets of Superior Water Company, Inc., which provided public water service to 4,108 customers in portions of Berks, Chester, and Montgomery counties in Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. Additionally, during 2016, we completed 18 acquisitions of water and wastewater utility systems for $5,518 in cash in eight of the states in which we operate, adding 2,469 customers.

In April 2015, we acquired the water and wastewater utility system assets of North Maine Utilities, located in the Village of Glenview, Illinois serving 7,409 customers. The total purchase price consisted of $23,079 in cash. Additionally, during 2015, we completed 14 acquisitions of water and wastewater utility systems for $5,210 in cash in six of the states in which we operate, adding 3,170 customers.

During 2014, we completed 16 acquisitions of water and wastewater utility systems for $10,530 in cash in seven of the states in which we operate, adding 6,148 customers. Further, in 2014, we acquired two market-based businesses that specialized in inspecting, cleaning and repairing storm and sanitary sewer lines, as well as providing water distribution system services and training to waterworks operators. The total purchase price in aggregate was $4,810 and both these businesses were subsequently sold in November 2016 and January 2017.

During 2013, we completed 15 acquisitions of water and wastewater utility systems for $14,997 in cash in four of the states in which we operate, adding 5,991 customers.

We continue to pursue the acquisition of water and wastewater utility systems, and explore other utility acquisitions that may be in a new state. Our typical acquisitions are expected to be financed with short-term debt with subsequent repayment from the proceeds of long-term debt, retained earnings, or equity issuances.

**Joint Venture**

In September 2011, one of our subsidiaries entered into a joint venture with a firm that operates natural gas pipelines and processing plants for the construction and operation of a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north-central Pennsylvania (the "Joint Venture"). We own 49% of the Joint Venture. The 56 mile pipeline construction and permitted intake on the Susquehanna River cost $109,000. As of December 31, 2017, our capital contributions since inception totaled $53,643 in cash. This investment has been financed through the issuance of long-term debt. Our 49% investment in the Joint Venture is an unconsolidated affiliate and is accounted for under the equity method of accounting. Our initial investment is carried at cost. Subsequently, the carrying amount of our investment is adjusted to reflect capital contributions or distributions, our equity in earnings and losses since the commencement of the system's operations, and a decline in the fair value of our investment. In 2015, an impairment charge was recognized by the joint venture on its long-lived assets, of which the Company's share totaled $32,975 ($21,433 after-tax), representing our share of the noncash impairment charge as further described in Note 1 – *Summary of Significant Accounting Policies – Investment in Joint Venture* in this Annual Report.

**Dispositions**

We routinely review and evaluate areas of our business and operating divisions and, over time, may sell utility systems or portions of systems. In 2017, the Company sold two business units within Aqua Resources, which resulted in total proceeds of $867, and recognized a net loss of $324. In 2016, the Company sold two business units within Aqua Resources, which resulted in total proceeds of $4,459, and recognized a net loss of $543.

In December 2014, we completed the sale of our water utility system in southwest Allen County Indiana to the City of Fort Wayne, Indiana for $67,011, which is comprised of $50,100 in addition to $16,911 the city initially paid the Company towards its water and wastewater system assets in the northern part of Fort Wayne in 2008. We recognized a gain on sale of $29,210 ($17,611 after-tax) in the fourth quarter of 2014. In addition, as a result of this transaction, Aqua Indiana expanded its sewer customer base by accepting new wastewater flows from the City. Additionally, in March, 2014, we completed the sale of our wastewater treatment facility in Georgia.

In 2013, in accordance with our strategy to focus our resources on states where we have critical mass to improve our economies of scale and expect future economic growth, we sold water and wastewater systems in Florida, through five separate sales transactions. The Company received total net proceeds from these sales of $88,934, and recognized a gain on sale of $21,178 ($13,766 after-tax).

Additionally, in June 2013, the Company sold a water and wastewater utility system in Texas for net proceeds of $3,400. The sale resulted in the recognition of a gain on sale of these assets, net of expenses, of $1,025 ($615 after-tax).

Despite these transactions, one of our primary strategies continues to be to acquire additional utility systems, to maintain our existing systems where there is a strategic business benefit, and to actively oppose unilateral efforts by municipal governments to acquire any of our operations.

**Sources of Capital**

Since net operating cash flow plus advances and contributions in aid of construction have not been sufficient to fully fund cash requirements, we issued $1,670,223 of long-term debt and obtained other short-term borrowings during the past five years. At December 31, 2017, we have a $250,000 long-term revolving credit facility that expires in February 2021, of which $19,811 was designated for letter of credit usage, $170,189 was available for borrowing, and $60,000 of borrowings were outstanding at December 31, 2017. In addition, we have short-term lines of credit of $135,500, of which $131,850 was available as of December 31, 2017. These short-term lines of credit are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

Our consolidated balance sheet historically has had a negative working capital position, whereby routinely our current liabilities exceed our current assets. Management believes that internally-generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

Our loan and debt agreements require us to comply with certain financial covenants, which among other things, subject to specific exceptions, limit the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2017, we were in compliance with our debt covenants under our credit facilities. Failure to comply with our debt covenants could result in an event of default, which could result in us being required to repay or refinance our borrowings before their due date, possibly limiting our future borrowings, and increasing our borrowing costs.

The Company has a universal shelf registration statement, which was filed with the SEC in February 2015, which allows for the potential future offer and sale by us, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities, and other securities specified therein at indeterminate prices. The Company's Board of Directors has authorized the Company to issue up to $500,000 of our common stock, preferred stock, debt securities, and other securities specified therein under this universal shelf registration statement. The Company has not issued any securities to date under this universal shelf registration statement. This registration statement expires in February 2018, and we intend to file a new three-year universal shelf registration statement.

In addition, we have a shelf registration statement, which was filed with the SEC on February 27, 2015, to permit the offering from time to time of an aggregate of $500,000 of our common stock and shares of preferred stock in connection with acquisitions. During 2016, we issued 439,943 shares of common stock totaling $12,845 to acquire a water system. The balance remaining available for use under the acquisition shelf registration as of December 31, 2017 is $487,155.

We will determine the form and terms of any securities issued under the universal shelf registration statement and the acquisition shelf registration statement at the time of issuance.

We offer a Dividend Reinvestment and Direct Stock Purchase Plan (the "Plan") that provides a convenient and economical way to purchase shares of the Company. Under the direct stock purchase portion of the Plan, shares are issued throughout the year. The dividend reinvestment portion of the Plan offers a five percent discount on the purchase of shares of common stock with reinvested dividends. As of the December 2017 dividend payment, holders of 9.9% of the common shares outstanding participated in the dividend reinvestment portion of the Plan. The shares issued under the Plan are either original issue shares or shares purchased by the Company's transfer agent in the open-market. During the past five years, we have sold 551,788 original issue shares of common stock for net proceeds of $13,625 through the dividend reinvestment portion of the Plan, and we used the proceeds to invest in our operating subsidiaries, to repay short-term debt, and for general corporate purposes. In 2017, 2016, and 2015, 447,753, 484,645, and 535,439 shares of common stock were purchased under the dividend reinvestment portion of the Plan by the Company's transfer agent in the open-market for $15,168, $14,916, and $14,380, respectively.

The Company's Board of Directors has authorized us to repurchase our common stock, from time to time, in the open market or through privately negotiated transactions. In 2014, we repurchased 560,000 shares of our common stock in the open market for $13,280. In December 2014, the Company's Board of Directors authorized a share buyback program of up to 1,000,000 shares to minimize share dilution through timely and orderly share repurchases. In December 2015, the Company's Board of Directors added 400,000 shares to this program. In 2015, we repurchased 805,000 shares of our common stock in the open market for $20,502. In 2016, we did not repurchase any shares of our common stock in the open market under this program. This program expired on December 31, 2016.

**Off-Balance Sheet Financing Arrangements**
We do not engage in any off-balance sheet financing arrangements. We do not have any interest in entities referred to as variable interest entities, which includes special purpose entities and other structured finance entities.

(*In thousands of dollars, except per share amounts*)

**Contractual Obligations**

The following table summarizes our contractual cash obligations as of December 31, 2017:

| | | Payments Due By Period | | | |
|---|---|---|---|---|---|
| | Total | Less than 1 year | 1 - 3 years | 3 - 5 years | More than 5 years |
| Long-term debt | $ 2,143,127 | $ 113,769 | $ 189,025 | $ 121,966 | $ 1,718,367 |
| Interest on fixed-rate, long-term debt (1) | 1,366,407 | 77,497 | 148,277 | 131,248 | 1,009,385 |
| Operating leases (2) | 20,080 | 1,919 | 2,957 | 2,148 | 13,056 |
| Unconditional purchase obligations (3) | 31,510 | 4,853 | 8,989 | 8,024 | 9,644 |
| Other purchase obligations (4) | 63,064 | 63,064 | - | - | - |
| Pension plan obligation (5) | 12,484 | 12,484 | - | - | - |
| Other obligations (6) | 11,932 | 1,156 | 2,035 | 2,118 | 6,623 |
| Total | $ 3,648,604 | $ 274,742 | $ 351,283 | $ 265,504 | $ 2,757,075 |

(1) Represents interest payable on fixed rate, long-term debt. Amounts reported may differ from actual due to future refinancing of debt.

(2) Represents operating leases that are noncancelable, before expiration, for the lease of motor vehicles, buildings, land and other equipment.

(3) Represents our commitment to purchase minimum quantities of water as stipulated in agreements with other water purveyors. We use purchased water to supplement our water supply, particularly during periods of peak customer demand. Our actual purchases may exceed the minimum required levels.

(4) Represents an approximation of the open purchase orders for goods and services purchased in the ordinary course of business.

(5) Represents contributions to be made to pension plan.

(6) Represents expenditures estimated to be required under legal and binding contractual obligations.

In addition to these obligations, we pay refunds on customers' advances for construction over a specific period of time based on operating revenues related to developer-installed water mains or as new customers are connected to and take service from such mains. After all refunds are paid, any remaining balance is transferred to contributions in aid of construction. The refund amounts are not included in the above table because the refund amounts and timing are dependent upon several variables, including new customer connections, customer consumption levels and future rate increases, which cannot be accurately estimated. Portions of these refund amounts are payable annually through 2027 and amounts not paid by the contract expiration dates become non-refundable.

In addition to the obligations disclosed in the contractual obligations table above, we have uncertain tax positions of $17,583. Although we believe our tax positions comply with applicable law, we have made judgments as to the sustainability of each uncertain tax position based on its technical merits. Due to the uncertainty of future cash outflows, if any, associated with our uncertain tax positions, we are unable to make a reasonable estimate of the timing or amounts that may be paid. See Note 7 – *Income Taxes* in this Annual Report for further information on our uncertain tax positions.

We will fund these contractual obligations with cash flows from operations and liquidity sources held by or available to us.

(*In thousands of dollars, except per share amounts*)

The Company is routinely involved in legal matters, including both asserted and unasserted legal claims, during the ordinary course of business. See Note 9 – *Commitments and Contingencies* in this Annual Report for a discussion of the Company's legal matters. It is not always possible for management to make a meaningful estimate of the potential loss or range of loss associated with such litigation. Also, unanticipated changes in circumstances and/or revisions to the assessed probability of the outcomes of legal matters could result in expenses being incurred in future periods as well as an increase in actual cash required to resolve the legal matter.

**Capitalization**

The following table summarizes our capitalization during the past five years:

| December 31, | 2017 | 2016 | 2015 | 2014 | 2013 |
|---|---|---|---|---|---|
| Long-term debt (1) | 52.3% | 50.8% | 50.8% | 49.4% | 50.3% |
| Aqua America stockholders' equity | 47.7% | 49.2% | 49.2% | 50.6% | 49.7% |
| | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |

(1) Includes current portion, as well as our borrowings under a variable rate revolving credit agreement of $60,000 at December 31, 2017, $25,000 at December 31, 2016, $60,000 at December 31, 2015, $72,000 at December 31, 2014, and $0 at December 31, 2013.

Over the past five years, the changes in the capitalization ratios primarily resulted from the issuance of debt to finance our acquisitions and capital program, growth in net income, the issuance of common stock, and the declaration of dividends.

## INCOME TAX MATTERS

**Tax Cuts and Jobs Act of 2017**

On December 22, 2017, President Trump signed the TCJA into law. Substantially all of the provisions of the TCJA are effective for tax years beginning after December 31, 2017, except as noted below. The TCJA includes significant changes to the Code and the taxation of business entities, and includes specific provisions related to regulated public utilities. Significant changes include a reduction in the corporate federal income tax rate from 35% to 21%, and a limitation on the utilization of NOLs arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. The specific provisions related to regulated public utilities in the TCJA generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017 and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Our market-based companies still qualify for 100% deductibility of qualifying property acquired after September 27, 2017.

The Company's regulated operations accounting for income taxes are impacted by the FASB's accounting guidance for regulated operations. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates to 21% under the provisions of the TCJA results in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes are to be passed back to customers for certain accelerated tax depreciation benefits. Potential refunds of other deferred taxes will be determined by our state regulators. Our state regulatory commissions have or are in the process of issuing procedural orders directing how the tax law changes are to be reflected in our utility customer rates. In addition, we have two rate cases currently in progress in two states in which TCJA is expected to be addressed in the new base rates. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities, which reduced our regulatory assets by $357,262 and increased our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

As of December 31, 2017, resulting from the TCJA enactment, our deferred income tax assets and liabilities were revalued based upon the new corporate income tax rate of 21%. The revaluation of our deferred income tax assets and liabilities resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our financial condition and results of operations are impacted by the methods, assumptions, and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to our financial condition or results of operations, and require estimates or other judgments of matters of uncertainty. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the financial statements. We believe our most critical accounting policies include revenue recognition, the use of regulatory assets and liabilities, the valuation of our long-lived assets (which consist primarily of utility plant in service, regulatory assets, and goodwill) our accounting for post-retirement benefits, and our accounting for income taxes. We have discussed the selection and development of our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

***Revenue Recognition*** ─ Our utility revenues recognized in an accounting period include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the last billing to the end of the accounting period. The estimated usage is based on our judgment and assumptions; our actual results could differ from these estimates, which would result in operating revenues being adjusted in the period that the revision to our estimates is determined.
In Virginia, we commence the billing of our utility customers, under new rates, upon authorization from the respective utility commission and before the final commission rate order is issued. The revenue recognized reflects an estimate based on our judgment of the final outcome of the commission's ruling. We monitor the applicable facts and circumstances regularly, and revise the estimate as required. The revenue billed and collected prior to the final ruling is subject to refund based on the commission's final ruling.

***Regulatory Assets and Liabilities*** ─ We defer costs and credits on the balance sheet as regulatory assets and liabilities when it is probable that these costs and credits will be recognized in the rate-making process in a period different from when the costs and credits were incurred. These deferred amounts, both assets and liabilities, are then recognized in the income statement in the same period that they are reflected in our rates charged for water or wastewater service. In the event that our assessment as to the probability of the inclusion in the rate-making process is incorrect, the associated regulatory asset or liability would be adjusted to reflect the change in our assessment or change in regulatory approval.

***Valuation of Long-Lived Assets, Goodwill and Intangible Assets*** ─ We review our long-lived assets for impairment, including utility plant in service and investment in joint venture. We also review regulatory assets for the continued application of the Financial Accounting Standards Board's ("FASB") accounting guidance for regulated operations. Our review determines whether there have been changes in circumstances or events, such as regulatory disallowances, or abandonments, that have occurred that require adjustments to the carrying value of these assets. Adjustments to the carrying value of these assets would be made in instances where their inclusion in the rate-making process is unlikely.
For utility plant in service, we would recognize an impairment loss for any amount disallowed by the respective utility commission. For our equity method investment in joint venture, the Company evaluates whether it has experienced a decline in the value of its investment that is other than temporary in nature. We would recognize an impairment loss if the fair value of our investment is less than the carrying amount of the investment, and the decline in value is considered other than temporary. Additionally, the Company would recognize its share of an impairment loss if the joint venture determines that the carrying amount of the joint venture's assets exceeds the sum of the joint venture's undiscounted estimated cash flows.

Our long-lived assets, which consist primarily of utility plant in service, regulatory assets and investment in joint venture, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, we determine whether it is more likely than not that the fair value of those assets is less than their carrying amount. If we determine that it is more likely than not (that is, the likelihood of more than 50 percent), we would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, we would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. This assessment requires significant management judgment and estimates that are based on budgets, general strategic business plans, historical trends and other data and relevant factors. These estimates include significant inherent uncertainties, since they involve forecasting future events. If changes in circumstances or events occur, or estimates and assumptions that were used in this review are changed, we may be required to record an impairment charge on our long-lived assets.

We have an investment in a joint venture, for which we own 49%, and use the equity method of accounting to account for this joint venture. The joint venture operates a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north central Pennsylvania. In the fourth quarter of 2015, the joint venture recognized an impairment charge on its long-lived assets, of which the Company's share totaled $32,975 ($21,433 after-tax), representing our share of the noncash impairment charge. Refer to Note 1 – *Summary of Significant Accounting Policies – Property, Plant and Equipment and Depreciation*, and *Investment in Joint Venture* in this Annual Report for additional information regarding the review of long-lived assets for impairment. See also *Consolidated Results – Equity (Earnings) Loss in Joint Venture* above in this Annual Report.

We test the goodwill attributable for each of our reporting units for impairment at least annually on July 31, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Alternatively, based on our assessment of the qualitative factors previously noted, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit based on a discounted cash flow analysis. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The assessment requires significant management judgment and estimates that are based on budgets, general strategic business plans, historical trends and other data and relevant factors. If changes in circumstances or events occur, or estimates and assumptions that were used in our impairment test change, we may be required to record an impairment charge for goodwill. Refer to Note 1 – *Summary of Significant Accounting Policies – Goodwill* in this Annual Report for information regarding the results of our annual impairment test.

***Accounting for Post-Retirement Benefits*** ─ We maintain a qualified and a non-qualified defined benefit pension plan and plans that provide for post-retirement benefits other than pensions. Accounting for pension and other post-retirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by our employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from our actuarial consultant, who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefits expense that we recognize.

Our discount rate assumption, which is used to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds, all of which were noncallable (or callable with make-whole provisions), and have at least $50,000 in outstanding value. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the projected benefit payments of the plans. A decrease in the discount rate would increase our post-retirement benefits expense and benefit obligation. After reviewing the hypothetical portfolio of bonds, we selected a discount rate of 3.66% for our pension plan and 3.73% for our other post-retirement benefit plans as of December 31, 2017, which represent a 47 and 52 basis-point decrease as compared to the discount rates selected at December 31, 2016, respectively. Our post-retirement benefits expense under these plans is determined using the discount rate as of the beginning of the year, which was 4.13% for our pension plan and 4.25% for our other-postretirement benefit plans for 2017, and will be 3.66% for our pension plan and 3.73% for our other post-retirement benefit plans for 2018.

Our expected return on plan assets is determined by evaluating the asset class return expectations with our advisors as well as actual, long-term, historical results of our asset returns. The Company's market-related value of plan assets is equal to the fair value of the plans' assets as of the last day of its fiscal year, and is a determinant for the expected return on plan assets, which is a component of post-retirement benefits expense. The allocation of our plans' assets impacts our expected return on plan assets. In 2017, we changed the targeted allocation of the plans' assets to reflect 50% to 70% return seeking assets, and 30% to 50% liability hedging assets, which replaced the former targeted allocation of 25% to 75% domestic equities, 0% to 10% international equities, 25% to 50% fixed income, 0% to 5% alternative investments, and 0% to 20% cash and cash equivalents. Our post-retirement benefits expense increases as the expected return on plan assets decreases. We believe that our actual long-term asset allocations on average will approximate our targeted allocations. Our targeted allocations are driven by our investment strategy to earn a reasonable rate of return while maintaining risk at acceptable levels through the diversification of investments across and within various asset categories. For 2017, we used a 7.00% expected return on plan assets assumption which will decrease to 6.75% for 2018.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and our funding policy, during 2018 our pension contribution is expected to be $12,484. Future years' contributions will be subject to economic conditions, plan participant data and the funding rules in effect at such time as the funding calculations are performed, though we expect future changes in the amount of contributions and expense recognized to be generally included in customer rates.

***Accounting for Income Taxes*** ─ We estimate the amount of income tax payable or refundable for the current year and the deferred income tax liabilities and assets that results from estimating temporary differences resulting from the treatment of specific items, such as depreciation, for tax and financial statement reporting. Generally, these differences result in the recognition of a deferred tax asset or liability on our consolidated balance sheet and require us to make judgments regarding the probability of the ultimate tax impact of the various transactions we enter into. Based on these judgments, we may record tax reserves or adjustments to valuation allowances on deferred tax assets to reflect the expected realization of future tax benefits. Actual income taxes could vary from these estimates and changes in these estimates can increase income tax expense in the period that these changes in estimates occur.

Our determination of what qualifies as a capital cost versus a tax deduction, for qualifying utility asset improvements, as it relates to our income tax accounting method change beginning in 2012, is subject to subsequent adjustment as well as IRS audits, changes in income tax laws, including regulations regarding tax-basis depreciation as it applies to our capital expenditures, or qualifying utility asset improvements, the expiration of a statute of limitations, or other unforeseen matters could impact the tax benefits that have already been recognized. We establish reserves for uncertain tax positions based upon management's judgment as to the sustainability of these positions. These accounting estimates related to the uncertain tax position reserve require judgments to be made as to the sustainability of each uncertain tax position based on its technical merits. We believe our tax positions comply with applicable law and that we have adequately recorded reserves as required. However, to the extent the final tax outcome of these matters is different than our estimates recorded, we would then need to adjust our tax reserves which could result in additional income tax expense or benefits in the period that this information is known.

## IMPACT OF RECENT ACCOUNTING PRONOUNCEMENTS

We describe the impact of recent accounting pronouncements in Note 1 – *Summary of Significant Accounting Policies* in this Annual Report.

**AQUA AMERICA, INC. AND SUBSIDIARIES**
**Management's Report On Internal Control Over Financial Reporting**

Management of Aqua America, Inc. (the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In assessing the effectiveness of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework* (2013). As a result of management's assessment and based on the criteria in the framework, management has concluded that, as of December 31, 2017, the Company's internal control over financial reporting was effective.

The effectiveness of our internal control over financial reporting as of December 31, 2017 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Christopher H. Franklin
*Chairman, President and Chief Executive Officer*

David P. Smeltzer
*Executive Vice President and Chief Financial Officer*

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Aqua America, Inc.:

***Opinions on the Financial Statements and Internal Control over Financial Reporting***

We have audited the accompanying consolidated balance sheets and statements of capitalization of Aqua America Inc. and its subsidiaries as of December 31, 2017 and 2016, and the related consolidated statements of net income, of comprehensive income, of equity and of cash flows for each of the three years in the period ended December 31, 2017, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

***Basis for Opinions***

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

***Definition and Limitations of Internal Control over Financial Reporting***

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Note 1 – *Summary of Significant Accounting Policies***

***Nature of Operations*** ─ Aqua America, Inc. ("Aqua America," the "Company," "we," "our", or "us") is the holding company for regulated utilities providing water or wastewater services concentrated in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. The Company's other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater services through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within the Company's market-based subsidiary, Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016 we completed the sale of business units within Aqua Resources, which were reported as assets held for sale in the Company's consolidated balance sheets, which provided liquid waste hauling and disposal services, and inspection, and cleaning and repair of storm and sanitary wastewater lines.

The Company has identified ten operating segments and has one reportable segment named the Regulated segment. The reportable segment is comprised of eight operating segments for our water and wastewater regulated utility companies which are organized by the states where we provide these services. These operating segments are aggregated into one reportable segment since each of the Company's operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment. In addition, Aqua Resources and Aqua Infrastructure are not quantitatively significant to be reportable and are included as a component of "Other," in addition to corporate costs that have not been allocated to the Regulated segment and intersegment eliminations.

***Regulation*** ─ Most of the operating companies that are regulated public utilities are subject to regulation by the utility commissions of the states in which they operate. The respective utility commissions have jurisdiction with respect to rates, service, accounting procedures, issuance of securities, acquisitions and other matters. Some of the operating companies that are regulated public utilities are subject to rate regulation by county or city government. Regulated public utilities follow the Financial Accounting Standards Board's ("FASB") accounting guidance for regulated operations, which provides for the recognition of regulatory assets and liabilities as allowed by regulators for costs or credits that are reflected in current rates or are considered probable of being included in future rates. The regulatory assets or liabilities are then relieved as the cost or credit is reflected in rates.

***Use of Estimates in Preparation of Consolidated Financial Statements*** ─ The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

***Basis of Presentation –*** The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation in the consolidated statements of cash flows:

- pension and other postretirement benefit contributions; and
- as a result of the adoption in 2017 of the FASB's accounting guidance on the classification of certain cash receipts and cash payments, the presentation of debt extinguishment costs (refer to Note 1 – *Summary of Significant Accounting Policies, Recent Accounting Pronouncements)*.

Additionally, certain prior period amounts have been reclassified to conform to the current period presentation:

- in the consolidated balance sheets for the presentation of book overdraft, and
- in Note 17 – *Segment Information* of total assets for Other and Eliminations for the reclassification of regulatory assets previously reflected within Other and Eliminations that are now presented with the Regulated segment.

***Recognition of Revenues ─*** Revenues in our Regulated segment principally include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the latest billing to the end of the accounting period. In addition, the Company's market-based subsidiary Aqua Resources recognizes revenues when services are performed and Aqua Infrastructure recognizes revenues when services are performed. The Company's market-based subsidiaries recognized revenues of $4,798 in 2017, $20,091 in 2016, and $34,909 in 2015.

***Property, Plant and Equipment and Depreciation ─*** Property, plant and equipment consist primarily of utility plant. The cost of additions includes contracted cost, direct labor and fringe benefits, materials, overheads, and for additions meeting certain criteria, allowance for funds used during construction. Water systems acquired are typically recorded at estimated original cost of utility plant when first devoted to utility service and the applicable depreciation is recorded to accumulated depreciation. The difference between the estimated original cost, less applicable accumulated depreciation, and the purchase price is recorded as goodwill, or as an acquisition adjustment within utility plant as permitted by the applicable regulatory jurisdiction. At December 31, 2017, utility plant includes a net credit acquisition adjustment of $24,550, which is generally being amortized from 2 to 59 years. Amortization of the acquisition adjustments totaled $2,774 in 2017, $2,223 in 2016, and $2,556 in 2015.

Utility expenditures for maintenance and repairs, including major maintenance projects and minor renewals and betterments, are charged to operating expenses when incurred in accordance with the system of accounts prescribed by the utility commissions of the states in which the company operates. The cost of new units of property and betterments are capitalized. Utility expenditures for water main cleaning and relining of pipes are deferred and recorded in net property, plant and equipment in accordance with the FASB's accounting guidance for regulated operations. As of December 31, 2017, $16,430 of these costs have been incurred since the last respective rate proceeding and the Company expects to recover these costs in future rates.

The cost of software upgrades and enhancements are capitalized if they result in added functionality, which enables the software to perform tasks it was previously incapable of performing. Information technology costs associated with major system installations, conversions and improvements, such as software training, data conversion and business process reengineering costs, are deferred as a regulatory asset if the Company expects to recover these costs in future rates. If these costs are not deferred, then these costs are charged to operating expenses when incurred. As of December 31, 2017, $34,775 of these costs have been deferred since the last respective rate proceeding as a regulatory asset, and the deferral is reported as a component of net property, plant and equipment.

When units of utility property are replaced, retired or abandoned, the recorded value thereof is credited to the asset account and such value, together with the net cost of removal, is charged to accumulated depreciation. To the extent the Company anticipates recovery of the cost of removal or other retirement costs through rates after the retirement costs are incurred, a regulatory asset is recorded as those costs are incurred. In some cases, the Company recovers retirement costs through rates during the life of the associated asset and before the costs are incurred. These amounts, which are not yet utilized, result in a regulatory liability being reported based on the amounts previously recovered through customer rates.

The straight-line remaining life method is used to compute depreciation on utility plant. Generally, the straight-line method is used with respect to transportation and mechanical equipment, office equipment and laboratory equipment.

Long-lived assets of the Company, which consist primarily of utility plant in service, regulatory assets, and investment in joint venture, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a disallowance of utility plant in service or regulatory assets by the respective utility commission, a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, the Company determines whether it is more likely than not that the fair value of those assets is less than their carrying amount. If the Company determines that it is more likely than not (that is, the likelihood of more than 50 percent), the Company would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, the Company would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. There has been no change in circumstances or events that have occurred that require adjustments to the carrying values of the Company's long-lived assets, except for an impairment charge recognized by the joint venture on its long-lived assets in 2015.

***Allowance for Funds Used During Construction*** ─ The allowance for funds used during construction ("AFUDC") represents the capitalized cost of funds used to finance the construction of utility plant. In general, AFUDC is applied to construction projects requiring more than one month to complete. No AFUDC is applied to projects funded by customer advances for construction, contributions in aid of construction, or applicable state-revolving fund loans. AFUDC includes the net cost of borrowed funds and a rate of return on other funds when used, and is recovered through water rates as the utility plant is depreciated. The amount of AFUDC related to equity funds in 2017 was $11,633, 2016 was $6,561, and 2015 was $4,621. No interest was capitalized by our market-based businesses.

***Cash and Cash Equivalents*** ─ The Company considers all highly liquid investments with an original maturity of three months or less, which are not restricted for construction activity, to be cash equivalents.

The Company had a book overdraft, which represents transactions that have not cleared the bank accounts at the end of the period, for specific disbursement cash accounts of $21,629 and $12,616 at December 31, 2017 and 2016, respectively. The Company transfers cash on an as-needed basis to fund these items as they clear the bank in subsequent periods. The balance of the book overdraft is reported as book overdraft and the change in the book overdraft balance is reported as cash flows from financing activities, due to our ability to fund the overdraft with the Company's credit facility.

***Funds Restricted for Construction Activity*** ─ The proceeds received from specific financings for construction and capital improvement of utility facilities are held in escrow until the designated expenditures are incurred. These amounts are reported as funds restricted for construction activity and are expected to be released over time as the capital projects are funded. As of December 31, 2017 and 2016, the Company did not have any funds restricted for construction activity.

***Accounts Receivable*** **─** Accounts receivable are recorded at the invoiced amounts, which consists of billed and unbilled revenues. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in our existing accounts receivable, and is determined based on historical write-off experience and the aging of account balances. The Company reviews the allowance for doubtful accounts quarterly. Account balances are written off against the allowance when it is probable the receivable will not be recovered. When utility customers request extended payment terms, credit is extended based on regulatory guidelines, and collateral is not required.

***Inventories, Materials and Supplies*** **─** Inventories are stated at cost. Cost is determined using the first-in, first-out method.

***Regulatory Assets, Deferred Charges and Other Assets*** **─** Deferred charges and other assets consist primarily of assets held to compensate employees in the future who participate in the Company's deferred compensation plan and other costs. Other costs, for which the Company has received or expects to receive prospective rate recovery, are deferred as a regulatory asset and amortized over the period of rate recovery in accordance with the FASB's accounting guidance for regulated operations. See Note – 6 *Regulatory Assets and Liabilities* for further information regarding the Company's regulatory assets.

Marketable equity securities are carried on the balance sheet at fair market value, and changes in fair value are included in other comprehensive income.

***Investment in Joint Venture*** **–** The Company uses the equity method of accounting to account for our 49% investment in a joint venture with a firm in the natural gas industry for the construction and operation of a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north-central Pennsylvania, which commenced operations in 2012. Our initial investment is carried at cost. Subsequently, the carrying amount of our investment is adjusted to reflect capital contributions or distributions, and our equity in earnings or losses since the commencement of the system's operations, as well as a decline in the fair value of our investment. Our share of equity earnings or losses in the joint venture is reported in the consolidated statements of net income as equity (earnings) losses in joint venture. During 2017 and 2016 we received distributions of $686 and $1,666, respectively. For our equity method investment in joint venture, the Company evaluates whether it has experienced a decline in the value of its investment that is other than temporary in nature. We would recognize an impairment loss if the fair value of our investment is less than the carrying amount of the investment, and the decline in value is considered other than temporary. Additionally, the Company would recognize its share of an impairment loss if the joint venture determines that the carrying amount of the joint venture's assets exceeds the sum of the joint venture's undiscounted estimated cash flows.

During 2015, the joint venture experienced the following events:

- a decline in natural gas prices, in 2015,
- a distinguishable reduction in the volume of water sales by the joint venture which led to a lowered forecast in 2015 on future water sales volumes by the joint venture, and
- changes in the natural gas industry and market conditions.

At the time, these market conditions were largely associated with natural gas prices, which sharply declined in 2015 and this downturn no longer appeared temporary and instead was expected to be a long-term condition. It was then determined that the carrying amount of the joint venture's long-lived assets exceeded the sum of the joint venture's undiscounted estimated cash flows, which resulted in the recognition of a noncash impairment charge of $32,975 ($21,433 after-tax) in 2015, representing the Company's share of the impairment charge. The impairment charge, on a pre-tax basis, is reported as equity loss in joint venture on the Company's consolidated statements of income. The amount of the impairment charge recognized by the joint venture is equal to the difference between the carrying value and the fair value of the long-lived assets. Fair value is estimated to be the present value of the future net cash flows associated with the assets, discounted using a rate commensurate with the risk and remaining life of the assets.

(In thousands of dollars, except per share amounts)

***Goodwill* ─** Goodwill represents the excess cost over the fair value of net tangible and identifiable intangible assets acquired through acquisitions. Goodwill is not amortized but is tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Alternatively, based on our assessment of the qualitative factors previously noted, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit based on a discounted cash flow analysis. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The Company tested the goodwill attributable for each of our reporting units for impairment as of July 31, 2017, and concluded that the estimated fair value of each reporting unit, which has goodwill recorded, exceeded the reporting unit's carrying amount, indicating that none of the Company's goodwill was impaired. The following table summarizes the changes in the Company's goodwill:

| | Regulated Segment | Other | Consolidated |
|---|---|---|---|
| Balance at December 31, 2015 | $ 27,246 | $ 6,620 | $ 33,866 |
| Goodwill acquired during year | 10,378 | - | 10,378 |
| Reclassifications to utility plant acquisition adjustment | (98) | - | (98) |
| Disposition | (159) | (1,232) | (1,391) |
| Classified as assets held for sale | | (547) | (547) |
| Balance at December 31, 2016 | 37,367 | 4,841 | 42,208 |
| Goodwill acquired during year | 72 | - | 72 |
| Reclassifications to utility plant acquisition adjustment | (50) | - | (50) |
| Balance at December 31, 2017 | $ 37,389 | $ 4,841 | $ 42,230 |

The reclassification of goodwill to utility plant acquisition adjustment results from a mechanism approved by the applicable utility commission. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with some acquisitions upon achieving specific objectives.

The goodwill allocated to a disposition or classified as assets held for sale results from the allocation of goodwill for market-based business units based on their relative fair value as compared to Aqua Resource's fair value.

***Income Taxes* ─** The Company accounts for some income and expense items in different time periods for financial and tax reporting purposes. Deferred income taxes are provided on specific temporary differences between the tax basis of the assets and liabilities, and the amounts at which they are carried in the consolidated financial statements. The income tax effect of temporary differences not currently recovered in rates is recorded as deferred taxes with an offsetting regulatory asset or liability. These deferred income taxes are based on the enacted tax rates expected to be in effect when such temporary differences are projected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. Investment tax credits are deferred and amortized over the estimated useful lives of the related properties. Judgment is required in evaluating the Company's Federal and state tax positions. Despite management's belief that the Company's tax return positions are fully supportable, the Company establishes reserves when it believes that its tax positions are likely to be challenged and it may not fully prevail in these challenges. The Company's provision for income taxes includes interest, penalties and reserves for uncertain tax positions.

In 2012, the Company changed its tax method of accounting for qualifying utility asset improvement costs in Aqua Pennsylvania effective with the tax year ended December 31, 2012 and for prior tax years. The tax accounting method was changed to permit the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for book and tax purposes. This change was implemented in response to a June 2012 rate order issued by the Pennsylvania Public Utility Commission to Aqua Pennsylvania, which provides for a reduction in current income tax expense as a result of the recognition of income tax benefits for qualifying utility asset improvements. This change results in a significant reduction in the effective income tax rate, a reduction in current income tax expense, and reduces the amount of taxes currently payable. For qualifying capital expenditures made prior to 2012, the resulting tax benefits have been deferred as of December 31, 2012 and, in accordance with the rate order, a ten year amortization of the income tax benefits, which reduces future income tax expense, commenced in 2013.

***Customers' Advances for Construction and Contributions in Aid of Construction*** ─ Water mains, other utility property or, in some instances, cash advances to reimburse the Company for its costs to construct water mains or other utility property, are contributed to the Company by customers, real estate developers and builders in order to extend utility service to their properties. The value of these contributions is recorded as customers' advances for construction. Over time, the amount of non-cash contributed property will vary based on the timing of the contribution of the non-cash property and the volume of non-cash contributed property received in connection with development in our service territories. The Company makes refunds on these advances over a specific period of time based on operating revenues related to the property, or as new customers are connected to and take service from the applicable water main. After all refunds are made, any remaining balance is transferred to contributions in aid of construction. Contributions in aid of construction include direct non-refundable contributions and the portion of customers' advances for construction that become non-refundable.

Based on regulatory conventions in states where the Company operates, generally our subsidiaries depreciate contributed property and amortize contributions in aid of construction at the composite rate of the related property. Contributions in aid of construction and customers' advances for construction are deducted from the Company's rate base for rate-making purposes, and therefore, no return is earned on contributed property.

***Stock-Based Compensation*** ─ The Company records compensation expense in the financial statements for stock-based awards based on the grant date fair value of those awards. Stock-based compensation expense includes an estimate for pre-vesting forfeitures and is recognized over the requisite service periods of the awards on either a straight-line basis, or the graded vesting method, which is generally commensurate with the vesting term.

***Fair Value Measurements*** – The Company follows the FASB's accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;

- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

- Level 3: inputs that are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Additionally, assets that are measured at fair value using the net asset value ("NAV") per share practical expedient are not classified in the fair value hierarchy. There have been no changes in the valuation techniques used to measure fair value or asset or liability transfers between the levels of the fair value hierarchy for the years ended December 31, 2017 and 2016.

***Recent Accounting Pronouncements*** ─ In March 2017, the FASB issued updated accounting guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Historically, net benefit cost is reported as an employee cost within operating income, net of amounts capitalized. The guidance requires the bifurcation of net benefit cost. The service cost component will be presented with other employee compensation costs in operating income and the other components of net benefit cost will be reported separately outside of operating income, and will not be eligible for capitalization. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period, and is to be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and on a prospective basis for the capitalization of only the service cost component of net benefit cost. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position.

In January 2017, the FASB issued updated accounting guidance that eliminates step 2 of the current goodwill impairment test, which requires a hypothetical purchase price allocation to measure goodwill impairment. A goodwill impairment loss will instead be measured at the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The guidance will be effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period, with early adoption permitted for any impairment test performed on testing dates after January 1, 2017. The Company elected to early adopt the provisions of the updated guidance, for its annual impairment valuation performed in the third quarter of 2017, and the provisions of the updated guidance did not have an impact on its results of operations or financial position.

In August 2016, the FASB issued updated accounting guidance on the classification of certain cash receipts and cash payments in the statement of cash flows, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. The Company has elected to early adopt the provisions of the updated guidance, which resulted in the reclassification of $375 debt extinguishment costs for 2016, from cash flows from operating to financing activities to conform to the new classification.

In March 2016, the FASB issued updated accounting guidance on simplifying the accounting for share-based payments, which includes several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The updated guidance was effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption available. On January 1, 2017, the Company adopted the updated guidance, prospectively, and recognized a previously unrecognized windfall tax benefit for stock-based compensation of $982, associated with the Company's 2012 Federal net operating loss, which was recorded as an adjustment to deferred income taxes and retained earnings (refer to the presentation of "cumulative effect of change in accounting principle – windfall tax benefit" on the Company's Consolidated Statement of Equity). Additionally, income tax benefits in excess of compensation costs or tax deficiencies for share-based compensation are now recorded to our income tax provision, instead of historically to stockholder's equity, which impacts our effective tax rate. Lastly, all tax-related cash flows resulting from share-based payments are reported prospectively as operating activities on the statement of cash flows, a change from the historical requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities.

In February 2016, the FASB issued updated accounting guidance on accounting for leases, which requires lessees to establish a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. For income statement purposes, leases will be classified as either operating or finance. Operating leases will result in straight-line expense while finance leases will result in a front-loaded expense pattern. The updated accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption available. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption. Refer to Note 9 – *Commitments and Contingencies* for further information on the Company's leases.

In January 2016, the FASB issued updated accounting guidance on the recognition and measurement of financial assets and financial liabilities, which amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. The updated guidance is effective for interim and annual periods beginning after December 31, 2017. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position.

In May 2014, the FASB issued updated accounting guidance on recognizing revenue from contracts with customers, which outlines a single comprehensive model that an entity will apply to determine the measurement of revenue and timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The updated guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. The updated guidance is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the updated guidance in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting the updated guidance recognized through retained earnings at the date of adoption. In 2016, the Company performed an evaluation of the requirements of the updated guidance and believes that the impact of adoption will not result in a material change in the Company's measurement of revenue. In 2017, the American Institute of Certified Public Accountants ("AICPA") power and utility entities revenue recognition task force determined that contributions in aid of construction are not in the scope of the new standard, and submitted its recommendation to the AICPA's revenue recognition working group for approval. The Company implemented the updated guidance using the modified retrospective approach on January 1, 2018, which did not result in a change in the Company's measurement of revenue, and reached the following conclusions:

- The Company's tariff sale contracts, including those with lower credit quality customers, are generally deemed to be probable of collection, and thus the timing of revenue recognition will continue to be concurrent with the delivery of water and wastewater services, consistent with our current practice.
- Contributions in aid of construction are outside of the scope of the standard, and will continue to be accounted for as a noncurrent liability.

**Note 2 – *Acquisitions***

As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of six municipalities for a total combined purchase price in cash of $150,700. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur by the end of 2018, which is subject to the timing of the regulatory approval process. These acquisitions are expected to add approximately 16,325 customers in two of the states in which the Company operates.

Pursuant to the Company's growth-through-acquisition strategy, the Company completed the following acquisitions:

In 2017, the Company completed four acquisitions of water and wastewater utility systems in two states adding 1,003 customers. The total purchase price of these utility systems consisted of $5,860 in cash, which resulted in $72 of goodwill being recorded. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired in 2017 are $461. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

In January 2016, the Company acquired Superior Water Company, Inc., which provides public water service to 4,108 customers in portions of Berks, Chester, and Montgomery counties in Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. The purchase price allocation for this acquisition consisted primarily of acquired property, plant and equipment of $25,167, contributions in aid of construction of $16,565, and goodwill of $8,622. Additionally, during 2016, the Company completed 18 acquisitions of water and wastewater utility systems in various states adding 2,469 customers. The total purchase price of these utility systems consisted of $5,518 in cash. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired were $4,896 in 2017 and $3,809 in 2016. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

In April 2015, the Company acquired the water and wastewater utility system assets of North Maine Utilities, located in the Village of Glenview, Illinois serving approximately 7,400 customers. The total purchase price consisted of $23,079 in cash. The purchase price allocation for this acquisition consists primarily of acquired property, plant and equipment. Additionally, in 2015, the Company completed 14 acquisitions of water and wastewater utility systems in various states adding 3,170 customers. The total purchase price of these utility systems consisted of $5,210 in cash. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired were $10,868 in 2017, $10,708 in 2016, and $6,662 in 2015. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

**Note 3 –*Dispositions***

The following dispositions have not been presented as discontinued operations in the Company's consolidated financial statements as they do not qualify as discontinued operations, since their disposal does not represent a strategic shift that has a major effect on our operations or financial results. The gains or loss disclosed below are reported in the consolidated statements of net income as a component of operations and maintenance expense. These business units were reported within the Company's market-based subsidiary, Aqua Resources, and were included in "Other" in the Company's segment information.

*Dispositions Completed in 2017 and 2016*

In the second quarter of 2016, the Company decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repaired and performed maintenance on water and wastewater systems, for which the sale was completed in June 2017. These business units were reported as assets held for sale in the Company's December 31, 2016 consolidated balance sheet included in this Annual Report. These transactions resulted in total proceeds of $867 and the recognition of a net loss of $324.

In the third quarter of 2016, the Company marketed for sale a business unit which inspects, cleans and repairs storm and sanitary wastewater lines. In November 2016, this business unit was sold for $1,059 in cash and resulted in a loss on sale of $1,081. Further, in December 2015, the Company decided to sell a business unit which provides liquid waste hauling and disposal services. During the second quarter of 2016, this business unit was sold for $3,400 in cash and resulted in a gain on sale of $537.

(In thousands of dollars, except per share amounts)

*Dispositions Reported as Assets Held for Sale at December 31, 2017*

In the first quarter of 2017, the Company decided to market for sale a water system that serves approximately 265 customers. This water system is reported as assets held for sale in the Company's consolidated balance sheet.

**Note 4 – *Property, Plant and Equipment***

| | December 31, 2017 | December 31, 2016 | Approximate Range of Useful Lives | Weighted Average Useful Life |
|---|---|---|---|---|
| Utility plant and equipment: | | | | |
| Mains and accessories | $ 3,134,900 | $ 2,898,560 | 30 - 93 years | 79 years |
| Services, hydrants, treatment plants and reservoirs | 1,753,433 | 1,621,972 | 5 - 85 years | 51 years |
| Operations structures and water tanks | 296,736 | 283,635 | 14 - 85 years | 47 years |
| Miscellaneous pumping and purification equipment | 768,962 | 733,074 | 12 - 90 years | 41 years |
| Meters, data processing, transportation and operating equipment | 768,655 | 733,837 | 4 - 63 years | 25 years |
| Land and other non-depreciable assets | 103,357 | 98,529 | - | - |
| Utility plant and equipment | 6,826,043 | 6,369,607 | | |
| Utility construction work in progress | 201,902 | 163,565 | - | - |
| Net utility plant acquisition adjustment | (24,550) | (25,683) | 2 - 59 years | 31 years |
| Non-utility plant and equipment | 598 | 1,628 | 3 - 25 years | 13 years |
| Total property, plant and equipment | $ 7,003,993 | $ 6,509,117 | | |

**Note 5 – *Accounts Receivable***

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Billed utility revenue | $ 65,695 | $ 63,518 |
| Unbilled revenue | 35,042 | 34,635 |
| Other | 4,930 | 6,336 |
| | 105,667 | 104,489 |
| Less allowance for doubtful accounts | 7,071 | 7,095 |
| Net accounts receivable | $ 98,596 | $ 97,394 |

The Company's utility customers are located principally in the following states: 47% in Pennsylvania, 15% in Ohio, 10% in North Carolina, 8% in Texas, and 7% in Illinois. No single customer accounted for more than one percent of the Company's regulated operating revenues during the years ended December 31, 2017, 2016, and 2015. The following table summarizes the changes in the Company's allowance for doubtful accounts:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| Balance at January 1, | $ 7,095 | $ 5,873 | $ 5,365 |
| Amounts charged to expense | 4,986 | 5,500 | 5,762 |
| Accounts written off | (6,135) | (5,410) | (6,513) |
| Recoveries of accounts written off | 1,125 | 1,132 | 1,259 |
| Balance at December 31, | $ 7,071 | $ 7,095 | $ 5,873 |

(In thousands of dollars, except per share amounts)

**Note 6 – *Regulatory Assets and Liabilities***

The regulatory assets represent costs that are probable to be fully recovered from customers in future rates while regulatory liabilities represent amounts that are expected to be refunded to customers in future rates or amounts recovered from customers in advance of incurring the costs. Except for income taxes, regulatory assets and regulatory liabilities are excluded from the Company's rate base and do not earn a return. The components of regulatory assets and regulatory liabilities are as follows:

| | December 31, 2017 | | December 31, 2016 | |
|---|---|---|---|---|
| | Regulatory Assets | Regulatory Liabilities | Regulatory Assets | Regulatory Liabilities |
| Income taxes | $ 584,067 | $ 438,750 | $ 814,418 | $ 157,266 |
| Utility plant retirement costs | 5,367 | 35,249 | 4,986 | 31,288 |
| Post-retirement benefits | 112,532 | 65,964 | 119,519 | 59,882 |
| Accrued vacation | 2,198 | - | 1,984 | - |
| Water tank painting | 3,259 | 1,855 | 2,111 | 2,143 |
| Fair value adjustment of long-term debt assumed in acquisition | 2,901 | - | 3,268 | - |
| Rate case filing expenses and other | 3,647 | 92 | 2,361 | 56 |
| | $ 713,971 | $ 541,910 | $ 948,647 | $ 250,635 |

Items giving rise to deferred state income taxes, as well as a portion of deferred Federal income taxes related to specific differences between tax and book depreciation expense, are recognized in the rate setting process on a cash basis or as a reduction in current income tax expense and will be recovered as they reverse. Amounts include differences that arise between specific utility asset improvement costs capitalized for book and deducted as an expense for tax purposes. Additionally, the recording of AFUDC for equity funds results in the recognition of a regulatory asset for income taxes, which represents amounts due related to the revenue requirement.

A portion of the regulatory liability for income taxes is related to Aqua Pennsylvania's income tax accounting change for the tax benefits realized on the Company's 2012 tax return, which have not yet reduced current income tax expense due to the ten year amortization period which began in 2013. This amortization was stipulated in a June 2012 rate order issued to Aqua Pennsylvania and is subject to specific parameters being met each year. Beginning in 2013, the Company amortized $38,000, annually, of its deferred income tax benefits, which reduced current income tax expense and increased the Company's net income by $16,734.

On December 22, 2017, President Trump signed the TCJA into law, which reduced the Federal corporate income tax rate from 35% to 21%. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rate to 21% under the provisions of the TCJA will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes relating to certain accelerated tax depreciation benefits are to be passed back to customers. Potential refunds of other deferred taxes will be determined by our state regulators. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities, and reduces our regulatory assets by $357,262 and increases our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

The regulatory asset for utility plant retirement costs, including cost of removal, represents costs already incurred that are expected to be recovered in future rates over a five year recovery period. The regulatory liability for utility plant retirement costs represents amounts recovered through rates during the life of the associated asset and before the costs are incurred.

The regulatory asset for accrued vacation represents costs that would otherwise be charged to operations and maintenance expense for vacation that is earned by employees, which is recovered as a cost of service.

(In thousands of dollars, except per share amounts)

The regulatory asset for post-retirement benefits, which includes pension and other post-retirement benefits, primarily reflects a regulatory asset that has been recorded for the costs that would otherwise be charged to stockholders' equity for the underfunded status of the Company's pension and other post-retirement benefit plans. The Company also has a regulatory asset related to post-retirement benefits costs that represent costs already incurred which are now being recovered in rates over 10 years. The regulatory liability for post-retirement benefits represents costs recovered in rates in excess of post-retirement benefits expense.

Expenses associated with water tank painting are deferred and amortized over a period of time as approved in the regulatory process. Water tank painting costs are generally being amortized over a period ranging from 1 to 15 years. The regulatory liability for water tank painting costs represents amounts recovered through rates and before the costs are incurred.

The Company recorded a fair value adjustment for fixed rate, long-term debt assumed in acquisitions that matures in various years ranging from 2022 to 2029. The regulatory asset or liability results from the rate setting process continuing to recognize the historical interest cost of the assumed debt.

The regulatory asset related to rate case filing expenses and other represents the costs associated with filing for rate increases that are deferred and amortized over periods that generally range from one to five years, and costs incurred by the Company for which it has received or expects to receive rate recovery.

The regulatory asset related to the costs incurred for information technology software projects and water main cleaning and relining projects are described in Note 1 – *Summary of Significant Accounting Policies – Property, Plant and Equipment and Depreciation*.

**Note 7 – *Income Taxes***

The provision for income taxes consists of:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Current: | | | |
| Federal | $ 1,297 | $ 2,046 | $ 2,624 |
| State | 1,837 | 1,682 | (4,168) |
| | 3,134 | 3,728 | (1,544) |
| Deferred: | | | |
| Federal | 21,376 | 21,489 | 12,649 |
| State | (7,596) | (4,239) | 3,857 |
| | 13,780 | 17,250 | 16,506 |
| Total tax expense | $ 16,914 | $ 20,978 | $ 14,962 |

The statutory Federal tax rate is 35% and for states with a corporate net income tax, the state corporate net income tax rates range from 3% to 9.99% for all years presented.

(In thousands of dollars, except per share amounts)

The reasons for the differences between amounts computed by applying the statutory Federal corporate income tax rate to income before income tax expense are as follows:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Computed Federal tax expense at statutory rate | $ 89,828 | $ 89,306 | $ 75,863 |
| Decrease in Federal tax expense related to an income tax accounting change for qualifying utility asset improvement costs | (69,325) | (62,831) | (59,488) |
| State income taxes, net of Federal tax benefit | (3,743) | (1,662) | (202) |
| Increase in tax expense for depreciation expense to be recovered in future rates | 199 | 199 | 199 |
| Stock-based compensation | (595) | (227) | (174) |
| Deduction for Aqua America common dividends paid under employee benefit plan | (455) | (455) | (456) |
| Amortization of deferred investment tax credits | (376) | (405) | (421) |
| Federal tax rate change | 3,141 | - | - |
| Other, net | (1,760) | (2,947) | (359) |
| Actual income tax expense | $ 16,914 | $ 20,978 | $ 14,962 |

In 2012, the Company changed its tax method of accounting for qualifying utility system repairs in Aqua Pennsylvania effective with the tax year ended December 31, 2012 and for prior tax years. The tax accounting method was changed to permit the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for book and tax purposes. This change was implemented in response to a June 2012 rate order issued by the Pennsylvania Public Utility Commission to Aqua Pennsylvania which provides for a reduction in current income tax expense as a result of the flow-through recognition of some income tax benefits due to the income tax accounting change. The Company recorded income tax benefits of $84,766, $78,530, and $72,944 during 2017, 2016, and 2015, respectively. The Company recognized a tax deduction on its 2012 Federal tax return of $380,000 for qualifying capital expenditures made prior to 2012, and based on the rate order, in 2013, the Company began to amortize 1/10th of these expenditures. In accordance with the rate order, the amortization is expected to reduce current income tax expense during periods when qualifying parameters are met. Beginning in 2013, the Company amortized the qualifying capital expenditures made prior to 2012 and recognized $38,000, annually, of deferred income tax benefits, which reduced current income tax expense and increased the Company's net income by $16,734. The Company's effective income tax rate for 2017, 2016, and 2015 was 6.6%, 8.2%, and 6.9%, respectively.

The Company establishes reserves for uncertain tax positions based upon management's judgment as to the sustainability of these positions. These accounting estimates related to the uncertain tax position reserve require judgments to be made as to the sustainability of each uncertain tax position based on its technical merits. The Company believes its tax positions comply with applicable law and that it has adequately recorded reserves as required. However, to the extent the final tax outcome of these matters is different than the estimates recorded, the Company would then adjust its tax reserves or unrecognized tax benefits in the period that this information becomes known. The Company has elected to recognize accrued interest and penalties related to uncertain tax positions as income tax expense.

(In thousands of dollars, except per share amounts)

The following table provides the changes in the Company's unrecognized tax benefits:

| | 2017 | 2016 |
|---|---|---|
| Balance at January 1, | $ 28,099 | $ 28,016 |
| Additions based on tax position related to the current year | 705 | 83 |
| Effect of Federal tax rate change | (11,221) | - |
| Balance at December 31, | $ 17,583 | $ 28,099 |

The unrecognized tax benefits relate to the income tax accounting change, and the tax position is attributable to a temporary difference. The Company does not anticipate material changes to its unrecognized tax benefits within the next year. As a result of the regulatory treatment afforded by the income tax accounting change in Pennsylvania and despite this position being a temporary difference, as of December 31, 2017 and 2016, $24,243 and $20,674 and, respectively, of these tax benefits would have an impact on the Company's effective income tax rate in the event the Company does sustain all, or a portion, of its tax position.

The following table provides the components of net deferred tax liability:

| | December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Deferred tax assets: | | |
| Customers' advances for construction | $ 17,123 | $ 21,738 |
| Costs expensed for book not deducted for tax, principally accrued expenses | 12,956 | 15,751 |
| Utility plant acquisition adjustment basis differences | 1,752 | 3,114 |
| Post-retirement benefits | 36,353 | 38,269 |
| Tax loss and credit carryforwards | 56,642 | 77,911 |
| Other | 2,348 | 2,137 |
| | 127,174 | 158,920 |
| Less valuation allowance | 11,623 | 9,486 |
| | 115,551 | 149,434 |
| Deferred tax liabilities: | | |
| Utility plant, principally due to depreciation and differences in the basis of fixed assets due to variation in tax and book accounting | 795,537 | 1,104,032 |
| Deferred taxes associated with the gross-up of revenues necessary to recover, in rates, the effect of temporary differences | 46,143 | 269,773 |
| Tax effect of regulatory asset for post-retirement benefits | 36,353 | 38,269 |
| Deferred investment tax credit | 6,591 | 6,613 |
| | 884,624 | 1,418,687 |
| Net deferred tax liability | $ 769,073 | $ 1,269,253 |

At December 31, 2017, the Company has a cumulative Federal NOL of $63,302. The Company believes the Federal NOLs are more likely than not to be recovered and require no valuation allowance. The Company's Federal NOLs do not begin to expire until 2032.

In 2012 and 2011, as a result of the Company's Federal cumulative NOLs the Company ceased recognizing the windfall tax benefit associated with stock-based compensation, because the deduction did not reduce income taxes payable. As of December 31, 2015, the Company utilized all of the 2011 NOL and recognized a windfall tax benefit of $588. As a result of the adoption on January 1, 2017 of the FASB's updated accounting guidance on simplifying the accounting for share-based payments, the Company recognized a windfall tax benefit of $982 associated with the Company's 2012 Federal NOL, which was recorded as an adjustment to retained earnings.

At December 31, 2017, the Company has a cumulative state NOL of $627,258, a portion of which is offset by a valuation allowance because the Company does not believe these NOLs are more likely than not to be realized. The state NOLs do not begin to expire until 2023.

The Company has unrecognized tax positions that result in the associated tax benefit being unrecognized. The Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $64,476 and $85,380, respectively, which results from the Company's adoption in 2013 of the FASB's accounting guidance on the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions are $127,778 and $712,638, respectively. The Company records its unrecognized tax benefit as a reduction to its deferred income tax liability.

As of December 31, 2017, the Company's Federal income tax returns for all years through 2011 have been closed. Tax years 2012 through 2017 remain open to Federal examination. The statute remains open for the Company's state income tax returns for tax years 2014 through 2017 in the various states in which it conducts business.

On December 22, 2017, President Trump signed the TCJA into law. Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA includes significant changes to the Code and the taxation of business entities, and includes specific provisions related to regulated public utilities. Significant changes that impact the Company included in the TCJA are a reduction in the corporate federal income tax rate from 35% to 21%, effective January 1, 2018, and a limitation of the utilization of NOLs arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. The specific TCJA provisions related to our regulated entities generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017 and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Our market-based companies still qualify for 100% deductibility of qualifying property acquired after September 27, 2017.

Changes in the Code from the TCJA had a material impact on our financial statements in 2017. In accordance with the FASB's accounting guidance for income taxes, the tax effects of changes in tax laws must be recognized in the period in which the law is enacted, or December 22, 2017 for the TCJA. Additionally, deferred tax assets and liabilities are required to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. Thus, at the date of enactment, the Company's deferred taxes were re-measured based upon the new tax rate. For our regulated entities, the change in deferred taxes is recorded as either an offset to a regulatory asset or liability and may be subject to refund to customers. In instances where the deferred tax balances are not in ratemaking, such as the Company's market-based operations, the change in deferred taxes is recorded as an adjustment to our deferred tax provision. To the extent the revalued deferred income tax assets and liabilities were outside of our regulated operations and are not believed to be recoverable in utility customer rates, the revalued amount of $3,141 was recognized as additional deferred income tax expense during the quarter ended December 31, 2017.

The staff of the SEC has recognized the complexity of reflecting the impacts of the TCJA, and on December 22, 2017 issued guidance, which clarifies accounting for income taxes if information is not yet available or complete and provides for up to a one year period in which to complete the required analyses and accounting (the measurement period). The guidance describes three scenarios (or "buckets") associated with a company's status of accounting for income tax reform: (1) a company is complete with its accounting for certain effects of tax reform, (2) a company is able to determine a reasonable estimate for certain effects of tax reform and records that estimate as a provisional amount, or (3) a company is not able to determine a reasonable estimate and therefore continues to apply the FASB's accounting guidance, based on the provisions of the tax laws that were in effect immediately prior to the TCJA being enacted.

(In thousands of dollars, except per share amounts)

The Company has completed or has made a reasonable estimate for the measurement and accounting of the effect of the TCJA which have been reflected in the December 31, 2017 financial statements. The accounting for these completed and provisional items, described below, increased the 2017 deferred income tax provision by $3,141 for the year ending December 31, 2017, and decreased the accumulated deferred income tax liability by $303,320 at December 31, 2017.

One of our states, Pennsylvania, has not yet issued an accounting or procedural order addressing how the TCJA changes are to be reflected in our utility customer rates. As of December 31, 2017, the Company has provisionally estimated that $175,108 of deferred income tax liabilities for our Pennsylvania subsidiary will be a regulatory liability. Additionally, two operating divisions in one of our states operate under locally-negotiated contractual rates with their respective counties, and it is expected that negotiations will results in a contract that will pass back the effects of the reduction in the corporate net income tax rate under the TCJA; however, these negotiations have not yet started. As of December 31, 2017, the Company has provisionally estimated that $9,419 of deferred income tax liabilities for these two divisions will be a regulatory liability. Overall, the Company has applied a reasonable interpretation of the impact of the TCJA and a reasonable estimate of the regulatory resolution. Further clarification of the TCJA and regulatory resolution may change the amounts estimated of the deferred income tax provision and the accumulated deferred income tax liability.

The Company's regulated operations accounting for income taxes are impacted by the FASB's accounting guidance for regulated operations. Reductions in accumulated deferred income tax balances due to the reduction in the Federal corporate income tax rates to 21% under the provisions of the TCJA will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes related to certain accelerated tax depreciation deduction benefits are to be passed back to customers. Potential refunds of other deferred taxes will be determined by our state regulators. Our state regulatory commissions have or are in the process of issuing procedural orders directing how the tax law changes are to be reflected in our utility customer rates. In addition, we have two rate cases currently in progress in two states in which the TCJA is expected to be addressed in the new base rates. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities which reduced our regulatory assets by $357,262 and increased our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

**Note 8 – *Taxes Other than Income Taxes***

The following table provides the components of taxes other than income taxes:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Property | $ 25,810 | $ 26,788 | $ 26,545 |
| Gross receipts, excise and franchise | 13,458 | 12,510 | 11,847 |
| Payroll | 9,477 | 9,772 | 9,539 |
| Regulatory assessments | 2,552 | 2,630 | 2,689 |
| Pumping fees | 5,057 | 4,571 | 3,993 |
| Other | 274 | 114 | 444 |
| Total taxes other than income taxes | $ 56,628 | $ 56,385 | $ 55,057 |

(In thousands of dollars, except per share amounts)

**Note 9 – *Commitments and Contingencies***

***Commitments –*** The Company leases motor vehicles, buildings and other equipment under operating leases that are noncancelable. The future annual minimum lease payments due are as follows:

| 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|
| $ 1,312 | $ 1,010 | $ 743 | $ 585 | $ 365 | $ 250 |

The Company leases parcels of land on which treatment plants and other facilities are situated and adjacent parcels that are used for watershed protection. The operating leases are noncancelable, expire between 2019 and 2052, and contain renewal provisions. Some leases are subject to an adjustment every five years based on changes in the Consumer Price Index. Subject to the aforesaid adjustment, during each of the next five years, an average of $602 of annual lease payments for land is due, and the aggregate of the years remaining approximates $12,806.

The Company maintains agreements with other water purveyors for the purchase of water to supplement its water supply, particularly during periods of peak demand. The agreements stipulate purchases of minimum quantities of water to the year 2026. The estimated annual commitments related to such purchases through 2022 are expected to average $4,373 and the aggregate of the years remaining approximates $9,644.

The Company has entered into purchase obligations, in the ordinary course of business, that include agreements for water treatment processes at some of its wells in a small number of its divisions. The 20 year term agreement provides for the use of treatment equipment and media used in the treatment process and are subject to adjustment based on changes in the Consumer Price Index. The future contractual cash obligations related to these agreements are as follows:

| 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|
| $ 1,157 | $ 1,007 | $ 1,028 | $ 1,048 | $ 1,069 | $ 6,623 |

Rent expense under operating leases, purchased water expense, and water treatment expenses under these agreements were as follows:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Operating lease expense | $ 2,241 | $ 2,776 | $ 2,440 |
| Purchased water under long-term agreements | 8,558 | 13,955 | 13,718 |
| Water treatment expense under contractual agreement | 945 | 940 | 972 |

***Contingencies –*** The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of December 31, 2017, the aggregate amount of $18,961 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, Aqua America has insurance coverage for a number of these loss contingencies, and as of December 31, 2017, estimates that approximately $7,131 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets, net.

(In thousands of dollars, except per share amounts)

Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which the Company or any of its subsidiaries is a party or to which any of its properties is the subject that are material or are expected to have a material effect on the Company's financial position, results of operations or cash flows.

Additionally, the Company self-insures its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,451 and $1,770 at December 31, 2017 and 2016 and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

**Note 10 – *Long-term Debt and Loans Payable***

***Long-term Debt –*** The consolidated statements of capitalization provide a summary of long-term debt as of December 31, 2017 and 2016. The supplemental indentures with respect to specific issues of the first mortgage bonds restrict the ability of Aqua Pennsylvania and other operating subsidiaries of the Company to declare dividends, in cash or property, or repurchase or otherwise acquire the stock of these companies. Loan agreements for Aqua Pennsylvania and other operating subsidiaries of the Company have restrictions on minimum net assets. As of December 31, 2017, restrictions on the net assets of the Company were $1,443,473 of the total $1,957,621 in net assets. Included in this amount were restrictions on Aqua Pennsylvania's net assets of $1,090,062 of their total net assets of $1,528,172. As of December 31, 2017, $1,396,003 of Aqua Pennsylvania's retained earnings of $1,416,003 and $142,700 of the retained earnings of $189,000 of other subsidiaries were free of these restrictions. Some supplemental indentures also prohibit Aqua Pennsylvania and some other subsidiaries of the Company from making loans to, or purchasing the stock of, the Company.

Sinking fund payments are required by the terms of specific issues of long-term debt. Excluding amounts due under the Company's revolving credit agreement, the future sinking fund payments and debt maturities of the Company's long-term debt are as follows:

| Interest Rate Range | 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|---|
| 0.00% to 0.99% | $ 464 | $ 464 | $ 463 | $ 464 | $ 466 | $ 1,875 |
| 1.00% to 1.99% | 51,327 | 1,222 | 1,158 | 910 | 888 | 7,409 |
| 2.00% to 2.99% | 1,766 | 51,813 | 1,863 | 1,913 | 1,965 | 9,934 |
| 3.00% to 3.99% | 2,807 | 2,758 | 2,555 | 2,594 | 2,541 | 706,977 |
| 4.00% to 4.99% | 11,195 | 50,404 | 16,616 | 15,297 | 237 | 660,650 |
| 5.00% to 5.99% | 20,595 | 36,126 | 18,120 | 8,402 | 17,979 | 256,783 |
| 6.00% to 6.99% | 13,000 | - | - | - | - | 31,000 |
| 7.00% to 7.99% | 484 | 569 | 615 | 666 | 358 | 29,643 |
| 8.00% to 8.99% | 431 | 566 | 613 | 1,665 | 721 | 2,096 |
| 9.00% to 9.99% | 5,700 | 700 | 2,400 | 4,900 | - | 12,000 |
| 10.00% to 10.99% | 6,000 | - | - | - | - | - |
| Total | $ 113,769 | $ 144,622 | $ 44,403 | $ 36,811 | $ 25,155 | $ 1,718,367 |

In October 2017, Aqua Pennsylvania issued $75,000 of first mortgage bonds, of which $35,000 is due in 2054, $20,000 is due in 2055, and $20,000 is due in 2057 with interest rates of 4.06%, 4.07%, and 4.09%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

(In thousands of dollars, except per share amounts)

In July 2017 Aqua Illinois issued $100,000 of first mortgage bonds consisting of the following:

| Amount | Interest Rate | Maturity |
|---|---|---|
| $25,000 | 3.64% | 2032 |
| $6,000 | 3.89% | 2037 |
| $15,000 | 3.90% | 2038 |
| $10,000 | 4.18% | 2047 |
| $22,000 | 4.22% | 2049 |
| $22,000 | 4.24% | 2050 |

The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In July 2017, Aqua Pennsylvania issued $80,000 of first mortgage bonds, of which $40,000 is due in 2055 and $40,000 is due in 2057 with interest rates of 4.04% and 4.06%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In December 2016, Aqua Pennsylvania issued $85,000 of first mortgage bonds, of which $25,000 is due in 2051 and $60,000 is due in 2056 with interest rates of 3.85% and 3.95%, respectively. In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In November 2016, the Company issued $125,000 of senior notes, of which $35,000 is due in 2031, $30,000 is due in 2034, $25,000 is due in 2035, $10,000 is due in 2038, and $25,000 is due in 2041 with interest rates of 3.01%, 3.19%, 3.25%, 3.41%, and 3.57%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

As of December 31, 2017 and 2016, the Company did not have any funds restricted for construction activity.

The weighted average cost of long-term debt at December 31, 2017 and 2016 was 4.29% and 4.23%, respectively. The weighted average cost of fixed rate long-term debt at December 31, 2017 and 2016 was 4.36% and 4.26%, respectively.

The Company has a five-year $250,000 unsecured revolving credit facility, with four banks that expires in February 2021. This facility includes a $15,000 sublimit for daily demand loans. Funds borrowed under this facility are classified as long-term debt and are used to provide working capital as well as support for letters of credit for insurance policies and other financing arrangements. As of December 31, 2017, the Company has the following sublimits and available capacity under the credit facility: $50,000 letter of credit sublimit, $30,189 of letters of credit available capacity, $0 borrowed under the swing-line commitment, and $60,000 of funds borrowed under the agreement. Interest under this facility is based at the Company's option, on the prime rate, an adjusted Euro-Rate, an adjusted federal funds rate or at rates offered by the banks. A facility fee is charged on the total commitment amount of the agreement. Under this facility the average cost of borrowings was 1.91% and 1.54%, and the average borrowing was $48,333 and $89,374, during 2017 and 2016, respectively.

The Company is obligated to comply with covenants under some of its loan and debt agreements. These covenants contain a number of restrictive financial covenants, which among other things limit, subject to specific exceptions, the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2017, the Company was in compliance with its debt covenants under its loan and debt agreements. Failure to comply with the Company's debt covenants could result in an event of default, which could result in the Company being required to repay or finance its borrowings before their due date, possibly limiting the Company's future borrowings, and increasing its borrowing costs.

***Loans Payable –*** In November 2017, Aqua Pennsylvania renewed its $100,000 364-day unsecured revolving credit facility with four banks. The funds borrowed under this agreement are classified as loans payable and used to provide working capital. As of December 31, 2017 and 2016, funds borrowed under the agreement were $3,650 and $5,545, respectively. Interest under this facility is based, at the borrower's option, on the prime rate, an adjusted federal funds rate, an adjusted London Interbank Offered Rate corresponding to the interest period selected, an adjusted Euro-Rate corresponding to the interest period selected or at rates offered by the banks. This agreement restricts short-term borrowings of Aqua Pennsylvania. A commitment fee of 0.05% is charged on the total commitment amount of Aqua Pennsylvania's revolving credit agreement. The average cost of borrowing under the facility was 1.78% and 1.18%, and the average borrowing was $21,913 and $29,760, during 2017 and 2016, respectively. The maximum amount outstanding at the end of any one month was $66,466 and $52,905 in 2017 and 2016, respectively.

At December 31, 2017 and 2016, the Company had other combined short-term lines of credit of $35,500. Funds borrowed under these lines are classified as loans payable and are used to provide working capital. As of December 31, 2017 and 2016, funds borrowed under the short-term lines of credit were $0 and $990, respectively. The average borrowing under the lines was $908 and $2,944 during 2017 and 2016, respectively. The maximum amount outstanding at the end of any one month was $990 in 2017 and $9,440 in 2016, respectively. Interest under the lines is based at the Company's option, depending on the line, on the prime rate, an adjusted Euro-Rate, an adjusted federal funds rate or at rates offered by the banks. The average cost of borrowings under all lines during 2017 and 2016 was 1.81% and 1.24%, respectively.

***Interest Income and Expense–*** Interest income of $202, $217, and $272 was netted against interest expense on the consolidated statement of net income for the years ended December 31, 2017, 2016, and 2015, respectively. The total interest cost was $88,543, $80,811, and $76,808 in 2017, 2016, and 2015, including amounts capitalized for borrowed funds of $3,578, $2,220, and $1,598, respectively.

### Note 11 – *Fair Value of Financial Instruments*

Financial instruments are recorded at carrying value in the financial statements and approximate fair value, with the exception of long-term debt, as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of cash and cash equivalents, which is comprised of uninvested cash, is determined based on level 1 methods and assumptions. As of December 31, 2017 and 2016, the carrying amounts of the Company's cash and cash equivalents were $4,204 and $3,763, which equates to their fair value. The fair value of "available-for-sale" securities to fund our deferred compensation and non-qualified pension plan liabilities, which represents mutual and money market funds, is determined based on quoted market prices from active markets utilizing level 1 methods and assumptions. As of December 31, 2017 and 2016, the carrying amount of these securities was $21,776 and $20,342. As of December 31, 2017 and 2016, the carrying amount of the Company's loans payable was $3,650 and $6,535, respectively, which equates to their estimated fair value.

(In thousands of dollars, except per share amounts)

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

| | December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Carrying amount | $ 2,143,127 | $ 1,910,633 |
| Estimated fair value | 2,262,785 | 2,018,933 |

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing level 2 methods and assumptions. The Company's customers' advances for construction have a carrying value of $93,186 and $91,843 at December 31, 2017 and 2016, respectively. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels and future rate increases. Portions of these non-interest bearing instruments are payable annually through 2027 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

**Note 12 – *Stockholders' Equity***

At December 31, 2017, the Company had 300,000,000 shares of common stock authorized; par value $0.50. Shares outstanding and treasury shares held were as follows:

| | December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Shares outstanding | 177,713,943 | 177,394,376 | 176,544,091 |
| Treasury shares | 2,986,308 | 2,916,969 | 2,819,569 |

At December 31, 2017, the Company had 1,770,819 shares of authorized but unissued Series Preferred Stock, $1.00 par value.

The Company has a universal shelf registration statement with the SEC to allow for the potential future sale by the Company, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities and other securities specified therein at indeterminate prices. This registration statement expires in February 2018, and we intend to file a new three-year universal shelf registration statement.

In 2015, the Company filed a registration statement with the SEC which permits the offering, from time to time, of an aggregate of $500,000 in shares of common stock and shares of preferred stock in connection with acquisitions. During 2016, 439,943 shares of common stock totaling $12,845 were issued by the Company to acquire a water utility system. The balance remaining available for use under the acquisition shelf registration as of December 31, 2017 is $487,155.

The form and terms of any securities issued under the universal shelf registration statement and the acquisition shelf registration statement will be determined at the time of issuance.

The Company has a Dividend Reinvestment and Direct Stock Purchase Plan ("Plan") that allows reinvested dividends to be used to purchase shares of common stock at a five percent discount from the current market value. Under the direct stock purchase program, shares are purchased by investors at a five percent discount from the market price. The shares issued under the Plan are either shares purchased by the Company's transfer agent in the open-market or original issue shares. In 2017, 2016, and 2015, 447,753 484,645, and 535,439 shares of the Company were purchased under the dividend reinvestment portion of the Plan by the Company's transfer agent in the open-market for $15,168, $14,916, and $14,380, respectively. During 2017 and 2016, under the dividend reinvestment portion of the Plan, 45,121 and 47,478 original issue shares of common stock were sold, providing the Company with proceeds of $1,453 and $1,388, respectively.

In December 2014, the Company's Board of Directors authorized a share buyback program, commencing in 2015, of up to 1,000,000 shares to minimize share dilution through timely and orderly share repurchases. In December 2015, the Company's Board of Directors added 400,000 shares to this program. The specific timing, amount and other terms of repurchases depend on market conditions, regulatory requirements and other factors. In 2016, we did not repurchase any shares of our common stock in the open market. In 2015, we repurchased 805,000 shares of the Company's common stock in the open market for $20,502. In 2014, we repurchased 560,000 shares of our common stock in the open market for $13,280. This program expired on December 31, 2016.

The Company's accumulated other comprehensive income is reported in the stockholders' equity section of the consolidated balance sheets, the consolidated statements of equity, and the related components of other comprehensive income are reported in the consolidated statements of comprehensive income. The Company reports its unrealized gains or losses on investments as other comprehensive income and accumulated other comprehensive income. The Company recorded a regulatory asset for its underfunded status of its pension and other post-retirement benefit plans that would otherwise be charged to other comprehensive income, as it anticipates recovery of its costs through customer rates.

**Note 13 – *Net Income per Common Share and Equity per Common Share***

Basic net income per share is based on the weighted average number of common shares outstanding. Diluted net income per share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per share. The dilutive effect of stock-based compensation is calculated by using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per share:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Average common shares outstanding during the period for basic computation | 177,612 | 177,273 | 176,788 |
| Effect of dilutive securities: | | | |
| Employee stock-based compensation | 563 | 573 | 729 |
| Average common shares outstanding during the period for diluted computation | 178,175 | 177,846 | 177,517 |

For the years ended December 31, 2017, 2016, and 2015, all of the Company's employee stock options were included in the calculation of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods.

Equity per common share was $11.02 and $10.43 at December 31, 2017 and 2016, respectively. These amounts were computed by dividing Aqua America stockholders' equity by the number of shares of common stock outstanding at the end of each year.

**Note 14 – *Employee Stock and Incentive Plan***

Under the Company's 2009 Omnibus Equity Compensation Plan, as amended as of February 27, 2014 (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. No further grants may be made under the 2004 Plan. The 2009 Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the 2009 Plan may be issued pursuant to stock award, stock units and other stock-based awards, subject to adjustment as provided in the 2009 Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the 2009 Plan for more than 500,000 shares of common stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the 2009 Plan. Awards to employees and consultants under the 2009 Plan are made by a committee of the Board of Directors, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At December 31, 2017, 3,720,624 shares underlying stock-based compensation awards were still available for grant under the 2009 Plan.

(In thousands of dollars, except per share amounts)

The recording of compensation expense for share-based compensation has no impact on net cash flows and results in the reclassification on the consolidated cash flow statements of related tax benefits from cash flows from operating activities to cash flows from financing activities to the extent these tax benefits exceed the associated compensation cost.

***Performance Share Units*** – During 2017, 2016, and 2015, the Company granted performance share units. A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three year performance period specified in the grant, subject to exceptions through the respective vesting periods, generally three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals.

The performance goals of the 2017, 2016, and 2015 PSU grants consisted of the following metrics:

| | Performance Grant of: | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Metric 1 – Company's total shareholder return ("TSR") compared to the TSR for a specific peer group of investor-owned water companies (a market-based condition) | 26.47% | 27.5% | 30% |
| Metric 2 – Company's TSR compared to the TSR for the companies listed in the Standard and Poor's Midcap Utilities Index (a market-based condition) | 26.47% | 27.5% | 30% |
| Metric 3 – Achievement of a targeted cumulative level of rate base growth as a result of acquisitions (a performance-based condition) | 23.53% | - | - |
| Metric 4 – Achievement of targets for maintaining consolidated operations and maintenance expenses over the three year measurement period (a performance-based condition) | 23.53% | - | - |
| Metric 5 – Achievement of a targeted cumulative level of rate base growth as a result of acquisitions (a performance-based condition) | - | 25.0% | - |
| Metric 6 – Achievement of targets for maintaining consolidated operations and maintenance expenses over the three year measurement period (a performance-based condition) | - | 20.0% | - |
| Metric 7 – Maintaining an average ratio of operations and maintenance expenses as a percentage of revenues at Aqua Pennsylvania compared to a target average ratio for the three year performance period (a performance-based condition) | - | - | 20% |
| Metric 8 – Earning a cumulative total earnings before taxes for the Company's operations other than Aqua Pennsylvania for the three year performance period compared to a target (a performance-based condition) | - | - | 20% |

The following table provides the compensation expense and income tax benefit for PSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 4,351 | $ 3,823 | $ 4,419 |
| Income tax benefit | 1,766 | 1,552 | 1,796 |

(In thousands of dollars, except per share amounts)

The following table summarizes nonvested PSU transactions for the year ended December 31, 2017:

| | Number of Share Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested share units at beginning of period | 476,896 | $ 27.96 |
| Granted | 125,202 | 30.79 |
| Performance criteria adjustment | (33,502) | 28.14 |
| Forfeited | (22,664) | 28.68 |
| Share units vested in prior period and issued in current period | 32,400 | 25.31 |
| Share units issued | (125,999) | 36.37 |
| Nonvested share units at end of period | 452,333 | 26.16 |

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions associated with the PSUs using the Monte Carlo valuation method, which assesses the probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs associated with performance-based conditions was based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The fair value of each PSU grant is amortized into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on an estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows. The following table provides the assumptions used in the pricing model for the grant, the resulting grant date fair value of PSUs, and the intrinsic value and fair value of PSUs that vested during the year:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Expected term (years) | 3.0 | 3.0 | 3.0 |
| Risk-free interest rate | 1.49% | 0.91% | 1.03% |
| Expected volatility | 17.9% | 17.9% | 16.9% |
| Weighted average fair value of PSUs granted | $ 30.79 | $ 28.89 | $ 26.46 |
| Intrinsic value of vested PSUs | $ 3,926 | $ 5,912 | $ 7,964 |
| Fair value of vested PSUs | $ 3,207 | $ 5,104 | $ 6,416 |

As of December 31, 2017, $4,945 of unrecognized compensation costs related to PSUs is expected to be recognized over a weighted average period of approximately 1.7 years. The aggregate intrinsic value of PSUs as of December 31, 2017 was $18,114. The aggregate intrinsic value of PSUs is based on the number of nonvested share units and the market value of the Company's common stock as of the period end date.

(In thousands of dollars, except per share amounts)

***Restricted Stock Units*** – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock and is valued based on the fair market value of the Company's stock on the date of grant. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. In some cases, the right to receive the shares is subject to specific performance goals established at the time the grant is made. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation expense and income tax benefit for RSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 1,183 | $ 1,061 | $ 1,076 |
| Income tax benefit | 489 | 438 | 444 |

The following table summarizes nonvested RSU transactions for the year ended December 31, 2017:

| | Number of Stock Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock units at beginning of period | 109,273 | $ 28.48 |
| Granted | 41,293 | 30.37 |
| Stock units vested but not paid | (1,467) | 31.47 |
| Stock units vested and issued | (26,914) | 26.45 |
| Forfeited | (5,398) | 31.03 |
| Nonvested stock units at end of period | 116,787 | 29.46 |

The following table summarizes the value of RSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Weighted average fair value of RSUs granted | $ 30.37 | $ 32.08 | $ 26.00 |
| Intrinsic value of vested RSUs | 896 | 805 | 2,327 |
| Fair value of vested RSUs | 751 | 605 | 1,904 |

As of December 31, 2017, $1,401 of unrecognized compensation costs related to RSUs is expected to be recognized over a weighted average period of approximately 1.7 years. The aggregate intrinsic value of RSUs as of December 31, 2017 was $4,582. The aggregate intrinsic value of RSUs is based on the number of nonvested stock units and the market value of the Company's common stock as of the period end date.

(In thousands of dollars, except per share amounts)

***Stock Options –*** A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire ten years from the grant date. The vesting of stock options granted in 2017 are subject to the achievement of the following performance goal: the Company achieves at least an adjusted return on equity equal to 150 basis points below the return on equity granted by the Pennsylvania Public Utility Commission during the Company's Pennsylvania subsidiary's last rate proceeding. The adjusted return on equity equals net income, excluding net income or loss from acquisitions which have not yet been incorporated into a rate application as of the last year end, divided by equity which excludes equity applicable to acquisitions which are not yet incorporated in a rate application during the award period.

The fair value of each stock option is amortized into compensation expense using the graded vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides compensation expense and income tax benefit for stock options:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expenses | $ 245 | $ - | $ - |
| Income tax benefit | 208 | 260 | 193 |

There were no stock options granted during the years ended December 31, 2016, and 2015.

Options under the plans were issued at the closing market price of the stock on the day of the grant.
The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model, which relies on assumptions that require management's judgment. The following table provides the assumptions used in the pricing model for grants and the resulting grant date fair value of stock options granted in the period reported:

| | Year ended December 31, |
|---|---|
| | 2017 |
| Expected term (years) | 5.45 |
| Risk-free interest rate | 2.01% |
| Expected volatility | 17.7% |
| Dividend yield | 2.51% |
| Grant date fair value per option | $ 4.07 |

The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense.

(In thousands of dollars, except per share amounts)

The following table summarizes stock option transactions for the year ended December 31, 2017:

| | Shares | Weighted Average Exercise Price | Weighted Average Remaining Life (years) | Aggregate Intrinsic Value |
|---|---|---|---|---|
| Outstanding, beginning of year | 427,335 | $ 15.55 | | |
| Granted | 120,127 | 30.47 | | |
| Forfeited | (5,191) | 30.47 | | |
| Expired / Cancelled | (2,812) | 14.26 | | |
| Exercised | (174,527) | 16.46 | | |
| Outstanding at end of year | 364,932 | $ 19.83 | 3.7 | $ 7,081 |
| Exercisable at end of year | 249,996 | $ 14.93 | 1.2 | $ 6,074 |

The intrinsic value of stock options is the amount by which the market price of the stock on a given date, such as at the end of the period or on the day of exercise, exceeded the closing market price of stock on the date of grant. The following table summarizes the intrinsic value of stock options exercised:

| | Years ended December 31, 2017 | 2016 | 2015 |
|---|---|---|---|
| Intrinsic value of options exercised | $ 2,767 | $ 2,945 | $ 4,154 |

The following table summarizes information about the options outstanding and options exercisable as of December 31, 2017:

| | Options Outstanding | | | Options Exercisable | |
|---|---|---|---|---|---|
| | Shares | Weighted Average Remaining Life (years) | Weighted Average Exercise Price | Shares | Weighted Average Exercise Price |
| Range of prices: | | | | | |
| $13.00 - 14.99 | 89,770 | 2.1 | $ 13.72 | 89,770 | $ 13.72 |
| $15.00 - 15.99 | 101,167 | 1.2 | 15.30 | 101,167 | 15.30 |
| $16.00 - 16.99 | 59,059 | 0.2 | 16.15 | 59,059 | 16.15 |
| $17.00 - 30.99 | 114,936 | 9.1 | 30.47 | - | - |
| | 364,932 | 3.7 | 19.83 | 249,996 | 14.93 |

As of December 31, 2017, there was $223 of total unrecognized compensation costs related to nonvested stock options granted under the plans. The cost is expected to be recognized over a weighted average period of approximately 1.5 years.

***Restricted Stock –*** Restricted stock awards provide the grantee with the rights of a shareholder, including the right to receive dividends and to vote such shares, but not the right to sell or otherwise transfer the shares during the restriction period. Restricted stock awards result in compensation expense which is equal to the fair market value of the stock on the date of the grant and is amortized ratably over the restriction period. The Company expects forfeitures of restricted stock to be de minimis.

(In thousands of dollars, except per share amounts)

The following table summarizes the value of restricted stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Intrinsic value of restricted stock awards vested | $ - | $ - | $ 860 |
| Fair value of restricted stock awards vested | - | - | 553 |

As of December 31, 2017, there were no unrecognized compensation costs related to nonvested restricted stock as restricted stock was fully amortized in 2014. Additionally, there was no restricted stock granted during the years ended December 31, 2017, 2016, and 2015.

***Stock Awards*** – The following table provides compensation costs for stock-based compensation related to stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 563 | $ 506 | $ 365 |
| Income tax benefit | 233 | 210 | 151 |

The following table summarizes the value of stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Intrinsic and fair value of stock awards vested | $ 563 | $ 506 | $ 365 |
| Weighted average fair value of stock awards granted | 34.42 | 31.87 | 26.44 |

The following table summarizes stock award transactions for year ended December 31, 2017:

| | Number of Stock Awards | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock awards at beginning of period | - | $ - |
| Granted | 16,345 | 34.42 |
| Vested | (16,345) | 34.42 |
| Nonvested stock awards at end of period | - | - |

**Note 15 – *Pension Plans and Other Post-retirement Benefits***

The Company maintains a qualified, defined benefit pension plan that covers its full-time employees who were hired prior to April 1, 2003. Retirement benefits under the plan are generally based on the employee's total years of service and compensation during the last five years of employment. The Company's policy is to fund the plan annually at a level which is deductible for income tax purposes and which provides assets sufficient to meet its pension obligations over time. To offset some limitations imposed by the Internal Revenue Code with respect to payments under qualified plans, the Company has a non-qualified Supplemental Pension Benefit Plan for Salaried Employees in order to prevent some employees from being penalized by these limitations, and to provide certain retirement benefits based on employee's years of service and compensation. The Company also had non-qualified Supplemental Executive Retirement Plans, which were terminated in 2016, for some current and retired employees. The net pension costs and obligations of the qualified and non-qualified plans are included in the tables which follow. Employees hired after April 1, 2003 may participate in a defined contribution plan that provides a Company matching contribution on amounts contributed by participants and an annual profit-sharing contribution based upon a percentage of the eligible participants' compensation.

Effective July 1, 2015, the Company added a permanent lump sum option to the form of benefit payments offered to participants of the qualified defined benefit pension plan upon retirement or termination. The plan paid $8,858 and $9,990 to participants who elected this option during 2017 and 2016.

In addition to providing pension benefits, the Company offers post-retirement benefits other than pensions to employees hired before April 1, 2003 and retiring with a minimum level of service. These benefits include continuation of medical and prescription drug benefits, or a cash contribution toward such benefits, for eligible retirees and life insurance benefits for eligible retirees. The Company funds these benefits through various trust accounts. The benefits of retired officers and other eligible retirees are paid by the Company and not from plan assets due to limitations imposed by the Internal Revenue Code.

In 2016, the Company recognized a settlement loss of $2,895, which results from lump sum payments from the non-qualified plans exceeding the threshold of service and interest cost for the period. A settlement loss is the recognition of unrecognized pension benefit costs that would have been incurred in subsequent periods. The Company recorded this settlement loss as a regulatory asset, as it is probable of recovery in future rates, which will be amortized into pension benefit costs.

(In thousands of dollars, except per share amounts)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

| | Pension Benefits | Other Post-retirement Benefits |
|---|---|---|
| Years: | | |
| 2018 | $ 20,516 | $ 2,249 |
| 2019 | 20,462 | 2,553 |
| 2020 | 21,580 | 2,777 |
| 2021 | 20,674 | 2,957 |
| 2022 | 21,538 | 3,177 |
| 2023-2027 | 106,397 | 18,764 |

The changes in the benefit obligation and fair value of plan assets, the funded status of the plans and the assumptions used in the measurement of the company's benefit obligation are as follows:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Change in benefit obligation: | | | | |
| Benefit obligation at January 1, | $ 308,172 | $ 306,539 | $ 69,312 | $ 65,137 |
| Service cost | 3,174 | 3,179 | 1,020 | 1,014 |
| Interest cost | 12,434 | 13,038 | 2,947 | 2,927 |
| Actuarial loss | 18,516 | 15,321 | 4,047 | 1,400 |
| Plan participants' contributions | - | - | 124 | 170 |
| Benefits paid | (21,317) | (21,861) | (1,490) | (1,336) |
| Settlements | - | (7,742) | - | - |
| Special termination benefits | - | (302) | - | - |
| Benefit obligation at December 31, | 320,979 | 308,172 | 75,960 | 69,312 |
| | | | | |
| Change in plan assets: | | | | |
| Fair value of plan assets at January 1, | 242,360 | 238,605 | 46,085 | 43,704 |
| Actual return on plan assets | 33,278 | 17,375 | 5,188 | 2,149 |
| Employer contributions | 16,032 | 16,285 | 500 | 1,360 |
| Benefits paid | (21,317) | (21,861) | (1,323) | (1,128) |
| Settlements | - | (7,742) | - | - |
| Special termination benefits | - | (302) | - | - |
| Asset transfer | - | - | (2,700) | - |
| Fair value of plan assets at December 31, | 270,353 | 242,360 | 47,750 | 46,085 |
| | | | | |
| Funded status of plan: | | | | |
| Net liability recognized at December 31, | $ 50,626 | $ 65,812 | $ 28,210 | $ 23,227 |

(In thousands of dollars, except per share amounts)

The following table provides the net liability recognized on the consolidated balance sheets at December 31,:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Current liability | $ 396 | $ 613 | $ - | $ - |
| Noncurrent liability | 50,230 | 65,199 | 28,210 | 23,227 |
| Net liability recognized | $ 50,626 | $ 65,812 | $ 28,210 | $ 23,227 |

At December 31, 2017 and 2016, the Company's pension plans had benefit obligations in excess of its plan assets. The following tables provide the projected benefit obligation, the accumulated benefit obligation and fair market value of the plan assets as of December 31,:

| | Projected Benefit Obligation Exceeds the Fair Value of Plan Assets | |
|---|---|---|
| | 2017 | 2016 |
| Projected benefit obligation | $ 320,979 | $ 308,172 |
| Fair value of plan assets | 270,353 | 242,360 |

| | Accumulated Benefit Obligation Exceeds the Fair Value of Plan Assets | |
|---|---|---|
| | 2017 | 2016 |
| Accumulated benefit obligation | $ 301,473 | $ 291,889 |
| Fair value of plan assets | 270,353 | 242,360 |

The following table provides the components of net periodic benefit costs for the years ended December 31,:

| | Pension Benefits | | | Other Post-retirement Benefits | | |
|---|---|---|---|---|---|---|
| | 2017 | 2016 | 2015 | 2017 | 2016 | 2015 |
| Service cost | $ 3,174 | $ 3,179 | $ 3,349 | $ 1,020 | $ 1,014 | $ 1,224 |
| Interest cost | 12,434 | 13,038 | 12,955 | 2,947 | 2,927 | 2,802 |
| Expected return on plan assets | (17,077) | (16,910) | (18,702) | (2,589) | (2,647) | (2,923) |
| Amortization of prior service cost (credit) | 579 | 578 | 174 | (509) | (549) | (687) |
| Amortization of actuarial loss | 8,003 | 7,153 | 5,993 | 1,165 | 926 | 1,282 |
| Settlement loss | - | 2,895 | - | - | - | - |
| Special termination benefits | - | 302 | - | - | - | - |
| Net periodic benefit cost | $ 7,113 | $ 10,235 | $ 3,769 | $ 2,034 | $ 1,671 | $ 1,698 |

The Company records the underfunded status of its pension and other post-retirement benefit plans on its consolidated balance sheets and records a regulatory asset for these costs that would otherwise be charged to stockholders' equity, as the Company anticipates recoverability of the costs through customer rates to be probable. The Company's pension and other post-retirement benefit plans were underfunded at December 31, 2017 and 2016. Changes in the plans' funded status will affect the assets and liabilities recorded on the balance sheet. Due to the Company's regulatory treatment, the recognition of the funded status is recorded as a regulatory asset pursuant to the FASB's accounting guidance for regulated operations.

(In thousands of dollars, except per share amounts)

The following table provides the amounts recognized in regulatory assets that have not been recognized as components of net periodic benefit cost as of December 31,:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Net actuarial loss | $ 86,750 | $ 92,436 | $ 15,724 | $ 15,441 |
| Prior service cost (credit) | 3,262 | 3,841 | (1,869) | (2,378) |
| Total recognized in regulatory assets | $ 90,012 | $ 96,277 | $ 13,855 | $ 13,063 |

The following table provides the estimated net actuarial loss and prior service cost for the Company's pension plans that will be amortized from regulatory asset into net periodic benefit cost for the year ending December 31, 2018:

| | Pension Benefits | Other Post-retirement Benefits |
|---|---|---|
| Net actuarial loss | $ 7,291 | $ 1,182 |
| Prior service cost (credit) | 527 | (509) |

Accounting for pensions and other post-retirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from the Company's actuarial consultant who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefit expense that the Company recognizes.

The significant assumptions related to the Company's benefit obligations are as follows:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Weighted Average Assumptions Used to Determine Benefit Obligations as of December 31, | | | | |
| Discount rate | 3.66% | 4.13% | 3.73% | 4.25% |
| Rate of compensation increase | 3.0-4.0% | 3.0-4.0% | n/a | n/a |
| Assumed Health Care Cost Trend Rates Used to Determine Benefit Obligations as of December 31, | | | | |
| Health care cost trend rate | n/a | n/a | 7.0% | 6.6% |
| Rate to which the cost trend is assumed to decline (the ultimate trend rate) | n/a | n/a | 5.0% | 5.0% |
| Year that the rate reaches the ultimate trend rate | n/a | n/a | 2022 | 2020 |

*n/a – Assumption is not applicable.*

(In thousands of dollars, except per share amounts)

The significant assumptions related to the Company's net periodic benefit costs are as follows:

| | Pension Benefits | | | Other Post-retirement Benefits | | |
|---|---|---|---|---|---|---|
| | 2017 | 2016 | 2015 | 2017 | 2016 | 2015 |
| Weighted Average Assumptions Used to Determine Net Periodic Benefit Costs for Years Ended December 31, | | | | | | |
| Discount rate | 4.13% | 4.48% | 4.20% | 4.25% | 4.60% | 4.17% |
| Expected return on plan assets | 7.00% | 7.25% | 7.50% | 4.67-7.00% | 4.83-7.25% | 5.00-7.50% |
| Rate of compensation increase | 3.0-4.0% | 3.0-4.0% | 3.0-4.0% | n/a | n/a | n/a |
| Assumed Health Care Cost Trend Rates Used to Determine Net Periodic Benefit Costs for Years Ended December 31, | | | | | | |
| Health care cost trend rate | n/a | n/a | n/a | 6.6% | 7.0% | 7.0% |
| Rate to which the cost trend is assumed to decline (the ultimate trend rate) | n/a | n/a | n/a | 5.0% | 5.0% | 5.0% |
| Year that the rate reaches the ultimate trend rate | n/a | n/a | n/a | 2021 | 2021 | 2019 |

*n/a – Assumption is not applicable.*

Assumed health-care trend rates have a significant effect on the expense and liabilities for other post-retirement benefit plans. The health care trend rate is based on historical rates and expected market conditions. A one-percentage point change in the assumed health-care cost trend rates would have the following effects:

| | 1-Percentage-Point Increase | 1-Percentage-Point Decrease |
|---|---|---|
| Effect on the health-care component of the accrued other post-retirement benefit obligation | $ 4,797 | $ (4,369) |
| Effect on aggregate service and interest cost components of net periodic post-retirement health-care benefit cost | $ 277 | $ (244) |

The Company's discount rate assumption, which is utilized to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds, all of which were noncallable (or callable with make-whole provisions), and have at least $50,000 in outstanding value. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the plan's benefit payments. The Company's pension expense and liability (benefit obligations) increases as the discount rate is reduced.

The Company's expected return on plan assets is determined by evaluating the asset class return expectations with its advisors as well as actual, long-term, historical results of our asset returns. The Company's market related value of plan assets is equal to the fair value of the plan's assets as of the last day of its fiscal year, and is a determinant for the expected return on plan assets which is a component of post-retirement benefits expense. The Company's pension expense increases as the expected return on plan assets decreases. For 2017, the Company used a 7.00% expected return on plan assets assumption which will decrease to 6.75% for 2018. The Company believes its actual long-term asset allocation on average will approximate the targeted allocation. The Company's investment strategy is to earn a reasonable rate of return while maintaining risk at acceptable levels. Risk is managed through fixed income investments to manage interest rate exposures that impact the valuation of liabilities and through the diversification of investments across and within various asset categories. Investment returns are compared to a total plan benchmark constructed by applying the plan's asset allocation target weightings to passive index returns representative of the respective asset classes in which the plan invests. The Retirement and Employee Benefits Committee meets quarterly to review plan investments and management monitors investment performance quarterly through a performance report prepared by an external consulting firm.

(In thousands of dollars, except per share amounts)

The Company's pension plan asset allocation and the target allocation by asset class are as follows:

| | Target Allocation | Percentage of Plan Assets at December 31, 2017 |
|---|---|---|
| Return seeking assets | 50 to 70% | 64% |
| Liability hedging assets | 30 to 50% | 36% |
| Total | 100% | 100% |

| | Target Allocation | Percentage of Plan Assets at December 31, 2016 |
|---|---|---|
| Domestic equities | 25 to 75% | 65% |
| International equities | 0 to 10% | 6% |
| Fixed income | 25 to 50% | 19% |
| Alternative investments | 0 to 5% | 2% |
| Cash and cash equivalents | 0 to 20% | 8% |
| Total | 100% | 100% |

The fair value of the Company's pension plans' assets at December 31, 2017 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Assets measured at NAV (a) | Total |
|---|---|---|---|---|---|
| Common stock | $ 26,902 | $ - | $ - | $ - | $ 26,902 |
| Return seeking assets: | | | | | |
| Global equities | - | - | - | 66,281 | 66,281 |
| Real estate securities | - | - | - | 14,110 | 14,110 |
| Hedge / diversifying strategies | - | - | - | 38,143 | 38,143 |
| Credit | - | - | - | 28,395 | 28,395 |
| Liability hedging assets | - | - | - | 91,872 | 91,872 |
| Cash and cash equivalents | 4,650 | - | - | - | 4,650 |
| Total pension assets | $ 31,552 | $ - | $ - | $ 238,801 | $ 270,353 |

(a) Assets that are measured at fair value using the NAV per share practical expedient have not been classified in the fair value hierarchy.

(In thousands of dollars, except per share amounts)

The fair value of the Company's pension plans' assets at December 31, 2016 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| Domestic equities: | | | | |
| Common stocks | $ 152,740 | $ - | $ - | $ 152,740 |
| Mutual funds | 3,668 | - | - | 3,668 |
| International equities | 13,813 | - | - | 13,813 |
| Fixed income: | | | | |
| U.S. Treasury and government agency bonds | - | 11,170 | - | 11,170 |
| Corporate and foreign bonds | - | 24,385 | - | 24,385 |
| Mutual funds | 9,752 | | - | 9,752 |
| Alternative investments: | | | | |
| Real estate | 2,613 | - | - | 2,613 |
| Commodity funds | 1,279 | - | - | 1,279 |
| Cash and cash equivalents | 348 | 22,592 | - | 22,940 |
| Total pension assets | $ 184,213 | $ 58,147 | $ - | $ 242,360 |

Equity securities include our common stock in the amounts of $16,471 or 6.1% and $20,632 or 8.5% of total pension plans' assets as of December 31, 2017 and 2016, respectively.

The asset allocation for the Company's other post-retirement benefit plans and the target allocation by asset class are as follows:

| | Target Allocation | Percentage of Plan Assets at December 31, 2017 |
|---|---|---|
| Return seeking assets | 50 to 70% | 62% |
| Liability hedging assets | 30 to 50% | 38% |
| Total | 100% | 100% |

| | Target Allocation | Percentage of Plan Assets at December 31, 2016 |
|---|---|---|
| Domestic equities | 25 to 75% | 52% |
| International equities | 0 to 10% | 3% |
| Fixed income | 25 to 50% | 25% |
| Alternative investments | 0 to 5% | 0% |
| Cash and cash equivalents | 0 to 20% | 20% |
| Total | 100% | 100% |

(In thousands of dollars, except per share amounts)

The fair value of the Company's other post-retirement benefit plans' assets at December 31, 2017 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Assets measured at NAV (a) | Total |
|---|---|---|---|---|---|
| Return seeking assets: | | | | | |
| Global equities | $ 9,477 | $ - | $ - | $ 15,158 | $ 24,635 |
| Real estate securities | 1,731 | - | - | 3,211 | 4,942 |
| Liability hedging assets | 5,265 | - | - | 8,961 | 14,226 |
| Cash and cash equivalents | 3,947 | - | - | - | 3,947 |
| Total other post-retirement assets | $ 20,420 | $ - | $ - | $ 27,330 | $ 47,750 |

(a) Assets that are measured at fair value using the NAV per share practical expedient have not been classified in the fair value hierarchy.

The fair value of the Company's other post-retirement benefit plans' assets at December 31, 2016 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| Domestic equities: | | | | |
| Common stocks | $ 10,667 | $ - | $ - | $ 10,667 |

| Corporate and foreign bonds | - | 6,347 | - | 6,347 |
| Alternative investments | 172 | - | - | 172 |
| Cash and cash equivalents | - | 9,225 | - | 9,225 |
| Total other post-retirement assets | $ 25,545 | $ 20,540 | $ - | $ 46,085 |

***Valuation Techniques Used to Determine Fair Value***

- *Common Stocks* - Investments in common stocks are valued using unadjusted quoted prices obtained from active markets.
- *Return Seeking Assets* – Investments in return seeking assets consists of the following:
  - Global equities, which consist of common and preferred shares of stock, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or commingled fund vehicles, consisting of such securities valued using NAV, which are not classified within the fair value hierarchy.
  - Real estate securities, which consist of securities, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or for real estate commingle fund vehicles that are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.

  - Hedge / diversifying strategies, which consist of a multi-manager fund vehicle having underlying exposures that collectively seek to provide low correlation of return to equity and fixed income markets, thereby offering diversification. As a multi-manager fund investment, NAV is derived from underlying manager NAVs, which are derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
  - Credit, which consist of certain opportunistic, return-oriented credits which primarily include below investment grade bonds (i.e. high yield bonds), bank loans, and securitized debt. Credits are valued using the NAV per fund share, derived from either quoted prices in active markets of the underlying securities, or less active markets, or quotes of similar assets, and are not classified within the fair value hierarchy.

- *Liability Hedging Assets* – Investments in liability hedging assets consist of funds investing in high-quality fixed income (i.e. U.S. Treasury securities and government bonds), and for funds for which market quotations are readily available, are valued at the last reported closing price on the primary market or exchange on which they are traded. Funds for which market quotations are not readily available, are valued using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
- *Cash and Cash Equivalents* – Investments in cash and cash equivalents are comprised of both uninvested cash and money market funds. The uninvested cash is valued based on its carrying value, and the money market funds are valued utilizing the net asset value per unit based on the fair value of the underlying assets as determined by the fund's investment managers.
- *Mutual Funds* – Investments in mutual funds which consist of either equity or fixed income investments are valued using the net asset value per unit as obtained from quoted market prices from active markets.
- *International Equities* – Investments in international equities are valued using unadjusted quoted prices obtained from active markets.
- *Fixed Income* – Investments in fixed income that comprise U.S. Treasury and government agency bonds, and corporate and foreign bonds are valued utilizing pricing models that incorporate available trade, bid, and other market information to value the fixed income securities.
- *Alternative Investments* – Investments in alternative investments are comprised of either real estate funds, real estate investment trusts, or commodity funds, and are valued using unadjusted quoted prices obtained from active markets.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and the Company's funding policy, during 2018 our pension contribution is expected to be $12,484.

The Company has a 401(k) savings plan, which is a defined contribution plan and covers substantially all employees. The Company makes matching contributions that are based on a percentage of an employee's contribution, subject to specific limitations, as well as, non-discretionary contributions based on eligible hourly wages for certain union employees, discretionary year-end contributions based on an employee's eligible compensation, and employer profit sharing contributions. Participants may diversify their Company matching account balances into other investments offered under the 401(k) savings plan. The Company's contributions, which are recorded as compensation expense, were $5,374, $4,988, and $5,001, for the years ended December 31, 2017, 2016, and 2015, respectively.

**Note 16 – *Water and Wastewater Rates***

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that historically have been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change which provides for the flow-through of income tax benefits that resulted in a substantial reduction in income tax expense and greater net income and cash flow. This change allowed Aqua Pennsylvania to suspend its water Distribution System Improvement Charges in 2013 and lengthen the amount of time until the next Aqua Pennsylvania rate case. Beginning on October 1, 2017, Aqua Pennsylvania initiated a water infrastructure rehabilitation surcharge for the capital invested since the last rate proceeding and expects to file a base rate case in 2018.

The Company's operating subsidiaries were allowed rate increases totaling $7,558 in 2017, $3,434 in 2016, and $3,347 in 2015, represented by five, six, and four rate decisions, respectively. Revenues from these increases realized in the year of grant were approximately $6,343, $1,788, and $2,887 in 2017, 2016, and 2015, respectively.

Six states in which the Company operates permit water utilities, and in five states wastewater utilities, to add a surcharge to their water or wastewater bills to offset the additional depreciation and capital costs related to infrastructure system replacement and rehabilitation projects completed and placed into service between base rate filings. Currently, Pennsylvania, Illinois, Ohio, Indiana, New Jersey, and North Carolina allow for the use of this surcharge. The surcharge for infrastructure system replacements and rehabilitations is typically adjusted periodically based on additional qualified capital expenditures completed or anticipated in a future period, is capped as a percentage of base rates, generally at 5% to 12.75%, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. The surcharge for infrastructure system replacements and rehabilitations provided revenues in 2017, 2016, and 2015 of $10,255, $7,379, and $3,261, respectively.

**Note 17 – *Segment Information***

The Company has ten operating segments and one reportable segment. The Regulated segment, the Company's single reportable segment, is comprised of eight operating segments representing our water and wastewater regulated utility companies which are organized by the states where we provide water and wastewater services. These operating segments are aggregated into one reportable segment since each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment.

Two operating segments are included within the Other category below. These segments are not quantitatively significant and are comprised of Aqua Infrastructure and Aqua Resources. In addition to these segments, Other is comprised of other business activities not included in the reportable segment, including corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

(In thousands of dollars, except per share amounts)

The following table presents information about the Company's reportable segment:

| | 2017 | | | 2016 | | |
|---|---|---|---|---|---|---|

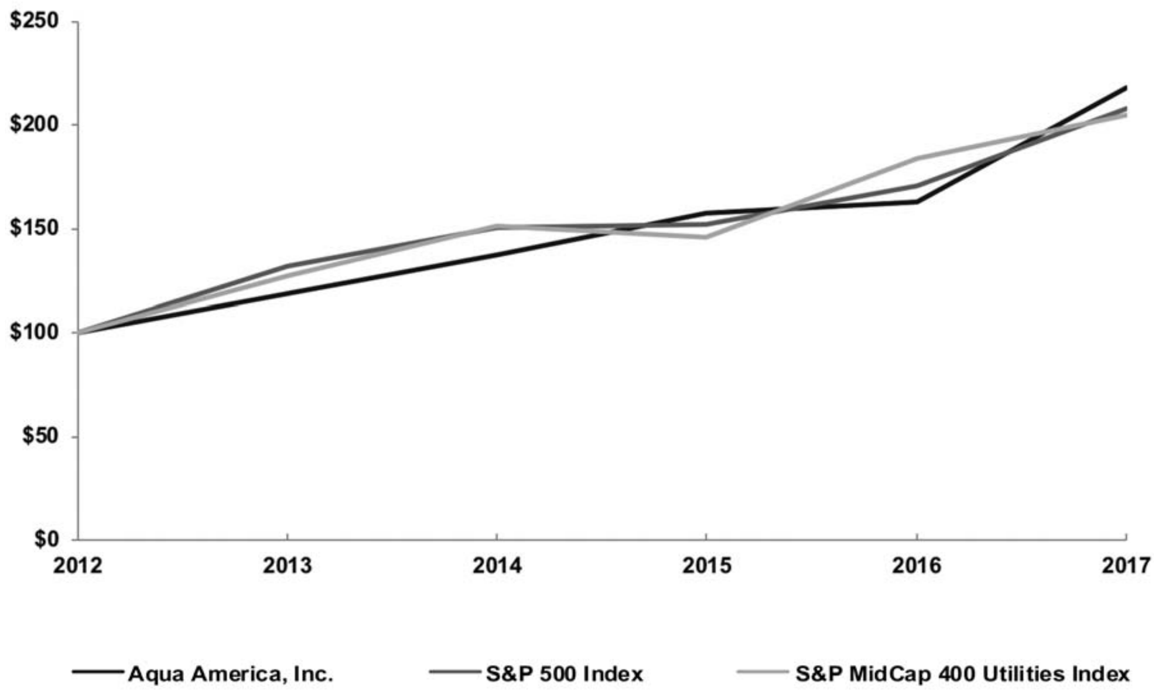
(2) Reflects continuing operations
(3) Debt issuance costs for the years ended December 31, 2017, 2016, 2015, 2014, and 2013 were $21,605, $22,357, $23,165, $23,509, and $24,387, respectively

**Stock Price Performance**

The graph below matches the cumulative 5-Year total return of holders of Aqua America, Inc.'s common stock with the cumulative total returns of the S&P 500 index, and the S&P MidCap 400 Utilities index. The graph assumes that the value of the investment in our common stock, in each index, and in the peer group (including reinvestment of dividends) was $100 on 12/31/2012 and tracks it through 12/31/2017.

## Comparison of Five Year Cumulative Total Return*

Among Aqua America, Inc., the S&P 500 Index, and S&P MidCap 400 Utilities Index



*$100 invested on 12/31/12 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

**Years as of December 31**

| | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |
|---|---|---|---|---|---|---|
| Aqua America, Inc. | 100.00 | 118.76 | 137.88 | 157.86 | 162.94 | 217.95 |
| S&P 500 Index | 100.00 | 132.39 | 150.51 | 152.59 | 170.84 | 208.14 |
| S&P MidCap 400 Utilities Index | 100.00 | 127.72 | 151.13 | 145.78 | 184.16 | 204.62 |

2001 Market Street
Philadelphia, PA 19103-7042

**Stock Exchange**
The Common Stock of the company is listed on the New York Stock Exchange and under the ticker symbol **WTR**.

**Dividend Reinvestment and Direct Stock Purchase Plan**
The company's Dividend Reinvestment and Direct Stock Purchase Plan ("Plan") enables shareholders to reinvest all, or a designated portion of, dividends paid on up to 100,000 shares of Common Stock in additional shares of Common Stock at a discretionary discount from a price based on the market value of the stock. The discount between 0 and 5.0 percent on the shares purchased or issued to meet the dividend reinvestment requirement will be designated by us in our sole discretion prior to the purchase or issuance of such shares. We reserve the right to change, reduce or discontinue any discount at any time without notice. In addition, shareholders may purchase additional shares of Aqua America Common Stock at any time with a minimum investment of $50, up to a maximum of $250,000 annually. Individuals may become shareholders by making an initial investment of at least $500. A Plan prospectus may be obtained by calling Computershare at 800.205.8314 or by visiting www.computershare.com/investor. Please read the prospectus carefully before you invest.

**IRA, Roth IRA, Education IRA**

An IRA, Roth IRA or Coverdell Education Savings Account may be opened through the Plan to hold shares of Common Stock of the company and to make contributions to the IRA to purchase shares of Common Stock. Participants in the Plan may roll over an existing IRA or other qualified plan distribution in cash into an IRA under the Plan to purchase the company's Common Stock. Participants may also transfer the company's Common Stock from an existing IRA into an IRA under the Plan. A prospectus, IRA forms and a disclosure statement may be obtained by calling Computershare at 800.597.7736. Please read the prospectus carefully before you invest.

**Direct Deposit**

With direct deposit, Aqua America cash dividends are deposited automatically on the dividend payment date of each quarter. Shareholders will receive confirmation of their deposit in the mail. Shareholders interested in direct deposit should call the company's transfer agent at 800.205.8314.

**Delivery of voting materials to shareholders sharing an address**

The SEC's rules permit the Company to deliver a Notice of Internet Availability of Proxy Materials or a single set of proxy materials to one address shared by two or more of the Company's shareholders. This is intended to reduce the printing and postage expense of delivering duplicate voting materials to our shareholders who have more than one Aqua America stock account. A separate Notice of Internet Availability or proxy card is included for each of these shareholders. If you received a Notice of Internet Availability you will not receive a printed copy of the proxy materials unless you request it by following the instructions in the notice for requesting printed proxy material.

**How to obtain a separate set of voting materials**

If you are a registered shareholder who shares an address with another registered shareholder and have received only one Notice of Internet Availability of Proxy Materials or set of proxy material and wish to receive a separate copy for each shareholder in your household for the 2018 annual meeting, you may write or call us to request a separate copy of this material at no cost to you at 610.645.1040 or write us at:

Attn: Investor Relations
Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA, 19010

For future annual meetings, you may request separate voting material by calling Broadridge at 866.540.9095, or by writing to Broadridge Financial Solutions, Inc., Householding Department, 51 Mercedes Way, Edgewood, New York 11717.

**Account Access**

Aqua America shareholders may access their account by visiting www.computershare.com/investor. Shareholders may view their account, purchase additional shares, and make changes to their account. To learn more, visit www.computershare.com/investor or call 800.205.8314.

**Dividends**

Aqua America has paid dividends for 73 consecutive years. The normal Common Stock dividend dates for 2018 and the first six months of 2019 are:

| Declaration Date | Ex-Dividend Date | Record Date | Payment Date |
|---|---|---|---|
| February 5, 2018 | February 14, 2018 | February 16, 2018 | March 1, 2018 |
| May 7, 2018 | May 16, 2018 | May 18, 2018 | June 1, 2018 |
| August 6, 2018 | August 15, 2018 | August 17, 2018 | September 1, 2018 |
| November 5, 2018 | November 14, 2018 | November 16, 2018 | December 1, 2018 |
| February 4, 2019 | February 13, 2019 | February 15, 2019 | March 1, 2019 |
| May 6, 2019 | May 15, 2019 | May 17, 2019 | June 1, 2019 |

To be an owner of record, and therefore eligible to receive the quarterly dividend, shares must have been purchased before the ex-dividend date. Owners of any share(s) on or after the ex-dividend date will not receive the dividend for that quarter. The previous owner — the owner of record — will receive the dividend.

Only the Board of Directors may declare dividends and set record dates. Therefore, the payment of dividends and these dates may change at the discretion of the Board.

Dividends paid on the company's Common Stock are subject to Federal and State income tax.

**Lost Dividend Checks, Stock Certificates and Escheatment**

Dividend checks lost by shareholders, or those that might be lost in the mail, will be replaced upon notification of the lost or missing check. All inquiries concerning lost or missing dividend checks should be made to the company's transfer agent at 800.205.8314. Shareholders should call or write the company's transfer agent to report a lost certificate. Appropriate documentation will be prepared and sent to the shareholder with instructions.

Escheatment is the act of reporting and transferring property to a state when the rightful owner has an invalid address or has not made contact or initiated a transaction during the state's designated dormancy period. Escheated assets are transferred to the state for safekeeping (and often liquidated) until the rightful owner makes a claim on the asset. To keep your shares of stock and uncashed dividends from being escheated, you must maintain contact (recommended at least once a year) with the company's transfer agent, especially if you recently changed your address, changed your marital status or are managing an estate following a death. Unclaimed property laws vary widely from state to state.

**Safekeeping of Stock Certificates**

Under the Direct Stock Purchase Plan, shareholders may have their stock certificates deposited with the transfer agent for safekeeping free of charge. Stock certificates and written instructions should be forwarded to:

(Mark One)
☑ ANNUAL REPORT PURSUANT TO SECTION 13 or 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2017

Or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from __________ to __________

Commission File number 1-6659

**AQUA AMERICA, INC.**
(Exact name of registrant as specified in its charter)

| | |
|---|---|
| Pennsylvania | 23-1702594 |
| (State or other jurisdiction of incorporation or organization) | (I.R.S. Employer Identification No.) |
| 762 W Lancaster Avenue, Bryn Mawr, Pennsylvania | 19010-3489 |
| (Address of principal executive offices) | (Zip Code) |

(610) 527-8000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

| Title of each class | Name of each exchange on which registered |
|---|---|
| Common stock, par value $.50 per share | New York Stock Exchange, Inc. |

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
☑ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
☐ Yes ☑ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☑ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
☑ Yes ☐ No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "small reporting company," and "emerging growth company" in Rule 12(b)-2 of the Exchange Act.:

| | |
|---|---|
| Large accelerated filer ☑ | Accelerated filer ☐ |
| Non-accelerated filer ☐ (do not check if smaller reporting company) | Small reporting company ☐ |
| Emerging growth company ☐ | |

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☑No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant as of June 30, 2017: $5,901,277,615

The number of shares outstanding of the registrant's common stock as of February 13, 2018: 177,750,505

**DOCUMENTS INCORPORATED BY REFERENCE**

(1) Portions of the definitive Proxy Statement, relating to the 2018 annual meeting of shareholders of registrant, to be filed within 120 days after the end of the fiscal year covered by this Form 10-K, have been incorporated by reference into Part III of this Form 10-K

TABLE OF CONTENTS

## SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-K (the "Annual Report") are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Forward-looking statements in this Annual Report include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax policies, including changes in tax laws and policies as a result of the recently enacted Tax Cuts and Jobs Act, and the regulatory treatment of the effects of those policies;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this Annual Report completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans, and beliefs only as of the date of this Annual Report. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see *Risk Factors*. We qualify all of our forward-looking statements by these cautionary statements.

PART I

Item 1. *Business*

*The Company*

Aqua America, Inc. (referred to as “Aqua America”, the “Company”, “we”, “us”, or “our”), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania’s service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company’s market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies’ service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.’s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

The following table reports our operating revenues, by principal state, for the Regulated segment and Other and eliminations for the year ended December 31, 2017:

| | Operating Revenues (000's) | Operating Revenues (%) |
|---|---|---|
| Pennsylvania | $ 419,594 | 51.9% |
| Ohio | 106,254 | 13.1% |
| Texas | 72,312 | 8.9% |
| Illinois | 64,129 | 7.9% |
| North Carolina | 54,991 | 6.8% |
| Other states (1) | 87,625 | 10.8% |
| Regulated segment total | 804,905 | 99.4% |
| Other and eliminations | 4,620 | 0.6% |
| Consolidated | $ 809,525 | 100.0% |

(1) Includes our operating subsidiaries in the following states: New Jersey, Indiana, and Virginia.

Information concerning revenues, net income, identifiable assets and related financial information for the Regulated segment and Other and eliminations for 2017, 2016, and 2015 is set forth in *Management's Discussion and Analysis of Financial Condition and Results of Operations* and in Note 17 – *Segment Information* in the *Notes to Consolidated Financial Statements* which is contained in Item 8 of this Annual Report.

The following table summarizes our operating revenues, by utility customer class, for the Regulated segment and Other and eliminations for the year ended December 31, 2017:

| | Operating Revenues (000's) | Operating Revenues (%) |
|---|---|---|
| Residential water | $ 483,865 | 59.8% |
| Commercial water | 130,373 | 16.1% |
| Fire protection | 30,619 | 3.8% |
| Industrial water | 27,880 | 3.4% |
| Other water | 34,705 | 4.3% |
| Total water | 707,442 | 87.4% |
| Wastewater | 87,560 | 10.8% |
| Other utility | 9,903 | 1.2% |
| Regulated segment total | 804,905 | 99.4% |
| Other and eliminations | 4,620 | 0.6% |
| Consolidated | $ 809,525 | 100.0% |

Our utility customer base is diversified among residential water, commercial water, fire protection, industrial water, other water, wastewater customers, and other utility customers (consisting of operating contracts that are closely associated with the utility operations). Residential water and wastewater customers make up the largest component of our utility customer base, with these customers representing approximately 70% of our water and wastewater revenues for 2017, 2016, and 2015, respectively. Substantially all of our water customers are metered, which allows us to measure and bill for our customers' water consumption. Water consumption per customer is affected by local weather conditions during the year, especially during late spring, summer, and early fall. In general, during these seasons, an extended period of dry weather increases consumption, while above average rainfall decreases consumption. Also, an increase in the average temperature generally causes an increase in water consumption. On occasion, abnormally dry weather in our service areas can result in governmental authorities declaring drought warnings and imposing water use restrictions in the affected areas, which could reduce water consumption.  See "Business – *Water Utility Supplies, and Facilities and Wastewater Utility Facilities*" for a discussion of water use restrictions that may impact water consumption during abnormally dry weather.  The geographic diversity of our utility customer base reduces the effect of our exposure to extreme or unusual weather conditions in any one area of our service territory.  Water usage is also affected by changing consumption patterns by our customers, resulting from such causes as increased water conservation and the installation of water saving devices and appliances that can result in decreased water usage.  It is estimated that in the event we experience a 0.50% decrease in residential water consumption it would result in a decrease in annual residential water revenue of approximately $2,400,000, and would likely be partially offset by a reduction in incremental water production expenses such as chemicals and power.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth.  See *Economic Regulation* for a discussion of water and wastewater rates.  The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

| Year | Utility Customer Growth Rate |
|---|---|
| 2017 | 1.1% |
| 2016 | 1.6% |
| 2015 | 1.9% |
| 2014 | 1.3% |
| 2013 | 1.3% |

In 2017, our customer count increased by 10,584 customers, primarily due to utility systems that we acquired and organic growth.  Overall, for the five-year period of 2013 through 2017, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.4%.  During the five-year period ended December 31, 2017, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 968,357 at January 1,  2013 to 982,849 at December 31, 2017.    This five-year period includes the impact of the condemnation of our Fort Wayne, IN system in 2014, which resulted in the loss of approximately 13,000 connections.

*Acquisitions and Other Growth Ventures*

We believe that acquisitions will continue to be an important source of customer growth for us.  We intend to continue to pursue acquisitions of government-owned and regulated water and wastewater systems that provide services in areas near our existing service territories or in new service areas.  We engage in continuing activities with respect to potential acquisitions, including calling on prospective sellers, performing analyses of and due diligence on  acquisition candidates, making preliminary acquisition proposals, and negotiating the terms of potential acquisitions.  Further, we are also seeking other potential business opportunities, including but not limited to, partnering with public and regulated utilities to invest in infrastructure projects, growing our market-based activities by acquiring businesses that provide water and wastewater or other utility-related services, and investing in infrastructure projects.

According to the U.S. Environmental Protection Agency ("EPA"), approximately 85% of the U.S. population obtains its water from community water systems, and 15% of the U.S. population obtains its water from private wells.  With approximately 53,000 community water systems in the U.S. (82% of which serve less than 3,300 customers), the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water and wastewater).  The majority of these community water systems are government-owned, and the balance of the systems are regulated utilities.  The nation's water systems range in size from large government-owned systems, such as the New York City water system which serves approximately 8.5 million people, to small systems, where a few customers share a common well.  In the states where we operate regulated utilities, we believe there are approximately 14,500 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems.

Although not as fragmented as the water industry, the wastewater industry in the U.S. also presents opportunities for consolidation.  According to the EPA's most recent survey of wastewater treatment facilities (which includes both government-owned facilities and regulated utility systems) in 2012, there are approximately 15,000 such facilities in the nation serving approximately 76% of the U.S. population.  The remaining population represents individual homeowners with their own treatment facilities; for example, community on-lot disposal systems and septic tank systems.  A majority of wastewater facilities are government-owned rather than regulated utilities.  The EPA's survey also indicated that there are approximately 4,000 wastewater facilities in operation in the states where we operate regulated utilities.

Because of the fragmented nature of the water and wastewater utility industries, we believe there are many potential water and wastewater system acquisition candidates throughout the U.S.  We believe the factors driving consolidation of these systems are:

- the benefits of economies of scale;
- the increasing cost and complexity of environmental regulations;
- the need for substantial capital investment;
- the need for technological and managerial expertise;
- the desire to improve water quality and service;
- limited access to cost-effective financing;
- the monetizing of public assets to support, in some cases, the declining financial condition of municipalities; and
- the use of system sale proceeds by a municipality to accomplish other public purposes.

We are actively exploring opportunities to expand our utility operations through acquisitions or other growth ventures.  During the five-year period ended December 31, 2017, we expanded our utility operations by completing 70 acquisitions or other growth ventures.

*Water Utility Supplies and Facilities and Wastewater Utility Facilities*

Our water utility operations obtain their water supplies from surface water sources, underground aquifers, and water purchased from other water suppliers.  Our water supplies are primarily self-supplied and processed at twenty-one surface water treatment plants located in four states, and numerous well stations located in all of the states in which we conduct business.  Approximately 7% of our water supplies are provided through water purchased from other water suppliers.  It is our policy to obtain and maintain the permits necessary to obtain the water we distribute.

We believe that the capacities of our sources of supply, and our water treatment, pumping and distribution facilities, are generally sufficient to meet the present requirements of our customers under normal conditions.  We plan system improvements and additions to capacity in response to normal replacement and renewal needs, changing regulatory standards, changing patterns of consumption, and increased demand from customer growth.  The various state utility commissions have generally recognized the operating and capital costs associated with these improvements in setting water and wastewater rates.

On occasion, drought warnings and water use restrictions are issued by governmental authorities for portions of our service territories in response to extended periods of dry weather conditions.  The timing and duration of the warnings and restrictions can have an impact on our water revenues and net income.  In general, water consumption in the summer months is more affected by drought warnings and restrictions because discretionary and recreational use of water is at its highest during the summer months.  At other times of the year, warnings and restrictions generally have less of an effect on water consumption.  Currently, portions of our northern and central Texas service areas have conservation water restrictions.  Drought warnings and watches result in the public being asked to voluntarily reduce water consumption.

We believe that our wastewater treatment facilities are generally adequate to meet the present requirements of our customers under normal conditions.  Additionally, we own several wastewater collection systems that convey the wastewater to a municipally-owned facility for treatment.  Changes in regulatory requirements can be reflected in revised permit limits and conditions when permits are renewed, typically on a five-year cycle, or when treatment capacity is expanded.  Capital improvements are planned and budgeted to meet normal replacement and renewal needs, anticipated changes in regulations, needs for increased capacity related to projected growth, and to reduce inflow and infiltration to

collection systems. The various state utility commissions have generally recognized the operating and capital costs associated with these improvements in setting wastewater rates for current and new customers. It is our policy to obtain and maintain the permits necessary for the treatment of the wastewater that we return to the environment.

*Economic Regulation*

Most of our water and wastewater utility operations are subject to regulation by their respective state utility commissions, which have broad administrative power and authority to regulate billing rates, determine franchise areas and conditions of service, approve acquisitions and authorize the issuance of securities. The utility commissions also establish uniform systems of accounts and approve the terms of contracts with affiliates and customers, business combinations with other utility systems, and loans and other financings. The policies of the utility commissions often differ from state to state, and may change over time. A small number of our operations are subject to rate regulation by county or city governments. The profitability of our utility operations is influenced to a great extent by the timeliness and adequacy of rate allowances we are granted by the respective utility commissions or authorities in the various states in which we operate.

Rate Case Management Capability – We maintain a rate case management capability, the objective of which is to provide that the tariffs of our utility operations reflect, to the extent practicable, the timely recovery of increases in costs of operations, capital expenditures, interest expense, taxes, energy, materials, and compliance with environmental regulations. We file rate increase requests to recover and earn a fair return on the infrastructure investments that we make in improving or replacing our facilities and to recover expense increases. In the states in which we operate, we are primarily subject to economic regulation by the following state utility commissions:

| State | Utility Commission |
|---|---|
| Pennsylvania | Pennsylvania Public Utility Commission |
| Ohio | Public Utilities Commission of Ohio |
| Texas | Public Utility Commission of Texas |
| Illinois | Illinois Commerce Commission |
| North Carolina | North Carolina Utilities Commission |
| New Jersey | New Jersey Board of Public Utilities |
| Indiana | Indiana Utility Regulatory Commission |
| Virginia | Virginia State Corporation Commission |

Our water and wastewater operations are comprised of 53 rate divisions, each of which requires a separate rate filing for the evaluation of the cost of service, including the recovery of investments, in connection with the establishment of rates for that rate division. When feasible and beneficial to our utility customers, we will seek approval from the applicable state regulatory commission to consolidate rate divisions to achieve a more even distribution of costs over a larger customer base. All of the states in which we operate permit us to file a revenue requirement for some form of consolidated rates for all, or some of the rate divisions in that state.

In Virginia, we may seek authorization to bill our utility customers in accordance with a rate filing that is pending before the respective regulatory commission. As of December 31, 2017, we have no billings under interim rate arrangements for rate case filings in progress. Furthermore, some utility commissions authorize the use of expense deferrals and amortization in order to provide for an impact on our operating income by an amount that approximates the requested amount in a rate request. In these states, the additional revenue billed and collected prior to the final regulatory commission ruling is subject to refund to customers based on the outcome of the ruling. The revenue recognized and the expenses deferred by us reflect an estimate as to the final outcome of the ruling. If the request is denied completely or in part, we could be required to refund to customers some or all of the revenue billed to date and write-off some or all of the deferred expenses.

Revenue Surcharges – Six states in which we operate water utilities, and five states in which we operate wastewater utilities, permit us to add a surcharge to their respective bills to offset the additional depreciation and capital costs associated with capital expenditures related to replacing and rehabilitating infrastructure systems. Without this surcharge, a water and wastewater utility absorbs all of the depreciation and capital costs of these projects between base rate increases. The gap between the time that a capital project is completed and the recovery of its costs in rates is known as regulatory lag. This surcharge is intended to substantially reduce regulatory lag, which often acted as a disincentive to water and wastewater utilities to rehabilitate their infrastructure. In addition, our subsidiaries in some states use a surcharge or credit on their bills to reflect changes in costs, such as changes in state tax rates, other taxes and purchased water costs, until such time as the new cost levels are incorporated into base rates.

Currently, New Jersey allows for an infrastructure rehabilitation surcharge for water utilities, while Pennsylvania, Illinois, Ohio, Indiana, and North Carolina allow for the use of an infrastructure rehabilitation surcharge for both water and wastewater utility systems. The infrastructure rehabilitation surcharge typically adjusts periodically based on additional qualified capital expenditures completed or anticipated in a future period, and is capped at a percentage of base rates, generally at 5% to 12.75%, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. This surcharge provided revenues of $10,255,284 in 2017, $7,379,000 in 2016, and $3,261,000 in 2015.

Income Tax Accounting Change – In December 2012, Aqua Pennsylvania adopted an income tax accounting change, implemented on Aqua America's 2012 federal income tax return, which was filed in September 2013. This accounting change allows a tax deduction for qualifying utility asset improvements that were formerly capitalized for tax purposes, and was implemented in response to a June 2012 rate order issued by the Pennsylvania Public Utility Commission. The Pennsylvania rate order requires use of the flow-through method of income tax benefits which results in a reduction in current income tax expense as a result of the recognition of income tax benefits resulting from the accounting change. This tax accounting change and its treatment under the Pennsylvania rate order provided sufficient income tax benefits to permit the suspension of the Pennsylvania infrastructure rehabilitation surcharge from January 1, 2013 to September 30, 2017. Beginning on October 1, 2017, Aqua Pennsylvania initiated a water infrastructure rehabilitation surcharge for the capital invested since the last rate proceeding and expects to file a base rate case in 2018.

Fair Market Value Legislation – In April 2016, Pennsylvania enacted legislation allowing the public utility commission to utilize fair market value to set ratemaking rate base instead of the depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. The legislation includes a process for engaging two independent utility valuation experts to perform appraisals that are filed with the public utility commission and then averaged and compared to the purchase price. The ratemaking rate base is the lower of the average of the appraisals or the purchase price and is subject to regulatory approval. Illinois, Indiana, and New Jersey also have legislation that allows the use of fair market value under varying rules and circumstances. We believe that this legislation will encourage consolidation in the water and wastewater industry providing municipalities with an option for exiting the business if they are dealing with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever increasing environmental regulations or simply want to focus on other community priorities.

*Competition*

In general, we believe that Aqua America and its subsidiaries have valid authority, free from unduly burdensome restrictions, to enable us to carry on our business as presently conducted in the franchised or contracted areas we now serve. The rights to provide water or wastewater service to a particular franchised service territory are generally non-exclusive, although the applicable utility commissions usually allow only one regulated utility to provide service to a given area. In some instances, another water utility provides service to a separate area within the same political subdivision served by one of our subsidiaries. Therefore, as a regulated utility, there is little or no competition for the daily water and wastewater service we provide to our customers. Water and wastewater utilities may compete for the acquisition of other water and wastewater utilities or for acquiring new customers in new service territories. Competition for these acquisitions generally comes from nearby utilities, either other regulated utilities or municipal-owned, and sometimes from strategic or financial purchasers seeking to enter or expand in the water and wastewater industry. We compete for new service territories and the acquisition of other utilities on the following bases:

- economic value;
- economies of scale;
- our ability to provide quality water and wastewater service;
- our existing infrastructure network;
- our ability to perform infrastructure improvements;

- our ability to comply with environmental, health, and safety regulations;
- our technical, regulatory, and operational expertise;
- our ability to access capital markets; and
- our cost of capital.

The addition of new service territories and the acquisition of other utilities by regulated utilities such as us are generally subject to review and approval by the applicable state utility commissions.

In a very few number of instances, in one of our southern states, where there are municipally-owned water or wastewater systems near our operating divisions, the municipally-owned system may either have water distribution or wastewater collection mains that are located adjacent to our division's mains or may construct new mains that parallel our mains. In these rare circumstances, the municipally-owned system may attempt to voluntarily offer service to customers who are connected to our mains, resulting in our mains becoming surplus or underutilized without compensation.

In the states where our subsidiaries operate, it is possible that portions of our subsidiaries' operations could be acquired by municipal governments by one or more of the following methods:

- eminent domain;
- the right of purchase given or reserved by a municipality or political subdivision when the original franchise was granted; and
- the right of purchase given or reserved under the law of the state in which the subsidiary was incorporated or from which it received its permit.

The price to be paid upon such an acquisition by the municipal government is usually determined in accordance with applicable law under eminent domain. In other instances, the price may be negotiated, fixed by appraisers selected by the parties or computed in accordance with a formula prescribed in the law of the state or in the particular franchise or charter. We believe that our operating subsidiaries will be entitled to fair market value for any assets that are condemned, and we believe the fair market value will be in excess of the book value for such assets.

Despite maintaining a program to monitor condemnation interests and activities that may affect us over time, one of our primary strategies continues to be to acquire additional water and wastewater systems, to maintain our existing systems where there is a business or a strategic benefit, and to actively oppose unilateral efforts by municipal governments to acquire any of our operations, particularly for less than the fair market value of our operations or where the municipal government seeks to acquire more than it is entitled to under the applicable law or agreement. On occasion, we may voluntarily agree to sell systems or portions of systems in order to help focus our efforts in areas where we have more critical mass and economies of scale or for other strategic reasons.

*Environmental, Health and Safety Regulation*

Provision of water and wastewater services is subject to regulation under the federal Safe Drinking Water Act, the Clean Water Act, and related state laws, and under federal and state regulations issued under these laws. These laws and regulations establish criteria and standards for drinking water and for wastewater discharges. In addition, we are subject to federal and state laws and other regulations relating to solid waste disposal, dam safety and other aspects of our operations. Capital expenditures and operating costs required as a result of water quality standards and environmental requirements have been traditionally recognized by state utility commissions as appropriate for inclusion in establishing rates.

From time to time, Aqua America has acquired, and may acquire, systems that have environmental compliance issues. Environmental compliance issues also arise in the course of normal operations or as a result of regulatory changes. Aqua America attempts to align capital budgeting and expenditures to address these issues in due course. We believe that the capital expenditures required to address outstanding environmental compliance issues have been budgeted in our capital program and represent approximately $63,237,000, or approximately 3.0% of our expected total capital expenditures over the next five years. We are parties to agreements with regulatory agencies in Pennsylvania, Texas, North Carolina, and Indiana under which we have committed to make improvements for environmental compliance. These agreements are intended to provide the regulators with assurance that problems covered by these agreements will be addressed, and the agreements generally provide protection from fines, penalties and other actions while corrective measures are being implemented. We are actively working directly with state environmental officials in Pennsylvania, Texas, and North Carolina to implement or amend regulatory agreements as necessary.

Safe Drinking Water Act - The Safe Drinking Water Act establishes criteria and procedures for the EPA to develop national quality standards for drinking water. Regulations issued pursuant to the Safe Drinking Water Act set standards regarding the amount of microbial and chemical contaminants and radionuclides in drinking water. Current requirements under the Safe Drinking Water Act are not expected to have a material impact on our business, financial condition, or results of operations as we have made and are making investments to meet existing water quality standards. We may, in the future, be required to change our method of treating drinking water at some sources of supply and make additional capital investments if additional regulations become effective.

Clean Water Act - The Clean Water Act regulates discharges from drinking water and wastewater treatment facilities into lakes, rivers, streams, and groundwater. It is our policy to obtain and maintain all required permits and approvals for the discharges from our water and wastewater facilities, and to comply with all conditions of those permits and other regulatory requirements. A program is in place to monitor facilities for compliance with permitting, monitoring and reporting for wastewater discharges. From time to time, discharge violations may occur which may result in fines. These fines and penalties, if any, are not expected to have a material impact on our business, financial condition, or results of operations. We are also parties to agreements with regulatory agencies in several states where we operate while improvements are being made to address wastewater discharge issues.

Solid Waste Disposal - The handling and disposal of waste generated from water and wastewater treatment facilities is governed by federal and state laws and regulations. A program is in place to monitor our facilities for compliance with regulatory requirements, and we are not aware of any significant environmental remediation costs necessary from our handling and disposal of waste material from our water and wastewater operations.

Dam Safety - Our subsidiaries own thirty dams, of which fifteen are classified as high hazard dams that are subject to the requirements of the federal and state regulations related to dam safety, which undergo regular inspections and an annual engineering inspection. After a thorough review and inspection of our dams by professional outside engineering firms, we believe that all fifteen dams are structurally sound and well-maintained, except as described below. These inspections provide recommendations for ongoing rehabilitation which we include in our capital improvement program.

We performed studies of our dams that identified three dams in Pennsylvania and two dams in Ohio requiring capital improvements. These capital improvements result from the adoption by state regulatory agencies of revised formulas for calculating the magnitude of a possible maximum flood event. The most significant capital improvement remaining to be performed in our dam improvement program is on one dam in Pennsylvania at a total estimated cost of $13,300,000. Design for this dam commenced in 2013 and construction is expected to be completed in 2021.

A recent dam inspection in Illinois found cracks on two control gate mechanisms, and as a result, temporary gates were installed to eliminate reliance on the cracked control gates. An inspection of the other control gates was conducted in the fourth quarter of 2017, and it was determined that certain of the dam's control gates could be replaced. Although we are unable to estimate the amount of this planned capital expenditure at this time, the amount may be significant, and we believe such capital investments will be recoverable in ratemaking.

One of our Ohio dams needing capital improvements is no longer used for water supply, and may be sold to a third party. Should that sale not be consummated, we will need to breech the dam or rehabilitate portions of the dam at a cost of up to approximately $2,600,000.

Lead and Copper Rule – The events in Flint, Michigan, which commenced in 2014, and other communities have brought attention to the issue of lead in drinking water from home plumbing. Lead in drinking water can come from lead that leaches from service lines, home plumbing solder, and fixtures or faucets. Since the Lead and Copper Rule in 1992, we have been working to prevent lead leaching from home plumbing sources by reducing water corrosivity and adding chemicals that can prevent leaching of lead in pipes and homes. We also focus on identifying and removing lead service lines and encouraging customers to replace the customer-owned portion of the service line if it is lead as they are

identified during our main replacement program or during other maintenance activities. We are currently developing a lead service line inventory. We support the recommendations of The Lead Service Line Replacement Collaborative, a collaborative of leading water industry organizations that has recommended full replacement of lead service lines as a "best practice" to reduce lead in drinking water, but we only have control over the company-owned portion of each service line. In cases where we are replacing a company-owned lead service line, our standard approach is to replace the company-owned portion and advise and encourage the customer to replace the customer-owned portion of the service line, all the way to the customer's home. We also advise customers of the potential health impacts of lead in drinking water, and conduct lead testing at homes following replacement of a lead service line. We do not plan on replacing customer-owned lead service lines at locations where our portion of the service line does not contain lead, but if we become aware of such situations we will notify the customer. It is anticipated that the EPA will propose updated regulations for the Lead and Copper Rule in 2018.

Partnership for Safe Water Program – Aqua America is a proud participant in the American Water Works Association's (AWWA) Partnership for Safe Water Program. This voluntary program is a commitment to excellence within the drinking water community above and beyond EPA's stringent treatment goals. All of our active surface water treatment plants (within Pennsylvania, Ohio, Illinois, and Virginia) maintain good standing in the program which includes many awards of achievement. The honors include the "Director's Award" (achieved at 5 systems) which recognizes plants that have: 1) completed a comprehensive self-assessment report, 2) created an action plan for continuous improvement, and 3) provided several evaluations of performance demonstrating operational excellence. Several of our systems have met these criteria annually and have received 5, 10, 15, and 20 year subscriber awards. Furthermore, our Roaring Creek Pennsylvania treatment plant has received the Phase IV Excellence Award, the highest honor achieved in the Partnership Program.

Safety Standards - Our facilities and operations may be subject to inspections by representatives of the Occupational Safety and Health Administration from time to time. We maintain safety policies and procedures to comply with the Occupational Safety and Health Administration's rules and regulations, but violations may occur from time to time, which may result in fines and penalties, which are not expected to have a material impact on our business, financial condition, or results of operations. We endeavor to correct such violations promptly when they come to our attention.

*Security*

We maintain security measures at our facilities, and collaborate with federal, state and local authorities and industry trade associations regarding information on possible threats and security measures for water and wastewater utility operations. The costs incurred are expected to be recoverable in water and wastewater rates and are not expected to have a material impact on our business, financial condition, or results of operations.

We also maintain cyber security protection measures with respect to our information technology, including our customer data, and, in some cases, the monitoring and operation of our treatment, storage and pumping facilities.

*Employee Relations*

As of December 31, 2017, we employed a total of 1,530 full-time employees. Our subsidiaries are parties to 15 labor agreements with labor unions covering 527 employees. The labor agreements expire at various times between March 2018 and October 2022.

*Available Information*

We file annual, quarterly, current reports, proxy statements, and other information with the Securities and Exchange Commission ("SEC"). You may read and copy any document we file with the SEC at the SEC's public reference room at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. You may also obtain our SEC filings from the SEC's web site at www.sec.gov.

Our internet web site address is www.aquaamerica.com. We make available free of charge through our web site's *Investor Relations* page all of our filings with the SEC, including our annual report on Form 10-K, quarterly reports on

Form 10-Q, current reports on Form 8-K, and other information. These reports and information are available as soon as reasonably practicable after such material is electronically filed with the SEC.

In addition, you may request a copy of the foregoing filings, at no cost by writing or telephoning us at the following address or telephone number:

Investor Relations Department
Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000

Our Board of Directors has various committees including an audit committee, an executive compensation committee, a corporate governance committee, and a risk mitigation and investment policy committee. Each of these committees has a formal charter. We also have Corporate Governance Guidelines and a Code of Ethical Business Conduct. Copies of these charters, guidelines, and codes can be obtained free of charge from our *Investor Relations* page on our web site, www.aquaamerica.com. In the event we change or waive any portion of the Code of Ethical Business Conduct that applies to any of our directors, executive officers, or senior financial officers, we will post that information on our web site.

The references to our web site and the SEC's web site are intended to be inactive textual references only, and the contents of those web sites are not incorporated by reference herein and should not be considered part of this or any other report that we file with or furnish to the SEC.

## Item 1A. *Risk Factors*

*In addition to the other information included in this Annual Report, the following factors should be considered in evaluating our business and future prospects. Any of the following risks, either alone or taken together, could materially harm our business, financial condition, and results of operations. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, our business, financial condition, and results of operations could be materially harmed.*

***Contamination of our water supply, including water provided to our customers, may result in disruption in our services, additional costs and litigation which could harm our business, financial condition, and results of operations.***

Our water supplies, including water provided to our customers, are subject to possible contamination, including from:

- naturally occurring compounds or man-made substances;
- chemicals and other hazardous materials;
- lead and other materials;
- pharmaceuticals and personal care products; and
- possible deliberate or terrorist attacks.

Depending on the nature of the water contamination, we may have to interrupt the use of that water supply until we are able to substitute, where feasible, the flow of water from an uncontaminated water source, including if practicable, the purchase of water from other suppliers, or continue the water supply under restrictions on use for drinking or broader restrictions against all use except for basic sanitation and essential fire protection. We may incur significant costs, including, but not limited to, costs for water quality testing and monitoring, treatment of the contaminated source through modification of our current treatment facilities or development of new treatment methods, or the purchase of alternative water supplies. In addition, the costs we could incur to decontaminate a water source or our water distribution system and dispose of waste could also be significant. The costs resulting from the contamination may not be recoverable in rates we charge our customer, or may not be recoverable in a timely manner. If we are unable to adequately treat the contaminated water supply or substitute a water supply from an uncontaminated water source in a timely or cost-effective manner, there may be an adverse effect on our business, financial condition, and results of operations. We could also be subject to:

- claims for consequences arising out of human exposure to contamination and/or hazardous substances in our water supplies, including toxic torts;
- claims for other environmental damage;
- claims for customers' business interruption as a result of an interruption in water service;
- claims for breach of contract;
- criminal enforcement actions; or
- other claims.

The events in Flint, Michigan, which commenced in 2014, and other communities have brought attention to the issue of lead in drinking water from home plumbing. Lead in drinking water can come from lead that leaches from service lines, home plumbing solder, and fixtures or faucets. We have been working to prevent lead leaching from home plumbing sources by reducing water corrosivity and adding chemicals that can prevent leaching of lead in pipes and homes. We also focus on identifying and removing lead service lines and encouraging customers to replace the customer-owned portion of the service line if it is lead as they are identified during our main replacement program or during other maintenance activities. We support the recommendations of The Lead Service Line Replacement Collaborative, a collaborative of leading water industry organizations that has recommended full replacement of lead service lines as a "best practice" to reduce lead in drinking water, but we only have control over the company-owned portion of each service line. In cases where we are replacing a company-owned lead service line, our standard approach is to replace the company-owned portion and advise and encourage the customer to replace the customer-owned portion of the service line, all the way to the customer's home. We also advise customers of the potential health impacts of lead in drinking water, and conduct lead testing at homes following replacement of a lead service line. We do not plan on replacing customer-owned lead service lines at locations where our portion of the service line does not contain lead, but if we become aware of such situations we will notify the customer. We anticipate that the EPA will propose updated regulations for the 1992 Lead and Copper Rule in 2018. Any such regulatory changes could have an impact on our business.

We may incur costs to defend our position and/or incur reputational damage even if we are not liable for consequences arising out of human exposure to contamination and/or hazardous substances in our water supplies or other environmental damage. Our insurance policies may not be sufficient to cover the costs of these claims, and losses incurred may make it difficult for us to secure insurance in the future at acceptable rates. Such claims or actions could harm our business, financial condition, and results of operations.

***The rates we charge our customers are subject to regulation. If we are unable to obtain government approval of our requests for rate increases or if approved rate increases are untimely or inadequate to recover and earn a return on our capital investments, to recover expenses or taxes, or to take into account changes in water usage, our profitability may suffer.***

The rates we charge our customers are subject to approval by utility commissions in the states in which we operate. We file rate increase requests, from time to time, to recover our investments in utility plant and expenses. Our ability to maintain and meet our financial objectives is dependent upon the recovery of, and return on, our capital investments and expenses through the rates we charge our customers. Once a rate increase petition is filed with a utility commission, the ensuing administrative and hearing process may be lengthy and costly, and our costs may not always be fully recoverable. The timing of our rate increase requests are therefore partially dependent upon the estimated cost of the administrative process in relation to the investments and expenses that we hope to recover through the rate increase. In addition, the amount or frequency of rate increases may be decreased or lengthened as a result of many factors including changes in regulatory oversight in the states in which we operate water and wastewater utilities and income tax laws, including regulations regarding tax-basis depreciation as it applies to our capital expenditures or qualifying utility asset improvements. We can provide no assurances that any future rate increase request will be approved by the appropriate utility commission; and, if approved, we cannot guarantee that these rate increases will be granted in a timely or sufficient manner.

In Virginia, we may seek authorization to bill our utility customers in accordance with a rate filing that is pending before the respective regulatory commission. Furthermore, some utility commissions authorize the use of expense deferrals and amortization in order to provide for an impact on our operating income by an amount that approximates the requested amount in a rate request. The additional revenue billed and collected prior to the final ruling is subject to refund to customers based on the outcome of the ruling. The revenue recognized and the expenses deferred by us reflect an estimate as to the final outcome of the ruling. If the request is denied completely or in part, we could be required to refund to customers some or all of the revenue billed to date, and write-off some or all of the deferred expenses.

***Our business requires significant capital expenditures that are partially dependent on our ability to secure appropriate funding. Disruptions in the capital markets may limit our access to capital. If we are unable to obtain sufficient capital, or if the cost of borrowing increases, it may harm our business, financial condition, results of operations, and our ability to pay dividends.***

Our business is capital intensive. In addition to the capital required to fund customer growth through our acquisition strategy, on an annual basis, we spend significant sums for additions to or replacement of property, plant and equipment. We obtain funds for our capital expenditures from operations, contributions and advances by developers and others, debt issuances, and equity issuances. We have paid dividends consecutively for 73 years and our Board of Directors recognizes the value that our common shareholders place on both our historical payment record and on our future dividend payments. Our ability to maintain and meet our financial objectives is dependent upon the availability of adequate capital, and we may not be able to access the capital markets on favorable terms or at all. If in the future, our credit facilities are not renewed or our short-term borrowings are called for repayment, we would need to seek alternative financing sources; however, there can be no assurance that these alternative financing sources would be available on terms acceptable to us. In the event we are unable to obtain sufficient capital, we may need to take steps to conserve cash by reducing our capital expenditures or dividend payments and our ability to pursue acquisitions may be limited. The reduction in capital expenditures may result in reduced potential earnings growth, affect our ability to meet environmental laws and regulations, and limit our ability to improve or expand our utility systems to the level we believe appropriate. There is no guarantee that we will be able to obtain sufficient capital in the future on reasonable terms and conditions for expansion, construction and maintenance. In addition, delays in completing major capital projects could delay the recovery of the capital expenditures associated with such projects through rates. If the cost of borrowing increases, we might not be able to recover increases in our cost of capital through rates. The inability to recover higher borrowing costs through rates, or the regulatory lag associated with the time that it takes to begin recovery, may harm our business, financial condition, and results of operations.

***Our inability to comply with debt covenants under our credit facilities could result in prepayment obligations.***

We are obligated to comply with debt covenants under some of our loan and debt agreements. Failure to comply with covenants under our credit facilities could result in an event of default, which if not cured or waived, could result in us being required to repay or finance these borrowings before their due date, limit future borrowings, cause us to default on other obligations, and increase borrowing costs. If we are forced to repay or refinance (on less favorable terms) these borrowings, our business, financial condition, and results of operations could be harmed by reduced access to capital and increased costs and rates.

***One of the important elements of our growth strategy is the acquisition of water and wastewater utility systems. Any future acquisitions we decide to undertake may involve risks. Further, competition for acquisition opportunities from other regulated utilities, governmental entities, and strategic and financial buyers may hinder our ability to grow our business.***

One important element of our growth strategy is the acquisition and integration of water and wastewater utility systems in order to broaden our service areas. We will not be able to acquire other businesses if we cannot identify suitable acquisition opportunities or reach mutually agreeable terms with acquisition candidates. It is our intent, when practical, to integrate any businesses we acquire with our existing operations. The negotiation of potential acquisitions as well as the integration of acquired businesses could require us to incur significant costs and cause diversion of our management's time and resources. Future acquisitions by us could result in:

- dilutive issuances of our equity securities;
- incurrence of debt, contingent liabilities, and environmental liabilities;
- unanticipated capital expenditures;

- failure to maintain effective internal control over financial reporting;
- recording goodwill and other intangible assets for which we may never realize their full value and may result in an asset impairment that may negatively affect our results of operations;
- fluctuations in quarterly results;
- other acquisition related expenses; and
- exposure to unknown or unexpected risks and liabilities.

Some or all of these items could harm our business and our ability to finance our business and to comply with regulatory requirements. The businesses we acquire in the future may not achieve sales and profitability that would justify our investment, and any difficulties we encounter in the integration process, including in the integration of processes necessary for internal control and financial reporting, could interfere with our operations, reduce our operating margins and harm our internal controls.

Some states in which we operate allow the respective public utility commissions to use fair market value to set ratemaking rate base instead of the traditional depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. Depending on the state, there are varying rules and circumstances in which fair value is determined. One state's regulations allows ratemaking rate base to equal the lower of the average of the appraisals or the purchase price, and is subject to regulatory approval. There may be situations where we may pay more than the ultimate fair value of the utility assets as set by the regulatory commission, despite the fair value legislation suggesting its full recovery. In these situations, goodwill may be recognized to the extent there is an excess purchase price over the fair value of net tangible and identifiable intangible assets acquired through acquisition. Our financial condition and results of operations can be harmed by an inability to earn a return on, and recover our purchase price as a component of rate base.

We compete with governmental entities, other regulated utilities, and strategic and financial buyers, for acquisition opportunities. As consolidation becomes more prevalent in the utility industry and competition for acquisitions increases, the prices for suitable acquisition candidates may increase to unacceptable levels and limit our ability to grow through acquisitions. In addition, our competitors may impede our growth by purchasing utilities near our existing operations, thereby preventing us from acquiring them. Governmental entities or environmental / social activist groups have challenged, and may in the future challenge our efforts to acquire new service territories, particularly from municipalities or municipal authorities. Higher purchase prices and resulting rates may limit our ability to invest additional capital for system maintenance and upgrades in an optimal manner. Our growth could be hindered if we are not able to compete effectively for new companies and/or service territories with other companies or strategic and financial buyers that have lower costs of operations or capital, or that submit more attractive bids. Any of these risks may harm our business, financial condition, and results of operations.

***Our facilities could be the target of a possible terrorist or other deliberate attack which could harm our business, financial condition and results of operations.***

In addition to the potential contamination of our water supply as described in a separate risk factor herein, we maintain security measures at our facilities and have heightened employee and public safety official awareness of potential threats to our water systems. We have and will continue to bear increases in costs for security precautions to protect our facilities, operations, and supplies, most of which have been recoverable under state regulatory policies. While the costs of increases in security, including capital expenditures, may be significant, we expect these costs to continue to be recoverable in water and wastewater rates. Despite our security measures, we may not be in a position to control the outcome of terrorist events, or other attacks on our water systems, should they occur. Such an event could harm our business, financial condition, and results of operations.

***The failure of, or the requirement to repair, upgrade or dismantle any of our dams or reservoirs may harm our business, financial condition, and results of operations.***

Several of our water systems include impounding dams and reservoirs of various sizes. Although we believe our dam review program, which includes regular inspections and other engineering studies, will ensure our dams are structurally sound and well-maintained, the failure of a dam could result in significant downstream damage and could result in claims for property damage or for injuries or fatalities. We periodically inspect our dams and purchase liability insurance to cover such risks, but depending on the nature of the downstream damage and cause of the failure, the policy limits of insurance coverage may not be sufficient, and losses incurred may make it difficult for us to secure insurance in the future at acceptable rates. A dam failure could also result in damage to, or disruption of, our water treatment and pumping facilities that are often located downstream from our dams and reservoirs. Significant damage to these facilities, or a significant decline in the storage of the raw water impoundment, could affect our ability to provide water to our customers until the facilities and a sufficient raw water impoundment can be restored. The estimated costs to maintain our dams are included in our capital budget projections and, although such costs to date have been recoverable in rates, there can be no assurance that rate increases will be granted in a timely or sufficient manner to recover such costs in the future, if at all.

***Any failure of our water and wastewater treatment plants, network of water and wastewater pipes, or water reservoirs could result in damages that may harm our business, financial condition, and results of operations.***

Our operating subsidiaries treat water and wastewater, distribute water and collect wastewater through an extensive network of pipes, and store water in reservoirs. A failure of a major treatment plant, pipe, or reservoir could result in claims for injuries or property damage. The failure of a major treatment plant, pipe, or reservoir may also result in the need to shut down some facilities or parts of our network in order to conduct repairs. Such failures and shutdowns may limit our ability to supply water in sufficient quality and quantities to our customers or collect and treat wastewater in accordance with standards prescribed by governmental regulators, including state utility commissions, and may harm our business, financial condition, and results of operations. Any business interruption or other losses might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance in the future at acceptable rates.

***We are increasingly dependent on the continuous and reliable operation of our information technology systems, and a disruption of these systems, resulting from cyber security attacks or other cyber-related events, could harm our business.***

We rely on our information technology systems in connection with the operation of our business, especially with respect to customer service and billing, accounting and, in some cases, the monitoring and operation of our treatment, storage and pumping facilities. In addition, we rely on our systems to track our utility assets and to manage maintenance and construction projects, materials and supplies, and our human resource functions. A loss of these systems, or major problems with the operation of these systems, could harm our business, financial condition, and results of operations. Our information technology systems may be vulnerable to damage or interruption from the following types of cyber security attacks or other cyber-related events:

- power loss, computer systems failures, and internet, telecommunications or data network failures;
- operator negligence or improper operation by, or supervision of, employees;
- physical and electronic loss of data;
- computer viruses, cyber security attacks, intentional security breaches, hacking, denial of service actions, misappropriation of data and similar events;
- difficulties in the implementation of upgrades or modification to our information technology systems; and
- hurricanes, fires, floods, earthquakes and other natural disasters.

Although we do not believe that our systems are at a materially greater risk of cyber security attacks than other similar organizations, our information technology systems may be vulnerable to damage or interruption from the types of cyber security attacks or other events listed above or other similar actions, and such incidents may go undetected for a period of time. Such cyber security attacks or other events may result in:

- the loss or compromise of customer, financial, employee, or operational data;
- disruption of billing, collections or normal field service activities;
- disruption of electronic monitoring and control of operational systems; and
- delays in financial reporting and other normal management functions.

Possible impacts associated with a cyber security attack or other events may include: remediation costs related to lost, stolen, or compromised data; repairs to data processing systems; increased cyber security protection costs; adverse effects

on our compliance with regulatory and environmental laws and regulation, including standards for drinking water; litigation; and reputational damage. We maintain insurance to help defray costs associated with cyber security attacks or other events, but we cannot provide assurance that such insurance will provide coverage for any particular type of incident or event or that such insurance will be adequate, and losses incurred may make it difficult for us to secure insurance in the future at acceptable rates.

***Our business is impacted by weather conditions and is subject to seasonal fluctuations, which could harm demand for our water service and our revenues and earnings.***

Demand for our water during the warmer months is generally greater than during cooler months due primarily to additional requirements for water in connection with irrigation systems, swimming pools, cooling systems, and other outside water use. Throughout the year, and particularly during typically warmer months, demand will vary with temperature, rainfall levels and rainfall frequency. In the event that temperatures during the typically warmer months are cooler than normal, if there is more rainfall than normal, or rainfall is more frequent than normal, the demand for our water may decrease and harm our business, financial condition, and results of operations.

***Decreased residential customer water consumption as a result of water conservation efforts may harm demand for our water service and may reduce our revenues and earnings.***

There has been a general decline in water usage per residential customer as a result of an increase in conservation awareness, and the impact of an increased use of more efficient plumbing fixtures and appliances. These gradual, long-term changes are normally taken into account by the utility commissions in setting rates, whereas short-term changes in water usage, if significant, may not be fully reflected in the rates we charge. We are dependent upon the revenue generated from rates charged to our residential customers for the volume of water used. If we are unable to obtain future rate increases to offset decreased residential customer water consumption to cover our investments, expenses, and return for which we initially sought the rate increase, our business, financial condition, and results of operations may be harmed.

***Drought conditions and government imposed water use restrictions may impact our ability to serve our current and future customers, and may impact our customers' use of our water, which may harm our business, financial condition, and results of operations.***

We depend on an adequate water supply to meet the present and future demands of our customers. Drought conditions could interfere with our sources of water supply and could harm our ability to supply water in sufficient quantities to our existing and future customers. An interruption in our water supply could harm our business, financial condition, and results of operations. Moreover, governmental restrictions on water usage during drought conditions may result in a decreased demand for our water, even if our water supplies are sufficient to serve our customers during these drought conditions, which may harm our business, financial condition, and results of operations.

***We employ a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential and to divest operations where limited customer growth opportunities exist or where we are unable to achieve favorable operating results or a return on equity that we consider acceptable. Dispositions we decide to undertake may involve risks which could harm our business, operating results, and financial condition.***

In the event we determine a division, utility system or business should be sold, we may be unable to reach terms that are agreeable to us or find a suitable buyer. If the business is part of our regulated operations, we may face additional challenges in obtaining regulatory approval for the disposition, and the regulatory approval obtained may include restrictive conditions. We may be required to continue to hold or assume residual liabilities with respect to the business sold. The negotiation of potential dispositions as well as the efforts to divest the acquired business could require us to incur significant costs and cause diversion of our management’s time and resources. Any of these risks may harm our business, financial condition, and results of operations.

***Our operations are geographically concentrated in Pennsylvania, which make us susceptible to risks affecting Pennsylvania.***

Although we operate water and wastewater facilities in a number of states, our operations are concentrated in Pennsylvania. As a result, our financial results are largely subject to political, water supply, labor, utility cost and regulatory risks, economic conditions, natural disasters and other risks affecting Pennsylvania.

***General economic conditions may affect our financial condition and results of operations.***

A general economic downturn may lead to a number of impacts on our business and may affect our financial condition and results of operations. Such impacts may include:

- a reduction in discretionary and recreational water use by our residential water customers, particularly during the summer months when such discretionary usage is normally at its highest;
- a decline in usage by industrial and commercial customers as a result of decreased business activity;
- an increased incidence of customers' inability to pay or delays in paying their utility bills, or an increase in customer bankruptcies, which may lead to higher bad debt expense and reduced cash flow;
- a lower natural customer growth rate due to a decline in new housing starts; and
- a decline in the number of active customers due to housing vacancies.

General economic turmoil may also lead to an investment market downturn, which may result in our pension and other post-retirement plans' asset market values suffering a decline and significant volatility. A decline in our plans' asset market values could increase our required cash contributions to the plans and expense in subsequent years.

***Our water and wastewater systems may be subject to condemnations or other methods of taking by governmental entities.***

In the states where our subsidiaries operate, it is possible that portions of our subsidiaries' operations could be acquired by municipal governments by one or more of the following methods:

- eminent domain;
- the right of purchase given or reserved by a municipality or political subdivision when the original franchise was granted; and
- the right of purchase given or reserved under the law of the state in which the subsidiary was incorporated or from which it received its permit.

The price to be paid upon such an acquisition by the municipal government is usually determined in accordance with applicable law under eminent domain. In other instances, the price may be negotiated, fixed by appraisers selected by the parties or computed in accordance with a formula prescribed in the law of the state or in the particular franchise or charter. We believe that our operating subsidiaries will be entitled to receive fair market value for any assets that are condemned. However, there is no assurance that the fair market value received for assets condemned will be in excess of book value.

In a very few number of instances, in one of our southern states where there are municipally-owned water or wastewater systems near our operating divisions, the municipally-owned system may either have water distribution or wastewater collection mains that are located adjacent to our division's mains or may construct new mains that parallel our mains. In these circumstances, on occasion, the municipally-owned system may attempt to offer service to customers who are connected to our mains, resulting in our mains becoming surplus or underutilized without compensation.

***The final determination of our income tax liability may be materially different from our income tax provision.***

Significant judgment is required in determining our provision for income taxes. Our calculation of the provision for income taxes is subject to our interpretation of applicable business tax laws in the jurisdictions in which we file. In addition, our income tax returns are subject to periodic examination by the Internal Revenue Service and other taxing authorities. In December 2012, Aqua Pennsylvania changed its tax method of accounting to permit the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for tax purposes. Subsequently, the Company's Ohio and North Carolina regulated subsidiaries similarly changed their tax method of accounting. Our determination of what qualifies as a capital cost versus a tax deduction for utility asset improvements is subject to subsequent adjustment and may impact the income tax benefits that have been recognized.

On December 22, 2017, President Trump signed into law legislation referred to as the "Tax Cuts and Jobs Act" (the "TCJA"). Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA makes significant changes to the Internal Revenue Code of 1986, as amended (the "Code"), and the taxation of business entities, and includes specific provisions related to regulated public utilities. Changes in the Code from the TCJA had a material impact on our financial statements in 2017. Significant changes that impact the Company in the TCJA include a reduction in the corporate federal income tax rate from 35% to 21%, and a limitation on the utilization of Net Operating Losses ("NOLs") arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. In addition, specific provisions related to regulated public utilities in the TCJA generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017, and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Since the tax effects of changes in tax law must be recognized in the period in which TCJA was enacted, our deferred income tax assets and liabilities have been remeasured in the period of enactment. This generally results in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. In certain states there is not yet complete guidance as to how to account for the TCJA. With respect to these states, we will account for the changes in income tax balances by making a reasonable estimate. The estimate may differ from the actual tax amount determined once the state regulators provide specific guidance. To the extent such estimates are adjusted or prove to be incorrect, there could be an impact on the Company's financial statements.

Although we believe our income tax estimates, including any tax reserves for uncertain tax positions or valuation allowances on deferred tax assets are appropriate, there is no assurance that the final determination of our income tax liability will not be materially different; either higher or lower, from what is reflected in our income tax provision. In the event we are assessed additional income taxes, our business, financial condition, and results of operations could be harmed.

***Federal and state environmental laws and regulations impose substantial compliance requirements on our operations. Our operating costs could be significantly increased in order to comply with new or stricter regulatory standards imposed by federal and state environmental agencies.***

Our water and wastewater services are governed by various federal and state environmental protection and health and safety laws and regulations, including the federal Safe Drinking Water Act, the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act and similar state laws, and federal and state regulations issued under these laws by the EPA and state environmental regulatory agencies. These laws and regulations establish, among other things, criteria and standards for drinking water and for discharges into the waters of the U.S. as well as dam safety, air emissions, and residuals management. Pursuant to these laws, we are required to obtain various environmental permits from environmental regulatory agencies for our operations. We cannot assure you that we will be at all times in total compliance with these laws, regulations and permits. If we fail to comply with these laws, regulations or permits, we could be fined or otherwise sanctioned by regulators and such noncompliance could result in civil suits. Environmental laws and regulations are complex and change frequently. These laws, and the enforcement thereof, have tended to become more stringent over time. While we have budgeted for future capital and operating expenditures to comply with these laws and our permits, it is possible that new or stricter standards could be imposed that will require additional capital expenditures or raise our operating costs. Although these expenditures and costs may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs. In summary, we cannot assure you that our costs of complying with, current and future environmental and health and safety laws will not harm our business, financial condition, and results of operations.

***Federal and state environmental laws, regulatory initiatives relating to hydraulic fracturing, changes in technology or hydraulic fracturing processes, and volatility in natural gas prices, could result in reduced demand for raw water utilized in hydraulic fracturing and harm our joint venture business, financial condition, or results of operations.***

We have invested in a joint venture for the construction and operation of a private pipeline system to supply raw water to natural gas drilling operations for hydraulic fracturing. Hydraulic fracturing involves the injection under pressure of water, along with other materials such as sand, into rock formations to stimulate natural gas production. In general, the environmental community has taken an interest in monitoring and understanding the potential environmental impact of hydraulic fracturing. Although hydraulic fracturing is currently regulated, in the event the use of hydraulic fracturing is further limited through regulation, our investment in the raw water pipeline may be harmed in the event that demand for raw water is reduced.

Changes in technology or hydraulic fracturing processes may occur which allows drillers to reuse injected water on a limited basis, or apply treatment processes to allow further reuse of water for drilling. These changes may reduce demand for raw water.

Furthermore, natural gas prices have historically been volatile, and are likely to continue to be volatile. A decrease in demand for natural gas, due to price volatility, could result in reduced demand for raw water utilized in hydraulic fracturing. In the fourth quarter of 2015, the joint venture recognized an impairment charge on its long-lived assets, which reduced the carrying value of our investment in the joint venture. The impairment resulted from a marked decline in natural gas prices in 2015, a further reduction in the volume of water sales by the joint venture, which led to a lowered forecast on future sales volumes, as well as changes in the natural gas industry activities in the Marcellus Shale region and general market conditions. In the event hydraulic fracturing is limited, due to a further reduction in demand for natural gas or other factors affecting the industry, our investment in the raw water pipeline may be harmed should the demand for raw water be reduced.

***Wastewater operations entail significant risks and may impose significant costs.***

Wastewater collection and treatment and septage pumping and sludge hauling involve various unique risks. If collection or treatment systems fail or do not operate properly, or if there is a spill, untreated or partially treated wastewater could discharge onto property or into nearby streams and rivers, causing various damages and injuries, including environmental damage. These risks are most acute during periods of substantial rainfall or flooding, which are the main causes of wastewater overflow and system failure. Liabilities resulting from such damages and injuries could harm our business, financial condition, and results of operations.

***Work stoppages and other labor relations matters could harm our operating results.***

Approximately 34% of our workforce is unionized under 15 labor contracts with labor unions, which expire over several years. In light of rising costs for healthcare and retirement benefits, contract negotiations in the future may be difficult. We are subject to a risk of work stoppages and other labor actions as we negotiate with the unions to address these issues, which could harm our business, financial condition, and results of operations. We cannot assure you that issues with our labor forces will be resolved favorably to us in the future or that we will not experience work stoppages.

***Significant or prolonged disruptions in the supply of important goods or services from third parties could harm our business, financial condition, and results of operations.***

We are dependent on a continuing flow of important goods and services from suppliers for our water and wastewater businesses. A disruption or prolonged delays in obtaining important supplies or services, such as maintenance services, purchased water, chemicals, water pipe, valves, hydrants, electricity, or other materials, could harm our water or wastewater services and our ability to operate in compliance with all regulatory requirements, which could harm our business, financial condition, and results of operations. In some circumstances, we rely on third parties to provide important services (such as customer bill print and mail activities or utility service operations in some of our divisions) and a disruption in these services could harm our business, financial condition, and results of operations. Some possible reasons for a delay or disruption in the supply of important goods and services include:

- our suppliers may not provide materials that meet our specifications in sufficient quantities;
- our suppliers may provide us with water that does not meet applicable quality standards or is contaminated;
- our suppliers may face production delays due to natural disasters, strikes, lock-outs, or other such actions;
- one or more suppliers could make strategic changes in the lines of products and services they offer; and
- some of our suppliers, such as small companies, may be more likely to experience financial and operational difficulties than larger, well-established companies, because of their limited financial and other resources.

As a result of any of these factors, we may be required to find alternative suppliers for the materials and services on which we rely. Accordingly, we may experience delays in obtaining appropriate materials and services on a timely basis and in sufficient quantities from such alternative suppliers at a reasonable price, which could interrupt services to our customers and harm our business, financial condition, and results of operations.

**We depend significantly on the services of the members of our management team, and the departure of any of those persons could cause our operating results to suffer.**

Our success depends significantly on the continued individual and collective contributions of our management team. The loss of the services of any member of our management team or the inability to hire and retain experienced management personnel could harm our business, financial condition, and results of operations.

***Climate change laws and regulations have been passed and are being proposed that require compliance with greenhouse gas emissions standards, as well as other climate change initiatives, which could impact our business, financial condition or results of operations.***

Climate change is receiving ever increasing attention worldwide. Many scientists, legislators, and others attribute global warming to increased levels of greenhouse gases ("GHG"), including carbon dioxide. Climate change laws and regulations enacted and proposed limit GHG emissions from covered entities, and require additional monitoring/reporting. At this time, the existing GHG laws and regulations are not expected to materially harm the Company's operations or capital expenditures. While the trend of increased regulation on climate change could change in light of the current federal administration's agenda, the uncertainty of future climate change regulatory requirements still remains. We cannot predict the potential impact of future laws and regulations on our business, financial condition, or results of operations. Although these future expenditures and costs for regulatory compliance may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs.

***Some scientific experts are predicting a worsening of weather volatility in the future, possibly created by the climate change greenhouse gases. Changing severe weather patterns could require additional expenditures to reduce the risk associated with any increasing storm, flood and drought occurrences.***

The issue of climate change is receiving ever increasing attention worldwide. Many climate change predictions, if true, present several potential challenges to water and wastewater utilities, such as: increased frequency and duration of droughts, increased precipitation and flooding, potential degradation of water quality, and changes in demand for services. We maintain an ongoing facility planning process, and this planning or the enactment of new standards may result in the need for additional capital expenditures or raise our operating costs. Because of the uncertainty of weather volatility related to climate change, we cannot predict its potential impact on our business, financial condition, or results of operations. Although any potential expenditures and costs may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs. We cannot assure you that our costs of complying with any climate change weather related measures will not harm our business, financial condition, or results of operations.

Item 1B *Unresolved Staff Comments*

None

Item 2. *Properties*

Our properties consist of water transmission and distribution mains and wastewater collection pipelines, water and wastewater treatment plants, pumping facilities, wells, tanks, meters, pipes, dams, reservoirs, buildings, vehicles, land, easements, rights-of-way, and other facilities and equipment used for the operation of our systems, including the collection, treatment, storage, and distribution of water and the collection and treatment of wastewater. Substantially all of our treatment, storage, and distribution properties are owned by our subsidiaries, and a substantial portion of our property is subject to liens of mortgage or indentures. These liens secure bonds, notes and other evidences of long-term indebtedness of our subsidiaries. For some properties that we acquired through the exercise of the power of eminent domain and other properties we purchased, we hold title for water supply purposes only. We own, operate and maintain over 12,800 miles of transmission and distribution mains, 21 surface water treatment plants, many well treatment stations, and 187 wastewater treatment plants. A small portion of the properties are leased under long-term leases.

The following table indicates our net property, plant and equipment, in thousands of dollars, as of December 31, 2017 in the principal states where we operate:

| | Net Property, Plant and Equipment | |
|---|---|---|
| Pennsylvania | $ 3,433,582 | 63.6% |
| Ohio | 457,238 | 8.5% |
| Illinois | 395,136 | 7.3% |
| North Carolina | 343,556 | 6.4% |
| Texas | 299,872 | 5.6% |
| Other (1) | 470,476 | 8.6% |
| Consolidated | $ 5,399,860 | 100.0% |

(1) Consists primarily of our operating subsidiaries in the following states: New Jersey, Indiana, and Virginia.

We believe that our properties are generally maintained in good condition and in accordance with current standards of good water and wastewater industry practice. We believe that our facilities are adequate and suitable for the conduct of our business and to meet customer requirements under normal circumstances.

Our corporate offices are leased from our subsidiary, Aqua Pennsylvania, and are located in Bryn Mawr, Pennsylvania.

Item 3. *Legal Proceedings*

There are various legal proceedings in which we are involved. Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our properties is the subject that we believe are material or are expected to materially harm our business, operating results or financial condition.

Item 4. *Mine Safety Disclosures*

Not applicable.

PART II

Item 5. *Market for the Registrant's Common Stock, Related Stockholder Matters and Purchases of Equity Securities*

Our common stock is traded on the New York Stock Exchange under the ticker symbol WTR. As of February 13, 2018, there were approximately 23,683 holders of record of our common stock.

Table of Contents

The following table shows the high and low intraday sales prices for our common stock as reported on the New York Stock Exchange composite transactions reporting system and the cash dividends paid per share for the periods indicated:

| | First Quarter | Second Quarter | Third Quarter | Fourth Quarter | Year |
|---|---|---|---|---|---|
| 2017 | | | | | |
| Dividend paid per common share | $ 0.1913 | $ 0.1913 | $ 0.2047 | $ 0.2047 | $ 0.7920 |
| Dividend declared per common share | 0.1913 | 0.1913 | 0.2047 | 0.2047 | 0.7920 |
| Price range of common stock: | | | | | |
| high | 32.32 | 34.41 | 34.66 | 39.55 | 39.55 |
| low | 29.41 | 31.18 | 32.30 | 33.12 | 29.41 |
| 2016 | | | | | |
| Dividend paid per common share | $ 0.178 | $ 0.178 | $ 0.1913 | $ 0.1913 | $ 0.7386 |
| Dividend declared per common share | 0.178 | 0.178 | 0.1913 | 0.1913 | 0.7386 |
| Price range of common stock: | | | | | |
| high | 32.44 | 35.66 | 35.83 | 31.29 | 35.83 |
| low | 28.35 | 30.31 | 29.53 | 28.03 | 28.03 |

We have paid dividends consecutively for 73 years. On August 1, 2017, our Board of Directors authorized an increase of 7.0% in the September 1, 2017 quarterly dividend over the dividend Aqua America paid in the previous quarter. As a result of this authorization, beginning with the dividend payment in September 2017, the annualized dividend rate increased to $0.8188 per share. This is the 27th dividend increase in the past 26 years and the 19th consecutive year that we have increased our dividend in excess of five percent. We presently intend to pay quarterly cash dividends in the future, on March 1, June 1, September 1, and December 1, subject to our earnings and financial condition, restrictions set forth in our debt instruments, regulatory requirements and such other factors as our Board of Directors may deem relevant. In 2017, our dividends paid represented 58.7% of net income.

Information with respect to restrictions set forth in our debt instruments is disclosed in Note 10 – *Long-term Debt and Loans Payable* in the *Notes to Consolidated Financial Statements* which is contained in Item 8 of this Annual Report.

The following table summarizes the Company's purchases of its common stock for the quarter ending December 31, 2017:

Issuer Purchases of Equity Securities

| Period | Total Number of Shares Purchased (1) | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs |
|---|---|---|---|---|
| October 1-31, 2017 | - | $ - | - | - |
| November 1-30, 2017 | - | $ - | - | - |
| December 1-31, 2017 | 1,335 | $ 37.80 | - | - |
| Total | 1,335 | $ 37.80 | - | - |

(1) These amounts include 1,355 shares we acquired from our employees who elected to pay the exercise price of their stock options (and then hold shares of the stock), upon exercise, by delivering to us shares of our common stock in accordance with the terms of our equity compensation plan that was previously approved by our shareholders and disclosed in our proxy statements. This feature of our equity compensation plan is available to all employees who receive stock-based compensation under the plan. We purchased these shares at their fair market value, as determined by reference to the closing price of our common stock on the day prior to the option exercise.

| Common shares outstanding (000) | 177,714 | 177,394 | 176,544 | 176,753 | 176,751 |
| Employees (full-time) (2) | 1,530 | 1,551 | 1,617 | 1,617 | 1,542 |

(1) 2015 results includes Aqua America's share of a joint venture impairment charge of $21,433 ($32,975 pre-tax)
(2) Reflects continuing operations
(3) Debt issuance costs for the years ended December 31, 2017, 2016, 2015, 2014, and 2013 were $21,605, $22,357, $23,165, $23,509, and $24,387, respectively

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

## OVERVIEW

The following discussion and analysis of our financial condition and results of operations should be read together with our Consolidated Financial Statements and related Notes included in this Annual Report. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about our business, operations and financial performance. All dollar amounts are in thousands of dollars, except per share amounts.

**The Company**

Aqua America, Inc., (referred to as "Aqua America", the "Company", "we", "us", or "our"), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and sewer line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within the Company's market-based subsidiary, Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016 we completed the sale of business units within Aqua Resources, which were reported as assets held for sale in the Company's consolidated balance sheets, which provided liquid waste hauling and disposal services, and inspection, and cleaning and repair of storm and sanitary wastewater lines.

**Industry Mission**

The mission of the regulated water utility industry is to provide quality and reliable water service at reasonable rates to customers, while earning a fair return for shareholders. A number of challenges face the industry, including:

- strict environmental, health and safety standards;
- aging utility infrastructure and the need for substantial capital investment;
- economic regulation by state, and/or, in some cases, local government;
- declining consumption per customer as a result of conservation;
- lawsuits and the need for insurance; and
- the impact of weather and sporadic drought conditions on water sales demand.

**Economic Regulation**

Most of our water and wastewater utility operations are subject to regulation by their respective state utility commissions, which have broad administrative power and authority to regulate billing rates, determine franchise areas and conditions of service, approve acquisitions, and authorize the issuance of securities. The utility commissions also generally establish uniform systems of accounts and approve the terms of contracts with affiliates and customers, business combinations with other utility systems, and loans and other financings. The policies of the utility commissions often differ from state to state, and may change over time. A small number of our operations are subject to rate regulation by county or city government. Over time, the regulatory party in a particular state may change, as was the case for our Texas operations where, in 2014, economic regulation changed from the Texas Commission on Environmental Quality to the Public Utility Commission of Texas. The profitability of our utility operations is influenced to a great extent by the timeliness and adequacy of rate allowances in the various states in which we operate. One consideration we may undertake in evaluating which states to focus our growth and investment strategy is whether a state provides for consolidated rates, a surcharge for replacing and rehabilitating infrastructure and other systems, and other regulatory policies that promote infrastructure investment and efficiency in processing rate cases.

***Rate Case Management Capability –*** We strive to achieve the industry's mission by effective planning, efficient investments, and productive use of our resources. We maintain a rate case management capability to pursue timely and adequate returns on the capital investments that we make in improving our distribution system, treatment plants, information technology systems, and other infrastructure. This capital investment creates assets that are used and useful in providing utility service, and is commonly referred to as rate base. Timely and adequate rate relief is important to our continued profitability and in providing a fair return to our shareholders; thus, providing access to capital markets to help fund these investments. Accordingly, the objective of our rate case management strategy is to provide that the rates of our utility operations reflect, to the extent practicable, the timely recovery of increases in costs of operations (primarily labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claims costs, and costs to comply with environmental regulations), capital, and taxes. In pursuing our rate case strategy, we consider the amount of net utility plant additions and replacements made since the previous rate decision, the changes in the cost of capital, changes in our capital structure, and changes in operating and other costs. Based on these assessments, our utility operations periodically file rate increase requests with their respective state utility commissions or local regulatory authorities. In general, as a regulated enterprise, our water and wastewater rates are established to provide full recovery of utility operating costs, taxes, interest on debt used to finance capital investments, and a return on equity used to finance capital investments. Our ability to recover our expenses in a timely manner and earn a return on equity employed in the business helps determine the profitability of the Company. As of December 31, 2017, the Company's rate base is estimated to be $4,125,000, which is comprised of:

- $2,874,000 filed with respective state utility commissions or local regulatory authorities; and
- $1,251,000 not yet filed with respective state utility commissions or local regulatory authorities.

Our water and wastewater operations are composed of 53 rate divisions, each of which requires a separate rate filing for the evaluation of the cost of service and recovery of investments in connection with the establishment of tariff rates for that rate division. When feasible and beneficial to our utility customers, we have sought approval from the applicable state utility commission to consolidate rate divisions to achieve a more even distribution of costs over a larger customer base. All of the eight states in which we operate currently permit us to file a revenue requirement using some form of consolidated rates for some or all of the rate divisions in that state.

***Revenue Surcharges –*** Six states in which we operate water utilities, and five states in which we operate wastewater utilities, permit us to add a surcharge to their respective bills to offset the additional depreciation and capital costs associated with capital expenditures related to replacing and rehabilitating infrastructure systems. In all other states, water and wastewater utilities absorb all of the depreciation and capital costs of these projects between base rate increases without the benefit of additional revenues. The gap between the time that a capital project is completed and the recovery of its costs in rates is known as regulatory lag. This surcharge is intended to substantially reduce regulatory lag, which often acts as a disincentive to water and wastewater utilities to rehabilitate their infrastructure. In addition, some states permit our subsidiaries to use a surcharge or credit on their bills to reflect allowable changes in costs, such as changes in state tax rates, other taxes and purchased water costs, until such time as the new costs are fully incorporated in base rates.

***Effects of Inflation –*** Recovery of the effects of inflation through higher water and wastewater rates is dependent upon receiving adequate and timely rate increases. However, rate increases are not retroactive and often lag increases in costs caused by inflation. On occasion, our regulated utility companies may enter into rate settlement agreements, which require us to wait for a period of time to file the next base rate increase request. These agreements may result in regulatory lag whereby inflationary increases in expenses may not yet be reflected in rates, or a gap may exist between when a capital project is completed and the start of its recovery in rates. Even during periods of moderate inflation, the effects of inflation can have a negative impact on our operating results.

**Growth-Through-Acquisition Strategy**

Part of our strategy to meet the industry challenges is to actively explore opportunities to expand our utility operations through acquisitions of water and wastewater utilities either in areas adjacent to our existing service areas or in new service areas, and to explore acquiring market-based businesses that are complementary to our regulated water and wastewater operations. To complement our growth strategy, we routinely evaluate the operating performance of our individual utility systems, and in instances where limited economic growth opportunities exist or where we are unable to achieve favorable operating results or a return on equity that we consider acceptable, we will seek to sell the utility system and reinvest the proceeds in other utility systems. Consistent with this strategy, we are focusing our acquisitions and resources in states where we have critical mass of operations in an effort to achieve economies of scale and increased efficiency. Our growth-through-acquisition strategy allows us to operate more efficiently by sharing operating expenses over more utility customers and provides new locations for future earnings growth through capital investment. Another element of our growth strategy is the consideration of opportunities to expand by acquiring other utilities, including those that may be in a new state if they provide promising economic growth opportunities and a return on equity that we consider acceptable. The ability to successfully execute this strategy and meet the industry challenges is largely due to our core competencies, financial position, and our qualified and trained workforce, which we strive to retain by treating employees fairly and providing our employees with development and growth opportunities.

During 2017, we completed four acquisitions, which along with the organic growth in our existing systems, represents 10,584 new customers. During 2016, we completed 19 acquisitions, which along with the organic growth in our existing systems, represents 15,282 new customers. During 2015, we completed 16 acquisitions, which along with the organic growth in our existing systems, represents 17,747 new customers.

We believe that utility acquisitions, organic growth, and a potential expansion of our market-based business will continue to be the primary sources of growth for us. With approximately 53,000 community water systems in the U.S., 82% of which serve less than 3,300 customers, the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water, and wastewater). In the states where we operate regulated utilities, we believe there are approximately 14,500 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems.

Although not as fragmented as the water industry, the wastewater industry in the U.S. also presents opportunities for consolidation. According to the U.S. Environmental Protection Agency's ("EPA") most recent survey of wastewater treatment facilities (which includes both government-owned facilities and regulated utility systems) in 2012, there are approximately 15,000 such facilities in the nation serving approximately 76% of the U.S. population. The remaining population represents individual homeowners with their own treatment facilities; for example, community on-lot disposal systems and septic tank systems. The vast majority of wastewater facilities are government-owned rather than regulated utilities. The EPA survey also indicated that there are approximately 4,000 wastewater facilities in operation in the states where we operate regulated utilities.

Because of the fragmented nature of the water and wastewater utility industries, we believe that there are many potential water and wastewater system acquisition candidates throughout the United States. We believe the factors driving the consolidation of these systems are:

- the benefits of economies of scale;
- the increasing cost and complexity of environmental regulations;
- the need for substantial capital investment;
- the need for technological and managerial expertise;
- the desire to improve water quality and service;
- limited access to cost-effective financing;
- the monetizing of public assets to support, in some cases, the declining financial condition of municipalities; and
- the use of system sale proceeds by a municipality to accomplish other public purposes.

We are actively exploring opportunities to expand our water and wastewater utility operations through regulated utility acquisitions or otherwise, including the management of publicly-owned facilities in a public-private partnership. We intend to continue to pursue acquisitions of government-owned and regulated water and wastewater utility systems that provide services in areas near our existing service territories or in new service areas. It is our intention to focus on growth opportunities in states where we have critical mass, which allows us to improve economies of scale through spreading our fixed costs over more customers – this cost efficiency should enable us to reduce the size of future rate increases. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, by acquiring businesses that provide water and wastewater or other utility-related services, and investing in infrastructure projects.

**Sendout**

Sendout represents the quantity of treated water delivered to our distribution systems. We use sendout as an indicator of customer demand. Weather conditions tend to impact water consumption, particularly during the late spring, summer, and early fall when discretionary and recreational use of water is at its highest. Consequently, a higher proportion of annual operating revenues are realized in the second and third quarters. In general, during this period, an extended period of hot and dry weather increases water consumption, while above-average rainfall and cool weather decreases water consumption. Conservation efforts, construction codes that require the use of low-flow plumbing fixtures, as well as mandated water use restrictions in response to drought conditions can reduce water consumption. We believe an increase in conservation awareness by our customers, including the increased use of more efficient plumbing fixtures and appliances, may continue to result in a long-term structural trend of declining water usage per customer. These gradual long-term changes are normally taken into account by the utility commissions in setting rates, whereas significant short-term changes in water usage, resulting from drought warnings, water use restrictions, or extreme weather conditions, may not be fully reflected in the rates we charge between rate proceedings.

On occasion, drought warnings and water use restrictions are issued by governmental authorities for portions of our service territories in response to extended periods of dry weather conditions, regardless of our ability to meet unrestricted customer water demands. The timing and duration of the warnings and restrictions can have an impact on our water revenues and net income. In general, water consumption in the summer months is affected by drought warnings and restrictions to a higher degree because discretionary and recreational use of water is highest during the summer months, particularly in our northern service territories. At other times of the year, warnings and restrictions generally have less of an effect on water consumption. Currently, portions of our northern and central Texas service areas have conservation water restrictions. Drought warnings and watches result in the public being asked to voluntarily reduce water consumption.

The geographic diversity of our utility customer base reduces the effect of our exposure to extreme or unusual weather conditions in any one area of the country. During the year ended December 31, 2017, our operating revenues were derived principally from the following states: approximately 52% in Pennsylvania, 13% in Ohio, 9% in Texas, 8% in Illinois, and 7% in North Carolina.

**Performance Measures Considered by Management**

We consider the following financial measures (and the period to period changes in these financial measures) to be the fundamental basis by which we evaluate our operating results:

- earnings per share;
- operating revenues;
- income from continuing operations;
- earnings before interest, taxes, and depreciation (“EBITD”);
- earnings before income taxes as compared to our operating budget;
- net income; and
- the dividend rate on common stock.

In addition, we consider other key measures in evaluating our utility business performance within our Regulated segment:

- our number of utility customers;
- the ratio of operations and maintenance expense compared to operating revenues (this percentage is termed “operating expense ratio”);
- return on revenues (income from continuing operations divided by operating revenues);
- rate base growth;
- return on equity (net income divided by stockholders’ equity); and
- the ratio of capital expenditures to depreciation expense.

Furthermore, we review the measure of earnings before unusual items that are noncash and not directly related to our core business, such as the measure of adjusted earnings to remove the joint venture impairment charge, which was recognized in 2015. Refer to Note 1 – *Summary of Significant Accounting Policies – Investment in Joint Venture* in this Annual Report for information regarding the impairment charge. We review these measurements regularly and compare them to historical periods, to our operating budget as approved by our Board of Directors, and to other publicly-traded water utilities.

Our operating expense ratio is one measure that we use to evaluate our operating efficiency and management effectiveness of our regulated operations. Our operating expense ratio is affected by a number of factors, including the following:

- ***Regulatory lag*** **–** Our rate filings are designed to provide for the recovery of increases in costs of operations (primarily labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claim costs, and costs to comply with environmental regulations), capital, and taxes. The revenue portion of the operating expense ratio can be impacted by the timeliness of recovery of, and the return on capital investments. The operating expense ratio is further influenced by regulatory lag (increases in operations and maintenance expenses not yet recovered in rates or a gap between the time that a capital project is completed and the start of its cost recovery in rates). The operating expense ratio is also influenced by decreases in operating revenues without a commensurate decrease in operations and maintenance expense, such as changes in customer water consumption as impacted by adverse weather conditions, conservation trends, or as a result of utility rates incorporating the effects of income tax benefits derived from deducting qualifying utility asset improvements for tax purposes that are capitalized for book purposes in Aqua Pennsylvania and consequently forgoing operating revenue increases. During periods of inflation, our operations and maintenance expenses may increase, impacting the operating expense ratio, as a result of regulatory lag, since our rate cases may not be filed timely and are not retroactive.

- ***Acquisitions*** **–** In general, acquisitions of smaller undercapitalized utility systems in some areas may initially increase our operating expense ratio if the operating revenues generated by these operations are accompanied by a higher ratio of operations and maintenance expenses as compared to other operational areas of the company that are more densely populated and have integrated operations. In these cases, the acquired operations are characterized as having relatively higher operating costs to fixed capital costs, in contrast to the majority of our operations, which generally consist of larger, interconnected systems, with higher fixed capital costs (utility plant investment) and lower operating costs per customer. In addition, we operate market-based subsidiary companies, Aqua Resources and Aqua Infrastructure. The cost-structure of these market-based companies differs from our utility companies in that, although they may generate free cash flow, these companies have a higher ratio of operations and maintenance expenses to operating revenues and a lower capital investment and, consequently, a lower ratio of fixed capital costs versus operating revenues in contrast to our regulated operations. As a result, the operating expense ratio is not comparable between the businesses. These market-based subsidiary companies are not a component of our Regulated segment.

We continue to evaluate initiatives to help control operating costs and improve efficiencies.

## Consolidated Selected Financial and Operating Statistics

Our selected five-year consolidated financial and operating statistics follow:

| Years ended December 31, | 2017 | 2016 | 2015 | 2014 | 2013 |
|---|---|---|---|---|---|
| Utility customers: | | | | | |
| Residential water | 807,872 | 801,190 | 791,404 | 779,665 | 771,660 |
| Commercial water | 40,956 | 40,582 | 40,151 | 39,614 | 39,237 |
| Industrial water | 1,338 | 1,349 | 1,353 | 1,357 | 1,368 |
| Other water | 19,430 | 19,036 | 17,420 | 17,412 | 17,230 |
| Wastewater | 113,253 | 110,108 | 107,538 | 102,071 | 98,705 |
| Total utility customers | 982,849 | 972,265 | 957,866 | 940,119 | 928,200 |
| Operating revenues: | | | | | |
| Residential water | $ 483,865 | $ 484,901 | $ 477,773 | $ 460,013 | $ 457,404 |
| Commercial water | 130,373 | 131,170 | 126,677 | 122,795 | 121,178 |
| Industrial water | 27,880 | 27,916 | 28,021 | 27,369 | 25,263 |
| Other water | 65,324 | 62,983 | 56,997 | 59,474 | 57,446 |
| Wastewater | 87,560 | 82,780 | 79,399 | 76,472 | 73,062 |
| Other utility | 9,903 | 10,357 | 10,746 | 9,934 | 10,174 |
| Regulated segment total | 804,905 | 800,107 | 779,613 | 756,057 | 744,527 |
| Other and eliminations | 4,620 | 19,768 | 34,591 | 23,846 | 17,366 |
| Consolidated operating revenues | $ 809,525 | $ 819,875 | $ 814,204 | $ 779,903 | $ 761,893 |
| Operations and maintenance expense | $ 287,206 | $ 304,897 | $ 309,310 | $ 288,556 | $ 283,561 |
| Joint venture impairment charge (1) | $ - | $ - | $ 21,433 | $ - | $ - |
| Income from continuing operations | $ 239,738 | $ 234,182 | $ 201,790 | $ 213,884 | $ 202,871 |
| Net income | $ 239,738 | $ 234,182 | $ 201,790 | $ 233,239 | $ 221,300 |
| Capital expenditures | $ 478,089 | $ 382,996 | $ 364,689 | $ 328,605 | $ 307,908 |
| **Operating Statistics** | | | | | |
| Selected operating results as a percentage of operating revenues: | | | | | |
| Operations and maintenance | 35.5% | 37.2% | 38.0% | 37.0% | 37.2% |
| Depreciation and amortization | 16.9% | 16.2% | 15.8% | 16.2% | 16.3% |
| Taxes other than income taxes | 7.0% | 6.9% | 6.8% | 6.5% | 6.9% |
| Interest expense, net | 10.9% | 9.8% | 9.4% | 9.8% | 10.1% |
| Income from continuing operations | 29.6% | 28.6% | 24.8% | 27.4% | 26.6% |
| Return on Aqua America stockholders' equity | 12.2% | 12.7% | 11.7% | 14.1% | 14.4% |
| Ratio of capital expenditures to depreciation expense | 3.5 | 2.9 | 2.9 | 2.7 | 2.6 |
| Effective tax rate | 6.6% | 8.2% | 6.9% | 10.5% | 9.5% |

(1) Represents a $21,433 ($32,975 pre-tax) joint venture impairment charge. This amount represents our share of the impairment charge recognized by our joint venture that operates a private pipeline to supply raw water to firms with natural gas well drilling operations.

## RESULTS OF OPERATIONS

Our income from continuing operations has grown at an annual compound rate of approximately 5.7% and our net income has grown at an annual compound rate of approximately 4.1% during the five-year period ended December 31, 2017. During the past five years, operating revenues grew at a compound rate of 1.5% and operating expenses grew at a compound rate of 2.1%.

**Operating Segments**

We have identified ten operating segments and we have one reportable segment based on the following:

- Eight segments are composed of our water and wastewater regulated utility operations in the eight states where we provide these services. These operating segments are aggregated into one reportable segment since each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution and/or wastewater collection methods, and the nature of the regulatory environment. Our single reportable segment is named the Regulated segment.

- Two segments are not quantitatively significant to be reportable and are composed of Aqua Resources and Aqua Infrastructure. These segments are included as a component of "Other," in addition to corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

The following table provides the Regulated segment and consolidated information for the years ended December 31, 2017, 2016, and 2015:

| | 2017 | | | 2016 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other and Eliminations | Consolidated | Regulated | Other and Eliminations | Consolidated |
| Operating revenues | $ 804,905 | $ 4,620 | $ 809,525 | $ 800,107 | $ 19,768 | $ 819,875 |
| Operations and maintenance expense | 286,962 | 244 | 287,206 | 285,347 | 19,550 | 304,897 |
| Taxes other than income taxes | 54,524 | 2,104 | 56,628 | 53,916 | 2,469 | 56,385 |
| Earnings (loss) before interest, taxes, depreciation and amortization | $ 463,419 | $ 2,272 | 465,691 | $ 460,844 | $ (2,251) | 458,593 |
| Depreciation and amortization | | | 136,724 | | | 133,008 |
| Operating income | | | 328,967 | | | 325,585 |
| Other expense (income): | | | | | | |
| Interest expense, net | | | 88,341 | | | 80,594 |
| Allowance for funds used during construction | | | (15,211) | | | (8,815) |
| Gain on sale of other assets | | | (484) | | | (378) |
| Equity income in joint venture | | | (331) | | | (976) |
| Provision for income taxes | | | 16,914 | | | 20,978 |
| Net income | | | $ 239,738 | | | $ 234,182 |

| | 2015 | | |
|---|---|---|---|
| | Regulated | Other and Eliminations | Consolidated |
| Operating revenues | $ 779,613 | $ 34,591 | $ 814,204 |
| Operations and maintenance expense | 282,866 | 26,444 | 309,310 |
| Taxes other than income taxes | 52,361 | 2,696 | 55,057 |
| Earnings before interest, taxes, depreciation and amortization | $ 444,386 | $ 5,451 | 449,837 |
| Depreciation and amortization | | | 128,737 |
| Operating income | | | 321,100 |
| Other expense (income): | | | |
| Interest expense, net | | | 76,536 |
| Allowance for funds used during construction | | | (6,219) |
| Gain on sale of other assets | | | (468) |
| Gain on extinguishment of debt | | | (678) |
| Equity loss in joint venture | | | 35,177 |
| Provision for income taxes | | | 14,962 |
| Net income | | | $ 201,790 |

**Consolidated Results**

***Operating Revenues –*** Operating revenues totaled $809,525 in 2017, $819,875 in 2016, and $814,204 in 2015. Our Regulated segment's revenues totaled $804,905 in 2017, $800,107 in 2016, and $779,613 in 2015. The growth in our Regulated segment's revenues over the past three years is a result of increases in our water and wastewater rates and our customer base. Rate increases implemented during the past three years have provided additional operating revenues of $6,143 in 2017, $4,319 in 2016, and $8,503 in 2015. Negatively impacting revenues in 2017 was a decrease in customer water consumption primarily due to unfavorable weather conditions during the year. The number of customers increased at an annual compound rate of 1.4% over the past three years due to acquisitions and organic growth, adjusted to exclude customers associated with utility system dispositions. Acquisitions in our Regulated segment have provided additional water and wastewater revenues of $1,695 in 2017, $8,201 in 2016, and $8,900, in 2015.

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its last rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that historically had been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change which provides for the flow-through of income tax benefits that resulted in a substantial reduction in income tax expense and greater net income and cash flow. As a result, Aqua Pennsylvania was able to suspend its water Distribution System Improvement Charges from January 1, 2013 to September 30, 2017, when it resumed the use of a water Distribution System Improvement Charge on October 1, 2017. Aqua Pennsylvania was able to lengthen the amount of time until its next base rate case, which is expected to be filed in 2018. During 2017, 2016, and 2015, the income tax accounting change resulted in income tax benefits of $84,766, $78,530, and $72,944 that reduced the Company's current income tax expense and increased net income. The Company recognized a tax deduction on its 2012 Federal tax return of $380,000 for qualifying capital expenditures made prior to 2012. Based on the settlement agreement, beginning in 2013, the Company began to amortize 1/10th of these expenditures, or $38,000 annually, which reduced income tax expense and increased the Company's net income by $16,734, which is included in the income tax benefits noted previously. In accordance with the settlement agreement, this amortization is expected to reduce income tax expense during periods when qualifying parameters are met.

Our operating subsidiaries received rate increases representing estimated annualized revenues of $7,558 in 2017 resulting from five base rate decisions, $3,434 in 2016 resulting from six rate decisions, and $3,347 in 2015 resulting from four rate decisions. Revenues from these increases realized in the year of grant were $6,343 in 2017, $1,788 in 2016, and $2,887 in 2015. As of December 31, 2017, our operating subsidiaries have filed two rate requests, which are being reviewed by the state utility commissions, proposing an aggregate increase of $13,888 in annual revenues. During 2018, we intend to file five additional rate requests proposing an aggregate of approximately $80,000 of increased annual revenues; the timing and extent to which our rate increase requests may be granted will vary by state. Our planned rate filings for 2018 are subject to the issuance of procedural orders directing how the Federal tax law changes are to be reflected in our utility customer rates.

Currently, Pennsylvania, Illinois, Ohio, Indiana, New Jersey, and North Carolina allow for the use of a surcharge for replacing and rehabilitating infrastructure systems. The rate increases under this surcharge typically adjust periodically based on additional qualified capital expenditures completed or anticipated in a future period. This surcharge is capped as a percentage of base rates, generally at 5% to 12.75% of base rates, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. These surcharges provided revenues of $10,255 in 2017, $7,379 in 2016, and $3,261 in 2015.

Our Regulated segment also includes operating revenues of $9,903 in 2017, $10,357 in 2016, and $10,746 in 2015 associated with contract operations that are integrated into the regulated utility business and operations. These amounts vary over time according to the level of activity associated with the utility contract operations.

In addition to the Regulated segment operating revenues, we recognized market-based revenues that are associated with Aqua Resources and Aqua Infrastructure of $4,798 in 2017, $20,091 in 2016, and $34,909 in 2015. The decrease in revenues in 2017 and 2016 is due to the disposition of business units within Aqua Resources.

***Operations and Maintenance Expenses –*** Operations and maintenance expenses totaled $287,206 in 2017, $304,897 in 2016, and $309,310 in 2015. Most elements of operating costs are subject to the effects of inflation and changes in the number of customers served. Several elements are subject to the effects of changes in water consumption, weather, and the degree of water treatment required due to variations in the quality of the raw water. The principal elements of operating costs are labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claims costs, and costs to comply with environmental regulations. Electricity and chemical expenses vary in relationship to water consumption, raw water quality, and price changes. Maintenance expenses are sensitive to extremely cold weather, which can cause water mains to rupture, resulting in additional costs to repair the affected main.

Operations and maintenance expenses decreased in 2017, as compared to 2016, by $17,691 or 5.8%, primarily due to:

- decreases in market-based activities expenses of $15,933 due to the disposition of business units within Aqua Resources;
- a decrease in water production costs of $6,301 primarily due to a reduction in purchased water expense of $4,794 due to replacing a purchased water supply with the Company's own water supply source;
- a decrease in the Company's self-insured employee medical benefit program expense of $4,838;
- offset by $4,102 for the timing of expenses incurred for the maintenance of our utility systems and the purchase of supplies, as well as other increases in operations and maintenance expenses.

Operations and maintenance expenses decreased in 2016 as compared to 2015 by $4,413 or 1.4%, primarily due to:

- decreases in market-based activities expenses of $10,393 due to the disposition of business units within Aqua Resources;
- a decrease in water production costs of $3,156;
- the effects of the recognition in 2015 of:
  - leadership transition expenses of $2,510,
  - the recording of a reserve of $1,862 for water rights held for future use, and
  - the recording of a legal contingency reserve of $1,580;
- the reversal of a reserve for a legal contingency of $1,580;
- offset by an increase in postretirement benefits of $5,554; and
- additional operating costs associated with acquisitions of $4,538, as well as other increases in operations and maintenance expenses.

***Depreciation and Amortization Expenses –*** Depreciation expense was $136,302 in 2017, $130,987 in 2016, and $125,290 in 2015, and has increased principally as a result of the significant capital expenditures made to expand and improve our utility facilities, and our acquisitions of new utility systems.

Amortization expense was $422 in 2017, $2,021 in 2016, and $3,447 in 2015, and has decreased primarily due to the completion of the recovery of our costs associated with various rate filings. Expenses associated with filing rate cases are deferred and amortized over periods that generally range from one to three years.

***Taxes Other than Income Taxes –*** Taxes other than income taxes totaled $56,628 in 2017, $56,385 in 2016, and $55,057 in 2015. The increase in 2017 was primarily due to an increase in gross receipts, excise and franchise taxes of $949, and an increase in taxes assessed resulting from the pumping of ground water in Texas of $486 due to higher water production volume and rates, offset by a $978 decrease in property taxes primarily due to a favorable ruling on a property tax appeal in Ohio. The increase in 2016 was primarily due to an increase of $578 for pumping fees in Texas due to higher water production, a rate increase, and the addition of two water systems, and an increase in gross receipts, excise and franchise taxes of $502.

***Interest Expense, net –*** Net interest expense was $88,341 in 2017, $80,594 in 2016, and $76,536 in 2015. Interest income of $202 in 2017, $217 in 2016, and $272 in 2015 was netted against interest expense. Net interest expense increased in 2017 due to an increase in average borrowings of $157,768 and an increase in short-term and long-term interest rates. Net interest expense increased in 2016 due to an increase in average short-term borrowings of $9,808 at higher short-term interest rates and an increase in average outstanding fixed rate long-term debt of $98,006 partially offset by a decline in long-term interest rates. Interest income decreased in 2017 due to lower investment rates. The weighted average cost of fixed rate long-term debt was 4.35% at December 31, 2017, 4.26% at December 31, 2016, and 4.57% at December 31, 2015. The weighted average cost of fixed and variable rate long-term debt was 4.29% at December 31, 2017, 4.23% at December 31, 2016, and 4.44% at December 31, 2015.

***Allowance for Funds Used During Construction –*** The allowance for funds used during construction ("AFUDC") was $15,211 in 2017, $8,815 in 2016, and $6,219 in 2015, and varies as a result of changes in the average balance of utility plant construction work in progress, to which AFUDC is applied, changes in the AFUDC rate which is based predominantly on short-term interest rates, changes in the balance of short-debt, and changes in the amount of AFUDC related to equity. The increase in 2017 and 2016 is primarily due to an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity and in 2017 and 2016, and an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied. The amount of AFUDC related to equity was $11,633 in 2017, $6,561 in 2016, and $4,621 in 2015.

***Gain on Sale of Other Assets –*** Gain on sale of other assets totaled $484 in 2017, $378 in 2016, and $468 in 2015, and consists of the sales of property, plant and equipment and marketable securities.

***Gain on Extinguishment of Debt –*** The gain on extinguishment of debt of $678 in 2015 results from the recognition of the unamortized issuance premium for the early redemption of $95,985 of tax-exempt bonds at 5.00% that were originally maturing between 2035 and 2038.

***Equity (Earnings) Loss in Joint Venture –*** Equity (earnings) loss in joint venture totaled $(331) in 2017, $(976) in 2016, and $35,177 in 2015. The equity earnings in 2017 primarily resulted from the sale of raw water to firms in the natural gas drilling industry. The equity earnings in 2016 resulted from the recognition of a connection fee earned by the joint venture in 2016 for which our share was $1,831 and a reduction in depreciation expense resulting from the noncash impairment charge recognized by the joint venture on its long-lived assets in 2015. In 2015, a noncash impairment charge was recognized by the joint venture on its long-lived assets for which our share was $32,975. The impairment charge was recognized in 2015 as a result of a determination that the long-lived assets, primarily consisting of a pipeline and pump station, had become impaired due to a marked decline in natural gas prices in 2015, a distinguishable reduction in the volume of water sales by the joint venture which led to a lowered forecast in 2015 on future water sales volumes by the joint venture, as well as changes in the natural gas industry and market conditions. At the time of the impairment, these market conditions were largely associated with natural gas prices, which sharply declined in 2015 and this downturn no longer appeared to be temporary and instead was expected to be a long-term condition.

***Income Taxes*** – Our effective income tax rate was 6.6% in 2017, 8.2% in 2016, and 6.9% in 2015. The effective income tax rate for 2017, 2016, and 2015 was affected by the 2012 income tax accounting change for qualifying utility asset improvements at Aqua Pennsylvania which resulted in a $84,766, $78,530, and $72,944 net reduction to the Company's 2017, 2016, and 2015 Federal and state income tax expense, respectively. As of December 31, 2017, the Company has an unrecognized tax benefit related to the Company's change in its tax accounting method for qualifying utility asset improvement costs, of which up to $24,243 of these tax benefits would further reduce the Company's effective income tax rate in the event the Company does sustain all, or a portion, of its tax position in the period this information is determined. Offsetting this reduction was the effect of the revaluation of our deferred income tax assets and liabilities, triggered by the TCJA, which resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates.

***Summary –***

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Operating income | $ 328,967 | $ 325,585 | $ 321,100 |
| Net income | 239,738 | 234,182 | 201,790 |
| Diluted net income per share | 1.35 | 1.32 | 1.14 |

The changes in diluted net income per share in 2017 and 2016 over the previous years were due to the aforementioned changes.

Although we have experienced increased income in the recent past, continued adequate rate increases reflecting increased operating costs and new capital investments, are important to the future realization of improved profitability.

***Fourth Quarter Results –*** The following table provides our fourth quarter results:

| | Three Months Ended December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Operating revenues | $ 203,312 | $ 196,799 |
| Operations and maintenance | 79,243 | 77,550 |
| Depreciation | 34,794 | 33,342 |
| Amortization | 64 | 654 |
| Taxes other than income taxes | 12,238 | 13,291 |
| | 126,339 | 124,837 |
| Operating income | 76,973 | 71,962 |
| Other expense (income): | | |
| Interest expense, net | 23,217 | 20,458 |
| Allowance for funds used during construction | (4,641) | (2,369) |
| (Gain) loss on sale of other assets | (162) | 12 |
| Equity loss in joint venture | 71 | 167 |
| Income before income taxes | 58,488 | 53,694 |
| Provision for income taxes | 5,015 | 4,045 |
| Net income | $ 53,473 | $ 49,649 |

The increase in operating revenues of $6,513 was primarily due to an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $4,247, an increase in customer water consumption, and additional revenues of $438 associated with a larger customer base due to utility acquisitions, offset by a decrease in market-based activities revenue of $2,323 due to dispositions.

The increase in operations and maintenance expense of $1,693 is due primarily to $3,490 associated with the timing of expenses incurred for the maintenance of our utility systems and the purchase of supplies, an increase in postretirement benefits expense of $1,249, offset by a decrease in market-based activities expenses of $2,952, and a decrease in water production costs of $1,842 due to replacing a purchased water supply with the Company’s own water supply source.

Depreciation expense increased by $1,452 primarily due to the utility plant placed in service since December 31, 2016.

The decrease in other taxes of $1,053 is primarily due to a decrease in property taxes of $1,466 due to a favorable property tax appeal in Ohio, offset by an increase in capital stock taxes of $199 due to the effect of a reversal of a reserve from the prior year, and an increase in taxes assessed resulting from the pumping of ground water in Texas of $166 due to higher water production volume and rates.

Interest expense increased by $2,759 due to an increase in the average outstanding debt balance.

AFUDC increased by $2,272 due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

The provision for income taxes increased by $970 primarily as a result of the revaluation of our deferred income tax assets and liabilities, triggered by the TCJA, which resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates, offset by the effect of additional tax deductions recognized in the fourth quarter of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

## LIQUIDITY AND CAPITAL RESOURCES

**Consolidated Cash Flow and Capital Expenditures**

Net operating cash flows from continuing operations, dividends paid on common stock, capital expenditures used in continuing operations, including allowances for funds used during construction, and expenditures for acquiring water and wastewater systems for our continuing operations for the five years ended December 31, 2017 were as follows:

| | Net Operating Cash Flows | Dividends | Capital Expenditures | Acquisitions |
|---|---|---|---|---|
| 2013 | $ 365,803 | $ 102,889 | $ 307,908 | $ 14,997 |
| 2014 | 364,888 | 112,106 | 328,605 | 14,616 |
| 2015 | 370,794 | 121,248 | 364,689 | 28,989 |
| 2016 | 396,163 | 130,923 | 382,996 | 9,423 |
| 2017 | 381,318 | 140,660 | 478,089 | 5,860 |
| | $ 1,878,966 | $ 607,826 | $ 1,862,287 | $ 73,885 |

Included in capital expenditures for the five-year period are: expenditures for the rehabilitation of existing water and wastewater systems, the expansion of our water and wastewater systems, modernization and replacement of existing treatment facilities, water meters, office facilities, information technology, vehicles, and equipment. During this five-year period, we received $31,657 of customer advances and contributions in aid of construction to finance new water mains and related facilities that are not included in the capital expenditures presented in the above table. In addition, during this period, we have made repayments of debt of $978,762, and have refunded $22,607 of customers' advances for construction. Dividends increased during the past five years as a result of annual increases in the dividends declared and paid and increases in the number of shares outstanding.

Our planned 2018 capital program, exclusive of the costs of new mains financed by advances and contributions in aid of construction, is estimated to be approximately $500,000 in infrastructure improvements for the communities we serve. The 2018 capital program is expected to include $213,200 for infrastructure rehabilitation surcharge qualified projects. On January 1, 2013, Aqua Pennsylvania reset its water infrastructure rehabilitation surcharge to zero resulting from the change in its tax method of accounting for qualifying utility asset improvements as described below. Although we were not eligible to use an infrastructure rehabilitation surcharge with our Aqua Pennsylvania water customers from January 1, 2013 to September 30, 2017, we were able to use the income tax savings derived from the qualifying utility asset improvements to maintain Aqua Pennsylvania's capital investment program. Our planned 2018 capital program in Pennsylvania is estimated to be approximately $337,000, a portion of which is expected to be eligible as a deduction for qualifying utility asset improvements for Federal income tax purposes. Our overall 2018 capital program, along with $113,769 of debt repayments and $160,973 of other contractual cash obligations, as reported in the section captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations – *Contractual Obligations*", has been, or is expected to be, financed through internally-generated funds, our revolving credit facilities, and the issuance of long-term debt.

Future utility construction in the period 2019 through 2020, including recurring programs, such as the ongoing replacement or rehabilitation of water meters and water mains, water treatment plant upgrades, storage facility renovations, and additional transmission mains to meet customer demands, exclusive of the costs of new mains financed by advances and contributions in aid of construction, is estimated to require aggregate expenditures of approximately $875,000. We anticipate that approximately one-half of these expenditures will require external financing. We expect to refinance $189,025 of long-term debt during this period as they become due with new issues of long-term debt, internally-generated funds, and our revolving credit facilities. The estimates discussed above do not include any amounts for possible future acquisitions of water and wastewater systems or the financing necessary to support them.

Our primary sources of liquidity are cash flows from operations (including the allowed deferral of Federal income tax payments), borrowings under various short-term lines of credit and other credit facilities, and customer advances and contributions in aid of construction. Our cash flow from operations, or internally-generated funds, is impacted by the timing of rate relief, water consumption, and changes in Federal tax laws with respect to the reduction in the corporate income tax rate, and accelerated tax depreciation or deductions for utility construction projects. We fund our capital and typical acquisitions through internally-generated funds, supplemented by short-term lines of credit. Over time, we partially repay or pay-down our short-term lines of credit with long-term debt. The ability to finance our future construction programs, as well as our acquisition activities, depends on our ability to attract the necessary external financing and maintain internally-generated funds. Timely rate orders permitting compensatory rates of return on invested capital will be required by our operating subsidiaries to achieve an adequate level of earnings and cash flow to enable them to secure the capital they will need to operate and to maintain satisfactory debt coverage ratios.

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that have historically been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change, which resulted in a substantial reduction in income tax expense and greater net income and cash flow, and as a result allowed Aqua Pennsylvania to suspend its water Distribution System Improvement Charges from January 1, 2013 to September 30, 2017, and lengthen the amount of time until the next Aqua Pennsylvania rate case, which is expected to be filed in 2018. As a result of the Pennsylvania rate order, income tax benefits reduced the Company's current income tax expense and increased net income by $84,766 in 2017, $78,530 in 2016, and $72,944 in 2015. The Company recognized a tax deduction on its 2012 Federal tax return of $380,000 for qualifying capital expenditures made prior to 2012, and based on the settlement agreement, beginning in 2013, the Company began to amortize 1/10$^{th}$ of these expenditures or $38,000 annually, which reduced income tax expense and increased the Company's net income by $16,734. In accordance with the settlement agreement, this amortization is expected to reduce income tax expense during periods when qualifying parameters are met.

**Acquisitions**
As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of six municipalities for a total combined purchase price in cash of $150,700. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur by the end of 2018, which is subject to the timing of the regulatory approval process. These acquisitions are expected to add approximately 16,325 customers in two of the states in which the Company operates.

During the past five years, we have expended cash of $73,885 and issued 439,943 shares of common stock, valued at $12,845 at the time of acquisition, related to the acquisition of utility systems, both water and wastewater utilities, as well as investments in supplying raw water to the natural gas drilling industry.

In 2017, we completed four acquisitions of water and wastewater utility systems for $5,860 in cash in two of the states in which we operate, adding 1,003 customers.

In January 2016, we acquired the water and wastewater utility system assets of Superior Water Company, Inc., which provided public water service to 4,108 customers in portions of Berks, Chester, and Montgomery counties in

Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. Additionally, during 2016, we completed 18 acquisitions of water and wastewater utility systems for $5,518 in cash in eight of the states in which we operate, adding 2,469 customers.

In April 2015, we acquired the water and wastewater utility system assets of North Maine Utilities, located in the Village of Glenview, Illinois serving 7,409 customers. The total purchase price consisted of $23,079 in cash. Additionally, during 2015, we completed 14 acquisitions of water and wastewater utility systems for $5,210 in cash in six of the states in which we operate, adding 3,170 customers.

During 2014, we completed 16 acquisitions of water and wastewater utility systems for $10,530 in cash in seven of the states in which we operate, adding 6,148 customers. Further, in 2014, we acquired two market-based businesses that specialized in inspecting, cleaning and repairing storm and sanitary sewer lines, as well as providing water distribution system services and training to waterworks operators. The total purchase price in aggregate was $4,810 and both these businesses were subsequently sold in November 2016 and January 2017.

During 2013, we completed 15 acquisitions of water and wastewater utility systems for $14,997 in cash in four of the states in which we operate, adding 5,991 customers.

We continue to pursue the acquisition of water and wastewater utility systems, and explore other utility acquisitions that may be in a new state. Our typical acquisitions are expected to be financed with short-term debt with subsequent repayment from the proceeds of long-term debt, retained earnings, or equity issuances.

**Joint Venture**

In September 2011, one of our subsidiaries entered into a joint venture with a firm that operates natural gas pipelines and processing plants for the construction and operation of a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north-central Pennsylvania (the "Joint Venture"). We own 49% of the Joint Venture. The 56 mile pipeline construction and permitted intake on the Susquehanna River cost $109,000. As of December 31, 2017, our capital contributions since inception totaled $53,643 in cash. This investment has been financed through the issuance of long-term debt. Our 49% investment in the Joint Venture is an unconsolidated affiliate and is accounted for under the equity method of accounting. Our initial investment is carried at cost. Subsequently, the carrying amount of our investment is adjusted to reflect capital contributions or distributions, our equity in earnings and losses since the commencement of the system's operations, and a decline in the fair value of our investment. In 2015, an impairment charge was recognized by the joint venture on its long-lived assets, of which the Company's share totaled $32,975 ($21,433 after-tax), representing our share of the noncash impairment charge as further described in Note 1 – *Summary of Significant Accounting Policies – Investment in Joint Venture* in this Annual Report.

**Dispositions**

We routinely review and evaluate areas of our business and operating divisions and, over time, may sell utility systems or portions of systems. In 2017, the Company sold two business units within Aqua Resources, which resulted in total proceeds of $867, and recognized a net loss of $324. In 2016, the Company sold two business units within Aqua Resources, which resulted in total proceeds of $4,459, and recognized a net loss of $543.

In December 2014, we completed the sale of our water utility system in southwest Allen County Indiana to the City of Fort Wayne, Indiana for $67,011, which is comprised of $50,100 in addition to $16,911 the city initially paid the Company towards its water and wastewater system assets in the northern part of Fort Wayne in 2008. We recognized a gain on sale of $29,210 ($17,611 after-tax) in the fourth quarter of 2014. In addition, as a result of this transaction, Aqua Indiana expanded its sewer customer base by accepting new wastewater flows from the City. Additionally, in March, 2014, we completed the sale of our wastewater treatment facility in Georgia.

In 2013, in accordance with our strategy to focus our resources on states where we have critical mass to improve our economies of scale and expect future economic growth, we sold water and wastewater systems in Florida, through five separate sales transactions. The Company received total net proceeds from these sales of $88,934, and recognized a gain on sale of $21,178 ($13,766 after-tax).

Additionally, in June 2013, the Company sold a water and wastewater utility system in Texas for net proceeds of $3,400. The sale resulted in the recognition of a gain on sale of these assets, net of expenses, of $1,025 ($615 after-tax).

Despite these transactions, one of our primary strategies continues to be to acquire additional utility systems, to maintain our existing systems where there is a strategic business benefit, and to actively oppose unilateral efforts by municipal governments to acquire any of our operations.

**Sources of Capital**

Since net operating cash flow plus advances and contributions in aid of construction have not been sufficient to fully fund cash requirements, we issued $1,670,223 of long-term debt and obtained other short-term borrowings during the past five years. At December 31, 2017, we have a $250,000 long-term revolving credit facility that expires in February 2021, of which $19,811 was designated for letter of credit usage, $170,189 was available for borrowing, and $60,000 of borrowings were outstanding at December 31, 2017. In addition, we have short-term lines of credit of $135,500, of which $131,850 was available as of December 31, 2017. These short-term lines of credit are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

Our consolidated balance sheet historically has had a negative working capital position, whereby routinely our current liabilities exceed our current assets. Management believes that internally-generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

Our loan and debt agreements require us to comply with certain financial covenants, which among other things, subject to specific exceptions, limit the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2017, we were in compliance with our debt covenants under our credit facilities. Failure to comply with our debt covenants could result in an event of default, which could result in us being required to repay or refinance our borrowings before their due date, possibly limiting our future borrowings, and increasing our borrowing costs.

The Company has a universal shelf registration statement, which was filed with the SEC in February 2015, which allows for the potential future offer and sale by us, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities, and other securities specified therein at indeterminate prices. The Company's Board of Directors has authorized the Company to issue up to $500,000 of our common stock, preferred stock, debt securities, and other securities specified therein under this universal shelf registration statement. The Company has not issued any securities to date under this universal shelf registration statement. This registration statement expires in February 2018, and we intend to file a new three-year universal shelf registration statement.

In addition, we have a shelf registration statement, which was filed with the SEC on February 27, 2015, to permit the offering from time to time of an aggregate of $500,000 of our common stock and shares of preferred stock in connection with acquisitions. During 2016, we issued 439,943 shares of common stock totaling $12,845 to acquire a water system. The balance remaining available for use under the acquisition shelf registration as of December 31, 2017 is $487,155.

We will determine the form and terms of any securities issued under the universal shelf registration statement and the acquisition shelf registration statement at the time of issuance.

We offer a Dividend Reinvestment and Direct Stock Purchase Plan (the "Plan") that provides a convenient and economical way to purchase shares of the Company. Under the direct stock purchase portion of the Plan, shares are issued throughout the year. The dividend reinvestment portion of the Plan offers a five percent discount on the purchase of shares of common stock with reinvested dividends. As of the December 2017 dividend payment, holders of 9.9% of the common shares outstanding participated in the dividend reinvestment portion of the Plan. The shares issued under the Plan are either original issue shares or shares purchased by the Company's transfer agent in the open-market. During the past five years, we have sold 551,788 original issue shares of common stock for net proceeds of $13,625 through the dividend reinvestment portion of the Plan, and we used the proceeds to invest in our operating subsidiaries, to repay short-term debt, and for general corporate purposes. In 2017, 2016, and 2015, 447,753, 484,645, and 535,439 shares of

common stock were purchased under the dividend reinvestment portion of the Plan by the Company's transfer agent in the open-market for $15,168, $14,916, and $14,380, respectively.

The Company's Board of Directors has authorized us to repurchase our common stock, from time to time, in the open market or through privately negotiated transactions. In 2014, we repurchased 560,000 shares of our common stock in the open market for $13,280. In December 2014, the Company's Board of Directors authorized a share buyback program of up to 1,000,000 shares to minimize share dilution through timely and orderly share repurchases. In December 2015, the Company's Board of Directors added 400,000 shares to this program. In 2015, we repurchased 805,000 shares of our common stock in the open market for $20,502. In 2016, we did not repurchase any shares of our common stock in the open market under this program. This program expired on December 31, 2016.

**Off-Balance Sheet Financing Arrangements**

We do not engage in any off-balance sheet financing arrangements. We do not have any interest in entities referred to as variable interest entities, which includes special purpose entities and other structured finance entities.

Table of Contents

**Contractual Obligations**

The following table summarizes our contractual cash obligations as of December 31, 2017:

| | | Payments Due By Period | | | |
|---|---|---|---|---|---|
| | Total | Less than 1 year | 1 - 3 years | 3 - 5 years | More than 5 years |
| Long-term debt | $ 2,143,127 | $ 113,769 | $ 189,025 | $ 121,966 | $ 1,718,367 |
| Interest on fixed-rate, long-term debt (1) | 1,366,407 | 77,497 | 148,277 | 131,248 | 1,009,385 |
| Operating leases (2) | 20,080 | 1,919 | 2,957 | 2,148 | 13,056 |
| Unconditional purchase obligations (3) | 31,510 | 4,853 | 8,989 | 8,024 | 9,644 |
| Other purchase obligations (4) | 63,064 | 63,064 | - | - | - |
| Pension plan obligation (5) | 12,484 | 12,484 | - | - | - |
| Other obligations (6) | 11,932 | 1,156 | 2,035 | 2,118 | 6,623 |
| Total | $ 3,648,604 | $ 274,742 | $ 351,283 | $ 265,504 | $ 2,757,075 |

(1) Represents interest payable on fixed rate, long-term debt. Amounts reported may differ from actual due to future refinancing of debt.

(2) Represents operating leases that are noncancelable, before expiration, for the lease of motor vehicles, buildings, land and other equipment.

(3) Represents our commitment to purchase minimum quantities of water as stipulated in agreements with other water purveyors. We use purchased water to supplement our water supply, particularly during periods of peak customer demand. Our actual purchases may exceed the minimum required levels.

(4) Represents an approximation of the open purchase orders for goods and services purchased in the ordinary course of business.

(5) Represents contributions to be made to pension plan.

(6) Represents expenditures estimated to be required under legal and binding contractual obligations.

In addition to these obligations, we pay refunds on customers' advances for construction over a specific period of time based on operating revenues related to developer-installed water mains or as new customers are connected to and take service from such mains. After all refunds are paid, any remaining balance is transferred to contributions in aid of construction. The refund amounts are not included in the above table because the refund amounts and timing are dependent upon several variables, including new customer connections, customer consumption levels and future rate increases, which cannot be accurately estimated. Portions of these refund amounts are payable annually through 2027 and amounts not paid by the contract expiration dates become non-refundable.

In addition to the obligations disclosed in the contractual obligations table above, we have uncertain tax positions of $17,583. Although we believe our tax positions comply with applicable law, we have made judgments as to the sustainability of each uncertain tax position based on its technical merits. Due to the uncertainty of future cash outflows, if any, associated with our uncertain tax positions, we are unable to make a reasonable estimate of the timing or amounts that may be paid. See Note 7 – *Income Taxes* in this Annual Report for further information on our uncertain tax positions.

We will fund these contractual obligations with cash flows from operations and liquidity sources held by or available to us.

The Company is routinely involved in legal matters, including both asserted and unasserted legal claims, during the ordinary course of business. See Note 9 – *Commitments and Contingencies* in this Annual Report for a discussion of the Company's legal matters. It is not always possible for management to make a meaningful estimate of the potential loss or range of loss associated with such litigation. Also, unanticipated changes in circumstances and/or revisions to the assessed probability of the outcomes of legal matters could result in expenses being incurred in future periods as well as an increase in actual cash required to resolve the legal matter.

**Capitalization**

The following table summarizes our capitalization during the past five years:

| December 31, | 2017 | 2016 | 2015 | 2014 | 2013 |
|---|---|---|---|---|---|
| Long-term debt (1) | 52.3% | 50.8% | 50.8% | 49.4% | 50.3% |
| Aqua America stockholders' equity | 47.7% | 49.2% | 49.2% | 50.6% | 49.7% |
| | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |

(1) Includes current portion, as well as our borrowings under a variable rate revolving credit agreement of $60,000 at December 31, 2017, $25,000 at December 31, 2016, $60,000 at December 31, 2015, $72,000 at December 31, 2014, and $0 at December 31, 2013.

Over the past five years, the changes in the capitalization ratios primarily resulted from the issuance of debt to finance our acquisitions and capital program, growth in net income, the issuance of common stock, and the declaration of dividends.

## INCOME TAX MATTERS

**Tax Cuts and Jobs Act of 2017**

On December 22, 2017, President Trump signed the TCJA into law. Substantially all of the provisions of the TCJA are effective for tax years beginning after December 31, 2017, except as noted below. The TCJA includes significant changes to the Code and the taxation of business entities, and includes specific provisions related to regulated public utilities. Significant changes include a reduction in the corporate federal income tax rate from 35% to 21%, and a limitation on the utilization of NOLs arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. The specific provisions related to regulated public utilities in the TCJA generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017 and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Our market-based companies still qualify for 100% deductibility of qualifying property acquired after September 27, 2017.

The Company's regulated operations accounting for income taxes are impacted by the FASB's accounting guidance for regulated operations. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rates to 21% under the provisions of the TCJA results in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes are to be passed back to customers for certain accelerated tax depreciation benefits. Potential refunds of other deferred taxes will be determined by our state regulators. Our state regulatory commissions have or are in the process of issuing procedural orders directing how the tax law changes are to be reflected in our utility customer rates. In addition, we have two rate cases currently in progress in two states in which TCJA is expected to be addressed in the new base rates. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities, which reduced our regulatory assets by $357,262 and increased our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

As of December 31, 2017, resulting from the TCJA enactment, our deferred income tax assets and liabilities were revalued based upon the new corporate income tax rate of 21%. The revaluation of our deferred income tax assets and liabilities resulted in the recognition of additional income tax expense of $3,141 to the extent revalued deferred income taxes are not believed to be recoverable in utility customer rates.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our financial condition and results of operations are impacted by the methods, assumptions, and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to our financial condition or results of operations, and require estimates or other judgments of matters of uncertainty. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the financial statements. We believe our most critical accounting policies include revenue recognition, the use of regulatory assets and liabilities, the valuation of our long-lived assets (which consist primarily of utility plant in service, regulatory assets, and goodwill) our accounting for post-retirement benefits, and our accounting for income taxes. We have discussed the selection and development of our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

***Revenue Recognition*** — Our utility revenues recognized in an accounting period include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the last billing to the end of the accounting period. The estimated usage is based on our judgment and assumptions; our actual results could differ from these estimates, which would result in operating revenues being adjusted in the period that the revision to our estimates is determined.
In Virginia, we commence the billing of our utility customers, under new rates, upon authorization from the respective utility commission and before the final commission rate order is issued. The revenue recognized reflects an estimate based on our judgment of the final outcome of the commission's ruling. We monitor the applicable facts and circumstances regularly, and revise the estimate as required. The revenue billed and collected prior to the final ruling is subject to refund based on the commission's final ruling.

***Regulatory Assets and Liabilities*** — We defer costs and credits on the balance sheet as regulatory assets and liabilities when it is probable that these costs and credits will be recognized in the rate-making process in a period different from when the costs and credits were incurred. These deferred amounts, both assets and liabilities, are then recognized in the income statement in the same period that they are reflected in our rates charged for water or wastewater service. In the event that our assessment as to the probability of the inclusion in the rate-making process is incorrect, the associated regulatory asset or liability would be adjusted to reflect the change in our assessment or change in regulatory approval.

***Valuation of Long-Lived Assets, Goodwill and Intangible Assets*** — We review our long-lived assets for impairment, including utility plant in service and investment in joint venture. We also review regulatory assets for the continued application of the Financial Accounting Standards Board's ("FASB") accounting guidance for regulated operations. Our review determines whether there have been changes in circumstances or events, such as regulatory disallowances, or abandonments, that have occurred that require adjustments to the carrying value of these assets. Adjustments to the carrying value of these assets would be made in instances where their inclusion in the rate-making process is unlikely. For utility plant in service, we would recognize an impairment loss for any amount disallowed by the respective utility commission. For our equity method investment in joint venture, the Company evaluates whether it has experienced a decline in the value of its investment that is other than temporary in nature. We would recognize an impairment loss if the fair value of our investment is less than the carrying amount of the investment, and the decline in value is considered other than temporary. Additionally, the Company would recognize its share of an impairment loss if the joint venture determines that the carrying amount of the joint venture's assets exceeds the sum of the joint venture's undiscounted estimated cash flows.

Our long-lived assets, which consist primarily of utility plant in service, regulatory assets and investment in joint venture, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, we determine whether it is more likely than not that the fair value of those assets is less than their carrying amount. If we determine that it is more likely than not (that is, the likelihood of more than 50 percent), we would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, we would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. This assessment requires significant management judgment and estimates that are

based on budgets, general strategic business plans, historical trends and other data and relevant factors. These estimates include significant inherent uncertainties, since they involve forecasting future events. If changes in circumstances or events occur, or estimates and assumptions that were used in this review are changed, we may be required to record an impairment charge on our long-lived assets.

We have an investment in a joint venture, for which we own 49%, and use the equity method of accounting to account for this joint venture. The joint venture operates a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north central Pennsylvania. In the fourth quarter of 2015, the joint venture recognized an impairment charge on its long-lived assets, of which the Company's share totaled $32,975 ($21,433 after-tax), representing our share of the noncash impairment charge. Refer to Note 1 – *Summary of Significant Accounting Policies – Property, Plant and Equipment and Depreciation*, and *Investment in Joint Venture* in this Annual Report for additional information regarding the review of long-lived assets for impairment. See also *Consolidated Results – Equity (Earnings) Loss in Joint Venture* above in this Annual Report.

We test the goodwill attributable for each of our reporting units for impairment at least annually on July 31, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Alternatively, based on our assessment of the qualitative factors previously noted, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit based on a discounted cash flow analysis. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The assessment requires significant management judgment and estimates that are based on budgets, general strategic business plans, historical trends and other data and relevant factors. If changes in circumstances or events occur, or estimates and assumptions that were used in our impairment test change, we may be required to record an impairment charge for goodwill. Refer to Note 1 – *Summary of Significant Accounting Policies – Goodwill* in this Annual Report for information regarding the results of our annual impairment test.

***Accounting for Post-Retirement Benefits*** ─ We maintain a qualified and a non-qualified defined benefit pension plan and plans that provide for post-retirement benefits other than pensions. Accounting for pension and other post-retirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by our employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from our actuarial consultant, who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefits expense that we recognize.

Our discount rate assumption, which is used to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds, all of which were noncallable (or callable with make-whole provisions), and have at least $50,000 in outstanding value. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the projected benefit payments of the plans. A decrease in the discount rate would increase our post-retirement benefits expense and benefit obligation. After reviewing the hypothetical portfolio of bonds, we selected a discount rate of 3.66% for our pension plan and 3.73% for our other post-retirement benefit plans as of December 31, 2017, which represent a 47 and 52 basis-point decrease as compared to the discount rates selected at December 31, 2016, respectively. Our post-retirement benefits expense under these plans is determined using the discount rate as of the beginning of the year, which was 4.13% for our pension plan and 4.25% for our other-postretirement benefit plans for 2017, and will be 3.66% for our pension plan and 3.73% for our other post-retirement benefit plans for 2018.

Our expected return on plan assets is determined by evaluating the asset class return expectations with our advisors as well as actual, long-term, historical results of our asset returns. The Company's market-related value of plan assets is equal to the fair value of the plans' assets as of the last day of its fiscal year, and is a determinant for the expected return on plan assets, which is a component of post-retirement benefits expense. The allocation of our plans' assets impacts our

expected return on plan assets. In 2017, we changed the targeted allocation of the plans' assets to reflect 50% to 70% return seeking assets, and 30% to 50% liability hedging assets, which replaced the former targeted allocation of 25% to 75% domestic equities, 0% to 10% international equities, 25% to 50% fixed income, 0% to 5% alternative investments, and 0% to 20% cash and cash equivalents. Our post-retirement benefits expense increases as the expected return on plan assets decreases. We believe that our actual long-term asset allocations on average will approximate our targeted allocations. Our targeted allocations are driven by our investment strategy to earn a reasonable rate of return while maintaining risk at acceptable levels through the diversification of investments across and within various asset categories. For 2017, we used a 7.00% expected return on plan assets assumption which will decrease to 6.75% for 2018.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and our funding policy, during 2018 our pension contribution is expected to be $12,484. Future years' contributions will be subject to economic conditions, plan participant data and the funding rules in effect at such time as the funding calculations are performed, though we expect future changes in the amount of contributions and expense recognized to be generally included in customer rates.

***Accounting for Income Taxes*** ─ We estimate the amount of income tax payable or refundable for the current year and the deferred income tax liabilities and assets that results from estimating temporary differences resulting from the treatment of specific items, such as depreciation, for tax and financial statement reporting. Generally, these differences result in the recognition of a deferred tax asset or liability on our consolidated balance sheet and require us to make judgments regarding the probability of the ultimate tax impact of the various transactions we enter into. Based on these judgments, we may record tax reserves or adjustments to valuation allowances on deferred tax assets to reflect the expected realization of future tax benefits. Actual income taxes could vary from these estimates and changes in these estimates can increase income tax expense in the period that these changes in estimates occur.

Our determination of what qualifies as a capital cost versus a tax deduction, for qualifying utility asset improvements, as it relates to our income tax accounting method change beginning in 2012, is subject to subsequent adjustment as well as IRS audits, changes in income tax laws, including regulations regarding tax-basis depreciation as it applies to our capital expenditures, or qualifying utility asset improvements, the expiration of a statute of limitations, or other unforeseen matters could impact the tax benefits that have already been recognized. We establish reserves for uncertain tax positions based upon management's judgment as to the sustainability of these positions. These accounting estimates related to the uncertain tax position reserve require judgments to be made as to the sustainability of each uncertain tax position based on its technical merits. We believe our tax positions comply with applicable law and that we have adequately recorded reserves as required. However, to the extent the final tax outcome of these matters is different than our estimates recorded, we would then need to adjust our tax reserves which could result in additional income tax expense or benefits in the period that this information is known.

## IMPACT OF RECENT ACCOUNTING PRONOUNCEMENTS

We describe the impact of recent accounting pronouncements in Note 1 – *Summary of Significant Accounting Policies* in this Annual Report.

Table of Contents

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. The exposure to changes in interest rates is a result of financings through the issuance of fixed rate long-term debt. Such exposure is typically related to financings between utility rate increases, since generally our rate increases include a revenue level to allow recovery of our current cost of capital. Interest rate risk is managed through the use of a combination of long-term debt, which is at fixed interest rates, and short-term debt, which is at floating interest rates. As of December 31, 2017, the debt maturities by period, in thousands of dollars, and the weighted average interest rate for long-term debt are as follows:

| | 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter | Total | Fair Value |
|---|---|---|---|---|---|---|---|---|
| Long-term debt: | | | | | | | | |
| Fixed rate | $ 113,769 | $ 144,622 | $ 44,403 | $ 36,811 | $ 25,155 | $ 1,718,367 | $ 2,083,127 | $ 2,202,785 |
| Variable rate | - | - | - | 60,000 | - | - | 60,000 | 60,000 |
| Total | $ 113,769 | $ 144,622 | $ 44,403 | $ 96,811 | $ 25,155 | $ 1,718,367 | $ 2,143,127 | $ 2,262,785 |
| Weighted average interest rate* | 4.36% | 4.09% | 5.06% | 3.40% | 4.95% | 3.66% | | |

*Weighted average interest rate of 2021 long-term debt maturity is as follows: fixed rate debt of 4.36% and variable rate debt of 2.20%.

From time to time, we make investments in marketable equity securities. As a result, we are exposed to the risk of changes in equity prices for the "available-for-sale" marketable equity securities. As of December 31, 2017, we have assets of, in thousands of dollars, $21,776 that are classified as "available-for-sale" securities to fund our deferred compensation and non-qualified pension plan liabilities. The market risk of the deferred compensation plan assets are borne by the participants in the deferred compensation plan.

Item 8. *Financial Statements and Supplementary Data*

**Index to Consolidated Financial Statements**

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Aqua America, Inc.:

***Opinions on the Financial Statements and Internal Control over Financial Reporting***

We have audited the accompanying consolidated balance sheets and statements of capitalization of Aqua America Inc. and its subsidiaries as of December 31, 2017 and 2016, and the related consolidated statements of net income, of comprehensive income, of equity and of cash flows for each of the three years in the period ended December 31, 2017, including the related notes and schedule of condensed parent company financial statements for each of the three years in the period ended December 31, 2017 appearing under Item 15 (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

***Basis for Opinions***

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

***Definition and Limitations of Internal Control over Financial Reporting***

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Note 1 – *Summary of Significant Accounting Policies***

***Nature of Operations*** **─** Aqua America, Inc. ("Aqua America," the "Company," "we," "our", or "us") is the holding company for regulated utilities providing water or wastewater services concentrated in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. The Company's other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater services through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within the Company's market-based subsidiary, Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016 we completed the sale of business units within Aqua Resources, which were reported as assets held for sale in the Company's consolidated balance sheets, which provided liquid waste hauling and disposal services, and inspection, and cleaning and repair of storm and sanitary wastewater lines.

The Company has identified ten operating segments and has one reportable segment named the Regulated segment. The reportable segment is comprised of eight operating segments for our water and wastewater regulated utility companies which are organized by the states where we provide these services. These operating segments are aggregated into one reportable segment since each of the Company's operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment. In addition, Aqua Resources and Aqua Infrastructure are not quantitatively significant to be reportable and are included as a component of "Other," in addition to corporate costs that have not been allocated to the Regulated segment and intersegment eliminations.

***Regulation*** **─** Most of the operating companies that are regulated public utilities are subject to regulation by the utility commissions of the states in which they operate. The respective utility commissions have jurisdiction with respect to rates, service, accounting procedures, issuance of securities, acquisitions and other matters. Some of the operating companies that are regulated public utilities are subject to rate regulation by county or city government. Regulated public utilities follow the Financial Accounting Standards Board's ("FASB") accounting guidance for regulated operations, which provides for the recognition of regulatory assets and liabilities as allowed by regulators for costs or credits that are reflected in current rates or are considered probable of being included in future rates. The regulatory assets or liabilities are then relieved as the cost or credit is reflected in rates.

***Use of Estimates in Preparation of Consolidated Financial Statements*** **─** The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

***Basis of Presentation –*** The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation in the consolidated statements of cash flows:

- pension and other postretirement benefit contributions; and
- as a result of the adoption in 2017 of the FASB's accounting guidance on the classification of certain cash receipts and cash payments, the presentation of debt extinguishment costs (refer to Note 1 – *Summary of Significant Accounting Policies, Recent Accounting Pronouncements).*

Additionally, certain prior period amounts have been reclassified to conform to the current period presentation:

- in the consolidated balance sheets for the presentation of book overdraft, and
- in Note 17 – *Segment Information* of total assets for Other and Eliminations for the reclassification of regulatory assets previously reflected within Other and Eliminations that are now presented with the Regulated segment.

***Recognition of Revenues —*** Revenues in our Regulated segment principally include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the latest billing to the end of the accounting period. In addition, the Company's market-based subsidiary Aqua Resources recognizes revenues when services are performed and Aqua Infrastructure recognizes revenues when services are performed. The Company's market-based subsidiaries recognized revenues of $4,798 in 2017, $20,091 in 2016, and $34,909 in 2015.

***Property, Plant and Equipment and Depreciation —*** Property, plant and equipment consist primarily of utility plant. The cost of additions includes contracted cost, direct labor and fringe benefits, materials, overheads, and for additions meeting certain criteria, allowance for funds used during construction. Water systems acquired are typically recorded at estimated original cost of utility plant when first devoted to utility service and the applicable depreciation is recorded to accumulated depreciation. The difference between the estimated original cost, less applicable accumulated depreciation, and the purchase price is recorded as goodwill, or as an acquisition adjustment within utility plant as permitted by the applicable regulatory jurisdiction. At December 31, 2017, utility plant includes a net credit acquisition adjustment of $24,550, which is generally being amortized from 2 to 59 years. Amortization of the acquisition adjustments totaled $2,774 in 2017, $2,223 in 2016, and $2,556 in 2015.

Utility expenditures for maintenance and repairs, including major maintenance projects and minor renewals and betterments, are charged to operating expenses when incurred in accordance with the system of accounts prescribed by the utility commissions of the states in which the company operates. The cost of new units of property and betterments are capitalized. Utility expenditures for water main cleaning and relining of pipes are deferred and recorded in net property, plant and equipment in accordance with the FASB's accounting guidance for regulated operations. As of December 31, 2017, $16,430 of these costs have been incurred since the last respective rate proceeding and the Company expects to recover these costs in future rates.

The cost of software upgrades and enhancements are capitalized if they result in added functionality, which enables the software to perform tasks it was previously incapable of performing. Information technology costs associated with major system installations, conversions and improvements, such as software training, data conversion and business process reengineering costs, are deferred as a regulatory asset if the Company expects to recover these costs in future rates. If these costs are not deferred, then these costs are charged to operating expenses when incurred. As of December 31, 2017, $34,775 of these costs have been deferred since the last respective rate proceeding as a regulatory asset, and the deferral is reported as a component of net property, plant and equipment.

When units of utility property are replaced, retired or abandoned, the recorded value thereof is credited to the asset account and such value, together with the net cost of removal, is charged to accumulated depreciation. To the extent the Company anticipates recovery of the cost of removal or other retirement costs through rates after the retirement costs are incurred, a regulatory asset is recorded as those costs are incurred. In some cases, the Company recovers retirement costs through rates during the life of the associated asset and before the costs are incurred. These amounts, which are not yet utilized, result in a regulatory liability being reported based on the amounts previously recovered through customer rates.

The straight-line remaining life method is used to compute depreciation on utility plant. Generally, the straight-line method is used with respect to transportation and mechanical equipment, office equipment and laboratory equipment.

Long-lived assets of the Company, which consist primarily of utility plant in service, regulatory assets, and investment in joint venture, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a disallowance of utility plant in service or regulatory assets by the respective utility commission, a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, the Company determines whether it is more likely than not that the fair value of those assets is less than their carrying amount. If the Company determines that it is more likely than not (that is, the likelihood of more than 50 percent), the Company would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, the Company would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. There has been no change in circumstances or events that have occurred that require adjustments to the carrying values of the Company's long-lived assets, except for an impairment charge recognized by the joint venture on its long-lived assets in 2015.

***Allowance for Funds Used During Construction —*** The allowance for funds used during construction ("AFUDC") represents the capitalized cost of funds used to finance the construction of utility plant. In general, AFUDC is applied to construction projects requiring more than one month to complete. No AFUDC is applied to projects funded by customer advances for construction, contributions in aid of construction, or applicable state-revolving fund loans. AFUDC includes the net cost of borrowed funds and a rate of return on other funds when used, and is recovered through water rates as the utility plant is depreciated. The amount of AFUDC related to equity funds in 2017 was $11,633, 2016 was $6,561, and 2015 was $4,621. No interest was capitalized by our market-based businesses.

***Cash and Cash Equivalents —*** The Company considers all highly liquid investments with an original maturity of three months or less, which are not restricted for construction activity, to be cash equivalents.

The Company had a book overdraft, which represents transactions that have not cleared the bank accounts at the end of the period, for specific disbursement cash accounts of $21,629 and $12,616 at December 31, 2017 and 2016, respectively. The Company transfers cash on an as-needed basis to fund these items as they clear the bank in subsequent periods. The balance of the book overdraft is reported as book overdraft and the change in the book overdraft balance is reported as cash flows from financing activities, due to our ability to fund the overdraft with the Company's credit facility.

***Funds Restricted for Construction Activity —*** The proceeds received from specific financings for construction and capital improvement of utility facilities are held in escrow until the designated expenditures are incurred. These amounts are reported as funds restricted for construction activity and are expected to be released over time as the capital projects are funded. As of December 31, 2017 and 2016, the Company did not have any funds restricted for construction activity.

***Accounts Receivable* —** Accounts receivable are recorded at the invoiced amounts, which consists of billed and unbilled revenues. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in our existing accounts receivable, and is determined based on historical write-off experience and the aging of account balances. The Company reviews the allowance for doubtful accounts quarterly. Account balances are written off against the allowance when it is probable the receivable will not be recovered. When utility customers request extended payment terms, credit is extended based on regulatory guidelines, and collateral is not required.

***Inventories, Materials and Supplies* —** Inventories are stated at cost. Cost is determined using the first-in, first-out method.

***Regulatory Assets, Deferred Charges and Other Assets* —** Deferred charges and other assets consist primarily of assets held to compensate employees in the future who participate in the Company's deferred compensation plan and other costs. Other costs, for which the Company has received or expects to receive prospective rate recovery, are deferred as a regulatory asset and amortized over the period of rate recovery in accordance with the FASB's accounting guidance for regulated operations. See Note – 6 *Regulatory Assets and Liabilities* for further information regarding the Company's regulatory assets.

Marketable equity securities are carried on the balance sheet at fair market value, and changes in fair value are included in other comprehensive income.

***Investment in Joint Venture* –** The Company uses the equity method of accounting to account for our 49% investment in a joint venture with a firm in the natural gas industry for the construction and operation of a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale in north-central Pennsylvania, which commenced operations in 2012. Our initial investment is carried at cost. Subsequently, the carrying amount of our investment is adjusted to reflect capital contributions or distributions, and our equity in earnings or losses since the commencement of the system's operations, as well as a decline in the fair value of our investment. Our share of equity earnings or losses in the joint venture is reported in the consolidated statements of net income as equity (earnings) losses in joint venture. During 2017 and 2016 we received distributions of $686 and $1,666, respectively. For our equity method investment in joint venture, the Company evaluates whether it has experienced a decline in the value of its investment that is other than temporary in nature. We would recognize an impairment loss if the fair value of our investment is less than the carrying amount of the investment, and the decline in value is considered other than temporary. Additionally, the Company would recognize its share of an impairment loss if the joint venture determines that the carrying amount of the joint venture's assets exceeds the sum of the joint venture's undiscounted estimated cash flows.

During 2015, the joint venture experienced the following events:

- a decline in natural gas prices, in 2015,
- a distinguishable reduction in the volume of water sales by the joint venture which led to a lowered forecast in 2015 on future water sales volumes by the joint venture, and
- changes in the natural gas industry and market conditions.

At the time, these market conditions were largely associated with natural gas prices, which sharply declined in 2015 and this downturn no longer appeared temporary and instead was expected to be a long-term condition. It was then determined that the carrying amount of the joint venture's long-lived assets exceeded the sum of the joint venture's undiscounted estimated cash flows, which resulted in the recognition of a noncash impairment charge of $32,975 ($21,433 after-tax) in 2015, representing the Company's share of the impairment charge. The impairment charge, on a pre-tax basis, is reported as equity loss in joint venture on the Company's consolidated statements of income. The amount of the impairment charge recognized by the joint venture is equal to the difference between the carrying value and the fair value of the long-lived assets. Fair value is estimated to be the present value of the future net cash flows associated with the assets, discounted using a rate commensurate with the risk and remaining life of the assets.

(In thousands of dollars, except per share amounts)

***Goodwill —*** Goodwill represents the excess cost over the fair value of net tangible and identifiable intangible assets acquired through acquisitions. Goodwill is not amortized but is tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Alternatively, based on our assessment of the qualitative factors previously noted, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit based on a discounted cash flow analysis. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The Company tested the goodwill attributable for each of our reporting units for impairment as of July 31, 2017, and concluded that the estimated fair value of each reporting unit, which has goodwill recorded, exceeded the reporting unit's carrying amount, indicating that none of the Company's goodwill was impaired. The following table summarizes the changes in the Company's goodwill:

| | Regulated Segment | Other | Consolidated |
|---|---|---|---|
| Balance at December 31, 2015 | $ 27,246 | $ 6,620 | $ 33,866 |
| Goodwill acquired during year | 10,378 | - | 10,378 |
| Reclassifications to utility plant acquisition adjustment | (98) | - | (98) |
| Disposition | (159) | (1,232) | (1,391) |
| Classified as assets held for sale | | (547) | (547) |
| Balance at December 31, 2016 | 37,367 | 4,841 | 42,208 |
| Goodwill acquired during year | 72 | - | 72 |
| Reclassifications to utility plant acquisition adjustment | (50) | - | (50) |
| Balance at December 31, 2017 | $ 37,389 | $ 4,841 | $ 42,230 |

The reclassification of goodwill to utility plant acquisition adjustment results from a mechanism approved by the applicable utility commission. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with some acquisitions upon achieving specific objectives.

The goodwill allocated to a disposition or classified as assets held for sale results from the allocation of goodwill for market-based business units based on their relative fair value as compared to Aqua Resource's fair value.

***Income Taxes —*** The Company accounts for some income and expense items in different time periods for financial and tax reporting purposes. Deferred income taxes are provided on specific temporary differences between the tax basis of the assets and liabilities, and the amounts at which they are carried in the consolidated financial statements. The income tax effect of temporary differences not currently recovered in rates is recorded as deferred taxes with an offsetting regulatory asset or liability. These deferred income taxes are based on the enacted tax rates expected to be in effect when such temporary differences are projected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. Investment tax credits are deferred and amortized over the estimated useful lives of the related properties. Judgment is required in evaluating the Company's Federal and state tax positions. Despite management's belief that the Company's tax return positions are fully supportable, the Company establishes reserves when it believes that its tax positions are likely to be challenged and it may not fully prevail in these challenges. The Company's provision for income taxes includes interest, penalties and reserves for uncertain tax positions.

In 2012, the Company changed its tax method of accounting for qualifying utility asset improvement costs in Aqua Pennsylvania effective with the tax year ended December 31, 2012 and for prior tax years. The tax accounting method was changed to permit the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for book and tax purposes. This change was implemented in response to a June 2012 rate order issued by the Pennsylvania Public Utility Commission to Aqua Pennsylvania, which provides for a reduction in current income tax expense as a result of the recognition of income tax benefits for qualifying utility asset improvements. This change results in a significant reduction in the effective income tax rate, a reduction in current income tax expense, and reduces the amount of taxes currently payable. For qualifying capital expenditures made prior to 2012, the resulting tax benefits have been deferred as of December 31, 2012 and, in accordance with the rate order, a ten year amortization of the income tax benefits, which reduces future income tax expense, commenced in 2013.

***Customers' Advances for Construction and Contributions in Aid of Construction*** – Water mains, other utility property or, in some instances, cash advances to reimburse the Company for its costs to construct water mains or other utility property, are contributed to the Company by customers, real estate developers and builders in order to extend utility service to their properties. The value of these contributions is recorded as customers' advances for construction. Over time, the amount of non-cash contributed property will vary based on the timing of the contribution of the non-cash property and the volume of non-cash contributed property received in connection with development in our service territories. The Company makes refunds on these advances over a specific period of time based on operating revenues related to the property, or as new customers are connected to and take service from the applicable water main. After all refunds are made, any remaining balance is transferred to contributions in aid of construction. Contributions in aid of construction include direct non-refundable contributions and the portion of customers' advances for construction that become non-refundable.

Based on regulatory conventions in states where the Company operates, generally our subsidiaries depreciate contributed property and amortize contributions in aid of construction at the composite rate of the related property. Contributions in aid of construction and customers' advances for construction are deducted from the Company's rate base for rate-making purposes, and therefore, no return is earned on contributed property.

***Stock-Based Compensation*** – The Company records compensation expense in the financial statements for stock-based awards based on the grant date fair value of those awards. Stock-based compensation expense includes an estimate for pre-vesting forfeitures and is recognized over the requisite service periods of the awards on either a straight-line basis, or the graded vesting method, which is generally commensurate with the vesting term.

***Fair Value Measurements*** – The Company follows the FASB's accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;
- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or
- Level 3: inputs that are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Additionally, assets that are measured at fair value using the net asset value ("NAV") per share practical expedient are not classified in the fair value hierarchy. There have been no changes in the valuation techniques used to measure fair value or asset or liability transfers between the levels of the fair value hierarchy for the years ended December 31, 2017 and 2016.

***Recent Accounting Pronouncements*** **—** In March 2017, the FASB issued updated accounting guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Historically, net benefit cost is reported as an employee cost within operating income, net of amounts capitalized. The guidance requires the bifurcation of net benefit cost. The service cost component will be presented with other employee compensation costs in operating income and the other components of net benefit cost will be reported separately outside of operating income, and will not be eligible for capitalization. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period, and is to be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and on a prospective basis for the capitalization of only the service cost component of net benefit cost. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position.

I n January 2017, the FASB issued updated accounting guidance that eliminates step 2 of the current goodwill impairment test, which requires a hypothetical purchase price allocation to measure goodwill impairment. A goodwill impairment loss will instead be measured at the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The guidance will be effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period, with early adoption permitted for any impairment test performed on testing dates after January 1, 2017. The Company elected to early adopt the provisions of the updated guidance, for its annual impairment valuation performed in the third quarter of 2017, and the provisions of the updated guidance did not have an impact on its results of operations or financial position.

In August 2016, the FASB issued updated accounting guidance on the classification of certain cash receipts and cash payments in the statement of cash flows, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. The Company has elected to early adopt the provisions of the updated guidance, which resulted in the reclassification of $375 debt extinguishment costs for 2016, from cash flows from operating to financing activities to conform to the new classification.

In March 2016, the FASB issued updated accounting guidance on simplifying the accounting for share-based payments, which includes several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The updated guidance was effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption available. On January 1, 2017, the Company adopted the updated guidance, prospectively, and recognized a previously unrecognized windfall tax benefit for stock-based compensation of $982, associated with the Company's 2012 Federal net operating loss, which was recorded as an adjustment to deferred income taxes and retained earnings (refer to the presentation of "cumulative effect of change in accounting principle – windfall tax benefit" on the Company's Consolidated Statement of Equity). Additionally, income tax benefits in excess of compensation costs or tax deficiencies for share-based compensation are now recorded to our income tax provision, instead of historically to stockholder's equity, which impacts our effective tax rate. Lastly, all tax-related cash flows resulting from share-based payments are reported prospectively as operating activities on the statement of cash flows, a change from the historical requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities.

In February 2016, the FASB issued updated accounting guidance on accounting for leases, which requires lessees to establish a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. For income statement purposes, leases will be classified as either operating or finance. Operating leases will result in straight-line expense while finance leases will result in a front-loaded expense pattern. The updated accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption available. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption. Refer to Note 9 – *Commitments and Contingencies* for further information on the Company's leases.

In January 2016, the FASB issued updated accounting guidance on the recognition and measurement of financial assets and financial liabilities, which amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. The updated guidance is effective for interim and annual periods beginning after December 31, 2017. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position.

In May 2014, the FASB issued updated accounting guidance on recognizing revenue from contracts with customers, which outlines a single comprehensive model that an entity will apply to determine the measurement of revenue and timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The updated guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. The updated guidance is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the updated guidance in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting the updated guidance recognized through retained earnings at the date of adoption. In 2016, the Company performed an evaluation of the requirements of the updated guidance and believes that the impact of adoption will not result in a material change in the Company's measurement of revenue. In 2017, the American Institute of Certified Public Accountants ("AICPA") power and utility entities revenue recognition task force determined that contributions in aid of construction are not in the scope of the new standard, and submitted its recommendation to the AICPA's revenue recognition working group for approval. The Company implemented the updated guidance using the modified retrospective approach on January 1, 2018, which did not result in a change in the Company's measurement of revenue, and reached the following conclusions:

- The Company's tariff sale contracts, including those with lower credit quality customers, are generally deemed to be probable of collection, and thus the timing of revenue recognition will continue to be concurrent with the delivery of water and wastewater services, consistent with our current practice.
- Contributions in aid of construction are outside of the scope of the standard, and will continue to be accounted for as a noncurrent liability.

**Note 2 – *Acquisitions***

As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of six municipalities for a total combined purchase price in cash of $150,700. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur by the end of 2018, which is subject to the timing of the regulatory approval process. These acquisitions are expected to add approximately 16,325 customers in two of the states in which the Company operates.

Pursuant to the Company's growth-through-acquisition strategy, the Company completed the following acquisitions:

In 2017, the Company completed four acquisitions of water and wastewater utility systems in two states adding 1,003 customers. The total purchase price of these utility systems consisted of $5,860 in cash, which resulted in $72 of goodwill being recorded. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired in 2017 are $461. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

In January 2016, the Company acquired Superior Water Company, Inc., which provides public water service to 4,108 customers in portions of Berks, Chester, and Montgomery counties in Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. The purchase price allocation for this acquisition consisted primarily of acquired property, plant and equipment of $25,167, contributions in aid of construction of $16,565, and goodwill of $8,622. Additionally, during 2016, the Company completed 18 acquisitions of water and wastewater utility systems in various states adding 2,469 customers. The total purchase price of these utility systems consisted of $5,518 in cash. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired were $4,896 in 2017 and $3,809 in 2016. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

In April 2015, the Company acquired the water and wastewater utility system assets of North Maine Utilities, located in the Village of Glenview, Illinois serving approximately 7,400 customers. The total purchase price consisted of $23,079 in cash. The purchase price allocation for this acquisition consists primarily of acquired property, plant and equipment. Additionally, in 2015, the Company completed 14 acquisitions of water and wastewater utility systems in various states adding 3,170 customers. The total purchase price of these utility systems consisted of $5,210 in cash. The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired were $10,868 in 2017, $10,708 in 2016, and $6,662 in 2015. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

**Note 3 –*Dispositions***

The following dispositions have not been presented as discontinued operations in the Company's consolidated financial statements as they do not qualify as discontinued operations, since their disposal does not represent a strategic shift that has a major effect on our operations or financial results. The gains or loss disclosed below are reported in the consolidated statements of net income as a component of operations and maintenance expense. These business units were reported within the Company's market-based subsidiary, Aqua Resources, and were included in "Other" in the Company's segment information.

*Dispositions Completed in 2017 and 2016*

In the second quarter of 2016, the Company decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repaired and performed maintenance on water and wastewater systems, for which the sale was completed in June 2017. These business units were reported as assets held for sale in the Company's December 31, 2016 consolidated balance sheet included in this Annual Report. These transactions resulted in total proceeds of $867 and the recognition of a net loss of $324.

In the third quarter of 2016, the Company marketed for sale a business unit which inspects, cleans and repairs storm and sanitary wastewater lines. In November 2016, this business unit was sold for $1,059 in cash and resulted in a loss on sale of $1,081. Further, in December 2015, the Company decided to sell a business unit which provides liquid waste hauling and disposal services. During the second quarter of 2016, this business unit was sold for $3,400 in cash and resulted in a gain on sale of $537.

(In thousands of dollars, except per share amounts)

*Dispositions Reported as Assets Held for Sale at December 31, 2017*

In the first quarter of 2017, the Company decided to market for sale a water system that serves approximately 265 customers. This water system is reported as assets held for sale in the Company's consolidated balance sheet.

### Note 4 – *Property, Plant and Equipment*

| | December 31, 2017 | December 31, 2016 | Approximate Range of Useful Lives | Weighted Average Useful Life |
|---|---|---|---|---|
| Utility plant and equipment: | | | | |
| Mains and accessories | $ 3,134,900 | $ 2,898,560 | 30 - 93 years | 79 years |
| Services, hydrants, treatment plants and reservoirs | 1,753,433 | 1,621,972 | 5 - 85 years | 51 years |
| Operations structures and water tanks | 296,736 | 283,635 | 14 - 85 years | 47 years |
| Miscellaneous pumping and purification equipment | 768,962 | 733,074 | 12 - 90 years | 41 years |
| Meters, data processing, transportation and operating equipment | 768,655 | 733,837 | 4 - 63 years | 25 years |
| Land and other non-depreciable assets | 103,357 | 98,529 | - | - |
| Utility plant and equipment | 6,826,043 | 6,369,607 | | |
| Utility construction work in progress | 201,902 | 163,565 | - | - |
| Net utility plant acquisition adjustment | (24,550) | (25,683) | 2 - 59 years | 31 years |
| Non-utility plant and equipment | 598 | 1,628 | 3 - 25 years | 13 years |
| Total property, plant and equipment | $ 7,003,993 | $ 6,509,117 | | |

### Note 5 – *Accounts Receivable*

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Billed utility revenue | $ 65,695 | $ 63,518 |
| Unbilled revenue | 35,042 | 34,635 |
| Other | 4,930 | 6,336 |
| | 105,667 | 104,489 |
| Less allowance for doubtful accounts | 7,071 | 7,095 |
| Net accounts receivable | $ 98,596 | $ 97,394 |

The Company's utility customers are located principally in the following states: 47% in Pennsylvania, 15% in Ohio, 10% in North Carolina, 8% in Texas, and 7% in Illinois. No single customer accounted for more than one percent of the Company's regulated operating revenues during the years ended December 31, 2017, 2016, and 2015. The following table summarizes the changes in the Company's allowance for doubtful accounts:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| Balance at January 1, | $ 7,095 | $ 5,873 | $ 5,365 |
| Amounts charged to expense | 4,986 | 5,500 | 5,762 |
| Accounts written off | (6,135) | (5,410) | (6,513) |
| Recoveries of accounts written off | 1,125 | 1,132 | 1,259 |
| Balance at December 31, | $ 7,071 | $ 7,095 | $ 5,873 |

(In thousands of dollars, except per share amounts)

**Note 6 – *Regulatory Assets and Liabilities***

The regulatory assets represent costs that are probable to be fully recovered from customers in future rates while regulatory liabilities represent amounts that are expected to be refunded to customers in future rates or amounts recovered from customers in advance of incurring the costs. Except for income taxes, regulatory assets and regulatory liabilities are excluded from the Company's rate base and do not earn a return. The components of regulatory assets and regulatory liabilities are as follows:

| | December 31, 2017 | | December 31, 2016 | |
|---|---|---|---|---|
| | Regulatory Assets | Regulatory Liabilities | Regulatory Assets | Regulatory Liabilities |
| Income taxes | $ 584,067 | $ 438,750 | $ 814,418 | $ 157,266 |
| Utility plant retirement costs | 5,367 | 35,249 | 4,986 | 31,288 |
| Post-retirement benefits | 112,532 | 65,964 | 119,519 | 59,882 |
| Accrued vacation | 2,198 | - | 1,984 | - |
| Water tank painting | 3,259 | 1,855 | 2,111 | 2,143 |
| Fair value adjustment of long-term debt assumed in acquisition | 2,901 | - | 3,268 | - |
| Rate case filing expenses and other | 3,647 | 92 | 2,361 | 56 |
| | $ 713,971 | $ 541,910 | $ 948,647 | $ 250,635 |

Items giving rise to deferred state income taxes, as well as a portion of deferred Federal income taxes related to specific differences between tax and book depreciation expense, are recognized in the rate setting process on a cash basis or as a reduction in current income tax expense and will be recovered as they reverse. Amounts include differences that arise between specific utility asset improvement costs capitalized for book and deducted as an expense for tax purposes. Additionally, the recording of AFUDC for equity funds results in the recognition of a regulatory asset for income taxes, which represents amounts due related to the revenue requirement.

A portion of the regulatory liability for income taxes is related to Aqua Pennsylvania's income tax accounting change for the tax benefits realized on the Company's 2012 tax return, which have not yet reduced current income tax expense due to the ten year amortization period which began in 2013. This amortization was stipulated in a June 2012 rate order issued to Aqua Pennsylvania and is subject to specific parameters being met each year. Beginning in 2013, the Company amortized $38,000, annually, of its deferred income tax benefits, which reduced current income tax expense and increased the Company's net income by $16,734.

On December 22, 2017, President Trump signed the TCJA into law, which reduced the Federal corporate income tax rate from 35% to 21%. Reductions in accumulated deferred income tax balances due to the reduction in the corporate income tax rate to 21% under the provisions of the TCJA will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes relating to certain accelerated tax depreciation benefits are to be passed back to customers. Potential refunds of other deferred taxes will be determined by our state regulators. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities, and reduces our regulatory assets by $357,262 and increases our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

The regulatory asset for utility plant retirement costs, including cost of removal, represents costs already incurred that are expected to be recovered in future rates over a five year recovery period. The regulatory liability for utility plant retirement costs represents amounts recovered through rates during the life of the associated asset and before the costs are incurred.

The regulatory asset for accrued vacation represents costs that would otherwise be charged to operations and maintenance expense for vacation that is earned by employees, which is recovered as a cost of service.

(In thousands of dollars, except per share amounts)

The regulatory asset for post-retirement benefits, which includes pension and other post-retirement benefits, primarily reflects a regulatory asset that has been recorded for the costs that would otherwise be charged to stockholders' equity for the underfunded status of the Company's pension and other post-retirement benefit plans. The Company also has a regulatory asset related to post-retirement benefits costs that represent costs already incurred which are now being recovered in rates over 10 years. The regulatory liability for post-retirement benefits represents costs recovered in rates in excess of post-retirement benefits expense.

Expenses associated with water tank painting are deferred and amortized over a period of time as approved in the regulatory process. Water tank painting costs are generally being amortized over a period ranging from 1 to 15 years. The regulatory liability for water tank painting costs represents amounts recovered through rates and before the costs are incurred.

The Company recorded a fair value adjustment for fixed rate, long-term debt assumed in acquisitions that matures in various years ranging from 2022 to 2029. The regulatory asset or liability results from the rate setting process continuing to recognize the historical interest cost of the assumed debt.

The regulatory asset related to rate case filing expenses and other represents the costs associated with filing for rate increases that are deferred and amortized over periods that generally range from one to five years, and costs incurred by the Company for which it has received or expects to receive rate recovery.

The regulatory asset related to the costs incurred for information technology software projects and water main cleaning and relining projects are described in Note 1 – *Summary of Significant Accounting Policies – Property, Plant and Equipment and Depreciation*.

**Note 7 – *Income Taxes***

The provision for income taxes consists of:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Current: | | | |
| Federal | $ 1,297 | $ 2,046 | $ 2,624 |
| State | 1,837 | 1,682 | (4,168) |
| | 3,134 | 3,728 | (1,544) |
| Deferred: | | | |
| Federal | 21,376 | 21,489 | 12,649 |
| State | (7,596) | (4,239) | 3,857 |
| | 13,780 | 17,250 | 16,506 |
| Total tax expense | $ 16,914 | $ 20,978 | $ 14,962 |

The statutory Federal tax rate is 35% and for states with a corporate net income tax, the state corporate net income tax rates range from 3% to 9.99% for all years presented.

(In thousands of dollars, except per share amounts)

The reasons for the differences between amounts computed by applying the statutory Federal corporate income tax rate to income before income tax expense are as follows:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Computed Federal tax expense at statutory rate | $ 89,828 | $ 89,306 | $ 75,863 |
| Decrease in Federal tax expense related to an income tax accounting change for qualifying utility asset improvement costs | (69,325) | (62,831) | (59,488) |
| State income taxes, net of Federal tax benefit | (3,743) | (1,662) | (202) |
| Increase in tax expense for depreciation expense to be recovered in future rates | 199 | 199 | 199 |
| Stock-based compensation | (595) | (227) | (174) |
| Deduction for Aqua America common dividends paid under employee benefit plan | (455) | (455) | (456) |
| Amortization of deferred investment tax credits | (376) | (405) | (421) |
| Federal tax rate change | 3,141 | - | - |
| Other, net | (1,760) | (2,947) | (359) |
| Actual income tax expense | $ 16,914 | $ 20,978 | $ 14,962 |

In 2012, the Company changed its tax method of accounting for qualifying utility system repairs in Aqua Pennsylvania effective with the tax year ended December 31, 2012 and for prior tax years. The tax accounting method was changed to permit the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for book and tax purposes. This change was implemented in response to a June 2012 rate order issued by the Pennsylvania Public Utility Commission to Aqua Pennsylvania which provides for a reduction in current income tax expense as a result of the flow-through recognition of some income tax benefits due to the income tax accounting change. The Company recorded income tax benefits of $84,766, $78,530, and $72,944 during 2017, 2016, and 2015, respectively. The Company recognized a tax deduction on its 2012 Federal tax return of $380,000 for qualifying capital expenditures made prior to 2012, and based on the rate order, in 2013, the Company began to amortize 1/10$^{th}$ of these expenditures. In accordance with the rate order, the amortization is expected to reduce current income tax expense during periods when qualifying parameters are met. Beginning in 2013, the Company amortized the qualifying capital expenditures made prior to 2012 and recognized $38,000, annually, of deferred income tax benefits, which reduced current income tax expense and increased the Company's net income by $16,734. The Company's effective income tax rate for 2017, 2016, and 2015 was 6.6%, 8.2%, and 6.9%, respectively.

The Company establishes reserves for uncertain tax positions based upon management's judgment as to the sustainability of these positions. These accounting estimates related to the uncertain tax position reserve require judgments to be made as to the sustainability of each uncertain tax position based on its technical merits. The Company believes its tax positions comply with applicable law and that it has adequately recorded reserves as required. However, to the extent the final tax outcome of these matters is different than the estimates recorded, the Company would then adjust its tax reserves or unrecognized tax benefits in the period that this information becomes known. The Company has elected to recognize accrued interest and penalties related to uncertain tax positions as income tax expense.

(In thousands of dollars, except per share amounts)

The following table provides the changes in the Company's unrecognized tax benefits:

| | 2017 | 2016 |
|---|---|---|
| Balance at January 1, | $ 28,099 | $ 28,016 |
| Additions based on tax position related to the current year | 705 | 83 |
| Effect of Federal tax rate change | (11,221) | - |
| Balance at December 31, | $ 17,583 | $ 28,099 |

The unrecognized tax benefits relate to the income tax accounting change, and the tax position is attributable to a temporary difference. The Company does not anticipate material changes to its unrecognized tax benefits within the next year. As a result of the regulatory treatment afforded by the income tax accounting change in Pennsylvania and despite this position being a temporary difference, as of December 31, 2017 and 2016, $24,243 and $20,674 and, respectively, of these tax benefits would have an impact on the Company's effective income tax rate in the event the Company does sustain all, or a portion, of its tax position.

The following table provides the components of net deferred tax liability:

| | December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Deferred tax assets: | | |
| Customers' advances for construction | $ 17,123 | $ 21,738 |
| Costs expensed for book not deducted for tax, principally accrued expenses | 12,956 | 15,751 |
| Utility plant acquisition adjustment basis differences | 1,752 | 3,114 |
| Post-retirement benefits | 36,353 | 38,269 |
| Tax loss and credit carryforwards | 56,642 | 77,911 |
| Other | 2,348 | 2,137 |
| | 127,174 | 158,920 |
| Less valuation allowance | 11,623 | 9,486 |
| | 115,551 | 149,434 |
| Deferred tax liabilities: | | |
| Utility plant, principally due to depreciation and differences in the basis of fixed assets due to variation in tax and book accounting | 795,537 | 1,104,032 |
| Deferred taxes associated with the gross-up of revenues necessary to recover, in rates, the effect of temporary differences | 46,143 | 269,773 |
| Tax effect of regulatory asset for post-retirement benefits | 36,353 | 38,269 |
| Deferred investment tax credit | 6,591 | 6,613 |
| | 884,624 | 1,418,687 |
| Net deferred tax liability | $ 769,073 | $ 1,269,253 |

At December 31, 2017, the Company has a cumulative Federal NOL of $63,302. The Company believes the Federal NOLs are more likely than not to be recovered and require no valuation allowance. The Company's Federal NOLs do not begin to expire until 2032.

In 2012 and 2011, as a result of the Company's Federal cumulative NOLs the Company ceased recognizing the windfall tax benefit associated with stock-based compensation, because the deduction did not reduce income taxes payable. As of December 31, 2015, the Company utilized all of the 2011 NOL and recognized a windfall tax benefit of $588. As a result of the adoption on January 1, 2017 of the FASB's updated accounting guidance on simplifying the accounting for share-based payments, the Company recognized a windfall tax benefit of $982 associated with the Company's 2012 Federal NOL, which was recorded as an adjustment to retained earnings.

At December 31, 2017, the Company has a cumulative state NOL of $627,258, a portion of which is offset by a valuation allowance because the Company does not believe these NOLs are more likely than not to be realized. The state NOLs do not begin to expire until 2023.

The Company has unrecognized tax positions that result in the associated tax benefit being unrecognized. The Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $64,476 and $85,380, respectively, which results from the Company's adoption in 2013 of the FASB's accounting guidance on the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions are $127,778 and $712,638, respectively. The Company records its unrecognized tax benefit as a reduction to its deferred income tax liability.

As of December 31, 2017, the Company's Federal income tax returns for all years through 2011 have been closed. Tax years 2012 through 2017 remain open to Federal examination. The statute remains open for the Company's state income tax returns for tax years 2014 through 2017 in the various states in which it conducts business.

On December 22, 2017, President Trump signed the TCJA into law. Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA includes significant changes to the Code and the taxation of business entities, and includes specific provisions related to regulated public utilities. Significant changes that impact the Company included in the TCJA are a reduction in the corporate federal income tax rate from 35% to 21%, effective January 1, 2018, and a limitation of the utilization of NOLs arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. The specific TCJA provisions related to our regulated entities generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017 and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Our market-based companies still qualify for 100% deductibility of qualifying property acquired after September 27, 2017.

Changes in the Code from the TCJA had a material impact on our financial statements in 2017. In accordance with the FASB's accounting guidance for income taxes, the tax effects of changes in tax laws must be recognized in the period in which the law is enacted, or December 22, 2017 for the TCJA. Additionally, deferred tax assets and liabilities are required to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. Thus, at the date of enactment, the Company's deferred taxes were re-measured based upon the new tax rate. For our regulated entities, the change in deferred taxes is recorded as either an offset to a regulatory asset or liability and may be subject to refund to customers. In instances where the deferred tax balances are not in ratemaking, such as the Company's market-based operations, the change in deferred taxes is recorded as an adjustment to our deferred tax provision. To the extent the revalued deferred income tax assets and liabilities were outside of our regulated operations and are not believed to be recoverable in utility customer rates, the revalued amount of $3,141 was recognized as additional deferred income tax expense during the quarter ended December 31, 2017.

The staff of the SEC has recognized the complexity of reflecting the impacts of the TCJA, and on December 22, 2017 issued guidance, which clarifies accounting for income taxes if information is not yet available or complete and provides for up to a one year period in which to complete the required analyses and accounting (the measurement period). The guidance describes three scenarios (or "buckets") associated with a company's status of accounting for income tax reform: (1) a company is complete with its accounting for certain effects of tax reform, (2) a company is able to determine a reasonable estimate for certain effects of tax reform and records that estimate as a provisional amount, or (3) a company is not able to determine a reasonable estimate and therefore continues to apply the FASB's accounting guidance, based on the provisions of the tax laws that were in effect immediately prior to the TCJA being enacted.

(In thousands of dollars, except per share amounts)

The Company has completed or has made a reasonable estimate for the measurement and accounting of the effect of the TCJA which have been reflected in the December 31, 2017 financial statements. The accounting for these completed and provisional items, described below, increased the 2017 deferred income tax provision by $3,141 for the year ending December 31, 2017, and decreased the accumulated deferred income tax liability by $303,320 at December 31, 2017.

One of our states, Pennsylvania, has not yet issued an accounting or procedural order addressing how the TCJA changes are to be reflected in our utility customer rates. As of December 31, 2017, the Company has provisionally estimated that $175,108 of deferred income tax liabilities for our Pennsylvania subsidiary will be a regulatory liability. Additionally, two operating divisions in one of our states operate under locally-negotiated contractual rates with their respective counties, and it is expected that negotiations will results in a contract that will pass back the effects of the reduction in the corporate net income tax rate under the TCJA; however, these negotiations have not yet started. As of December 31, 2017, the Company has provisionally estimated that $9,419 of deferred income tax liabilities for these two divisions will be a regulatory liability. Overall, the Company has applied a reasonable interpretation of the impact of the TCJA and a reasonable estimate of the regulatory resolution. Further clarification of the TCJA and regulatory resolution may change the amounts estimated of the deferred income tax provision and the accumulated deferred income tax liability.

The Company's regulated operations accounting for income taxes are impacted by the FASB's accounting guidance for regulated operations. Reductions in accumulated deferred income tax balances due to the reduction in the Federal corporate income tax rates to 21% under the provisions of the TCJA will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes related to certain accelerated tax depreciation deduction benefits are to be passed back to customers. Potential refunds of other deferred taxes will be determined by our state regulators. Our state regulatory commissions have or are in the process of issuing procedural orders directing how the tax law changes are to be reflected in our utility customer rates. In addition, we have two rate cases currently in progress in two states in which the TCJA is expected to be addressed in the new base rates. The December 31, 2017 consolidated balance sheet reflects the impact of the TCJA on our regulatory assets and liabilities which reduced our regulatory assets by $357,262 and increased our regulatory liabilities by $303,320. These adjustments had no impact on our 2017 cash flows.

**Note 8 –** ***Taxes Other than Income Taxes***

The following table provides the components of taxes other than income taxes:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Property | $ 25,810 | $ 26,788 | $ 26,545 |
| Gross receipts, excise and franchise | 13,458 | 12,510 | 11,847 |
| Payroll | 9,477 | 9,772 | 9,539 |
| Regulatory assessments | 2,552 | 2,630 | 2,689 |
| Pumping fees | 5,057 | 4,571 | 3,993 |
| Other | 274 | 114 | 444 |
| Total taxes other than income taxes | $ 56,628 | $ 56,385 | $ 55,057 |

(In thousands of dollars, except per share amounts)

**Note 9 – *Commitments and Contingencies***

***Commitments*** – The Company leases motor vehicles, buildings and other equipment under operating leases that are noncancelable. The future annual minimum lease payments due are as follows:

| 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|
| $ 1,312 | $ 1,010 | $ 743 | $ 585 | $ 365 | $ 250 |

The Company leases parcels of land on which treatment plants and other facilities are situated and adjacent parcels that are used for watershed protection. The operating leases are noncancelable, expire between 2019 and 2052, and contain renewal provisions. Some leases are subject to an adjustment every five years based on changes in the Consumer Price Index. Subject to the aforesaid adjustment, during each of the next five years, an average of $602 of annual lease payments for land is due, and the aggregate of the years remaining approximates $12,806.

The Company maintains agreements with other water purveyors for the purchase of water to supplement its water supply, particularly during periods of peak demand. The agreements stipulate purchases of minimum quantities of water to the year 2026. The estimated annual commitments related to such purchases through 2022 are expected to average $4,373 and the aggregate of the years remaining approximates $9,644.

The Company has entered into purchase obligations, in the ordinary course of business, that include agreements for water treatment processes at some of its wells in a small number of its divisions. The 20 year term agreement provides for the use of treatment equipment and media used in the treatment process and are subject to adjustment based on changes in the Consumer Price Index. The future contractual cash obligations related to these agreements are as follows:

| 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|
| $ 1,157 | $ 1,007 | $ 1,028 | $ 1,048 | $ 1,069 | $ 6,623 |

Rent expense under operating leases, purchased water expense, and water treatment expenses under these agreements were as follows:

| | Years Ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Operating lease expense | $ 2,241 | $ 2,776 | $ 2,440 |
| Purchased water under long-term agreements | 8,558 | 13,955 | 13,718 |
| Water treatment expense under contractual agreement | 945 | 940 | 972 |

***Contingencies*** – The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of December 31, 2017, the aggregate amount of $18,961 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, Aqua America has insurance coverage for a number of these loss contingencies, and as of December 31, 2017, estimates that approximately $7,131 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets, net.

(In thousands of dollars, except per share amounts)

Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which the Company or any of its subsidiaries is a party or to which any of its properties is the subject that are material or are expected to have a material effect on the Company's financial position, results of operations or cash flows.

Additionally, the Company self-insures its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,451 and $1,770 at December 31, 2017 and 2016 and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

**Note 10 – *Long-term Debt and Loans Payable***

***Long-term Debt*** **–** The consolidated statements of capitalization provide a summary of long-term debt as of December 31, 2017 and 2016. The supplemental indentures with respect to specific issues of the first mortgage bonds restrict the ability of Aqua Pennsylvania and other operating subsidiaries of the Company to declare dividends, in cash or property, or repurchase or otherwise acquire the stock of these companies. Loan agreements for Aqua Pennsylvania and other operating subsidiaries of the Company have restrictions on minimum net assets. As of December 31, 2017, restrictions on the net assets of the Company were $1,443,473 of the total $1,957,621 in net assets. Included in this amount were restrictions on Aqua Pennsylvania's net assets of $1,090,062 of their total net assets of $1,528,172. As of December 31, 2017, $1,396,003 of Aqua Pennsylvania's retained earnings of $1,416,003 and $142,700 of the retained earnings of $189,000 of other subsidiaries were free of these restrictions. Some supplemental indentures also prohibit Aqua Pennsylvania and some other subsidiaries of the Company from making loans to, or purchasing the stock of, the Company.

Sinking fund payments are required by the terms of specific issues of long-term debt. Excluding amounts due under the Company's revolving credit agreement, the future sinking fund payments and debt maturities of the Company's long-term debt are as follows:

| Interest Rate Range | 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter |
|---|---|---|---|---|---|---|
| 0.00% to 0.99% | $ 464 | $ 464 | $ 463 | $ 464 | $ 466 | $ 1,875 |
| 1.00% to 1.99% | 51,327 | 1,222 | 1,158 | 910 | 888 | 7,409 |
| 2.00% to 2.99% | 1,766 | 51,813 | 1,863 | 1,913 | 1,965 | 9,934 |
| 3.00% to 3.99% | 2,807 | 2,758 | 2,555 | 2,594 | 2,541 | 706,977 |
| 4.00% to 4.99% | 11,195 | 50,404 | 16,616 | 15,297 | 237 | 660,650 |
| 5.00% to 5.99% | 20,595 | 36,126 | 18,120 | 8,402 | 17,979 | 256,783 |
| 6.00% to 6.99% | 13,000 | - | - | - | - | 31,000 |
| 7.00% to 7.99% | 484 | 569 | 615 | 666 | 358 | 29,643 |
| 8.00% to 8.99% | 431 | 566 | 613 | 1,665 | 721 | 2,096 |
| 9.00% to 9.99% | 5,700 | 700 | 2,400 | 4,900 | - | 12,000 |
| 10.00% to 10.99% | 6,000 | - | - | - | - | - |
| Total | $ 113,769 | $ 144,622 | $ 44,403 | $ 36,811 | $ 25,155 | $ 1,718,367 |

In October 2017, Aqua Pennsylvania issued $75,000 of first mortgage bonds, of which $35,000 is due in 2054, $20,000 is due in 2055, and $20,000 is due in 2057 with interest rates of 4.06%, 4.07%, and 4.09%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

(In thousands of dollars, except per share amounts)

In July 2017 Aqua Illinois issued $100,000 of first mortgage bonds consisting of the following:

| Amount | Interest Rate | Maturity |
|---|---|---|
| $25,000 | 3.64% | 2032 |
| $6,000 | 3.89% | 2037 |
| $15,000 | 3.90% | 2038 |
| $10,000 | 4.18% | 2047 |
| $22,000 | 4.22% | 2049 |
| $22,000 | 4.24% | 2050 |

The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In July 2017, Aqua Pennsylvania issued $80,000 of first mortgage bonds, of which $40,000 is due in 2055 and $40,000 is due in 2057 with interest rates of 4.04% and 4.06%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In December 2016, Aqua Pennsylvania issued $85,000 of first mortgage bonds, of which $25,000 is due in 2051 and $60,000 is due in 2056 with interest rates of 3.85% and 3.95%, respectively. In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In November 2016, the Company issued $125,000 of senior notes, of which $35,000 is due in 2031, $30,000 is due in 2034, $25,000 is due in 2035, $10,000 is due in 2038, and $25,000 is due in 2041 with interest rates of 3.01%, 3.19%, 3.25%, 3.41%, and 3.57%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

As of December 31, 2017 and 2016, the Company did not have any funds restricted for construction activity.

The weighted average cost of long-term debt at December 31, 2017 and 2016 was 4.29% and 4.23%, respectively. The weighted average cost of fixed rate long-term debt at December 31, 2017 and 2016 was 4.36% and 4.26%, respectively.

The Company has a five-year $250,000 unsecured revolving credit facility, with four banks that expires in February 2021. This facility includes a $15,000 sublimit for daily demand loans. Funds borrowed under this facility are classified as long-term debt and are used to provide working capital as well as support for letters of credit for insurance policies and other financing arrangements. As of December 31, 2017, the Company has the following sublimits and available capacity under the credit facility: $50,000 letter of credit sublimit, $30,189 of letters of credit available capacity, $0 borrowed under the swing-line commitment, and $60,000 of funds borrowed under the agreement. Interest under this facility is based at the Company's option, on the prime rate, an adjusted Euro-Rate, an adjusted federal funds rate or at rates offered by the banks. A facility fee is charged on the total commitment amount of the agreement. Under this facility the average cost of borrowings was 1.91% and 1.54%, and the average borrowing was $48,333 and $89,374, during 2017 and 2016, respectively.

The Company is obligated to comply with covenants under some of its loan and debt agreements. These covenants contain a number of restrictive financial covenants, which among other things limit, subject to specific exceptions, the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2017, the Company was in compliance with its debt covenants under its loan and debt agreements. Failure to comply with the Company's debt covenants could result in an event of default, which could result in the Company being required to repay or finance its borrowings before their due date, possibly limiting the Company's future borrowings, and increasing its borrowing costs.

***Loans Payable –*** In November 2017, Aqua Pennsylvania renewed its $100,000 364-day unsecured revolving credit facility with four banks. The funds borrowed under this agreement are classified as loans payable and used to provide working capital. As of December 31, 2017 and 2016, funds borrowed under the agreement were $3,650 and $5,545, respectively. Interest under this facility is based, at the borrower's option, on the prime rate, an adjusted federal funds rate, an adjusted London Interbank Offered Rate corresponding to the interest period selected, an adjusted Euro-Rate corresponding to the interest period selected or at rates offered by the banks. This agreement restricts short-term borrowings of Aqua Pennsylvania. A commitment fee of 0.05% is charged on the total commitment amount of Aqua Pennsylvania's revolving credit agreement. The average cost of borrowing under the facility was 1.78% and 1.18%, and the average borrowing was $21,913 and $29,760, during 2017 and 2016, respectively. The maximum amount outstanding at the end of any one month was $66,466 and $52,905 in 2017 and 2016, respectively.

At December 31, 2017 and 2016, the Company had other combined short-term lines of credit of $35,500. Funds borrowed under these lines are classified as loans payable and are used to provide working capital. As of December 31, 2017 and 2016, funds borrowed under the short-term lines of credit were $0 and $990, respectively. The average borrowing under the lines was $908 and $2,944 during 2017 and 2016, respectively. The maximum amount outstanding at the end of any one month was $990 in 2017 and $9,440 in 2016, respectively. Interest under the lines is based at the Company's option, depending on the line, on the prime rate, an adjusted Euro-Rate, an adjusted federal funds rate or at rates offered by the banks. The average cost of borrowings under all lines during 2017 and 2016 was 1.81% and 1.24%, respectively.

***Interest Income and Expense–*** Interest income of $202, $217, and $272 was netted against interest expense on the consolidated statement of net income for the years ended December 31, 2017, 2016, and 2015, respectively. The total interest cost was $88,543, $80,811, and $76,808 in 2017, 2016, and 2015, including amounts capitalized for borrowed funds of $3,578, $2,220, and $1,598, respectively.

**Note 11 – *Fair Value of Financial Instruments***

Financial instruments are recorded at carrying value in the financial statements and approximate fair value, with the exception of long-term debt, as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of cash and cash equivalents, which is comprised of uninvested cash, is determined based on level 1 methods and assumptions. As of December 31, 2017 and 2016, the carrying amounts of the Company's cash and cash equivalents were $4,204 and $3,763, which equates to their fair value. The fair value of "available-for-sale" securities to fund our deferred compensation and non-qualified pension plan liabilities, which represents mutual and money market funds, is determined based on quoted market prices from active markets utilizing level 1 methods and assumptions. As of December 31, 2017 and 2016, the carrying amount of these securities was $21,776 and $20,342. As of December 31, 2017 and 2016, the carrying amount of the Company's loans payable was $3,650 and $6,535, respectively, which equates to their estimated fair value.

(In thousands of dollars, except per share amounts)

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

| | December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Carrying amount | $ 2,143,127 | $ 1,910,633 |
| Estimated fair value | 2,262,785 | 2,018,933 |

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing level 2 methods and assumptions. The Company's customers' advances for construction have a carrying value of $93,186 and $91,843 at December 31, 2017 and 2016, respectively. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels and future rate increases. Portions of these non-interest bearing instruments are payable annually through 2027 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

**Note 12 – *Stockholders' Equity***

At December 31, 2017, the Company had 300,000,000 shares of common stock authorized; par value $0.50. Shares outstanding and treasury shares held were as follows:

| | December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Shares outstanding | 177,713,943 | 177,394,376 | 176,544,091 |
| Treasury shares | 2,986,308 | 2,916,969 | 2,819,569 |

At December 31, 2017, the Company had 1,770,819 shares of authorized but unissued Series Preferred Stock, $1.00 par value.

The Company has a universal shelf registration statement with the SEC to allow for the potential future sale by the Company, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities and other securities specified therein at indeterminate prices. This registration statement expires in February 2018, and we intend to file a new three-year universal shelf registration statement.

In 2015, the Company filed a registration statement with the SEC which permits the offering, from time to time, of an aggregate of $500,000 in shares of common stock and shares of preferred stock in connection with acquisitions. During 2016, 439,943 shares of common stock totaling $12,845 were issued by the Company to acquire a water utility system. The balance remaining available for use under the acquisition shelf registration as of December 31, 2017 is $487,155.

The form and terms of any securities issued under the universal shelf registration statement and the acquisition shelf registration statement will be determined at the time of issuance.

The Company has a Dividend Reinvestment and Direct Stock Purchase Plan ("Plan") that allows reinvested dividends to be used to purchase shares of common stock at a five percent discount from the current market value. Under the direct stock purchase program, shares are purchased by investors at a five percent discount from the market price. The shares issued under the Plan are either shares purchased by the Company's transfer agent in the open-market or original issue shares. In 2017, 2016, and 2015, 447,753 484,645, and 535,439 shares of the Company were purchased under the dividend reinvestment portion of the Plan by the Company's transfer agent in the open-market for $15,168, $14,916, and $14,380, respectively. During 2017 and 2016, under the dividend reinvestment portion of the Plan, 45,121 and 47,478 original issue shares of common stock were sold, providing the Company with proceeds of $1,453 and $1,388, respectively.

In December 2014, the Company's Board of Directors authorized a share buyback program, commencing in 2015, of up to 1,000,000 shares to minimize share dilution through timely and orderly share repurchases. In December 2015, the Company's Board of Directors added 400,000 shares to this program. The specific timing, amount and other terms of repurchases depend on market conditions, regulatory requirements and other factors. In 2016, we did not repurchase any shares of our common stock in the open market. In 2015, we repurchased 805,000 shares of the Company's common stock in the open market for $20,502. In 2014, we repurchased 560,000 shares of our common stock in the open market for $13,280. This program expired on December 31, 2016.

The Company's accumulated other comprehensive income is reported in the stockholders' equity section of the consolidated balance sheets, the consolidated statements of equity, and the related components of other comprehensive income are reported in the consolidated statements of comprehensive income. The Company reports its unrealized gains or losses on investments as other comprehensive income and accumulated other comprehensive income. The Company recorded a regulatory asset for its underfunded status of its pension and other post-retirement benefit plans that would otherwise be charged to other comprehensive income, as it anticipates recovery of its costs through customer rates.

**Note 13 – *Net Income per Common Share and Equity per Common Share***

Basic net income per share is based on the weighted average number of common shares outstanding. Diluted net income per share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per share. The dilutive effect of stock-based compensation is calculated by using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per share:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Average common shares outstanding during the period for basic computation | 177,612 | 177,273 | 176,788 |
| Effect of dilutive securities: | | | |
| Employee stock-based compensation | 563 | 573 | 729 |
| Average common shares outstanding during the period for diluted computation | 178,175 | 177,846 | 177,517 |

For the years ended December 31, 2017, 2016, and 2015, all of the Company's employee stock options were included in the calculation of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods.

Equity per common share was $11.02 and $10.43 at December 31, 2017 and 2016, respectively. These amounts were computed by dividing Aqua America stockholders' equity by the number of shares of common stock outstanding at the end of each year.

**Note 14 – *Employee Stock and Incentive Plan***

Under the Company's 2009 Omnibus Equity Compensation Plan, as amended as of February 27, 2014 (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. No further grants may be made under the 2004 Plan. The 2009 Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the 2009 Plan may be issued pursuant to stock award, stock units and other stock-based awards, subject to adjustment as provided in the 2009 Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the 2009 Plan for more than 500,000 shares of common stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the 2009 Plan. Awards to employees and consultants under the 2009 Plan are made by a committee of the Board of Directors, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At December 31, 2017, 3,720,624 shares underlying stock-based compensation awards were still available for grant under the 2009 Plan.

(In thousands of dollars, except per share amounts)

The recording of compensation expense for share-based compensation has no impact on net cash flows and results in the reclassification on the consolidated cash flow statements of related tax benefits from cash flows from operating activities to cash flows from financing activities to the extent these tax benefits exceed the associated compensation cost.

***Performance Share Units*** – During 2017, 2016, and 2015, the Company granted performance share units. A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three year performance period specified in the grant, subject to exceptions through the respective vesting periods, generally three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals.

The performance goals of the 2017, 2016, and 2015 PSU grants consisted of the following metrics:

| | Performance Grant of: | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Metric 1 – Company's total shareholder return ("TSR") compared to the TSR for a specific peer group of investor-owned water companies (a market-based condition) | 26.47% | 27.5% | 30% |
| Metric 2 – Company's TSR compared to the TSR for the companies listed in the Standard and Poor's Midcap Utilities Index (a market-based condition) | 26.47% | 27.5% | 30% |
| Metric 3 – Achievement of a targeted cumulative level of rate base growth as a result of acquisitions (a performance-based condition) | 23.53% | - | - |
| Metric 4 – Achievement of targets for maintaining consolidated operations and maintenance expenses over the three year measurement period (a performance-based condition) | 23.53% | - | - |
| Metric 5 – Achievement of a targeted cumulative level of rate base growth as a result of acquisitions (a performance-based condition) | - | 25.0% | - |
| Metric 6 – Achievement of targets for maintaining consolidated operations and maintenance expenses over the three year measurement period (a performance-based condition) | - | 20.0% | - |
| Metric 7 – Maintaining an average ratio of operations and maintenance expenses as a percentage of revenues at Aqua Pennsylvania compared to a target average ratio for the three year performance period (a performance-based condition) | - | - | 20% |
| Metric 8 – Earning a cumulative total earnings before taxes for the Company's operations other than Aqua Pennsylvania for the three year performance period compared to a target (a performance-based condition) | - | - | 20% |

The following table provides the compensation expense and income tax benefit for PSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 4,351 | $ 3,823 | $ 4,419 |
| Income tax benefit | 1,766 | 1,552 | 1,796 |

(In thousands of dollars, except per share amounts)

The following table summarizes nonvested PSU transactions for the year ended December 31, 2017:

| | Number of Share Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested share units at beginning of period | 476,896 | $ 27.96 |
| Granted | 125,202 | 30.79 |
| Performance criteria adjustment | (33,502) | 28.14 |
| Forfeited | (22,664) | 28.68 |
| Share units vested in prior period and issued in current period | 32,400 | 25.31 |
| Share units issued | (125,999) | 36.37 |
| Nonvested share units at end of period | 452,333 | 26.16 |

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions associated with the PSUs using the Monte Carlo valuation method, which assesses the probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs associated with performance-based conditions was based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The fair value of each PSU grant is amortized into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on an estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows. The following table provides the assumptions used in the pricing model for the grant, the resulting grant date fair value of PSUs, and the intrinsic value and fair value of PSUs that vested during the year:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Expected term (years) | 3.0 | 3.0 | 3.0 |
| Risk-free interest rate | 1.49% | 0.91% | 1.03% |
| Expected volatility | 17.9% | 17.9% | 16.9% |
| Weighted average fair value of PSUs granted | $ 30.79 | $ 28.89 | $ 26.46 |
| Intrinsic value of vested PSUs | $ 3,926 | $ 5,912 | $ 7,964 |
| Fair value of vested PSUs | $ 3,207 | $ 5,104 | $ 6,416 |

As of December 31, 2017, $4,945 of unrecognized compensation costs related to PSUs is expected to be recognized over a weighted average period of approximately 1.7 years. The aggregate intrinsic value of PSUs as of December 31, 2017 was $18,114. The aggregate intrinsic value of PSUs is based on the number of nonvested share units and the market value of the Company's common stock as of the period end date.

(In thousands of dollars, except per share amounts)

***Restricted Stock Units*** – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock and is valued based on the fair market value of the Company's stock on the date of grant. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. In some cases, the right to receive the shares is subject to specific performance goals established at the time the grant is made. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation expense and income tax benefit for RSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 1,183 | $ 1,061 | $ 1,076 |
| Income tax benefit | 489 | 438 | 444 |

The following table summarizes nonvested RSU transactions for the year ended December 31, 2017:

| | Number of Stock Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock units at beginning of period | 109,273 | $ 28.48 |
| Granted | 41,293 | 30.37 |
| Stock units vested but not paid | (1,467) | 31.47 |
| Stock units vested and issued | (26,914) | 26.45 |
| Forfeited | (5,398) | 31.03 |
| Nonvested stock units at end of period | 116,787 | 29.46 |

The following table summarizes the value of RSUs:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Weighted average fair value of RSUs granted | $ 30.37 | $ 32.08 | $ 26.00 |
| Intrinsic value of vested RSUs | 896 | 805 | 2,327 |
| Fair value of vested RSUs | 751 | 605 | 1,904 |

As of December 31, 2017, $1,401 of unrecognized compensation costs related to RSUs is expected to be recognized over a weighted average period of approximately 1.7 years. The aggregate intrinsic value of RSUs as of December 31, 2017 was $4,582. The aggregate intrinsic value of RSUs is based on the number of nonvested stock units and the market value of the Company's common stock as of the period end date.

(In thousands of dollars, except per share amounts)

***Stock Options –*** A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire ten years from the grant date. The vesting of stock options granted in 2017 are subject to the achievement of the following performance goal: the Company achieves at least an adjusted return on equity equal to 150 basis points below the return on equity granted by the Pennsylvania Public Utility Commission during the Company's Pennsylvania subsidiary's last rate proceeding. The adjusted return on equity equals net income, excluding net income or loss from acquisitions which have not yet been incorporated into a rate application as of the last year end, divided by equity which excludes equity applicable to acquisitions which are not yet incorporated in a rate application during the award period.

The fair value of each stock option is amortized into compensation expense using the graded vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides compensation expense and income tax benefit for stock options:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expenses | $ 245 | $ - | $ - |
| Income tax benefit | 208 | 260 | 193 |

There were no stock options granted during the years ended December 31, 2016, and 2015.

Options under the plans were issued at the closing market price of the stock on the day of the grant.
The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model, which relies on assumptions that require management's judgment. The following table provides the assumptions used in the pricing model for grants and the resulting grant date fair value of stock options granted in the period reported:

| | Year ended December 31, |
|---|---|
| | 2017 |
| Expected term (years) | 5.45 |
| Risk-free interest rate | 2.01% |
| Expected volatility | 17.7% |
| Dividend yield | 2.51% |
| Grant date fair value per option | $ 4.07 |

The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense.

(In thousands of dollars, except per share amounts)

The following table summarizes stock option transactions for the year ended December 31, 2017:

| | Shares | Weighted Average Exercise Price | Weighted Average Remaining Life (years) | Aggregate Intrinsic Value |
|---|---|---|---|---|
| Outstanding, beginning of year | 427,335 | $ 15.55 | | |
| Granted | 120,127 | 30.47 | | |
| Forfeited | (5,191) | 30.47 | | |
| Expired / Cancelled | (2,812) | 14.26 | | |
| Exercised | (174,527) | 16.46 | | |
| Outstanding at end of year | 364,932 | $ 19.83 | 3.7 | $ 7,081 |
| | | | | |
| Exercisable at end of year | 249,996 | $ 14.93 | 1.2 | $ 6,074 |

The intrinsic value of stock options is the amount by which the market price of the stock on a given date, such as at the end of the period or on the day of exercise, exceeded the closing market price of stock on the date of grant. The following table summarizes the intrinsic value of stock options exercised:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Intrinsic value of options exercised | $ 2,767 | $ 2,945 | $ 4,154 |

The following table summarizes information about the options outstanding and options exercisable as of December 31, 2017:

| | Options Outstanding | | | Options Exercisable | |
|---|---|---|---|---|---|
| | Shares | Weighted Average Remaining Life (years) | Weighted Average Exercise Price | Shares | Weighted Average Exercise Price |
| Range of prices: | | | | | |
| $13.00 - 14.99 | 89,770 | 2.1 | $ 13.72 | 89,770 | $ 13.72 |
| $15.00 - 15.99 | 101,167 | 1.2 | 15.30 | 101,167 | 15.30 |
| $16.00 - 16.99 | 59,059 | 0.2 | 16.15 | 59,059 | 16.15 |
| $17.00 - 30.99 | 114,936 | 9.1 | 30.47 | - | - |
| | 364,932 | 3.7 | 19.83 | 249,996 | 14.93 |

As of December 31, 2017, there was $223 of total unrecognized compensation costs related to nonvested stock options granted under the plans. The cost is expected to be recognized over a weighted average period of approximately 1.5 years.

***Restricted Stock*** – Restricted stock awards provide the grantee with the rights of a shareholder, including the right to receive dividends and to vote such shares, but not the right to sell or otherwise transfer the shares during the restriction period. Restricted stock awards result in compensation expense which is equal to the fair market value of the stock on the date of the grant and is amortized ratably over the restriction period. The Company expects forfeitures of restricted stock to be de minimis.

(In thousands of dollars, except per share amounts)

The following table summarizes the value of restricted stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Intrinsic value of restricted stock awards vested | $ - | $ - | $ 860 |
| Fair value of restricted stock awards vested | - | - | 553 |

As of December 31, 2017, there were no unrecognized compensation costs related to nonvested restricted stock as restricted stock was fully amortized in 2014. Additionally, there was no restricted stock granted during the years ended December 31, 2017, 2016, and 2015.

***Stock Awards*** – The following table provides compensation costs for stock-based compensation related to stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Stock-based compensation within operations and maintenance expense | $ 563 | $ 506 | $ 365 |
| Income tax benefit | 233 | 210 | 151 |

The following table summarizes the value of stock awards:

| | Years ended December 31, | | |
|---|---|---|---|
| | 2017 | 2016 | 2015 |
| Intrinsic and fair value of stock awards vested | $ 563 | $ 506 | $ 365 |
| Weighted average fair value of stock awards granted | 34.42 | 31.87 | 26.44 |

The following table summarizes stock award transactions for year ended December 31, 2017:

| | Number of Stock Awards | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock awards at beginning of period | - | $ - |
| Granted | 16,345 | 34.42 |
| Vested | (16,345) | 34.42 |
| Nonvested stock awards at end of period | - | - |

**Note 15 – *Pension Plans and Other Post-retirement Benefits***

The Company maintains a qualified, defined benefit pension plan that covers its full-time employees who were hired prior to April 1, 2003. Retirement benefits under the plan are generally based on the employee's total years of service and compensation during the last five years of employment. The Company's policy is to fund the plan annually at a level which is deductible for income tax purposes and which provides assets sufficient to meet its pension obligations over time. To offset some limitations imposed by the Internal Revenue Code with respect to payments under qualified plans, the Company has a non-qualified Supplemental Pension Benefit Plan for Salaried Employees in order to prevent some employees from being penalized by these limitations, and to provide certain retirement benefits based on employee's years of service and compensation. The Company also had non-qualified Supplemental Executive Retirement Plans, which were terminated in 2016, for some current and retired employees. The net pension costs and obligations of the qualified and non-qualified plans are included in the tables which follow. Employees hired after April 1, 2003 may participate in a defined contribution plan that provides a Company matching contribution on amounts contributed by participants and an annual profit-sharing contribution based upon a percentage of the eligible participants' compensation.

Effective July 1, 2015, the Company added a permanent lump sum option to the form of benefit payments offered to participants of the qualified defined benefit pension plan upon retirement or termination. The plan paid $8,858 and $9,990 to participants who elected this option during 2017 and 2016.

In addition to providing pension benefits, the Company offers post-retirement benefits other than pensions to employees hired before April 1, 2003 and retiring with a minimum level of service. These benefits include continuation of medical and prescription drug benefits, or a cash contribution toward such benefits, for eligible retirees and life insurance benefits for eligible retirees. The Company funds these benefits through various trust accounts. The benefits of retired officers and other eligible retirees are paid by the Company and not from plan assets due to limitations imposed by the Internal Revenue Code.

In 2016, the Company recognized a settlement loss of $2,895, which results from lump sum payments from the non-qualified plans exceeding the threshold of service and interest cost for the period. A settlement loss is the recognition of unrecognized pension benefit costs that would have been incurred in subsequent periods. The Company recorded this settlement loss as a regulatory asset, as it is probable of recovery in future rates, which will be amortized into pension benefit costs.

(In thousands of dollars, except per share amounts)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

| | Pension Benefits | Other Post-retirement Benefits |
|---|---|---|
| Years: | | |
| 2018 | $ 20,516 | $ 2,249 |
| 2019 | 20,462 | 2,553 |
| 2020 | 21,580 | 2,777 |
| 2021 | 20,674 | 2,957 |
| 2022 | 21,538 | 3,177 |
| 2023-2027 | 106,397 | 18,764 |

The changes in the benefit obligation and fair value of plan assets, the funded status of the plans and the assumptions used in the measurement of the company's benefit obligation are as follows:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Change in benefit obligation: | | | | |

| Net liability recognized at December 31, | $ 50,626 | $ 65,812 | $ 28,210 | $ 23,227 |

(In thousands of dollars, except per share amounts)

The following table provides the net liability recognized on the consolidated balance sheets at December 31,:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Current liability | $ 396 | $ 613 | $ - | $ - |
| Noncurrent liability | 50,230 | 65,199 | 28,210 | 23,227 |
| Net liability recognized | $ 50,626 | $ 65,812 | $ 28,210 | $ 23,227 |

At December 31, 2017 and 2016, the Company's pension plans had benefit obligations in excess of its plan assets. The following tables provide the projected benefit obligation, the accumulated benefit obligation and fair market value of the plan assets as of December 31,:

| | Projected Benefit Obligation Exceeds the Fair Value of Plan Assets | |
|---|---|---|
| | 2017 | 2016 |
| Projected benefit obligation | $ 320,979 | $ 308,172 |
| Fair value of plan assets | 270,353 | 242,360 |

| | Accumulated Benefit Obligation Exceeds the Fair Value of Plan Assets | |
|---|---|---|
| | 2017 | 2016 |
| Accumulated benefit obligation | $ 301,473 | $ 291,889 |
| Fair value of plan assets | 270,353 | 242,360 |

The following table provides the components of net periodic benefit costs for the years ended December 31,:

| | Pension Benefits | | | Other Post-retirement Benefits | | |
|---|---|---|---|---|---|---|
| | 2017 | 2016 | 2015 | 2017 | 2016 | 2015 |
| Service cost | $ 3,174 | $ 3,179 | $ 3,349 | $ 1,020 | $ 1,014 | $ 1,224 |
| Interest cost | 12,434 | 13,038 | 12,955 | 2,947 | 2,927 | 2,802 |
| Expected return on plan assets | (17,077) | (16,910) | (18,702) | (2,589) | (2,647) | (2,923) |
| Amortization of prior service cost (credit) | 579 | 578 | 174 | (509) | (549) | (687) |
| Amortization of actuarial loss | 8,003 | 7,153 | 5,993 | 1,165 | 926 | 1,282 |
| Settlement loss | - | 2,895 | - | - | - | - |
| Special termination benefits | - | 302 | - | - | - | - |
| Net periodic benefit cost | $ 7,113 | $ 10,235 | $ 3,769 | $ 2,034 | $ 1,671 | $ 1,698 |

The Company records the underfunded status of its pension and other post-retirement benefit plans on its consolidated balance sheets and records a regulatory asset for these costs that would otherwise be charged to stockholders' equity, as the Company anticipates recoverability of the costs through customer rates to be probable. The Company's pension and other post-retirement benefit plans were underfunded at December 31, 2017 and 2016. Changes in the plans' funded status will affect the assets and liabilities recorded on the balance sheet. Due to the Company's regulatory treatment, the recognition of the funded status is recorded as a regulatory asset pursuant to the FASB's accounting guidance for regulated operations.

(In thousands of dollars, except per share amounts)

The following table provides the amounts recognized in regulatory assets that have not been recognized as components of net periodic benefit cost as of December 31,:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Net actuarial loss | $ 86,750 | $ 92,436 | $ 15,724 | $ 15,441 |
| Prior service cost (credit) | 3,262 | 3,841 | (1,869) | (2,378) |
| Total recognized in regulatory assets | $ 90,012 | $ 96,277 | $ 13,855 | $ 13,063 |

The following table provides the estimated net actuarial loss and prior service cost for the Company's pension plans that will be amortized from regulatory asset into net periodic benefit cost for the year ending December 31, 2018:

| | Pension Benefits | Other Post-retirement Benefits |
|---|---|---|
| Net actuarial loss | $ 7,291 | $ 1,182 |
| Prior service cost (credit) | 527 | (509) |

Accounting for pensions and other post-retirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from the Company's actuarial consultant who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefit expense that the Company recognizes.

The significant assumptions related to the Company's benefit obligations are as follows:

| | Pension Benefits | | Other Post-retirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Weighted Average Assumptions Used to Determine Benefit Obligations as of December 31, | | | | |
| Discount rate | 3.66% | 4.13% | 3.73% | 4.25% |
| Rate of compensation increase | 3.0-4.0% | 3.0-4.0% | n/a | n/a |
| Assumed Health Care Cost Trend Rates Used to Determine Benefit Obligations as of December 31, | | | | |
| Health care cost trend rate | n/a | n/a | 7.0% | 6.6% |
| Rate to which the cost trend is assumed to decline (the ultimate trend rate) | n/a | n/a | 5.0% | 5.0% |
| Year that the rate reaches the ultimate trend rate | n/a | n/a | 2022 | 2020 |

*n/a – Assumption is not applicable.*

(In thousands of dollars, except per share amounts)

The significant assumptions related to the Company's net periodic benefit costs are as follows:

| | Pension Benefits | | | Other Post-retirement Benefits | | |
|---|---|---|---|---|---|---|
| | 2017 | 2016 | 2015 | 2017 | 2016 | 2015 |
| Weighted Average Assumptions Used to Determine Net Periodic Benefit Costs for Years Ended December 31, | | | | | | |
| Discount rate | 4.13% | 4.48% | 4.20% | 4.25% | 4.60% | 4.17% |
| Expected return on plan assets | 7.00% | 7.25% | 7.50% | 4.67-7.00% | 4.83-7.25% | 5.00-7.50% |
| Rate of compensation increase | 3.0-4.0% | 3.0-4.0% | 3.0-4.0% | n/a | n/a | n/a |
| Assumed Health Care Cost Trend Rates Used to Determine Net Periodic Benefit Costs for Years Ended December 31, | | | | | | |
| Health care cost trend rate | n/a | n/a | n/a | 6.6% | 7.0% | 7.0% |
| Rate to which the cost trend is assumed to decline (the ultimate trend rate) | n/a | n/a | n/a | 5.0% | 5.0% | 5.0% |
| Year that the rate reaches the ultimate trend rate | n/a | n/a | n/a | 2021 | 2021 | 2019 |

*n/a – Assumption is not applicable.*

Assumed health-care trend rates have a significant effect on the expense and liabilities for other post-retirement benefit plans. The health care trend rate is based on historical rates and expected market conditions. A one-percentage point change in the assumed health-care cost trend rates would have the following effects:

| | 1-Percentage-Point Increase | 1-Percentage-Point Decrease |
|---|---|---|
| Effect on the health-care component of the accrued other post-retirement benefit obligation | $ 4,797 | $ (4,369) |
| Effect on aggregate service and interest cost components of net periodic post-retirement health-care benefit cost | $ 277 | $ (244) |

The Company's discount rate assumption, which is utilized to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds, all of which were noncallable (or callable with make-whole provisions), and have at least $50,000 in outstanding value. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the plan's benefit payments. The Company's pension expense and liability (benefit obligations) increases as the discount rate is reduced.

The Company's expected return on plan assets is determined by evaluating the asset class return expectations with its advisors as well as actual, long-term, historical results of our asset returns. The Company's market related value of plan assets is equal to the fair value of the plan's assets as of the last day of its fiscal year, and is a determinant for the expected return on plan assets which is a component of post-retirement benefits expense. The Company's pension expense increases as the expected return on plan assets decreases. For 2017, the Company used a 7.00% expected return on plan assets assumption which will decrease to 6.75% for 2018. The Company believes its actual long-term asset allocation on average will approximate the targeted allocation. The Company's investment strategy is to earn a reasonable rate of return while maintaining risk at acceptable levels. Risk is managed through fixed income investments to manage interest rate exposures that impact the valuation of liabilities and through the diversification of investments across and within various asset categories. Investment returns are compared to a total plan benchmark constructed by applying the plan's asset allocation target weightings to passive index returns representative of the respective asset classes in which the plan invests. The Retirement and Employee Benefits Committee meets quarterly to review plan investments and management monitors investment performance quarterly through a performance report prepared by an external consulting firm.

(In thousands of dollars, except per share amounts)

The Company's pension plan asset allocation and the target allocation by asset class are as follows:

| | Target Allocation | Percentage of Plan Assets at December 31, 2017 |
|---|---|---|
| Return seeking assets | 50 to 70% | 64% |
| Liability hedging assets | 30 to 50% | 36% |
| Total | 100% | 100% |

| | Target Allocation | Percentage of Plan Assets at December 31, 2016 |
|---|---|---|
| Domestic equities | 25 to 75% | 65% |
| International equities | 0 to 10% | 6% |
| Fixed income | 25 to 50% | 19% |
| Alternative investments | 0 to 5% | 2% |
| Cash and cash equivalents | 0 to 20% | 8% |
| Total | 100% | 100% |

The fair value of the Company's pension plans' assets at December 31, 2017 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Assets measured at NAV (a) | Total |
|---|---|---|---|---|---|
| Common stock | $ 26,902 | $ - | $ - | $ - | $ 26,902 |
| Return seeking assets: | | | | | |
| Global equities | - | - | - | 66,281 | 66,281 |
| Real estate securities | - | - | - | 14,110 | 14,110 |
| Hedge / diversifying strategies | - | - | - | 38,143 | 38,143 |
| Credit | - | - | - | 28,395 | 28,395 |
| Liability hedging assets | - | - | - | 91,872 | 91,872 |
| Cash and cash equivalents | 4,650 | - | - | - | 4,650 |
| Total pension assets | $ 31,552 | $ - | $ - | $ 238,801 | $ 270,353 |

(a) Assets that are measured at fair value using the NAV per share practical expedient have not been classified in the fair value hierarchy.

(In thousands of dollars, except per share amounts)

The fair value of the Company’s pension plans’ assets at December 31, 2016 by asset class are as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|---|---|---|---|
| Domestic equities: | | | | |
| Common stocks | $ 152,740 | $ - | $ - | $ 152,740 |
| Mutual funds | 3,668 | - | - | 3,668 |
| International equities | 13,813 | - | - | 13,813 |
| Fixed income: | | | | |
| U.S. Treasury and government agency bonds | - | 11,170 | - | 11,170 |

| Total other post-retirement assets | $ 25,545 | $ 20,540 | $ - | $ 46,085 |

***Valuation Techniques Used to Determine Fair Value***

- *Common Stocks* - Investments in common stocks are valued using unadjusted quoted prices obtained from active markets.
- *Return Seeking Assets* – Investments in return seeking assets consists of the following:
  - Global equities, which consist of common and preferred shares of stock, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or commingled fund vehicles, consisting of such securities valued using NAV, which are not classified within the fair value hierarchy.
  - Real estate securities, which consist of securities, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or for real estate commingle fund vehicles that are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.

  - Hedge / diversifying strategies, which consist of a multi-manager fund vehicle having underlying exposures that collectively seek to provide low correlation of return to equity and fixed income markets, thereby offering diversification. As a multi-manager fund investment, NAV is derived from underlying manager NAVs, which are derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
  - Credit, which consist of certain opportunistic, return-oriented credits which primarily include below investment grade bonds (i.e. high yield bonds), bank loans, and securitized debt. Credits are valued using the NAV per fund share, derived from either quoted prices in active markets of the underlying securities, or less active markets, or quotes of similar assets, and are not classified within the fair value hierarchy.
- *Liability Hedging Assets* – Investments in liability hedging assets consist of funds investing in high-quality fixed income (i.e. U.S. Treasury securities and government bonds), and for funds for which market quotations are readily available, are valued at the last reported closing price on the primary market or exchange on which they are traded. Funds for which market quotations are not readily available, are valued using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
- *Cash and Cash Equivalents* – Investments in cash and cash equivalents are comprised of both uninvested cash and money market funds. The uninvested cash is valued based on its carrying value, and the money market funds are valued utilizing the net asset value per unit based on the fair value of the underlying assets as determined by the fund's investment managers.
- *Mutual Funds* – Investments in mutual funds which consist of either equity or fixed income investments are valued using the net asset value per unit as obtained from quoted market prices from active markets.
- *International Equities* – Investments in international equities are valued using unadjusted quoted prices obtained from active markets.
- *Fixed Income* – Investments in fixed income that comprise U.S. Treasury and government agency bonds, and corporate and foreign bonds are valued utilizing pricing models that incorporate available trade, bid, and other market information to value the fixed income securities.
- *Alternative Investments* – Investments in alternative investments are comprised of either real estate funds, real estate investment trusts, or commodity funds, and are valued using unadjusted quoted prices obtained from active markets.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and the Company's funding policy, during 2018 our pension contribution is expected to be $12,484.

The Company has a 401(k) savings plan, which is a defined contribution plan and covers substantially all employees. The Company makes matching contributions that are based on a percentage of an employee's contribution, subject to specific limitations, as well as, non-discretionary contributions based on eligible hourly wages for certain union employees, discretionary year-end contributions based on an employee's eligible compensation, and employer profit sharing contributions. Participants may diversify their Company matching account balances into other investments offered under the 401(k) savings plan. The Company's contributions, which are recorded as compensation expense, were $5,374, $4,988, and $5,001, for the years ended December 31, 2017, 2016, and 2015, respectively.

**Note 16 – *Water and Wastewater Rates***

On June 7, 2012, Aqua Pennsylvania reached a settlement agreement in its rate filing with the Pennsylvania Public Utility Commission, which in addition to a water rate increase, provided for a reduction in current income tax expense as a result of the recognition of qualifying income tax benefits upon Aqua Pennsylvania changing its tax accounting method to permit the expensing of qualifying utility asset improvement costs that historically have been capitalized and depreciated for book and tax purposes. In December 2012, Aqua Pennsylvania implemented this change which provides for the flow-through of income tax benefits that resulted in a substantial reduction in income tax expense and greater net income and cash flow. This change allowed Aqua Pennsylvania to suspend its water Distribution System Improvement Charges in 2013 and lengthen the amount of time until the next Aqua Pennsylvania rate case. Beginning on October 1, 2017, Aqua Pennsylvania initiated a water infrastructure rehabilitation surcharge for the capital invested since the last rate proceeding and expects to file a base rate case in 2018.

The Company's operating subsidiaries were allowed rate increases totaling $7,558 in 2017, $3,434 in 2016, and $3,347 in 2015, represented by five, six, and four rate decisions, respectively. Revenues from these increases realized in the year of grant were approximately $6,343, $1,788, and $2,887 in 2017, 2016, and 2015, respectively.

Six states in which the Company operates permit water utilities, and in five states wastewater utilities, to add a surcharge to their water or wastewater bills to offset the additional depreciation and capital costs related to infrastructure system replacement and rehabilitation projects completed and placed into service between base rate filings. Currently, Pennsylvania, Illinois, Ohio, Indiana, New Jersey, and North Carolina allow for the use of this surcharge. The surcharge for infrastructure system replacements and rehabilitations is typically adjusted periodically based on additional qualified capital expenditures completed or anticipated in a future period, is capped as a percentage of base rates, generally at 5% to 12.75%, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. The surcharge for infrastructure system replacements and rehabilitations provided revenues in 2017, 2016, and 2015 of $10,255, $7,379, and $3,261, respectively.

**Note 17 – *Segment Information***

The Company has ten operating segments and one reportable segment. The Regulated segment, the Company's single reportable segment, is comprised of eight operating segments representing our water and wastewater regulated utility companies which are organized by the states where we provide water and wastewater services. These operating segments are aggregated into one reportable segment since each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment.

Two operating segments are included within the Other category below. These segments are not quantitatively significant and are comprised of Aqua Infrastructure and Aqua Resources. In addition to these segments, Other is comprised of other business activities not included in the reportable segment, including corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

(In thousands of dollars, except per share amounts)

The following table presents information about the Company's reportable segment:

| | 2017 | | | 2016 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other and Eliminations | Consolidated | Regulated | Other and Eliminations | Consolidated |
| Operating revenues | $ 804,905 | $ 4,620 | $ 809,525 | $ 800,107 | $ 19,768 | $ 819,875 |
| Operations and maintenance expense | 286,962 | 244 | 287,206 | 285,347 | 19,550 | 304,897 |

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

(a) Evaluation of Disclosure Controls and Procedures – Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this Annual Report are effective to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

(b) Management's Report on Internal Control Over Financial Reporting
Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In assessing the effectiveness of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework* (2013). As a result of management's assessment and based on the criteria in the framework, management has concluded that, as of December 31, 2017, the Company's internal control over financial reporting was effective.

(c) Attestation Report of the Registered Public Accounting Firm – The effectiveness of our internal control over financial reporting as of December 31, 2017 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

(d) Changes in Internal Control Over Financial Reporting – No change in our internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

None.

## PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

The information appearing in the sections captioned *Information Regarding Nominees and Directors*, *Corporate Governance – Code of Ethics*, *– Board and Board Committees*, and *Section 16(a) Beneficial Ownership Reporting Compliance* of the definitive Proxy Statement relating to our 2018, annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K (the "Form 10-K), is incorporated by reference herein.

See Note 1 - *Basis of Presentation*

The accompanying condensed notes are an integral part of these condensed financial statements.

Aqua America, Inc.

Notes to Condensed Parent Company Financial Statements

(In thousands of dollars)

**Note 1 – *Basis of Presentation*** – The accompanying condensed financial statements of Aqua America, Inc. (the "Parent") should be read in conjunction with the consolidated financial statements and notes thereto of Aqua America, Inc. and subsidiaries (collectively, the "Registrant") included in Part II, Item 8 of the Form 10-K. The Parent's significant accounting policies are consistent with those of the Registrant.

The Parent borrows from third parties and provides funds to its subsidiaries, in support of their operations. Amounts owed to the Parent for borrowings under this facility are reflected as inter-company receivables on the condensed balance sheets. The interest rate charged to the subsidiaries is sufficient to cover the Parent's interest costs under its associated borrowings.

As of December 31, 2017 and 2016, the Parent had a current accounts receivable – affiliates balance of $55,108 and $60,264. As of December 31, 2017 and 2016, the Parent had a notes receivable – affiliates balance of $329,738 and $345,149. The changes in these balances represent non-cash adjustments that are recorded through the Parent's investment in subsidiaries.

In the ordinary course of business, the Parent indemnifies a third-party for surety bonds issued on behalf of subsidiary companies, guarantees the performance of one of its regulated utilities in a jurisdiction that requires such guarantees, and guarantees several projects associated with the treatment of water in a jurisdiction.

**Note 2 – *Dividends from subsidiaries*** – Dividends in the amount of $51,100, $45,750, and $74,866 were paid to the Parent by its wholly-owned subsidiaries during the years ended December 31, 2017, 2016, and 2015, respectively.

**Note 3 – *Long-term debt*** – the Parent has long-term debt under unsecured note purchase agreements with investors in addition to its $250,000 revolving credit agreement. Excluding amounts due under the revolving credit agreement, the debt maturities of the Parent's long-term debt are as follows:

| Year | Debt Maturity |
|---|---|
| 2018 | $ 30,800 |
| 2019 | 50,000 |
| 2020 | 28,200 |
| 2021 | 17,250 |
| 2022 | 17,250 |
| Thereafter | 325,800 |

Exhibit 4.1.14.1

**SCHEDULE OF SUPPLEMENTAL INDENTURES SUBSTANTIALLY IDENTICAL TO FORM OF SUPPLEMENTAL INDENTURE DURING AND AFTER 2014**

In accordance with Instruction 2 to Item 601 of Regulation S-K, the Registrant has omitted filing the following Supplemental Indentures by and between Aqua Pennsylvania, Inc. and The Bank of New York Mellon Trust Company, N.A. because they are substantially identical in all material respects to the form of Supplemental Indenture filed as Exhibit 4.1.15 to Aqua America, Inc.'s Annual Report on Form 10-K for the fiscal year ended December 31, 2015:

1. Forty-ninth Supplemental Indenture, dated as of December 1, 2014
2. Fiftieth Supplemental Indenture, dated as of November 1, 2015
3. Fifty-first Supplemental Indenture, dated as of November 1, 2016
4. Fifty-second Supplemental Indenture, dated as of June 15, 2017

Exhibit 10.1.5

# FIRST AMENDMENT TO CREDIT AGREEMENT

THIS FIRST AMENDMENT TO CREDIT AGREEMENT is made as of this 16th day of November, 2017, by and among AQUA PENNSYLVANIA, INC., a Pennsylvania corporation ("Borrower"), the several banks which are parties to this Agreement (each a "Bank" and collectively, the "Banks") and PNC BANK, NATIONAL ASSOCIATION in its capacity as agent for the Banks (in such capacity, the "Agent").

## BACKGROUND

A. The Borrower, the Agent and the Banks are parties to an Amended and Restated Credit Agreement, dated as of November 17, 2016 (as heretofore amended, supplemented, modified, or restated, the "Credit Agreement"), pursuant to which the Banks have made available to the Borrower a revolving credit facility in an aggregate amount of $100,000,000 (the "Facility"). The loans under the Facility are evidenced by the Borrower's Notes to the Banks in the aggregate principal amount of $100,000,000.

B. The Borrower, the Agent and the Banks desire to extend the Termination Date of the Facility and modify certain other provisions of the Credit Agreement, all on the terms and subject to the conditions herein set forth.

NOW THEREFORE, the parties hereto, intending to be legally bound hereby, agree as follows:

## AGREEMENT

1. Terms. Capitalized terms used herein and not otherwise defined herein shall have the meanings given to such terms in the Credit Agreement.

2. Amendment to Credit Agreement. Effective on November 16, 2017 (the "Effective Date"), the Credit Agreement is hereby amended as follows:

(a) The definition of "Termination Date" in Section 1.1 is hereby amended and restated to read in full as follows:

> "Termination Date" : the earlier of (a) November 14, 2018 or any later date to which the Termination Date shall have been extended pursuant to subsection 2.8(d) hereof and (b) the date the Commitments are terminated as provided herein.

(b) Effective on the Effective Date, Schedule 3.13 of the Credit Agreement shall be updated and replaced by the corresponding Schedule 3.13 set forth in Exhibit A hereto.

3. Loan Documents. Except where the context clearly requires otherwise, all references to the Credit Agreement in any of the Loan Documents or any other document

delivered to the Banks or the Agent in connection therewith shall be to the Credit Agreement as amended by this Agreement.

4. Borrower's Ratification. The Borrower agrees that it has no defenses or set-offs against the Banks or the Agent or their respective officers, directors, employees, agents or attorneys, with respect to the Loan Documents, all of which are in full force and effect, and that all of the terms and conditions of the Loan Documents not inconsistent herewith shall remain in full force and effect unless and until modified or amended in writing in accordance with their terms. The Borrower hereby ratifies and confirms its obligations under the Loan Documents as amended hereby and agrees that the execution and delivery of this Agreement does not in any way diminish or invalidate any of its obligations thereunder.

5. Representations and Warranties. The Borrower hereby represents and warrants to the Agent and the Banks that:

(a) The representations and warranties made in the Credit Agreement are true and correct in all material respects as of the date hereof; provided, however, that for purposes of the representations in Section 3.1 thereof, the annual and quarterly financial information referred to in such Section shall be deemed to be the most recent such information furnished to each Bank;

(b) No Default or Event of Default under the Credit Agreement exists on the date hereof; and

(c) This Agreement has been duly authorized, executed and delivered so as to constitute the legal, valid and binding obligation of the Borrower, enforceable in accordance with its terms.

All of the above representations and warranties shall survive the making of this Agreement.

6. Conditions Precedent. The effectiveness of the amendments set forth herein is subject to the fulfillment, to the satisfaction of the Agent and its counsel, of the following conditions precedent on or before the Effective Date:

(a) The Agent shall have received, with copies or counterparts for each Bank as appropriate, the following, all of which shall be in form and substance satisfactory to the Agent and shall be duly completed and executed by the Borrower, the Agent and the Banks, as applicable:

(i) This Agreement;

(ii) Copies, certified by the Secretary or an Assistant Secretary of the Borrower as of a recent date, of resolutions of the board of directors of the Borrower in effect on the date hereof authorizing the execution, delivery and performance of this Agreement and the other documents and transactions contemplated hereby;

(iii) Copies, certified by its corporate secretary as of a recent date, of the articles of incorporation, certificate of formation, and by-laws of the Borrower as in effect, or a certificate stating that there have been no changes to any such documents since the most recent date, true and correct copies thereof were delivered to the Agent; and

(iv) Such additional documents, certificates and information as the Agent or the Banks may require pursuant to the terms hereof or otherwise reasonably request.

(b) After giving effect to this Agreement, the representations and warranties set forth in the Credit Agreement shall be true and correct in all material respects on and as of the date hereof; provided, however, that for purposes of the representations in Section 3.1 thereof, the annual and quarterly financial information referred to in such Section shall be deemed to be the most recent such information furnished to each Bank.

(c) No Default or Event of Default shall have occurred and be continuing as of the date hereof.

7. Miscellaneous.

(a) All terms, conditions, provisions and covenants in the Loan Documents and all other documents delivered to the Agent and the Banks in connection therewith shall remain unaltered and in full force and effect except as modified or amended hereby. To the extent that any term or provision of this Agreement is or may be deemed expressly inconsistent with any term or provision in any Loan Document or any other document executed in connection therewith, the terms and provisions hereof shall control.

(b) The execution, delivery and effectiveness of this Agreement shall neither operate as a waiver of any right, power or remedy of the Agent or the Banks under any of the Loan Documents nor constitute a waiver of any Default or Event of Default thereunder.

(c) In consideration of the Agent's and the Banks' agreement to amend the existing term loan facility, the Borrower hereby waives and releases the Agent and the Banks and their respective officers, attorneys, agents and employees from any liability, suit, damage, claim, loss or expense of any kind or failure whatsoever and howsoever arising that it ever had up until, or has as of, the date of this Agreement.

(d) This Agreement constitutes the entire agreement of the parties with respect to the subject matter hereof and supersedes all prior and contemporaneous understandings and agreements.

(e) In the event any provisions of this Agreement shall be held invalid or unenforceable by any court of competent jurisdiction, such holding shall not invalidate or render unenforceable any other provision hereof.

(f) This Agreement shall be governed by and construed according to the laws of the Commonwealth of Pennsylvania.

(g) This Agreement shall inure to the benefit of, and be binding upon, the parties hereto and their respective successors and assigns and may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

(h) The headings used in this Agreement are for convenience of reference only, do not form a part of this Agreement and shall not affect in any way the meaning or interpretation of this Agreement.

(i) This Agreement may be executed in one or more counterparts, each of which counterparts when executed and delivered shall be deemed to be an original, and all of which shall constitute one and the same instrument. Delivery of an executed counterpart of a signature page to this Agreement by facsimile or other electronic transmission will be effective as delivery of a manually executed counterpart hereof.

[signature pages follow]

IN WITNESS WHEREOF, the Borrower, the Agent and the Banks have caused this Agreement to be executed by their duly authorized officers as of the date first above written.

Exhibit A

Schedule 3.13
Environmental Matters

(See Attached)

Schedule 3.13

Environmental Matters

In its water treatment process, the Borrower uses chemicals, including chlorine, caustic soda and sodium chlorite, which are listed as hazardous substances.  These chemicals are, in all material respects, stored and used at the Borrower's plants and facilities in accordance with the Environmental Laws.

The Borrower operates a central laboratory at its Bryn Mawr facility for analysis of drinking water samples.  To perform required analyses, the Borrower maintains small quantities of solvents, reagents and chemical standards, some of which are listed as hazardous substances.  These materials, in all material respects, are stored and used in compliance with the Environmental Laws.

The handling and disposal of waste generated from water and wastewater treatment facilities is governed by federal and state laws and regulations.  A program is in place to monitor our facilities for compliance with regulatory requirements, and we are not aware of any significant environmental remediation costs necessary from our handling and disposal of waste material from our water and wastewater operations.

Exhibit 31.1

CERTIFICATION OF CHIEF EXECUTIVE OFFICER, PURSUANT TO RULE 13A-14(A) AS ADOPTED UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, Christopher H. Franklin, certify that:

1. I have reviewed this annual report on Form 10-K of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
    a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

CERTIFICATION OF CHIEF FINANCIAL OFFICER, PURSUANT TO RULE 13A-14(A) AS ADOPTED UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, David P. Smeltzer, certify that:

1. I have reviewed this annual report on Form 10-K of Aqua America, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

    a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

    b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

    c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

    d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

    a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

    b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

AQUA AMERICA, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(In thousands of dollars, except per share amounts)
(UNAUDITED)

**Note 1 – *Basis of Presentation***

The accompanying consolidated balance sheets and statements of capitalization of Aqua America, Inc. and subsidiaries (the "Company") at March 31, 2018, the consolidated statements of net income and comprehensive income for the three months ended March 31, 2018 and 2017 the consolidated statements of cash flow for the three months ended March 31, 2018 and 2017, and the consolidated statement of equity for the three months ended March 31, 2018 are unaudited, but reflect all adjustments, consisting of only normal recurring accruals, which are, in the opinion of management, necessary to present a fair statement of its consolidated financial position, consolidated changes in equity, consolidated results of operations, and consolidated cash flow for the periods presented. Because they cover interim periods, the statements and related notes to the financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2017. The results of operations for interim periods may not be indicative of the results that may be expected for the entire year. The December 31, 2017 consolidated balance sheet data presented herein was derived from the Company's December 31, 2017 audited consolidated financial statements, but does not include all disclosures and notes normally provided in annual financial statements. Certain prior period amounts have been reclassified to conform to the current period presentation in the consolidated statements of net income as a result of the adoption, in the first quarter of 2018, of the Financial Accounting Standards Board's ("FASB") accounting guidance on the presentation of net periodic pension and postretirement benefit cost (refer to Note 15 – *Recent Accounting Pronouncements*).

The preparation of financial statements often requires the selection of specific accounting methods and policies. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in its consolidated balance sheets, the revenues and expenses in its consolidated statements of net income, and the information that is contained in its summary of significant accounting policies and notes to consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that the Company includes currently in its consolidated financial statements, summary of significant accounting policies, and notes.

There have been no changes to the summary of significant accounting policies, other than as described in Note 2 – *Revenue Recognition* as a result of the adoption of a new accounting pronouncement adopted on January 1, 2018, previously identified in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

(In thousands of dollars, except per share amounts)

**Note 2 – *Revenue Recognition***

The Company recognizes revenue as water and wastewater services are provided to our customers, which happens over time as the service is delivered and the performance obligation is satisfied. The Company's utility revenues recognized in an accounting period include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the last billing to the end of the accounting period. Unbilled amounts are calculated by deriving estimates based on average usage of the prior month. The Company's actual results could differ from these estimates, which would result in operating revenues being adjusted in the period that the revision to our estimates is determined. Unbilled amounts are included in accounts receivable and unbilled revenues, net on the consolidated balance sheet.

Generally, payment is due within 30 days once a bill is issued to a customer. Sales tax and other taxes we collect on behalf of government authorities, concurrent with our revenue-producing activities, are primarily excluded from revenue. The Company has determined that its revenue recognition is not materially different under the FASB's new accounting standard for revenue from contracts with customer, and has not made any changes to our accounting policy. The Company's revenues are being reported identical to how they were reported under the FASB's former accounting standard for revenue recognition. The following table presents our revenues disaggregated by major source and customer class:

| | Three Months Ended March 31,2018 | | |
|---|---|---|---|
| | Water Revenues | Wastewater Revenues | Other Revenues |
| Regulated: | | | |
| Residential | $ 113,837 | $ 17,532 | $ - |
| Commercial | 30,342 | 2,888 | - |
| Fire protection | 7,938 | - | - |
| Industrial | 6,360 | 463 | - |
| Other water | 11,021 | - | - |
| Other wastewater | - | 791 | - |
| Other utility | - | - | 2,335 |
| Regulated segment total | 169,498 | 21,674 | 2,335 |
| Other and eliminations | - | - | 840 |
| Consolidated | $ 169,498 | $ 21,674 | $ 3,175 |

***Regulated Segment Revenues –*** These revenues are composed of three main categories: water, wastewater, and other. Water revenues represent revenues earned for supplying customers with water service. Wastewater revenues represent revenues earned for treating wastewater and releasing it into the water supply. Other revenues are associated fees that relate to the regulated business but are not water and wastewater revenues. See description below for a discussion on the performance obligation for each of these revenue streams.

(In thousands of dollars, except per share amounts)

***Tariff Revenues –*** These revenues are categorized by customer class: residential, commercial, fire protection, industrial, and other water and other wastewater. The rates that generate these revenues are approved by the respective state utility commission, and revenues are billed cyclically and accrued for when unbilled. Other water and other wastewater revenues consist primarily of fines, penalties, surcharges, and availability lot fees. Our performance obligation for tariff revenues is to provide potable water or wastewater treatment service to customers. This performance obligation is satisfied over time as the services are rendered.

***Other Utility Revenues –*** Other utility revenues represent revenues earned primarily from: antenna revenues, which represent fees received from telecommunication operators that have put cellular antennas on our water towers, operation and maintenance and billing contracts, which represent fees earned from municipalities for our operation of their water or wastewater treatment services or performing billing services, and fees earned from developers for accessing our water mains. The performances obligations vary for these revenues, but all are primarily recognized over time as the service is delivered.

***Other and Eliminations –*** Other and eliminations consist of our market-based revenues, which comprises: Aqua Infrastructure and Aqua Resources (described below), and intercompany eliminations for revenue billed between our subsidiaries.

Aqua Infrastructure is the holding company for our 49% investment in a joint venture that operates a private pipeline system to supply raw water to natural gas well drilling operations in the Marcellus Shale of north central Pennsylvania. The joint venture earns revenues through providing non-utility raw water supply services to companies which enter into a water supply contract in the natural gas drilling industry. The performance obligation is to deliver non-potable water to its customers. Aqua Infrastructure's share of the revenues recognized by the joint venture is reflected, net, in equity earnings in joint venture on our consolidated statements of net income.

Aqua Resources earns revenues by providing non-regulated water and wastewater services through operating and maintenance contracts, and third party water and sewer line repair service. The performance obligations are performing agreed upon services in the contract, most commonly operation of third party water or wastewater treatment services, or billing services, or allowing the use of our logo to a third party water and sewer line repair service. Revenues are primarily recognized over time as service is delivered.

**Note 3 – *Goodwill***

The following table summarizes the changes in the Company's goodwill, by business segment:

| | Regulated Segment | Other | Consolidated |
|---|---|---|---|
| Balance at December 31, 2017 | $ 37,389 | $ 4,841 | $ 42,230 |
| Goodwill acquired | - | - | - |
| Balance at March 31, 2018 | $ 37,389 | $ 4,841 | $ 42,230 |

**Note 4 – *Acquisitions***

During the first three months of 2018, the Company completed three acquisitions of water and wastewater utility systems in various states adding 448 customers. The total purchase price of these utility systems consisted of $190 in cash. The purchase price allocation for these acquisition consisted primarily of acquired property, plant and equipment. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

During 2017, the Company completed four acquisitions of water and wastewater utility systems in various states adding 1,003 customers. The total purchase price of these utility systems consisted of $5,860 in cash, which resulted in $72 of goodwill being recorded. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of six municipalities for a total combined purchase price in cash of $150,700, which we plan to finance by the issuance of long-term debt. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur by the end of 2018, subject to the timing of the regulatory approval process. These acquisitions are expected to add approximately 16,325 customers in two of the states that the Company operates in.

**Note 5 – *Assets Held for Sale***

In the first quarter of 2017, the Company decided to market for sale a water system that serves approximately 265 customers. This water system is reported as assets held for sale in the Company's consolidated balance sheet.

**Note 6 –*Financial Instruments***

The Company follows the FASB's accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;
- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

(In thousands of dollars, except per share amounts)

- Level 3: inputs that are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. There have been no changes in the valuation techniques used to measure fair value, or asset or liability transfers between the levels of the fair value hierarchy for the quarter ended March 31, 2018.

Financial instruments are recorded at carrying value in the financial statements and approximate fair value as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of loans payable is determined based on its carrying amount and utilizing Level 1 methods and assumptions. As of March 31, 2018 and December 31, 2017, the carrying amount of the Company's loans payable was $20,342 and $3,650, respectively, which equates to their estimated fair value. The Company's assets underlying the deferred compensation and non-qualified pension plans are determined by the fair value of mutual funds, which are based on quoted market prices from active markets utilizing Level 1 methods and assumptions. As of March 31, 2018 and December 31, 2017, the carrying amount of these securities was $21,576 and $21,776, which equates to their fair value, and is reported in the consolidated balance sheet in deferred charges and other assets. The fair value of cash and cash equivalents, which is comprised of uninvested cash, is determined based on the net asset value per unit utilizing Level 1 methods and assumptions. As of March 31, 2018 and December 31, 2017, the carrying amounts of the Company's cash and cash equivalents was $3,202 and $4,204, respectively, which equates to their fair value.

Unrealized gain and losses on equity securities held in conjunction with our non-qualified pension plan is as follows:

| | Three Months Ended March 31, 2018 |
|---|---|
| Net loss recognized during the period on equity securities | $ 21 |
| Less: net gain / loss recognized during the period on equity securities sold during the period | - |
| Unrealized loss recognized during the reporting period on equity securities still held at the reporting date | $ 21 |

The net loss recognized on equity securities is presented on the consolidated statements of net income on the line item "Other." Additionally, the unrealized gain recognized during the three months ended March 31, 2017, was reported on the consolidated statements of comprehensive income.

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

| | March 31, 2018 | December 31, 2017 |
|---|---|---|
| Carrying amount | $ 2,188,115 | $ 2,143,127 |
| Estimated fair value | 2,235,447 | 2,262,785 |

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing Level 2 methods and assumptions.

The Company's customers' advances for construction have a carrying value of $90,599 as of March 31, 2018, and $93,186 as of December 31, 2017. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rates. Portions of these non-interest bearing instruments are payable annually through 2028 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

**Note 7 – *Net Income per Common Share***

Basic net income per common share is based on the weighted average number of common shares outstanding. Diluted net income per common share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per common share. The dilutive effect of stock-based compensation is calculated using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The treasury stock method assumes that the proceeds from stock-based compensation are used to purchase the Company's common stock at the average market price during the period. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per common share:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Average common shares outstanding during the period for basic computation | 177,801 | 177,479 |
| Dilutive effect of employee stock-based compensation | 437 | 490 |
| Average common shares outstanding during the period for diluted computation | 178,238 | 177,969 |

(In thousands of dollars, except per share amounts)

For the three months ended March 31, 2018 and 2017, all of the Company's employee stock options were included in the calculations of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods.

**Note 8 – *Stock-based Compensation***

Under the Company's 2009 Omnibus Equity Compensation Plan, as amended as of February 27, 2014 (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. No further grants may be made under the 2004 Plan. The 2009 Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the 2009 Plan may be issued pursuant to stock awards, stock units and other stock-based awards, subject to adjustment as provided in the 2009 Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the 2009 Plan. Awards to employees and consultants under the 2009 Plan are made by a committee of the Board of Directors of the Company, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At March 31, 2018, 3,454,922 shares were still available for issuance under the 2009 Plan.

***Performance Share Units*** – A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three-year performance period specified in the grant, subject to exceptions through the respective vesting period, generally three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals. The following table provides compensation costs for stock-based compensation related to PSUs:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Stock-based compensation within operations and maintenance expenses | $ 859 | $ 870 |
| Income tax benefit | 241 | 353 |

(In thousands of dollars, except per share amounts)

The following table summarizes the PSU transactions for the three months ended March 31, 2018:

| | Number of Share Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested share units at beginning of period | 452,333 | $ 26.16 |
| Granted | 87,593 | 37.65 |
| Performance criteria adjustment | (33,109) | 29.71 |
| Forfeited | (5,522) | 29.59 |
| Share units vested in prior period and issued in current period | 9,400 | 26.54 |
| Share units issued | (136,081) | 31.70 |
| Nonvested share units at end of period | 374,614 | 26.48 |

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions using the Monte Carlo valuation method, which assesses probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs is based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The per unit weighted-average fair value at the date of grant for PSUs granted during the three months ended March 31, 2018 and 2017 was $37.65 and $30.79, respectively. The fair value of each PSU grant is amortized monthly into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on the Company's estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows.

***Restricted Stock Units*** – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation cost and income tax benefit for stock-based compensation related to RSUs:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Stock-based compensation within operations and maintenance expenses | $ 351 | $ 281 |
| Income tax benefit | 100 | 116 |

(In thousands of dollars, except per share amounts)

The following table summarizes the RSU transactions for the three months ended March 31, 2018:

| | Number of Stock Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock units at beginning of period | 116,787 | $ 29.46 |
| Granted | 54,073 | 34.91 |
| Stock units vested in prior period and issued in current period | 1,467 | 31.47 |
| Stock units vested and issued | (42,836) | 26.39 |
| Forfeited | - | - |
| Nonvested stock units at end of period | 129,491 | 31.78 |

The per unit weighted-average fair value at the date of grant for RSUs granted during the three months ended March 31, 2018 and 2017 was $34.91 and $30.37, respectively.

***Stock Options*** – A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire 10 years from the grant date. The fair value of each stock option is amortized into compensation expense using the graded-vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock options:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Stock-based compensation within operations and maintenance expenses | $ 94 | $ 30 |
| Income tax benefit | 58 | 92 |

The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model. The following assumptions were used in the application of this valuation model:

| | 2018 | 2017 |
|---|---|---|
| Expected term (years) | 5.46 | 5.45 |
| Risk-free interest rate | 2.72% | 2.01% |
| Expected volatility | 17.2% | 17.7% |
| Dividend yield | 2.37% | 2.51% |
| Grant date fair value per option | $ 5.10 | $ 4.07 |

Historical information was the principal basis for the selection of the expected term and dividend yield. The expected volatility is based on a weighted-average combination of historical and implied volatilities over a time period that approximates the expected term of the option. The risk-free interest rate was selected based upon the U.S. Treasury yield curve in effect at the time of grant for the expected term of the option.

(In thousands of dollars, except per share amounts)

The following table summarizes stock option transactions for the three months ended March 31, 2018:

| | Shares | Weighted Average Exercise Price | Weighted Average Remaining Life (years) | Aggregate Intrinsic Value |
|---|---|---|---|---|
| Outstanding at beginning of period | 364,932 | $ 19.83 | | |
| Granted | 160,859 | 34.51 | | |
| Forfeited | (2,371) | 30.47 | | |
| Expired / Cancelled | (41) | 30.47 | | |
| Exercised | (62,688) | 16.11 | | |
| Outstanding at end of period | 460,691 | $ 25.40 | 6.2 | $ 4,060 |
| | | | | |
| Exercisable at end of period | 225,594 | $ 17.24 | 2.6 | $ 3,794 |

***Stock Awards*** – Stock awards represent the issuance of the Company's common stock, without restriction. The issuance of stock awards results in compensation expense which is equal to the fair market value of the stock on the grant date, and is expensed immediately upon grant. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock awards:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Stock-based compensation within operations and maintenance expenses | $ 140 | $ 131 |
| Income tax benefit | 40 | 54 |

The following table summarizes stock award transactions for the three months ended March 31, 2018:

| | Number of Stock Awards | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock awards at beginning of period | - | $ - |
| Granted | 4,130 | 33.90 |
| Vested | (4,130) | 33.90 |
| Nonvested stock awards at end of period | - | $ - |

The per unit weighted-average fair value at the date of grant for stock awards granted during the three months ended March 31, 2018 and 2017 was $33.90 and $32.15, respectively.

(In thousands of dollars, except per share amounts)

**Note 9 – *Pension Plans and Other Postretirement Benefits***

The Company maintains a qualified defined benefit pension plan (the "Pension Plan"), a nonqualified pension plan, and other postretirement benefit plans for certain of its employees. The net periodic benefit cost is based on estimated values and an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover, and medical costs. The following tables provide the components of net periodic benefit cost:

| | Pension Benefits Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Service cost | $ 812 | $ 794 |
| Interest cost | 2,874 | 3,108 |
| Expected return on plan assets | (4,553) | (4,270) |
| Amortization of prior service cost | 132 | 145 |
| Amortization of actuarial loss | 1,823 | 2,001 |
| Net periodic benefit cost | $ 1,088 | $ 1,778 |

| | Other Postretirement Benefits Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Service cost | $ 262 | $ 255 |
| Interest cost | 708 | 737 |
| Expected return on plan assets | (677) | (647) |
| Amortization of prior service cost | (127) | (127) |
| Amortization of actuarial loss | 296 | 291 |
| Net periodic benefit cost | $ 462 | $ 509 |

The components of net periodic benefit cost other than service cost are presented on the consolidated statements of net income on the line item "Other."

The Company made cash contributions of $5,198 to its Pension Plan during the first three months of 2018, and intends to make additional cash contributions of $7,286 to the Pension Plan during the remainder of 2018.

**Note 10 – *Water and Wastewater Rates***

During the first three months of 2018, the Company's operating divisions in Illinois and Ohio were granted base rate increases designed to increase total operating revenues on an annual basis by $8,640. On April 6, 2018, the base rate case in Illinois was petitioned for a rehearing; however, this petition was denied on April 19, 2018. The other parties to the case have thirty days to file an appeal. The approved rates, for which we have billed $300 to date in March 2018, are in effect, but could be subject to refund if an appeal is granted. Further, during the first three months of 2018, the Company's operating divisions in Pennsylvania and North Carolina received approval to bill infrastructure rehabilitation surcharges designed to increase total operating revenues on an annual basis by $9,731.

(In thousands of dollars, except per share amounts)

As of February 10, 2018, the Company has been billing interim rates in Virginia, which has a base rate case filing in progress. As of March 31, 2018, $821 of billings is subject to refund pending the conclusion of the rate case.

**Note 11 – *Taxes Other than Income Taxes***

The following table provides the components of taxes other than income taxes:

| | Three Months Ended March 31, | |
|---|---|---|
| | 2018 | 2017 |
| Property | $ 6,749 | $ 6,785 |
| Gross receipts, excise and franchise | 3,265 | 3,175 |
| Payroll | 3,275 | 3,124 |
| Regulatory assessments | 627 | 629 |
| Pumping fees | 991 | 944 |
| Other | 60 | 80 |
| Total taxes other than income | $ 14,967 | $ 14,737 |

**Note 12 – *Segment Information***

The Company has ten operating segments and one reportable segment. The Regulated segment, the Company's single reportable segment, is comprised of eight operating segments representing its water and wastewater regulated utility companies which are organized by the states where the Company provides water and wastewater services. These operating segments are aggregated into one reportable segment because each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment.

Two operating segments are included within the Other category below. These segments are not quantitatively significant and are comprised of Aqua Infrastructure and Aqua Resources. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to its utility companies' service territories; and offers, through a third party, water and sewer line repair service and protection solutions to households. In addition to these segments, Other is comprised of other business activities not included in the reportable segment, including corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

(In thousands of dollars, except per share amounts)

The following table presents information about the Company's reportable segment:

| | Three Months Ended March 31, 2018 | | | Three Months Ended March 31, 2017 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other | Consolidated | Regulated | Other | Consolidated |
| Operating revenues | $ 193,507 | $ 840 | $ 194,347 | $ 186,349 | $ 1,438 | $ 187,787 |
| Operations and maintenance expense | 71,303 | 2,643 | 73,946 | 66,272 | 1,618 | 67,890 |
| Depreciation | 35,958 | 9 | 35,967 | 33,666 | 171 | 33,837 |
| Amortization | 88 | 42 | 130 | 209 | (20) | 189 |
| Operating income (loss) | 72,058 | (2,721) | 69,337 | 72,305 | (1,171) | 71,134 |
| Interest expense, net | 21,708 | 1,763 | 23,471 | 19,777 | 1,549 | 21,326 |
| Allowance for funds used during construction | 2,867 | - | 2,867 | 3,193 | - | 3,193 |
| Income tax expense (benefit) | (643) | (1,488) | (2,131) | 3,856 | (926) | 2,930 |

**Note 13 –** ***Commitments and Contingencies***

The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of March 31, 2018, the aggregate amount of $20,231 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, the Company has insurance coverage for certain of these loss contingencies, and as of March 31, 2018, estimates that approximately $8,231 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets, net.

Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which the Company or any of its subsidiaries is a party or to which any of its properties is the subject that are material or are expected to have a material effect on the Company's financial position, results of operations, or cash flows.

In addition to the aforementioned loss contingencies, the Company self-insures its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,451 at March 31, 2018 and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

**Note 14 – *Income Taxes***

During the three months ended March 31, 2018, the Company's Federal net operating loss ("NOL") carryforward decreased by $6,760. In addition, during the three months ended March 31, 2018, the Company's state NOL carryforward increased by $3,866. As of March 31, 2018, the balance of the Company's Federal NOL was $56,542. The Company believes its Federal NOL carryforward is more likely than not to be recovered and requires no valuation allowance. As of March 31, 2018, the balance of the Company's gross state NOL was $631,124, a portion of which is offset by a valuation allowance because the Company does not believe the state NOLs are more likely than not to be realized. The Company's Federal and state NOL carryforwards begin to expire in 2032 and 2023, respectively. The Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $64,814 and $85,380, respectively. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions were $121,356 and $716,504 respectively. The Company records its unrecognized tax benefit as a reduction to its deferred income tax liability.

In accordance with a 2012 settlement agreement with the Pennsylvania Public Utility Commission, Aqua Pennsylvania expenses, for tax purposes, qualifying utility asset improvement costs, which results in a substantial reduction in income tax expense and greater net income and cash flows. The Company's effective income tax rate for the first quarter of 2018 and 2017 was -4.4% and 5.6%, respectively.

As of March 31, 2018, the total gross unrecognized tax benefit was $18,143. As a result of the regulatory treatment afforded for qualifying infrastructure improvements in Pennsylvania, $24,834, if recognized, would affect the Company's effective tax rate. At December 31, 2017, the Company had unrecognized tax benefits of $17,583.

Accounting rules for uncertain tax positions specify that tax positions for which the timing of resolution is uncertain should be classified as long-term liabilities. Judgment is required in evaluating the Company's uncertain tax positions and determining the provision for income taxes. Management believes that an adequate provision has been made for any adjustments that may result from tax examinations. Although the timing of income tax audit resolutions and negotiations with taxing authorities is highly uncertain, the Company does not anticipate a significant change to the total amount of unrecognized income tax benefits within the next 12 months.

On December 22, 2017, President Trump signed the "Tax Cuts and Jobs Acts" (the "TCJA") into law. Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA includes significant changes to the Code and the taxation of business entities, and includes specific provisions related to regulated public utilities. Significant changes that impact the Company included in the TCJA are a reduction in the corporate federal income tax rate from 35% to 21%, effective January 1, 2018, and a limitation of the utilization of NOLs arising after December 31, 2017 to 80% of taxable income with an indefinite carryforward. The specific TCJA provisions related to our regulated entities generally allow for the continued deductibility of interest expense, the elimination of full expensing for tax purposes of certain property acquired after September 27, 2017 and the continuation of certain rate normalization requirements for accelerated depreciation benefits. Our market-based companies still qualify for 100% deductibility of qualifying property acquired after September 27, 2017.

In accordance with the FASB's accounting guidance for income taxes, the tax effects of changes in tax laws must be recognized in the period in which the law is enacted, or December 22, 2017 for the TCJA. Additionally, deferred tax assets and liabilities are required to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. Thus, at the date of enactment, the Company's deferred taxes were re-measured based upon the new tax rate. For our regulated entities, the change in deferred taxes is recorded as either an offset to a regulatory asset or liability and may be subject to refund to customers. In instances where the deferred tax balances are not in ratemaking, such as the Company's market-based operations, the change in deferred taxes is recorded as an adjustment to our deferred tax provision.

The staff of the SEC has recognized the complexity of reflecting the impacts of the TCJA, and on December 22, 2017 issued guidance, which clarifies accounting for income taxes if information is not yet available or complete and provides for up to a one year period in which to complete the required analyses and accounting (the measurement period). The guidance describes three scenarios (or "buckets") associated with a company's status of accounting for income tax reform: (1) a company is complete with its accounting for certain effects of tax reform, (2) a company is able to determine a reasonable estimate for certain effects of tax reform and records that estimate as a provisional amount, or (3) a company is not able to determine a reasonable estimate and therefore continues to apply the FASB's accounting guidance, based on the provisions of the tax laws that were in effect immediately prior to the TCJA being enacted.

The Company has completed or has made a reasonable estimate for the measurement and accounting of the effect of the TCJA which were reflected in the December 31, 2017 financial statements, which resulted in a decrease to the accumulated deferred income tax liability of $303,320. Additionally, due to the reduction in the Company's corporate income tax rate, in the first quarter of 2018, the Company reserved $2,532 for amounts expected to be refundable to utility customers. During the first quarter of 2018, in Illinois and Virginia, the Company's base rates have been adjusted to reflect the lower corporate income tax rate, and Texas and New Jersey implemented adjusted tariff rates in the second quarter of 2018.

One of our states, Pennsylvania, has not yet issued an accounting or procedural order addressing how the TCJA changes are to be reflected in our utility customer rates. As of December 31, 2017, the Company had provisionally estimated that $175,108 of deferred income tax liabilities for our Pennsylvania subsidiary will be a regulatory liability. Additionally, two operating divisions in Ohio operate under locally-negotiated contractual rates with their respective counties, and it is expected that negotiations will result in a contract that will return to customers the effects of the reduction in the corporate net income tax rate under the TCJA; however, these negotiations have not yet started. As of December 31, 2017, the Company had provisionally estimated that $9,419 of deferred income tax liabilities for these two divisions will be a regulatory liability. Overall, the Company has applied a reasonable interpretation of the impact of the TCJA and a reasonable estimate of the regulatory resolution. Further clarification of the TCJA and regulatory resolution may change the amounts estimated of the deferred income tax provision and the accumulated deferred income tax liability.

The Company's regulated operations accounting for income taxes are impacted by the FASB's accounting guidance for regulated operations. Reductions in accumulated deferred income tax balances due to the reduction in the Federal corporate income tax rates to 21% under the provisions of the TCJA will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes related to certain accelerated tax depreciation deduction benefits are to be passed back to customers. Potential refunds of other deferred taxes will be determined by our state regulators. Our state regulatory commissions have or are in the process of issuing procedural orders directing how the tax law changes are to be reflected in our utility customer rates.

**Note 15 – *Recent Accounting Pronouncements***

In March 2017, the FASB issued updated accounting guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Historically, net benefit cost is reported as an employee cost within operating income, net of amounts capitalized. The guidance requires the bifurcation of net benefit cost. The service cost component will be presented with other employee compensation costs in operating income and the other components of net benefit cost will be reported separately outside of operating income, and will not be eligible for capitalization. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period, and is to be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and on a prospective basis for the capitalization of only the service cost component of net benefit cost. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position, and resulted in the reclassification, for the three months ended March 31, 2017, of $1,238 for the other components of net benefit cost from operations and maintenance expense to other in the consolidated statements of net income.

In February 2016, the FASB issued updated accounting guidance on accounting for leases, which requires lessees to establish a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. For income statement purposes, leases will be classified as either operating or finance. Operating leases will result in straight-line expense while finance leases will result in a front-loaded expense pattern. The updated accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption available. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption.

In January 2016, the FASB issued updated accounting guidance on the recognition and measurement of financial assets and financial liabilities, which amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. The updated guidance is effective for interim and annual periods beginning after December 31, 2017. On January 1, 2018, the Company adopted the updated guidance, which did not have a material impact on its results of operations or financial position, and resulted in the recognition of $860 of previous unrealized gains, which was recorded as an adjustment to beginning retained earnings (refer to the presentation of “cumulative effect of change in accounting principle – financial instruments” on the Company’s consolidated statement of equity).

In May 2014, the FASB issued updated accounting guidance on recognizing revenue from contracts with customers, which outlines a single comprehensive model that an entity will apply to determine the measurement of revenue and timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The updated guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. The updated guidance is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the updated guidance in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting the updated guidance recognized through retained earnings at the date of adoption. In 2016, the Company performed an evaluation of the requirements of the updated guidance and believes that the impact of adoption will not result in a material change in the Company’s measurement of revenue. In 2017, the American Institute of Certified Public Accountants (“AICPA”) power and utility entities revenue recognition task force determined that contributions in aid of construction are not in the scope of the new standard, and submitted its recommendation to the AICPA’s revenue recognition working group for approval. The Company implemented the updated guidance using the modified retrospective approach on January 1, 2018, which did not result in a change in the Company’s measurement of revenue, and reached the following conclusions:

- The Company’s tariff sale contracts, including those with lower credit quality customers, are generally deemed to be probable of collection, and thus the timing of revenue recognition will continue to be concurrent with the delivery of water and wastewater services, consistent with our current practice.
- Contributions in aid of construction are outside of the scope of the standard, and will continue to be accounted for as a noncurrent liability.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(In thousands of dollars, except per share amounts)

Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations

## Forward-looking Statements

*This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Quarterly Report contain, in addition to historical information, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address, among other things: the projected impact of various legal proceedings; the projected effects of recent accounting pronouncements; prospects, plans, objectives, expectations and beliefs of management, as well as information contained in this report where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Forward-looking statements are based on a number of assumptions concerning future events, and are subject to a number of risks, uncertainties and other factors, many of which are outside our control, which could cause actual results to differ materially from those expressed or implied by such statements. These risks and uncertainties include, among others: the effects of regulation, abnormal weather, changes in capital requirements and funding, acquisitions, changes to the capital markets, and our ability to assimilate acquired operations, as well as those risks, uncertainties and other factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017 under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in such report. As a result, readers are cautioned not to place undue reliance on any forward-looking statements. We undertake no obligation to update or revise forward-looking statements, whether as a result of new information, future events or otherwise.*

## General Information

Aqua America, Inc. ("we", "us", "our" or the "Company"), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to what we estimate to be almost three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary, Aqua Pennsylvania, provides water or wastewater services to approximately one-half of the total number of people we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to our utility companies' service territories; and offers, through a third party, water and wastewater line repair service and protection solutions to households.

AQUA AMERICA, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)
(In thousands of dollars, except per share amounts)

Aqua America, Inc., which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth-through-acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and has extended our regulated operations from southeastern Pennsylvania to include operations in seven other states. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to opportunistically pursue growth ventures in select market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

*The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes.*

## Financial Condition

During the first three months of 2018, we had $105,136 of capital expenditures, expended $190 for the acquisition of water and wastewater utility systems, issued $66,996 of long-term debt, and repaid debt and made sinking fund contributions and other loan repayments of $21,898. The capital expenditures were related to new and replacement water mains, improvements to treatment plants, tanks, hydrants, and service lines, well and booster improvements, and other enhancements and improvements. The issuance of long-term debt was comprised principally of the funds borrowed under our revolving credit facility.

At March 31, 2018, we had $3,202 of cash and cash equivalents compared to $4,204 at December 31, 2017. During the first three months of 2018, we used the proceeds from the issuance of long-term debt and internally generated funds to fund the cash requirements discussed above and to pay dividends.

At March 31, 2018, our $250,000 unsecured revolving credit facility, which expires in February 2021, had $113,189 available for borrowing. At March 31, 2018, we had short-term lines of credit of $135,500, of which $115,158 was available for borrowing. One of our short-term lines of credit is an Aqua Pennsylvania $100,000 364-day unsecured revolving credit facility with four banks, which is used to provide working capital, and as of March 31, 2018, $79,658 was available for borrowing.

Our short-term lines of credit of $135,500 are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

The Company's consolidated balance sheet historically has had a negative working capital position whereby routinely our current liabilities exceed our current assets. Management believes that internally generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

## Results of Operations

### Analysis of First Quarter of 2018 Compared to First Quarter of 2017

Revenues increased by $6,560 or 3.5%, primarily due to an increase in customer water consumption, an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $5,097, and additional water and wastewater revenues of $1,634 associated with a larger customer base due to organic growth and utility acquisitions, offset by a reserve, recognized in the first quarter of 2018, of $2,532 for amounts expected to be refundable to utility customers associated with the decrease in the corporate income tax rate from 35% to 21% due to the TCJA.

Operations and maintenance expenses increased by $6,056 or 8.9%, primarily due to an increase in labor expense of $1,559, which included additional overtime expenses for increased maintenance activities, an increase in postretirement benefits of $1,442, and an increase in maintenance expenses of $1,057, mainly resulting from expenses incurred due to more severe winter weather conditions.

Depreciation expense increased by $2,130 or 6.3%, primarily due to the utility plant placed in service since March 31, 2017.

Interest expense increased by $2,145 or 10.1%, primarily due to an increase in average borrowings, offset by a decrease in our effective interest rate.

Allowance for funds used during construction ("AFUDC") decreased by $326, due to a decrease in the average balance of utility plant construction work in progress, to which AFUDC is applied.

Equity earnings in joint venture increased by $412 due to an increase in the sale of raw water to firms in the natural gas drilling industry.

Other decreased by $635 primarily due to a decrease in the non-service cost components of our net benefit cost for pension and postretirement benefits.

Our effective income tax rate was -4.4% in the first quarter of 2018 and 5.6% in the first quarter of 2017. The effective income tax rate decreased due to the reduction in the corporate income tax rate from 35% to 21%, and the effect of additional tax deductions recognized in the first quarter of 2018 for certain qualifying infrastructure improvements for Aqua Pennsylvania. A revenue reserve has been recognized in the first quarter of 2018 for the amounts expected to be refundable to utility customers associated with the decrease in the corporate income tax rate from 35% to 21% due to the TCJA.

Net income increased by $1,767 or 3.6%, primarily as a result of the factors described above.

## Impact of Recent Accounting Pronouncements

We describe the impact of recent accounting pronouncements in Note 15, *Recent Accounting Pronouncements*, to the consolidated financial statements in this report.

## Item 3 – Quantitative and Qualitative Disclosures About Market Risk

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes in our exposure to market risks since December 31, 2017. Refer to Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2017, filed February 28, 2018, for additional information.

## Item 4 – Controls and Procedures

### (a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective such that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

### (b) Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

# Part II. Other Information

## Item 1 – Legal Proceedings

We are party to various legal proceedings. Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our properties is the subject that we believe are material or are expected to have a material adverse effect on our financial position, results of operations or cash flows.

## Item 1A – Risk Factors

There have been no material changes to the risks disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, filed February 28, 2018, under "Part 1, Item 1A – Risk Factors."

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes the Company's purchases of its common stock for the quarter ended March 31, 2018:

Issuer Purchases of Equity Securities

| Period | Total Number of Shares Purchased (1) | | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet be Purchased Under the Plan or Programs |
|---|---|---|---|---|---|
| January 1-31, 2018 | 2,662 | $ | 36.37 | - | - |
| February 1-28, 2018 | 68,805 | $ | 34.56 | - | - |
| March 1-31, 2018 | 473 | $ | 33.84 | - | - |
| Total | 71,940 | $ | 34.63 | - | - |

(1) These amounts include the following: (a) 63,941 shares we acquired from employees associated with the withholding of shares to pay certain withholding taxes upon the vesting of stock-based compensation; and (b) 7,999 shares we acquired from our employees who elected to pay the exercise price of their stock options (and then hold shares of the stock), upon exercise, by delivering to us shares of our common stock in accordance with the terms of our equity compensation plan that were previously approved by our shareholders and disclosed in our proxy statements. These features of our equity compensation plan are available to all employees who receive stock-based compensation under the plan. We purchased these shares at their fair market value, as determined by reference to the closing price of our common stock on the day prior to the option exercise.

Item 6 – Exhibits

The information required by this Item is set forth in the Exhibit Index hereto which is incorporated herein by reference.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be executed on its behalf by the undersigned thereunto duly authorized.

May 9, 2018

Aqua America, Inc.
Registrant

/s/ Christopher H. Franklin
Christopher H. Franklin
Chairman, President and
Chief Executive Officer

/s/ David P. Smeltzer
David P. Smeltzer
Executive Vice President and
Chief Financial Officer

Exhibit 31.1

CERTIFICATION OF CHIEF EXECUTIVE OFFICER, PURSUANT TO RULE 13A-14(A) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, Christopher H. Franklin, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting, and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
    a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

CERTIFICATION OF CHIEF FINANCIAL OFFICER, PURSUANT TO RULE 13A-14(A) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, David P. Smeltzer, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting, and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

(In thousands of dollars, except per share amounts)

**Note 1 – *Basis of Presentation***

The accompanying consolidated balance sheets and statements of capitalization of Aqua America, Inc. and subsidiaries (the "Company") at June 30, 2017, the consolidated statements of net income and comprehensive income for the three and six months ended June 30, 2017 and 2016 the consolidated statements of cash flow for the six months ended June 30, 2017 and 2016, and the consolidated statement of equity for the six months ended June 30, 2017 are unaudited, but reflect all adjustments, consisting of only normal recurring accruals, which are, in the opinion of management, necessary to present a fair statement of our consolidated financial position, consolidated changes in equity, consolidated results of operations, and consolidated cash flow for the periods presented. Because they cover interim periods, the statements and related notes to the financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2016. The results of operations for interim periods may not be indicative of the results that may be expected for the entire year. The December 31, 2016 consolidated balance sheet data presented herein was derived from the Company's December 31, 2016 audited consolidated financial statements, but does not include all disclosures and notes normally provided in annual financial statements. Certain prior period amounts have been reclassified to conform to the current period presentation of postretirement benefit contributions in the consolidated statements of cash flows.

The preparation of financial statements often requires the selection of specific accounting methods and policies. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in our consolidated balance sheets, the revenues and expenses in our consolidated statements of net income, and the information that is contained in our summary of significant accounting policies and notes to consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that we include currently in our consolidated financial statements, summary of significant accounting policies, and notes.

There have been no changes to the summary of significant accounting policies previously identified in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

**Note 2 – *Goodwill***

The following table summarizes the changes in the Company's goodwill, by business segment:

| | Regulated Segment | Other | Consolidated |
|---|---|---|---|
| Balance at December 31, 2016 | $ 37,367 | $ 4,841 | $ 42,208 |
| Goodwill acquired | 72 | - | 72 |
| Reclassification to utility plant acquisition adjustment | (14) | - | (14) |
| Balance at June 30, 2017 | $ 37,425 | $ 4,841 | $ 42,266 |

The reclassification of goodwill to utility plant acquisition adjustment results from a mechanism approved by the applicable utility commission. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with some acquisitions upon achieving specific objectives.

**Note 3 –** ***Acquisitions***

During the first half of 2017, the Company completed three acquisitions of water and wastewater utility systems in various states adding 1,002 customers. The total purchase price of these utility systems consisted of $5,765 in cash, which resulted in $72 of goodwill being recorded. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

Pursuant to our strategy to grow through acquisitions, in January 2016, the Company acquired Superior Water Company, Inc., which provides public water service to approximately 3,900 customers in portions of Berks, Chester, and Montgomery counties in Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. The purchase price allocation for this acquisition consisted primarily of acquired property, plant and equipment of $25,167, contributions in aid of construction of $16,565, and goodwill of $8,622. Additionally, during 2016, the Company completed eighteen acquisitions of water and wastewater utility systems in various states adding 2,469 customers. The total purchase price of these utility systems consisted of $5,518 in cash, which resulted in $1,756 of goodwill being recorded. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

**Note 4 –** ***Assets Held for Sale***

In the first quarter of 2017, the Company decided to market for sale a water system that serves approximately 265 customers. This water system is reported as assets held for sale in the Company's consolidated balance sheet.

In the second quarter of 2016, the Company decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repairs and performs maintenance on water and wastewater systems, for which the sale was completed in June 2017.

(In thousands of dollars, except per share amounts)

**Note 5 – *Capitalization***

In July 2017, Aqua Illinois issued $100,000 of first mortgage bonds consisting of the following:

| Amount | Interest Rate | Maturity |
|---|---|---|
| $25,000 | 3.64% | 2032 |
| $6,000 | 3.89% | 2037 |
| $15,000 | 3.90% | 2038 |
| $10,000 | 4.18% | 2047 |
| $22,000 | 4.22% | 2049 |
| $22,000 | 4.24% | 2050 |

The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In July 2017, Aqua Pennsylvania issued $80,000 of first mortgage bonds, of which $40,000 is due in 2055 and $40,000 is due in 2057 with interest rates of 4.04% and 4.06%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

**Note 6 – *Fair Value of Financial Instruments***

The Company follows the Financial Accounting Standards Board's ("FASB") accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;

- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

- Level 3: inputs that are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. There have been no changes in the valuation techniques used to measure fair value, or asset or liability transfers between the levels of the fair value hierarchy for the quarter ended June 30, 2017.

(In thousands of dollars, except per share amounts)

Financial instruments are recorded at carrying value in the financial statements and approximate fair value as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of loans payable is determined based on its carrying amount and utilizing Level 1 methods and assumptions. As of June 30, 2017 and December 31, 2016, the carrying amount of the Company's loans payable was $67,456 and $6,535, respectively, which equates to their estimated fair value. The fair value of mutual funds to fund our deferred compensation plan liability is determined based on quoted market prices from active markets utilizing Level 1 methods and assumptions. As of June 30, 2017 and December 31, 2016, the carrying amount of these securities was $18,000 and $17,072, which equates to their fair value, and is reported in the consolidated balance sheet in deferred charges and other assets. The fair value of cash and cash equivalents, which is comprised of a money market fund, is determined based on the net asset value per unit utilizing Level 2 methods and assumptions. As of June 30, 2017 and December 31, 2016, the carrying amounts of the Company's cash and cash equivalents was $7,811 and $3,763, respectively, which equates to their fair value.

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

| | June 30, 2017 | December 31, 2016 |
|---|---|---|
| Carrying Amount | $ 1,987,909 | $ 1,910,633 |
| Estimated Fair Value | 2,049,090 | 2,018,933 |

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing Level 2 methods and assumptions. The Company's customers' advances for construction have a carrying value of $91,131 as of June 30, 2017, and $91,843 as of December 31, 2016. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rate increases. Portions of these non-interest bearing instruments are payable annually through 2027 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

**Note 7 – *Net Income per Common Share***

Basic net income per common share is based on the weighted average number of common shares outstanding. Diluted net income per common share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per common share. The dilutive effect of stock-based compensation is calculated using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The treasury stock method assumes that the proceeds from stock-based compensation are used to purchase the Company's common stock at the average market price during the period. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per common share:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Average common shares outstanding during the period for basic computation | 177,609 | 177,288 | 177,545 | 177,196 |
| Dilutive effect of employee stock-based compensation | 436 | 796 | 497 | 724 |
| Average common shares outstanding during the period for diluted computation | 178,045 | 178,084 | 178,042 | 177,920 |

For the three and six months ended June 30, 2017 and 2016, all of the Company's employee stock options were included in the calculations of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods.

**Note 8 – *Stock-based Compensation***

Under the Company's 2009 Omnibus Equity Compensation Plan, as amended as of February 27, 2014 (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. The 2009 Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the 2009 Plan may be issued pursuant to stock awards, stock units and other stock-based awards, subject to adjustment as provided in the 2009 Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the 2009 Plan. Awards to employees and consultants under the 2009 Plan are made by a committee of the Board of Directors of the Company, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At June 30, 2017, 3,741,035 shares were still available for issuance under the 2009 Plan. No further grants may be made under the 2004 Plan.

(In thousands of dollars, except per share amounts)

***Performance Share Units*** – A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three-year performance period specified in the grant, subject to exceptions through the respective vesting period, generally three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals. The following table provides compensation costs for stock-based compensation related to PSUs:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 971 | $ 967 | $ 1,841 | $ 1,492 |
| Income tax benefit | 394 | 392 | 747 | 601 |

The following table summarizes the PSU transactions for the six months ended June 30, 2017:

| | Number of Share Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested share units at beginning of period | 476,896 | $ 27.96 |
| Granted | 125,202 | 30.79 |
| Performance criteria adjustment | (64,034) | 27.75 |
| Forfeited | (12,915) | 28.01 |
| Share units vested in prior period and issued in current period | 32,400 | 25.31 |
| Share units issued | (125,999) | 36.37 |
| Nonvested share units at end of period | 431,550 | $ 26.16 |

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions using the Monte Carlo valuation method, which assesses probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs is based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The per unit weighted-average fair value at the date of grant for PSUs granted during the six months ended June 30, 2017 and 2016 was $30.79 and $28.89, respectively. The fair value of each PSU grant is amortized monthly into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on our estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows.

(In thousands of dollars, except per share amounts)

***Restricted Stock Units*** – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation cost and income tax benefit for stock-based compensation related to RSUs:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 322 | $ 296 | $ 603 | $ 464 |
| Income tax benefit | 133 | 122 | 249 | 191 |

The following table summarizes the RSU transactions for the six months ended June 30, 2017:

| | Number of Stock Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock units at beginning of period | 109,273 | $ 28.48 |
| Granted | 41,293 | 30.37 |
| Stock units vested and issued | (26,279) | 26.12 |
| Forfeited | (2,287) | 30.52 |
| Nonvested stock units at end of period | 122,000 | $ 29.59 |

The per unit weighted-average fair value at the date of grant for RSUs granted during the six months ended June 30, 2017 and 2016 was $30.37 and $32.09, respectively.

(In thousands of dollars, except per share amounts)

***Stock Options*** – A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire 10 years from the grant date. The fair value of each stock option is amortized into compensation expense using the graded-vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock options:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 74 | $ - | $ 104 | $ - |
| Income tax benefit | 33 | 18 | 125 | 234 |

The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model. The following assumptions were used in the application of this valuation model:

| | 2017 |
|---|---|
| Expected term (years) | 5.45 |
| Risk-free interest rate | 2.01% |
| Expected volatility | 17.7% |
| Dividend yield | 2.51% |
| Grant date fair value per option | $ 4.07 |

Historical information was the principal basis for the selection of the expected term and dividend yield. The expected volatility is based on a weighted-average combination of historical and implied volatilities over a time period that approximates the expected term of the option. The risk-free interest rate was selected based upon the U.S. Treasury yield curve in effect at the time of grant for the expected term of the option.

For the six months ended June 30, 2016, there were no compensation costs for stock-based compensation related to stock options, as the previous stock option grant that occurred in 2010 became fully amortized in 2013. Additionally, there were no stock options granted during the six months ended June 30, 2016.

(In thousands of dollars, except per share amounts)

The following table summarizes stock option transactions for the six months ended June 30, 2017:

| | Shares | Weighted Average Exercise Price | Weighted Average Remaining Life (years) | Aggregate Intrinsic Value |
|---|---|---|---|---|
| Outstanding at beginning of period | 427,335 | $ 15.55 | | |
| Granted | 120,127 | 30.47 | | |
| Forfeited | (1,053) | 30.47 | | |
| Expired / Cancelled | (2,812) | 14.26 | | |
| Exercised | (140,550) | 16.56 | | |
| Outstanding at end of period | 403,047 | $ 19.62 | 4.0 | $ 5,514 |
| | | | | |
| Exercisable at end of period | 283,973 | $ 15.07 | 1.6 | $ 5,177 |

***Stock Awards*** – Stock awards represent the issuance of our common stock, without restriction. The issuance of stock awards results in compensation expense which is equal to the fair market value of the stock on the grant date, and is expensed immediately upon grant. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock awards:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 131 | $ 131 | $ 262 | $ 244 |
| Income tax benefit | 54 | 54 | 109 | 101 |

The following table summarizes stock award transactions for the six months ended June 30, 2017:

| | Number of Stock Awards | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock awards at beginning of period | - | $ - |
| Granted | 8,001 | 32.79 |
| Vested | (8,001) | 32.79 |
| Nonvested stock awards at end of period | - | $ - |

The per unit weighted-average fair value at the date of grant for stock awards granted during the six months ended June 30, 2017 and 2016 was $32.79 and $33.64, respectively.

(In thousands of dollars, except per share amounts)

**Note 9 – *Pension Plans and Other Postretirement Benefits***

The Company maintains a qualified defined benefit pension plan (the "Pension Plan"), a nonqualified pension plan and other postretirement benefit plans for certain of its employees. The net periodic benefit cost is based on estimated values and an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover, and medical costs. The following tables provide the components of net periodic benefit cost:

| | Pension Benefits | | | |
|---|---|---|---|---|
| | Three Months Ended June 30, | | Six Months Ended June 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Service cost | $ 794 | $ 784 | $ 1,587 | $ 1,610 |
| Interest cost | 3,108 | 3,251 | 6,217 | 6,536 |
| Expected return on plan assets | (4,270) | (4,215) | (8,539) | (8,481) |
| Amortization of prior service cost | 145 | 145 | 290 | 290 |
| Amortization of actuarial loss | 2,001 | 1,797 | 4,002 | 3,557 |
| Settlement charge | - | - | - | 3,028 |
| Special termination benefit charge | - | - | - | 302 |
| Net periodic benefit cost | $ 1,778 | $ 1,762 | $ 3,557 | $ 6,842 |

| | Other Postretirement Benefits | | | |
|---|---|---|---|---|
| | Three Months Ended June 30, | | Six Months Ended June 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Service cost | $ 255 | $ 253 | $ 510 | $ 508 |
| Interest cost | 737 | 726 | 1,473 | 1,476 |
| Expected return on plan assets | (647) | (645) | (1,294) | (1,356) |
| Amortization of prior service cost | (127) | (137) | (254) | (274) |
| Amortization of actuarial loss | 291 | 220 | 583 | 487 |
| Net periodic benefit cost | $ 509 | $ 417 | $ 1,018 | $ 841 |

Effective July 1, 2015, the Company added a permanent lump sum option to the form of benefit payments offered to participants of the qualified defined benefit pension plan and non-qualified retirement plans upon retirement or termination. During the first quarter of 2016, the lump sum payments paid to participants who elected this option for payments from the non-qualified retirement plans resulted in a settlement charge.

The Company made cash contributions of $15,421 to its Pension Plan during the first six months of 2017, which completed the Company's 2017 cash contributions.

(In thousands of dollars, except per share amounts)

**Note 10 – *Water and Wastewater Rates***

During the first six months of 2017, the Company's operating divisions in Indiana and Ohio were granted base rate increases designed to increase total operating revenues on an annual basis by $7,403. Further, during the first six months of 2017, the Company's operating divisions in Illinois, New Jersey, and North Carolina received approval to bill infrastructure rehabilitation surcharges designed to increase total operating revenues on an annual basis by $3,659.

**Note 11 – *Taxes Other than Income Taxes***

The following table provides the components of taxes other than income taxes:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Property | $ 6,867 | $ 6,928 | $ 13,652 | $ 13,113 |
| Gross receipts, excise and franchise | 3,363 | 3,113 | 6,538 | 6,059 |
| Payroll | 2,132 | 2,299 | 5,256 | 5,635 |
| Regulatory assessments | 630 | 681 | 1,259 | 1,352 |
| Pumping fees | 1,350 | 1,140 | 2,294 | 2,059 |
| Other | 77 | 81 | 157 | 164 |
| Total taxes other than income | $ 14,419 | $ 14,242 | $ 29,156 | $ 28,382 |

**Note 12 – *Segment Information***

The Company has ten operating segments and one reportable segment. The Regulated segment, the Company's single reportable segment, is comprised of eight operating segments representing our water and wastewater regulated utility companies which are organized by the states where we provide water and wastewater services. These operating segments are aggregated into one reportable segment because each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment.

Two operating segments are included within the Other category below. These segments are not quantitatively significant and are comprised of Aqua Resources and Aqua Infrastructure. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to our utility companies' service territories; and offers, through a third party, water and sewer line repair service and protection solutions to households. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. In addition to these segments, Other is comprised of other business activities not included in the reportable segment, including corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense. Additionally, contained within total assets for the Other category, in the table below, is a regulatory asset for postretirement benefits for the underfunded status of the Company's pension and other postretirement benefit plans and an intercompany receivable.

(In thousands of dollars, except per share amounts)

The following table presents information about the Company's reportable segment:

| | Three Months Ended June 30, 2017 | | | Three Months Ended June 30, 2016 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other | Consolidated | Regulated | Other | Consolidated |
| Operating revenues | $ 201,960 | $ 1,458 | $ 203,418 | $ 198,086 | $ 5,790 | $ 203,876 |
| Operations and maintenance expense | 72,560 | (1,707) | 70,853 | 69,676 | 4,318 | 73,994 |
| Depreciation | 34,141 | (734) | 33,407 | 32,214 | (595) | 31,619 |
| Operating income | 81,152 | 3,460 | 84,612 | 82,018 | 1,475 | 83,493 |
| Interest expense, net | 19,747 | 1,640 | 21,387 | 19,093 | 1,022 | 20,115 |

**Note 13 – *Commitments and Contingencies***

The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of June 30, 2017, the aggregate amount of $15,259 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, the Company has insurance coverage for certain of these loss contingencies, and as of June 30, 2017, estimates that approximately $3,407 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets.

In addition to the aforementioned loss contingencies, the Company self-insures its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,770 at June 30, 2017 and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

**Note 14 –** ***Income Taxes***

During the six months ended June 30, 2017, the Company's Federal net operating loss ("NOL") carryforward decreased by $15,986. In addition, during the six months ended June 30, 2017, the Company's state NOL carryforward increased by $11,925. As of June 30, 2017, the balance of the Company's Federal NOL was $97,158. The Company believes its Federal NOL carryforward is more likely than not to be recovered and requires no valuation allowance. As of June 30, 2017, the balance of the Company's gross state NOL was $587,066, a portion of which is offset by a valuation allowance because the Company does not believe the state NOLs are more likely than not to be realized. The Company's Federal and state NOL carryforwards begin to expire in 2032 and 2023, respectively. The Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $63,631 and $85,232, respectively. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions were $160,789 and $672,298 respectively. The Company records its unrecognized tax benefit as a reduction to its deferred income tax liability.

In accordance with a 2012 settlement agreement with the Pennsylvania Public Utility Commission, Aqua Pennsylvania expenses, for tax purposes, qualifying utility asset improvement costs, which results in a substantial reduction in income tax expense and greater net income and cash flows. The Company's effective income tax rate for the second quarter of 2017 and 2016 was 8.4% and 8.5%, respectively, and for the first six months of 2017 and 2016 was 7.2% and 7.1%, respectively.

As of June 30, 2017, the total gross unrecognized tax benefit was $28,464, of which $22,364, if recognized, would affect the Company's effective tax rate as a result of the regulatory treatment afforded for qualifying infrastructure improvements in Pennsylvania. At December 31, 2016, the Company had unrecognized tax benefits of $28,099.

Accounting rules for uncertain tax positions specify that tax positions for which the timing of resolution is uncertain should be classified as long-term liabilities. Judgment is required in evaluating the Company's uncertain tax positions and determining the provision for income taxes. Management believes that an adequate provision has been made for any adjustments that may result from tax examinations. Although the timing of income tax audit resolutions and negotiations with taxing authorities is highly uncertain, the Company does not anticipate a significant change to the total amount of unrecognized income tax benefits within the next 12 months.

**Note 15 –** ***Recent Accounting Pronouncements***

In March 2017, the FASB issued updated accounting guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Historically, net benefit cost is reported as an employee cost within operating income, net of amounts capitalized. The guidance requires the bifurcation of net benefit cost. The service cost component will be presented with other employee compensation costs in operating income and the other components of net benefit cost will be reported separately outside of operating income, and will not be eligible for capitalization. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption.

In January 2017, the FASB issued updated accounting guidance that eliminates step 2 of the current goodwill impairment test, which requires a hypothetical purchase price allocation to measure goodwill impairment. A goodwill impairment loss will instead be measured at the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The guidance will be effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period, with early adoption permitted for any impairment test performed on testing dates after January 1, 2017. The Company has elected to early adopt the provisions of the updated guidance, for its annual impairment valuation to be performed in the third quarter of 2017, and does not expect the provisions of the updated guidance to have an impact on its results of operations or financial position.

In August 2016, the FASB issued updated accounting guidance on the classification of certain cash receipts and cash payments in the statement of cash flows, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. The Company is currently evaluating the impact of this new standard on its consolidated cash flow statement, but does not expect there to be a significant impact.

In March 2016, the FASB issued updated accounting guidance on simplifying the accounting for share-based payments, which includes several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The updated guidance was effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption available. On January 1, 2017, the Company adopted the updated guidance, prospectively, and recognized a previously unrecognized windfall tax benefit for stock-based compensation of $982 associated with the Company's 2012 Federal net operating loss, which was recorded as an adjustment to deferred income taxes and retained earnings (refer to the presentation of "cumulative effect of change in accounting principle - windfall tax benefit" on our Consolidated Statement of Equity). Additionally, income tax benefits in excess of compensation costs or tax deficiencies for share-based compensation are now recorded to our income tax provision, instead of historically to stockholder's equity, which impacts our effective tax rate. Lastly, all tax-related cash flows resulting from share-based payments are reported prospectively as operating activities on the statement of cash flows, a change from the historical requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities.

In February 2016, the FASB issued updated accounting guidance on accounting for leases, which requires lessees to establish a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. For income statement purposes, leases will be classified as either operating or finance. Operating leases will result in straight-line expense while finance leases will result in a front-loaded expense pattern. The updated accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption available. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption.

In January 2016, the FASB issued updated accounting guidance on the recognition and measurement of financial assets and financial liabilities, which amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. The updated guidance is effective for interim and annual periods beginning after December 31, 2017. The Company does not expect the provisions of the updated guidance to have a material impact on its results of operations or financial position.

In May 2014, the FASB issued updated accounting guidance on recognizing revenue from contracts with customers, which outlines a single comprehensive model that an entity will apply to determine the measurement of revenue and timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The updated guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Additionally, the accounting for contributions in aid of construction may be impacted by the updated accounting guidance if the contributions are determined to be in scope. In July 2015, the FASB approved a one year deferral to the original effective date of this guidance. The updated guidance is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the updated guidance in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting the updated guidance recognized through retained earnings at the date of adoption. In 2016, the Company performed an evaluation of the requirements of the updated guidance and based on current interpretations of the updated guidance believes that the impact of adoption may not result in a material change in our measurement of revenue and timing of recognition if contributions in aid of construction are determined to not be in scope. In 2017, the American Institute of Certified Public Accountants (AICPA) power and utility entities revenue recognition task force has determined that contributions in aid of construction are not in the scope of the new standard, and submitted its determination to the AICPA's revenue recognition working group for approval. We plan to implement the updated guidance using the modified retrospective approach on January 1, 2018.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(In thousands of dollars, except per share amounts)

Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations

## Forward-looking Statements

*This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Quarterly Report contain, in addition to historical information, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address, among other things: the projected impact of various legal proceedings; the projected effects of recent accounting pronouncements; prospects, plans, objectives, expectations and beliefs of management, as well as information contained in this report where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Forward-looking statements are based on a number of assumptions concerning future events, and are subject to a number of risks, uncertainties and other factors, many of which are outside our control, which could cause actual results to differ materially from those expressed or implied by such statements. These risks and uncertainties include, among others: the effects of regulation, abnormal weather, changes in capital requirements and funding, acquisitions, changes to the capital markets, and our ability to assimilate acquired operations, as well as those risks, uncertainties and other factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in such report. As a result, readers are cautioned not to place undue reliance on any forward-looking statements. We undertake no obligation to update or revise forward-looking statements, whether as a result of new information, future events or otherwise.*

## General Information

Aqua America, Inc. ("we", "us", "our" or the "Company"), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to what we estimate to be almost three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary, Aqua Pennsylvania, provides water or wastewater services to approximately one-half of the total number of people we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to our utility companies' service territories; and offers, through a third party, water and wastewater line repair service and protection solutions to households.

During 2016, we completed the sale of business units within Aqua Resources which provided liquid waste hauling and disposal services, and inspection, cleaning and repair of storm and sanitary wastewater lines. Additionally, in 2016, we decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repairs and performs maintenance on water and wastewater systems, for which the sale was completed in June 2017.

Aqua America, Inc., which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth-through-acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and has extended our regulated operations from southeastern Pennsylvania to include operations in seven other states. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to opportunistically pursue growth ventures in select market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

*The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes.*

## Financial Condition

During the first six months of 2017, we had $208,472 of capital expenditures, expended $5,765 for the acquisition of water and wastewater utility systems, issued $222,780 of long-term debt, and repaid debt and made sinking fund contributions and other loan repayments of $145,499. The capital expenditures were related to new and replacement water mains, improvements to treatment plants, tanks, hydrants, and service lines, well and booster improvements, and other enhancements and improvements. The issuance of long-term debt was comprised principally of the funds borrowed under our revolving credit facility and the issuance of $50,000 of first mortgage bonds by Aqua Pennsylvania in January 2017.

At June 30, 2017, we had $7,811 of cash and cash equivalents compared to $3,763 at December 31, 2016. During the first six months of 2017, we used the proceeds from the issuance of long-term debt and internally generated funds to fund the cash requirements discussed above and to pay dividends.

At June 30, 2017, our $250,000 unsecured revolving credit facility, which expires in February 2021, had $97,547 available for borrowing. At June 30, 2017, we had short-term lines of credit of $135,500, of which $68,044 was available for borrowing. One of our short-term lines of credit is an Aqua Pennsylvania $100,000 364-day unsecured revolving credit facility with four banks, which is used to provide working capital, and as of June 30, 2017, $33,534 was available for borrowing. Subsequently, in July we issued $180,000 of long-term debt, the proceeds of which were used to reduce our borrowings under our revolving credit facilities.

Our short-term lines of credit of $135,500 are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

The Company's consolidated balance sheet historically has had a negative working capital position whereby routinely our current liabilities exceed our current assets. Management believes that internally generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

## Results of Operations

### Analysis of Second Quarter of 2017 Compared to Second Quarter of 2016

Revenues decreased by $458 or 0.2%, primarily due to a decrease in market-based activities revenue of $4,376 associated with the dispositions of business units, offset by an increase in customer water consumption, an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $1,840, and additional water and wastewater revenues from organic growth of $733.

Operations and maintenance expenses decreased by $3,141 or 4.2%, due to a reduction in operating expenses for Aqua Resources of $4,174 associated with the disposition of business units.

Depreciation expense increased by $1,788 or 5.7%, primarily due to the utility plant placed in service since June 30, 2016.

Interest expense increased by $1,272 or 6.3%, primarily due to an increase in average borrowings, offset by a decrease in our effective interest rate.

Allowance for funds used during construction ("AFUDC") increased by $1,592, due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

Our effective income tax rate was 8.4% in the second quarter of 2017 and 8.5% in the second quarter of 2016. The effective income tax rate decreased due to the effect of additional tax deductions recognized in the second quarter of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

AQUA AMERICA, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)
(In thousands of dollars, except per share amounts)

Net income increased by $1,342 or 2.3%, primarily as a result of the factors described above.

## Analysis of First Six Months of 2017 Compared to First Six Months of 2016

Revenues decreased by $5,278 or 1.3%, primarily due to a decrease in market-based activities revenue of $9,539 associated with the dispositions of business units, offset by an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $2,827, and additional water and wastewater revenues from organic growth of $1,800.

Operations and maintenance expenses decreased by $7,554 or 5.1%, due to a reduction in operating expenses for Aqua Resources of $8,732 associated with the disposition of business units, offset by the prior year effect of a gain on sale of a utility system of $1,215. The gain on sale of a utility system is reported in the consolidated statement of net income as a component of operations and maintenance expense.

Depreciation expense increased by $3,480 or 5.5%, primarily due to the utility plant placed in service since June 30, 2016.

Taxes other than income taxes increased by $774 or 2.7% primarily due to an increase in property taxes of $539 primarily due to the effect of a benefit recorded in 2016 for Ohio based on the final settlement of a property tax bill.

Interest expense increased by $2,745 or 6.9%, primarily due to an increase in average borrowings, offset by a decrease in our effective interest rate.

Allowance for funds used during construction ("AFUDC") increased by $2,477, due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

Our effective income tax rate was 7.2% in the first six months of 2017 and 7.1% in the first six months of 2016. The effective income tax rate increased due to the effect of less tax deductions recognized in the first six months of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

Net income decreased by $1,323 or 1.2%, primarily as a result of the factors described above.

## Impact of Recent Accounting Pronouncements

We describe the impact of recent accounting pronouncements in Note 15, *Recent Accounting Pronouncements*, to the consolidated financial statements in this report.

## Item 3 – Quantitative and Qualitative Disclosures About Market Risk

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes in our exposure to market risks since December 31, 2016. Refer to Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for additional information.

## Item 4 – Controls and Procedures

### (a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective such that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

### (b) Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

# Part II. Other Information

## Item 1 – Legal Proceedings

We are party to various legal proceedings. Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our properties is the subject that we believe are material or are expected to have a material adverse effect on our financial position, results of operations or cash flows.

## Item 1A – Risk Factors

There have been no material changes to the risks disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016 under "Part 1, Item 1A – Risk Factors."

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes the Company's purchases of its common stock for the quarter ended June 30, 2017:

Issuer Purchases of Equity Securities

| Period | Total Number of Shares Purchased (1) | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet be Purchased Under the Plan or Programs |
|---|---|---|---|---|
| April 1-30, 2017 | - | $ - | - | - |
| May 1-31, 2017 | 1,259 | $ 31.49 | - | - |
| June 1-30, 2017 | - | $ - | - | - |
| Total | 1,259 | $ 31.49 | - | - |

(1) These amounts include the following: (a) 281 shares we acquired from employees associated with the withholding of shares to pay certain withholding taxes upon the vesting of stock-based compensation; and (b) 978 shares we acquired from our employees who elected to pay the exercise price of their stock options (and then hold shares of the stock), upon exercise, by delivering to us shares of our common stock in accordance with the terms of our equity compensation plan that were previously approved by our shareholders and disclosed in our proxy statements. These features of our equity compensation plan are available to all employees who receive stock-based compensation under the plan. We purchased these shares at their fair market value, as determined by reference to the closing price of our common stock on the day prior to the option exercise.

Item 6 – Exhibits

The information required by this Item is set forth in the Exhibit Index hereto which is incorporated herein by reference.

Exhibit 31.1

CERTIFICATION OF CHIEF EXECUTIVE OFFICER, PURSUANT TO RULE 13A-14(A) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, Christopher H. Franklin, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting, and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
    a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

CERTIFICATION OF CHIEF FINANCIAL OFFICER, PURSUANT TO RULE 13A-14(A) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, David P. Smeltzer, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting, and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

AQUA AMERICA, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(In thousands of dollars, except per share amounts)
(UNAUDITED)

**Note 1 – *Basis of Presentation***

The accompanying consolidated balance sheets and statements of capitalization of Aqua America, Inc. and subsidiaries (the "Company") at September 30, 2017, the consolidated statements of net income and comprehensive income for the three and nine months ended September 30, 2017 and 2016 the consolidated statements of cash flow for the nine months ended September 30, 2017 and 2016, and the consolidated statement of equity for the nine months ended September 30, 2017 are unaudited, but reflect all adjustments, consisting of only normal recurring accruals, which are, in the opinion of management, necessary to present a fair statement of its consolidated financial position, consolidated changes in equity, consolidated results of operations, and consolidated cash flow for the periods presented. Because they cover interim periods, the statements and related notes to the financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2016. The results of operations for interim periods may not be indicative of the results that may be expected for the entire year. The December 31, 2016 consolidated balance sheet data presented herein was derived from the Company's December 31, 2016 audited consolidated financial statements, but does not include all disclosures and notes normally provided in annual financial statements. Certain prior period amounts have been reclassified to conform to the current period presentation in the consolidated statements of cash flows:

- pension and other postretirement benefit contributions, and
- as a result of the early adoption, in the third quarter of 2017, of the Financial Accounting Standards Board's ("FASB") accounting guidance on the classification of certain cash receipts and cash payments, the presentation of debt extinguishment costs (refer to Note 15 – *Recent Accounting Pronouncements*).

The preparation of financial statements often requires the selection of specific accounting methods and policies. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in its consolidated balance sheets, the revenues and expenses in its consolidated statements of net income, and the information that is contained in its summary of significant accounting policies and notes to consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that the Company includes currently in its consolidated financial statements, summary of significant accounting policies, and notes.

There have been no changes to the summary of significant accounting policies previously identified in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

(In thousands of dollars, except per share amounts)

**Note 2 – *Goodwill***

The following table summarizes the changes in the Company's goodwill, by business segment:

| | Regulated Segment | Other | Consolidated |
|---|---|---|---|
| Balance at December 31, 2016 | $ 37,367 | $ 4,841 | $ 42,208 |
| Goodwill acquired | 72 | - | 72 |
| Reclassification to utility plant acquisition adjustment | (50) | - | (50) |
| Balance at September 30, 2017 | $ 37,389 | $ 4,841 | $ 42,230 |

The reclassification of goodwill to utility plant acquisition adjustment results from a mechanism approved by the applicable utility commission. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with some acquisitions upon achieving specific objectives.

Goodwill is not amortized but is tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. When testing goodwill for impairment, the Company may assess qualitative factors, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, and entity specific events. Alternatively, the Company may bypass this qualitative assessment for some of its reporting units and perform a quantitative goodwill impairment test by determining the fair value of a reporting unit based on a discounted cash flow analysis. The Company tested the goodwill attributable to each of its reporting units for impairment as of July 31, 2017, in conjunction with the timing of its annual strategic business plan, and concluded that the estimated fair value of each reporting unit, which has goodwill recorded, exceeded the reporting unit's carrying amount, indicating that none of the Company's goodwill was impaired.

**Note 3 – *Acquisitions***

During the first nine months of 2017, the Company completed four acquisitions of water and wastewater utility systems in various states adding 1,003 customers. The total purchase price of these utility systems consisted of $5,860 in cash, which resulted in $72 of goodwill being recorded. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

As part of the Company's growth-through-acquisition strategy, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of five municipalities for a total combined purchase price in cash of $145,700. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and is subject to regulatory approvals. Closing for these acquisitions are expected to occur by mid-year 2018, which is subject to the timing of the regulatory approval process. These acquisitions will add approximately 14,900 customers in two of the states that the Company operates in.

Pursuant to its strategy to grow through acquisitions, in January 2016, the Company acquired Superior Water Company, Inc., which provides public water service to approximately 3,900 customers in portions of Berks, Chester, and Montgomery counties in Pennsylvania. The total purchase price for the utility system was $16,750, which consisted of the issuance of 439,943 shares of the Company's common stock and $3,905 in cash. The purchase price allocation for this acquisition consisted primarily of acquired property, plant and equipment of $25,167, contributions in aid of construction of $16,565, and goodwill of $8,622. Additionally, during 2016, the Company completed eighteen acquisitions of water and wastewater utility systems in various states adding 2,469 customers. The total purchase price of these utility systems consisted of $5,518 in cash, which resulted in $1,756 of goodwill being recorded. The pro forma effect of the businesses acquired is not material either individually or collectively to the Company's results of operations.

**Note 4 – *Assets Held for Sale***

In the first quarter of 2017, the Company decided to market for sale a water system that serves approximately 265 customers. This water system is reported as assets held for sale in the Company's consolidated balance sheet.

In the second quarter of 2016, the Company decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repairs and performs maintenance on water and wastewater systems, for which the sale was completed in June 2017.

(In thousands of dollars, except per share amounts)

**Note 5 – *Capitalization***

In October 2017, Aqua Pennsylvania issued $75,000 of first mortgage bonds, of which $35,000 is due in 2054, $20,000 is due in 2055, and $20,000 is due in 2057 with interest rates of 4.06%, 4.07%, and 4.09%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In July 2017, Aqua Illinois issued $100,000 of first mortgage bonds consisting of the following:

| Amount | Interest Rate | Maturity |
|---|---|---|
| $25,000 | 3.64% | 2032 |
| $6,000 | 3.89% | 2037 |
| $15,000 | 3.90% | 2038 |
| $10,000 | 4.18% | 2047 |
| $22,000 | 4.22% | 2049 |
| $22,000 | 4.24% | 2050 |

The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In July 2017, Aqua Pennsylvania issued $80,000 of first mortgage bonds, of which $40,000 is due in 2055 and $40,000 is due in 2057 with interest rates of 4.04% and 4.06%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

In January 2017, Aqua Pennsylvania issued $50,000 of first mortgage bonds, of which $10,000 is due in 2042 and $40,000 is due in 2044 with interest rates of 3.65% and 3.69%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

**Note 6 – *Fair Value of Financial Instruments***

The Company follows the FASB's accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;

- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

- Level 3: inputs that are unobservable and significant to the fair value measurement.

(In thousands of dollars, except per share amounts)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. There have been no changes in the valuation techniques used to measure fair value, or asset or liability transfers between the levels of the fair value hierarchy for the quarter ended September 30, 2017.

Financial instruments are recorded at carrying value in the financial statements and approximate fair value as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of loans payable is determined based on its carrying amount and utilizing Level 1 methods and assumptions. As of September 30, 2017 and December 31, 2016, the carrying amount of the Company's loans payable was $20,990 and $6,535, respectively, which equates to their estimated fair value. The Company's deferred compensation plan liability is determined by the fair value of mutual funds, which are based on quoted market prices from active markets utilizing Level 1 methods and assumptions. As of September 30, 2017 and December 31, 2016, the carrying amount of these securities was $18,145 and $17,072, which equates to their fair value, and is reported in the consolidated balance sheet in deferred charges and other assets. The fair value of cash and cash equivalents, which is comprised of a money market fund, is determined based on the net asset value per unit utilizing Level 2 methods and assumptions. As of September 30, 2017 and December 31, 2016, the carrying amounts of the Company's cash and cash equivalents was $4,139 and $3,763, respectively, which equates to their fair value.

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

| | September 30, 2017 | December 31, 2016 |
|---|---|---|
| Carrying Amount | $ 2,059,031 | $ 1,910,633 |
| Estimated Fair Value | 2,185,051 | 2,018,933 |

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing Level 2 methods and assumptions. The Company's customers' advances for construction have a carrying value of $107,715 as of September 30, 2017, and $91,843 as of December 31, 2016. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rate increases. Portions of these non-interest bearing instruments are payable annually through 2027 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

**Note 7 – *Net Income per Common Share***

Basic net income per common share is based on the weighted average number of common shares outstanding. Diluted net income per common share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per common share. The dilutive effect of stock-based compensation is calculated using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The treasury stock method assumes that the proceeds from stock-based compensation are used to purchase the Company's common stock at the average market price during the period. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per common share:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Average common shares outstanding during the period for basic computation | 177,660 | 177,336 | 177,583 | 177,243 |
| Dilutive effect of employee stock-based compensation | 464 | 481 | 520 | 538 |
| Average common shares outstanding during the period for diluted computation | 178,124 | 177,817 | 178,103 | 177,781 |

For the three and nine months ended September 30, 2017 and 2016, all of the Company's employee stock options were included in the calculations of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods.

**Note 8 – *Stock-based Compensation***

Under the Company's 2009 Omnibus Equity Compensation Plan, as amended as of February 27, 2014 (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. The 2009 Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the 2009 Plan may be issued pursuant to stock awards, stock units and other stock-based awards, subject to adjustment as provided in the 2009 Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the 2009 Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the 2009 Plan. Awards to employees and consultants under the 2009 Plan are made by a committee of the Board of Directors of the Company, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At September 30, 2017, 3,741,526 shares were still available for issuance under the 2009 Plan. No further grants may be made under the 2004 Plan.

(In thousands of dollars, except per share amounts)

***Performance Share Units*** – A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three-year performance period specified in the grant, subject to exceptions through the respective vesting period, generally three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals. The following table provides compensation costs for stock-based compensation related to PSUs:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 1,035 | $ 1,012 | $ 2,875 | $ 2,504 |
| Income tax benefit | 420 | 411 | 1,167 | 1,013 |

The following table summarizes the PSU transactions for the nine months ended September 30, 2017:

| | Number of Share Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested share units at beginning of period | 476,896 | $ 27.96 |
| Granted | 125,202 | 30.79 |
| Performance criteria adjustment | (64,398) | 27.75 |
| Forfeited | (16,306) | 28.26 |
| Share units vested in prior period and issued in current period | 32,400 | 25.31 |
| Share units issued | (125,999) | 36.37 |
| Nonvested share units at end of period | 427,795 | $ 26.13 |

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions using the Monte Carlo valuation method, which assesses probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs is based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The per unit weighted-average fair value at the date of grant for PSUs granted during the nine months ended September 30, 2017 and 2016 was $30.79 and $28.89, respectively. The fair value of each PSU grant is amortized monthly into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on the Company's estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows.

(In thousands of dollars, except per share amounts)

***Restricted Stock Units*** – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation cost and income tax benefit for stock-based compensation related to RSUs:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 311 | $ 299 | $ 915 | $ 763 |
| Income tax benefit | 129 | 124 | 378 | 315 |

The following table summarizes the RSU transactions for the nine months ended September 30, 2017:

| | Number of Stock Units | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock units at beginning of period | 109,273 | $ 28.48 |
| Granted | 41,293 | 30.37 |
| Stock units vested and issued | (26,914) | 26.18 |
| Forfeited | (2,287) | 30.52 |
| Nonvested stock units at end of period | 121,365 | $ 29.60 |

The per unit weighted-average fair value at the date of grant for RSUs granted during the nine months ended September 30, 2017 and 2016 was $30.37 and $32.09, respectively.

***Stock Options*** – A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire 10 years from the grant date. The fair value of each stock option is amortized into compensation expense using the graded-vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock options:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 73 | $ - | $ 177 | $ - |
| Income tax benefit | 43 | 15 | 167 | 249 |

(In thousands of dollars, except per share amounts)

The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model. The following assumptions were used in the application of this valuation model:

| | 2017 |
|---|---|
| Expected term (years) | 5.45 |
| Risk-free interest rate | 2.01% |
| Expected volatility | 17.7% |
| Dividend yield | 2.51% |
| Grant date fair value per option | $ 4.07 |

Historical information was the principal basis for the selection of the expected term and dividend yield. The expected volatility is based on a weighted-average combination of historical and implied volatilities over a time period that approximates the expected term of the option. The risk-free interest rate was selected based upon the U.S. Treasury yield curve in effect at the time of grant for the expected term of the option.

For the nine months ended September 30, 2016, there were no compensation costs for stock-based compensation related to stock options, as the previous stock option grant that occurred in 2010 became fully amortized in 2013. Additionally, there were no stock options granted during the nine months ended September 30, 2016.

The following table summarizes stock option transactions for the nine months ended September 30, 2017:

| | Shares | Weighted Average Exercise Price | Weighted Average Remaining Life (years) | Aggregate Intrinsic Value |
|---|---|---|---|---|
| Outstanding at beginning of period | 427,335 | $ 15.55 | | |
| Granted | 120,127 | 30.47 | | |
| Forfeited | (2,439) | 30.47 | | |
| Expired / Cancelled | (2,812) | 14.26 | | |
| Exercised | (157,621) | 16.51 | | |
| Outstanding at end of period | 384,590 | $ 19.73 | 3.9 | $ 5,175 |
| | | | | |
| Exercisable at end of period | 266,902 | $ 15.00 | 1.4 | $ 4,855 |

(In thousands of dollars, except per share amounts)

***Stock Awards*** – Stock awards represent the issuance of the Company's common stock, without restriction. The issuance of stock awards results in compensation expense which is equal to the fair market value of the stock on the grant date, and is expensed immediately upon grant. The following table provides the compensation cost and income tax benefit for stock-based compensation related to stock awards:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Stock-based compensation within operations and maintenance expenses | $ 150 | $ 131 | $ 412 | $ 375 |
| Income tax benefit | 62 | 54 | 171 | 155 |

The following table summarizes stock award transactions for the nine months ended September 30, 2017:

| | Number of Stock Awards | Weighted Average Fair Value |
|---|---|---|
| Nonvested stock awards at beginning of period | - | $ - |
| Granted | 12,529 | 32.92 |
| Vested | (12,529) | 32.92 |
| Nonvested stock awards at end of period | - | $ - |

The per unit weighted-average fair value at the date of grant for stock awards granted during the nine months ended September 30, 2017 and 2016 was $32.92 and $32.57, respectively.

(In thousands of dollars, except per share amounts)

**Note 9 – *Pension Plans and Other Postretirement Benefits***

The Company maintains a qualified defined benefit pension plan (the "Pension Plan"), a nonqualified pension plan and other postretirement benefit plans for certain of its employees. The net periodic benefit cost is based on estimated values and an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover, and medical costs. The following tables provide the components of net periodic benefit cost:

| | Pension Benefits | | | |
|---|---|---|---|---|
| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Service cost | $ 794 | $ 784 | $ 2,382 | $ 2,394 |
| Interest cost | 3,108 | 3,251 | 9,324 | 9,787 |
| Expected return on plan assets | (4,270) | (4,215) | (12,810) | (12,696) |
| Amortization of prior service cost | 145 | 145 | 435 | 435 |
| Amortization of actuarial loss | 2,001 | 1,797 | 6,003 | 5,354 |
| Settlement charge | - | - | - | 3,028 |
| Special termination benefit charge | - | - | - | 302 |
| Net periodic benefit cost | $ 1,778 | $ 1,762 | $ 5,334 | $ 8,604 |

| | Other Postretirement Benefits | | | |
|---|---|---|---|---|
| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Service cost | $ 255 | $ 253 | $ 765 | $ 761 |
| Interest cost | 737 | 726 | 2,211 | 2,202 |
| Expected return on plan assets | (647) | (645) | (1,941) | (2,001) |
| Amortization of prior service cost | (127) | (137) | (381) | (411) |
| Amortization of actuarial loss | 291 | 220 | 873 | 707 |
| Net periodic benefit cost | $ 509 | $ 417 | $ 1,527 | $ 1,258 |

Effective July 1, 2015, the Company added a permanent lump sum option to the form of benefit payments offered to participants of the qualified defined benefit pension plan and non-qualified retirement plans upon retirement or termination. During the first quarter of 2016, the lump sum payments paid to participants who elected this option for payments from the non-qualified retirement plans resulted in a settlement charge.

The Company made cash contributions of $15,421 to its Pension Plan during the first six months of 2017, which completed the Company's 2017 cash contributions.

(In thousands of dollars, except per share amounts)

**Note 10 – *Water and Wastewater Rates***

During the first nine months of 2017, the Company's operating divisions in Indiana and Ohio were granted base rate increases designed to increase total operating revenues on an annual basis by $7,403. Further, during the first nine months of 2017, the Company's operating divisions in Illinois, New Jersey, and North Carolina received approval to bill infrastructure rehabilitation surcharges designed to increase total operating revenues on an annual basis by $3,659.

**Note 11 – *Taxes Other than Income Taxes***

The following table provides the components of taxes other than income taxes:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Property | $ 6,955 | $ 7,007 | $ 20,608 | $ 20,119 |
| Gross receipts, excise and franchise | 3,969 | 3,409 | 10,507 | 9,468 |
| Payroll | 2,066 | 2,140 | 7,322 | 7,775 |
| Regulatory assessments | 674 | 639 | 1,933 | 1,991 |

**Note 12 – *Segment Information***

The Company has ten operating segments and one reportable segment. The Regulated segment, the Company's single reportable segment, is comprised of eight operating segments representing its water and wastewater regulated utility companies which are organized by the states where the Company provides water and wastewater services. These operating segments are aggregated into one reportable segment because each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment.

Two operating segments are included within the Other category below. These segments are not quantitatively significant and are comprised of Aqua Resources and Aqua Infrastructure. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to its utility companies' service territories; and offers, through a third party, water and sewer line repair service and protection solutions to households. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. In addition to these segments, Other is comprised of other business activities not included in the reportable segment, including corporate costs that have not been allocated to the Regulated segment and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense. Additionally, contained within total assets for the Other category, in the table below, is a regulatory asset for postretirement benefits for the underfunded status of the Company's pension and other postretirement benefit plans and an intercompany receivable.

(In thousands of dollars, except per share amounts)

The following table presents information about the Company's reportable segment:

| | Three Months Ended September 30, 2017 | | | Three Months Ended September 30, 2016 | | |
|---|---|---|---|---|---|---|
| | Regulated | Other | Consolidated | Regulated | Other | Consolidated |
| Operating revenues | $ 214,032 | $ 976 | $ 215,008 | $ 222,231 | $ 4,362 | $ 226,593 |
| Operations and maintenance expense | 70,772 | (2,790) | 67,982 | 73,013 | 6,799 | 79,812 |

| Regulated | $ 6,355,896 | $ 5,953,702 |
| Other | 189,485 | 205,289 |
| Consolidated | $ 6,545,381 | $ 6,158,991 |

**Note 13 – *Commitments and Contingencies***

The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of September 30, 2017, the aggregate amount of $16,898 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, the Company has insurance coverage for certain of these loss contingencies, and as of September 30, 2017, estimates that approximately $5,415 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets.

In addition to the aforementioned loss contingencies, the Company self-insures its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,451 at September 30, 2017 and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

**Note 14 – *Income Taxes***

During the nine months ended September 30, 2017, the Company's Federal net operating loss ("NOL") carryforward decreased by $31,935. In addition, during the nine months ended September 30, 2017, the Company's state NOL carryforward increased by $23,173. As of September 30, 2017, the balance of the Company's Federal NOL was $81,208. The Company believes its Federal NOL carryforward is more likely than not to be recovered and requires no valuation allowance. As of September 30, 2017, the balance of the Company's gross state NOL was $600,358, a portion of which is offset by a valuation allowance because the Company does not believe the state NOLs are more likely than not to be realized. The Company's Federal and state NOL carryforwards begin to expire in 2032 and 2023, respectively. The Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $64,738 and $85,523, respectively. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions were $145,947 and $685,880 respectively. The Company records its unrecognized tax benefit as a reduction to its deferred income tax liability.

In accordance with a 2012 settlement agreement with the Pennsylvania Public Utility Commission, Aqua Pennsylvania expenses, for tax purposes, qualifying utility asset improvement costs, which results in a substantial reduction in income tax expense and greater net income and cash flows. The Company's effective income tax rate for the third quarter of 2017 and 2016 was 4.3% and 10.3%, respectively, and for the first nine months of 2017 and 2016 was 6.0% and 8.4%, respectively.

As of September 30, 2017 regulatory assets increased by $96,140, as compared to the beginning of the year, primarily due to the effect of additional tax deductions for certain qualifying infrastructure improvements, which results in differences between costs capitalized for book and deducted as an expense for tax purposes.

As of September 30, 2017, the total gross unrecognized tax benefit was $28,938, of which $23,700, if recognized, would affect the Company's effective tax rate as a result of the regulatory treatment afforded for qualifying infrastructure improvements in Pennsylvania. At December 31, 2016, the Company had unrecognized tax benefits of $28,099.

Accounting rules for uncertain tax positions specify that tax positions for which the timing of resolution is uncertain should be classified as long-term liabilities. Judgment is required in evaluating the Company's uncertain tax positions and determining the provision for income taxes. Management believes that an adequate provision has been made for any adjustments that may result from tax examinations. Although the timing of income tax audit resolutions and negotiations with taxing authorities is highly uncertain, the Company does not anticipate a significant change to the total amount of unrecognized income tax benefits within the next 12 months.

**Note 15 – *Recent Accounting Pronouncements***

In March 2017, the FASB issued updated accounting guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Historically, net benefit cost is reported as an employee cost within operating income, net of amounts capitalized. The guidance requires the bifurcation of net benefit cost. The service cost component will be presented with other employee compensation costs in operating income and the other components of net benefit cost will be reported separately outside of operating income, and will not be eligible for capitalization. The guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within that reporting period, and is to be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and on a prospective basis for the capitalization of only the service cost component of net benefit cost. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption, and does not believe it will have a material impact on its results of operations or financial position.

In January 2017, the FASB issued updated accounting guidance that eliminates step 2 of the current goodwill impairment test, which requires a hypothetical purchase price allocation to measure goodwill impairment. A goodwill impairment loss will instead be measured at the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The guidance will be effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period, with early adoption permitted for any impairment test performed on testing dates after January 1, 2017. The Company has elected to early adopt the provisions of the updated guidance, for its annual impairment valuation performed in the third quarter of 2017, and the provisions of the updated guidance did not have an impact on its results of operations or financial position.

In August 2016, the FASB issued updated accounting guidance on the classification of certain cash receipts and cash payments in the statement of cash flows, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. The Company has elected to early adopt the provisions of the updated guidance, which resulted in the reclassification of $375 debt extinguishment costs, for the nine months ended September 30, 2016, from cash flows from operating to financing activities to conform to the new classification.

In March 2016, the FASB issued updated accounting guidance on simplifying the accounting for share-based payments, which includes several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The updated guidance was effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption available. On January 1, 2017, the Company adopted the updated guidance, prospectively, and recognized a previously unrecognized windfall tax benefit for stock-based compensation of $982 associated with the Company's 2012 Federal net operating loss, which was recorded as an adjustment to deferred income taxes and retained earnings (refer to the presentation of "cumulative effect of change in accounting principle - windfall tax benefit" on the Company's Consolidated Statement of Equity). Additionally, income tax benefits in excess of compensation costs or tax deficiencies for share-based compensation are now recorded to the Company's income tax provision, instead of historically to stockholder's equity, which impacts its effective tax rate. Lastly, all tax-related cash flows resulting from share-based payments are reported prospectively as operating activities on the statement of cash flows, a change from the historical requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities.

In February 2016, the FASB issued updated accounting guidance on accounting for leases, which requires lessees to establish a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. For income statement purposes, leases will be classified as either operating or finance. Operating leases will result in straight-line expense while finance leases will result in a front-loaded expense pattern. The updated accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption available. The Company is evaluating the requirements of the updated guidance to determine the impact of adoption.

In January 2016, the FASB issued updated accounting guidance on the recognition and measurement of financial assets and financial liabilities, which amends certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. The updated guidance is effective for interim and annual periods beginning after December 31, 2017. The Company does not expect the provisions of the updated guidance to have a material impact on its results of operations or financial position.

In May 2014, the FASB issued updated accounting guidance on recognizing revenue from contracts with customers, which outlines a single comprehensive model that an entity will apply to determine the measurement of revenue and timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The updated guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Additionally, the accounting for contributions in aid of construction may be impacted by the updated accounting guidance if the contributions are determined to be in scope. In July 2015, the FASB approved a one year deferral to the original effective date of this guidance. The updated guidance is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the updated guidance in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting the updated guidance recognized through retained earnings at the date of adoption. In 2016, the Company performed an evaluation of the requirements of the updated guidance and based on current interpretations of the updated guidance believes that the impact of adoption will not result in a material change in the Company's measurement of revenue and timing of recognition if contributions in aid of construction are determined to not be in scope. In 2017, the American Institute of Certified Public Accountants (AICPA) power and utility entities revenue recognition task force has determined that contributions in aid of construction are not in the scope of the new standard, and submitted its recommendation to the AICPA's revenue recognition working group for approval. The Company plans to implement the updated guidance using the modified retrospective approach on January 1, 2018.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(In thousands of dollars, except per share amounts)

## Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations

### Forward-looking Statements

*This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Quarterly Report contain, in addition to historical information, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address, among other things: the projected impact of various legal proceedings; the projected effects of recent accounting pronouncements; prospects, plans, objectives, expectations and beliefs of management, as well as information contained in this report where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Forward-looking statements are based on a number of assumptions concerning future events, and are subject to a number of risks, uncertainties and other factors, many of which are outside our control, which could cause actual results to differ materially from those expressed or implied by such statements. These risks and uncertainties include, among others: the effects of regulation, abnormal weather, changes in capital requirements and funding, acquisitions, changes to the capital markets, and our ability to assimilate acquired operations, as well as those risks, uncertainties and other factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in such report. As a result, readers are cautioned not to place undue reliance on any forward-looking statements. We undertake no obligation to update or revise forward-looking statements, whether as a result of new information, future events or otherwise.*

### General Information

Aqua America, Inc. ("we", "us", "our" or the "Company"), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to what we estimate to be almost three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary, Aqua Pennsylvania, provides water or wastewater services to approximately one-half of the total number of people we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to our utility companies' service territories; and offers, through a third party, water and wastewater line repair service and protection solutions to households.

During 2016, we completed the sale of business units within Aqua Resources which provided liquid waste hauling and disposal services, and inspection, cleaning and repair of storm and sanitary wastewater lines. Additionally, in 2016, we decided to market for sale two business units that are reported within the Company's market-based subsidiary, Aqua Resources. One business unit installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, for which the sale was completed in January 2017. The other business unit repairs and performs maintenance on water and wastewater systems, for which the sale was completed in June 2017.

Aqua America, Inc., which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth-through-acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and has extended our regulated operations from southeastern Pennsylvania to include operations in seven other states. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to opportunistically pursue growth ventures in select market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

*The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes.*

## Financial Condition

During the first nine months of 2017, we had $337,731 of capital expenditures, expended $5,860 for the acquisition of water and wastewater utility systems, issued $441,294 of long-term debt, and repaid debt and made sinking fund contributions and other loan repayments of $293,270. The capital expenditures were related to new and replacement water mains, improvements to treatment plants, tanks, hydrants, and service lines, well and booster improvements, and other enhancements and improvements. The issuance of long-term debt was comprised principally of the funds borrowed under our revolving credit facility and the issuances of $80,000 and $50,000 of first mortgage bonds by Aqua Pennsylvania in July and January 2017 and $100,000 of first mortgage bonds by Aqua Illinois in July 2017.

At September 30, 2017, we had $4,139 of cash and cash equivalents compared to $3,763 at December 31, 2016. During the first nine months of 2017, we used the proceeds from the issuance of long-term debt and internally generated funds to fund the cash requirements discussed above and to pay dividends.

At September 30, 2017, our $250,000 unsecured revolving credit facility, which expires in February 2021, had $183,547 available for borrowing. At September 30, 2017, we had short-term lines of credit of $135,500, of which $114,510 was available for borrowing. One of our short-term lines of credit is an Aqua Pennsylvania $100,000 364-day unsecured revolving credit facility with four banks, which is used to provide working capital, and as of September 30, 2017, $80,000 was available for borrowing. In July we issued $180,000 of long-term debt, the proceeds of which were used to reduce our borrowings under our revolving credit facilities. Subsequently, in October we issued $75,000 of long-term debt, the proceeds of which were used to reduce our borrowings under our revolving credit facilities.

Our short-term lines of credit of $135,500 are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

The Company's consolidated balance sheet historically has had a negative working capital position whereby routinely our current liabilities exceed our current assets. Management believes that internally generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

## Results of Operations

### Analysis of Third Quarter of 2017 Compared to Third Quarter of 2016

Revenues decreased by $11,585 or 5.1%, primarily due to a decrease in customer water consumption, and a decrease in market-based activities revenue of $3,431 associated with the dispositions of business units, offset by an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $1,759, and additional water and wastewater revenues of $505 associated with a larger customer base due to utility acquisitions.

Operations and maintenance expenses decreased by $11,830 or 14.8%, primarily due to a reduction in operating expenses for Aqua Resources of $4,249 associated with the completion of the disposition of business units, which was finalized in June 2017, a decrease in water production costs of $2,928, a decrease in the Company's self-insured employee medical benefit program expense of $2,425, and a decrease in postretirement benefits expense of $1,011. The decrease in water production costs is due to a reduction in purchased water expense of $1,907 due to replacing a purchased water supply coincident with the Company securing its own water supply source.

Depreciation expense increased by $383 or 1.1%, primarily due to the utility plant placed in service since September 30, 2016.

Interest expense increased by $2,243 or 11.1%, primarily due to an increase in average borrowings.

Allowance for funds used during construction ("AFUDC") increased by $1,647, due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

Our effective income tax rate was 4.3% in the third quarter of 2017 and 10.3% in the third quarter of 2016. The effective income tax rate decreased due to the effect of additional tax deductions recognized in the third quarter of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

Net income increased by $3,055 or 4.2%, primarily as a result of the factors described above.

Analysis of First Nine Months of 2017 Compared to First Nine Months of 2016

Revenues decreased by $16,863 or 2.7%, primarily due to a decrease in market-based activities revenue of $12,970 associated with the dispositions of business units, and a decrease in customer water consumption, offset by an increase in water and wastewater rates and infrastructure rehabilitation surcharges of $4,586, additional water and wastewater revenues from organic growth of $2,296, and additional water and wastewater revenues of $1,257 associated with a larger customer base due to utility acquisitions.

Operations and maintenance expenses decreased by $19,384 or 8.5%, primarily due to a reduction in operating expenses for Aqua Resources of $12,981 associated with the completion of the disposition of business units, which was finalized in June 2017, a decrease in water production costs of $4,459, a decrease in the Company's self-insured employee medical benefit program expense of $4,239, and a decrease in postretirement benefits expense of $2,946, offset by the prior year effect of a gain on sale of a utility system of $1,215. The gain on sale of a utility system is reported in the consolidated statement of net income as a component of operations and maintenance expense. The decrease in water production costs is due to a reduction in purchased water expense of $2,886 due to replacing a purchased water supply coincident with the Company securing its own water supply source.

Depreciation expense increased by $3,863 or 4.0%, primarily due to the utility plant placed in service since September 30, 2016.

Taxes other than income taxes increased by $1,296 or 3.0% primarily due to an increase in property taxes of $489 primarily due to the effect of a benefit recorded in 2016 for Ohio based on the final settlement of a property tax bill, and an increase in pumping fees of $319 in Texas due to higher rates and water production.

Interest expense increased by $4,988 or 8.3%, primarily due to an increase in average borrowings.

AFUDC increased by $4,124, due to an increase in the average balance of utility plant construction work in progress, to which AFUDC is applied, and an increase in the AFUDC rate as a result of an increase in the amount of AFUDC related to equity.

Table of Contents

Our effective income tax rate was 6.0% in the first nine months of 2017 and 8.4% in the first nine months of 2016. The effective income tax rate decreased due to the effect of additional tax deductions recognized in the first nine months of 2017 for certain qualifying infrastructure improvements for Aqua Pennsylvania.

Net income increased by $1,732 or 0.9%, primarily as a result of the factors described above.

## Impact of Recent Accounting Pronouncements

We describe the impact of recent accounting pronouncements in Note 15, *Recent Accounting Pronouncements*, to the consolidated financial statements in this report.

## Item 3 – Quantitative and Qualitative Disclosures About Market Risk

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes in our exposure to market risks since December 31, 2016. Refer to Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for additional information.

## Item 4 – Controls and Procedures

### (a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective such that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

### (b) Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

# Part II. Other Information

## Item 1 – Legal Proceedings

We are party to various legal proceedings. Although the results of legal proceedings cannot be predicted with certainty, there are no pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our properties is the subject that we believe are material or are expected to have a material adverse effect on our financial position, results of operations or cash flows.

## Item 1A – Risk Factors

There have been no material changes to the risks disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016 under "Part 1, Item 1A – Risk Factors."

Table of Contents

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes the Company’s purchases of its common stock for the quarter ended September 30, 2017:

Issuer Purchases of Equity Securities

| Period | Total Number of Shares Purchased (1) | | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet be Purchased Under the Plan or Programs |
|---|---|---|---|---|---|
| July 1-31, 2017 | 196 | $ | 33.46 | - | - |
| August 1-31, 2017 | 513 | $ | 33.86 | - | - |
| September 1-30, 2017 | - | $ | - | - | - |
| Total | 709 | $ | 33.75 | - | - |

(1) These amounts include the following: (a) 196 shares we acquired from employees associated with the withholding of shares to pay certain withholding taxes upon the vesting of stock-based compensation; and (b) 513 shares we acquired from our employees who elected to pay the exercise price of their stock options (and then hold shares of the stock), upon exercise, by delivering to us shares of our common stock in accordance with the terms of our equity compensation plan that were previously approved by our shareholders and disclosed in our proxy statements. These features of our equity compensation plan are available to all employees who receive stock-based compensation under the plan. We purchased these shares at their fair market value, as determined by reference to the closing price of our common stock on the day prior to the option exercise.

Item 6 – Exhibits

The information required by this Item is set forth in the Exhibit Index hereto which is incorporated herein by reference.

To the Purchaser Listed in
Schedule A Hereto:

Ladies and Gentlemen:

Aqua Illinois, Inc. (successor to Consumers Illinois Water Company and formerly known as Kankakee Water Company), a corporation organized under the laws of the State of Illinois (the *"Company"*), agrees with the Purchaser whose name appears at the end hereof (the *"Purchaser"*) as follows:

SECTION 1. AUTHORIZATION OF BONDS.

The Company will authorize the issuance and sale of (i) First Mortgage Bonds, Series Y, 3.64% due July 15, 2032 (herein referred to as the *"Series Y Bonds"*) in an aggregate principal amount of $25,000,000, (ii) First Mortgage Bonds, Series Z, 3.89% due July 15, 2037 (herein referred to as the *"Series Z Bonds"*) in an aggregate principal amount of $6,000,000, (iii) First Mortgage Bonds, Series AA, 3.90% due January 15, 2038 (herein referred to as the *"Series AA Bonds"*) in an aggregate principal amount of $15,000,000, (iv) First Mortgage Bonds, Series BB, 4.18% due July 15, 2047 (herein referred to as the *"Series BB Bonds"*) in an aggregate principal amount of $10,000,000, (v) First Mortgage Bonds, Series CC, 4.22% due July 15, 2049 (herein referred to as the *"Series CC Bonds"*) in an aggregate principal amount of $22,000,000, and (vi) First Mortgage Bonds, Series DD, 4.24% due July 15, 2050 (herein referred to as the *"Series DD Bonds"*) in an aggregate principal amount of $22,000,000 (the Series Y Bonds, the Series Z Bonds, the Series AA Bonds, the Series BB Bonds, the Series CC Bonds, and the Series DD Bonds are collectively referred to as the *"Bonds"* and such term includes any such bonds issued in substitution therefor). The Bonds will be issued under and secured by the Mortgage and Deed of Trust dated June 1, 1939, from the Company to The Portland National Bank and Francis W. Dana, as Trustees (the *"Original Mortgage and Deed of Trust"*), as heretofore supplemented and amended by Supplemental Indenture A dated June 1, 1942, by Supplemental Indenture B dated

January 1, 1946, by Supplemental Indenture C dated November 1, 1951, by Supplemental Indenture D dated December 1, 1956, by Supplemental Indenture E dated July 14, 1967, by Supplemental Indenture F dated April 1, 1968, by Supplemental Indenture G dated December 21, 1970, by Supplemental Indenture H dated October 1, 1974, by Supplemental Indenture I dated November 1, 1976, by Supplemental Indenture J dated December 1, 1984, by Supplemental Indenture K dated April 30, 1987, by Supplemental Indenture L dated April 30, 1987, by Supplemental Indenture M dated January 5, 1988, by Supplemental Indenture N dated December 1, 1988, by Supplemental Indenture O dated March 1, 1991, by Supplemental Indenture P dated September 1, 1995, by Supplemental Indenture Q dated September 1, 1995, by Supplemental Indenture R dated September 1, 1995, by Supplemental Indenture S dated August 1, 2000, by Supplemental Indenture T dated November 1, 2002, by Supplemental Indenture U dated December 1, 2003, by Supplemental Indenture V dated November 1, 2004, by Supplemental Indenture W dated December 1, 2004, and by Supplemental Indenture X dated December 1, 2007 under which U.S. Bank National Association is now serving as trustee (the *"Trustee"*), copies of which have previously been furnished to the Purchaser and which are hereby, by reference, made a part hereof, and as the same is to be further supplemented and amended by an indenture supplemental thereto to be dated July 1, 2017 (hereinafter called *"Supplemental Indenture Y"*), in the form of Exhibit A hereto annexed and hereby made a part hereof, subject, however, to such changes as may be agreed upon by the Purchaser and its counsel, and by the Company and its counsel (the Original Mortgage and Deed of Trust as supplemented and amended by Supplemental Indentures A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X and Supplemental Indenture Y being hereinafter called the *"Indenture"*).

SECTION 2. SALE AND PURCHASE OF BONDS.

Subject to the terms and conditions of this Agreement, the Company will issue and sell to the Purchaser and the Purchaser will purchase from the Company, at the Closing provided for in Section 3, Bonds in the aggregate principal amount of $100,000,000 and of the six series specified opposite the Purchaser's name in Schedule A at the purchase price of 100% of the principal amount thereof.

SECTION 3. CLOSING.

The execution and delivery of this Agreement and the sale and purchase of the Bonds to be purchased by the Purchaser shall occur at the offices of Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, at 10:00 a.m., Chicago time, at a closing (the *"Closing"*) on July 10, 2017. At the Closing the Company will deliver to the Purchaser the Bonds to be purchased by the Purchaser in the form of one or more Bonds in each series to be purchased by the Purchaser, as applicable, in such denominations as the Purchaser may request (with a minimum denomination of $100,000 for each Bond), in the principal amounts as set forth in Schedule A, and substantially in the form contained in Supplemental Indenture Y, dated the date of the Closing and registered in the Purchaser's name (or in the name of its nominee), against delivery by the Purchaser to the Company or its order of immediately available funds in the amount of the purchase price therefor by wire transfer of immediately available funds for Account Number: 8541854208, Account Name: Aqua America, Inc. at PNC Bank, N.A., Philadelphia, Pennsylvania, ABA Number 031-000053. If at the Closing the Company shall fail to tender such Bonds to the Purchaser as provided above in this Section 3, or any of the conditions specified in Section 4 shall not have been fulfilled to the Purchaser's satisfaction, the Purchaser shall, at its election, be relieved of all further obligations under this Agreement, without thereby waiving any rights the Purchaser may have by reason of such failure by the Company to tender such Bonds or any of the conditions specified in Section 4 not having been fulfilled to the Purchaser's satisfaction.

SECTION 4. CONDITIONS TO CLOSING.

The Purchaser's obligation to execute and deliver this Agreement and to purchase and pay for the Bonds to be sold to the Purchaser at the Closing is subject to the fulfillment to the Purchaser's satisfaction prior to or at the Closing of the following conditions:

*Section 4.1. Representations and Warranties*. The representations and warranties of the Company in this Agreement shall be correct when made and at the time of the Closing.

*Section 4.2. Performance; No Default*. The Company shall have performed and complied with all agreements and conditions contained in each Financing Agreement required to be performed or complied with by the Company prior to or at the Closing, and after giving effect to the issue and sale of the Bonds (and the application of the proceeds thereof as contemplated by Section 5.14), no Default or completed default under the Indenture shall have occurred and be continuing.

*Section 4.3. Compliance Certificates*. The Company shall have performed and complied with all agreements and conditions contained in the Indenture (including Supplemental Indenture Y) that are required to be performed or complied with by the Company for the issuance of the Bonds at the Closing. In addition, the Company shall have delivered the following certificates:

(a) *Officer's Certificate*. The Company shall have delivered to the Purchaser (i) an Officer's Certificate, dated the date of the Closing, certifying that the conditions specified in Section 4 of this Agreement have been fulfilled, and (ii) copies of all certificates and opinions required to be delivered to the Trustee under the Indenture in connection with the issuance of each series of Bonds, as applicable, under the Indenture and Supplemental Indenture Y in each case, dated the date of the Closing.

(b) *Secretary's Certificate*. The Company shall have delivered to the Purchaser a certificate of its Secretary or Assistant Secretary, dated the date of the Closing, certifying as to the resolutions attached thereto and other corporate proceedings relating to the authorization, execution and delivery of this Agreement, each series of Bonds, as applicable, under the Indenture, and Supplemental Indenture Y.

(c) *Certification of Indenture*. The Purchaser shall have received a composite copy of the Indenture (together with all amendments and supplements thereto), certified by the Company as of the date of the Closing, exclusive of property exhibits, recording information and the like.

*Section 4.4. Opinions of Counsel*. The Purchaser shall have received opinions in form and substance satisfactory to the Purchaser, dated the date of the Closing (a) from Christopher P. Luning, counsel for the Company, covering the matters set forth in Exhibit 4.4(a) and covering such other matters incident to the transactions contemplated hereby as the Purchaser or its counsel may reasonably request (and the Company hereby instructs its counsel to deliver such opinion to the Purchaser), (b) from Dinsmore & Shohl, LLP, special counsel to the Company, covering the matters set forth in Exhibit 4.4(b) and covering such other matters incident to the transactions contemplated hereby as the Purchaser or the Purchaser's counsel may reasonably request (and the Company hereby instructs its counsel to deliver such opinion to the Purchaser), and (c) from Chapman and Cutler LLP, the Purchaser's special counsel in connection with such transactions, substantially in the form set forth in Exhibit 4.4(c) and covering such other matters incident to such transactions as the Purchaser may reasonably request. The Company hereby directs its counsel to deliver the opinions required by this Section 4.4 and understands and agrees that the Purchaser will and hereby is authorized to rely on such opinions.

*Section 4.5. Purchase Permitted by Applicable Law, Etc*. On the date of the Closing the Purchaser's purchase of Bonds shall (a) be permitted by the laws and regulations of each jurisdiction to which the Purchaser is subject, without recourse to provisions (such as section 1405(a)(8) of the New York Insurance Law) permitting limited investments by insurance companies without restriction as to the character of the particular investment, (b) not violate any applicable law or regulation (including, without limitation, Regulation T, U or X of the Board of Governors of the Federal Reserve System) and (c) not subject the Purchaser to any tax, penalty or liability under or pursuant to any applicable law or regulation, which law or regulation was not in effect on the date of the Closing. If requested by the Purchaser, the Purchaser shall have received an Officer's Certificate certifying as to such matters of fact as the Purchaser may reasonably specify to enable the Purchaser to determine whether such purchase is so permitted.

*Section 4.6. [Reserved]*.

*Section 4.7. Payment of Special Counsel Fees*. Without limiting the provisions of Section 12.2, the Company shall have paid on or before the Closing the reasonable fees, reasonable charges and reasonable disbursements of the Purchaser's special counsel referred to in Section 4.4(c) to the extent reflected in a statement of such counsel rendered to the Company at least one Business Day prior to the Closing.

*Section 4.8. Private Placement Number*. A Private Placement Number issued by Standard & Poor's CUSIP Service Bureau (in cooperation with the SVO) shall have been obtained for each series of Bonds issued at the Closing.

*Section 4.9. Changes in Corporate Structure*. The Company shall not have changed its jurisdiction of incorporation or organization, as applicable, or been a party to any merger or consolidation or succeeded to all or any substantial part of the liabilities of any other entity, at any time following the date of the most recent financial statements referred to in Schedule 5.5.

*Section 4.10. Funding Instructions*. At least three Business Days prior to the date of the Closing, the Purchaser shall have received written instructions signed by a Responsible

Officer on letterhead of the Company confirming the information specified in Section 3 including (a) the name and address of the transferee bank, (b) such transferee bank's ABA number and (c) the account name and number into which the purchase price for the Bonds is to be deposited.

*Section 4.11. Proceedings and Documents*. All corporate and other proceedings in connection with the transactions contemplated by this Agreement and all documents and instruments incident to the issuance and sale of the Bonds shall be reasonably satisfactory to the Purchaser and its special counsel, and the Purchaser and its special counsel shall have received all such counterpart originals or certified or other copies of such documents as the Purchaser or such special counsel may reasonably request.

*Section 4.12. Execution and Delivery and Filing and Recording of Supplemental Indenture Y*. Prior to or at the Closing, Supplemental Indenture Y shall have been duly executed and delivered by the Company, and the Company shall have filed, or delivered for recordation, Supplemental Indenture Y in all applicable locations in Illinois (and financing statements in respect thereof shall have been filed, if necessary) in such manner and in such places as is required by law (and no other instruments are required to be filed) to establish, preserve, perfect and protect the direct security interest and mortgage Lien of the Trust Estate created by the Indenture on all mortgaged and pledged property of the Company referred to in the Indenture as subject to the direct mortgage Lien thereof and the Company shall have delivered satisfactory evidence of such filings, recording or delivery for recording.

*Section 4.13. Regulatory Approvals.*[1] The issue and sale of each series of Bonds, as applicable, shall have been duly authorized and approved by an order of the Illinois Commerce Commission and such order shall be in full force and effect on the date of the Closing and all appeal periods, if any, applicable to such order shall have expired. The Company shall deliver satisfactory evidence that orders have been obtained approving the issuance of such Bonds from the Illinois Commerce Commission or that the Illinois Commerce Commission shall have waived jurisdiction thereof and such approval or waiver shall not be contested or subject to review, or that the Illinois Commerce Commission does not have jurisdiction.

## SECTION 5. REPRESENTATIONS AND WARRANTIES OF THE COMPANY.

The Company represents and warrants to the Purchaser at the Closing that:

*Section 5.1. Organization; Power and Authority*. The Company is a corporation duly organized, validly existing and subsisting under the laws of the State of Illinois, with corporate powers adequate for carrying on the business now conducted by it which is the supplying of water for public and private purposes and the operation of wastewater treatment facilities and collection systems in the State of Illinois, and the Company is not doing business in any other state. The Company has lawful authority for the conduct of its business and has the corporate power and authority to own or hold under lease the properties it purports to own or hold under lease, to transact the business it transacts and proposes to transact, to execute and deliver this Agreement,

[1] Company to confirm Regulatory Approvals.

the Bonds and Supplemental Indenture Y (and had the corporate power and authority to execute and deliver the Indenture at the time of execution and delivery thereof) and to perform the provisions of the Financing Agreements.

*Section 5.2. Authorization, Etc.* At the Closing, each Financing Agreement has been duly authorized by all necessary corporate action on the part of the Company, and each Financing Agreement (other than the Bonds) constitutes, and each Series of Bonds is executed and delivered by the Company and the Trustee and paid for by the Purchaser, each Series of Bonds will constitute, a legal, valid and binding obligation of the Company enforceable against the Company in accordance with its respective terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

*Section 5.3. Disclosure.* This Agreement and the documents, certificates or other writings delivered to the Purchaser by or on behalf of the Company in connection with the transactions contemplated hereby, including the financial statements listed in Schedule 5.5 (collectively, the *"Disclosure Documents"*), taken as a whole, do not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein not misleading in light of the circumstances under which they were made. Since December 31, 2016, there has been no change in the financial condition, operations, business or properties of the Company except changes that individually or in the aggregate would not reasonably be expected to have a Material Adverse Effect. There is no fact known to management of the Company that, in the reasonable judgment of management of the Company, could be expected to have a Material Adverse Effect that has not been set forth herein or in the other documents, certificates and other writings delivered to the Purchaser by the Company specifically for use in connection with the transactions contemplated hereby.

*Section 5.4. Ownership; Investments.* The Company is a wholly-owned subsidiary of Aqua America, Inc., and owns no shares of stock or securities of, or any interest in, any other corporation, firm, partnership or association.

*Section 5.5. Financial Statements; Material Liabilities.* The Company has delivered to the Purchaser copies of the financial statements of the Company listed on Schedule 5.5. All of said financial statements (including in each case the related schedules and notes) fairly present in all material respects the financial position of the Company as of the respective dates specified in such financial statements and the results of its operations and cash flows for the respective periods so specified and have been prepared in accordance with GAAP consistently applied throughout the periods involved except as set forth in the notes thereto (subject, in the case of any interim financial statements, to normal year-end adjustments). The Company does not have any Material liabilities that are not disclosed on such financial statements or otherwise disclosed in the Disclosure Documents.

*Section 5.6. Compliance with Laws, Other Instruments, Etc.* The execution, delivery and performance by the Company of each Financing Agreement (including the prior execution and delivery of the Indenture), will not (a) contravene, result in any breach of, or constitute a default under, or result in the creation of any Lien, other than the Lien created under the Indenture, in respect of any property of the Company under, any indenture, mortgage, deed of trust, loan, purchase or credit agreement, lease, corporate charter, regulations or by-laws, or any other Material agreement or instrument to which the Company is bound or by which the Company or any of its properties may be bound or affected, (b) conflict with or result in a breach of any of the terms, conditions or provisions of any order, judgment, decree, or ruling of any court, arbitrator or Governmental Authority applicable to the Company or (c) violate any provision of any statute or other rule or regulation of any Governmental Authority applicable to the Company, except for any such default, breach, contravention or violation which would not reasonably be expected to have a Material Adverse Effect.

*Section 5.7. Governmental Authorizations, Etc.* Other than approval of the Illinois Commerce Commission, which has been obtained and is in full force and effect and final and is non-appealable, no consent, approval or authorization of, or registration, filing or declaration with, any Governmental Authority is required in connection with the execution, delivery or performance by the Company of this Agreement, the Bonds and Supplemental Indenture Y.

*Section 5.8. Litigation; Observance of Statutes and Orders*. (a) There are no actions, suits, investigations or proceedings pending or, to the knowledge of the Company, threatened against or affecting the Company or any property of the Company in any court or before any arbitrator of any kind or before or by any Governmental Authority that, individually or in the aggregate, would reasonably be expected to have a Material Adverse Effect.

(b) The Company is not (i) in default under any term of any agreement or instrument to which it is a party or by which it is bound, (ii) in violation of any order, judgment, decree or ruling of any court, any arbitrator of any kind or any Governmental Authority naming or referring to the Company or (iii) in violation of any applicable law, or, to the knowledge of the Company, any ordinance, rule or regulation of any Governmental Authority (including, without limitation, Environmental Laws, the USA Patriot Act or any of the other laws and regulations that are referred to in Section 5.16), which default or violation, individually or in the aggregate, could reasonably be expected to have a Material Adverse Effect.

*Section 5.9. Taxes*. The Company has filed or caused to be filed all income tax returns that are required to have been filed in any jurisdiction, and have paid all taxes shown to be due and payable on such returns and all other taxes and assessments payable by them, to the extent such taxes and assessments have become due and payable and before they have become delinquent, except for any taxes and assessments (i) the amount of which is not individually or in the aggregate Material, or (ii) the amount, applicability, or validity of which is currently being contested in good faith by appropriate proceedings and with respect to which the Company has established adequate reserves in accordance with GAAP. The charges, accruals, and reserves on the books of the Company in respect of federal, state or other taxes for all fiscal periods are adequate. The Federal income tax liabilities of the Company have been finally determined (whether by reason of completed audits or the statute of limitations having run) for all fiscal years up to and including the fiscal year ended December 31, 2011 and all amounts owing in respect of such audit have been paid.

*Section 5.10. Title to Property; Leases*. The Company has good and sufficient title to their respective Material properties, including all such properties reflected in the most recent financial statements referred to in Section 5.5 or purported to have been acquired by the Company after said date (except as sold or otherwise disposed of in the ordinary course of business), in each case free and clear of Liens prohibited by this Agreement or the Indenture, except for those defects in title and Liens that, individually or in the aggregate, would not have a Material Adverse Effect. All Material leases are valid and subsisting and are in full force and effect in all material respects.

*Section 5.11. Licenses, Permits, Etc*. The Company owns or possesses all licenses, permits, franchises, certificates of convenience and necessity, authorizations, patents, copyrights, proprietary software, service marks, trademarks and trade names, or rights thereto, that are Material, without known conflict with the rights of others, except for those conflicts that, individually or in the aggregate, would not have a Material Adverse Effect.

*Section 5.12. Compliance with Employee Benefit Plans*. (a) The Company and each ERISA Affiliate have operated and administered each Plan in compliance with all applicable laws except for such instances of noncompliance as have not resulted in and could not reasonably be expected to result in a Material Adverse Effect. Neither the Company nor any ERISA Affiliate has incurred any liability pursuant to Title I or IV of ERISA or the penalty or excise tax provisions of the Code relating to employee benefit plans (as defined in section 3 of ERISA), and no event, transaction or condition has occurred or exists that would reasonably be expected to result in the incurrence of any such liability by the Company or any ERISA Affiliate, or in the imposition of any Lien on any of the rights, properties or assets of the Company or any ERISA Affiliate, in either case pursuant to Title I or IV of ERISA or to such penalty or excise tax provisions or to section 401(a)(29) or 412 of the Code or section 4068 of ERISA, other than such liabilities or Liens as would not be individually or in the aggregate Material.

(b) The present value of the aggregate benefit liabilities under each of the Plans subject to section 412 of the Code (other than Multiemployer Plans), determined as of January 1, 2016 based on such Plan's actuarial assumptions as of that date for funding purposes as documented in such Plan's actuarial valuation reports dated [September 2016] did not exceed the aggregate current value of the assets of such Plan allocable to such benefit liabilities by more than $5,000,000 in the case of any single Plan and by more than $5,000,000 in the aggregate for all Plans. The term "*benefit liabilities*" has the meaning specified in section 4001 of ERISA and the terms "current value" and "*present value*" have the meaning specified in section 3 of ERISA.

(c) The Company and its ERISA Affiliates have not incurred withdrawal liabilities (and are not subject to contingent withdrawal liabilities) under section 4201 or 4204 of ERISA in respect of Multiemployer Plans that individually or in the aggregate are Material.

(d) The expected postretirement benefit obligation (determined as of the last day of the Company's most recently ended fiscal year in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 715-60, without regard to liabilities attributable to continuation coverage mandated by section 4980B of the Code) of the Company is not Material.

(e) The execution and delivery of this Agreement and the issuance and sale of the Bonds hereunder will not involve any transaction that is subject to the prohibitions of section 406 of ERISA or in connection with which a tax could be imposed pursuant to section 4975(c)(1)(A)-(D) of the Code. The representation by the Company to the Purchaser in the first sentence of this Section 5.12(e) is made in reliance upon and subject to the accuracy of the Purchaser's representation in Section 6.2 as to the sources of the funds used to pay the purchase price of the Bonds to be purchased by the Purchaser.

(f) The Company does not have any Non-U.S. Plans.

*Section 5.13. Private Offering by the Company*. Neither the Company nor anyone acting on the Company's behalf has offered the Bonds or any similar securities for sale to, or solicited any offer to buy any of the same from, or otherwise approached or negotiated in respect thereof with, any Person other than the Purchaser and not more than ten (10) other Institutional Investors, each of which has been offered the Bonds in connection with a private sale for investment. Neither the Company nor anyone acting on its behalf has taken, or will take, any action that would subject the issuance or sale of the Bonds to the registration requirements of Section 5 of the Securities Act.

*Section 5.14. Use of Proceeds; Margin Regulations*. The Company will apply the proceeds of the sale of the Bonds to repay existing indebtedness and for general corporate purposes and in compliance with all laws referenced in Section 5.16. No part of the proceeds from the sale of the Bonds hereunder will be used, directly or indirectly, for the purpose of buying or carrying any margin stock within the meaning of Regulation U of the Board of Governors of the Federal Reserve System (12 CFR 221), or for the purpose of buying or carrying or trading in any securities under such circumstances as to involve the Company in a violation of Regulation X of said Board (12 CFR 224) or to involve any broker or dealer in a violation of Regulation T of said Board (12 CFR 220). Margin stock does not constitute more than 2% of the value of the consolidated assets of the Company and the Company does not have any present intention that margin stock will constitute more than 2% of the value of such assets. As used in this Section, the terms "margin stock" and "purpose of buying or carrying" shall have the meanings assigned to them in said Regulation U.

*Section 5.15. Existing Debt*. Except as described therein, Schedule 5.15(a) sets forth a complete and correct list of all outstanding Debt of the Company as of March 31, 2017, since which date except as described therein there has been no Material change in the amounts, interest rates, sinking funds, installment payments or maturities of the Debt of the Company. The Company is not in default and no waiver of default is currently in effect, in the payment of any principal or interest on any Debt of the Company and no event or condition exists with respect to any Debt of the Company, the outstanding principal amount of which exceeds $5,000,000 that would permit (or that with notice or the lapse of time, or both, would permit) one or more Persons to cause such Debt to become due and payable before its stated maturity or before its regularly scheduled dates of payment.

(b) Without limiting the representation in Section 5.6, the Company is not a party to, or otherwise subject to any provision contained in, any instrument evidencing Debt of the

Company, any agreement relating thereto or any other agreement (including, but not limited to, its charter or other organizational document) which limits the amount of, or otherwise imposes restrictions on the incurring of, Debt evidenced by the Bonds, except as specifically indicated in Schedule 5.15(b).

*Section 5.16. Foreign Assets Control Regulations, Etc*. (a) Neither the Company nor any Controlled Entity (i) is a Blocked Person, (ii) has been notified that its name appears or may in the future appear on a State Sanctions List or (iii) is a target of sanctions that have been imposed by the United Nations or the European Union.

(b) Neither the Company nor any Controlled Entity (i) has violated, been found in violation of, or been charged or convicted under, any applicable U.S. Economic Sanctions Laws, Anti-Money Laundering Laws or Anti-Corruption Laws or (ii) to the Company's knowledge, is under investigation by any Governmental Authority for possible violation of any U.S. Economic Sanctions Laws, Anti-Money Laundering Laws or Anti-Corruption Laws.

(c) No part of the proceeds from the sale of the Bonds hereunder:

(i) constitutes or will constitute funds obtained on behalf of any Blocked Person or will otherwise be used by the Company or any Controlled Entity, directly or indirectly, (A) in connection with any investment in, or any transactions or dealings with, any Blocked Person, (B) for any purpose that would cause the Purchaser to be in violation of any U.S. Economic Sanctions Laws or (C) otherwise in violation of any U.S. Economic Sanctions Laws;

(ii) will be used, directly or indirectly, in violation of, or cause the Purchaser to be in violation of, any applicable Anti-Money Laundering Laws; or

(iii) will be used, directly or indirectly, for the purpose of making any improper payments, including bribes, to any Governmental Official or commercial counterparty in order to obtain, retain or direct business or obtain any improper advantage, in each case which would be in violation of, or cause the Purchaser to be in violation of, any applicable Anti-Corruption Laws.

(d) The Company has established procedures and controls which it reasonably believes are adequate (and otherwise comply with applicable law) to ensure that the Company and each Controlled Entity is and will continue to be in compliance with all applicable U.S. Economic Sanctions Laws, Anti-Money Laundering Laws and Anti-Corruption Laws.

*Section 5.17. Status under Certain Statutes*. The Company is not subject to regulation under the Investment Company Act of 1940, as amended, the Public Utility Holding Company Act of 2005, as amended, the ICC Termination Act of 1995, as amended, or subject to rate regulation under the Federal Power Act, as amended.

*Section 5.18. Environmental Matters*. The Company has no knowledge of any claim or has received any notice of any claim, and no proceeding has been instituted of which it has received notice, raising any claim against the Company or any of its real properties now or formerly owned, leased or operated by it, or other assets, alleging damage to the environment or any violation of any Environmental Laws, except, in each case, such as could not reasonably be expected to result in a Material Adverse Effect. Except as otherwise disclosed to the Purchaser in writing:

(a) the Company has no knowledge of any facts which would give rise to any claim, public or private, for violation of Environmental Laws or damage to the environment emanating from, occurring on or in any way related to real properties or to other assets now or formerly owned, leased or operated by it or their use, except, in each case, such as could not reasonably be expected to result in a Material Adverse Effect;

(b) the Company has not stored any Hazardous Materials on real properties now or formerly owned, leased or operated by it or has disposed of any Hazardous Materials in each case in a manner contrary to any Environmental Laws and in any manner that could reasonably be expected to result in a Material Adverse Effect; and

(c) all buildings on all real properties now owned, leased or operated by the Company are in compliance with applicable Environmental Laws, except where failure to comply could not reasonably be expected to result in a Material Adverse Effect.

*Section 5.19. Lien of Indenture*. The Indenture (and for avoidance of doubt including Supplemental Indenture Y) constitutes a direct and valid Lien upon the Trust Estate, subject only to the exceptions referred to in the Indenture, and will create a similar Lien upon all properties and assets acquired by the Company after the date hereof which are required to be subjected to the Lien of the Indenture, when acquired by the Company, subject only to the exceptions referred to in the Indenture, and subject, further, as to real property interests, to the recordation of a supplement to the Indenture describing such after-acquired property; the descriptions of all such properties and assets contained in the granting clauses of the Indenture are correct and adequate for the purposes of the Indenture; the Indenture has been duly recorded as a mortgage and deed of trust of real estate, and any required filings with respect to personal property and fixtures subject to the Lien of the Indenture have been duly made in each place in which such recording or filing is required to protect, preserve and perfect the Lien of the Indenture; and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements related thereto and similar documents and the issuance of the Bonds have been paid.

*Section 5.20. Filings*. No action, including any filings, registration or notice, is necessary or advisable in Illinois or any other jurisdictions to ensure the legality, validity and enforceability of the Financing Agreements, except such action as has been previously taken, which action remains in full force and effect. No action, including any filing, registration or notice, is necessary or advisable in Illinois or any other jurisdiction to establish or protect for the benefit of the Trustee and the holders of Bonds, the security interest and Liens purported to be created under the Indenture and the priority and perfection thereof and the other Financing Agreements, except such action as has been previously taken, which action remains in full force and effect.

SECTION 6. REPRESENTATIONS OF THE PURCHASER.

*Section 6.1. Purchase for Investment*. The Purchaser represents that it is purchasing the Bonds for its own account or for one or more separate accounts maintained by the Purchaser or for the account of one or more pension or trust funds and not with a view to the distribution thereof, provided that the disposition of the Purchaser's or their property shall at all times be within the Purchaser's or their control. The Purchaser understands that the Bonds have not been registered under the Securities Act and may be resold only if registered pursuant to the provisions of the Securities Act or if an exemption from registration is available, except under circumstances where neither such registration nor such an exemption is required by law, and that the Company is not required to register the Bonds.

*Section 6.2. Source of Funds*. The Purchaser represents that at least one of the following statements is an accurate representation as to each source of funds (a *"Source"*) to be used by the Purchaser to pay the purchase price of the Bonds to be purchased by the Purchaser hereunder:

(a) the Source is an "insurance company general account" (as the term is defined in the United States Department of Labor's Prohibited Transaction Exemption (*"PTE"*) 95-60) in respect of which the reserves and liabilities (as defined by the annual statement for life insurance companies approved by the NAIC (the *"NAIC Annual Statement"*)) for the general account contract(s) held by or on behalf of any employee benefit plan together with the amount of the reserves and liabilities for the general account contract(s) held by or on behalf of any other employee benefit plans maintained by the same employer (or affiliate thereof as defined in PTE 95-60) or by the same employee organization in the general account do not exceed 10% of the total reserves and liabilities of the general account (exclusive of separate account liabilities) plus surplus as set forth in the NAIC Annual Statement filed with the Purchaser's state of domicile; or

(b) the Source is a separate account that is maintained solely in connection with the Purchaser's fixed contractual obligations under which the amounts payable, or credited, to any employee benefit plan (or its related trust) that has any interest in such separate account (or to any participant or beneficiary of such plan (including any annuitant)) are not affected in any manner by the investment performance of the separate account; or

(c) the Source is either (i) an insurance company pooled separate account, within the meaning of PTE 90-1 or (ii) a bank collective investment fund, within the meaning of the PTE 91-38 and, except as disclosed by the Purchaser to the Company in writing pursuant to this clause (c), no employee benefit plan or group of plans maintained by the same employer or employee organization beneficially owns more than 10% of all assets allocated to such pooled separate account or collective investment fund; or

(d) the Source constitutes assets of an "investment fund" (within the meaning of Part VI of PTE 84-14 (the *"QPAM Exemption"*)) managed by a "qualified professional asset manager" or "QPAM" (within the meaning of Part VI of the QPAM

Exemption), no employee benefit plan's assets that are managed by the QPAM in such investment fund, when combined with the assets of all other employee benefit plans established or maintained by the same employer or by an affiliate (within the meaning of Part VI(c)(1) of the QPAM Exemption) of such employer or by the same employee organization and managed by such QPAM, represent more than 20% of the total client assets managed by such QPAM, the conditions of Part I(c) and (g) of the QPAM Exemption are satisfied, neither the QPAM nor a person controlling or controlled by the QPAM maintains an ownership interest in the Company that would cause the QPAM and the Company to be "related" within the meaning of Part VI(h) of the QPAM Exemption and (i) the identity of such QPAM and (ii) the names of any employee benefit plans whose assets in the investment fund, when combined with the assets of all other employee benefit plans established or maintained by the same employer or by an affiliate (within the meaning of Part VI(c)(1) of the QPAM Exemption) of such employer or by the same employee organization, represent 10% or more of the assets of such investment fund, have been disclosed to the Company in writing pursuant to this clause (d); or

(e) the Source constitutes assets of a "plan(s)" (within the meaning of Part IV(h) of PTE 96-23 (the *"INHAM Exemption"*)) managed by an "in-house asset manager" or "INHAM" (within the meaning of Part IV(a) of the INHAM Exemption), the conditions of Part I(a), (g) and (h) of the INHAM Exemption are satisfied, neither the INHAM nor a person controlling or controlled by the INHAM (applying the definition of "control" in Part IV(d)(3) of the INHAM Exemption) owns a 10% or more interest in the Company and (i) the identity of such INHAM and (ii) the name(s) of the employee benefit plan(s) whose assets constitute the Source have been disclosed to the Company in writing pursuant to this clause (e); or

(f) the Source is a governmental plan; or

(g) the Source is one or more employee benefit plans, or a separate account or trust fund comprised of one or more employee benefit plans, each of which has been identified to the Company in writing pursuant to this clause (g); or

(h) the Source does not include assets of any employee benefit plan, other than a plan exempt from the coverage of ERISA.

As used in this Section 6.2, the terms *"employee benefit plan," "governmental plan,"* and *"separate account"* shall have the respective meanings assigned to such terms in section 3 of ERISA.

SECTION 7. INFORMATION AS TO COMPANY.

*Section 7.1. Financial and Business Information*. The Company shall deliver to the Purchaser and each holder of Bonds that is an Institutional Investor:

(a) *Quarterly Statements* — within 60 days after the end of each quarterly fiscal period in each fiscal year of the Company (other than the last quarterly fiscal period of each such fiscal year), duplicate copies of:

(i) a consolidated balance sheet of the Company and its Subsidiaries at the end of such quarter, and

(ii) consolidated statements of income, changes in shareholders' equity and cash flows of the Company and its Subsidiaries, for such quarter and (in the case of the second and third quarters) for the portion of the fiscal year ending with such quarter,

setting forth in each case in comparative form the figures for the corresponding periods in the previous fiscal year, all in reasonable detail, prepared in accordance with GAAP applicable to quarterly financial statements generally, and certified by a Senior Financial Officer as fairly presenting, in all material respects, the financial position of the companies being reported on and their results of operations and cash flows, subject to changes resulting from year-end adjustments;

(b) *Annual Statements* — within 120 days after the end of each fiscal year of the Company, duplicate copies of:

(i) a consolidated balance sheet of the Company and its Subsidiaries, as at the end of such year, and

(ii) consolidated statements of income, changes in shareholders' equity and cash flows of the Company and its Subsidiaries for such year,

setting forth in each case in comparative form the figures for the previous fiscal year, all in reasonable detail, prepared in accordance with GAAP, and accompanied by an opinion thereon (without a "going concern" or similar qualification or exception and without any qualification or exception as to the scope of the audit on which such opinion is based) of independent public accountants of recognized national standing, which opinion shall state that such financial statements present fairly, in all material respects, the financial position of the companies being reported upon and their results of operations and cash flows and have been prepared in conformity with GAAP, and that the examination of such accountants in connection with such financial statements has been made in accordance with generally accepted auditing standards, and that such audit provides a reasonable basis for such opinion in the circumstances,

(c) *SEC and Other Reports* — promptly upon their becoming available, one copy of (i) each financial statement, report, notice, or proxy statement sent by the Company or any Subsidiary to its public securities holders generally, and (ii) each regular or periodic report, each registration statement that shall have become effective (without exhibits except as expressly requested by the Purchaser or holder), and each final prospectus and all amendments thereto filed by the Company or any Subsidiary with the SEC;

(d) *Notice of Default* — promptly, and in any event within five days after a Responsible Officer becomes aware of the existence of any Default or completed default under the Indenture, a written notice specifying the nature and period of existence thereof and what action the Company is taking or proposes to take with respect thereto;

(e) *Employee Benefits Matters* — promptly, and in any event within five days after a Responsible Officer becomes aware of any of the following, a written notice setting forth the nature thereof and the action, if any, that the Company or an ERISA Affiliate proposes to take with respect thereto:

(i) with respect to any Plan (other than any Multiemployer Plan) that is subject to Title IV of ERISA, any reportable event, as defined in section 4043(c) of ERISA and the regulations thereunder, for which notice thereof has not been waived pursuant to such regulations as in effect on the date hereof and on the date of the Closing; or

(ii) the taking by the PBGC of steps to institute, or the threatening by the PBGC of the institution of, proceedings under section 4042 of ERISA for the termination of, or the appointment of a trustee to administer, any such Plan, or the receipt by the Company or any ERISA Affiliate of a notice from a Multiemployer Plan that such action has been taken by the PBGC with respect to such Multiemployer Plan; or

(iii) any event, transaction or condition that could result in the incurrence of any liability by the Company or any ERISA Affiliate pursuant to Title I or IV of ERISA or the penalty or excise tax provisions of the Code relating to employee benefit plans, or in the imposition of any Lien on any of the rights, properties or assets of the Company or any ERISA Affiliate pursuant to Title I or IV of ERISA or such penalty or excise tax provisions, if such liability or Lien, taken together with any other such liabilities or Liens then existing, would reasonably be expected to have a Material Adverse Effect;

(f) *Notices from Governmental Authority* — promptly, and in any event within 30 days of receipt thereof, copies of any notice to the Company from any federal or state Governmental Authority relating to any order, ruling, statute or other law or regulation that could reasonably be expected to have a Material Adverse Effect;

(g) *Requested Information* — with reasonable promptness, following the receipt by the Company of a written request by such holder of Bonds, the names and contact information of holders of the outstanding bonds issued under the Indenture (i.e. the bonds in which the Company or a trustee is required to keep in a register and that are not publicly traded) of which the Company has knowledge and the principal amount of the outstanding bonds issued under the Indenture owed to each holder (unless disclosure of such names, contact information or holdings is prohibited by law), and such data and information relating to the business, operations, affairs, financial condition, assets or properties of the Company or any of its Subsidiaries or relating to the ability of the Company to perform its obligations under any Financing Agreement as from time to time may be reasonably requested by the Purchaser or holder of Bonds; and

(h) *Deliveries to Trustee* — promptly, and in any event within five days after delivery to the Trustee, a copy of any deliveries made by the Company to the Trustee.

*Section 7.2. Officer's Certificate*. Each set of financial statements delivered to the Purchaser or holder of Bonds pursuant to Section 7.1(a) or Section 7.1(b) shall be accompanied by a certificate of a Senior Financial Officer setting forth a statement that such Senior Financial Officer has reviewed the relevant terms hereof and of the Indenture and has made, or caused to be made, under his or her supervision, a review of the transactions and conditions of the Company and its Subsidiaries from the beginning of the quarterly or annual period covered by the statements then being furnished to the date of the certificate and that such review shall not have disclosed the existence during such period of any condition or event that constitutes a Default or completed default under the Indenture or, if any such condition or event existed or exists (including, without limitation, any such event or condition resulting from the failure of the Company or any Subsidiary to comply with any Environmental Law), specifying the nature and period of existence thereof and what action the Company shall have taken or proposes to take with respect thereto.

*Section 7.3. Visitation*. The Company shall permit the representatives of the Purchaser and each holder of Bonds that is an Institutional Investor:

(a) *No Default* — if no Default or completed default under the Indenture then exists, at the expense of the Purchaser or holder and upon reasonable prior notice to the Company, to visit the principal executive office of the Company, to discuss the affairs, finances and accounts of the Company and its Subsidiaries with the Company's officers, and, with the consent of the Company (which consent will not be unreasonably withheld), to visit the other offices and properties of the Company and each Subsidiary, all at such reasonable times during normal business hours and as often as may be reasonably requested in writing; and

(b) *Default* — if a Default or completed default under the Indenture then exists, at the expense of the Company to visit and inspect any of the offices or properties of the Company or any Subsidiary, to examine all their respective books of account, records, reports and other papers, to make copies and extracts therefrom, and to discuss their respective affairs, finances and accounts with their respective officers and independent public accountants (and by this provision the Company authorizes said accountants to discuss the affairs, finances and accounts of the Company and its Subsidiaries), all at such reasonable times and as often as may be requested.

SECTION 8. PURCHASE OF BONDS

The Company will not and will not permit any Affiliate to purchase, redeem, prepay or otherwise acquire, directly or indirectly, any of the outstanding Bonds except (a) upon the payment or prepayment of the Bonds in accordance with the terms of this Agreement and the Bonds or (b) pursuant to a written offer to purchase any outstanding Bonds made by the Company or an Affiliate pro rata to the holders of the Bonds upon the same terms and conditions. Any such offer shall provide each holder with sufficient information to enable it to make an informed decision with respect to such offer, and shall remain open for at least 15 Business Days. If the holders of more than 10% of the principal amount of the Bonds then outstanding accept such offer, the Company shall promptly notify the remaining holders of such fact and the expiration date for the acceptance by holders of Bonds of such offer shall be extended by the number of days necessary to give each such remaining holder at least 10 Business Days from its receipt of such notice to accept such offer. The Company will promptly cancel all Bonds acquired by it or any Affiliate pursuant to any payment, prepayment or purchase of Bonds pursuant to any provision of this Agreement and no Bonds may be issued in substitution or exchange for any such Bonds.

SECTION 9. AFFIRMATIVE COVENANTS.

The Company covenants that so long as any of the Bonds are outstanding:

*Section 9.1.* *Compliance with Law*. Without limiting Section 10.4, the Company will, and will cause each of its Subsidiaries to, comply with all laws, ordinances or governmental rules or regulations to which each of them is subject, including, without limitation, ERISA, Environmental Laws, the USA Patriot Act and the other laws and regulations that are referred to in Section 5.16, and will obtain and maintain in effect all licenses, certificates, permits, franchises and other governmental authorizations necessary to the ownership of their respective properties or to the conduct of their respective businesses, in each case to the extent necessary to ensure that non-compliance with such laws, ordinances or governmental rules or regulations or failures to obtain or maintain in effect such licenses, certificates, permits, franchises and other governmental authorizations could not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

*Section 9.2.* *Insurance*. The Company will cause each of its Subsidiaries to maintain, with financially sound and reputable insurers, insurance with respect to their respective properties and businesses against such casualties and contingencies, of such types, on such terms and in such amounts (including deductibles, co-insurance and self-insurance, if adequate reserves are maintained with respect thereto) as is customary in the case of entities of established reputations engaged in the same or a similar business and similarly situated.

*Section 9.3.* *Maintenance of Properties*. The Company will cause each of its Subsidiaries to maintain and keep, or cause to be maintained and kept, their respective properties in good repair, working order and condition (other than ordinary wear and tear), so that the business carried on in connection therewith may be properly conducted at all times, *provided* that this Section 9.3 shall not prevent any Subsidiary from discontinuing the operation and the maintenance of any of its properties if such discontinuance is desirable in the conduct of its business and the Company and such Subsidiary have concluded that such discontinuance would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

*Section 9.4.* *Payment of Taxes*. The Company will cause each of its Subsidiaries to file all income tax or similar tax returns required to be filed in any jurisdiction and to pay and discharge all taxes shown to be due and payable on such returns and all other taxes, assessments, governmental charges, or levies payable by any of them, to the extent the same have become due and payable and before they have become delinquent, provided that any Subsidiary does not need to pay any such tax, assessment, charge or levy if (a) the amount, applicability or validity thereof is contested by the Company or such Subsidiary on a timely basis in good faith and in appropriate proceedings, and the Subsidiary has established adequate reserves therefor in accordance with GAAP on the books of such Subsidiary or (b) the nonpayment of all such taxes, assessments, charges and levies in the aggregate would not reasonably be expected to have a Material Adverse Effect.

*Section 9.5.* *Corporate Existence, Etc*. The Company will at all times preserve and keep in full force and effect the corporate existence of each of its Subsidiaries (unless merged into the Company or a wholly-owned Subsidiary) and all rights and franchises of its Subsidiaries unless, in the good faith judgment of the Company or such Subsidiary, the termination of or failure to preserve and keep in full force and effect such corporate existence, right or franchise would not, individually or in the aggregate, have a Material Adverse Effect.

*Section 9.6.* *Books and Records*. The Company will, and will cause each of its Subsidiaries to, maintain proper books of record and account in conformity with GAAP and all applicable requirements of any Governmental Authority having legal or regulatory jurisdiction over the Company or such Subsidiary.

## SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Bonds are outstanding:

*Section 10.1.* *Transactions with Affiliates*. The Company will not and will not permit any Subsidiary to enter into directly or indirectly any Material transaction or Material group of related transactions (including without limitation the purchase, lease, sale or exchange of properties of any kind or the rendering of any service) with any Affiliate (other than the Company or another Subsidiary), except pursuant to the reasonable requirements of the Company's or such Subsidiary's business.

*Section 10.2.* *Merger, Consolidation, Etc*. The Company will not consolidate with or merge with any other Person or convey, transfer or lease all or substantially all of its assets in a single transaction or series of transactions to any Person unless:

(a) the successor formed by such consolidation or the survivor of such merger or the Person that acquires by conveyance, transfer or lease all or substantially all of the assets of the Company as an entirety, as the case may be, shall be a solvent corporation or limited liability company organized and existing under the laws of the United States or any State thereof (including the District of Columbia), and, if the Company is not such corporation or limited liability company, such corporation or limited liability company shall have executed and delivered to each holder of any Bonds its assumption of the due and punctual performance and observance of each covenant and condition of the Financing Agreements (pursuant to such agreements and instruments as shall be reasonably satisfactory to the Required Holders), and the Company shall have caused to be delivered to each holder of Bonds an opinion of nationally recognized independent counsel, to the effect that all agreements or instruments effecting such assumption are enforceable in accordance with their terms and comply with the terms hereof; and

(b) immediately before and immediately after giving effect to such transaction, no Default or completed default under the Indenture shall have occurred and be continuing.

No such conveyance, transfer or lease of substantially all of the assets of the Company shall have the effect of releasing the Company or any successor corporation or limited liability company that shall theretofore have become such in the manner prescribed in this Section 10.2 from its liability under the Financing Agreements.

*Section 10.3. Line of Business*. The Company will not engage in any business if, as a result, the general nature of the business in which the Company and its Subsidiaries, taken as a whole, would then be engaged would be substantially changed from the general nature of the business in which the Company is engaged on the date of this Agreement.

*Section 10.4. Economic Sanctions, Etc.*. The Company will not, and will not permit any Controlled Entity to (a) become (including by virtue of being owned or controlled by a Blocked Person), own or control a Blocked Person or (b) directly or indirectly have any investment in or engage in any dealing or transaction (including any investment, dealing or transaction involving the proceeds of the Bonds) with any Person if such investment, dealing or transaction (i) would cause any holder or any affiliate of such holder to be in violation of, or subject to sanctions under, any law or regulation applicable to such holder, or (ii) is prohibited by or subject to sanctions under any U.S. Economic Sanctions Laws.

## SECTION 11. PAYMENTS ON BONDS.

So long as the Purchaser or its nominee shall be the holder of any Bond, and notwithstanding anything contained in the Indenture or in such Bond to the contrary, the Company will pay, or cause to be paid by a paying agent, a trustee or other similar party, all sums becoming due on such Bond for principal, Make-Whole Amount or premium, if any, and interest by the method and at the address specified for such purpose below the Purchaser's name in Schedule A, or by such other method or at such other address as the Purchaser shall have from time to time specified to the Company in writing for such purpose, without the presentation or surrender of such Bond or the making of any notation thereon, except that upon written request of the Company or any paying agent made concurrently with or reasonably promptly after payment or prepayment in full of any Bond, the Purchaser shall surrender such Bond for cancellation, reasonably promptly after any such request, to the Company at its principal executive office or at the place of payment most recently designated by the Company pursuant to Article II of the Indenture. Prior to any sale or other disposition of any Bond held by the Purchaser or its nominee, the Purchaser will, at its election, either endorse thereon the amount of principal paid thereon and the last date to which interest has been paid thereon or surrender such Bond to the Company in exchange for a new Bond or Bonds pursuant to Article II of the Indenture. The Company will afford the benefits of this Section 11 to any Institutional Investor that is the direct or indirect transferee of any Bond purchased by the Purchaser under this Agreement and that has made the same agreement relating to such Bond as the Purchaser has made in this Section 11.

## SECTION 12. REGISTRATION; EXCHANGE; EXPENSES, ETC.

*Section 12.1. Registration of Bonds*. The Company shall cause the Trustee to keep a register for the registration and registration of transfers of Bonds in accordance with Article II of the Indenture.

*Section 12.2. Transaction Expenses*. Whether or not the transactions contemplated hereby are consummated, the Company will pay all reasonable costs and expenses (including reasonable attorneys' fees of a special counsel and, if reasonably required by the Required Holders, local or other counsel) incurred by the Purchaser and each other holder of a Bond in connection with such transactions and in connection with any amendments, waivers or consents under or in respect of any Financing Agreement (whether or not such amendment, waiver or consent becomes effective), including, without limitation: (a) the costs and expenses incurred in enforcing or defending (or determining whether or how to enforce or defend) any rights under any Financing Agreement or in responding to any subpoena or other legal process or informal investigative demand issued in connection with any Financing Agreement, or by reason of being the Purchaser or holder of any Bond, (b) the costs and expenses, including financial advisors' fees, incurred in connection with the insolvency or bankruptcy of the Company or any Subsidiary or in connection with any work-out or restructuring of the transactions contemplated by any Financing Agreement and (c) the costs and expenses incurred in connection with the initial filing of any Financing Agreement and all related documents and financial information with the SVO, provided that such costs and expenses under this clause (c) shall not exceed $9,000 for the Bonds. The Company will pay, and will save the Purchaser and each other holder of a Bond harmless from, all claims in respect of any fees, costs or expenses if any, of brokers and finders (other than those, if any, retained by the Purchaser or other holder in connection with its purchase of the Bonds).

*Section 12.3. Survival*. The obligations of the Company under this Section 12 will survive the payment or transfer of any Bond, the enforcement, amendment or waiver of any provision of any Financing Agreement, and the termination of any Financing Agreement.

## SECTION 13. SURVIVAL OF REPRESENTATIONS AND WARRANTIES; ENTIRE AGREEMENT.

All representations and warranties contained herein shall survive the execution and delivery of this Agreement, the purchase or transfer by the Purchaser of any Bond or portion thereof or interest therein and the payment of any Bond, and may be relied upon by any subsequent holder of a Bond, regardless of any investigation made at any time by or on behalf of the Purchaser or any other holder of a Bond. All statements contained in any certificate or other instrument delivered by or on behalf of the Company pursuant to this Agreement shall be deemed representations and warranties of the Company under this Agreement. Subject to the preceding sentence, the Financing Agreements embody the entire agreement and understanding between the Purchaser and the Company and supersede all prior agreements and understandings relating to the subject matter hereof.

SECTION 14. AMENDMENT AND WAIVER.

*Section 14.1. Requirements*. This Agreement and the Bonds may be amended, and the observance of any term hereof or of the Bonds may be waived (either retroactively or prospectively), with (and only with) the written consent of the Company and the Required Holders, except that (i) no amendment or waiver of any of the provisions of Section 1, 2, 3, 4, 5, 6 or 19 hereof, or any defined term, will be effective as to any holder of Bonds unless consented to by such holder of Bonds in writing, and (ii) no such amendment or waiver may, without the written consent of the Purchaser and all of the holders of Bonds at the time outstanding affected thereby, (A) subject to the provisions of the Indenture relating to acceleration, change the amount or time of any prepayment or payment of principal of, or reduce the rate or change the time of payment or method of computation of interest (if such change results in a decrease in the interest rate) or of the Make-Whole Amount on, the Bonds, (B) change the percentage of the principal amount of the Bonds the Purchaser or holders of which are required to consent to any such amendment or waiver, or (C) amend any of Sections 8, 14 or 18.

*Section 14.2. Solicitation of Holders of Bonds*.

(a) *Solicitation.* The Company will provide the Purchaser and holder of the Bonds (irrespective of the amount of Bonds then owned by it) with sufficient information, sufficiently far in advance of the date a decision is required, to enable the Purchaser or holder to make an informed and considered decision with respect to any proposed amendment, waiver or consent in respect of any of the provisions hereof or of the Bonds. The Company will deliver executed or true and correct copies of each amendment, waiver or consent effected pursuant to the provisions of this Section 14 to the Purchaser and each holder of outstanding Bonds promptly following the date on which it is executed and delivered by, or receives the consent or approval of, the Purchaser or the requisite holders of Bonds.

(b) *Payment.* The Company will not directly or indirectly pay or cause to be paid any remuneration, whether by way of supplemental or additional interest, fee or otherwise (other than legal fees or other related expenses), or grant any security or provide other credit support, to the Purchaser or holder of Bonds as consideration for or as an inducement to the entering into by the Purchaser or any holder of Bonds of any waiver or amendment of any of the terms and provisions hereof or of the Bonds unless such remuneration is concurrently paid, or security is concurrently granted or other credit support concurrently provided, on the same terms, ratably to the Purchaser and each holder of Bonds then outstanding even if the Purchaser or holder did not consent to such waiver or amendment.

(c) *Consent in Contemplation of Transfer*. Any consent made pursuant to this Section 14 by a holder of Bonds that has transferred or has agreed to transfer its Bonds to (i) the Company, (ii) any Subsidiary or any other Affiliate or (iii) any other Person in connection with, or in anticipation of, such other Person acquiring, making a tender offer for or merging with the Company and/or any of its Affiliates, and has provided or has agreed to provide such written consent as a condition to such transfer shall be void and of no force or effect except solely as to such holder, and any amendments effected or waivers granted or to be effected or granted that would not have been or would not be so effected or granted but for such consent (and the consents of all other holders of Bonds that were acquired under the same or similar conditions) shall be void and of no force or effect except solely as to such holder.

*Section 14.3. Binding Effect, Etc*. Any amendment or waiver consented to as provided in this Section 14 applies equally to the Purchaser and all holders of Bonds and is binding upon them and upon each future holder of any Bond and upon the Company without regard to whether such Bond has been marked to indicate such amendment or waiver. No such amendment or waiver will extend to or affect any obligation, covenant, agreement, Default or completed default under the Indenture not expressly amended or waived or impair any right consequent thereon. No course of dealing between the Company and Purchaser and any holder of any Bond nor any delay in exercising any rights hereunder or under any Bond shall operate as a waiver of any rights of the Purchaser or any holder of such Bond.

*Section 14.4. Bonds Held by Company, Etc*. Solely for the purpose of determining whether the holders of the requisite percentage of the aggregate principal amount of Bonds then outstanding approved or consented to any amendment, waiver or consent to be given under this Agreement or the Bonds, or have directed the taking of any action provided herein or in the Bonds to be taken upon the direction of the holders of a specified percentage of the aggregate principal amount of Bonds then outstanding, Bonds directly or indirectly owned by the Company or any of its Affiliates shall be deemed not to be outstanding.

## SECTION 15. NOTICES.

All notices and communications provided for hereunder shall be in writing and sent (a) by telecopy if the sender on the same day sends a confirming copy of such notice by a recognized overnight delivery service (charges prepaid), or (b) by registered or certified mail with return receipt requested (postage prepaid), or (c) by a recognized overnight delivery service (with charges prepaid). Any such notice must be sent:

(i) if to the Purchaser or its nominee, to the Purchaser or nominee at the address specified for such communications in Schedule A, or at such other address as the Purchaser or nominee shall have specified to the Company in writing,

(ii) if to any other holder of any Bond, to such holder at such address as such other holder shall have specified to the Company in writing, or

(iii) if to the Company, to the Company at its address set forth at the beginning hereof to the attention of 1000 S. Schuyler Avenue, P.O. Box 152, Kankakee, Illinois

60901, or at such other address as the Company shall have specified to the holder of each Bond in writing.

Notices under this Section 15 will be deemed given only when actually received.

SECTION 16. INDEMNIFICATION.

The Company hereby agrees to indemnify and hold the Purchaser harmless from, against and in respect of any and all loss, liability and expense (including reasonable attorneys' fees) arising from any misrepresentation or nonfulfillment of any undertaking on the part of the Company under this Agreement. The indemnification obligations of the Company under this Section 16 shall survive the execution and delivery of this Agreement, the delivery of the Bonds to the Purchaser and the consummation of the transactions contemplated herein.

SECTION 17. REPRODUCTION OF DOCUMENTS.

This Agreement and all documents relating thereto, including, without limitation, (a) consents, waivers and modifications that may hereafter be executed, (b) documents received by the Purchaser at the Closing (except the Bonds themselves), and (c) financial statements, certificates and other information previously or hereafter furnished to the Purchaser, may be reproduced by the Purchaser by any photographic, photostatic, electronic, digital, or other similar process and the Purchaser may destroy any original document so reproduced. The Company agrees and stipulates that, to the extent permitted by applicable law, any such reproduction shall be admissible in evidence as the original itself in any judicial or administrative proceeding (whether or not the original is in existence and whether or not such reproduction was made by the Purchaser in the regular course of business) and any enlargement, facsimile or further reproduction of such reproduction shall likewise be admissible in evidence. This Section 17 shall not prohibit the Company or any other holder of Bonds from contesting any such reproduction to the same extent that it could contest the original, or from introducing evidence to demonstrate the inaccuracy of any such reproduction.

SECTION 18. CONFIDENTIAL INFORMATION.

For the purposes of this Section 18, *"Confidential Information"* means information delivered to the Purchaser by or on behalf of the Company or any Subsidiary in connection with the transactions contemplated by or otherwise pursuant to this Agreement that is proprietary in nature and that was clearly marked or labeled or otherwise adequately identified when received by the Purchaser as being confidential information of the Company or such Subsidiary, provided that such term does not include information that (a) was publicly known or otherwise known to the Purchaser prior to the time of such disclosure, (b) subsequently becomes publicly known through no act or omission by the Purchaser or any person acting on the Purchaser's behalf, (c) otherwise becomes known to the Purchaser other than through disclosure by the Company or any Subsidiary or (d) constitutes financial statements delivered to the Purchaser under Section 7.1 of this Agreement or under the Indenture that are otherwise publicly available. The Purchaser will maintain the confidentiality of such Confidential Information in accordance with procedures adopted by the Purchaser in good faith to protect confidential information of third parties delivered to the Purchaser, provided that the Purchaser may deliver or disclose Confidential Information to (i) its directors, trustees, officers, employees, agents, attorneys and affiliates (to the extent such disclosure reasonably relates to the administration of the investment represented by Bonds), (ii) its financial advisors and other professional advisors who agree to hold confidential the Confidential Information substantially in accordance with the terms of this Section 18, (iii) the Trustee or any other holder of any Bond, (iv) any Institutional Investor to which it sells or offers to sell such Bond or any part thereof or any participation therein (if such Person has agreed in writing prior to its receipt of such Confidential Information to be bound by the provisions of this Section 18), (v) any Person from which it offers to purchase any security of the Company (if such Person has agreed in writing prior to its receipt of such Confidential Information to be bound by the provisions of this Section 18), (vi) any federal or state or provincial regulatory authority having jurisdiction over the Purchaser, (vii) the NAIC or the SVO or, in each case, any similar organization, or any nationally recognized rating agency that requires access to information about the Purchaser's investment portfolio, or (viii) any other Person to which such delivery or disclosure may be necessary or appropriate (w) to effect compliance with any law, rule, regulation or order applicable to the Purchaser, (x) in response to any subpoena or other legal process, (y) in connection with any litigation to which the Purchaser is a party or (z) if a Default or completed default under the Indenture has occurred and is continuing, to the extent the Purchaser may reasonably determine such delivery and disclosure to be necessary or appropriate in the enforcement or for the protection of the rights and remedies under any Financing Agreement. Each holder of a Bond, by its acceptance of a Bond, will be deemed to have agreed to be bound by and to be entitled to the benefits of this Section 18 as though it were a party to this Agreement. On reasonable request by the Company in connection with the delivery to any holder of a Bond of information required to be delivered to such holder under this Agreement or requested by such holder (other than a holder that is a party to this Agreement or its nominee), such holder will enter into an agreement with the Company embodying the provisions of this Section 18.

In the event that as a condition to receiving access to information relating to the Company or its Subsidiaries in connection with the transactions contemplated by or otherwise pursuant to this Agreement, the Purchaser or holder of a Bond is required to agree to a confidentiality undertaking (whether through a secure website, a secure virtual workspace or otherwise) which is different from this Section 18, this Section 18 shall not be amended thereby and, as between the Purchaser or such holder and the Company, this Section 18 shall supersede any such other confidentiality undertaking.

## SECTION 19. MISCELLANEOUS.

*Section 19.1. Successors and Assigns*. All covenants and other agreements contained in this Agreement by or on behalf of any of the parties hereto bind and inure to the benefit of their respective successors and assigns (including, without limitation, any subsequent holder of a Bond) whether so expressed or not, except that, subject to Section 10.2, the Company may not assign or otherwise transfer any of its rights or obligations hereunder or under the Bonds without the prior written consent of each holder. Nothing in this Agreement, expressed or implied, shall be construed to confer upon any Person (other than the parties hereto and their respective successors and assigns permitted hereby) any legal or equitable right, remedy or claim under or by reason of this Agreement.

*Section 19.2. Accounting Terms*. All accounting terms used herein which are not expressly defined in this Agreement have the meanings respectively given to them in accordance with GAAP. Except as otherwise specifically provided herein, (a) all computations made pursuant to this Agreement shall be made in accordance with GAAP, and (b) all financial statements shall be prepared in accordance with GAAP. For purposes of determining compliance with the financial covenants contained in the Financing Agreements, if any, any election by the Company to measure Debt using fair value (as permitted by Financial Accounting Standards Board Accounting Standards Codification Topic No. 825-10-25 – *Fair Value Option,* International Accounting Standard 39 – *Financial Instruments: Recognition and Measurement* or any similar accounting standard) shall be disregarded and such determination shall be made as if such election had not been made and such Debt shall be valued at not less than 100% of the principal amount thereof.

*Section 19.3. Severability*. Any provision of this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof, and any such prohibition or unenforceability in any jurisdiction shall (to the full extent permitted by law) not invalidate or render unenforceable such provision in any other jurisdiction.

*Section 19.4. Construction, Etc*. Each covenant contained herein shall be construed (absent express provision to the contrary) as being independent of each other covenant contained herein, so that compliance with any one covenant shall not (absent such an express contrary provision) be deemed to excuse compliance with any other covenant. Where any provision herein refers to action to be taken by any Person, or which such Person is prohibited from taking, such provision shall be applicable whether such action is taken directly or indirectly by such Person.

For the avoidance of doubt, all Schedules and Exhibits attached to this Agreement shall be deemed to be a part hereof.

*Section 19.5. Counterparts*. This Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one instrument. Each counterpart may consist of a number of copies hereof, each signed by less than all, but together signed by all, of the parties hereto.

*Section 19.6. Governing Law*. This Agreement shall be construed and enforced in accordance with, and the rights of the parties shall be governed by, the law of the State of Illinois excluding choice-of-law principles of the law of such State that would permit the application of the laws of a jurisdiction other than such State.

*Section 19.7. Jurisdiction and Process; Waiver of Jury Trial*. (a) The Company irrevocably submits to the non-exclusive jurisdiction of any Illinois State or federal court sitting in Chicago, Illinois, over any suit, action or proceeding arising out of or relating to this

Agreement or the Bonds. To the fullest extent permitted by applicable law, the Company irrevocably waives and agrees not to assert, by way of motion, as a defense or otherwise, any claim that it is not subject to the jurisdiction of any such court, any objection that it may now or hereafter have to the laying of the venue of any such suit, action or proceeding brought in any such court and any claim that any such suit, action or proceeding brought in any such court has been brought in an inconvenient forum.

(b) The Company consents to process being served by or on behalf of any holder of Bonds in any suit, action or proceeding of the nature referred to in Section 19.7(a) by mailing a copy thereof by registered or certified mail (or any substantially similar form of mail), postage prepaid, return receipt requested, to it at its address specified in Section 15 or at such other address of which such holder shall then have been notified pursuant to said Section. The Company agrees that such service upon receipt (i) shall be deemed in every respect effective service of process upon it in any such suit, action or proceeding and (ii) shall, to the fullest extent permitted by applicable law, be taken and held to be valid personal service upon and personal delivery to it. Notices hereunder shall be conclusively presumed received as evidenced by a delivery receipt furnished by the United States Postal Service or any reputable commercial delivery service.

(c) Nothing in this Section 19.7 shall affect the right of any holder of a Bond to serve process in any manner permitted by law, or limit any right that the holders of any of the Bonds may have to bring proceedings against the Company in the courts of any appropriate jurisdiction or to enforce in any lawful manner a judgment obtained in one jurisdiction in any other jurisdiction.

(d) The parties hereto hereby waive trial by jury in any action brought on or with respect to this Agreement, the Bonds or any other document executed in connection herewith or therewith.

*Section 19.8. Payments Due on Non-Business Days*. Anything in this Agreement or the Bonds to the contrary notwithstanding, any payment of principal of or Make-Whole Amount or interest on any Bond that is due on a date other than a Business Day shall be made on the next succeeding Business Day without including the additional days elapsed in the computation of the interest payable on such next succeeding Business Day; provided that if the maturity date of any Bond is a date other than a Business Day, the payment otherwise due on such maturity date shall be made on the next succeeding Business Day and shall include the additional days elapsed in the computation of interest payable on such next succeeding Business Day.

* * * * *

If you are in agreement with the foregoing, please sign the form of agreement on a counterpart of this Agreement and return it to the Company, whereupon this Agreement shall become a binding agreement between you and the Company.

Very truly yours,

AQUA ILLINOIS, INC.

## Defined Terms

As used herein, the following terms have the respective meanings set forth below or set forth in the Section hereof following such term:

*"Affiliate"* means, at any time, and with respect to any Person, any other Person that at such time directly or indirectly through one or more intermediaries Controls, or is Controlled by, or is under common Control with, such first Person. As used in this definition, "Control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise. Unless the context otherwise clearly requires, any reference to an "Affiliate" is a reference to an Affiliate of the Company.

*"Agreement"* means this Bond Purchase Agreement, including all Schedules and Exhibits attached to this Agreement.

*"Anti-Corruption Laws"* means any law or regulation in a U.S. or any non-U.S. jurisdiction regarding bribery or any other corrupt activity, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act 2010.

*"Anti-Money Laundering Laws"* means any law or regulation in a U.S. or any non-U.S. jurisdiction regarding money laundering, drug trafficking, terrorist-related activities or other money laundering predicate crimes, including the Currency and Foreign Transactions Reporting Act of 1970 (otherwise known as the Bank Secrecy Act) and the USA Patriot Act.

*"Blocked Person"* means (a) a Person whose name appears on the list of Specially Designated Nationals and Blocked Persons published by OFAC, (b) a Person, entity, organization, country or regime that is blocked or a target of sanctions that have been imposed under U.S. Economic Sanctions Laws or (c) a Person that is an agent, department or instrumentality of, or is otherwise beneficially owned by, controlled by or acting on behalf of, directly or indirectly, any Person, entity, organization, country or regime described in clause (a) or (b).

*"Bonds"* is defined in Section 1.

*"Business Day"* means for the purposes of any provision of this Agreement, any day other than a Saturday, a Sunday or a day on which commercial banks in New York, New York or Chicago, Illinois are required or authorized to be closed.

*"Capital Lease"* means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

*"Capital Lease Obligation"* means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

*"Closing"* is defined in Section 3.

*"Code"* means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

*"Company"* means Aqua Illinois, Inc., a corporation existing under the laws of the State of Illinois.

"*Controlled Entity*" means any of the Subsidiaries of the Company and any of their or the Company's respective Controlled Affiliates. As used in this definition, "Control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

*"Debt"* means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

*"Default"* means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become a completed default under the Indenture.

*"Disclosure Documents"* is defined in Section 5.3.

*"Environmental Laws"* means any and all Federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to Hazardous Materials.

*"ERISA"* means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"ERISA Affiliate"* means any trade or business (whether or not incorporated) that is treated as a single employer together with the Company under section 414 of the Code.

*"Financing Agreements"* means this Agreement, the Indenture (including without limitation Supplemental Indenture Y), and the Bonds.

"*GAAP*" means generally accepted accounting principles as in effect from time to time in the United States of America.

*"Governmental Authority"* means:

(a) the government of

(i) the United States of America or any State or other political subdivision thereof, or

(ii) any other jurisdiction in which the Company or any Subsidiary conducts all or any part of its business, or which asserts jurisdiction over any properties of the Company or any Subsidiary, or

(b) any entity exercising executive, legislative, judicial, regulatory or administrative functions of, or pertaining to, any such government.

*"Governmental Official"* means any governmental official or employee, employee of any government-owned or government-controlled entity, political party, any official of a political party, candidate for political office, official of any public international organization or anyone else acting in an official capacity.

*"Guaranty"* means, with respect to any Person, any obligation (except the endorsement in the ordinary course of business of negotiable instruments for deposit or collection) of such Person guaranteeing or in effect guaranteeing any Debt, dividend or other obligation of any other

Person in any manner, whether directly or indirectly, including (without limitation) obligations incurred through an agreement, contingent or otherwise, by such Person:

(a) to purchase such Debt or obligation or any property constituting security therefor primarily for the purpose of assuring the owner of such Debt or obligation of the ability of any other Person to make payment of the Debt or obligation;

(b) to advance or supply funds (i) for the purchase or payment of such Debt or obligation, or (ii) to maintain any working capital or other balance sheet condition or any income statement condition of any other Person or otherwise to advance or make available funds for the purchase or payment of such Debt or obligation;

(c) to lease properties or to purchase properties or services primarily for the purpose of assuring the owner of such Debt or obligation of the ability of any other Person to make payment of the Debt or obligation; or

(d) otherwise to assure the owner of such Debt or obligation against loss in respect thereof.

In any computation of the Debt or other liabilities of the obligor under any Guaranty, the Debt or other obligations that are the subject of such Guaranty shall be assumed to be direct obligations of such obligor, *provided* that the amount of such Debt outstanding for purposes of this Agreement shall not exceed the maximum amount of Debt that is the subject of such Guaranty.

*"Hazardous Material"* means any and all pollutants, toxic or hazardous wastes or other substances that might pose a hazard to health and safety, the removal of which may be required or the generation, manufacture, refining, production, processing, treatment, storage, handling, transportation, transfer, use, disposal, release, discharge, spillage, seepage or filtration of which is or shall be restricted, prohibited or penalized by any applicable law including, but not limited to, asbestos, urea formaldehyde foam insulation, polychlorinated biphenyls, petroleum, petroleum products, lead based paint, radon gas or similar restricted, prohibited or penalized substances.

*"holder"* is defined in the Indenture.

*"Indenture"* is defined in Section 1.

*"Institutional Investor"* means (a) the Purchaser, (b) any holder of a Bond holding (together with one or more of its affiliates) more than 5% of the aggregate principal amount of the Bonds then outstanding, (c) any bank, trust company, savings and loan association or other financial institution, any pension plan, any investment company, any insurance company, any broker or dealer, or any other similar financial institution or entity, regardless of legal form, and (d) any Related Fund of any holder of any Bond.

*"Lien"* means, with respect to any Person, any mortgage, lien, pledge, charge, security interest or other encumbrance, or any interest or title of any vendor, lessor, lender or other secured party to or of such Person under any conditional sale or other title retention agreement or Capital Lease, upon or with respect to any property or asset of such Person (including in the case of stock, stockholder agreements, voting trust agreements and all similar arrangements).

*"Make-Whole Amount"* is defined in Supplemental Indenture Y.

*"Material"* means material in relation to the business, operations, affairs, financial condition, assets or properties of the Company and its Subsidiaries taken as a whole.

*"Material Adverse Effect"* means a material adverse effect on (a) the business, operations, affairs, financial condition, assets or properties of the Company and its Subsidiaries taken as a whole, (b) the ability of the Company to perform its obligations under this Agreement, the Bonds or the Indenture or (c) the validity or enforceability of any Financing Agreement.

*"Multiemployer Plan"* means any Plan that is a "multiemployer plan" (as such term is defined in section 4001(a)(3) of ERISA).

*"NAIC"* means the National Association of Insurance Commissioners or any successor thereto.

*"Non-U.S. Plan"* means any plan, fund or other similar program that (a) is established or maintained outside the United States of America by the Company or any Subsidiary primarily for the benefit of employees of the Company or one or more Subsidiaries residing outside the United States of America, which plan, fund or other similar program provides, or results in, retirement income, a deferral of income in contemplation of retirement or payments to be made upon termination of employment, and (b) is not subject to ERISA or the Code.

*"OFAC"* means the Office of Foreign Assets Control of the United States Department of the Treasury.

"*OFAC Sanctions Program*" means any economic or trade sanction that OFAC is responsible for administering and enforcing. A list of OFAC Sanctions Programs may be found at http://www.treasury.gov/resource-center/sanctions/Programs/Pages/Programs.aspx.

*"Officer's Certificate"* means a certificate of a Senior Financial Officer or of any other officer of the Company whose responsibilities extend to the subject matter of such certificate.

*"Original Mortgage and Deed of Trust"* is defined in Section 1.

*"PBGC"* means the Pension Benefit Guaranty Corporation referred to and defined in ERISA or any successor thereto.

*"Person"* means an individual, partnership, corporation, limited liability company, association, trust, unincorporated organization, business entity or Governmental Authority.

*"Plan"* means an "employee benefit plan" (as defined in section 3(2) of ERISA) subject to Title I of ERISA that is or, within the preceding five years, has been established or maintained, or to which contributions are or, within the preceding five years, have been made or required to be made, by the Company or any ERISA Affiliate or with respect to which the Company or any ERISA Affiliate may have any liability.

*"property"* or *"properties"* means, unless otherwise specifically limited, real or personal property of any kind, tangible or intangible, choate or inchoate.

*"PTE"* is defined in Section 6.2(a).

*"Purchaser"* is defined in the first paragraph of this Agreement.

*"Related Fund"* means, with respect to any holder of any Bond, any fund or entity that (i) invests in Securities or bank loans, and (ii) is advised or managed by such holder, the same investment advisor as such holder or by an affiliate of such holder or such investment advisor.

*"Required Holders"* means the holders of at least 51% in principal amount of the Bonds at the time outstanding (exclusive of Bonds then owned by the Company or any of its Affiliates).

*"Responsible Officer"* means any Senior Financial Officer and any other officer of the Company with responsibility for the administration of the relevant portion of this Agreement.

*"SEC"* means the Securities and Exchange Commission of the United States, or any successor thereto.

*"Securities"* or *"Security"* shall have the meaning specified in Section 2(a)(1) of the Securities Act.

*"Securities Act"* means the Securities Act of 1933, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"Senior Financial Officer"* means the chief financial officer, principal accounting officer, treasurer or comptroller of the Company.

*"Series AA Bonds"* is defined in Section 1.

*"Series BB Bonds"* is defined in Section 1.

*"Series CC Bonds"* is defined in Section 1.

*"Series DD Bonds"* is defined in Section 1.

*"Series Y Bonds"* is defined in Section 1.

*"Series Z Bonds"* is defined in Section 1.

*"Source"* is defined in Section 6.2.

*"State Sanctions List"* means a list that is adopted by any state Governmental Authority within the United States of America pertaining to Persons that engage in investment or other commercial activities in Iran or any other country that is a target of economic sanctions imposed under U.S. Economic Sanctions Laws.

*"Subsidiary"* means, as to any Person, any other Person in which such first Person or one or more of its Subsidiaries or such first Person and one or more of its Subsidiaries owns sufficient equity or voting interests to enable it or them (as a group) ordinarily, in the absence of contingencies, to elect a majority of the directors (or Persons performing similar functions) of such second Person, and any partnership or joint venture if more than a 50% interest in the profits or capital thereof is owned by such first Person or one or more of its Subsidiaries or such first Person and one or more of its Subsidiaries (unless such partnership or joint venture can and does ordinarily take major business actions without the prior approval of such Person or one or more of its Subsidiaries). Unless the context otherwise clearly requires, any reference to a "Subsidiary" is a reference to a Subsidiary of the Company.

*"Supplemental Indenture Y"* is defined in Section 1.

*"SVO"* means the Securities Valuation Office of the NAIC or any successor to such Office.

*"Swaps"* means, with respect to any Person, payment obligations with respect to interest rate swaps, currency swaps and similar obligations obligating such Person to make payments, whether periodically or upon the happening of a contingency. For the purposes of this Agreement, the amount of the obligation under any Swap shall be the amount determined in respect thereof as of the end of the then most recently ended fiscal quarter of such Person, based on the assumption that such Swap had terminated at the end of such fiscal quarter, and in making such determination, if any agreement relating to such Swap provides for the netting of amounts payable by and to such Person thereunder or if any such agreement provides for the simultaneous payment of amounts by and to such Person, then in each such case, the amount of such obligation shall be the net amount so determined.

*"Trust Estate"* means the properties mortgaged, pledged and conveyed to the Trustee pursuant to the Indenture.

*"Trustee"* is defined in Section 1.

*"USA Patriot Act"* means United States Public Law 107-56, Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"U.S. Economic Sanctions Laws"* means those laws, executive orders, enabling legislation or regulations administered and enforced by the United States pursuant to which

economic sanctions have been imposed on any Person, entity, organization, country or regime, including the Trading with the Enemy Act, the International Emergency Economic Powers Act, the Iran Sanctions Act, the Sudan Accountability and Divestment Act, each as amended from time to time, and any other OFAC Sanctions Program.

As of July 20, 2017

To Each of the Purchasers Listed in
Schedule A Hereto:

Ladies and Gentlemen:

Aqua Pennsylvania, Inc., a corporation organized under the laws of the Commonwealth of Pennsylvania (the *"Company"*), agrees with each of the purchasers whose names appear at the end hereof (each, a *"Purchaser"* and, collectively, the *"Purchasers"*) as follows:

SECTION 1. AUTHORIZATION OF BONDS.

The Company will authorize the issue and sale of (i) First Mortgage Bonds, 4.04% Series due 2055 (herein referred to as the *"4.04% Series due 2055 Bonds"*) in an aggregate principal amount of $40,000,000, to bear interest at the rate of 4.04% per annum, and to mature on July 15, 2055, (ii) First Mortgage Bonds, 4.06% Series due 2057 (herein referred to as the *"4.06% Series due 2057 Bonds"*) in an aggregate principal amount of $40,000,000, to bear interest at the rate of 4.06% per annum, and to mature on July 15, 2057, (iii) First Mortgage Bonds, 4.06% Series due 2054 (herein referred to as the *"4.06% Series due 2054 Bonds"*) in an aggregate principal amount of $35,000,000, to bear interest at the rate of 4.06% per annum, and to mature on October 15, 2054, (iv) First Mortgage Bonds, 4.07% Series due 2055 (herein referred to as the *"4.07% Series due 2055 Bonds"*) in an aggregate principal amount of $20,000,000, to bear interest at the rate of 4.07% per annum, and to mature on October 15, 2055 and (v) First Mortgage Bonds, 4.09% Series due 2057 (herein referred to as the *"4.09% Series due 2057 Bonds"*) in an aggregate principal amount of $20,000,000, to bear interest at the rate of 4.09% per annum, and to mature on October 15, 2057 (the 4.04% Series due 2055 Bonds, the 4.06% Series due 2057 Bonds, the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds are collectively referred to as the *"Bonds"* and such term includes any such bonds issued in substitution therefor). The Bonds will be issued under and secured by that certain Indenture of Mortgage dated as of January 1, 1941, from the Company (as successor by merger to the Philadelphia Suburban Water Company), as grantor, to The Bank of New York Mellon Trust Company, N.A., as successor trustee (the "*Trustee*") (the

*"Original Indenture"*), as previously amended and supplemented by fifty-one supplemental indentures and as further supplemented by the Fifty-second Supplemental Indenture dated as of June 15, 2017 (such Fifty-second Supplemental Indenture being referred to herein as the *"Supplement"*) which will be substantially in the form attached hereto as Exhibit A, with such changes therein, if any, as shall be approved by the Purchasers and the Company. The Original Indenture, as supplemented and amended by the aforementioned fifty-one supplemental indentures and the Supplement, and as further supplemented or amended according to its terms, is hereinafter referred to as the *"Indenture"*. Certain capitalized and other terms used in this Agreement are defined in Schedule B; and references to a *"Schedule"* or an *"Exhibit"* are, unless otherwise specified, to a Schedule or an Exhibit attached to this Agreement. Terms used herein but not defined herein shall have the meanings set forth in the Indenture.

SECTION 2. SALE AND PURCHASE OF BONDS.

Subject to the terms and conditions of this Agreement, the Company will issue and sell to each Purchaser and each Purchaser will purchase from the Company, at each Closing provided for in Section 3, Bonds in the principal amount and in the series specified opposite such Purchaser's name in Schedule A at the purchase price of 100% of the principal amount thereof. The Purchasers' obligations hereunder are several and not joint obligations and no Purchaser shall have any liability to any Person for the performance or non-performance of any obligation by any other Purchaser hereunder.

SECTION 3. CLOSINGS.

The execution and delivery of this Agreement and the sale and purchase of the Bonds to be purchased by each Purchaser shall occur at the offices of Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, at 10:00 a.m., Chicago time, at two separate closings (each a *"Closing"*), the first of which (for the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds) shall occur on July 20, 2017 or on such other Business Day thereafter on or prior to July 31, 2017 as may be agreed upon by the Company and the Purchasers (the *"First Closing"*), and the second of which (for the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds) will occur on October 26, 2017, or on such other Business Day thereafter on or prior to October 31, 2017 as may be agreed upon by the Company and the Purchasers (the *"Second Closing"*). At each such Closing the Company will deliver to each Purchaser the Bonds to be purchased by such Purchaser in the form of one or more Bonds to be purchased by such Purchaser, as applicable, in such denominations as such Purchaser may request (with a minimum denomination of $100,000 for each Bond), dated the date of such Closing and registered in such Purchaser's name (or in the name of its nominee), against delivery by such Purchaser to the Company or its order of immediately available funds in the amount of the purchase price therefor by wire transfer of immediately available funds for Account Number: 8559742757, Account Name: Aqua Pennsylvania, Inc., at PNC Bank, N.A., Philadelphia, Pennsylvania, ABA Number 031-000053. If at either Closing the Company shall fail to tender such Bonds to any Purchaser as provided above in this Section 3, or any of the conditions specified in Section 4 shall not have been fulfilled to such Purchaser's satisfaction, such Purchaser shall, at its election, be relieved of all further obligations under this Agreement, without thereby waiving any rights such Purchaser may have by reason of such failure by the

Company to tender such Bonds or any of the conditions specified in Section 4 not having been fulfilled to such Purchaser's satisfaction.

## SECTION 4. CONDITIONS TO CLOSING.

Each Purchaser's obligation to execute and deliver this Agreement and to purchase and pay for the Bonds to be sold to such Purchaser at the applicable Closing is subject to the fulfillment to such Purchaser's satisfaction prior to or at such Closing of the following conditions:

*Section 4.1. Representations and Warranties*. The representations and warranties of the Company in this Agreement shall be correct when made and at the time of such Closing.

*Section 4.2. Performance; No Default*. The Company shall have performed and complied with all agreements and conditions contained in each Financing Agreement required to be performed or complied with by the Company prior to or at such Closing, and after giving effect to the issue and sale of the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds, or the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, as applicable, (and the application of the proceeds thereof as contemplated by Section 5.14), no Default or Event of Default shall have occurred and be continuing.

*Section 4.3. Compliance Certificates*. The Company shall have performed and complied with all agreements and conditions contained in the Indenture which are required to be performed or complied with by the Company for the issuance of the Bonds at such Closing. In addition the Company shall have delivered the following certificates:

(a) *Officer's Certificate.* The Company shall have delivered to such Purchaser (i) an Officer's Certificate, dated the date of such Closing, certifying that the conditions specified in Section 4 of this Agreement have been fulfilled, and (ii) copies of all certificates and opinions required to be delivered to the Trustee under the Indenture in connection with the issuance of the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds, or the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, as applicable, under the Indenture, in each case, dated the date of such Closing.

(b) *Secretary's Certificate.* The Company shall have delivered to such Purchaser a certificate of its Secretary or Assistant Secretary, dated the date of such Closing, certifying as to the resolutions attached thereto and other corporate proceedings relating to the authorization, execution and delivery of this Agreement, the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds, or the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, as applicable, under the Indenture, and the Supplement.

(c) *Certification of Indenture.* Such Purchaser shall have received a composite copy of the Indenture (together with all amendments and supplements thereto), certified by the Company as of the date of such Closing, exclusive of property exhibits, recording information and the like.

*Section 4.4. Opinions of Counsel*. Such Purchaser shall have received opinions in form and substance satisfactory to such Purchaser, dated the date of such Closing (a) from Christopher P. Luning, counsel for the Company, covering the matters set forth in Exhibit 4.4(a) and covering such other matters incident to the transactions contemplated hereby as such Purchaser or its counsel may reasonably request (and the Company hereby instructs its counsel to deliver such opinion to the Purchasers) and (b) from Dilworth Paxson, LLP, special counsel to the Company, covering the matters set forth in Exhibit 4.4(b) and covering such other matters incident to the transactions contemplated hereby as such Purchaser or such Purchaser's counsel may reasonably request (and the Company hereby instructs its counsel to deliver such opinion to the Purchasers), and (c) from Chapman and Cutler LLP, the Purchasers' special counsel in connection with such transactions, substantially in the form set forth in Exhibit 4.4(c) and covering such other matters incident to such transactions as such Purchaser may reasonably request. The Company hereby directs its counsel to deliver the opinions required by this Section 4.4 and understands and agrees that each Purchaser will and hereby is authorized to rely on such opinions.

*Section 4.5. Purchase Permitted by Applicable Law, Etc*. On the date of such Closing such Purchaser's purchase of Bonds shall (a) be permitted by the laws and regulations of each jurisdiction to which such Purchaser is subject, without recourse to provisions (such as section 1405(a)(8) of the New York Insurance Law) permitting limited investments by insurance companies without restriction as to the character of the particular investment, (b) not violate any applicable law or regulation (including, without limitation, Regulation T, U or X of the Board of Governors of the Federal Reserve System) and (c) not subject such Purchaser to any tax, penalty or liability under or pursuant to any applicable law or regulation, which law or regulation was not in effect on the date of either Closing. If requested by such Purchaser, such Purchaser shall have received an Officer's Certificate certifying as to such matters of fact as such Purchaser may reasonably specify to enable such Purchaser to determine whether such purchase is so permitted.

*Section 4.6. Sale of Bonds*. Contemporaneously with such Closing, the Company shall sell to each Purchaser and each Purchaser shall purchase the Bonds to be purchased by it at such Closing as specified in Schedule A. In the case of the Second Closing, the transactions contemplated herein with respect to the First Closing shall have been consummated in accordance with the terms hereof.

*Section 4.7. Payment of Special Counsel Fees*. Without limiting the provisions of Section 12.2, the Company shall have paid on or before such Closing the reasonable fees, reasonable charges and reasonable disbursements of the Purchasers' special counsel referred to in Section 4.4(c) to the extent reflected in a statement of such counsel rendered to the Company at least one Business Day prior to the Closing.

*Section 4.8. Private Placement Number*. A Private Placement Number issued by Standard & Poor's CUSIP Service Bureau (in cooperation with the SVO) shall have been obtained for the series of Bonds issued at such Closing.

*Section 4.9. Changes in Corporate Structure*. The Company shall not have changed its jurisdiction of incorporation or organization, as applicable, or been a party to any merger or consolidation or succeeded to all or any substantial part of the liabilities of any other entity, at any time following the date of the most recent financial statements referred to in Schedule 5.5.

*Section 4.10. Funding Instructions*. At least three Business Days prior to the date of such Closing, such Purchaser shall have received written instructions signed by a Responsible Officer on letterhead of the Company confirming the information specified in Section 3 including (a) the name and address of the transferee bank, (b) such transferee bank's ABA number and (c) the account name and number into which the purchase price for the Bonds is to be deposited.

*Section 4.11. Proceedings and Documents*. All corporate and other proceedings in connection with the transactions contemplated by this Agreement and all documents and instruments incident to such transactions shall be reasonably satisfactory to such Purchaser and its special counsel, and such Purchaser and its special counsel shall have received all such counterpart originals or certified or other copies of such documents as such Purchaser or such special counsel may reasonably request.

*Section 4.12. Execution and Delivery and Filing and Recording of the Supplement*. Prior to or at the First Closing, the Supplement shall have been duly executed and delivered by the Company, and the Company shall have filed, or delivered for recordation, the Supplement in all locations in Pennsylvania (and financing statements in respect thereof shall have been filed, if necessary) in such manner and in such places as is required by law (and no other instruments are required to be filed) to establish, preserve, perfect and protect the direct security interest and mortgage Lien of the Trust Estate created by the Indenture on all mortgaged and pledged property of the Company referred to in the Indenture as subject to the direct mortgage Lien thereof and the Company shall have delivered satisfactory evidence of such filings, recording or delivery for recording.

*Section 4.13. Regulatory Approvals.* The issue and sale of the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds, or the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, as applicable, shall have been duly authorized by an order of the Pennsylvania Public Utility Commission and such order shall be in full force and effect on the date of the applicable Closing and all appeal periods, if any, applicable to such order shall have expired. The Company shall deliver satisfactory evidence that orders have been obtained approving the issuance of such Bonds from the Pennsylvania Public Utility Commission or that the Pennsylvania Public Utility Commission shall have waived jurisdiction thereof and such approval or waiver shall not be contested or subject to review, or that the Pennsylvania Public Utility Commission does not have jurisdiction.

SECTION 5. REPRESENTATIONS AND WARRANTIES OF THE COMPANY.

The Company represents and warrants to each Purchaser at each Closing that:

*Section 5.1. Organization; Power and Authority*. The Company is a corporation duly organized, validly existing and subsisting under the laws of the Commonwealth of Pennsylvania, and is duly qualified as a foreign corporation and is in good standing in each jurisdiction in which such qualification is required by law, other than those jurisdictions as to which the failure to be so qualified or in good standing would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect. The Company has the corporate power and authority to own or hold under lease the properties it purports to own or hold under lease, to transact the business it transacts and proposes to transact, to execute and deliver this Agreement, the Bonds and the Supplement (and had the corporate power and authority to execute and deliver the Indenture at the time of execution and delivery thereof) and to perform the provisions of the Financing Agreements.

*Section 5.2. Authorization, Etc*. (a) At the First Closing, each Financing Agreement has been duly authorized by all necessary corporate action on the part of the Company, and each Financing Agreement (other than the Supplement and the Bonds) constitutes, and when the Supplement is executed and delivered by the Company and the Trustee and when the 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds are executed, issued and delivered by the Company, authenticated by the Trustee and paid for by the Purchasers, the Supplement and each 4.04% Series due 2055 Bonds, and the 4.06% Series due 2057 Bonds will constitute, a legal, valid and binding obligation of the Company enforceable against the Company in accordance with its respective terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

(b) At the Second Closing, each Financing Agreement (other than the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds) remains in full force and effect, and when the 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, as applicable, are executed, issued and delivered by the Company, authenticated by the Trustee and paid for by the Purchasers, each 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds will constitute, a legal, valid and binding obligation of the Company enforceable against the Company in accordance with its respective terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

*Section 5.3. Disclosure*. This Agreement and the documents, certificates or other writings delivered to the Purchasers by or on behalf of the Company in connection with the transactions contemplated hereby, including the Term Sheet (including the documents incorporated therein by reference) dated March 21, 2017, and the financial statements listed in

Schedule 5.5 (collectively, the *"Disclosure Documents"*), taken as a whole, do not contain any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein not misleading in light of the circumstances under which they were made. Since December 31, 2016, there has been no change in the financial condition, operations, business or properties of the Company or any of its Subsidiaries except changes that individually or in the aggregate would not reasonably be expected to have a Material Adverse Effect. There is no fact known to management of the Company that, in the reasonable judgment of management of the Company, could be expected to have a Material Adverse Effect that has not been set forth herein or in the other documents, certificates and other writings delivered to the Purchaser by the Company specifically for use in connection with the transactions contemplated hereby.

*Section 5.4.* *Organization and Ownership of Shares of Subsidiaries*. (a) Schedule 5.4 contains a complete and correct list of the Company's Subsidiaries, showing, as to each Subsidiary, the correct name thereof, the jurisdiction of its organization, and the percentage of shares of each class of its capital stock or similar equity interests outstanding owned by the Company and each other Subsidiary.

(b) All of the outstanding shares of capital stock or similar equity interests of each Subsidiary shown in Schedule 5.4 as being owned by the Company and its Subsidiaries have been validly issued, are fully paid and nonassessable and are owned by the Company or another Subsidiary free and clear of any Lien.

(c) Each Subsidiary identified in Schedule 5.4 is duly incorporated and is validly subsisting as a corporation under the laws of the Commonwealth of Pennsylvania, and is duly qualified as a foreign corporation or other legal entity and is in good standing in each jurisdiction in which such qualification is required by law, other than those jurisdictions as to which the failure to be so qualified or in good standing could not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect. Each such Subsidiary has the corporate or other power and authority to own or hold under lease the properties it purports to own or hold under lease and to transact the business it transacts and proposes to transact.

*Section 5.5.* *Financial Statements; Material Liabilities*. The Company has delivered to each Purchaser copies of the financial statements of the Company and its Subsidiaries listed on Schedule 5.5. All of said financial statements (including in each case the related schedules and notes) fairly present in all material respects the consolidated financial position of the Company and its Subsidiaries as of the respective dates specified in such financial statements and the consolidated results of their operations and cash flows for the respective periods so specified and have been prepared in accordance with GAAP consistently applied throughout the periods involved except as set forth in the notes thereto (subject, in the case of any interim financial statements, to normal year-end adjustments). The Company does not have any Material liabilities that are not disclosed on such financial statements or otherwise disclosed in the Disclosure Documents.

*Section 5.6.* *Compliance with Laws, Other Instruments, Etc*. The execution, delivery and performance by the Company of each Financing Agreement (including the prior execution and delivery of the Indenture), will not (a) contravene, result in any breach of, or constitute a default under, or result in the creation of any Lien, other than the Lien created under the Indenture, in respect of any property of the Company or any Subsidiary under, any indenture, mortgage, deed of trust, loan, purchase or credit agreement, lease, corporate charter, regulations or by-laws, or any other Material agreement or instrument to which the Company or any Subsidiary is bound or by which the Company or any Subsidiary or any of their respective properties may be bound or affected, (b) conflict with or result in a breach of any of the terms, conditions or provisions of any order, judgment, decree, or ruling of any court, arbitrator or Governmental Authority applicable to the Company or any Subsidiary or (c) violate any provision of any statute or other rule or regulation of any Governmental Authority applicable to the Company or any Subsidiary, except for any such default, breach, contravention or violation which would not reasonably be expected to have a Material Adverse Effect.

*Section 5.7.* *Governmental Authorizations, Etc.* No consent, approval or authorization of, or registration, filing or declaration with, any Governmental Authority is required in connection with the execution, delivery or performance by the Company of this Agreement, the Bonds and the Supplement, other than approval of the Pennsylvania Public Utility Commission, which has been obtained and is in full force and effect and final and is non-appealable.

*Section 5.8.* *Litigation; Observance of Statutes and Orders*. (a) There are no actions, suits, investigations or proceedings pending or, to the knowledge of the Company, threatened against or affecting the Company or any Subsidiary or any property of the Company or any Subsidiary in any court or before any arbitrator of any kind or before or by any Governmental Authority that, individually or in the aggregate, would reasonably be expected to have a Material Adverse Effect.

(b) Neither the Company nor any Subsidiary is (i) in default under any term of any agreement or instrument to which it is a party or by which it is bound, (ii) in violation of any order, judgment, decree or ruling of any court, any arbitrator of any kind or any Governmental Authority naming or referring to the Company or any Subsidiary or (iii) in violation of any applicable law, or, to the knowledge of the Company, any ordinance, rule or regulation of any Governmental Authority (including, without limitation, Environmental Laws the USA Patriot Act or any of the other laws and regulations that are referred to in Section 5.16), which default or violation, individually or in the aggregate, could reasonably be expected to have a Material Adverse Effect.

*Section 5.9.* *Taxes*. The Company and its Subsidiaries have filed all income tax returns that are required to have been filed in any jurisdiction, and have paid all taxes shown to be due and payable on such returns and all other taxes and assessments payable by them, to the extent such taxes and assessments have become due and payable and before they have become delinquent, except for any taxes and assessments (i) the amount of which is not individually or in the aggregate Material or (ii) the amount, applicability or validity of which is currently being contested in good faith by appropriate proceedings and with respect to which the Company or a Subsidiary, as the case may be, has established adequate reserves in accordance with GAAP. The charges, accruals, and reserves on the books of the Company and its Subsidiaries in respect of federal, state or other taxes for all fiscal periods are adequate. The Federal income tax liabilities of the Company and its Subsidiaries have been finally determined (whether by reason of completed audits or the statute of limitations having run) for all fiscal years up to and including the fiscal year ended December 31, 2011 and all amounts owing in respect of such audit have been paid.

*Section 5.10.* *Title to Property; Leases*. The Company and its Subsidiaries have good and sufficient title to their respective Material properties, including all such properties reflected in the most recent audited balance sheet referred to in Section 5.5 or purported to have been acquired by the Company or any Subsidiary after said date (except as sold or otherwise disposed of in the ordinary course of business), in each case free and clear of Liens prohibited by this Agreement or the Indenture, except for those defects in title and Liens that, individually or in the aggregate, would not have a Material Adverse Effect. All Material leases are valid and subsisting and are in full force and effect in all material respects.

*Section 5.11.* *Licenses, Permits, Etc*. The Company and its Subsidiaries own or possess all licenses, permits, franchises, certificates of convenience and necessity, authorizations, patents, copyrights, proprietary software, service marks, trademarks and trade names, or rights thereto, that are Material, without known conflict with the rights of others, except for those conflicts that, individually or in the aggregate, would not have a Material Adverse Effect.

*Section 5.12.* *Compliance with Employee Benefit Plans*. (a) The Company and each ERISA Affiliate have operated and administered each Plan in compliance with all applicable laws except for such instances of noncompliance as have not resulted in and could not reasonably be expected to result in a Material Adverse Effect. Neither the Company nor any ERISA Affiliate has incurred any liability pursuant to Title I or IV of ERISA or the penalty or excise tax provisions of the Code relating to employee benefit plans (as defined in section 3 of ERISA), and no event, transaction or condition has occurred or exists that would reasonably be expected to result in the incurrence of any such liability by the Company or any ERISA Affiliate, or in the imposition of any Lien on any of the rights, properties or assets of the Company or any ERISA Affiliate, in either case pursuant to Title I or IV of ERISA or to such penalty or excise tax provisions or to section 401(a)(29) or 412 of the Code or section 4068 of ERISA, other than such liabilities or Liens as would not be individually or in the aggregate Material.

(b) The present value of the aggregate benefit liabilities under each of the Plans subject to section 412 of the Code (other than Multiemployer Plans), determined as of January 1, 2016 based on such Plan's actuarial assumptions as of that date for funding purposes as documented in such Plan's actuarial valuation reports dated September 2016 did not exceed the aggregate current value of the assets of such Plan allocable to such benefit liabilities by more than $5,000,000 in the case of any single Plan and by more than $5,000,000 in the aggregate for all Plans. The term "*benefit liabilities*" has the meaning specified in section 4001 of ERISA and the terms "current value" and "*present value*" have the meaning specified in section 3 of ERISA.

(c) The Company and its ERISA Affiliates have not incurred withdrawal liabilities (and are not subject to contingent withdrawal liabilities) under section 4201 or 4204 of ERISA in respect of Multiemployer Plans that individually or in the aggregate are Material.

(d) The expected postretirement benefit obligation (determined as of the last day of the Company's most recently ended fiscal year in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 715-60, without regard to liabilities attributable to continuation coverage mandated by section 4980B of the Code) of the Company and its Subsidiaries is not Material.

(e) The execution and delivery of this Agreement and the issuance and sale of the Bonds hereunder will not involve any transaction that is subject to the prohibitions of section 406 of ERISA or in connection with which a tax could be imposed pursuant to section 4975(c)(1)(A)-(D) of the Code. The representation by the Company to each Purchaser in the first sentence of this Section 5.12(e) is made in reliance upon and subject to the accuracy of such Purchaser's representation in Section 6.2 as to the sources of the funds used to pay the purchase price of the Bonds to be purchased by such Purchaser.

(f) The Company and its Subsidiaries do not have any Non-U.S. Plans.

*Section 5.13. Private Offering by the Company.* Neither the Company nor anyone acting on the Company's behalf has offered the Bonds or any similar securities for sale to, or solicited any offer to buy any of the same from, or otherwise approached or negotiated in respect thereof with, any Person other than the Purchasers and not more than ten (10) other Institutional Investors, each of which has been offered the Bonds in connection with a private sale for investment. Neither the Company nor anyone acting on its behalf has taken, or will take, any action that would subject the issuance or sale of the Bonds to the registration requirements of Section 5 of the Securities Act.

*Section 5.14. Use of Proceeds; Margin Regulations*. The Company will apply the proceeds of the sale of the Bonds to repay existing indebtedness and for general corporate purposes and in compliance with all laws referenced in Section 5.16. No part of the proceeds from the sale of the Bonds hereunder will be used, directly or indirectly, for the purpose of buying or carrying any margin stock within the meaning of Regulation U of the Board of Governors of the Federal Reserve System (12 CFR 221), or for the purpose of buying or carrying or trading in any securities under such circumstances as to involve the Company in a violation of Regulation X of said Board (12 CFR 224) or to involve any broker or dealer in a violation of Regulation T of said Board (12 CFR 220). Margin stock does not constitute more than 2% of the value of the consolidated assets of the Company and its Subsidiaries and the Company does not have any present intention that margin stock will constitute more than 2% of the value of such assets. As used in this Section, the terms "margin stock" and "purpose of buying or carrying" shall have the meanings assigned to them in said Regulation U.

*Section 5.15. Existing Debt.* Except as described therein, Schedule 5.15(a) sets forth a complete and correct list of all outstanding Debt of the Company and its Subsidiaries as of March 31, 2017, since which date except as described therein there has been no Material change in the amounts, interest rates, sinking funds, installment payments or maturities of the Debt of the Company or its Subsidiaries. Neither the Company nor any Subsidiary is in default and no waiver of default is currently in effect, in the payment of any principal or interest on any Debt of the Company or any Subsidiary and no event or condition exists with respect to any Debt of the

Company or any Subsidiary, the outstanding principal amount of which exceeds $5,000,000 that would permit (or that with notice or the lapse of time, or both, would permit) one or more Persons to cause such Debt to become due and payable before its stated maturity or before its regularly scheduled dates of payment.

(b) Without limiting the representation in Section 5.6, the Company is not a party to, or otherwise subject to any provision contained in, any instrument evidencing Debt of the Company or any Subsidiary, any agreement relating thereto or any other agreement (including, but not limited to, its charter or other organizational document) which limits the amount of, or otherwise imposes restrictions on the incurring of, Debt evidenced by the Bonds, except as specifically indicated in Schedule 5.15(b).

*Section 5.16. Foreign Assets Control Regulations, Etc*. (a) Neither the Company nor any Controlled Entity (i) is a Blocked Person, (ii) has been notified that its name appears or may in the future appear on a State Sanctions List or (iii) is a target of sanctions that have been imposed by the United Nations or the European Union.

(b) Neither the Company nor any Controlled Entity (i) has violated, been found in violation of, or been charged or convicted under, any applicable U.S. Economic Sanctions Laws, Anti-Money Laundering Laws or Anti-Corruption Laws or (ii) to the Company's knowledge, is under investigation by any Governmental Authority for possible violation of any U.S. Economic Sanctions Laws, Anti-Money Laundering Laws or Anti-Corruption Laws.

(c) No part of the proceeds from the sale of the Bonds hereunder:

(i) constitutes or will constitute funds obtained on behalf of any Blocked Person or will otherwise be used by the Company or any Controlled Entity, directly or indirectly, (A) in connection with any investment in, or any transactions or dealings with, any Blocked Person, (B) for any purpose that would cause any Purchaser to be in violation of any U.S. Economic Sanctions Laws or (C) otherwise in violation of any U.S. Economic Sanctions Laws;

(ii) will be used, directly or indirectly, in violation of, or cause any Purchaser to be in violation of, any applicable Anti-Money Laundering Laws; or

(iii) will be used, directly or indirectly, for the purpose of making any improper payments, including bribes, to any Governmental Official or commercial counterparty in order to obtain, retain or direct business or obtain any improper advantage, in each case which would be in violation of, or cause any Purchaser to be in violation of, any applicable Anti-Corruption Laws.

(d) The Company has established procedures and controls which it reasonably believes are adequate (and otherwise comply with applicable law) to ensure that the Company and each Controlled Entity is and will continue to be in compliance with all applicable U.S. Economic Sanctions Laws, Anti-Money Laundering Laws and Anti-Corruption Laws.

*Section 5.17. Status under Certain Statutes*. Neither the Company nor any Subsidiary is subject to regulation under the Investment Company Act of 1940, as amended, the Public Utility Holding Company Act of 2005, as amended, the ICC Termination Act of 1995, as amended, or subject to rate regulation under the Federal Power Act, as amended.

*Section 5.18. Environmental Matters*. Neither the Company nor any Subsidiary has knowledge of any claim or has received any notice of any claim, and no proceeding has been instituted of which it has received notice, raising any claim against the Company or any of its Subsidiaries or any of their respective real properties now or formerly owned, leased or operated by any of them, or other assets, alleging damage to the environment or any violation of any Environmental Laws, except, in each case, such as could not reasonably be expected to result in a Material Adverse Effect. Except as otherwise disclosed to the Purchasers in writing:

(a) neither the Company nor any Subsidiary has knowledge of any facts which would give rise to any claim, public or private, for violation of Environmental Laws or damage to the environment emanating from, occurring on or in any way related to real properties or to other assets now or formerly owned, leased or operated by any of them or their use, except, in each case, such as could not reasonably be expected to result in a Material Adverse Effect;

(b) neither the Company nor any of its Subsidiaries has stored any Hazardous Materials on real properties now or formerly owned, leased or operated by any of them or has disposed of any Hazardous Materials in each case in a manner contrary to any Environmental Laws and in any manner that could reasonably be expected to result in a Material Adverse Effect; and

(c) all buildings on all real properties now owned, leased or operated by the Company or any of its Subsidiaries are in compliance with applicable Environmental Laws, except where failure to comply could not reasonably be expected to result in a Material Adverse Effect.

*Section 5.19. Lien of Indenture*. The Indenture (and for avoidance of doubt including the Supplement) constitutes a direct and valid Lien upon the Trust Estate, subject only to the exceptions referred to in the Indenture and Permitted Liens, and will create a similar Lien upon all properties and assets acquired by the Company after the date hereof which are required to be subjected to the Lien of the Indenture, when acquired by the Company, subject only to the exceptions referred to in the Indenture and Permitted Liens, and subject, further, as to real property interests, to the recordation of a supplement to the Indenture describing such after-acquired property; the descriptions of all such properties and assets contained in the granting clauses of the Indenture are correct and adequate for the purposes of the Indenture; the Indenture has been duly recorded as a mortgage and deed of trust of real estate, and any required filings with respect to personal property and fixtures subject to the Lien of the Indenture have been duly made in each place in which such recording or filing is required to protect, preserve and perfect the Lien of the Indenture; and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements related thereto and similar documents and the issuance of the Bonds have been paid.

*Section 5.20.* *Filings*. No action, including any filings, registration or notice, is necessary or advisable in Pennsylvania or any other jurisdictions to ensure the legality, validity and enforceability of the Financing Agreements, except such action as has been previously taken, which action remains in full force and effect. No action, including any filing, registration or notice, is necessary or advisable in Pennsylvania or any other jurisdiction to establish or protect for the benefit of the Trustee and the holders of Bonds, the security interest and Liens purported to be created under the Indenture and the priority and perfection thereof and the other Financing Agreements, except such action as has been previously taken, which action remains in full force and effect.

## SECTION 6. REPRESENTATIONS OF THE PURCHASERS.

*Section 6.1.* *Purchase for Investment*. Each Purchaser severally represents that it is purchasing the Bonds for its own account or for one or more separate accounts maintained by such Purchaser or for the account of one or more pension or trust funds and not with a view to the distribution thereof, provided that the disposition of such Purchaser's or their property shall at all times be within such Purchaser's or their control. Each Purchaser understands that the Bonds have not been registered under the Securities Act and may be resold only if registered pursuant to the provisions of the Securities Act or if an exemption from registration is available, except under circumstances where neither such registration nor such an exemption is required by law, and that the Company is not required to register the Bonds.

*Section 6.2.* *Source of Funds*. Each Purchaser severally represents that at least one of the following statements is an accurate representation as to each source of funds (a *"Source"*) to be used by such Purchaser to pay the purchase price of the Bonds to be purchased by such Purchaser hereunder:

(a) the Source is an "insurance company general account" (as the term is defined in the United States Department of Labor's Prohibited Transaction Exemption (*"PTE"*) 95-60) in respect of which the reserves and liabilities (as defined by the annual statement for life insurance companies approved by the NAIC (the *"NAIC Annual Statement"*)) for the general account contract(s) held by or on behalf of any employee benefit plan together with the amount of the reserves and liabilities for the general account contract(s) held by or on behalf of any other employee benefit plans maintained by the same employer (or affiliate thereof as defined in PTE 95-60) or by the same employee organization in the general account do not exceed 10% of the total reserves and liabilities of the general account (exclusive of separate account liabilities) plus surplus as set forth in the NAIC Annual Statement filed with such Purchaser's state of domicile; or

(b) the Source is a separate account that is maintained solely in connection with such Purchaser's fixed contractual obligations under which the amounts payable, or credited, to any employee benefit plan (or its related trust) that has any interest in such separate account (or to any participant or beneficiary of such plan (including any annuitant)) are not affected in any manner by the investment performance of the separate account; or

(c) the Source is either (i) an insurance company pooled separate account, within the meaning of PTE 90-1 or (ii) a bank collective investment fund, within the meaning of the PTE 91-38 and, except as disclosed by such Purchaser to the Company in writing pursuant to this clause (c), no employee benefit plan or group of plans maintained by the same employer or employee organization beneficially owns more than 10% of all assets allocated to such pooled separate account or collective investment fund; or

(d) the Source constitutes assets of an "investment fund" (within the meaning of Part VI of PTE 84-14 (the *"QPAM Exemption"*)) managed by a "qualified professional asset manager" or "QPAM" (within the meaning of Part VI of the QPAM Exemption), no employee benefit plan's assets that are managed by the QPAM in such investment fund, when combined with the assets of all other employee benefit plans established or maintained by the same employer or by an affiliate (within the meaning of Part VI(c)(1) of the QPAM Exemption) of such employer or by the same employee organization and managed by such QPAM, represent more than 20% of the total client assets managed by such QPAM, the conditions of Part I(c) and (g) of the QPAM Exemption are satisfied, neither the QPAM nor a person controlling or controlled by the QPAM maintains an ownership interest in the Company that would cause the QPAM and the Company to be "related" within the meaning of Part VI(h) of the QPAM Exemption and (i) the identity of such QPAM and (ii) the names of any employee benefit plans whose assets in the investment fund, when combined with the assets of all other employee benefit plans established or maintained by the same employer or by an affiliate (within the meaning of Part VI(c)(1) of the QPAM Exemption) of such employer or by the same employee organization, represent 10% or more of the assets of such investment fund, have been disclosed to the Company in writing pursuant to this clause (d); or

(e) the Source constitutes assets of a "plan(s)" (within the meaning of Part IV(h) of PTE 96-23 (the *"INHAM Exemption"*)) managed by an "in-house asset manager" or "INHAM" (within the meaning of Part IV(a) of the INHAM Exemption), the conditions of Part I(a), (g) and (h) of the INHAM Exemption are satisfied, neither the INHAM nor a person controlling or controlled by the INHAM (applying the definition of "control" in Part IV(d)(3) of the INHAM Exemption) owns a 10% or more interest in the Company and (i) the identity of such INHAM and (ii) the name(s) of the employee benefit plan(s) whose assets constitute the Source have been disclosed to the Company in writing pursuant to this clause (e); or

(f) the Source is a governmental plan; or

(g) the Source is one or more employee benefit plans, or a separate account or trust fund comprised of one or more employee benefit plans, each of which has been identified to the Company in writing pursuant to this clause (g); or

(h) the Source does not include assets of any employee benefit plan, other than a plan exempt from the coverage of ERISA.

As used in this Section 6.2, the terms *"employee benefit plan," "governmental plan,"* and *"separate account"* shall have the respective meanings assigned to such terms in section 3 of ERISA.

## SECTION 7. INFORMATION AS TO COMPANY.

*Section 7.1. Financial and Business Information*. The Company shall deliver to each Purchaser and each holder of Bonds that is an Institutional Investor:

(a) *Quarterly Statements* — within 60 days after the end of each quarterly fiscal period in each fiscal year of the Company (other than the last quarterly fiscal period of each such fiscal year), duplicate copies of:

(i) a consolidated balance sheet of the Company and its Subsidiaries as at the end of such quarter, and

(ii) consolidated statements of income, changes in shareholders' equity and cash flows of the Company and its Subsidiaries, for such quarter and (in the case of the second and third quarters) for the portion of the fiscal year ending with such quarter,

setting forth in each case in comparative form the figures for the corresponding periods in the previous fiscal year, all in reasonable detail, prepared in accordance with GAAP applicable to quarterly financial statements generally, and certified by a Senior Financial Officer as fairly presenting, in all material respects, the financial position of the companies being reported on and their results of operations and cash flows, subject to changes resulting from year-end adjustments, *provided* that the delivery within the time period specified above of the Company's said financial statements, prepared in accordance with the requirements therefor and filed with the Municipal Securities Rulemaking Board on the Electronic Municipal Market Access ("*EMMA*") database shall be deemed to satisfy the requirements of this Section 7.1(a);

(b) *Annual Statements* — within 120 days after the end of each fiscal year of the Company, duplicate copies of:

(i) a consolidated balance sheet of the Company and its Subsidiaries, as at the end of such year, and

(ii) consolidated statements of income, changes in shareholders' equity and cash flows of the Company and its Subsidiaries for such year,

setting forth in each case in comparative form the figures for the previous fiscal year, all in reasonable detail, prepared in accordance with GAAP, and accompanied by an opinion thereon (without a "going concern" or similar qualification or exception and without any qualification or exception as to the scope of the audit on which such opinion is based) of independent public accountants of recognized national standing, which opinion shall state that such financial statements present fairly, in all material respects, the financial position of the companies being reported upon and their results of operations and cash flows and have been prepared in conformity with GAAP, and that the examination of such accountants in connection with such financial statements has been made in accordance with generally accepted auditing standards, and that such audit provides a reasonable basis for such opinion in the circumstances, *provided* that the delivery within the time period specified above of the Company's said financial statements, prepared in accordance with the requirements therefor and containing the above-described audit opinion and filed with the Municipal Securities Rulemaking Board on the EMMA database shall be deemed to satisfy the requirements of this Section 7.1(b);

(c) *SEC and Other Reports* — promptly upon their becoming available, one copy of (i) each financial statement, report, notice, or proxy statement sent by the Company or any Subsidiary to its public securities holders generally, and (ii) each regular or periodic report, each registration statement that shall have become effective (without exhibits except as expressly requested by such Purchaser or holder), and each final prospectus and all amendments thereto filed by the Company or any Subsidiary with the SEC, *provided* that the delivery within the time period specified above of the Company's said financial statements, prepared in accordance with the requirements therefor and filed with the Municipal Securities Rulemaking Board on the EMMA database shall be deemed to satisfy the requirements of this Section 7.1(c);

(d) *Notice of Default or Event of Default* — promptly, and in any event within five days after a Responsible Officer becomes aware of the existence of any Default or Event of Default, a written notice specifying the nature and period of existence thereof and what action the Company is taking or proposes to take with respect thereto;

(e) *Employee Benefits Matters* — promptly, and in any event within five days after a Responsible Officer becomes aware of any of the following, a written notice setting forth the nature thereof and the action, if any, that the Company or an ERISA Affiliate proposes to take with respect thereto:

(i) with respect to any Plan (other than any Multiemployer Plan) that is subject to Title IV of ERISA, any reportable event, as defined in section 4043(c) of ERISA and the regulations thereunder, for which notice thereof has not been waived pursuant to such regulations as in effect on the date hereof and on the date of the Second Closing; or

(ii) the taking by the PBGC of steps to institute, or the threatening by the PBGC of the institution of, proceedings under section 4042 of ERISA for the termination of, or the appointment of a trustee to administer, any such Plan, or the receipt by the Company or any ERISA Affiliate of a notice from a Multiemployer

Plan that such action has been taken by the PBGC with respect to such Multiemployer Plan; or

(iii) any event, transaction or condition that could result in the incurrence of any liability by the Company or any ERISA Affiliate pursuant to Title I or IV of ERISA or the penalty or excise tax provisions of the Code relating to employee benefit plans, or in the imposition of any Lien on any of the rights, properties or assets of the Company or any ERISA Affiliate pursuant to Title I or IV of ERISA or such penalty or excise tax provisions, if such liability or Lien, taken together with any other such liabilities or Liens then existing, would reasonably be expected to have a Material Adverse Effect;

(f) *Notices from Governmental Authority* — promptly, and in any event within 30 days of receipt thereof, copies of any notice to the Company or any Subsidiary from any federal or state Governmental Authority relating to any order, ruling, statute or other law or regulation that could reasonably be expected to have a Material Adverse Effect;

(g) *Requested Information* — with reasonable promptness, following the receipt by the Company of a written request by such holder of Bonds, the names and contact information of holders of the outstanding bonds issued under the Indenture (i.e. the bonds in which the Company or a trustee is required to keep in a register and that are not publicly traded) of which the Company has knowledge and the principal amount of the outstanding bonds issued under the Indenture owed to each holder (unless disclosure of such names, contact information or holdings is prohibited by law), and such data and information relating to the business, operations, affairs, financial condition, assets or properties of the Company or any of its Subsidiaries or relating to the ability of the Company to perform its obligations under any Financing Agreement as from time to time may be reasonably requested by such Purchaser or holder of Bonds; and

(h) *Deliveries to Trustee* — promptly, and in any event within five days after delivery to the Trustee, a copy of any deliveries made by the Company to the Trustee, including without limitation the annual report delivered to the Trustee pursuant to Article VIII, Section 12 of the Indenture.

*Section 7.2* *Officer's Certificate*. Each set of financial statements delivered to a Purchaser or holder of Bonds pursuant to Section 7.1(a) or Section 7.1(b) shall be accompanied by a certificate of a Senior Financial Officer (which, in the case of financial statements filed with the Municipal Securities Rulemaking Board on the EMMA database, shall be by separate concurrent delivery of such certificate to each holder of Bonds) setting forth a statement that such Senior Financial Officer has reviewed the relevant terms hereof and of the Indenture and has made, or caused to be made, under his or her supervision, a review of the transactions and conditions of the Company and its Subsidiaries from the beginning of the quarterly or annual period covered by the statements then being furnished to the date of the certificate and that such review shall not have disclosed the existence during such period of any condition or event that constitutes a Default or an Event of Default or, if any such condition or event existed or exists (including, without limitation, any such event or condition resulting from the failure of the

Company or any Subsidiary to comply with any Environmental Law), specifying the nature and period of existence thereof and what action the Company shall have taken or proposes to take with respect thereto.

*Section 7.3.* *Visitation*. The Company shall permit the representatives of each Purchaser and each holder of Bonds that is an Institutional Investor:

(a) *No Default* — if no Default or Event of Default then exists, at the expense of such Purchaser or holder and upon reasonable prior notice to the Company, to visit the principal executive office of the Company, to discuss the affairs, finances and accounts of the Company and its Subsidiaries with the Company's officers, and, with the consent of the Company (which consent will not be unreasonably withheld), to visit the other offices and properties of the Company and each Subsidiary, all at such reasonable times during normal business hours and as often as may be reasonably requested in writing; and

(b) *Default* — if a Default or Event of Default then exists, at the expense of the Company to visit and inspect any of the offices or properties of the Company or any Subsidiary, to examine all their respective books of account, records, reports and other papers, to make copies and extracts therefrom, and to discuss their respective affairs, finances and accounts with their respective officers and independent public accountants (and by this provision the Company authorizes said accountants to discuss the affairs, finances and accounts of the Company and its Subsidiaries), all at such reasonable times and as often as may be requested.

## SECTION 8. PURCHASE OF BONDS

The Company will not and will not permit any Affiliate to purchase, redeem, prepay or otherwise acquire, directly or indirectly, any of the outstanding Bonds except (a) upon the payment or prepayment of the Bonds in accordance with the terms of this Agreement and the Bonds or (b) pursuant to a written offer to purchase any outstanding Bonds made by the Company or an Affiliate pro rata to the holders of the Bonds upon the same terms and conditions. Any such offer shall provide each holder with sufficient information to enable it to make an informed decision with respect to such offer, and shall remain open for at least 15 Business Days. If the holders of more than 10% of the principal amount of the Bonds then outstanding accept such offer, the Company shall promptly notify the remaining holders of such fact and the expiration date for the acceptance by holders of Bonds of such offer shall be extended by the number of days necessary to give each such remaining holder at least 10 Business Days from its receipt of such notice to accept such offer. The Company will promptly cancel all Bonds acquired by it or any Affiliate pursuant to any payment, prepayment or purchase of Bonds pursuant to any provision of this Agreement and no Bonds may be issued in substitution or exchange for any such Bonds.

## SECTION 9. AFFIRMATIVE COVENANTS.

The Company covenants that from the date of this Agreement until the Second Closing and thereafter, so long as any of the Bonds are outstanding:

*Section 9.1. Compliance with Law*. Without limiting Section 10.4, the Company will, and will cause each of its Subsidiaries to, comply with all laws, ordinances or governmental rules or regulations to which each of them is subject, including, without limitation, ERISA, Environmental Laws, the USA Patriot Act and the other laws and regulations that are referred to in Section 5.16, and will obtain and maintain in effect all licenses, certificates, permits, franchises and other governmental authorizations necessary to the ownership of their respective properties or to the conduct of their respective businesses, in each case to the extent necessary to ensure that non-compliance with such laws, ordinances or governmental rules or regulations or failures to obtain or maintain in effect such licenses, certificates, permits, franchises and other governmental authorizations could not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

*Section 9.2. Insurance*. The Company will cause each of its Subsidiaries to maintain, with financially sound and reputable insurers, insurance with respect to their respective properties and businesses against such casualties and contingencies, of such types, on such terms and in such amounts (including deductibles, co-insurance and self-insurance, if adequate reserves are maintained with respect thereto) as is customary in the case of entities of established reputations engaged in the same or a similar business and similarly situated.

*Section 9.3. Maintenance of Properties*. The Company will cause each of its Subsidiaries to maintain and keep, or cause to be maintained and kept, their respective properties in good repair, working order and condition (other than ordinary wear and tear), so that the business carried on in connection therewith may be properly conducted at all times, *provided* that this Section 9.3 shall not prevent any Subsidiary from discontinuing the operation and the maintenance of any of its properties if such discontinuance is desirable in the conduct of its business and the Company and such Subsidiary have concluded that such discontinuance would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

*Section 9.4. Payment of Taxes*. The Company will cause each of its Subsidiaries to file all income tax or similar tax returns required to be filed in any jurisdiction and to pay and discharge all taxes shown to be due and payable on such returns and all other taxes, assessments, governmental charges, or levies payable by any of them, to the extent the same have become due and payable and before they have become delinquent, provided that any Subsidiary does not need to pay any such tax, assessment, charge or levy if (a) the amount, applicability or validity thereof is contested by the Company or such Subsidiary on a timely basis in good faith and in appropriate proceedings, and the Subsidiary has established adequate reserves therefor in accordance with GAAP on the books of such Subsidiary or (b) the nonpayment of all such taxes, assessments, charges and levies in the aggregate would not reasonably be expected to have a Material Adverse Effect.

*Section 9.5. Corporate Existence, Etc*. The Company will at all times preserve and keep in full force and effect the corporate existence of each of its Subsidiaries (unless merged into the Company or a wholly-owned Subsidiary) and all rights and franchises of its Subsidiaries unless, in the good faith judgment of the Company or such Subsidiary, the termination of or failure to preserve and keep in full force and effect such corporate existence, right or franchise would not, individually or in the aggregate, have a Material Adverse Effect.

*Section 9.6. Books and Records*. The Company will, and will cause each of its Subsidiaries to, maintain proper books of record and account in conformity with GAAP and all applicable requirements of any Governmental Authority having legal or regulatory jurisdiction over the Company or such Subsidiary.

SECTION 10. NEGATIVE COVENANTS.

The Company covenants that from the date of this Agreement until the Second Closing and thereafter, so long as any of the Bonds are outstanding:

*Section 10.1. Transactions with Affiliates*. The Company will not and will not permit any Subsidiary to enter into directly or indirectly any Material transaction or Material group of related transactions (including without limitation the purchase, lease, sale or exchange of properties of any kind or the rendering of any service) with any Affiliate (other than the Company or another Subsidiary), except pursuant to the reasonable requirements of the Company's or such Subsidiary's business.

*Section 10.2. Merger, Consolidation, Etc*. The Company will not consolidate with or merge with any other Person or convey, transfer or lease all or substantially all of its assets in a single transaction or series of transactions to any Person unless:

(a) the successor formed by such consolidation or the survivor of such merger or the Person that acquires by conveyance, transfer or lease all or substantially all of the assets of the Company as an entirety, as the case may be, shall be a solvent corporation or limited liability company organized and existing under the laws of the United States or any State thereof (including the District of Columbia), and, if the Company is not such corporation or limited liability company, such corporation or limited liability company shall have executed and delivered to each holder of any Bonds its assumption of the due and punctual performance and observance of each covenant and condition of the Financing Agreements (pursuant to such agreements and instruments as shall be reasonably satisfactory to the Required Holders), and the Company shall have caused to be delivered to each holder of Bonds an opinion of nationally recognized independent counsel, to the effect that all agreements or instruments effecting such assumption are enforceable in accordance with their terms and comply with the terms hereof; and

(b) immediately before and immediately after giving effect to such transaction, no Default or Event of Default shall have occurred and be continuing.

No such conveyance, transfer or lease of substantially all of the assets of the Company shall have the effect of releasing the Company or any successor corporation or limited liability company that shall theretofore have become such in the manner prescribed in this Section 10.2 from its liability under the Financing Agreements.

*Section 10.3. Line of Business*. The Company will not engage in any business if, as a result, the general nature of the business in which the Company and its Subsidiaries, taken as a whole, would then be engaged would be substantially changed from the general nature of the business in which the Company and its Subsidiaries, taken as whole, is engaged on the date of this Agreement.

*Section 10.4.* *Economic Sanctions, Etc.*. The Company will not, and will not permit any Controlled Entity to (a) become (including by virtue of being owned or controlled by a Blocked Person), own or control a Blocked Person or (b) directly or indirectly have any investment in or engage in any dealing or transaction (including any investment, dealing or transaction involving the proceeds of the Bonds) with any Person if such investment, dealing or transaction (i) would cause any holder or any affiliate of such holder to be in violation of, or subject to sanctions under, any law or regulation applicable to such holder, or (ii) is prohibited by or subject to sanctions under any U.S. Economic Sanctions Laws.

SECTION 11. PAYMENTS ON BONDS.

*Section 11.1.* *Payment by Wire Transfer*. So long as any Purchaser or its nominee shall be the holder of any Bond, and notwithstanding anything contained in the Indenture or in such Bond to the contrary, the Company will pay, or cause to be paid by a paying agent, a trustee or other similar party, all sums becoming due on such Bond for principal, Make-Whole Amount or premium, if any, and interest by the method and at the address specified for such purpose below such Purchaser's name in Schedule A, or by such other method or at such other address as such Purchaser shall have from time to time specified to the Company in writing for such purpose, without the presentation or surrender of such Bond or the making of any notation thereon, except that upon written request of the Company or any paying agent made concurrently with or reasonably promptly after payment or prepayment in full of any Bond, such Purchaser shall surrender such Bond for cancellation, reasonably promptly after any such request, to the Company at its principal executive office or at the place of payment most recently designated by the Company pursuant to Article II of the Indenture. Prior to any sale or other disposition of any Bond held by a Purchaser or its nominee, such Purchaser will, at its election, either endorse thereon the amount of principal paid thereon and the last date to which interest has been paid thereon or surrender such Bond to the Company in exchange for a new Bond or Bonds pursuant to Article II of the Indenture. The Company will afford the benefits of this Section 11.1 to any Institutional Investor that is the direct or indirect transferee of any Bond purchased by a Purchaser under this Agreement and that has made the same agreement relating to such Bond as the Purchasers have made in this Section 11.1.

SECTION 12. REGISTRATION; EXCHANGE; EXPENSES, ETC.

*Section 12.1.* *Registration of Bonds*. The Company shall cause the Trustee to keep a register for the registration and registration of transfers of Bonds in accordance with Article XIII, Section 9 of the Indenture.

*Section 12.2.* *Transaction Expenses*. Whether or not the transactions contemplated hereby are consummated, the Company will pay all reasonable costs and expenses (including reasonable attorneys' fees of a special counsel and, if reasonably required by the Required Holders, local or other counsel) incurred by the Purchasers and each other holder of a Bond in connection with such transactions and in connection with any amendments, waivers or consents under or in respect of any Financing Agreement (whether or not such amendment, waiver or consent becomes effective), including, without limitation: (a) the costs and expenses incurred in enforcing or defending (or determining whether or how to enforce or defend) any rights under any Financing Agreement or in responding to any subpoena or other legal process or informal investigative demand issued in connection with any Financing Agreement, or by reason of being a Purchaser or holder of any Bond, (b) the costs and expenses, including financial advisors' fees, incurred in connection with the insolvency or bankruptcy of the Company or any Subsidiary or in connection with any work-out or restructuring of the transactions contemplated by any Financing Agreement and (c) the costs and expenses incurred in connection with the initial filing of any Financing Agreement and all related documents and financial information with the SVO, provided that such costs and expenses under this clause (c) shall not exceed $6,000 for the Bonds. The Company will pay, and will save each Purchaser and each other holder of a Bond harmless from, all claims in respect of any fees, costs or expenses if any, of brokers and finders (other than those, if any, retained by a Purchaser or other holder in connection with its purchase of the Bonds).

*Section 12.3.* *Survival*. The obligations of the Company under this Section 12 will survive the payment or transfer of any Bond, the enforcement, amendment or waiver of any provision of any Financing Agreement, and the termination of any Financing Agreement.

SECTION 13. SURVIVAL OF REPRESENTATIONS AND WARRANTIES; ENTIRE AGREEMENT.

All representations and warranties contained herein shall survive the execution and delivery of this Agreement, the purchase or transfer by any Purchaser of any Bond or portion thereof or interest therein and the payment of any Bond, and may be relied upon by any subsequent holder of a Bond, regardless of any investigation made at any time by or on behalf of such Purchaser or any other holder of a Bond. All statements contained in any certificate or other instrument delivered by or on behalf of the Company pursuant to this Agreement shall be deemed representations and warranties of the Company under this Agreement. Subject to the preceding sentence, the Financing Agreements embody the entire agreement and understanding between each Purchaser and the Company and supersede all prior agreements and understandings relating to the subject matter hereof.

SECTION 14. AMENDMENT AND WAIVER.

*Section 14.1.* *Requirements*. This Agreement and the Bonds may be amended, and the observance of any term hereof or of the Bonds may be waived (either retroactively or prospectively), with (and only with) the written consent of the Company and the Required Holders, except that (i) no amendment or waiver of any of the provisions of Section 1, 2, 3, 4, 5, 6 or 19 hereof, or any defined term, will be effective as to any holder of Bonds unless consented to by such holder of Bonds in writing, and (ii) no such amendment or waiver may, without the written consent of all of the Purchasers and all of the holders of Bonds at the time outstanding affected thereby, (A) subject to the provisions of the Indenture relating to acceleration, change the amount or time of any prepayment or payment of principal of, or reduce the rate or change the time of payment or method of computation of interest (if such change results in a decrease in the interest rate) or of the Make-Whole Amount on, the Bonds, (B) change the percentage of the principal amount of the Bonds the Purchasers or holders of which are required to consent to any such amendment or waiver, or (C) amend any of Sections 8, 14 or 18.

*Section 14.2. Solicitation of Holders of Bonds*.

(a) *Solicitation.* The Company will provide each Purchaser and holder of the Bonds (irrespective of the amount of Bonds then owned by it) with sufficient information, sufficiently far in advance of the date a decision is required, to enable such Purchaser or holder to make an informed and considered decision with respect to any proposed amendment, waiver or consent in respect of any of the provisions hereof or of the Bonds. The Company will deliver executed or true and correct copies of each amendment, waiver or consent effected pursuant to the provisions of this Section 14 to each Purchaser and each holder of outstanding Bonds promptly following the date on which it is executed and delivered by, or receives the consent or approval of, the requisite Purchasers or holders of Bonds.

(b) *Payment.* The Company will not directly or indirectly pay or cause to be paid any remuneration, whether by way of supplemental or additional interest, fee or otherwise (other than legal fees or other related expenses), or grant any security or provide other credit support, to any Purchaser or holder of Bonds as consideration for or as an inducement to the entering into by any Purchaser or holder of Bonds of any waiver or amendment of any of the terms and provisions hereof or of the Bonds unless such remuneration is concurrently paid, or security is concurrently granted or other credit support concurrently provided, on the same terms, ratably to each Purchaser and each holder of Bonds then outstanding even if such Purchaser or holder did not consent to such waiver or amendment.

(c) *Consent in Contemplation of Transfer*. Any consent made pursuant to this Section 14 by a holder of Bonds that has transferred or has agreed to transfer its Bonds to (i) the Company, (ii) any Subsidiary or any other Affiliate or (iii) any other Person in connection with, or in anticipation of, such other Person acquiring, making a tender offer for or merging with the Company and/or any of its Affiliates, and has provided or has agreed to provide such written consent as a condition to such transfer shall be void and of no force or effect except solely as to such holder, and any amendments effected or waivers granted or to be effected or granted that would not have been or would not be so effected or granted but for such consent (and the consents of all other holders of Bonds that were acquired under the same or similar conditions) shall be void and of no force or effect except solely as to such holder.

*Section 14.3. Binding Effect, Etc*. Any amendment or waiver consented to as provided in this Section 14 applies equally to all Purchasers and holders of Bonds and is binding upon them and upon each future Purchaser and holder of any Bond and upon the Company without regard to whether such Bond has been marked to indicate such amendment or waiver. No such amendment or waiver will extend to or affect any obligation, covenant, agreement, Default or Event of Default not expressly amended or waived or impair any right consequent thereon. No course of dealing between the Company and Purchaser and any holder of any Bond nor any delay in exercising any rights hereunder or under any Bond shall operate as a waiver of any rights of any Purchaser or any holder of such Bond.

*Section 14.4.* *Bonds Held by Company, Etc*. Solely for the purpose of determining whether the holders of the requisite percentage of the aggregate principal amount of Bonds then outstanding approved or consented to any amendment, waiver or consent to be given under this Agreement or the Bonds, or have directed the taking of any action provided herein or in the Bonds to be taken upon the direction of the holders of a specified percentage of the aggregate principal amount of Bonds then outstanding, Bonds directly or indirectly owned by the Company or any of its Affiliates shall be deemed not to be outstanding.

SECTION 15. NOTICES.

All notices and communications provided for hereunder shall be in writing and sent (a) by telecopy if the sender on the same day sends a confirming copy of such notice by a recognized overnight delivery service (charges prepaid), or (b) by registered or certified mail with return receipt requested (postage prepaid), or (c) by a recognized overnight delivery service (with charges prepaid). Any such notice must be sent:

(i) if to any Purchaser or its nominee, to such Purchaser or nominee at the address specified for such communications in Schedule A, or at such other address as such Purchaser or nominee shall have specified to the Company in writing,

(ii) if to any other holder of any Bond, to such holder at such address as such other holder shall have specified to the Company in writing, or

(iii) if to the Company, to the Company at its address set forth at the beginning hereof to the attention of 762 West Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489 , or at such other address as the Company shall have specified to the holder of each Bond in writing.

Notices under this Section 15 will be deemed given only when actually received.

SECTION 16. INDEMNIFICATION.

The Company hereby agrees to indemnify and hold the Purchasers harmless from, against and in respect of any and all loss, liability and expense (including reasonable attorneys' fees) arising from any misrepresentation or nonfulfillment of any undertaking on the part of the Company under this Agreement. The indemnification obligations of the Company under this Section 16 shall survive the execution and delivery of this Agreement, the delivery of the Bonds to the Purchasers and the consummation of the transactions contemplated herein.

SECTION 17. REPRODUCTION OF DOCUMENTS.

This Agreement and all documents relating thereto, including, without limitation, (a) consents, waivers and modifications that may hereafter be executed, (b) documents received by any Purchaser at either Closing (except the Bonds themselves), and (c) financial statements, certificates and other information previously or hereafter furnished to any Purchaser, may be reproduced by such Purchaser by any photographic, photostatic, electronic, digital, or other similar process and such Purchaser may destroy any original document so reproduced. The Company agrees and stipulates that, to the extent permitted by applicable law, any such reproduction shall be admissible in evidence as the original itself in any judicial or administrative proceeding (whether or not the original is in existence and whether or not such reproduction was made by such Purchaser in the regular course of business) and any enlargement, facsimile or further reproduction of such reproduction shall likewise be admissible in evidence. This Section 17 shall not prohibit the Company or any other holder of Bonds from contesting any such reproduction to the same extent that it could contest the original, or from introducing evidence to demonstrate the inaccuracy of any such reproduction.

## SECTION 18. CONFIDENTIAL INFORMATION.

For the purposes of this Section 18, *"Confidential Information"* means information delivered to any Purchaser by or on behalf of the Company or any Subsidiary in connection with the transactions contemplated by or otherwise pursuant to this Agreement that is proprietary in nature and that was clearly marked or labeled or otherwise adequately identified when received by such Purchaser as being confidential information of the Company or such Subsidiary, provided that such term does not include information that (a) was publicly known or otherwise known to such Purchaser prior to the time of such disclosure, (b) subsequently becomes publicly known through no act or omission by such Purchaser or any person acting on such Purchaser's behalf, (c) otherwise becomes known to such Purchaser other than through disclosure by the Company or any Subsidiary or (d) constitutes financial statements delivered to such Purchaser under Section 7.1 of this Agreement or under the Indenture that are otherwise publicly available. Each Purchaser will maintain the confidentiality of such Confidential Information in accordance with procedures adopted by such Purchaser in good faith to protect confidential information of third parties delivered to such Purchaser, provided that such Purchaser may deliver or disclose Confidential Information to (i) its directors, trustees, officers, employees, agents, attorneys and affiliates (to the extent such disclosure reasonably relates to the administration of the investment represented by Bonds), (ii) its financial advisors and other professional advisors who agree to hold confidential the Confidential Information substantially in accordance with the terms of this Section 18, (iii) the Trustee or any other holder of any Bond, (iv) any Institutional Investor to which it sells or offers to sell such Bond or any part thereof or any participation therein (if such Person has agreed in writing prior to its receipt of such Confidential Information to be bound by the provisions of this Section 18), (v) any Person from which it offers to purchase any security of the Company (if such Person has agreed in writing prior to its receipt of such Confidential Information to be bound by the provisions of this Section 18), (vi) any federal or state or provincial regulatory authority having jurisdiction over such Purchaser, (vii) the NAIC or the SVO or, in each case, any similar organization, or any nationally recognized rating agency that requires access to information about such Purchaser's investment portfolio, or (viii) any other Person to which such delivery or disclosure may be necessary or appropriate (w) to effect compliance with any law, rule, regulation or order applicable to such Purchaser, (x) in response to any subpoena or other legal process, (y) in connection with any litigation to which such Purchaser is a party or (z) if an Event of Default has occurred and is continuing, to the extent such Purchaser may reasonably determine such delivery and disclosure to be necessary or appropriate in the enforcement or for the protection of the rights and remedies under any

Financing Agreement. Each holder of a Bond, by its acceptance of a Bond, will be deemed to have agreed to be bound by and to be entitled to the benefits of this Section 18 as though it were a party to this Agreement. On reasonable request by the Company in connection with the delivery to any holder of a Bond of information required to be delivered to such holder under this Agreement or requested by such holder (other than a holder that is a party to this Agreement or its nominee), such holder will enter into an agreement with the Company embodying the provisions of this Section 18.

In the event that as a condition to receiving access to information relating to the Company or its Subsidiaries in connection with the transactions contemplated by or otherwise pursuant to this Agreement, any Purchaser or holder of a Bond is required to agree to a confidentiality undertaking (whether through EMMA, another secure website, a secure virtual workspace or otherwise) which is different from this Section 18, this Section 18 shall not be amended thereby and, as between such Purchaser or such holder and the Company, this Section 18 shall supersede any such other confidentiality undertaking.

SECTION 19. MISCELLANEOUS.

*Section 19.1. Successors and Assigns*. All covenants and other agreements contained in this Agreement by or on behalf of any of the parties hereto bind and inure to the benefit of their respective successors and assigns (including, without limitation, any subsequent holder of a Bond) whether so expressed or not, except that, subject to Section 10.2, the Company may not assign or otherwise transfer any of its rights or obligations hereunder or under the Bonds without the prior written consent of each holder. Nothing in this Agreement, expressed or implied, shall be construed to confer upon any Person (other than the parties hereto and their respective successors and assigns permitted hereby) any legal or equitable right, remedy or claim under or by reason of this Agreement.

*Section 19.2. Accounting Terms*. All accounting terms used herein which are not expressly defined in this Agreement have the meanings respectively given to them in accordance with GAAP. Except as otherwise specifically provided herein, (a) all computations made pursuant to this Agreement shall be made in accordance with GAAP, and (b) all financial statements shall be prepared in accordance with GAAP. For purposes of determining compliance with the financial covenants contained in the Financing Agreements, if any, any election by the Company to measure Debt using fair value (as permitted by Financial Accounting Standards Board Accounting Standards Codification Topic No. 825-10-25 – *Fair Value Option,* International Accounting Standard 39 – *Financial Instruments: Recognition and Measurement* or any similar accounting standard) shall be disregarded and such determination shall be made as if such election had not been made and such Debt shall be valued at not less than 100% of the principal amount thereof.

*Section 19.3. Severability*. Any provision of this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof, and any such prohibition or unenforceability in any jurisdiction shall (to the full extent permitted by law) not invalidate or render unenforceable such provision in any other jurisdiction.

*Section 19.4. Construction, Etc*. Each covenant contained herein shall be construed (absent express provision to the contrary) as being independent of each other covenant contained herein, so that compliance with any one covenant shall not (absent such an express contrary provision) be deemed to excuse compliance with any other covenant. Where any provision herein refers to action to be taken by any Person, or which such Person is prohibited from taking, such provision shall be applicable whether such action is taken directly or indirectly by such Person.

For the avoidance of doubt, all Schedules and Exhibits attached to this Agreement shall be deemed to be a part hereof.

*Section 19.5. Counterparts*. This Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one instrument. Each counterpart may consist of a number of copies hereof, each signed by less than all, but together signed by all, of the parties hereto.

*Section 19.6. Governing Law*. This Agreement shall be construed and enforced in accordance with, and the rights of the parties shall be governed by, the law of the Commonwealth of Pennsylvania excluding choice-of-law principles of the law of such State that would permit the application of the laws of a jurisdiction other than such State.

*Section 19.7. Jurisdiction and Process; Waiver of Jury Trial*. (a) The Company irrevocably submits to the non-exclusive jurisdiction of any Pennsylvania State or federal court sitting in Philadelphia, Pennsylvania, over any suit, action or proceeding arising out of or relating to this Agreement or the Bonds. To the fullest extent permitted by applicable law, the Company irrevocably waives and agrees not to assert, by way of motion, as a defense or otherwise, any claim that it is not subject to the jurisdiction of any such court, any objection that it may now or hereafter have to the laying of the venue of any such suit, action or proceeding brought in any such court and any claim that any such suit, action or proceeding brought in any such court has been brought in an inconvenient forum.

(b) The Company consents to process being served by or on behalf of any holder of Bonds in any suit, action or proceeding of the nature referred to in Section 19.7(a) by mailing a copy thereof by registered or certified mail (or any substantially similar form of mail), postage prepaid, return receipt requested, to it at its address specified in Section 15 or at such other address of which such holder shall then have been notified pursuant to said Section. The Company agrees that such service upon receipt (i) shall be deemed in every respect effective service of process upon it in any such suit, action or proceeding and (ii) shall, to the fullest extent permitted by applicable law, be taken and held to be valid personal service upon and personal delivery to it. Notices hereunder shall be conclusively presumed received as evidenced by a delivery receipt furnished by the United States Postal Service or any reputable commercial delivery service.

(c) Nothing in this Section 19.7 shall affect the right of any holder of a Bond to serve process in any manner permitted by law, or limit any right that the holders of any of the Bonds may have to bring proceedings against the Company in the courts of any appropriate jurisdiction or to enforce in any lawful manner a judgment obtained in one jurisdiction in any other jurisdiction.

(d) The parties hereto hereby waive trial by jury in any action brought on or with respect to this Agreement, the Bonds or any other document executed in connection herewith or therewith.

*Section 19.8. Payments Due on Non-Business Days*. Anything in this Agreement or the Bonds to the contrary notwithstanding, any payment of principal of or Make-Whole Amount or interest on any Bond that is due on a date other than a Business Day shall be made on the next succeeding Business Day without including the additional days elapsed in the computation of the interest payable on such next succeeding Business Day; provided that if the maturity date of any Bond is a date other than a Business Day, the payment otherwise due on such maturity date shall be made on the next succeeding Business Day and shall include the additional days elapsed in the computation of interest payable on such next succeeding Business Day.

* * * * *

If you are in agreement with the foregoing, please sign the form of agreement on a counterpart of this Bond Purchase Agreement and return it to the Company, whereupon this Agreement shall become a binding agreement between you and the Company.

Very truly yours,

AQUA PENNSYLVANIA, INC.

## DEFINED TERMS

As used herein, the following terms have the respective meanings set forth below or set forth in the Section hereof following such term:

*"4.04% Series due 2055 Bonds"* is defined in Section 1.

*"4.06% Series due 2057 Bonds"* is defined in Section 1.

*"4.06% Series due 2054 Bonds"* is defined in Section 1.

*"4.07% Series due 2055 Bonds"* is defined in Section 1.

*"4.09% Series due 2057 Bonds"* is defined in Section 1.

*"Affiliate"* means, at any time, and with respect to any Person, any other Person that at such time directly or indirectly through one or more intermediaries Controls, or is Controlled by, or is under common Control with, such first Person. As used in this definition, "Control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise. Unless the context otherwise clearly requires, any reference to an "Affiliate" is a reference to an Affiliate of the Company.

*"Agreement"* means this Bond Purchase Agreement, including all Schedules and Exhibits attached to this Agreement.

*"Anti-Corruption Laws"* means any law or regulation in a U.S. or any non-U.S. jurisdiction regarding bribery or any other corrupt activity, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act 2010.

*"Anti-Money Laundering Laws"* means any law or regulation in a U.S. or any non-U.S. jurisdiction regarding money laundering, drug trafficking, terrorist-related activities or other money laundering predicate crimes, including the Currency and Foreign Transactions Reporting Act of 1970 (otherwise known as the Bank Secrecy Act) and the USA Patriot Act.

*"Blocked Person"* means (a) a Person whose name appears on the list of Specially Designated Nationals and Blocked Persons published by OFAC, (b) a Person, entity, organization, country or regime that is blocked or a target of sanctions that have been imposed under U.S. Economic Sanctions Laws or (c) a Person that is an agent, department or instrumentality of, or is otherwise beneficially owned by, controlled by or acting on behalf of, directly or indirectly, any Person, entity, organization, country or regime described in clause (a) or (b).

*"Bonds"* is defined in Section 1.

*"Business Day"* means for the purposes of any provision of this Agreement, any day other than a Saturday, a Sunday or a day on which commercial banks in New York, New York or Philadelphia, Pennsylvania are required or authorized to be closed.

*"Capital Lease"* means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

*"Capital Lease Obligation"* means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

*"Closing"* is defined in Section 3.

*"Code"* means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

*"Company"* means Aqua Pennsylvania, Inc., a corporation existing under the laws of the Commonwealth of Pennsylvania.

"*Controlled Entity*" means any of the Subsidiaries of the Company and any of their or the Company's respective Controlled Affiliates. As used in this definition, "Control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

*"Debt"* means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

*"Default"* means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

*"Disclosure Documents"* is defined in Section 5.3.

"*EMMA*" is defined in Section 7.1(a).

*"Environmental Laws"* means any and all Federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to Hazardous Materials.

*"ERISA"* means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"ERISA Affiliate"* means any trade or business (whether or not incorporated) that is treated as a single employer together with the Company under section 414 of the Code.

*"Event of Default"* is an "event of default" as defined in the Indenture.

*"Financing Agreements"* means this Agreement, the Indenture (including without limitation the Supplement), and the Bonds.

*"First Closing"* is defined in Section 3.

"*GAAP*" means generally accepted accounting principles as in effect from time to time in the United States of America.

*"Governmental Authority"* means:

(a) the government of

(i) the United States of America or any State or other political subdivision thereof, or

(ii) any other jurisdiction in which the Company or any Subsidiary conducts all or any part of its business, or which asserts jurisdiction over any properties of the Company or any Subsidiary, or

(b) any entity exercising executive, legislative, judicial, regulatory or administrative functions of, or pertaining to, any such government.

*"Governmental Official"* means any governmental official or employee, employee of any government-owned or government-controlled entity, political party, any official of a political party, candidate for political office, official of any public international organization or anyone else acting in an official capacity.

*"Guaranty"* means, with respect to any Person, any obligation (except the endorsement in the ordinary course of business of negotiable instruments for deposit or collection) of such Person guaranteeing or in effect guaranteeing any Debt, dividend or other obligation of any other Person in any manner, whether directly or indirectly, including (without limitation) obligations incurred through an agreement, contingent or otherwise, by such Person:

(a) to purchase such Debt or obligation or any property constituting security therefor primarily for the purpose of assuring the owner of such Debt or obligation of the ability of any other Person to make payment of the Debt or obligation;

(b) to advance or supply funds (i) for the purchase or payment of such Debt or obligation, or (ii) to maintain any working capital or other balance sheet condition or any income statement condition of any other Person or otherwise to advance or make available funds for the purchase or payment of such Debt or obligation;

(c) to lease properties or to purchase properties or services primarily for the purpose of assuring the owner of such Debt or obligation of the ability of any other Person to make payment of the Debt or obligation; or

(d) otherwise to assure the owner of such Debt or obligation against loss in respect thereof.

In any computation of the Debt or other liabilities of the obligor under any Guaranty, the Debt or other obligations that are the subject of such Guaranty shall be assumed to be direct obligations of such obligor, *provided* that the amount of such Debt outstanding for purposes of this Agreement shall not exceed the maximum amount of Debt that is the subject of such Guaranty.

*"Hazardous Material"* means any and all pollutants, toxic or hazardous wastes or other substances that might pose a hazard to health and safety, the removal of which may be required or the generation, manufacture, refining, production, processing, treatment, storage, handling, transportation, transfer, use, disposal, release, discharge, spillage, seepage or filtration of which is or shall be restricted, prohibited or penalized by any applicable law including, but not limited to, asbestos, urea formaldehyde foam insulation, polychlorinated biphenyls, petroleum,

petroleum products, lead based paint, radon gas or similar restricted, prohibited or penalized substances.

*"holder"* is defined in the Indenture.

*"Indenture"* is defined in Section 1.

*"Institutional Investor"* means (a) any Purchaser of a Bond, (b) any holder of a Bond holding (together with one or more of its affiliates) more than 5% of the aggregate principal amount of the Bonds then outstanding, (c) any bank, trust company, savings and loan association or other financial institution, any pension plan, any investment company, any insurance company, any broker or dealer, or any other similar financial institution or entity, regardless of legal form, and (d) any Related Fund of any holder of any Bond.

*"Lien"* means, with respect to any Person, any mortgage, lien, pledge, charge, security interest or other encumbrance, or any interest or title of any vendor, lessor, lender or other secured party to or of such Person under any conditional sale or other title retention agreement or Capital Lease, upon or with respect to any property or asset of such Person (including in the case of stock, stockholder agreements, voting trust agreements and all similar arrangements).

*"Make-Whole Amount"* is defined in the Supplement.

*"Material"* means material in relation to the business, operations, affairs, financial condition, assets or properties of the Company and its Subsidiaries taken as a whole.

*"Material Adverse Effect"* means a material adverse effect on (a) the business, operations, affairs, financial condition, assets or properties of the Company and its Subsidiaries taken as a whole, (b) the ability of the Company to perform its obligations under this Agreement, the Bonds or the Indenture or (c) the validity or enforceability of any Financing Agreement.

*"Multiemployer Plan"* means any Plan that is a "multiemployer plan" (as such term is defined in section 4001(a)(3) of ERISA).

*"NAIC"* means the National Association of Insurance Commissioners or any successor thereto.

*"Non-U.S. Plan"* means any plan, fund or other similar program that (a) is established or maintained outside the United States of America by the Company or any Subsidiary primarily for the benefit of employees of the Company or one or more Subsidiaries residing outside the United States of America, which plan, fund or other similar program provides, or results in, retirement income, a deferral of income in contemplation of retirement or payments to be made upon termination of employment, and (b) is not subject to ERISA or the Code.

*"OFAC"* means the Office of Foreign Assets Control of the United States Department of the Treasury.

"*OFAC Sanctions Program*" means any economic or trade sanction that OFAC is responsible for administering and enforcing. A list of OFAC Sanctions Programs may be found at http://www.treasury.gov/resource-center/sanctions/Programs/Pages/Programs.aspx.

*"Officer's Certificate"* means a certificate of a Senior Financial Officer or of any other officer of the Company whose responsibilities extend to the subject matter of such certificate.

*"Original Indenture"* is defined in Section 1.

*"PBGC"* means the Pension Benefit Guaranty Corporation referred to and defined in ERISA or any successor thereto.

*"Permitted Liens"* shall have the meaning assigned to such term in the Indenture.

*"Person"* means an individual, partnership, corporation, limited liability company, association, trust, unincorporated organization, business entity or Governmental Authority.

*"Plan"* means an "employee benefit plan" (as defined in section 3(2) of ERISA) subject to Title I of ERISA that is or, within the preceding five years, has been established or maintained, or to which contributions are or, within the preceding five years, have been made or required to be made, by the Company or any ERISA Affiliate or with respect to which the Company or any ERISA Affiliate may have any liability.

*"property"* or *"properties"* means, unless otherwise specifically limited, real or personal property of any kind, tangible or intangible, choate or inchoate.

*"PTE"* is defined in Section 6.2(a).

*"Purchaser"* is defined in the first paragraph of this Agreement.

*"Related Fund"* means, with respect to any holder of any Bond, any fund or entity that (i) invests in Securities or bank loans, and (ii) is advised or managed by such holder, the same investment advisor as such holder or by an affiliate of such holder or such investment advisor.

*"Required Holders"* means (i) at any time, prior to the Second Closing, (x) the Purchasers of 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds, and (y) the holders of at least 51% in principal amount of the Bonds at the time outstanding (exclusive of Bonds then owned by the Company or any of its Affiliates); and (ii) at any time, on or after the Second Closing, the holders of at least 51% in principal amount of the Bonds at the time outstanding (exclusive of Bonds then owned by the Company or any of its Affiliates) *provided*, that if the Second Closing does not occur on October 26, 2017, then the Required Holders shall only include the Purchasers of 4.06% Series due 2054 Bonds, the 4.07% Series due 2055 Bonds, and the 4.09% Series due 2057 Bonds from the date of the First Closing until October 31, 2017 or such later date as such Purchasers and the Company have agreed to in writing.

*"Responsible Officer"* means any Senior Financial Officer and any other officer of the Company with responsibility for the administration of the relevant portion of this Agreement.

*"SEC"* means the Securities and Exchange Commission of the United States, or any successor thereto.

*"Second Closing"* is defined in Section 3.

*"Securities"* or *"Security"* shall have the meaning specified in Section 2(a)(1) of the Securities Act.

*"Securities Act"* means the Securities Act of 1933, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"Senior Financial Officer"* means the chief financial officer, principal accounting officer, treasurer or comptroller of the Company.

*"Source"* is defined in Section 6.2.

*"State Sanctions List"* means a list that is adopted by any state Governmental Authority within the United States of America pertaining to Persons that engage in investment or other commercial activities in Iran or any other country that is a target of economic sanctions imposed under U.S. Economic Sanctions Laws.

*"Subsidiary"* means, as to any Person, any other Person in which such first Person or one or more of its Subsidiaries or such first Person and one or more of its Subsidiaries owns sufficient equity or voting interests to enable it or them (as a group) ordinarily, in the absence of contingencies, to elect a majority of the directors (or Persons performing similar functions) of such second Person, and any partnership or joint venture if more than a 50% interest in the profits or capital thereof is owned by such first Person or one or more of its Subsidiaries or such first Person and one or more of its Subsidiaries (unless such partnership or joint venture can and does ordinarily take major business actions without the prior approval of such Person or one or more of its Subsidiaries). Unless the context otherwise clearly requires, any reference to a "Subsidiary" is a reference to a Subsidiary of the Company.

*"Supplement"* is defined in Section 1.

*"SVO"* means the Securities Valuation Office of the NAIC or any successor to such Office.

*"Swaps"* means, with respect to any Person, payment obligations with respect to interest rate swaps, currency swaps and similar obligations obligating such Person to make payments, whether periodically or upon the happening of a contingency. For the purposes of this Agreement, the amount of the obligation under any Swap shall be the amount determined in respect thereof as of the end of the then most recently ended fiscal quarter of such Person, based on the assumption that such Swap had terminated at the end of such fiscal quarter, and in making

such determination, if any agreement relating to such Swap provides for the netting of amounts payable by and to such Person thereunder or if any such agreement provides for the simultaneous payment of amounts by and to such Person, then in each such case, the amount of such obligation shall be the net amount so determined.

*"Trust Estate"* is defined in the Indenture.

*"Trustee"* is defined in Section 1.

*"UCC"* means, the Uniform Commercial Code as enacted and in effect from time to time in the state whose laws are treated as applying to the Trust Estate.

*"USA Patriot Act"* means United States Public Law 107-56, Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

*"U.S. Economic Sanctions Laws"* means those laws, executive orders, enabling legislation or regulations administered and enforced by the United States pursuant to which economic sanctions have been imposed on any Person, entity, organization, country or regime, including the Trading with the Enemy Act, the International Emergency Economic Powers Act, the Iran Sanctions Act, the Sudan Accountability and Divestment Act, each as amended from time to time, and any other OFAC Sanctions Program.

Exhibit 31.1

CERTIFICATION OF CHIEF EXECUTIVE OFFICER, PURSUANT TO RULE 13A-14(A) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934

I, Christopher H. Franklin, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aqua America, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting, and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The Parent Company (Aqua America, Inc.) is not rated.

STANDARD & POOR'S

# Standard & Poor's Research

Summary:

# Aqua Pennsylvania Inc.

**Primary Credit Analyst:**
Matthew L O'Neill, New York (1) 212-438-4295; matthew.oneill@standardandpoors.com

**Secondary Contact:**
Barbara A Eiseman, New York 212-438-7666; barbara.eiseman@standardandpoors.com

## Table Of Contents

Summary:

# Aqua Pennsylvania Inc.

| Corporate Credit Rating | A+/Stable/-- |
|---|---|

**Profile Assessments**

| | | | |
|---|---|---|---|
| BUSINESS RISK | EXCELLENT | Vulnerable | Excellent |
| FINANCIAL RISK | INTERMEDIATE | Highly leveraged | Minimal |

## Rationale

### Business Risk: Excellent

- Monopolistic, rate-regulated business that provides an essential service
- Management is focused on a company that almost entirely consists of rate-regulated utility operations
- Favorable regulatory environment
- Cost recovery mechanisms that enhance cash flow predictability
- Low operating risk

### Financial Risk: Intermediate

- Large capital spending requirements over the next several years
- Generally conservative financial policies
- Adequate liquidity

### Outlook: Stable

The stable outlook reflects Standard & Poor's Ratings Services' expectation of adequate and timely rate relief, management of Aqua Pennsylvania Inc.'s growth strategy, and maintenance of an appropriate financial risk profile.

#### Downside scenario

We could lower the rating if the regulatory environment in Pennsylvania made an unfavorable shift or the company increased debt to finance acquisitions or capital spending, resulting in consolidated funds from operations (FFO) to debt consistently less than 17% and leverage more than 60%.

#### Upside scenario

Although less likely, we could raise the rating if regulators provided significant rate increases and above-average returns on equity that result in parent company Aqua America Inc. generating cash flow that is materially stronger than we expect, with FFO to debt of at least 25% and leverage less than 55%.

## Standard & Poor's Base-Case Scenario

**Assumptions**

- We assume EBITDA growth of about 2.5% to 3.5% per year during the forecast period
- Capital spending of about $300 million annually, on average
- Dividends of about $90 million to $100 million in 2013, rising slightly throughout the forecast period

**Key Metrics**

| | 2012A | 2013E | 2014E |
|---|---|---|---|
| FFO/Total debt | 21.9% | 18-22% | 18-23% |
| Total debt/Total capital | 56.4% | 52-56% | 52-56% |
| Total debt/EBITDA | 4.0x | 3.4-4x | 3.5-4x |

## Business Risk: Excellent

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated credit quality of its parent company, Aqua America Inc. (unrated). Aqua Pennsylvania accounts for more than one-half of consolidated Aqua America's revenues and cash flow.

Aqua Pennsylvania's business risk profile is "excellent", in our assessment, reflecting a low-risk monopoly water distribution business; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, stable residential and commercial customer base that provides a stable revenue base; and solid operations in which purchased water accounts for only about 10% of water sales. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths.

The Pennsylvania Public Utility Commission provides Aqua Pennsylvania with favorable cost-recovery mechanisms, including the addition of capital spending to rates outside the traditional rate proceedings, inclusion of certain expected spending in determining customer rates, and a consolidated rate structure. During 2012, the company received roughly $40 million of revenue from rate increases.

Reflected in the business risk profile is our assessment of the company's management and governance as "strong". This reflects management's consistent strategy that has a demonstrated track of successful execution, comprehensive enterprise wide risk management standards, and management's considerable expertise within all of its operating businesses.

## Financial Risk: Intermediate

Timely rate relief and balanced financing of its growth strategy support Aqua Pennsylvania's intermediate financial profile, which we view as appropriate for the rating, but consolidated financial measures are modestly weaker than other 'A+' rated water companies. As of Dec. 31, 2012, Aqua America had total debt, including tax-effected pension and other postemployment benefits and operating leases, of about $1.8 billion, with total debt to capital of about 56%.

Aqua America's adjusted funds from operations (FFO) are about $390 million and FFO to debt is about 22%. Over the intermediate term, we expect financial performance to approximate current levels for Aqua America supported by additional rate increases and existing recovery mechanisms.

Aqua America entered into a joint venture with Penn Virginia Resource Partners L.P. (PVR; B+/Negative/--) to build a 12-inch-wide pipeline to provide fresh water to PVR's gas-gathering systems in Lycoming County, Pa. We believe that this project efficiently fulfills a requirement to provide water in the Marcellus Shale region and could provide Aqua with an opportunity to increase its unregulated cash flows, which are currently less than 1% of total EBITDA. We believe that this project carries more risk than the utility's regulated strategy and any sizable growth of this business would adversely affect the business risk profile and possibly lead to lower ratings.

## Liquidity: Adequate

Aqua Pennsylvania's liquidity reflects that of parent Aqua America. We consider Aqua's consolidated liquidity to be "adequate", with forecast sources divided by uses of more than 1.2x for the next 12 months.

| Principal Liquidity Sources | Principal Liquidity Uses |
|---|---|
| • Credit line availability of more than $100 million in the next 12 months<br>• FFO of about $300 million during the next 12 months | • Capital spending of $200 million during the next 12 months<br>• Dividends of about $99 million during the next 12 months |

## Recovery Analysis

- We assign recovery ratings to first-mortgage bonds (FMBs) issued by U.S. utilities, which can result in issue ratings being notched above a corporate credit rating (CCR) on utility depending on the rating category and the extent of the collateral coverage. The FMBs issued by U.S. utilities are a form of "secured utility bond" (SUB) that qualify for a recovery rating as defined in our criteria (see "Collateral Coverage and Issue Notching Rules for '1+' and '1' Recovery Ratings on Senior Bonds Secured by Utility Real Property", Feb. 14, 2013).
- The recovery methodology is supported by the ample historical record of 100% recovery for secured bondholders in utility bankruptcies in the U.S. and our view that the factors that enhanced those recoveries (limited size of the creditor class and the durable value of utility rate-based assets during and after a reorganization given the essential service provided and the high replacement cost) will persist in the future.
- Under our SUB criteria, we calculate a ratio of our estimate of the value of the collateral pledged to bondholders relative to the amount of FMBs outstanding. FMB ratings can exceed a CCR on a utility by up to one notch in the 'A' category, two notches in the 'BBB' category, and three notches in speculative-grade categories depending on the calculated ratio.
- Aqua Pennsylvania's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of more than 1.5x supports a recovery rating of '1+' and an issue rating one notch above the CCR.

**Business And Financial Risk Matrix**

| | Financial Risk | | | | | |
|---|---|---|---|---|---|---|
| **Business Risk** | Minimal | Modest | Intermediate | Significant | Aggressive | Highly Leveraged |
| Excellent | AAA/AA+ | AA | A | A- | BBB | -- |
| Strong | AA | A | A- | BBB | BB | BB- |
| Satisfactory | A- | BBB+ | BBB | BB+ | BB- | B+ |
| Fair | -- | BBB- | BB+ | BB | BB- | B |
| Weak | -- | -- | BB | BB- | B+ | B- |
| Vulnerable | -- | -- | -- | B+ | B | B- or below |

**Note:** These rating outcomes are shown for guidance purposes only. The ratings indicated in each cell of the matrix are the midpoints of the likely rating possibilities. There can be small positives and negatives that would lead to an outcome of one notch higher or lower than the typical matrix outcome. Moreover, there will be exceptions that go beyond a one-notch divergence. For example, the matrix does not address the lowest rungs of the credit spectrum (i.e., the 'CCC' category and lower). Other rating outcomes that are more than one notch off the matrix may occur for companies that have liquidity that we judge as "less than adequate" or "weak" under our criteria, or companies with "satisfactory" or better business risk profiles that have extreme debt burdens due to leveraged buyouts or other reasons. For government-related entities (GREs), the indicated rating would apply to the standalone credit profile, before giving any credit for potential government support.

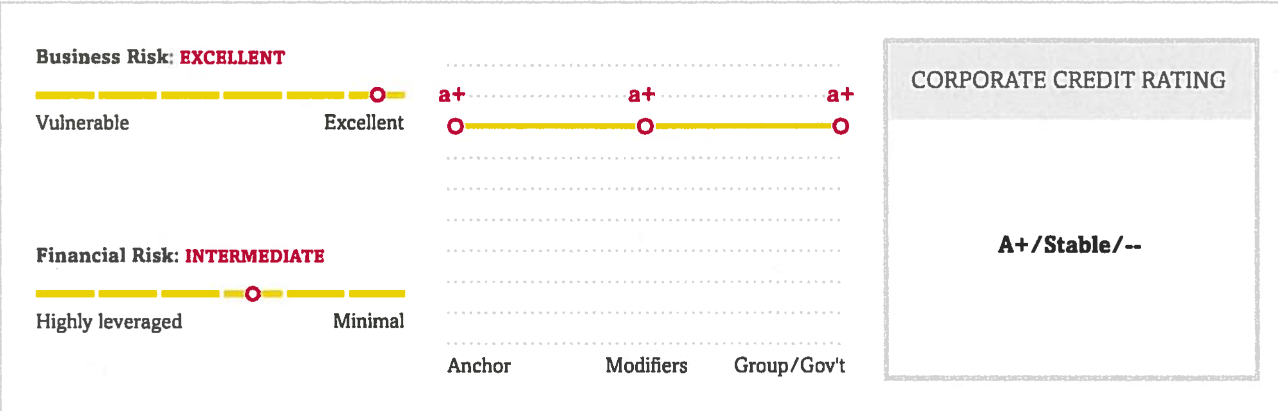
## Table Of Contents

## Summary:

# Aqua Pennsylvania Inc.



## Rationale

| Business Risk: Excellent | Financial Risk: Intermediate |
|---|---|
| • Monopolistic, rate-regulated business that provides an essential service<br>• Management's focus is on a company that almost entirely consists of rate-regulated utility operations<br>• Favorable regulatory environment<br>• Cost recovery mechanisms that enhance cash flow predictability<br>• Low operating risk water distribution business | • Use of the low volatility table<br>• Large capital spending requirements over the next several years<br>• Generally conservative financial policies<br>• Adequate liquidity |

**Outlook: Stable**

The stable outlook on Aqua Pennsylvania Inc. reflects Standard & Poor's Ratings Services' baseline forecast that consolidated adjusted funds from operations (FFO) to debt will be about 18% to 20% over the next 12 to 18 months and the company's continued effective management of its regulatory risk.

### Downside scenario

We could lower the rating if the regulatory environment in Pennsylvania made an unfavorable shift or the company increased debt to finance acquisitions or capital spending, resulting in consolidated FFO to debt consistently less than 13% and debt to EBITDA of more than 4x on a sustained basis.

### Upside scenario

Although less likely, we could raise the rating if FFO to debt consistently strengthened to greater than 23% on a sustained basis, which we would expect from an improvement in the economy.

## Standard & Poor's Base-Case Scenario

**Assumptions**

- We assume EBITDA growth of about 2% to 3.5% per year during the forecast period
- Capital spending of about $300 million annually, on average
- Dividends of about $90 million to $100 million over the next 12 months

**Key Metrics**

| | 2013A | 2014E | 2015E |
|---|---|---|---|
| FFO/total debt (%) | 21.7 | 18-22 | 18-22 |
| Total debt/EBITDA (x) | 3.8 | 3.5-4.0 | 3.5-4.0 |

A--Actual. E--Estimated. FFO--Funds from operations.

## Business Risk: Excellent

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated credit quality of its parent company, Aqua America Inc. (unrated). Aqua Pennsylvania accounts for more than one-half of consolidated Aqua America's revenues and cash flow.

We view Aqua Pennsylvania's business risk profile as "excellent", reflecting a "very low" country risk because all of the company's operations are based in the U.S., and the regulated utility sector has a "very low" industry risk profile. Our assessment reflects the low-risk monopoly water distribution business; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, stable residential and commercial customer base that provides a stable revenue base; and solid operations in which purchased water accounts for only about 10% of water sales. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths.

Reflected in the business risk profile is our assessment of the company's management and governance as "strong". This reflects management's consistent strategy that has a demonstrated track of successful execution, comprehensive enterprise wide risk management standards, and management's considerable expertise within all of its operating businesses.

## Financial Risk: Intermediate

We view Aqua's financial risk profile as "intermediate" using our low volatility table. We apply the low volatility table based on Aqua's low-operating risk water distribution business and given its effective management of regulatory risk compared with peers. Timely rate relief and balanced financing of its growth strategy support Aqua Pennsylvania's intermediate financial profile. Our baseline forecast results in adjusted FFO to debt of 18% to 20% and debt to EBITDA below 4x

## Liquidity: Adequate

Aqua Pennsylvania's liquidity reflects that of parent Aqua America. We consider Aqua's consolidated liquidity to be "adequate", under our corporate liquidity methodology. Projected liquidity sources exceed uses by more than 1.1x for the next 12 months. The company's ability to absorb high-impact, low-probability events with limited need for refinancing, its flexibility to lower capital spending or sell assets, sound bank relationships, solid standing in credit markets, and generally prudent risk management also support our assessment of its liquidity as "adequate".

| Principal Liquidity Sources | Principal Liquidity Uses |
|---|---|
| • Credit line availability of more than $100 million in the next 12 months<br>• FFO of about $300 million during the next 12 months | • Capital spending of $300 million during the next 12 months<br>• Dividends of about $90-100 million during the next 12 months |

## Other Modifiers

Modifiers have no impact on the SACP or rating outcome. We consider management & governance (M&G) to be "strong".

## Group Influence

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated group credit quality of its parent company, Aqua America Inc. (unrated). Aqua Pennsylvania accounts for more than one-half of consolidated Aqua America's revenues and cash flow.

## Recovery Analysis

- We assign recovery ratings to first-mortgage bonds (FMBs) issued by U.S. utilities, which can result in issue ratings being notched above a corporate credit rating on utility depending on the rating category and the extent of the collateral coverage. The FMBs issued by U.S. utilities are a form of "secured utility bond" (SUB) that qualify for a recovery rating as defined in our criteria (see "Collateral Coverage and Issue Notching Rules for '1+' and '1' Recovery Ratings on Senior Bonds Secured by Utility Real Property", Feb. 14, 2013).
- The recovery methodology is supported by the ample historical record of 100% recovery for secured bondholders in utility bankruptcies in the U.S. and our view that the factors that enhanced those recoveries (limited size of the creditor class and the durable value of utility rate-based assets during and after a reorganization given the essential service provided and the high replacement cost) will persist in the future.
- Under our SUB criteria, we calculate a ratio of our estimate of the value of the collateral pledged to bondholders relative to the amount of FMBs outstanding. FMB ratings can exceed a corporate credit rating on a utility by up to one notch in the 'A' category, two notches in the 'BBB' category, and three notches in speculative-grade categories depending on the calculated ratio.

- Aqua Pennsylvania's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of more than 1.5x supports a recovery rating of '1+' and an issue rating one notch above the corporate credit rating.

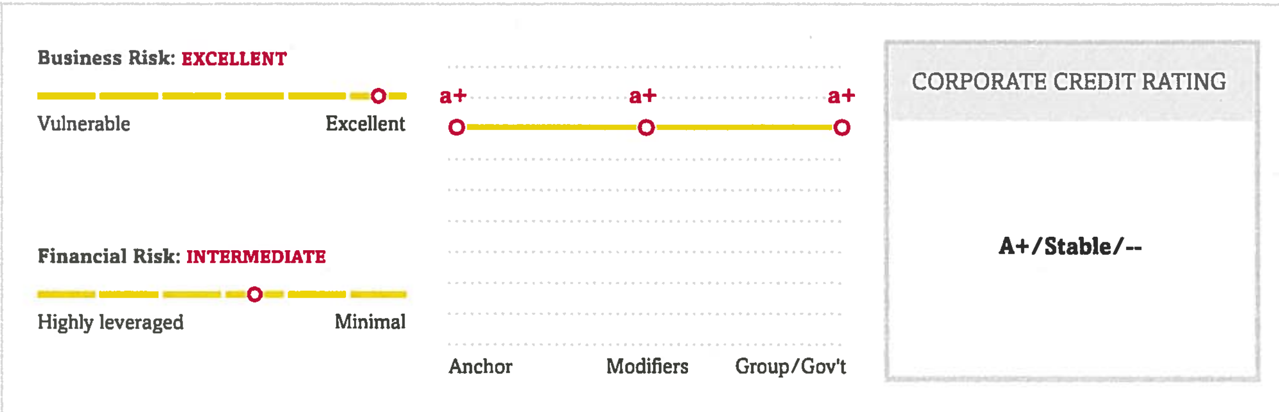
## Table Of Contents

Summary:

# Aqua Pennsylvania Inc.



## Rationale

### Business Risk: Excellent

- Monopolistic, rate-regulated business that provides an essential service.
- Management's focus is primarily on rate-regulated utility operations.
- Favorable regulatory environment.
- Cost recovery mechanisms that enhance cash flow predictability.
- Low operating risk water distribution business.

### Financial Risk: Intermediate

- Use of the low volatility table.
- Stable cash flow from regulated utility operations.
- Large capital spending requirements over the next several years.
- Generally conservative financial policies.

### Outlook: Stable

The stable outlook on Aqua Pennsylvania Inc. reflects Standard & Poor's Ratings Services' baseline forecast that consolidated adjusted funds from operations (FFO) to debt will be about 18% to 20% over the next 12 to 18 months and the company's continued effective management of its regulatory risk.

#### Downside scenario

We could lower the rating if the regulatory environment in Pennsylvania made an unfavorable shift or the company increased debt to finance acquisitions or capital spending, resulting in consolidated FFO to debt consistently less than 13% and debt to EBITDA of more than 4x on a sustained basis.

#### Upside scenario

Although less likely, we could raise the rating if FFO to debt consistently strengthened to greater than 23% on a sustained basis, which we would expect from an improvement in the economy.

## Standard & Poor's Base-Case Scenario

### Assumptions

- We assume EBITDA growth of about 2% to 3.5% per year during the forecast period.
- Capital spending of about $325 million to $350 million annually.
- Dividends of about $120 million over the next 12 months.

### Key Metrics

| | 2014A | 2015E | 2016E |
|---|---|---|---|
| FFO/total debt (%) | 21.6 | 18-22 | 18-22 |
| Total debt/EBITDA (x) | 3.8 | 3.5x-4.0 | 3.5x–4.0 |

A—Actual. E—Estimate.

## Business Risk: Excellent

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated credit quality of its parent company, Aqua America Inc. (unrated). Aqua Pennsylvania accounts for more than one-half of consolidated Aqua America's revenues and cash flow.

We view Aqua Pennsylvania's business risk profile as "excellent," reflecting a "very low" country risk because all of the company's operations are based in the U.S., and the regulated utility sector has a "very low" industry risk profile. Our assessment reflects the low-risk water distribution business; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, stable residential and commercial customer base that provides a stable revenue base; and solid operations in which purchased water accounts for only about 10% of water sales. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths.

## Financial Risk: Intermediate

We view Aqua's financial risk profile as "intermediate" using our low volatility table. We apply the low volatility table based on Aqua's low-operating risk water distribution business and given its effective management of regulatory risk compared with peers. Timely rate relief and balanced financing of its growth strategy support Aqua's intermediate financial profile. Our baseline forecast results in adjusted FFO to debt of 18% to 20% and debt to EBITDA below 4x.

## Liquidity: Adequate

Aqua Pennsylvania's liquidity reflects that of parent Aqua America. We consider Aqua's consolidated liquidity to be "adequate," under our corporate liquidity methodology. Projected liquidity sources exceed uses by more than 1.1x for the next 12 months. The company's ability to absorb high-impact, low-probability events with limited need for refinancing, its flexibility to lower capital spending or sell assets, sound bank relationships, solid standing in credit markets, and generally prudent risk management also support our assessment of its liquidity as "adequate".

| Principal Liquidity Sources | Principal Liquidity Uses |
| --- | --- |
| • Credit line availability of more than \$250 million in the next 12 months.<br>• FFO of about \$360 million during the next 12 months. | • Maintenance capital spending of \$260 million to \$270 million during the next 12 months.<br>• Dividends of about \$120 million during the next 12 months. |

## Other Credit Considerations

Our assessment of modifiers results in no further changes to the anchor score. We consider management and governance (M&G) to be "strong". Our assessment reflects management's consistent strategy that has a demonstrated track of successful execution, comprehensive enterprise wide risk management standards, and management's considerable expertise within all of its operating businesses.

## Group Influence

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated group credit quality of its parent company, Aqua America Inc. (unrated). Under the group rating methodology criteria, we assess Aqua America as the parent of the group with a group credit profile of 'a+'. We assess the status of Aqua America's operating subsidiary Aqua Pennsylvania as core because we view it as integral to the group's identity, it is highly unlikely to be sold, and has strong management commitment given the company's emphasis on maintaining the size and score of the regulated utility operations. The business and financial scope of the rated entity and the group to which it belongs are the same and consolidated group accounts have been analyzed.

CORPORATE CREDIT RATING

**A+/Stable/--**

## Rationale

| Business Risk: Excellent | Financial Risk: Intermediate |
|---|---|
| • Monopolistic, rate-regulated business that provides an essential service.<br>• Management's focus is primarily on rate-regulated utility operations.<br>• Favorable regulatory environment.<br>• Cost recovery mechanisms that enhance cash flow predictability.<br>• Low-operating-risk water distribution business. | • Use of the low volatility table.<br>• Stable cash flow from regulated utility operations.<br>• Large capital spending requirements over the next several years.<br>• Generally conservative financial policies. |

### Outlook: Stable

The stable outlook on Aqua Pennsylvania Inc. reflects Standard & Poor's Ratings Services' baseline forecast that consolidated adjusted funds from operations (FFO) to debt will be about 18% to 20% over the next 12 to 18 months and the company's continued effective management of its regulatory risk.

#### Downside scenario

We could lower the rating if the regulatory environment in Pennsylvania made an unfavorable shift or the company increased debt to finance acquisitions or capital spending, resulting in consolidated FFO to debt consistently less than 14% sustained basis.

#### Upside scenario

Although less likely, we could raise the rating if FFO to debt consistently strengthened to greater than 22% on a sustained basis, which we would expect from an improvement in the economy.

## Standard & Poor's Base-Case Scenario

### Assumptions

- We assume EBITDA growth of about 2% to 3.5% per year during the forecast period.
- Capital spending of about $325 million to $350 million annually.
- Dividends of about $120 million over the next 12 months.

### Key Metrics

| | 2014A | 2015E | 2016E |
|---|---|---|---|
| FFO/total debt (%) | 21.6 | 18-20 | 18-20 |
| Total debt/EBITDA (x) | 3.8 | 3.5x-4.0 | 3.5x–4.0 |

## Business Risk: Excellent

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated credit quality of its parent company, Aqua America Inc. (unrated). Aqua Pennsylvania accounts for more than one-half of consolidated Aqua America's revenues and cash flow.

We view Aqua Pennsylvania's business risk profile as "excellent," reflecting a "very low" country risk because all of the company's operations are based in the U.S., and the regulated utility sector has a "very low" industry risk profile. Our assessment reflects the low-risk water distribution business; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, stable residential and commercial customer base that provides a stable revenue base; and solid operations in which purchased water accounts for only about 10% of water sales. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths.

## Financial Risk: Intermediate

We view Aqua's financial risk profile as "intermediate" using our low volatility table. We apply the low volatility table based on Aqua's low-operating-risk water distribution business and given its effective management of regulatory risk compared with peers. Timely rate relief and balanced financing of its growth strategy support Aqua's intermediate financial profile. Our baseline forecast results in adjusted FFO to debt of 18% to 20%.

Based on our "excellent" business risk and "intermediate" financial risk profile assessments, there are two potential anchor outcomes ('a+' or 'a'). Our choice of an 'a+' anchor reflects our view that the business risk of Aqua is on the high end of the "excellent" category, in part because of the supportive cost recovery and strong regulatory framework, and effective management of regulatory risk

## Liquidity: Adequate

Aqua Pennsylvania's liquidity reflects that of parent Aqua America. We consider Aqua's consolidated liquidity to be "adequate," under our corporate liquidity methodology. Projected liquidity sources exceed uses by more than 1.1x for the next 12 months. The company's ability to absorb high-impact, low-probability events with limited need for refinancing, its flexibility to lower capital spending or sell assets, sound bank relationships, solid standing in credit markets, and generally prudent risk management also support our assessment of its liquidity as "adequate".

| Principal Liquidity Sources | Principal Liquidity Uses |
|---|---|
| • Credit line availability of more than $150 million in the next 12 months; and<br>• FFO of about $380 million during the next 12 months. | • Maintenance capital spending of $260 million to $270 million during the next 12 months; and<br>• Dividends of about $90 million to $120 million during the next 12 months. |

## Other Credit Considerations

Our assessment of modifiers results in no further changes to the anchor score. We consider management & governance (M&G) to be "strong". Our assessment reflects management's consistent strategy that has a demonstrated track of successful execution, comprehensive enterprise-wide risk management standards, and management's considerable expertise within all of its operating businesses.

## Group Influence

Standard & Poor's ratings on water utility Aqua Pennsylvania Inc. reflect the consolidated group credit quality of its parent company, Aqua America Inc. (unrated).Under the group rating methodology criteria, we assess Aqua America as the parent of the group with a group credit profile of 'a+'. We assess the status of Aqua America's operating subsidiary Aqua Pennsylvania as core because we view them as integral to the group's identity, they are highly unlikely to be sold, and have strong management commitment given the company's emphasis on maintaining the size and score of the regulated utility operations. The business and financial scope of the rated entity and the group to which it belongs are the same and consolidated group accounts have been analyzed.

- We base our ratings on Aqua Pennsylvania Inc. on the very low business risk and steady financial performance of its parent, Aqua America Inc. (unrated).
- We affirmed the 'A+' issuer credit rating on Aqua Pennsylvania Inc. The outlook is stable.
- We revised our management and governance assessment on Aqua Pennsylvania to satisfactory.
- The stable rating outlook over the next two years on Aqua Pennsylvania Inc. reflects our expectation of sustained solid consolidated financial measures of parent Aqua America Inc., steady operating performance, and the company's effective management of regulatory risk. Our baseline forecast for Aqua America includes funds from operations (FFO) to debt of about 17%-20%.

NEW YORK (S&P Global Ratings) Sept. 21, 2016--S&P Global Ratings today affirmed all its ratings on regulated water utility Aqua Pennsylvania Inc., including the 'A+' long-term issuer credit rating. The outlook is stable. Aqua Pennsylvania Inc. is a wholly owned subsidiary of Aqua America Inc. (unrated).

"The ratings on Aqua Pennsylvania [Aqua Penn] reflect the consolidated credit quality of its parent company, Aqua America Inc.," said S&P Global Ratings credit analyst Safina Ali. Aqua Penn accounts for more than one-half of consolidated Aqua America's revenues and EBITDA. Nonutility operations contribute less than 5% of consolidated revenue and EBITDA.

We assess Aqua Penn's business risk profile as excellent, reflecting its very

 1717975 | 300642892

low risk U.S.-based regulated water and wastewater distribution operations; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, diversified residential and commercial customer base that provides stable revenues; and solid operations with a focus on cost control. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths. After considering the supportive cost recovery and strong regulatory framework and effective management of regulatory risk, we assess the business risk profile as being toward the high end of the category.

Our assessment of Aqua Penn's financial risk profile as intermediate is based on the low-volatility financial ratio benchmarks. Use of low-volatility financial benchmarks is based on the company's low-operating-risk water distribution business and its effective management of regulatory risk compared with peers. Timely rate relief and balanced financing of its growth strategy support Aqua's intermediate financial profile. Our baseline forecast results in adjusted FFO to debt of 17%-20%.

We revised our management and governance assessment on Aqua Penn to satisfactory from strong. This revision aligns our management and governance assessment on the company with those of peers and reflects our view of management's generally consistent strategy and ability to typically execute on it.

The stable rating outlook over the next two years on Aqua Penn reflects our expectation of sustained solid consolidated financial measures of parent Aqua America Inc., steady operating performance, and the company's effective management of regulatory risk. Our baseline forecast for Aqua America includes FFO to debt of about 17%-20%.

We could lower the ratings on Aqua Pennsylvania if the credit quality of the group declines including weakening business risk profile as a result of material expansion into the riskier non-utility operations or adverse regulatory outcomes. In addition, a worsening financial risk profile from weaker operating cash flow or greater debt leverage within the group could also lead to lower ratings. Specifically, we could lower the ratings if FFO to debt falls to less than 14% for Aqua America on a sustained basis.

Although less likely, we could raise the rating if FFO to debt for Aqua America consistently strengthened to greater than 22%, which could result from an improvement in the economy or deleveraging.

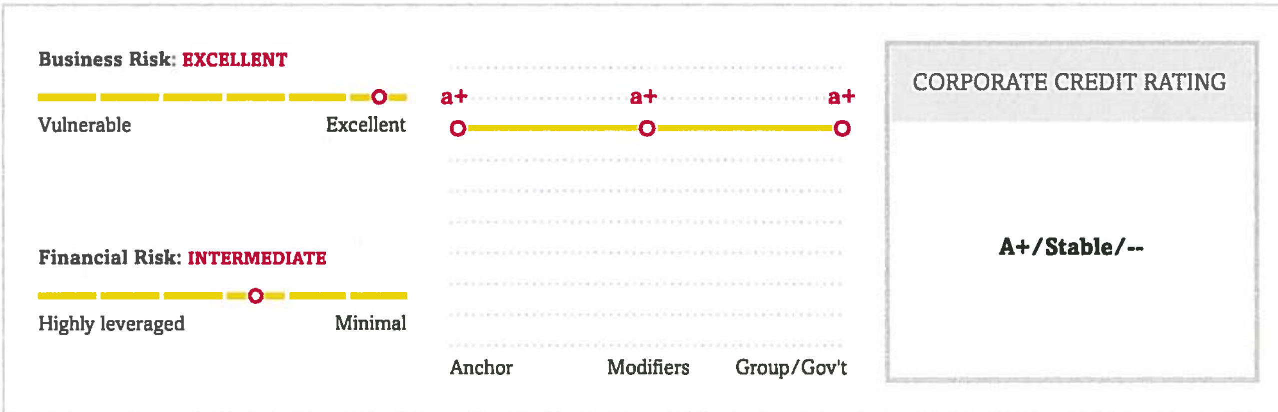
## Table Of Contents

Summary:

# Aqua Pennsylvania Inc.



## Rationale

| Business Risk: Excellent | Financial Risk: Intermediate |
|---|---|
| • Monopolistic, rate-regulated, and low-risk water distribution business;<br>• Management's focus is primarily on rate-regulated utility operations;<br>• Favorable regulatory environment; and<br>• Cost recovery mechanisms that enhance cash flow predictability. | • Use of our most relaxed financial ratio benchmarks;<br>• Stable cash flow from regulated utility operations;<br>• Large capital spending requirements over the next several years; and<br>• Generally conservative financial policies. |

### Outlook: Stable

S&P Global Ratings' stable outlook over the next two years on Bryn Mawr, Pa.-based Aqua Pennsylvania Inc. (Aqua Penn) reflects the expectation of sustained solid consolidated financial measures of parent Aqua America Inc. steady operating performance, and the company's effective management of regulatory risk. Our baseline forecast for Aqua America includes funds from operations (FFO) to debt of about 16%-18%.

#### Downside scenario

We could lower the ratings on Aqua Penn if the credit quality of the group declines. This decline could be a result of a weakening business risk profile from a material expansion into riskier non-utility operations or because of adverse regulatory outcomes. In addition, a worsening financial risk profile from weaker operating cash flow or greater debt leverage within the group could also lead to lower ratings. Specifically, we could lower the ratings if FFO to debt falls to less than 14% for Aqua America on a sustained basis.

#### Upside scenario

Although less likely, we could raise the rating if FFO to debt for Aqua America consistently strengthened to greater than 22%, which could result from an increase in cash flows as a result of higher than anticipated sales volumes and an increase in customer connections or deleveraging.

## Our Base-Case Scenario

### Assumptions

- The company continues to receive a timely recovery of investments and operating expenses through rate surcharges and rate cases.
- Increase in customer base as a result of small tuck-in acquisitions results in single-digit annual gross margin growth.
- Capital spending of about $500 million in 2017, trending to historic levels in 2018 and 2019.
- Dividend payout ratio at Aqua America in the range of 60%-70% for all forecasted years.
- All the debt maturities are assumed to be refinanced.

### Key Metrics

| | 2016A | 2017E | 2018E |
|---|---|---|---|
| FFO to total debt (%) | 18.5 | 16.0-18.0 | 15.0-18.0 |
| Total debt to EBITDA (x) | 4.4 | 4.3-4.7 | 4.5-4.8 |

A-Actual. E-Estimate. FFO- Funds from operations.

## Business Risk: Excellent

The ratings on Aqua Penn reflects the consolidated credit quality of its parent company, Aqua America Inc. Aqua Penn accounts for more than one-half of consolidated Aqua America's revenues and EBITDA. Non-utility operations contribute less than 5% of consolidated revenue and EBITDA.

We assess Aqua Penn's business risk profile as excellent, reflecting its very low-risk, U.S.-based, regulated water and wastewater distribution operations; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, diversified residential and commercial customer base that provides stable revenues; and solid operations with a focus on cost control. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths. After considering the supportive cost recovery, strong regulatory framework and effective management of regulatory risk, we assess the business risk profile as being toward the high end of the category.

## Financial Risk: Intermediate

Our assessment of Aqua Penn's financial risk profile as intermediate is based on our most relaxed financial ratio benchmarks reflecting the company's low-operating-risk water distribution business and its effective management of regulatory risk compared with peers. Timely rate relief and balanced financing of its growth strategy support Aqua's intermediate financial profile. Our baseline forecast results in adjusted FFO to debt of 16%-18%.

## Liquidity: Adequate

We assess Aqua Pennsylvania's liquidity as adequate because we believe its liquidity sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The assessment also reflects the company's generally prudent risk management, sound relationships with banks, and a generally satisfactory standing in credit markets.

| Principal Liquidity Sources | Principal Liquidity Uses |
|---|---|
| • Cash FFO of roughly $230 million; and<br>• Assumed ongoing parental support on liquidity needs. | • Debt maturities, of about $60 million, including outstanding short term debt; and –<br>• Maintenance capital spending of about $290 million and dividends in-line to maintain the utility's capital structure. |

## Group Influence

Under our group rating methodology, we assess Aqua Penn to be a core subsidiary of Aqua America, reflecting our view that Aqua Penn is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful at what it does, and contributes meaningfully to the group. There are no meaningful insulation measures in place that protect Aqua Penn from its parent and therefore, our issuer credit rating (ICR) on Aqua Penn is in-line with Aqua America's group credit profile of 'a+'.

## Recovery Analysis

We assign recovery ratings to first mortgage bonds (FMBs) issued by U.S. utilities, which can result in issue ratings being notched above an issuer credit rating (ICR) on a utility depending on the rating category and the extent of the collateral coverage. Aqua Penn's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of more than 1.5x supports a recovery rating of '1+' and an issue rating one notch above the ICR.

Research Update:

# Aqua Pennsylvania Inc. 'A+' Issuer Level Rating Affirmed; Outlook Revised To Negative On Weaker Financial Measures

## Overview

- We expect the consolidated financial measures for Aqua Pennsylvania Inc. (Aqua Penn) and Aqua America Inc. (WTR) to weaken prospectively reflecting a combination of robust capital spending, on-going small acquisitions that are primarily debt-funded, and our expectation of higher current tax expenses for the company.
- We are revising our rating outlook on Aqua Penn to negative from stable. At the same time, we are affirming our ratings including the 'A+' issuer credit rating and 'AA-' secured debt rating.
- The negative outlook reflects our expectation for weaker consolidated financial measures and a potential strain on cash flow. Without counter-measures such as additional equity, improved operating cash flows, or a deleveraging plan, the company's financial risk profile could weaken further, possibly resulting in lower ratings.

## Rating Action

On July 09, 2018, S&P Global Ratings affirmed its 'A+' issuer credit rating on Aqua Pennsylvania Inc. and the 'AA-' rating on the company's secured debt. We also revised our rating outlook to negative from stable.

## Rationale

The outlook revision reflects our expectation that parent Aqua America's consolidated funds from operations (FFO) to total debt will fall to 14%-15% for 2018 through 2022, from its historical average of about 18%. The weaker financial measures place the company at the lower end of the range for its current financial risk profile category, resulting in minimal cushion for the 'A+' rating. Our expectations for weak financial measures reflect the company's robust capital spending, on-going small acquisitions that are mostly debt-funded, and our expectation of higher current tax expenses. Without counter-measures such as additional equity, improved operating cash flows, or a deleveraging plan, the company's financial risk profile could weaken further, possibly resulting in lower ratings.

Our ratings on Aqua Penn reflects the consolidated group credit profile of its parent company, Aqua America Inc. Aqua Penn accounts for more than one-half of consolidated Aqua America's revenues and EBITDA. Non-utility operations contribute less than 5% of consolidated revenue and EBITDA.

We assess Aqua Penn's business risk profile as excellent, reflecting its very low-risk, U.S.-based, regulated water and wastewater distribution operations; a supportive regulatory environment with favorable cost-recovery mechanisms that enhance cash flow predictability; a large, diversified residential and commercial customer base that provides stable revenues; and solid operations with a focus on cost control. The company's elevated capital spending requirements for infrastructure replacement, increasing costs of compliance with water quality standards, and a highly acquisitive growth strategy somewhat temper the company's strengths. After considering the supportive cost recovery, strong regulatory framework, and effective management of regulatory risk, we assess the business risk profile as being toward the high end of the excellent category.

We assess Aqua Penn's financial risk profile as intermediate using our most relaxed financial ratio benchmarks, reflecting the company's low-risk water distribution business and its effective management of regulatory risk compared with peers. Aqua Penn's financial profile has historically been supported in part by the use of repair tax deductions. However, we no longer expect the use the repair tax deduction to persist, resulting in a higher current tax expenses for the company going forward. In addition, Aqua Penn's capital spending program remains robust, and the company's strategy continues to reflect on-going small acquisitions, most of which are debt-financed. For these reasons, we expect Aqua Penn's consolidated financial measures will fall to 14%-15%, indicative of the lower end of the range for the company's current financial risk profile category. Our base case assumes capital spending of about $500 million, $110 million of acquisition costs, and future rate cases.

## Liquidity

Aqua Penn has adequate liquidity and can more than cover its needs for the next 12 months, even if EBITDA declines by 10%. We expect the company's liquidity sources over the next 12 months will exceed uses by more than 1.1x. Aqua Penn's liquidity benefits from the company's ability to absorb a high-impact, low-probability event with limited need for refinancing, its well-established relationships with banks, a satisfactory standing in the credit markets, and manageable debt maturities over the next few years.

Principal liquidity sources:

- FFO of about $230 million; and
- Assumed ongoing parental support for liquidity needs.

Principal liquidity uses:

- Debt maturities of about $25 million;
- Maintenance capital spending of about $335 million; and

- Dividends in line with the utility's capital structure.

## Group Rating Methodology

Under our group rating methodology, we assess Aqua Penn to be a core subsidiary of Aqua America, reflecting our view that Aqua Penn is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful at what it does, and contributes meaningfully to the group. There are no meaningful insulation measures in place that protect Aqua Penn from its parent. Therefore, our issuer credit rating (ICR) on Aqua Penn is in line with Aqua America's group credit profile of 'a+'.

## Outlook

The negative outlook for Aqua Penn reflects our expectation for weaker consolidated financial measures due to the company's on-going acquisition growth strategy, robust capital spending, and our expectation for higher current tax expense, which could possibly result in a ratings downgrade.

### Downside scenario

Without counter-measures such as additional equity, improved operating cash flows, or a deleveraging plan, we could lower our rating on Aqua Penn over the next 12 months if the company's consolidated FFO to debt remains consistently below 15%.

### Upside scenario

We could revise the outlook to stable if the consolidated FFO to debt remains above 15% on a consistent basis.

## Issue Ratings--Recovery Analysis

We assign recovery ratings to first mortgage bonds (FMBs) issued by U.S. utilities, which can result in issue ratings being notched above an issuer credit rating (ICR) on a utility depending on the rating category and the extent of the collateral coverage. Aqua Penn's FMBs benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of more than 1.5x supports a recovery rating of '1+' and an issue rating one notch above the ICR.

## Investor Presentation

AQUA

NYSE: **WTR**

**May 9, 2018**

## Forward Looking Statement

This presentation contains in addition to historical information, forward looking statements based on assumptions made by management regarding future circumstances over which the company may have little or no control, that involve risks, uncertainties and other factors that may cause actual results to be materially different from any future results expressed or implied by such forward-looking statements. These factors include, among others, the following: general economic and business conditions; weather conditions affecting customers' water usage or the company's cost of operations; costs arising from changes in regulations; regulatory treatment of rate increase requests; availability and cost of capital; the success of growth initiatives, including pending acquisitions; the ability to generate earnings from capital investment; and other factors discussed in our Form 10-K for the fiscal year ended December 31, 2017, which is on file with the SEC. We undertake no obligation to publicly update or revise any forward-looking statement.

Non-GAAP Reconciliation

For reconciliation of non-GAAP financial measures, see the Investor Relations section of the company's Web site at www.aquaamerica.com

## Company Overview

- Large multi-state water & wastewater company
- Proven growth model
- History of industry leading profitability
- Above average dividend growth

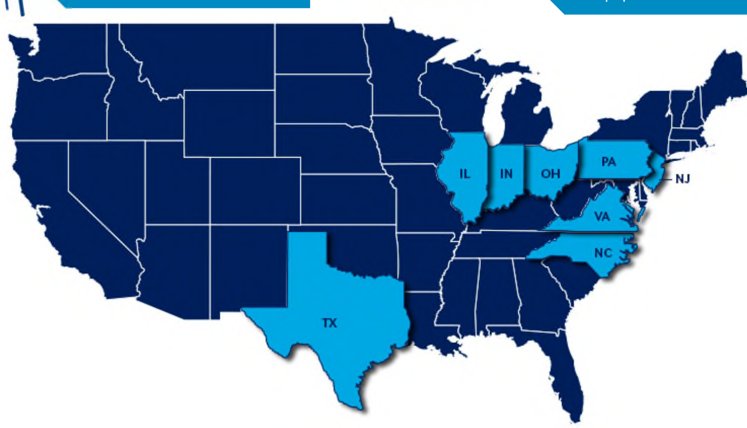
## U.S. Regulated Water and Wastewater Industry Overview

**Water**

- 53,000 systems in the U.S.
- 85% of U.S. population served by municipalities
- Aqua serves 1% of U.S. population

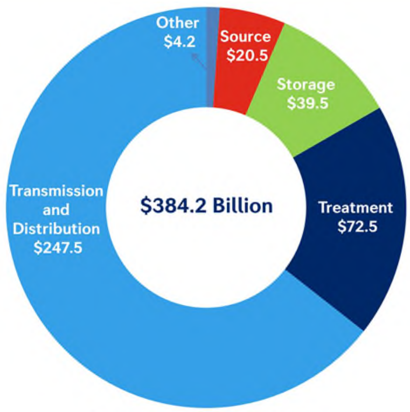
**Wastewater**

- 16,000 systems in the U.S.
- 97% of U.S. population served by municipalities
- Aqua serves 0.1% of U.S. population



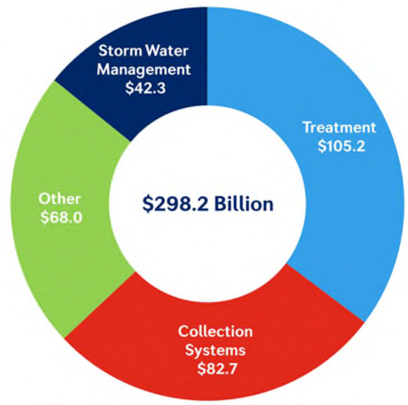
## EPA's Estimate of the National Need for Infrastructure Investment

### Water



Source: 2013 EPA Needs Survey

### Wastewater

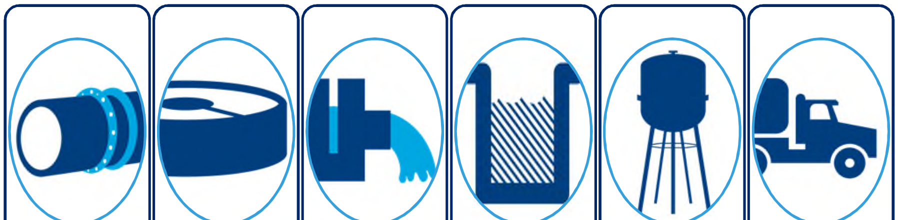


Source: 2013 ASCE Infrastructure Report Card

American Society of Civil Engineers Grade for Drinking Water and Wastewater Infrastructure = D

## Infrastructure Footprint

as of December 31, 2017



| + 12,825 Miles of Water Main | 21 Surface Water Filtration Plants | 187 Wastewater Treatment Plants | ~ 3,300 Wells | +866 Water Storage Tanks | ~1,100 Vehicles |
|---|---|---|---|---|---|

**$4.1 Billion in Total Rate Base**

# Mission: Protecting and Providing Earth's Most Essential Resource

## Sustainability

### Customers
- Compliance
- Near 100% Reliability
- Responsible Rate Increases
- Trusted Partner
- Top of Class Customer Service

### Communities
- Regulatory Innovation
- Civic Involvement
- Steward of Environment
- Rebuild Infrastructure
- Promote Economic Growth

### Employees
- Concern for Work Life Balance
- Ensure a Safe Working Environment
- Demonstrate Fair Pay / Benefits
- Growth and Development Opportunities
- Utilize Technology to Improve Efficiency
- Labor/ Mgmt. Partnership

### Shareholders
- Above Industry Average Long-term Growth
- Stable (Utility) Risk Profile
- Above Average Dividend Growth
- Buyback Opportunities

# 2018 First Quarter Highlights

## Acquisitions
- Three water and wastewater system acquisitions closed in Q1 including one in PA and two in Ohio

## Customer Growth
- Added 2,259 new customers
- 2-3% customer growth expected for the year

## Revenue Growth

## EPS Growth

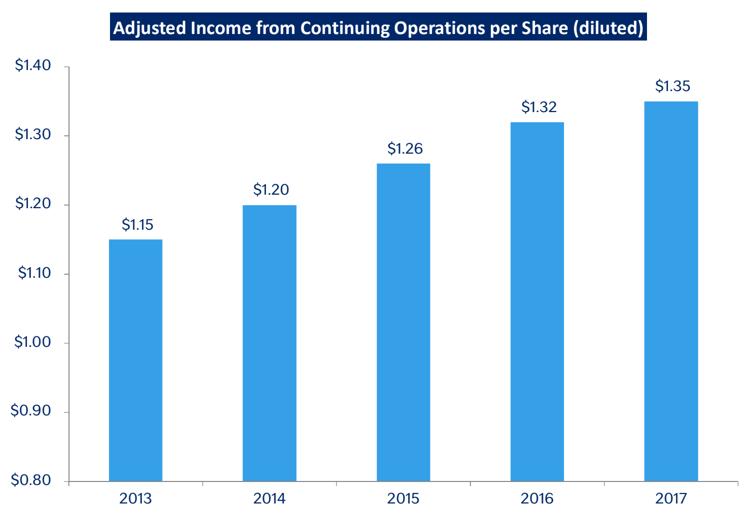
## 2018 First Quarter Financial Results

| In millions except per share | Q1 2018 | | Q1 2017 | Variance |
|---|---|---|---|---|
| **Revenue** | $194.3 | ▲ | $187.8 | 3.5% |
| **Operations and Maintenance Expense** | $73.9 | ▲ | $67.9 | 8.9% |
| **Net Income** | $50.8 | ▲ | $49.1 | 3.6% |
| **Net Income per Share** | $0.29 | ▲ | $0.28 | 3.6% |

■ Favorable Change

■ Unfavorable Change

## Growth in Income from Continuing Operations per Share

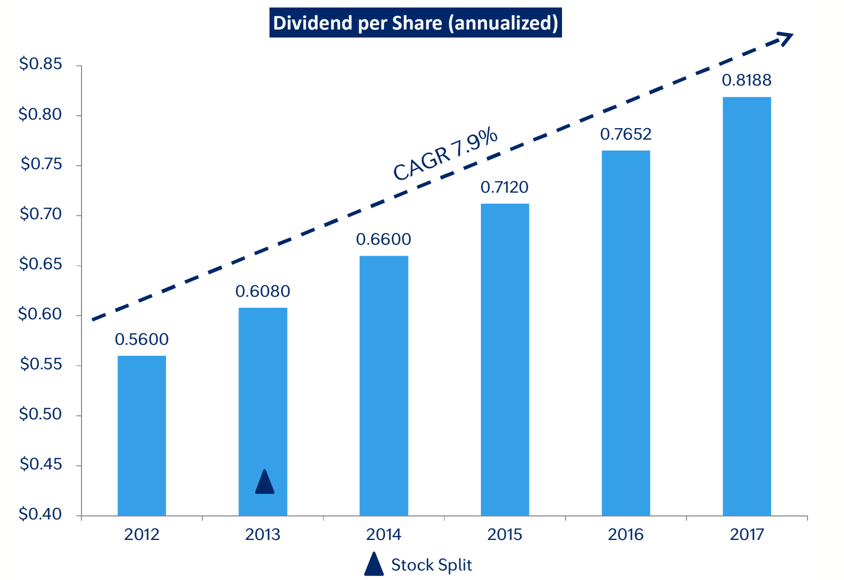


Source: Aqua Annual Reports

*2015: Income from Continuing Operations adjusted for Joint Venture Impairment Charge (a Non-GAAP Financial Measure)
2015 Income from Continuing Operations per Share was $1.14

# Dividend History

7.0% Increase to Annualized Dividend Rate Effective 9/1/2017



NYSE: WTR AQUA 11

# Tax Reform Implications

## 2017

- Write-off of $3.1M
  - Typically related to deferred comp, goodwill and deferred gains
- $303 million Deferred Income Tax reclassified to Regulatory Liability
- Ultimately be refunded to customers

## 2018

- Tax savings typically being deferred for future return to customers
- Exceptions
  - Negative impact in PA due to NOL status
  - Positive impact in Market Based and negotiated / divisions

NYSE: WTR AQUA 12

# Accounting for Tax Reform

Accrue 21% for Federal Income Tax @ 1/1/2018

Remaining 14%, will be recorded as:

| Reduction in Revenue (DR) | Recognition of Regulatory Liability (CR) |
|---|---|

Regulatory Liability

To be refunded to customers based on specific state requirements

# Change in Corporate Tax Rate

(Illustrative Example)

| | 35% Tax Rate | 21% Tax Rate |
|---|---|---|
| Revenue | $1.00 | $.88 |
| Expenses | $(0.35) | $(0.35) |
| Pre-Tax Income | $0.65 | $0.53 |
| *Federal Tax Rate* | *35%* | *21%* |
| Federal Income Tax | $(0.23) | $(0.11) |
| **Net Income** | **$0.42** | **$0.42** |

## Taxability of Capital Contributions (CAC / CIAC)

- Estimated $27 Million in CAC/CIAC Additions
- Taxes estimated to be $6 million
- Balance Sheet only
- Some states will recognize deferred tax asset in rate base

## Key Benefits

- Reduces rates / bills without impacting profitability
- Helps comparability to municipal bills
- Reduces the future increases required related to Capital additions
- 7:1 projects become 8:1 projects
- Permits more system improvements in a typical 5% infrastructure surcharge

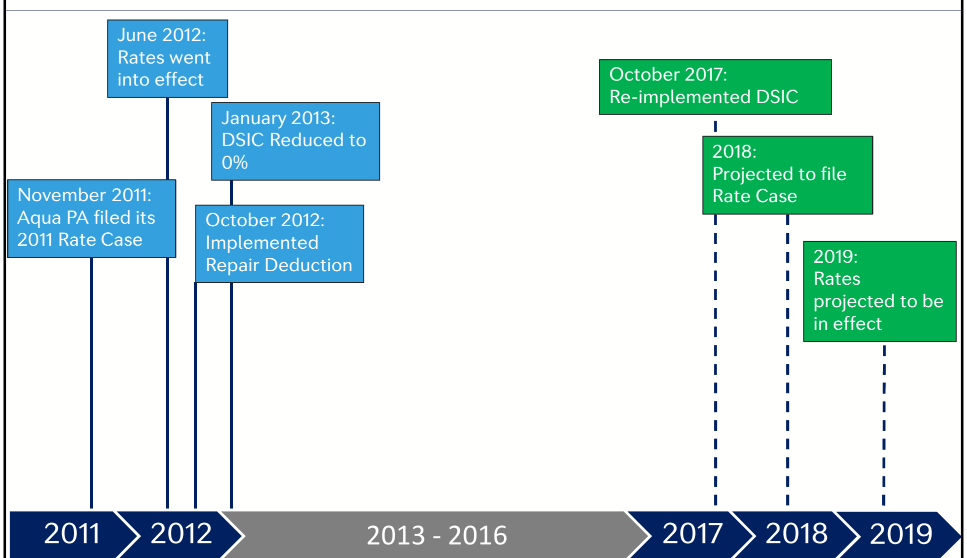
## PA Rate Case Summary

Timeframe:
- File: Summer 2018
- Complete: Spring 2019

Case Summary/Issues:
- First case filed in 7 years
- Over $2 billion of capital
- Consolidated Water & WW
- Over 20 Acquisitions
- First filing using Fully Projected Future Test Year
- Tax Act and Tax Repair

| Year | PA CAPX ($000's) |
|---|---|
| 2012 | $129,923 |
| 2013 | $212,721 |
| 2014 | $214,155 |
| 2015 | $248,354 |
| 2016 | $251,373 |
| 2017 | $308,006 |
| '18 and '19 (est.) | $650,000 |
| **Total** | **$2,014,532** |

## PA Rate Case Summary



# Rate Activity

## 2018 Completed Rate Cases and Surcharges

- Base rate cases or surcharges completed in IL, IN NJ, NC, OH, PA, and TX
- $23.6 million in additional annualized revenue

## 2018 Pending Rate Cases and Surcharges

- Base rate cases or surcharges in IN, NC, OH, and VA with requested annualized revenue increase of $8.6 million

Additional rate activity information provided in Appendix

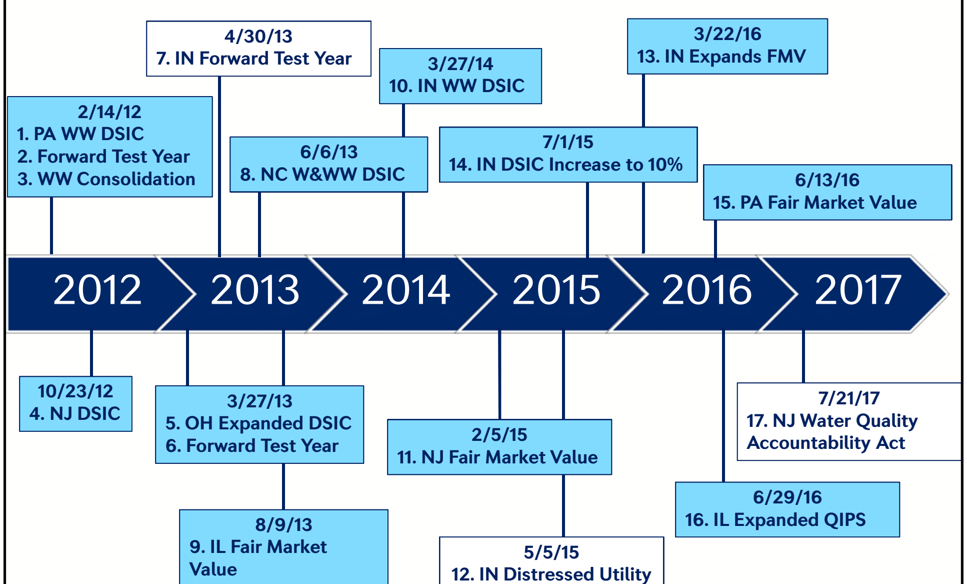
| State | Allowed Surcharge |
|---|---|
| IL | 2.5% Avg. Annual Increase |
| IN | 10% |
| NC | 5% |
| NJ** | 5% |
| OH | 12.75% water<br>9% wastewater |
| PA | 7.5% water<br>5% wastewater |

* 16 additional states have water infrastructure surcharges
** Water only

## Water & Wastewater Regulatory Trends



# Aqua America Growth Strategy

**Core Competencies**

- Infrastructure Investment (pipes, plants, etc.)
- Regulatory Affairs
- Operational Excellence

**Leads To**

**Three-Pronged Growth Strategy**

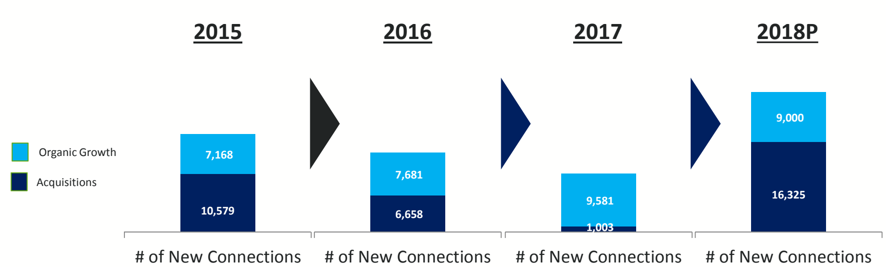
**Municipal Initiative**
- Driver of growing our foundational water/wastewater business
- Our primary focus today

**Strategic M&A**
- Opportunistic pursuit of large, regulated utility/infrastructure targets

**MBAs**
- Complementary to our regulated business
- Capitalizes on broader infrastructure renewal

# Historical Growth Performance

***If we include our 2018 projections, from 2015 to 2018, we will average a total of ~17,000 new customers per year , with an average of ~8,600 from acquisitions.***



| | 2015 | 2016 | 2017 | 2018P |
|---|---|---|---|---|
| **Total New:** | 17,747 | 14,399 | 10,584 | 25,325 |
| **EOY Total Aqua:** | 957,866 | 972,265 | 982,849 | 1,008,174 |
| **YoY Growth %:** | 1.9% | 1.5% | 1.1% | 2.6% |

**Two transactions that were expected to close in 2017 shifted to 2018.**

## 2018 Municipal Acquisition Activity

*We have six municipal acquisitions that are signed and slated to close in 2018.*

| Acquisition[1] | Type | Approx. Number of Customers | Approx. Purchase Price ($000s) |
|---|---|---|---|
| *Expected to Close in 2018* | | | |
| System A | WW | 5,400 | $75,100 |
| System B | WW | 2,100 | $29,500 |
| System D | W | 600 | $3,600 |
| System E | W / WW | 2,987 | $12,300 |
| System F | WW | 3,838 | $25,200 |
| System G | WW | 1,400 | $5,000 |
| **Total** | | **16,325** | **$150,700** |

1) System C (Tobyhanna, PA) closed in 2017

## 2018 Guidance

**Earnings**
- Full-year earnings per share between $1.37 – $1.42

**Capex**
- Infrastructure investment of approximately $500 million in 2018
- Infrastructure investment of approximately $1.4 billion planned through 2020 in existing operations
- Rate base growth of approximately 7%

**Rate Activity**
- Aqua Pennsylvania, files a rate case in 2018 with resolution expected in 2019

**Customer Growth**
- Total customer growth of between 2 to 3%

## What Aqua Represents to the Investor

- One of the largest publicly traded water and wastewater companies, ideally positioned to address the nation's significant infrastructure needs
- A balanced growth & income investment with decades of strong dividend growth and performance
- Strategic approach to growth
- Strong Balance Sheet

# MANAGEMENT DISCUSSION SECTION

**Operator**: Good day and welcome to Aqua America's 2017 Earnings Guidance Conference Call. Today's conference is being recorded. At this time, I would like to turn the conference over to Brian Dingerdissen, Vice President, Chief of Staff & Investor Relations. Please go ahead, sir.

## Brian Dingerdissen
*Vice President, Chief of Staff & Investor Relations, Aqua America, Inc.*

Thank you, Silvia. Good morning, everyone and thank you for joining Aqua America's 2017 earnings guidance conference call. If you did not receive a copy of the press release, you can find it by visiting the Investor Relations section of our website at aquaamerica.com. The slides that we will be referencing can be found on our website. There will also be a webcast of this event available on our site.

As a reminder, some of the matters discussed during this call may include forward-looking statements that involve risk, uncertainties and other factors that may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. Please refer to our most recent 10-Q, 10-K and other SEC filings for a description of such risk and uncertainties.

During the course of this call, reference may be made to certain non-GAAP financial measures. A reconciliation of these non-GAAP to GAAP financial measures is posted in the Investor Relations section of the company's website.

Presenting today is Chris Franklin, Aqua America's Chief Executive Officer and Dave Smeltzer, the company's Chief Financial Officer. After the presentation, we will open the call up for questions.

At this time, I'd like to pass it over to Chris Franklin.

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Hey, thanks Brian, and good morning, everyone and Happy New Year. Thanks for joining us today. On today's call, I'll start by asking Dave Smeltzer to recap the guidance that we provided for 2016 and he'll go over some of the potential tax reform implications as they may affect the company. After that I'm going to provide an update on a few things that we thought might be of interest to you, then we'll conclude with an overview of our 2017 guidance which we released last night – I'm sorry earlier today with the press release. And lastly, we'll open it up and take any of your questions.

So that's it, Dave, I'll hand it over to you.

## David P. Smeltzer

*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

Thanks Chris, and good morning, everyone. Flipping to the next slide, I'll start with review of our 2016 guidance. We're affirming our earnings, customer growth, CapEx and expense guidance for 2016. We still expect the full year earnings per share to be in the $1.30 to $1.35 range we provided at the beginning of the year and probably close to the middle of that range, if not, below that middle as we discussed in our third quarter earnings call.

We already announced our customer growth of 1.6% based on 19 deals, including two municipal transactions. We expect that the final tally of our CapEx will reflect about $380 million in infrastructure investments in 2016, resulting in more than $1.1 billion of anticipated investments through 2018. Those investments we would anticipate the rate base growth in the 6% to 7% range. And lastly, same-system O&M expense increase, we're expecting in the 1% to 2% range for the full year.

So turning to the next slide, I'd like to talk about the potential tax reform changes, and how those might affect our business. But first, I'd like to note that, as a regulated utility, income tax expenses are largely a pass-through matter for us. So in the long run, there is no real impact to our profitability only to our customer rates. There could be some rate base implications or some short-term implications, and we'll talk about this. And although it's in a very early stage to comment on this, prior to the first 100 days of the new administration or even the inauguration for that matter, you can appreciate that we thought it was important to give you a few thoughts on how potential tax reform could impact our company.

So, let me outline the primary possibilities. First, we hear a lot about the potential for a tax rate reduction. And a tax rate reduction would be good typically, it would increase company's income, but in our regulated arena, the customers would get the benefit of that tax rate reduction immediately and they would either get it through a reset of rates, coincident with the timing of the tax rate reduction or more typically with us continuing to record taxes at the higher rate and defer that difference into a regulatory liability we paid back to our customers at a later date.

Second, that reduction in tax rate would create what we call excess deferred taxes. Taxes that were previously put up in the books at the 35% statutory rate. And upon reversal, we'll reverse at a lower rate, therefore leaving some liabilities stranded on the balance sheet. And so upon passage of a new tax reform act, we would typically re-class those excess deferred taxes to a regulatory liability, again to be paid back to our customers in the context of future rate proceedings.

Third, we're in a little bit of a unique situation, in that we still continue to record our repair tax deductions, which do flow through to net income. And so in that instance, a reduction of the tax rate could actually reduce the benefit of the repair tax and possibly cause an acceleration of our PA rate filing.

And then lastly talk about increasing tax deductions. And there will be possibility of deducting our capital expenditures and those sorts of things that could in the long-term slow our rate base growth which we've talked about as 6% to 7% in this period, just because of the increased deferred taxes associated with those kinds of deduction.

So with that as a quick overview, I'll hand the call back to Chris, who will provide an update on a few things we believe you'll find interesting. Chris?

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Hey, thanks, Dave. I thought, maybe we spend a couple of minutes updating you on the divestiture of our market based activities. And then we'll look at the customer growth that we had at the end of 2016.

Our effort to divest of our subscale market-based activities continues. We hope that we have concluded that process in 2016, but we still have two small businesses remaining. One is our cross-connection business and the other one is our training and field services business. We plan to close this cross-connection business even as early as this week, but in the coming days. And the other small business we are head out to some interested parties who are reviewing it now.

The one primary market-based activity that we plan to keep is the insurance product. You will recall, our partnership with HomeServe. That's the insurance that protects our service lines between our mains in the customers homes. And you will recall that we receive a royalty on each of the contracts. So we'll keep that and a limited number of O&M contracts that are relatively close to our current operations, and that together contribute in a small way to earnings.

Now, despite our divestiture of these small businesses, we do continue to evaluate market-based opportunities, which are closely related to our core. And if we find something that's the right scale, the right risk and the right profitability profile, we would consider expanding our market-based portfolio. And that being said, we don't see this segment of the company becoming a large component of Aqua America. We've discussed that with many of you over time. But we continue to spend our primary focus and resources on growing the regulated water and wastewater business, that's where we see the greatest opportunity at this point.

Now, last week we put a press release out that wrapped-up our 2016 customer growth efforts. The slide here summarizes what we've completed. We've invested more than $22 million in acquiring water and wastewater systems throughout the year. And also in 2016, we acquired 13 water, 6 wastewater systems and that includes two municipal deals that would be our East Cameron and our Emlenton, both of those deals in Pennsylvania. So, coupled with organic growth, the company increased the customer base by 1.6%, which is right within the range that we put out as our expectation.

I think it's important to note that the majority of these deals still don't reflect that targeted size range that we've discussed. That's the 2,500 to 25,000 customer range. The majority of the deals we closed in 2016 were initiated before we initiated or put our refocus strategy on larger opportunities in place. The work that we began when I took over in 2015 and Dan Schuller joined us continues today and we'll continue to focus on larger opportunities. We believe that this refocus strategy is working and we'll talk about it in just a minute when we talk about our 2017 growth activities. So I'll say, we remain very optimistic about the prospect of growth in the water and wastewater sectors.

And I want to point out that, we've just not seen this level of activity really ever before, municipals looking to sell. Importantly, this heightened activity is primarily in states where fair market value legislation has passed, and we'll discuss this in more detail in a minute in relation to our 2017 guidance. But given this optimism and the activity level in the regulated water, wastewater space, again, we're deploying the vast majority of our resources right there.

So, let's talk a little bit about 2017. I'm on the guidance slide, slide 13. This slide summarizes our expectations for earnings per share, operating expenses, CapEx, rate activity and customer growth for 2017. We're expecting full-year earnings per share to be in the range of $1.34 to $1.39. And I'll continue to remind you, as Dave has many times, if we continue over-earning in several of our states which does impact our ability to file for rates.

Now on a same-store basis, we expect O&M to grow only about 1% to 2% for the full year. And as always, we remain laser-focused on minimizing our O&M expenses and certainly 2017 will be no exception. We expect to invest another $450 million in infrastructure in 2017. And by the way, that will be a record spend for us in terms of CapEx in a year, and we'll spend more than $1.2 billion of CapEx through 2019. And this is really intended to improve and strengthen the infrastructure in our existing systems that we already own. As you know these investments allow us to provide the high level of service throughout our company's footprint.

But in addition, we expect incremental capital expenditures to make improvements on newly acquired systems and to purchase newly acquired systems. So that would be above and beyond the $1.2 billion in CapEx that we project in our budget. We expect to grow rate base in the range of 6% to 7%. Again a reminder there that, we said many times that earnings temporarily will lag rate base growth given our over-earning in many of our states.

Now, regarding our Pennsylvania rate activities. This is a constant discussion, and we've discussed it previously in all of our calls to keep you updated. We expect to file an infrastructure charge otherwise known as a DSIC in 2017 this year, followed by a full rate filing next year 2018, and then we'll have resolution. We expect resolution of that full rate case in 2019. Now Dave mentioned a few minutes ago, change to the tax policy obviously potentially impact the timing of any of those activities.

And lastly, year-over-year we're expecting our total customer growth rate in the range of 1.5% to 2%, and I'll explain on that in just a moment. I just can't say enough times that the fair market value legislation continue to generate just a huge interest and, Dave and I sit here as 20 plus year veterans at the company, I think we can say, we've never seen this level of activity before. This legislation is really working to drive municipal water and wastewater to consider privatization. And under Dan's leadership, we vetted an unprecedented level of opportunities in 2016.

But in fact, last year we – about 46 potential deals came before the Investment Committee. And out of the 46 deals, 35 of them progressed to a decision. We lost four to competition, and we won 31 of them. 19 of the 31 closed, 10 are in process and 2 were lost in referendums. So the remainder, a couple died and several are still in the pipeline. Our Investment Committee maintains a really strict discipline based on a framework that we believe provides value to our customers and to our shareholders.

And to put this 2017 activity in perspective, this slide, we already have four municipal systems under agreement, which are represented here as Systems A through D on the chart. Combined they represented over $110 million of purchase price and nearly 9,000 customers. I think it's important to point out that we think about the two in terms of equivalent dwelling units, so it'll be – the 9,000 customers would be equal to 12,000 EDUs. We say that because when you buy some of these systems, they have large apartment complexes or particularly large users.

So customers don't always tell the full story. All of these deals are expected to close in 2017. So we're off to a great start.

In addition to the four municipal deals, we also have a couple of investor-owned utilities under agreement. These are smaller ones. And again, leftover from our backlog before we were focused on the 2,500 to 25,000. Additionally, we're working on our top 70 municipal targets, which represent approximately 390,000 customers. Of course, we're not going to close all these transactions or [indiscernible] (16:23) the transactions, but we think if we win even our fair share of these, it will generate an attractive level of growth.

Now, the next chart on 15 really helps to visualize this in a bar graph. This represents our top 70 municipal systems that we're targeting. You will notice that 92% of the targeted customers here come from water and wastewater systems that serve more than 2,500 customers. So, our strategy is in place and focused. In 2016, we started to make a somewhat different approach to deals. In some instances and in some states, we're making unsolicited offers to municipalities to try to encourage a sale process to begin.

We focused on municipals where we control it via partner, and in many cases be the white knight to help them with an economic situation or a compliance problem that they're experiencing. So we try to come in with – obviously, we want to come in to be long-term partners. Some of these seem to be working and I'll tell you, as they progress, we'll certainly keep you updated on that part of our strategy.

So, in closing, let me just reiterate our optimism about the opportunities we see in the municipal at water and wastewater space, again largely driven by this fair market value legislation. And I would suggest you that we will see more states adopting similar approaches or similar legislation as the industry works together in the coming months and years.

And with that, I'll conclude my remarks and open the phone call up for questions. Thanks.

# QUESTION AND ANSWER SECTION

**Operator**: Thank you. [Operator Instructions] We'll go first to Ryan Connors with Boenning & Scattergood.

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

Good morning. Thanks for hosting the call this morning.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Hey, Ryan, how are you?

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

I'm doing well. Thanks, Chris. So, I guess, I do want to talk more about this fair value legislation and obviously a big catalyst for you and – but it's a brand new concept and I wonder if you could talk about the evolution of the system and the process it remains to be seen, how exactly this gets implemented, I'm not even sure that any true fair value deals have closed yet at least in Pennsylvania.

So can you just talk to us about any moving parts that are left out there in terms of how this is implemented whether it would be in terms of how the following – the subsequent rate cases will be treated, unified tariffs, any of the above? And just any potential surprises, plus or minus in terms of how the implementation and the complexities of this play out?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah. All good questions. And I think when your – your questions are primarily focused in Pennsylvania, Ryan because...

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

Yep.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

...in Illinois, as you know we've had some go through the commission and it seems to be working well out there. As a matter of fact, we're talking about a reauthorization of that legislation in Illinois. Let's focus on Pennsylvania for a moment. You're exactly right that this just went through the commission – I'm sorry, through the legislature last March. And so, as it flown through the process, obviously the deal started to get closed in mid-to-late 2016 and have not yet gone through the regulatory process.

We would expect those to begin through the process probably by the end of the first quarter here in this year. And as it's typically the case with new legislation or regulation, we need to figure things out, work together with regulators to make sure that they go smoothly. I don't think given the continuous conversation in Harrisburg about this legislation. And remember we have Act 11 and Act 12 both relatively new, the other one relates to subsidization of wastewater customers by the water customers in the state.

And so, how those work together, those two acts work together and how they are actually implemented and worked through rate cases, yet to be seen. I don't want to presuppose the view of regulators, but we continue to have conversation with staff and commissioners about how to implement and how this will work, and I think this team is optimistic about the overall use and prospects of moving it through the legislature. And one of the absolutes, Ryan, that I'll suggest here is that you have an appraisal done. And so that appraisal is done by an outside engineering firm and that's the basis for a lot of what we consider rate base. So, assuming, that that works well, the building base is strong. Dave, I don't know if you have any additional thoughts.

---

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*
A

No, that's it. And I agree with Chris that we definitely see it as a catalyst and more municipalities coming to the table to talk to us.

---

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

And then as a follow-on to that. You talked on the last earnings call, Chris, about the fact that that there is some elements – at least in a competitive state like Pennsylvania, there is some element of competition and upward bias on pricing, because when attractive ones come up for sale. Can you talk about how you're mitigating that in terms of your discipline and whether there's certain hurdle rates you have in place or what have you, what is your discipline in terms of valuation on this?

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah. We sat down and very clearly laid out guidelines and that's the discussion we had with our board, Ryan, about how we see these deals and what our hurdles are to achieve both short-term and long-term, and obviously each one of those deals is slightly different, they have a different growth profile, some of them are growing, some of them are basically stacked in terms of their growth. And so, the valuation like you do any deal varies and it's specific to any individual deal. But we've got written and firm guidelines that we adhere to. And in the case where we believe it's truly a strategic deal, and we want to stretch those guidelines, then that's a real interesting discussion at our – not only our internal Investment Committee, but also at our Board Subcommittee on investment as well. So we believe that we'll be very disciplined.

Now, with regard to competition. Yeah, there's no question, there's going to be competition. And remember, there is a couple of buckets here to consider when you do these. If you pay more than that appraised value or that rate base, that goes to shareholders. I'm certain that [ph] American (24:02) must as well be aware of that as a guideline as well, and clearly, we like to buy these systems at near to rate base as we can. Having said that, it is market value and we have to evaluate each one on its own merits.

---

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

Got it. And then if I just sneak one more in on this topic. So I think it is important. One of the things I think is interesting about these municipal deals that come out tend to be either in areas that are having pension issues or obviously infrastructure issues and fiscal issues, and sometimes have a tendency to be in pockets of the state that are depressed, either economically or demographically or what not. And one of the hallmarks of Aqua historically I think has kind of been that your core base around your headquarters and elsewhere is not that, it's a pretty affluent steady economic region. And so I wonder if you could talk about the risk of a negative evolution of the portfolio away from that real solid sound economic status in your traditional stronghold into more of a type of region that might have a different profile and how that impacts customer growth and risk, as it relates to unions and different things like that?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah. So we gave that a lot of thought. Obviously, we are interested in being a solution. We're interested in growing. But it's also got to be of the right match with the right customer base. And as illustration, and I won't use the name of the system, but we had a system come before us in 2016, fairly large in a key state and we evaluated it and would have been meaningful to us as a company in terms of rate base growth. As we did the evaluation and determined that the average household income in that location was in the range of $30,000 a year and that we would have had to, in order to fix and recover our investment, we would have rates that surpassed $100 a month. And we did a lot of soul searching on that as a team and ended up walking away from that deal, never bit, never put a proposal in, because we just didn't think it was affordable for those customers.

And we're going to continue to make those decisions, because we think it's the right thing to do. And while we have a level of discipline on what we need to earn, we also have a level of discipline and commitment to the customers we already serve. I mean let's face it Ryan, you know, you talk to a lot of regulators, we've spent many, many years earning a reputation in the state capital with our regulators and we're not about to jeopardize those reputations based on doing bad deals. So that's just one illustration.

Ryan Michael Connors
*Analyst, Boenning & Scattergood, Inc. (Broker)*
Q

Yeah. Great. Well, thanks again for hosting the call, very helpful.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

You bet.

**Operator**: [Operator Instructions] We'll go next to Tyler Frank with Robert Baird (sic) [Robert W. Baird] (27:23).

Tyler Charles Frank
*Analyst, Robert W. Baird & Co., Inc. (Private Wealth Management)*
Q

Hi, guys. Thanks for taking the question. Just wanted to focus a little bit on the amount of CapEx you're going to be doing next year since that will be a record. What do you need to do to make sure that you're able to hit your CapEx target, I guess from both a projects planning standpoint, and then how should we think about needs for hiring new employees, and getting people trained et cetera on that front, just that we can get comfortable with the amount of risk that there might be to that level of CapEx getting executed?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah, yeah. It's a good question Tyler. We are very confident that we can achieve it. We think very carefully about the project mix and how to achieve that CapEx spend before we put the budget together or having to put the budget together. It's largely spread over the eight states, and we have increasing spend in states like North

Carolina and in Texas, where we have, what I'll call, compliance, it's really not compliant, because the secondary water quality issues in places like North Carolina where we meet all of the primary standards, but we have some discolored water or taste issues that customers wants smoothed out. So we ramped up spending in a couple of states. Pennsylvania, largest, again our largest customer base as well.

The way we deploy capital, particularly in main replacement work is largely through ramping up of contractors, and then ramping down. We don't typically alter our internal customer count – or I'm sorry, employee count to achieve our capital numbers. Therefore, we don't just ramp up and lay off, we keep a steady workforce internally. But the team that we have doing our planning, and the execution really of this capital spend is a team who have been long in place. Bill Ross who is our Chief Engineer, Rick Fox, who is our Chief Operating Officer have been doing this work for a very long time, and both are very confident in our ability to spend and invest that CapEx in the most prudent way, because I'll point out Tyler, we don't take chances on prudency either. We've got conversations going on regularly with regulators to make sure that the spend and the items we're spending on are the best and most prudent use of our capital dollars. So I'll just leave you with the fact that we're very confident in the spend.

---

Tyler Charles Frank
*Analyst, Robert W. Baird & Co., Inc. (Private Wealth Management)*

Q

Okay. Great. Thank you. And then just a follow-up on the acquisition side of things. Can you give us a sense for, you said you went after 30 – 31 deals last year. How many systems did you initially review and then end up with that 31 number, I mean is that 31 out of a 100 or can you give us some sort of range for sort of how you guys go about that selection process where [indiscernible] (30:38) pursue? And then, can you provide some commentary on things you've seen in terms of the amount of competition that's in bidding for your prospects? Have you seen that ramp up and what's the average number of competing bids, when you guys go after a new acquisition?

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

A

Yes. Yes. So a little insight on how we think about this. One, I described to you on one slide about our pipeline of – we'll call it 390,000 customers in our top 70 targets. So we distilled within our eight states, the possibilities down to 70 and obviously we've got others behind that 70. But those are 70 highest targets and so they are the ones that meet these size ranges in large part.

And then, as we think about distilling in further we look at what's got a compliance issue, what's got an economic issue, who might have pension concerns and we look at why the municipals might be interested in exiting the business. And then we start to look at the overlay of the political situation, interest and all those sorts of things. And so, multi-layers, but at the end of the day, to answer your very specific question, we had 46 deals come before the IC, the Investment Committee last year. But there were a lot more, some of them we didn't even bring to the IC. We literally – they just didn't hit the target for us.

And then as you think about starting with those 46, and 35 of them progressed through [ph] the natural (32:13) decision at the IC. But as you might imagine, even with smaller deals, every one of these, I'll say has heir right. There's issues with them. They're not leaving the business because they're, in most cases humming along optimally. So we've got to do our due diligence and our valuation is not only on the financial side, but on the operational side. So to vet this many deals is an enormous lift for the team. And while we're excited and pleased with the volume, what we like to see is an increasing number, then coming to closing.

Now, with regard to your question about competition, one of the reasons we're focused on what I'll call is middle market, 2,500 customers to 25,000 customers is because there's less competition from, I'll call financial buyers, right. There are a little bit under that their target for size. So, largely we find in the states where American is as well, we find American as the chief competition and we compete together on most deals. But we don't see a lot of other competition. In some cases, we see other municipals trying to grow and the assumption there, I guess they want to bring more economies of scale to bear. But typically there is not a lot of competition from other municipals. So, I would say steady competition and strong competition, but not a lot of other players competing. Hopefully that answers your question.

---

Tyler Charles Frank
*Analyst, Robert W. Baird & Co., Inc. (Private Wealth Management)*
Q

Excellent. Thank you.

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

You bet.

---

**Operator**: We'll go next to Angie Storozynski with Macquarie.

---

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

Thank you. So, first on 2017 guidance, so I understand that you are over-earning particularly in Pennsylvania, hence there is a lag between the rate base growth and the earnings growth. So the rate case will be filed in 2018, so should we assume that 2018 is also showing this significant lag in earnings versus rate base growth?

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

I think it's fair to say that the same lag that we're going to experience in 2017 would carry through 2018.

---

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

Okay. And so it's – I mean just so I understand, so you're basically trying to invest in your rate base in order to right size the realized ROE, and only then you'll be filing rate cases, is that just a fair summary?

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

I think that's well said.

---

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

Okay.

---

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

We'll invest and as we ramp-up that investment, obviously we'll bring our return on equity down and ultimately beyond that the level where we can file a DSIC and a case.

---

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

Okay. Then maybe I missed it, but could you give us an update about your views on potential expansion beyond the other water sector, given where your premium now is versus electrics or water utilities on – or like gas utilities on a PE basis?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah. And see I think what I've said on another call is that, well gas is interesting to us, given the similarities between the vast amounts of pipe being installed in gas it will be ceased. It's not a primary focus of ours. The vast majority of our resources and our primary focuses are around the growth of the water and wastewater business and it will continue to be. And so, we just are not out there with our line in the pond, looking for simply gas LDCs. You hit it right. I mean there are market dynamics that would suggest that that deal would have to be the right deal for us to make it worthwhile.

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

And just one last question going back to 2018. So if there is a corporate tax code change, which would remove the repair tax deduction from the code and you're still awaiting a filing of a Pennsylvania rate case. I mean, should we have actually a very weak 2018 given that the corporate tax rate would actually go up for you guys?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Well, that's a good question, Angie, and it's one we've talked about extensively when we started talking about potential tax reforms. And I've talked to all of my experts on this matter, and there is general concurrence that the repair tax will not go away. In fact, the expectation is that any new tax laws will allow more capital to be written off rather than less. And so, that won't change our repair status, because still only specific capital will qualify for the repair flow-through method, but we don't see a risk in taking away that deduction. The risk that we do see is, that deduction could take place at a lower tax rate in the future and that's what I said during the call could cause us to consider accelerating the rate case to a sooner date.

Angie Storozynski
*Analyst, Macquarie Capital (USA), Inc.*
Q

Okay. Understood. Thank you.

**Operator**: And we have no further questions in the queue at this time. I would like to turn the conference back over to Mr. Chris Franklin for any additional or closing remarks.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

Thank you very much for joining us everyone. As always, if you've got follow up call or questions, don't hesitate to make those calls. In the meantime, thanks for joining us and Happy New Year.

**Operator**: And that concludes today's conference. We thank you for your participation.

17-Jan-2017

# Aqua America, Inc. (WTR)

FY 2017 Guidance Call

# CORPORATE PARTICIPANTS

Brian Dingerdissen
*Vice President, Chief of Staff & Investor Relations, Aqua America, Inc.*

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

# MANAGEMENT DISCUSSION SECTION

**Operator**: Good day and welcome to Aqua America's 2017 Earnings Guidance Conference Call. Today's conference is being recorded.

At this time, I would like to turn the conference over to Brian Dingerdissen, Vice President, Chief of Staff & Investor Relations. Please go ahead, sir.

## Brian Dingerdissen
*Vice President, Chief of Staff & Investor Relations, Aqua America, Inc.*

Thank you, [ph] Sylvia. Good morning, everyone and thank you for joining Aqua America's 2017 earnings conference call – earnings guidance conference call. If you did not receive a copy of the press release, you can find it by visiting the Investor Relations section of our website at aquaamerica.com. The slides that we'll be referencing can be found on our website. There will also be a webcast of this event available on our site.

As a reminder, some of the matters discussed during this call may include forward-looking statements that involve risk, uncertainties and other factors that may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. Please refer to our most recent 10-Q, 10-K and other SEC filings for a description of such risk and uncertainties.

During the course of this call, reference may be made to certain non-GAAP financial measures. A reconciliation of these non-GAAP to GAAP financial measures is posted in the Investor Relations section of the company's website.

Presenting today is Chris Franklin, Aqua America's Chief Executive Officer and Dave Smeltzer, the Company's Chief Financial Officer. After the presentation, we will open the call up for questions.

At this time, I'd like to pass it over to Chris Franklin.

## Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

Hey, thanks Brian, and good morning, everyone and Happy New Year. Thanks for joining us today. On today's call, I'll start by asking Dave Smeltzer to recap the guidance we provided for 2016 and he'll go over some of the potential tax reform implications as they may affect the company. After that, I'm going to provide an update on a few things that we thought might be of interest to you, then we'll conclude with an overview of our 2017 guidance which we released last night, I'm sorry earlier today with a press release.

And lastly, we'll open it up and take any of your questions.

With that said, Dave, I'll hand it over to you.

## David P. Smeltzer

*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

Thanks Chris, and good morning, everyone. Shifting to the next slide, I'll start with the review of our 2016 guidance. We're affirming our earnings, customer growth, CapEx and expense guidance for 2016. We still expect the full year earnings per share to be in the $1.30 to $1.35 range. We provided at the beginning in the year and probably close to middle of that range, if not below that middle as we discussed in our third quarter earnings call.

We already announced our customer growth of 1.6% based on 19 deals including two municipal transactions. We expect that the final tally of our CapEx will reflect about $380 million in infrastructure investments in 2016, resulting in more than $1.1 billion of anticipated investments through 2018. Those investments, we would anticipate a rate base growth of in the 6% to 7% range. And lastly, same-system O&M expense increased, and we're expecting in the 1% to 2% range for the full year.

So turning to the next slide, I'd like to talk about the potential tax reform changes and how those might affect our business. But first, I'd like to note that as a regulated utility, income tax expenses are largely a pass through matter for us. So in the long run, there is no real impact to our profitability only to our customer rates. There could be some rate base implications or some short-term implications and we'll talk about this.

And although, it's at a very early stage to comment on this, prior to the first 100 days of the new administration or even the inauguration for that matter. You can appreciate that, we thought it was important to give you a few thoughts on how potential tax reform could impact our company.

So let me outline the primary possibilities. First, we hear a lot about the potential for a tax rate reduction. And tax rate reduction would be good, typically it would increase a company's income, but in our regulated arena, the customers would get the benefit of that tax rate reduction immediately. And they would either get it through a reset of rates, coincident with the timing of the tax rate reduction or more typically with us continuing to record taxes at the higher rate and defer that difference into a regulatory liability to be paid back to our customers at a later date.

Second, that reduction in tax rate would create what we call excess deferred taxes. Taxes that were previously put up in the books at the 35% statutory rate. And upon reversal, we'll reverse at a lower rate, therefore leaving some liabilities stranded on the balance sheet. And so upon passage of a new tax reform act we would typically re-class those excess deferred taxes to a regulatory liability, again to be paid back to our customers in the context of future rate proceedings.

Third, we're in a little bit of a unique situation, in that we still continue to record our repair tax deductions, which do flow though to net income. And so in that instance, a reduction of the tax rate could actually reduce the benefit of the repair tax and possibly cause an acceleration of our PA rate filing.

And then lastly, we talk about increasing tax deductions. And – there will be possibility of deducting capital expenditures and those sorts of things that could in the long-term slower rate base growth which we've been talked about is 6% to 7% in this period, just because of the increased differed taxes associated with those kinds of deduction.

So with that as a quick overview, I'll hand the call back to Chris, who will provide an update on a few things we believe you'll find interesting. Chris?

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Hey, thanks, Dave. I thought, maybe we spend a couple of minutes updating you on the divestiture of our market-based activities. And then we'll look at the customer growth we had at the end of 2016. Our effort to divest of our subscale market-based activities continues. We'd hope that we have concluded that process in 2016 but we still have two some small businesses remaining. One is our cross-connection business and the other one is our training and field services business.

We plan to close this cross-connection business even as earlier this week, but in the coming days. And the other small business we are [ph] head (00:07:19) out to some interested parties who are reviewing it now. The one primary market-based activity, we plan to keep is the insurance product you will recall, our partnership with HomeServe, has the insurance that protects our service lines between our mains in the customers homes. And you will recall that we receive a royalty on each of the contracts.

So we'll keep that and a limited number of O&M contracts that are relatively close to our current operations. And that together contribute in a small way to earnings. Now, despite our divestiture of these small businesses, we do continue to evaluate market based opportunities, which are closely related to our core. And if we find something that's the right scale, the right risk and the right profitability profile, we would consider expanding our market-based portfolio.

And that being said, we don't see this segment of the company becoming a large component of Aqua America, we've discussed that with many of you over time. But we continue to spend our primary focus and resources on growing the regulated water and wastewater business, that's where we see the greatest opportunity at this point.

Now, last week we put a press release out that wrapped-up our 2016 customer growth efforts. The slide here summarizes what we've completed. We've invested more than $22 million in acquiring water and wastewater systems throughout the year. And also in 2016 we acquired 13 water, 6 wastewater systems and that includes two municipal deals that would be our East Cameron and our Emlenton, both of those deals in Pennsylvania.

So, coupled with organic growth, the company increased the customer base by 1.6%, which is right within the range that we put out as our expectation. I think it's important to note that the majority of these deals still don't reflect that targeted size range that we've discussed. That's the 2,500 to 25,000 customer range.

The majority of the deals we closed in 2016 are – were initiated before we initiated or to put our [ph] refocus strategy on larger opportunities in place. The work that we began when I took over in 2015 and Dan Schuller joined us, continues today and we'll continue to focus on larger opportunities. We believe that this refocus strategy is working and we'll talk about it in just a minute when we talked about our 2017 growth activities.

So I'll say, we remain very optimistic about the prospect of growth in the water and wastewater sectors. And I want to point out that, we've just not seen this level of activity really ever before, so municipals looking to sell. Importantly, this heightened activity is primarily in states where fair market value legislation has passed and we'll discuss this in more detail in a minute in relation to our 2017 guidance.

But given this optimism and the activity level in the regulated water and wastewater space, again, we're deploying the vast majority of our resources like there. So, let's talk a little bit about 2017.

I'm on the guidance slide, slide 13. This slide summarizes the expectations, our expectations for earnings per share, operating expenses, CapEx, rate activity and customer growth for 2017. We're expecting full year earnings per share to be in the range of a $1.34 to a $1.39 and I'll continue to remind you as Dave has many times if we continue over earning in several of our states which does impact our ability to file for rates.

Now on a same-store basis, we expect O&M to grow only about 1% to 2% for the full year and as always, we remain laser focused on minimizing our O&M expenses and certainly 2017 will be no exception. We expect to invest another $450 million in infrastructure in 2017 and by the way that will be a record spend for us in terms of CapEx in a year, and we'll spend more than $1.2 billion of CapEx through 2019. And this is really intended to improve and strengthen the infrastructure in our existing systems that we already own. As you know these investments allow us to provide the high level of service throughout our company's footprint.

In addition, we expect incremental capital expenditures to be made – make improvements on newly acquired systems and to purchase newly acquired systems. So that would be above and beyond the $1.2 billion in CapEx that we project in our – in our budget. We expect to grow rate base in the range of 6% to 7%. Again a reminder there that, we said many times that earnings temporarily will lag rate base growth given our over earning in many of our states.

Now, regarding our Pennsylvania rate activities; this is a constant discussion, and we've discussed it previously in all of our calls to keep you updated. We expect to file an infrastructure charge otherwise known as DSIC, a disc, in 2017 this year, followed by a full rate filing next year 2018, and then we'll have a resolution, we expect resolution of that full rate case in 2019. Now, as Dave mentioned a few minutes ago, change to the tax policy obviously potentially would impact the timing of any of those activities.

And lastly, year-over-year we're expecting our total customer growth rate in the range of 1.5% to 2%, and I'll explain on that in just a moment. I just can't say enough times that the fair market value legislation continues to generate – just a huge interest in, Dave and I sit here is 20 plus year veterans in the company, I think we can say, we've never seen this level of activity before.

This legislation is really working to drive municipal water and wastewater to consider privatization. And under Dan's leadership, we've added an unprecedented level of opportunities in 2016. Although in fact, last year we about 46 potential deals came before the investment committee. And out of the 46 deals, 35 of them progress to a decision. We lost four to competition, and we won 31 of them. 19 of the 31 closed, 10 are in process and 2 were lost in referendums. So the remainder, a couple died and several are still in the pipeline. Our investment committee maintains really a strict discipline based on a framework that we believe provides value to our customers and to our shareholders.

And put this 2017 activity in perspective the slide, we already have four municipal systems under agreement, which I represent here is a Systems A through D on the chart, combined they represented over a $110 million of purchase price and nearly 9,000 customers, I think it's important to point out that we think about the two in terms of equivalent dwelling units, that will be the 9,000 customers would be equal to 12,000 EDUs. We say that because when you buy some of these systems, they have large apartment complexes or taking the large user. So customers don't always tell the full story. All of these deals were expected to close in 2017. So we're off to a great start.

In addition to the four municipal deals, we also have a couple of investor owned utilities under agreement. These are smaller ones and again leftover from our backlog before we were focused on the 2,500 to 25,000.

Additionally, we're working on our top 70 municipal targets which represent approximately 390,000 customers. Of course, we're not going to close all these transactions or where they will – they'll want to necessarily turn into transactions, but we think if we win even our fair share of these, it will generate an attractive level of growth.

Now, the next chart on 15 really helps to visualize this in a bar graph. This represents our top 70 municipal systems that we're targeting. You will notice that 92% of the targeted customers here come from water and wastewater systems that serve more than 2,500 customers. So, our strategy is in place and focused. In 2016, we started to make a somewhat different approach to deals. In some instances and in some states, we're making unsolicited offers in municipalities to try to encourage a sale process to begin.

We focused on municipals where we control it via partner, and in many cases be the white knight to help them with an economic situation or a compliance problem that they're experiencing. We try to come in with – obviously, we want to come in to be long-term partners. Some of these seem to be working and I'll tell you, as they progress, we'll certainly keep you updated on that part of our strategy.

So, in closing, let me just reiterate our optimism about the opportunities we see in the municipal water and wastewater space, again largely driven by this fair market value legislation. And I would suggest to you that we will see more state adopting similar approaches or similar legislation as the industry works together, in the coming months and years.

So with that, I'll conclude my remarks and open the phone call up for questions. Thanks.

**Operator**: Thank you. [Operator Instructions] We'll go first to Ryan Connors with Boenning & Scattergood.

Ryan Michael Connors

Q

Good morning. Thanks for hosting the call this morning.

A

Hey, Ryan, how are you?

Ryan Michael Connors

Q

I'm doing well. Thanks, Chris. So, I guess, I do want to talk about – more about this fair value legislation and obviously a big catalyst for you and those are brand new concept and I wonder if you could talk about the evolution of the system and the process it remains to be seen, how exactly this gets implemented, I'm not even sure that any true fair value deals have closed yet at least in Pennsylvania.

So can you just talk to us about any moving parts that are left out there in terms of how this is implemented whether it would be know in terms of how that the following, the subsequent rate cases will be treated, unified tariffs, any of the above. And just any potential surprises, plus or minus in terms of how the implementation and the complexities of this play out?

A

Yeah. All good questions. And I think, when your questions are primarily focused in Pennsylvania, Ryan because...

Ryan Michael Connors

Q

Yes.

A

...in Illinois, we've had some go through the commission and seems to be working well out there. As a matter of fact we're talking about a reauthorization of that legislation in Illinois.

Let's focus on Pennsylvania for a moment, you're exactly right that this just went through the commission – I'm sorry, through the legislature last March. And so, as it flown through process, obviously the deals started to get closed in mid-to-late 2016 and have not been gone through the regulatory process.

We would expect those to begin through the process, probably by the end of the first quarter here in – this year. And – as it's typically the case with the new legislation or regulation, we need to figure things out work together with regulators to make sure that they go smoothly. I don't think given the continuous conversation in Harrisburg about this legislation.

And remember we have Act 11 and Act 12 both relatively new at the – the other one relates to subsidization of wastewater customers by the water customers in the state. And so, how those work together, those two acts work together and how they – how they are actually implemented in work through rate cases, yet to be seen. I don't want to presuppose the view of regulators, but we continue to have conversation with staff and commissioners about how to implement and how this will work and I think this team is optimistic about the overall use and prospects of moving it through the [ph] legislature.

And one of the absolutes, Ryan, that I'll suggest here is that -- here you have an appraisal done. And so that appraisals done by an outside engineering firm and that's the basis for a lot of what we consider rate base. So, assuming, that works well instead of building base is strong.

Dave, I don't know if you have any additional thoughts.

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

No, that's it. We – and I agree with Chris, that we definitely see it as a catalyst and more municipal – municipalities coming to the table to talk to us.

Ryan Michael Connors

Q

And then as a follow-on to that, you talked on the last earnings call, Chris, about you know the fact that, that there is some elements at least in a competitive state like Pennsylvania. There is some element of – competition and upward bias on pricing, because when the attractive ones come up for sale. Can you talk about how you – you're mitigating that in terms of your discipline and whether there are certain hurdle rates you have in place or what have you, what is your discipline in terms of valuation on this?

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*

A

Yeah. We sat down – and very clearly laid out guidelines and that's the discussion we had with our board, Ryan, about how we see these deals and what our hurdles are to achieve both short-term and long-term, and obviously each one of those deals are slightly different, they have a different growth profile, some of them are growing, some of them are basically stacked in terms of their growth. And so, the valuation like you do any deal, varies and it's specific to the any individual deal.

But we've got written and firm guidelines that we adhere to. And in the case where we believe it's – it's truly a strategic deal, and we want to – we want to stretch those guidelines, then that's a real interesting discussion at our internal investment committee, but also at our Board subcommittee on investment as well. So we believe that we'll be very disciplined.

Now, with regard to competition. Yeah, there's no question, there's going to be competition. And remember, there is a couple of buckets here to consider when you do these. If you pay more than that rate value or that rate base, that goes to shareholders. So we are certain that American must as well be aware of that as a guideline as well, and clearly, we'd like to buy these systems at near to rate base as we can. Having said that, it is market value and we'll – after evaluating each one on its own merits.

---

Q

Got it. And then if I just sneak one more in on this topic. So I think it is important. One of the things I think is interesting about these municipal deals that come out tend to be either in areas that are having pension issues or obviously infrastructure issues and fiscal issues, and sometimes have a tendency to be in pockets of the state that are depressed, either economically or demographically or what not. And one of the hallmarks of Aqua historically I think has kind of been that your core base around your headquarters and elsewhere is not that, it's a pretty affluent steady economic region. And so I wonder if you could talk about the risk of a negative evolution of the portfolio away from that real solid sound economic status in your traditional stronghold into more of a – a type of region that might have a different profile and how that impacts customer growth and risk, as it relates unions and different things like that?

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*

A

Yeah. So we gave that a lot of thought. Obviously, we are interested in being a solution. We're interested in growing. But it's also got to be of the right match with the right customer base, and as illustration, and I won't use the name of the system, but we are – we had a system come before us in 2016, fairly large in a key state and we evaluated it and it would have been meaningful to us as a company in terms of rate-base growth.

As we did the evaluation and determine that the average household income in that location was in the range of $30,000 a year. And that we would have had to in order to fix and recover our investment, we would have rates that surpassed $100 a month and we had – did a lot of soul searching on that as a team. And ends up walking away from that deal, never been – never put a proposal in, because we just didn't think, it was affordable for those customers.

And we're going to continue to make those decisions, because we think it's the right thing to do, and while we have a level of discipline on what we need to earn, we also have a level of discipline and commitment to the customers we already serve in that space that Ryan, you know – you talked to a lot of regulators, we've spent many, many years earning a reputation in the state capital with our regulators. And we're not about to jeopardize those reputations based on doing bad deals. So that's just one illustration.

Q

Yeah. Great. Well, thanks again for hosting the call, very helpful.

A

You bet.

**Operator**: [Operator Instructions] We'll go next Tyler Frank with Robert W. Baird.

Tyler Charles Frank

Q

Hi, guys. Thanks for taking the question. I just wanted to focus a little bit on the amount of CapEx you're going to be doing next year since that will be a record. What do you need to do to make sure that you're able to hit your CapEx target, I guess from both a projects planning standpoint, and then how should we think about needs for hiring new employees, and getting people trained et cetera on that front? Just so that we can get comfortable with the amount of risk that there might be to that level of CapEx getting executed?

A

Yeah, yeah. It's a good question Tyler. We are very confident that we can achieve it. We think very carefully about the project mix and how to achieve that, that CapEx spend before we put the budget together or having to put the budget together. As long as they spread over the eight states, but and we have increasing spend in states like North Carolina and in Texas, where we have – what I'll call compliance really not compliant because the secondary water quality issues in places like North Carolina where we meet all of the primary standards.

But we have some discolored water or taste issues that customers want smoothed out. So we – we've ramped up spending in a couple of states. Pennsylvania, largest, again our large customer base as well. The way we deploy capital particularly in main replacement work is largely through ramping up of contractors, and then ramping down. We don't typically alter our internal customer count, I'm sorry, employee count to achieve our capital numbers. Therefore, we don't ramp up and lay off. We keep a steady workforce internally.

But the team that we have doing our planning, and the execution really of this capital spend is a team who have been long in place. Bill Ross who is our Chief Engineer, Rick Fox, who is our Chief Operating Officer have been doing this work for a very long time, and both are very confident our ability to spend in, and invest that CapEx in the most prudent way, it will play out – how we don't – we don't make chances on prudents either. We got conversations going on regularly with regulators to make sure that the spend and the items we're spending on are the best and most prudent use of our capital dollars. So I'll just leave you with the fact that we're very confident in the spend.

Q

Okay. Great. Thank you. And then just a follow-up on the acquisition side of things. Can you give us a sense for, you said you went after 30, 31 deals last year, how many systems did you initially review and then end up without 31 number, I mean is that 31 out of 100 or can you give us some sort of – some sort of range for sort of how you guys go about that selection process or the actual process you want to pursue?

And then, can you provide some commentary on things you've seen in terms of the amount of competition that's embedding, bidding for your prospects. Have you seen that ramp up and what's the average number of competing bids, when you guys go after a new acquisition?

A

Yes. Yes. So a little insight on how we think about this. One, I described to you on one slide about our pipeline of – we'll call it 390,000 customers in our tough 70 targets. So we just still in our – within our eight stage, the possibilities down to 70 and obviously we've got others behind that 70. But those are 70 highest targets and so they are the ones that meet these size ranges in large part. And then, as we think about still in the further we look at who's got a compliance issue, who's got an economic issue, who might have pension concerns. We look at why municipals might be interested in exiting the business. And there we start to look at the overlay of the political situation, interest and all those sorts of things. And so, multi layers, but again as a day, to answer your very specific question, we had 46 deals come before the IC, the Investment Committee last year. But there were lot more, some of them we didn't even bring to the IC. We literally did just in and hit the target for us.

And so – and as you think about starting with those 46, the 35 of them progressed through a national decision at the IC. But as you might imagine, even with smaller deals, every one of these, I'll say has [indiscernible] (00:32:20), right. They are – there's issues with them. They're not leaving the business because they're, in most cases humming along optimally. So we've got to do our due diligence in our valuations not only on the financial side but on the operational side. So, to vet this many deals is an enormous lift for the team. And while we're excited and pleased with the volume, what we like to see is that an increasing number than coming to closing.

Now, with regard to your question about competition, one of the reasons we're focused on what I call is middle-market, 2,500 customers to 25,000 customers is because there's less competition from, I call financial buyers, right. There are a little bit under that their target for size. So, largely we find in the states where American is as well, we find American as the chief competition and we compete together on most deals. But we don't see a lot of other competition. In some cases we see other municipals trying to grow and the assumption there is that, I guess they want to bring more economies of scale to bear.

But typically there is not a lot of competition from other municipals. So, I would say steady competition and strong competition, but not a lot of other players competing. I believe that answers your question?

Q

Excellent. Thank you.

A

You bet.

**Operator**: Well, the next is Angie Storozynski with Macquarie.

Angie Storozynski

Q

Thank you. So, first on 2017 guidance, so I understand that you are over earning particularly in Pennsylvania, hence there is a lag between the rate base growth and the earnings growth. But so the rate case will be filed in 2018. So, should we assume that 2018 is also showing this significant lag in earnings versus rate base growth?

A

I think it's fair to say that the same lag that we're going to experience in 2017 would carry to through 2018.

Angie Storozynski

Q

Okay. And so it's – I mean just so I understand, so you're basically trying to invest in – in your rate base in order to right size the realized ROE, and only then you'll be filing rate cases, is that just a fair summary?

A

I think that's well said.

Angie Storozynski

Q

Okay.

A

We'll invest and as we ramp-up that investment, obviously we'll bring our return on equity down and ultimately beyond that the level where we could file a DSIC and a case.

Angie Storozynski

Q

Okay. Then maybe I missed it, but could you give us an update about your views on potential expansion beyond the other water sector, given where are your premium now is versus electric water utilities or like gas utilities on a PE basis?

A

Yeah. And – see I think what I've said on another call is that, well gas is interesting to us, given the similarities between the vast amount of pipe being installed in gas it will be ceased. It's not a primary focus of ours. The vast majority of our resources in our primary focuses are around the growth of the water and wastewater business and it will continue to be.

And so, we just are not out there with our line in the pond, looking for simply gas LDCs and you heard it right. There are market dynamics that would suggest that, to that deal we have to do the right deal for us to make it worthwhile.

Q

And just one last question going back to 2018. So is there, is a corporate tax change – corporate tax co-change, which would remove the repair tax deduction from the code. And you're still awaiting a filing of a Pennsylvania rate case. I mean, should we have actually a very weak 2018 given that the corporate tax rate would actually go up for you guys?

A

Well, that's a good question, Angie and it is one we've talked about extensively when we started talking about potential tax reforms and I've talked to all of my experts on this matter and there is general concurrence that the repair tax will not go away. In fact, the expectation is that any new tax loss will allow more capital to be written off rather than less and so that won't change our repair status, because still only specific capital will qualify for the repair flow through method, but we don't see a risk in taking away that deduction. The risk that we do see is, that deduction could take place at a lower tax rate in the future and that's what I said during the call could cause us to consider accelerating the rate case to a sooner date.

Q

Okay, understood. Thank you.

**Operator**: And we have no further questions in the queue at this time. I'd like to turn the conference back over to Mr. Chris Franklin for any additional or closing remarks.

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Thank you very much for joining us everyone. As always if you got follow up call or questions, don't hesitate to make those calls. In the meantime, thanks for joining us and Happy New Year.

**Operator**: And that concludes today's conference. We thank you for your participation.

03-Aug-2017

# MANAGEMENT DISCUSSION SECTION

**Operator**: Good day and welcome to the Aqua America Q2 2017 Earnings Conference Call. Today's conference is being recorded.

At this time, I would like to turn the conference over to Brian Dingerdissen. Please go ahead, sir.

## Brian Dingerdissen

*Vice President, Chief of Staff & Investor Relations, Aqua America, Inc.*

Thank you, Michelle. Good morning, everyone, and thank you for joining us for Aqua America's second quarter 2017 earnings conference call. If you did not receive a copy of the press release, you can find it by visiting the Investor Relations section of our website at aquaamerica.com. The slides that we will be referencing can be found on our website. There will also be a webcast of this event available on our site.

As a reminder, some of the matters discussed during this call may include forward-looking statements that involve risk, uncertainties, and other factors that may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. Please refer to our most recent 10-Q, 10-K, and other SEC filings for a description of such risk and uncertainties.

During the course of this call, reference may be made to certain non-GAAP financial measures. A reconciliation of these non-GAAP to GAAP financial measures is posted in the Investor Relations section of the website.

Presenting today is Chris Franklin, Aqua America's Chief Executive Officer; Dave Smeltzer, the company's Chief Financial Officer; and Dan Schuller, our Executive Vice President of Strategy and Corporate Development. After the presentation, we will open the call up for questions.

At this time, I'd like to pass it over to Chris Franklin.

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Hey. Thanks, Brian, and good morning, everyone. Thanks for joining us. Quick summary of what we'll discuss today, talk about a little recent news on the company, highlights for the second quarter. Dave Smeltzer, our CFO, will review the company's financial results and our rate activity. And then Dan Schuller, who's our Executive Vice President of Strategy and Corporate Development, will take us through an update on our acquisition and growth programs. Then we'll conclude the formal portion of the presentation by recapping our guidance for 2017. And then, we'll take any questions you might have.

Let's dive in. By now, you've seen our release, and we started the year with a good solid first half. We feel very good about our work on the growth front, and I'm going to let Dan discuss that in a little more depth just shortly. Our annual infrastructure improvement program is off to a strong start. And we've invested about $210 million so far this year in water/wastewater infrastructure. And we remain on track to spend a record spending of capital at about $450 million for the year.

I'm happy to report that we're on track to replace about 150 miles of main this year. This includes pipes replaced across our eight-state footprint. We're also installing some new water main as opposed to replacement. We're installing new projects, as well as some plant expansions. And I'll just mention two that I think are interesting. The two projects were both in Illinois.

First is our University Park pipeline project. University Park is just south of Chicago. We're building a 16-mile pipeline to bring our award-wining Kankakee River water up to the University Park area. Previously, University Park was served by wells which needed significant treatment to improve their water quality. This new pipeline is a much more cost-effective solution compared to treating each of the wells in the University Park that bring them up to what we would call best standard. The new pipeline will also provide increased capacity in that University Park area.

The second project is related and it's the expansion of our Kankakee water treatment facility, which also supports some pretty significant economic development in that area, in particular, a biotech plant there, which is doing manufacturing work. And our Kankakee plant expansion will provide additional reliability and redundancy for the current plant and will also bring some new and additional water supply to these industrial users, who are already requiring about 1.5 million gallons a day. And we expect them to ask for more in the future.

One other project that I'll mention, a little closer to headquarters here in Pennsylvania, we completed a pipeline in Bucks County, just north of where we sit. We were purchasing about 3.5 million gallons a day of water from the Bucks County Water Authority (sic) [Bucks County Water & Sewer Authority]. But upon completion of our new pipeline, which now connects the customers to an existing and recently expanded Aqua water supply, we're able to eliminate that contract with Bucks County. The result is an annual operating expense savings of about $7.3 million. This is significant for us.

So, this is another one of our examples that we've talked about before, these [ph] seven-to-one (05:21) projects where we can spend up to about $7 in capital to eliminate $1 operating expense, which really in order to benefit to the customers and the shareholders. We're always working to identify projects like this, and we could see more in the future.

Let's switch gears a little bit to board governance. We added a ninth board member to our Board of Directors, we met earlier this week. We welcomed Dan Hilferty, who's the CEO of Independence Blue Cross in Philadelphia.

And we're excited to have Dan on the board as he's really expanded his business. He is also very familiar with the regulated world albeit healthcare. And he's been a big player on the national scene with healthcare reform. So, Dan is a great addition to our board.

Now, let's turn to the highlights of the quarter. Year-to-date, we've added 5,326 customer connections. This accounts for about 0.5% in customer growth. We acquired a system called Tobyhanna in Pennsylvania just in July, and two small systems in Indiana, both investor-owned. So far this year, these small systems were in that backlog. We've often mentioned of these small private deals that we've amassed over the years.

Now, regulator revenues were up in the quarter to $202 million compared to $198.1 million last year, and total operating revenues were $203.4 million in the quarter compared to $203.9 million in 2016. Now rates, surcharges, and regulated customer growth increased our revenues by about $4.3 million for the quarter. And this was offset by what we've talked about many times as decrease in market-based activities. And we really concluded that program at this point. Consequently, earnings per share were $0.34 compared to $0.33 reported in the second quarter of 2016.

And lastly, it's important to mention that the board met this week and raised the quarterly dividend by 7%. The new quarterly cash dividend is just over $0.20. The directional amount is in the release, $0.20 per share, and on an annualized basis, nearly $0.82. This marks the 27th increase in 26 years. And the company has paid consecutive quarterly dividends for more than 72 years now, and we're really proud of that. We have a long history of enhancing value for our shareholders, and we're pleased to continue building on that history by increasing our quarterly dividend. It's a strong growth, and the dividend is reflective of our confidence in the business and our commitment to delivering long-term value for our shareholders.

The board continues to target 60% to 70% payout ratio compared to where we are right now, we're in the high 50s, call that, 58%, 59%.

And with that, let me turn it over to Dave Smeltzer to take us through the financials in a little bit more detail. Dave?

## David P. Smeltzer

*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

Yeah. Thanks, Chris, and good morning, everyone. Today, I'll review the financial results for the quarter, discuss some of the key factors impacting our performance, and provide a look at our 2017 rate activity.

So, we reported revenues of just over $203 million for the quarter. Our regulated segment reported revenues were $202 million, up 2% compared to the $198 million in 2016. I'll show a waterfall chart on this in a minute, but when we look at Q2 2017 versus Q2 2016, the increase in revenues from rates, surcharges, and regulated growth was largely offset by reduced revenue from market-based activities as we've been talking about the last few quarters.

O&M expenses were down 4.2% to $70.9 million for the second quarter of 2017 compared to $74 million in the same period of 2016, largely as a result of expenses that were associated with our former MBAs. For our regulated segment, O&M expense increased by 4% to $72.6 million compared to $69.7 million last year. And we reported net income of $61 million or $0.34 per share compared to $59.6 million or $0.33 per share in Q2 last year.

For the year-to-date, annual revenues decreased slightly to $391.2 million from $396.5 million in the same period last year. Regulated revenues, however, were up 1.1% to $388 million, as regulated revenues exclude the impact from our market-based activities. O&M expenses were down 5.1% to $140 million for the year compared to $147 million in the same period last year, largely due to lower production expenses and continuation of the story of our reduced market-based costs.

Regulated O&M expenses were up 2.2% due to a number of prior-year items, including a gain of $1.1 million recognized for the buyout of an operating contract, a reduction in claim reserves of $1.6 million, and a system sale gain of $1.2 million, all of which occurred in Q2 2016. Partially offsetting these increases was a decrease in pension expense.

And also, for the year-to-date, net income was $110 million compared to $111.4 million last year. Earnings per share was $0.62 compared to the $0.63 reported in 2016. And the year-to-date waterfall chart on EPS is in the appendix, and that will give you more color on this year-to-date matters.

Looking at different components of the 0.2% revenue decrease, rates and surcharges, consumption increases, and customer growth in our regulated operations increased revenues by approximately $4.3 million, but then the market-based revenue decline of $4.4 million and other minor items offset the increases.

O&M expenses were almost $71 million for the second quarter compared to $74 million in 2016. Expenses related to regulated acquisitions, a prior-year reversal reserve due to the settlement of a contractual obligation and other expenses in the quarter increased O&M $3.3 million. Reduced market-based activities expenses, lower production costs, and lower employee-related costs, primarily insurance, offset the aforementioned increase by $6.4 million for a net decrease in O&M expenses of approximately $3.1 million year-over-year for Q2.

And like me, you may have noticed an anomaly, in our O&M expenses. The fact that we would have had negative O&M expenses that are non-regulated operation kind of stands out, and it was very straightforward matter. Our costs are way down, and we did have a contract in that non-regulated sector that we're able to reverse the reserve on this year upon exiting that contract that we had inherited with the previous acquisition.

So, looking at earnings per share, starting with the $0.33 we reported last year. Regulated growth, rates, and surcharges, consumption, and tax repair benefits increased our earnings per share by a $0.015 in the quarter. And reductions in market-based activities and other expense increases in aggregate decreased our earnings this quarter by over $0.005. Net for the quarter, we reported earnings of $0.34 per share.

Moving to rate activity. So far, in 2017, we completed rate cases or surcharges in six states with $11.1 million in additional annual revenue. We also have rate cases pending in Illinois and Virginia, where we're requesting an additional $14 million.

And lastly, I will provide you with an update on our plans to file a rate release in Pennsylvania. As you'll recall, we've not raised customer rates in Pennsylvania since the conclusion of our 2011 rate case. And sticking with our prior guidance, we do anticipate we'll begin implementing a PA DISC later this year and plan to gradually phase in the increase, which we would expect to reach 7.5% over multiple quarters. We expect to file a full Pennsylvania rate case in 2018. And additional rate information can be found in the appendix of this presentation.

Chris?

## Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

Thanks, Dave. When I became CEO, I talked with many of you about our desire for greater transparency and greater exposure to our management team. And we really attempted to do that over the last couple of years.

And today, to continue in that trend, I'm going to introduce you to Dan Schuller, our Executive Vice President of Strategy and Corporate Development. By way of introduction to Dan, today is Dan's second anniversary with the company, exactly today. And Dan's going to talk a little bit about our growth strategy and the review of the acquisition landscape.

Dan?

## Dan J. Schuller

*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

Thanks, Chris, and good morning, everyone. First, I'd like to refresh your memory as to how we think about our growth strategy. You'll recall that our views in growth strategy are anchored in our core competencies, which include capital investment, regulatory affairs, and operational excellence. Think about it, prudently rehabilitating and expanding our infrastructure, earning a fair return [indiscernible] (16:05) those investments, and running our business in an optimal manner. We believe these core competencies can be leveraged in three primary areas or avenues of acquisition growth: municipal acquisitions, strategic M&A, and market-based activities.

Today, I'll provide an update on our municipal acquisition activity and touch on the completion of our exit of a legacy MBA, or market-based businesses. First, let's look at the acquisitions we've closed so far this year. This slide summarizes what we have completed t-date. We acquired a couple of investor-owned utilities in Indiana in the first quarter. And we recently added Tobyhanna, a municipal wastewater system in Northeast Pennsylvania.

Next, I wanted to provide an update on our municipal activity, thus far, in 2017. This slide depicts the municipal systems we have under agreement this year. We closed Tobyhanna in June, adding 740 customers that I mentioned a minute ago. This was System C on the chart that we've shown on the last earnings call. You'll note that we added System E as it is now under contract. It's a fairly sizable deal adding nearly 3,000 customers.

System E includes both water and wastewater connections. And it's in our target range of 2,500 to 25,000 connections. The deals either close or anticipated to close in 2017 represent nearly $114 million of purchase price and nearly 9,000 customers or 12,000 equivalent dwelling unit. In total, the systems represented on this slide consist of about 12,000 connections at a purchase price of approximately $126 million. In future calls, we'll keep you updated, as these systems reach financial close.

Lastly, while there are not as many deals on the slide as some would expect, we remain excited about the numerous opportunities that we are seeing in the municipal market. As Chris has indicated previously, we're seeing more interest than ever before on this front, especially in those states with fair market value treatment. Given our pipeline and anticipated regulatory approval schedule, we're still targeting the 1.5% to 2% full year growth that we discussed as part of our guidance call in January.

Now, let's turn to our top prospects slide. You've seen a slide like this from us before. This is meant to provide you with a sense of our opportunity set. It simply segments the top 70 deals on which we're working by system size. As you'll recall, we're most focused on those deals with 2,500 to 25,000 connections. As the header indicates, 94% of the nearly 500,000 connections represented here are from systems within that target range. While we clearly don't expect to close all of these potential transactions, when one falls off, it's quickly replaced by another opportunity from our much longer list, which had many more acquisition candidates.

Now, let's turn to our market-based activities. In June, we completed our last planned divestiture of a market-based activity. Our efforts to divest many of our subscale market-based businesses are now complete. Therefore, this is the last time we expect to talk about this on an earnings call.

The one primary market-based activity that we plan to keep is the home serve product, a product that protects the service line between our mains and our customers' homes. You may recall that we received a royalty on these contracts. We'll also keep a limited number of O&M contracts that are close to our owned utility operations.

We occasionally evaluate market-based opportunities which are closely related to our core business and expertise. And if we find something it is of the right scale, with an appropriate risk and profitability profile, we may decide to expand our market-based portfolio. That being said, we don't envision this segment of the company becoming more than 10% of Aqua America, as we continue to place our primary focus on growing the regulated water and wastewater business.

And now, I'll turn it back to Chris.

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

Okay. Thanks Dan. Appreciate the update. And Dan will stay for questions when we wrap up as well.

Now, let me just quickly reaffirm our 2017 guidance, and then we'll move to questions. We expect our full-year earnings per share to be in the range we predicted of $1.34 to $1.39. And as always, we remain laser-focused on minimizing O&M expenses and expect year-over-year increase in the 1% to 2% range. We expect to invest more than $450 million in infrastructure in 2017, again, a record amount for us. And this will be about $1.2 billion of CapEx over the next three years. That's through 2019. This will improve and strengthen our infrastructure for our customers and the systems we currently own. And it's important to recognize, it's these improvements that allow us to provide this high level service to our customers.

But in addition to that, we expect to spend additional capital to make improvements to the newly acquired systems. Again, this isn't captured in that $1.2 billion CapEx budget. This would be an additional CapEx on top of the $1.2 billion.

We expect to grow rate base in the range of 6% to 7%. And as Dave previously discussed, we expect to file a DISC here in Pennsylvania this year. And we expect to file the Pennsylvania full rate case in 2018 and would see a resolution sometime in 2019. Finally, as Dan said, year-over-year we expect total customer growth to be in the 1.5% to 2% range.

So, before we end the call, I'd like to open it up for any questions you might have.

# QUESTION AND ANSWER SECTION

**Operator**: Thank you. [Operator Instructions] Your first question comes from Ben Kallo of Robert W. Baird. Please go ahead. Mr. Kallo, please go ahead. Your line might be...

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Ben, is your phone on mute?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*
A

Okay. Maybe we should move on and come back to Ben.

**Operator**: Thank you. The next question comes from Spencer Joyce, Hilliard Lyons. Please go ahead.

Spencer E. Joyce
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*
Q

Hey. Good morning, guys. Solid quarter. Thanks for all the color.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Good to hear from you, Spencer.

Spencer E. Joyce
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*
Q

My question is for Dan, and welcome to the calls. Great to have you on here.

Dan J. Schuller
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*
A

Thanks, Spencer.

Spencer E. Joyce
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*
Q

Two years into your tenure here, I was just wondering if you could talk about the development of the M&A pipeline versus perhaps what your initial expectations were. And then just kind of give you the floor a little bit to discuss anything as far as the go-forward outlook, with respect to kind of your initial assumptions.

Dan J. Schuller
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*
A

Sure. And I appreciate that Spencer. And two years ago, we sat here with the same team and the board, really, the day before the board meeting. And today, we sit here after having, really, I'd say, formalized and accelerated our municipal acquisition program. So, as we talked [ph] with analysts today (24:03), a year and a half ago now, putting that process in place with an investment committee and putting a database in place, where we're tracking our opportunity set and shepherding the opportunities through that process, working with our state teams and so forth, what we've done is built a strong pipeline.

And we showed you that slide today with the top 70 opportunities. And we continue to advance these and move them forward. And we would expect that the fair value legislation will continue to be beneficial to us in bringing us pipeline of opportunities. We're certainly seeing that as we said earlier in all of our fair value states, a real acceleration in the opportunity set. Now, as you know, they don't develop overnight. It takes a while to develop these, to get them into the pipeline, to convert them to a signed agreement at some point, and then we get them to regulatory approval.

---

**Spencer E. Joyce**
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*

Q

Yeah. Fair point there on the timeline, and appreciate the color. Talking about the fair value legislation. Is it safe to assume that most of the top 70 prospects would be in those fair value states?

---

**Dan J. Schuller**
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

A

I'd have to look at the numbers exactly, but that is a fair assessment that a good percentage of those would be in the fair value states. Whether that's...

---

**Spencer E. Joyce**
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*

Q

Or I guess another way to ask would be, have you seen a migration over the past couple of years towards that list, I guess, shifting towards to the fair value.

---

**Dan J. Schuller**
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

A

Yeah. Let's put it this way. That list, if we're to look at it before, when we're in the kind of pre-municipal initiative days, the top 75 would have been shifted to the left. There would've been many more small opportunities to acquire small investor-owned utilities. What we really pushed for is to increase the scale of our targets and to move those targets to being municipal. So, that's why we showed that slide to you, and we showed that slide to the board saying, that this push toward the 2,500 to 25,000 connections has taken hold. Many of those being fair value type of system acquisition opportunities.

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*

A

Spencer, I think one of the things that Dan brought to the team here, too, is we are more a sales team now. In other words, we're out there, more actively speaking with and generating sales. In the past, we will wait many times for regulatory agencies, call that environmental DEP, EPA, and PUC to call us with troubled systems. We'd react, and we purchase them. Now, we're out there actively, more aggressively, talking with various systems and of size, as Dan mentioned.

---

**Spencer E. Joyce**
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*

Q

Yeah. To that point, are you comfortable with kind of the current size and scope of the business development or the sales team, or are there perhaps any additions or changes there, probably the next few quarters?

Dan J. Schuller
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*
A

That's something, Spencer, we constantly evaluate. But I think at this point, we're pretty comfortable with the team that we have in place and their ability to generate and develop opportunities for us.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Yeah. I don't think we want to get in the secret sauce here.

Dan J. Schuller
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*
A

True.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

But on the other hand, I think it's fair to say, Spencer, that since Dan's arrived, we have ramped up both the number of people and the activity around the sales.

Spencer E. Joyce
*Analyst, J.J.B. Hilliard, W.L. Lyons LLC*
Q

Okay. Appreciate the color there, and that's all I had. Thanks, guys.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Thank you.

**Operator**: Thank you. [Operator Instructions] The next question comes from Jonathan Reeder, Wells Fargo. Please go ahead.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*
Q

Hey. Good morning, gentlemen.

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*
A

Hey, Jonathan.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*
Q

How are you doing?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*
A

Good. Thanks. Thanks for being with us.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

Yeah. No. Thanks for taking the call. So, with regards to the PA rate relief plans. Dave, do you have to hit the 7.5% DISC cap before you can make the general request, or can you continue implementing DISC increases as the rate case run its course?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Well, the answer is no and yes, right. We could file before reaching 7.5% technically, right. But generally, the way we would prefer to do it would be to reach the 7.5% first, and then file the base rate increase, which would be beyond that 7.5%. So, that's our expectation right now.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

Right. But once you file the rate increase, you can't keep, I guess, implementing DISC increases is what you're saying, right?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Well, certainly if we reach 7.5% before we file, as is our intention , that's exactly correct. But just from a generic standpoint, if we hadn't reached it, we certainly could continue to increase during the pendency of the rate case.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

Okay. Okay. So, those give you that flexibility if you wanted to. I'm just trying to think of the trajectory of the DISC increases if you're not starting until in 2017, and then maybe in position to file the rate case still on 2018, so.

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Yes. Yes.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

In terms of the timing of the rate case filing, do you think it will be consistent with when Aqua typically filed in the past, i.e., November?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Yeah. We haven't nailed down a time yet. I'd like to think it'll be before that. But again, we haven't made that final decision just yet. But when you think about it this way, we've already decided that rather than go to 7.5% on the DISC immediately, as we're qualified for, having put over $1 billion of pipe in Pennsylvania since the last rate filing, we've decided that instead of hitting that 7.5% all at once, to roll it in over several quarters to be more gradual and more customer-friendly.

So, when you think about that, in order to do that and implementing our first DISC – obviously, we haven't implemented our first DISC in Q3 which we are in today, right.

So, the first DISC will likely be Q4, and then you'd see further increases in Q1 and Q2. So, it would likely be some time thereafter the implementation of that third DISC that we would file the rate case.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

Okay. That helps. And then, Chris, maybe if you could kind of give your updated thoughts on M&A, both within the water space as we saw Eversource agree to acquire Aquarion, as well as potential opportunities outside of water and wastewater as you see it today?

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

A

Yeah. Well, I think it was a little bit of a surprise to all of us when Eversource ended up with Aquarion. I did call Jim Judge at Eversource and congratulated and welcomed to our space. And I think when he explained that they had substantial cash from the sale of coal generation in New Hampshire and were going to redeploy it on "clean water," I thought that was great. And, hopefully, they'll be a player in our space. But I don't know that electrics necessarily are moving back into water. As you know, they were in, they got out. So, you have to talk to your electric friends.

On a broader sense, the multiples are just so high, Jonathan, in the water space, and for that matter, the regulated utility space, that it's tough to look at – you really have to search for accretion. And as you know, we have been and continue to be a very disciplined buyer. And so, when we looked at these opportunities, we're looking for increased shareholder value in the form of not only accretion, but enhanced long-term growth rate. So, all I can say is as we look for opportunities in our space, we will continue to look for those opportunities and only move when we think it's going to meet our shareholder value requirements.

Jonathan Reeder
*Analyst, Wells Fargo Securities LLC*

Q

Okay. Thanks for that. And then one question for Dan. What types of non-regulated businesses would you find attractive and consider moving into?

Dan J. Schuller
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

A

Yeah. Jonathan, we done some initial work on that, but I would say it's too early to really have the discussion. It has been really a lower priority for us than the municipal transactions. And our focus has been growing our business through the municipal transactions and making sure that, that acquisition activity is building our customer base for the future.

Christopher H. Franklin
*President & Chief Executive Officer, Aqua America, Inc.*

A

Yeah. And Jon, we've talked about this theme of complementary and supplementary. We get into market-based business, needs to be close to the core. We, in the utility business, understand what we're good at, and particularly, here at Aqua America, understand where our strengths are. And if it's complementary, i.e., a business that would give us access to opportunity to grow the regulated business, and obviously supplementary, in the sense that it would enhance earnings, then that would be attractive. But I think, as Dan said, we've been very active on the municipal front, we've been very interested in opportunities in a larger scheme of the M&A world, and so, market-based businesses, would've taken a third tier.

---

**Dan J. Schuller**
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

A

Yeah. I think it's fair...

---

**Jonathan Reeder**
*Analyst, Wells Fargo Securities LLC*

Q

That's a good – Sorry.

---

**Dan J. Schuller**
*Executive VP-Strategy & Corporate Development, Aqua America, Inc.*

A

Jonathan, we spend a lot more time divesting the subscale market-based businesses we've had and looking at additional ones, as Chris said, that would complementary and supplementary.

---

**Jonathan Reeder**
*Analyst, Wells Fargo Securities LLC*

Q

Okay. I was going to say good answer. That's what we like to hear that the focus is on growing through the muni deals and not the non-regs. So, appreciate the update, and thanks for the time.

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*

A

You bet.

---

**Operator**: Thank you. The next question comes from Tim Winter, Gabelli & Company. Please go ahead.

---

**Timothy Winter**
*Analyst, Gabelli & Company*

Q

Good morning, guys, and thanks for taking my question.

---

**David P. Smeltzer**
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Hey, Tim.

---

**Timothy Winter**
*Analyst, Gabelli & Company*

Q

I wanted to know, given the sort of significance of returning to the Pennsylvania rate environment, if you could talk a little bit about where your Pennsylvania rates are relative to peers, or where they've been in the past, and how much of a percent increase you think you need in 2018 once you revisit that? And maybe what that's done to your earnings over the past several years, staying out of Pennsylvania?

---

**David P. Smeltzer**
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*

A

Yeah. Tim, it's Dave. Yeah. I'll try to hit a couple of those things. You might have to remind me. But, yeah, in Pennsylvania, it's interesting. Our rates were comparable to our peers for many years. We might have gotten a little bit ahead in the kind of the 1990s, early 2000s, as we ramped up our infrastructure rehabilitation program. But the last seven years have fixed that, right, because our last rate case was filed in 2011. And since then, our peers have continued to spend capital, implement surcharges, and raise rates, and we have not. And so, today, as we sit here, our rates are certainly comparable with our peers in the utility space. So, that's how I would judge our rates.

In terms of our process, we've mentioned before that we'd like to file the case subsequent to reaching the maximum on our surcharge. We felt that jumping to 7.5%, although certainly technically possible having put that $1 billion-plus of plan in the last number of years wouldn't be the right thing to do for our customers, so we've decided to spread that out over multiple quarters. And once we do reach 7.5%, then the timing would be appropriate to file that next rate case. So, I expect it'd be sometime in the middle of the year. We haven't nailed down which quarter or which month yet, but I would expect it will kind of be some time near the middle of 2018.

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*
A

If I could just jump in and supplement, Tim, because, I think your question is a really good question. It's interesting to think about despite the fact that we hadn't had top line growth really since Dave said, 2011, our Pennsylvania unit still is operating at about $0.29 on $1 O&M to revenue, which is pretty impressive from the operating team here at the company. I think that's important to keep in mind. We've really, really been expense-conscious.

The second thing is we're keenly aware that our – the fact that we've been out of rates for nearly seven years now helps us in our municipal acquisition program. Because there's often, as you're all aware now, this rate differential between what municipals charge and what we charge. And so, to the extent that we can be efficient through our customers to keep that overall rate down, it makes our deal-making on municipal front that much easier.

We're also very aware though that we'd like to continue the single tariff pricing. And so, to the extent that, that gap is smaller from where we buy on municipals, and their rates, and to where they get to, to get to a single tariff price, that's an advantage for us.

---

**David P. Smeltzer**
*Chief Financial Officer & Executive Vice President, Aqua America, Inc.*
A

Anything else on that we can help you with, Tim?

---

**Timothy Winter**
*Analyst, Gabelli & Company*
Q

I'm sorry. Thank you, guys. No, I appreciate that.

---

**Christopher H. Franklin**
*President & Chief Executive Officer, Aqua America, Inc.*
A

Got it. Very good.

---

**Operator**: Thank you. [Operator Instructions] It appears there are no further questions at this time. Mr. Chris Franklin, I'd like to turn the conference back to you for any additional or closing remarks.

---

## Christopher H. Franklin

*President & Chief Executive Officer, Aqua America, Inc.*

I have no additional remarks. I just want to thank everyone for joining. And obviously, Brian and the team, Dave, are all available for follow-ups if you have them. Thanks so much.

**Operator**: Ladies and gentlemen, this does conclude the conference call for today. You may now disconnect your line, and have a great day.

THOMSON REUTERS STREETEVENTS

# EDITED TRANSCRIPT

WTR - Q4 2016 Aqua America Inc Earnings Call

EVENT DATE/TIME: FEBRUARY 23, 2017 / 4:00PM GMT

## CORPORATE PARTICIPANTS

**Brian Dingerdissen** *Aqua America Inc - IR Director*

**Chris Franklin** *Aqua America Inc - CEO*

**Dave Smeltzer** *Aqua America Inc - CFO*

## CONFERENCE CALL PARTICIPANTS

**David Cater** *Robert W. Baird & Co. - Analyst*

**Ryan Connors** *Boenning & Scattergood Inc. - Analyst*

## PRESENTATION

**Operator**

Good day, ladies and gentlemen, and welcome to the Aqua America Q4 and full-year 2016 earnings call.

Today's conference is being recorded.

At this time I would like to turn the conference over to Mr. Brian Dingerdissen. Please go ahead.

---

**Brian Dingerdissen** - *Aqua America Inc - IR Director*

Thank you Keith. Good morning everyone and thank you for joining us for Aqua America's 2016 full-year and fourth-quarter earnings conference call. If you did not receive a copy of the press release you can find it by visiting the investor relations section of our website at aquaamerica.com. The slides we will be referencing can be found on our website as well. There also will be a webcast of this event available on our site.

As a reminder some of the matters discussed during this call may include forward-looking statements that involve risks, uncertainties, and other factors that may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. Please refer to our most recent 10-Q, 10-K and other SEC filings for a description of such risks and uncertainties.

During the course of this call reference may be made to certain non-GAAP financial measures. A reconciliation of these non-GAAP to GAAP financial measures is posted in the investor relations section of the Company's website.

Presenting today is Chris Franklin, Aqua America's Chief Executive Officer, and Dave Smeltzer, the Company's Chief Financial Officer. After the presentation will open the call up for questions.

At this time I'd like to pass it over to Chris Franklin.

---

**Chris Franklin** - *Aqua America Inc - CEO*

Thanks Brian and good morning everyone. For today's brief agenda, we'll start with some recent news on the Company, and then I'll comment on some of our highlights from 2016 and Dave Smeltzer, our CFO is going to cover the financial results for the year and some of our rate activity. Then we will conclude the formal portion of the presentation by reviewing our guidance for this year 2017 and after that we'll take any questions you might have.

Let's jump right in. As we close the books on 2016, which is our 130th year anniversary, I'd like to provide just a little bit of color on the year. I think it was an exciting and a fulfilling year for all of us at the Company and we laid in some important groundwork for our strong future. Probably most importantly, we built our strong Management Team and I believe we're fielding a world-class team at this point. I'm thrilled with how the team as gelled and the talent that they possess.

Secondly, we continue to maintain our high standard of operational excellence, including the handling of some of the industry type challenges like the fallout from Flint, Michigan, which is the national discussion as we've said before and we continuously get questions from our customers and our different constituencies about the lead issue.

We invested nearly $400 million in our infrastructure this year at the Company. This is a record year for us. We provide a higher degree of service continuously for our customers and we continue to bring fair market value legislation in even more states where we do business, Pennsylvania obviously being the big accomplishment in 2016. We talked about that detail on our last call so I am not going get into the details other than to say that our New Garden acquisition is the first one through in Pennsylvania and that's in the midst of getting its examination at the PUC in Pennsylvania now.

We've largely completed the exit of our small non-core, nonstrategic, market based or unregulated businesses as we call them. That's almost done and the last remaining really is profitable but is on the way out now.

On the softer side, we continued the refinement of our corporate culture and worked to ensure that all of our 1,600 dedicated utility professionals are safe in the workplace when they come in every day and that they uphold our high ethical standards and continue to operate the Company as efficiently as possible.

Also last year, we updated our short term and our long-term incentive plans to better reflect our strategy and incent behaviors that will continue to make us the world-class company that we are. Finally, we implemented some new Board governance practices. I've mentioned them before but we put term limits on our Board members, we've put rotation requirements on the committee chairs, and we switched from the traditional meeting fees to retainer fees. So I think we've put good work governance into place in 2016.

Now let's turn to some of the highlights from the 2016 on the next slide here. We increased our customer count by 1.6%. This includes customer growth from acquisitions and organic growth and it falls with within our guidance range that we provided last year. Our annual revenues increased to $819.9 million compared to $814.2 million last year or in 2015, I should say.

Our 2016 earnings per share increased 4.8% over the 2015 adjusted income per share. Again, we'll talk non-GAAP here just for a minute of $1.26 per share. As you'll recall that we wrote down our Marcellus pipeline to the $0.12 write-down in 2015. I would also like to note that 2016 marks the 72nd consecutive year that the Company has paid a quarterly dividend.

Now many of you have seen this next slide, you'll recognize it from our 2017 earnings call just a month ago. And this slide summarizes what we completed as of year-end 2016. We invested more than $22 million in acquiring water and wastewater systems last year. We acquired 13 water and six wastewater systems, including two municipal deals and most of you recall those are the East Cameron and Emlenton, both in Pennsylvania.

As I mentioned a minute ago, we increased in total of 1.6% for the year and I think it's important to note that the majority of the deals still don't reflect the targeted size range that we've discussed; this is that 2,500 to 25,000 customer range. The majority of the deals closed in 2016 and were initiated before we refocused our strategy on larger opportunities. And that work that we began in 2015 and continues today, really focuses on those larger opportunities and I am very confident that this refocused strategy is already working.

I think you'll see it in the next slide here as we talk about our 2017 growth initiatives. As we turn the page, and I mentioned this last month, we already have four municipal systems under contract, under agreement this year and their representative as systems A through D on this chart; again, just because they haven't been announced yet. Combined, they represent $113 million of purchase price, nearly 9,000 customers or 12,000 of what we call equivalent dwelling units.

These deals are expected to close at some point during the year of 2017. In addition, to the four municipal's, we also have a couple of investor-owned utilities under agreement but not yet closed. These couple of deals are also smaller deals from our backlog of small private deals. And we'll of course keep you updated as these systems close and move through the new process.

And with that, I'll hand the call over to Dave, who's going to review the full-year financial results.

---

**Dave Smeltzer** - *Aqua America Inc - CFO*

Thanks, Chris. Good morning everyone. Today, I'd like to review the financial results for the full-year and discuss some of the driving factors that impacted the Company's performance. While we're doing that I'll also provide a look at our rate activity from 2016 and for the current year so far.

Turning to the next slide, we've reported annual revenues of $819.9 million, which is up from the $814.2 million last year. In our regulated segment, reported revenues of $800.1 million were up 2.6% compared to the $779.6 million in 2015. Operating and maintenance expenses were down 1.4% to $304.9 million for the year compared to $309.3 million in 2015.

For our regulated segment operations and maintenance increased just less than 1% to $285.3 million compared to $282.9 million last year. We reported net income of $234.2 million or $1.32 per share, compared to $201.8 million or $1.14 per share in 2015. Chris mentioned the adjustment for the Marcellus write-off on an adjusted basis. Earnings per share of $1.32 increased by 4.8% over the 2015 adjusted income per share.

Turning to the next page, let's take a look at the full-year revenue comparison, starting with our revenue for 2015 of $814.2 million. Regulated growth rate surcharges, assumption, and other factors increased revenue by approximately $20.5 million. From there, lower revenues from the Company's sale of certain of it's market-based activities offset the increase by $14.8 million.

The next page we'll look at O&M expenses, starting with our O&M for 2015 of $309.3 million. Increased employee related costs and regulated acquisitions, increased O&M by approximately $10.4 million. From there, lower production costs, expenses related to our sale of our market based activities, and other factors decreased expenses by $14.8 million, getting us to an overall decrease of $4.4 million or 1.4% in O&M expense for the year.

The next page, looking at earnings per share, starting with our EPS for 2015 of $1.14 and adding in the adjustment of $0.12 for the impairment of the JV pipeline, as we mentioned earlier, brings us to the 2015 adjusted income of $1.26. From there tax repair benefits, rates and surcharges, and regulated growth, accounted for an increase of about $0.08.

We also saw some minor earnings from our remaining market-based activities and consumption. And from there, higher expenses and other factors decreased EPS by approximately $0.02 net, resulting in the $1.32 we recorded for the year.

Moving on, let's take a look at our rate activity schedule. Recapping 2016 from a rate perspective, Aqua America's regulated subsidiaries received rate awards and infrastructure surcharges in six of our eight states, with an estimated increase in annualized revenues of approximately $5.6 million; including $1.1 million of revenues recognized under interim rates during 2015.

Thus far in 2017, we completed rate cases or surcharges in three states with $3.7 million in additional revenue. We also have a rate case pending in Ohio, requesting an additional $5.6 million of revenue. Additional rate information can be found in the appendix to this presentation.

And with that I'll turn the call back to Chris, who will discuss our expectations for the future.

---

**Chris Franklin** - *Aqua America Inc - CEO*

Great, Dave thanks. So let's take a look at what lies ahead. We continue to be very excited about our opportunities, particularly our growth opportunities and particularly in water and wastewater. Among our top priorities for this year 2017, we plan to continue to grow our rate base from both acquisitions and needed infrastructure improvement. In fact, we'll again spend CapEx at record levels next year.

We'll focus on our operating efficiencies and this is one of our hallmarks and we won't lose sight of operating efficiency. We'll also focus on our safety programs as we want our workplace to be the safest in the industry and we'll continue our tremendous focus on safety programs.

We'll also continue to focus on succession planning; as we know there's a wave of utility retirements coming through in most of the utility industry and we plan to be very prepared for that wave as we build greater diversity in our Company and greater depth of bench. I think we're doing that very, very well already.

Of course we'll continue to work on fair market value legislation, as this helps to fuel the growth in our municipal world and in states where it makes sense, we'll spend a lot of time in 2017 trying to get that legislation through the legislatures. So I'll close by reviewing our 2017 guidance that we provided in January.

On the next slide you'll see our full-year earnings per share guidance to be in the range of $1.34 to $1.39. On a same system basis, we expect O&M to increase only 1% to 2% for the full year and as always, we'll remain very focused on that aspect of the business.

We expect to invest more than $450 million in infrastructure in 2017. Again, this is another record for us. And more than $1.2 billion of CapEx will be spent over the next three years between now and 2019, which will continue to improve and strengthen our existing infrastructure for the customers that are already due within our footprint. Now these investments allow us to provide a high quality of service to our customers throughout that footprint.

When we spend capital, we talk about our capital budget of $1.2 billion over that time but we're also going to improve systems that are new to us; so new acquisitions and the improvements in those systems. That will be over and beyond our $1.2 billion CapEx budget. We don't budget for acquisitions or the improvements that are associated with those acquisitions.

We also expect to grow rate base as a result, approximately 6% to 7%. And regarding one of our most commonly asked questions, our PA rate case, we expect to stay with our original plan, we've been discussing for some time now; and that's to file a distribution system improvement charge in 2017 later this year and we'll follow then with a full rate case in 2018 with an expected resolution in 2019. Finally, year over year we expect our total customer growth to be in the range of 1.5% to 2%.

Now before we end the call, Dave and I would be happy to take any questions that you might have.

## QUESTIONS AND ANSWERS

**Operator**

(Operator instructions)

David Cater, Baird.

**David Cater** - *Robert W. Baird & Co. - Analyst*

Hello, thank you for taking the question. I was hoping you can provide some color on your 1.6% customer growth. What percentage of that was organic and is that level of organic growth sustainable, do you think?

**Chris Franklin** - *Aqua America Inc - CEO*

Let's take a look at that piece of organic here to get it right for you. Our organic customer growth was about 6,500. And so the balance or 8,700 were from the 19 acquisitions we did during the year.

**David Cater** - *Robert W. Baird & Co. - Analyst*

Got it.

**Chris Franklin** - *Aqua America Inc - CEO*

I'm sorry. It's the other way around. So our acquisitions were 6,500 and organic growth was 8,700.

**David Cater** - *Robert W. Baird & Co. - Analyst*

And is that level of organic growth something that we can think about going forward, do you think is sustainable?

**Chris Franklin** - *Aqua America Inc - CEO*

Yes, I don't see why that wouldn't be a sustainable level of organic growth.

**David Cater** - *Robert W. Baird & Co. - Analyst*

Excellent. Thank you. And lastly I was hoping if you could provide some color on what levers you have to decrease the O&M ratio and what are your long-term goals there, your efficiency targets?

**Chris Franklin** - *Aqua America Inc - CEO*

Yes, so the challenge with what we called the efficiency ratio is, as you buy municipal systems and as we're in that world now of municipal systems, you have this delayed rate impact. So we will buy it, and typically it's a multiyear phase, where we wait for a rate case. And so as we do that, expenses slightly climb and then of course as we recover in rates, we would get that all back.

So over time, we have a nice, strong O&M to revenue ratio. As you look at it and this is the non-GAAP measurement that we used in the industry. We're at about 33.4% today and so it's very strong.

I think it's still the strongest in the industry, despite our municipal activity. But I would expect as we ramp up municipal activity, that expenses could front run revenues at least for a short period of time until we get rates. So it could impact that ratio slightly.

**David Cater** - *Robert W. Baird & Co. - Analyst*

Got it. Thank you.

**Operator**

Ryan Connors, Boenning & Scattergood.

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Good morning, thanks for taking my question. I wanted to actually, Chris, thanks for the reiteration of the timeline there on the Pennsylvania rate activity. But now that we're more into the tactical timeframe of this, I wonder if you could give us any modeling guidance on when you would actually expect the DSIC to begin actually impacting the P&L.

Would that be something you'd expect to see a little bit of that in the back half of this year or should we hold off on expecting any of that until 2018?

**Chris Franklin** - *Aqua America Inc - CEO*

Yes, I think it's fair to say back half of the year certainly. And I think that's a very fair and I would say more towards Q4 than Q3.

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Okay. Good, that's good that's helpful. And then I was just curious, Ohio, you just got new rates there; another one in the pipeline, just curious what's the reasoning behind or the dynamics behind such rapid succession there in Ohio?

**Chris Franklin** - *Aqua America Inc - CEO*

Well we have a couple of different things going on in Ohio, right, we have the regulated, fully regulated, which is the PUCO rates and we go in on a fairly regular cadence for that. And they have a, they don't call it a DSIC out there but a SIC and we then have the locally the regulated system. In Baseline, Ohio, for example, we go to the county and the county regulates.

So we go in for rates there but it's not the same that's going into commission, it's that those cases are reviewed locally and the rates are approved locally. So it's a much more, I'm going to use the word efficient, but in the sense that you're not prosecuting a full rate case the rate case expenses are a lot more efficient than they would be otherwise.

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Interesting.

**Chris Franklin** - *Aqua America Inc - CEO*

I would say you have multiple rate divisions there, Ryan if you think about it. One large at PUCO and then two smaller, which are locally negotiated.

**Dave Smeltzer** - *Aqua America Inc - CFO*

And you know, Ryan, Ohio is our second-biggest state and its obviously some very old towns that we serve where there's significant opportunity for infrastructure rehabilitation.

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Yes. That's good. I wasn't aware of that. That's good color. And my last one was just on the -- I realize you're mostly out of the market based businesses now but you do still have the service line protection and I noticed that there's new marketing documents that home serve is using an they're much more robust. Really it looks great actually. Might actually get me on board for the first time.

But is that something that you're aware of that they've really beefed up their marketing of that? And have they given you any forecast or expectation on their expectations of how that more aggressive marketing will impact uptake on the service line protection? I mean it's really a multipage brochure now with all these neat graphics and stuff. Is there any expectation that, that will accelerate that?

---

**Chris Franklin** - *Aqua America Inc - CEO*

Remember the offerings today are a lot more robust than when we first started, when it was really a service line protection, water service line protection. Now the services are into wastewater, electric, everything else. So the offerings are much more robust.

What they call take-up rates or saturation in my mind, are already significant. So I don't have any projections as to what they think they can attain through their new efforts. But I would say that just looking at what they saturated in the states where they do business with us already, it's very, very strong.

---

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Okay. And then I apologize but one more, while we are on the topic, it comes to mind that this is a broad question for anybody in that business but how does the Commission's look at that? If someone subscribes to that, it goes on the water bill, right?

So I would assume they don't look at that then as part of your quote, unquote rates, when they're assessing total household wherewithal to meet the water bill and whatnot. How do the Commissions look at that when someone subscribes?

---

**Dave Smeltzer** - *Aqua America Inc - CFO*

Yes, Ryan. It's Dave. Most of the Commissions don't really look at it very much. They recognize it's a nonregulated business and they allow that to go on unattached.

There's an occasional opportunity when the commission does take a look at it and incorporate into a rate case but we've generally only seen that in one state.

---

**Chris Franklin** - *Aqua America Inc - CEO*

The fact is that it doesn't take really staff time or overhead from the Company. Since it operates largely independent, it really doesn't impact rates.

---

**Ryan Connors** - *Boenning & Scattergood Inc. - Analyst*

Got it. Okay. Well, thanks for your time.

---

**Operator**

(Operator instructions)

At this time we have no further questions in the queue. I would like to turn the conference over to Mr. Brian Dingerdissen for any additional or closing remarks.

---

**Chris Franklin** - *Aqua America Inc - CEO*

Folks, this is Chris. Thanks for joining us today and if you have follow-up questions, we're always available. Thank you so much.

---

**Operator**

Ladies and gentlemen, this does conclude today's presentation. We appreciate your participation.

---

**Company Description**: *Aqua America is a water and wastewater utility holding company with operating subsidiaries serving ~3MM people. WTR provides regulated service to customers in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, Virginia. The company's history spans over 125 years.*

# Aqua America, Inc.

WTR – NYSE – Underperform-2

**Q3'16 Results from WTR; Reiterating Underperform.**

**Investment Highlights**

- Aqua America reported Q3'16 EPS of $0.41 versus $0.38 in the year-ago period. EPS in the quarter beat our estimate for $0.39, which equaled consensus. Core revenue/expense items were positive in Q3, although a $2.3MM swing in JV profit/loss helped growth too.
- Revenue grew 2.5% to $226.6MM in Q3, missing our estimate for fractional growth. Regulated revenues grew ~$9MM while non-reg fell ~$4MM, in a favorable trend we expect to persist in Q4.
- WTR has $8.1MM in rate and surcharge applications pending in IN, OH, and VA, with ~$4.4MM in net awards so far this year. We believe material rate activity in PA is still a couple years away, meaning dynamism to top line is likely to key off acquisitions.
- O&M expense grew 1.6% in Q2, which was ahead of our expectations but offset the revenue beat. Same system O&M is still expected to be +1% to +2% for 2016, although consolidated growth should remain subdued on non-reg divestitures.
- The effective tax rate in Q3 slipped to 10.3% from 12.4% in the year-ago period, as WTR continues to maximize its repair tax 'lever'.
- Management reiterated FY 2016 EPS guidance in the range of $1.30-$1.35. Reflecting upside to Q3, our FY 2016 estimate moves up $0.02 to $1.33; our 2017E rises $0.01 to $1.36.
- We are reiterating our Underperform rating and 1-year $27 price target. At our target, WTR would trade ~20x our 2017E EPS which we view as fair value given peer multiples, and more importantly, just sector-average growth prospects over the next few years.
- At this point, our Underperform continues to flow in agreement with our Underweight allocation suggestion to each utility vertical (gas, H20, electric).

**Note Important Disclosures on Pages 5-6**
**Note Analyst Certification on Page 5**

## ADDITIONAL DISCUSSION—Q3 RESULTS & FORWARD OUTLOOK

Q3 was another good quarter operationally, in our view, and a bit better quarter financially than we had seen yet this year. EPS growth of 8.3% marks the company's best growth rate since Q1 of 2014, a period over which most growth has been <5%. Revenue growth was perhaps our biggest surprise, although with Aqua citing increased usage to some extent, we believe there could be at least a hint of a tough comparison for next year.

Moving forward however, we believe the revenue environment remains challenging without rate activity in Pennsylvania being in the mix; however, we still like seeing the market-based businesses being either liquidated or disposed.

## ADDITIONAL DISCUSSION—FINAL THOUGHTS

Our negative thesis in Aqua for some time now has been multiple compression due to slowing earnings growth in conjunction with ROE-compression. Over the past couple of months however, we have been cultivating a complementary thesis that centers on M&A. Somewhat unfortunately, Aqua shares a footprint in two populous and important states (PA and NJ) with its primary rival for M&A transactions. Recently, we have seen a flurry of large deals 'won' by parties other than Aqua.

We believe much of the positive fervor across the back half of 2015 and into 2016 was tied to a refocused and revitalized M&A strategy, in which Aqua is pursuing larger deals. Should consensus wane from WTR's ability to consistently win these bigger deals long-term, we see risk for further re-rating lower.

## SUITABILITY

We assign WTR a suitability rating of '2.' A complete description of our suitability scale is on page 5. We view Aqua America as a strong operator in the water space, and flag consistent cash flow and earnings predictability due to entrenched regulated monopoly franchises. High sensitivity to a single state (PA) versus some larger utility peers is the primary factor that pushes WTR just below our most conservative '1' suitability rating. A strong history of returning capital to shareholders, low cyclicality and industry-appropriate leverage keep the company well above our more aggressive '3' rating.

## CONSIDERATIONS AND RISKS

We view all companies in the Water Utilities industry as being subject to significant regulatory and political risk. Utility operations are heavily regulated; negative rate-making climates and/or new environmental restrictions may affect the company's ability to earn a sufficient return on invested capital. Weather, natural disaster, and availability of water supplies could negatively impact sources of water, demand for water services, and a utility's ability to supply water to customers. Risks associated with the collection, treatment, and disposal of wastewater could also impose significant costs.

Significant Cap Ex are required to maintain infrastructure and expand rate base. Should WTR suffer from the lack of ability to secure appropriate funding to make investments, or if delays are incurred in completing projects, operating results could be negatively affected. Contamination of water could result in service interruptions or cause enforcement actions. Assets can be subject to condemnation through eminent domain. The company's non-reg businesses provide performance guarantees and have long-term contracts. Additionally, WTR is subject to all other risks that result from operating as a public company.

Our Suitability rating is 2 on a 1-to-4 scale (1 = most conservative, 4 = most aggressive).

1 Year Price History for WTR

## PORTFOLIO MANAGER BRIEF

Aqua America reported net income of $73.2MM and EPS of $0.41 for 3Q16, which was in line with consensus estimates. The company executed on key initiatives, including capex activity and acquisitions, as well as continuing its efforts to minimize the cost structure. Guidance for 2016 was reaffirmed, and while we made a few minor adjustments to our model the changes had no impact on valuation. We maintain our BUY rating and $39 Fair Value based on the shares trading to a P/E level of 26x our 2018 EPS forecast of $1.51.

## ANALYST NOTES

- Solid Quarter Across the Board. Aqua America reported a solid quarter with no surprises and in line results. Net income of $73MM was up 8.5% YoY, while reported EPS of $0.41 was up 7.9% YoY. The YoY growth was driven in part by increased revenues due to higher consumption, higher rates, and regulated growth. Additionally, Aqua America's continued focus on cost-cutting and cost-conscious decisions was also cited as having a positive impact on bottom line performance.
- Acquisitions Continue to Have a Positive Impact. Acquisitions and organic growth have increased Aqua's customer base by 1.3% so far in 2016, with acquisitions accounting for 5,700 of the 12,900 new customer connections. Aqua has made acquisitions this year in Pennsylvania, Indiana, North Carolina, Virginia, New Jersey, and Ohio. Of note was management's indication that opportunities for acquisitions are increasing as municipalities struggle to keep pace with necessary infrastructure improvements, and its current pending acquisition agreements will add another 4,700 customer connections.
- Continued Execution on Robust CAPEX Plan. Aqua America has continued to execute on its CAPEX plans; year to date, the company has invested $270MM in infrastructure improvements, with $80MM left in the budget to hit the $350MM goal for 2016 capital spending. These infrastructure improvements come as part of Aqua's $1.1B investment plan through 2018. As we have noted previously, the plan will add much needed improvements to infrastructure while also contributing to rate base growth.
- Guidance for 2016 Reaffirmed. Aqua reaffirmed guidance for the year, with EPS expected to be between $1.30 and $1.35. Customer growth is expected to be between 1.5% and 2.0%, while CAPEX will top $350MM. Aqua has not yet released 2017 guidance.

 

- Summary/Valuation - Aqua turned in yet another solid quarter with no surprises. Continued execution on initiatives, strong leadership, and growing opportunities for acquisitions all drive a strong story. As 2017 approaches, our focus now shifts to Aqua's next Pennsylvania rate case, which it expects to file in late 2018 with new rates effective in 2019. Given the ongoing capital program since they last visited with the PAPUC on the topic of rates, we note rate base should increase materially, which we'd expect to have a positive impact on WTR's bottom line. We maintain our Buy rating and $39 Fair Value target, based on the shares trading to a P/E of 26x our 2018 EPS estimate of $1.51.

## Aqua America

**WTR: Valuation Tempting But We Remain On Sidelines For Now**

**Market Perform**

Sector: Water Utilities
Market Weight

- **Summary.** No changes to our EPS outlook or thesis following WTR's Q3 report. We remain attracted to WTR's strategy of (1) timely recovery of infrastructure investments and (2) consolidating the fragmented water and wastewater industry. We believe WTR's revised approach to municipal M&A will start bearing fruit in 2017 aided by enabling legislation in IL, IN, NJ and PA as well as the potential for NC and OH to follow suit. We reiterate our Market Perform rating despite the fact that WTR shares have underperformed year-to-date (+2% vs. +17% for our water utility index and +13% for the S&P Utilities) and trade at 8-10% P/E discounts to water utility peers on our 2017-19E EPS. We believe the discount valuation reflects investor concerns that the water industry premium P/E will be eroded if WTR announces a M&A deal outside of the regulated water space. Should WTR announce a strategic deal, it could create an attractive entry point in our opinion.

- **Relative Valuation Thoughts.** Currently, the water utility sub-sector enjoys premiums of roughly 35% to the electric and 20-25% to the gas utility sub-sectors. We don't disagree that a non-water transaction could trigger further near-term underperformance in WTR shares – particularly if the relative size of the hypothetical target is similar to WTR. However, we do question the sustainability of the waters' current relative premium. We believe current water utility share prices imply a roughly 75 bps lower equity risk premium (ERP) than electrics in our dividend discount models. We agree a lower ERP is warranted for the lower risk water business model (might 75 bps be too steep though?) but point out that if interest rates eventually rise from historic lows, the implied premium P/E multiples represented by a 75 bps lower ERP naturally diminish as the risk-free rate rises. In other words, the 35% relative premium the waters currently command over the electrics should contract as interest rates rise.

- **Implications to Our Thesis.** If WTR's hypothetical deal makes strategic sense (increases WTR's EPS growth rate, offers capex and rate base growth at least commensurate with the water utility industry, possesses a similar business risk profile, etc.) and allows WTR to take advantage of today's premium currency (WTR trades at P/E premiums of 22-24% to electric and 8-15% to gas utilities), a further pullback in shares could create an attractive entry point versus water utility peers as the erosion of the relative water premium may be inevitable if/when rates rise. So while we find WTR's current 8-10% P/E discount to water peers tempting, we elect to remain on the sidelines until (1) the details of a potential deal materializes and (2) there is a potential further pullback in shares.

- **Outlook.** Our 2016-19E EPS remain $1.33, $1.40, $1.47 & $1.55. We do not assume any strategic M&A despite the fact that WTR has financial flexibility and WTR has articulated a clear desire to explore such opportunities. Barring a very sizeable deal, we do not foresee the need for new equity and, in fact, WTR has previously indicated that roughly $750MM of additional debt capacity exists. As such, we believe share buybacks and/or accelerated dividend increases (greater than 8%) may be considered to achieve a consolidated equity ratio closer to 45%.

**Valuation Range: $31.00 to $33.00**

Our VR is based on a P/E multiple (5-10% discount to 17E water median of 23.6X to our 18E of $1.47) and DDM analyses. Primary risks are regulatory and M&A.

**Investment Thesis:**

We are attracted to WTR's strong fundamentals. Our Market Perform rating primarily reflects valuation considerations.

# Aqua America, Inc. (WTR)

## Q3 Conference Call Highlights

**Reiterate Neutral rating after WTR's Q3 conference call.** Q3 beat estimates as favorable weather led to increased consumption, although WTR expects to be at the mid-to-low point of its EPS guidance range for 2016. Additionally, management indicated higher-than-expected organic growth and a strong acquisition pipeline should ensure customer growth going forward. WTR tentatively plans to file for DSIC in 2017 and a full rate case in 2018, which should help EPS growth. We continue to wait for a clearer path to earnings growth before becoming more constructive.

- **Management expects to be at the mid to low point of EPS guidance range for FY:16.** Q3 was stronger than expected due to increased consumption, larger-than-expected organic growth, and fee recognition in its JV. Despite the strong Q3, Management expects to be at the mid to low point of its FY:16 EPS guidance as the one-time fee benefits in Q3 will not continue in Q4, and we have adjusted our model accordingly. For additional details about Q3 performance see: Q3 First Look Note.
- **Acquisition opportunities remain robust and competing bidders are acting rationally.** WTR completed 13 acquisitions through November 1, adding ~5,707 total customers. WTR also has 6 pending acquisitions for an additional 4,700 customers. The company has achieved 1.3% customer growth YTD (~12,900 customers), and continues to expect y/y customer growth of 1.5%-2.0%. Management is optimistic about future acquisitions and municipals seeking to sell their water businesses are at an all-time high.
- **WTR tentatively plans to file for a rate case in Pennsylvania in 2018 (2019 effective date), and potentially DSIC in 2017.** WTR expects to file to recover some revenue in 2017, with a full rate case in 2018. Under this timeline, new rates from a 2018 rate case filing would likely come into effect in 2019. WTR currently has pending rate cases in IN, VA, and OH with requested annualized revenue increase of $8.1M.
- **Warmer weather in Pennsylvania, Virginia, and Ohio, drove increased consumption during Q3.** Warmer-than-expected weather in several service territories led to increased consumption y/y. Given unfavorable weather conditions in Q2 and expectations for a typical Q4, however, management expects the effect of weather to be neutral overall in FY:16.
- **$32 price target.** Our price target is based on a ~22x P/E multiple of our 2018 EPS estimate. This is in line with comps which are currently trading at a ~22x average multiple.

**Aqua America is a holding company for numerous regulated water/waste water utilities serving almost 3.0 million people in the eastern half of the U.S.**

# Investment Thesis

**Aqua America (WTR) is the second-largest investor-owned water utility in the US.** WTR operates in eight states largely in the eastern half of the U.S. and serves ~3 million people. WTR maintains over 12,500 miles of pipe, of which almost half are located in PA. WTR has completed over 75 acquisitions in the past five years. Known as Philadelphia Suburban Corporation until 2004, Aqua America is headquartered in a Philadelphia suburb where its corporate roots date back to 1886 for providing water/wastewater services to the suburbs of Philadelphia.

**US water infrastructure needs should drive long-term earnings growth.** The water infrastructure in the United States is in significant need of upgrade and expansion between 2013 and 2033. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

**Planned capital investment should expand rate base and generate growth for the company in the long run.** We expect Aqua America's long-term EPS growth to be fueled in part by the company's $350-$360 million annual capex investment, (~2.6x depreciation). $1.1B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

**The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms.** Approximately 70% of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

**Continued acquisitions should help customer growth.** The company targets 1.5-2.0% customer growth going forward, 0.5% from organic growth and 1% through acquisitions. Aqua has successfully acquired hundreds of water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth

**M&A opportunities expand with focused growth strategy.** WTR completed 16 acquisitions in 2015, providing 1.1% to WTR's overall customer growth of 1.9%. We expect M&A to remain at heightened levels reflecting recent legislative changes in key states and WTR's realigned corporate organization and expanded executive team tasked with executing a focused growth strategy that emphasizes larger (mainly municipal) water/wastewater acquisitions

**Potential expansion into non-regulated water space could drive growth in the long run.** The company has recently divested from many of its market-based businesses that it considers too risky and hard to grow. WTR is actively evaluating other market-based activity, and believes that it will contribute to growth in the long run, but does not foresee non-regulated business becoming more than 15%-20% of Aqua America. WTR has also indicated that it would consider moving into other regulated utility space, believing the core competencies of the regulated water utility market would be profitable in other utility spaces.

**Valuation.** Our $32 price target is 22x our 2018 EPS estimate, in line with peers when fully valued (20x-22x 2018E EPS), reflecting average EPS growth opportunities and generally more constructive regulatory mechanisms.

# Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

**Regulation.** Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

**Weather.** WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

**Acquisition risk.** WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

**Product quality.** Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

# Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

## Aqua America

# WTR: Status Quo Remains

**Stock Rating/Industry View:** Equal Weight/Neutral
**Price Target:** USD 34.00
**Price (01-Nov-2016):** USD 29.99
**Potential Upside/Downside:** 13%
**Tickers:** WTR

**WTR reported Q3 results and reaffirmed 2016 guidance**

WTR reported $0.41 for Q3, in line with our estimate and a penny ahead of consensus. 2016 guidance was reaffirmed at $1.30-$1.35 with commentary on the call pointing to the middle to just below the middle of the range similar to previous quarters. There was not much in terms of incremental information, however the following items should be of interest.

- Smaller tuck-in acquisitions are getting more competitive based on both strategics and other municipalities bidding. This is especially the case in PA, IL and NJ based on recent legislation.
- The larger the acquisition, the more competitive they seem to be. There has been a definite chase up in price; it remains to be seen whether under fair value legislation this will result in the winning bidders having to carry some level of goodwill.
- On the strategic front, WTR still sees opportunity to do a deal that leverages its regulatory expertise to the extent that it identifies a deal that would be accretive. We continue to believe that the potential acquisition of a regulated asset or company outside of water is the primary overhang on the shares.
- Pennsylvania will see is DSIC filing in 2017 and a general rate case filed in 2018 for new rates in 2019.

## Aqua America (WTR - $29.79 - NYSE) Lowered '16-'18 Estimates; Reiterate - Buy

| Year | EPS | P/E | PMV | |
|---|---|---|---|---|
| 2018P | $1.50 | 19.9x | $40 | Dividend: $0.77 Current Return: 2.6% |
| 2017P | 1.40 | 21.3 | 37 | Shares O/S: 177.8 million |
| 2016E | 1.30 | 23.0 | 35 | 52-Week Range: $35.83 - $28.05 |
| 2015A | 1.26 | -- | -- | |

**COMPANY OVERVIEW**

Aqua America (Bryn Mawr, PA) is the second-largest publicly traded water utility in the US, serving about 3 million people in Pennsylvania (52% of earnings), Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

**Reason For Comment**

- On November 1, 2016, WTR reported third quarter 2016 earnings of $0.40 per share compared to $0.38 per share last year. Rate increases, customer growth, and lower operating expenses more than offset the negative impact of lower consumption. Year-to-date, WTR subsidiaries were awarded $5.5 million in annual rate increases and currently have requests totaling $8.1 million awaiting PUC decisions. In addition, WTR closed on thirteen acqusitions adding 5,298 water and 409 wastewater customers. Year-to-date, WTR added 12,900 customers, including oganic growth, for a 1.3% total customer growth rate.

- Year-ot-date operating and maintenance (O&M) expenses declined -1.8% and the first-half 2016 operating efficiency ratio (O&M as a percent of operating revenues) declined to 36.5%, from 37.5%, for the same period last year.

**Table 1** **WTR Selected Financial**

| | Third Quarter | | | Nine-Months | | | Full Year | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 2015 | 2016 | Change | 2015 | 2016 | Change | 2014A | 2015A | Change | 2016E | 2017P | 2018P |
| EBITDA | $ 127.9 | $ 132.1 | 3.3% | $ 342.6 | $ 352.6 | 2.9% | $ 442.0 | $ 457.2 | 3.4% | $ 476.6 | $ 508.9 | $ 543.4 |
| Net Income | 67.4 | 73.2 | 8.5 | 173.4 | 184.5 | 6.4 | 213.9 | 223.2 | 4.3 | 231.7 | 249.0 | 267.5 |
| EPS | $ 0.38 | $ 0.41 | 7.9 | $ 0.98 | $ 1.04 | 6.1 | $1.20 | $1.26 | 4.3 | $1.30 | $1.40 | $1.50 |

*Source: Company data, Gabelli & Company estimates*

- WTR affirmed 2016 EPS guidance of $1.30-1.35 per share (but suggested the lower-end was more likely) based on 1.5-2.0% customer growth, same-sytem O&M increase of 1-2%, more than $350 million in annual capital investments and 6-7% annual rate base growth. Given the use of repair tax deductions, Aqua-PA (55-60% of WTR) has delayed the need for a general rate case or DSIC since 2011, which has benefitted customers $10 per month. The company plans to file a ~15% rate increase in late 2017 or 2018.

- We lowered our 2016-2018 earnings estiamtes to $1.30, $1.40 and $1.50 per share, from $1.35, $1.45, and $1.55 per share, respectively. Earnings growth will continue to be driven by rate base investments, acquisitions, cost controls, infrastructure surcharges, and the pipeline rehabilitation business.

- We continue to believe WTR is well positioned to continue its successful acquisition strategy given U.S. water (53,000 systems) and wastewater (16,000 systems) industries are extremely fragmented and municipally dominated (water is 85% municipally-owned; wastewater 97%). Recent legislation in IL, IN, NJ and PA encourages consolidation by allowing the purchase price in rate base or applying uniform rates state-wide. We are encouraged by the possibility that the pace of municipal acqusitions could accelerate. WTR currently has four municipal and two private system acquisition pending, which would add 4,700 customers.

- The 2016-2018 capital investment program totals $1.1 billion, including $350 million in 2016. Roughly 63% of the investment is allocated toward pipe replacement or upgrades in jurisdictions with surcharge eligible infrastructure programs (PA, IL, IN, OH, NJ, NC). The PA PUC which regulates $2.4 billion of WTR's $3.5 billion rate base allows for a quarterly distribution system improvement charge (DSIC).

- Given strong cash flow, infrastructure surcharges and cash from asset sales, WTR has minimal external funding needs. As of September 30, 2016, the common equity ratio was 49%, and S&P credit rating was A+ for Aqua Pennsylvania.

**Valuation**

WTR is a well-managed, low-risk, high-quality conservative utility with unique growth opportunities. Shares offer a 2.6% current return on the $0.77 per share annual dividend. Shares trade at 22.9x and 21.3x our 2016 and 2017 earnings estimates and 296% of book value ($10.09 per share), which compares to group multiples of 23.9x and 22.2x earnings and 288% of book value. Over the past ten years, WTR shares have traded between 15-35x forward earnings and at significant premium multiples to the group. We consider WTR to be one of the premier water utilities in the nation with a warranted premium, given the company's national presence, strong financial condition, successful track record, and earnings and dividend outlook. Our 2016-2017 PMVs are $35 and 37 per share, respectively, based on 3.5x book value.

# MANAGEMENT DISCUSSION SECTION

**Operator**: Good day and welcome to the Aqua America Q2 2016 Earnings Call. Today's conference is being recorded. At this time, I would like to turn the conference over to Mr. Brian Dingerdissen. Please go ahead sir.

## Brian Dingerdissen
*Chief of Staff & Head of Investor Relations*

Thank you, Dana. Good morning, everyone. Thank you for joining us for Aqua America's 2016 second quarter earnings conference call. If you did not receive a copy of the press release, you can find it by visiting the Investor Relations section of our website at aquaamerica.com or by calling Scott Siegel at 610-520-6361. The slides that we will be referencing can be found on our website. There will also be a webcast of this event available on our site.

As a reminder, some of the matters discussed during this call may include forward-looking statements that involve risk, uncertainties and other factors that may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. Please refer to our most recent 10-Q, 10-K and other SEC filings for a description of such risk and uncertainties.

During the course of this call, reference may be made to certain non-GAAP financial measures. A reconciliation of these non-GAAP to GAAP financial measures is posted in the Investor Relations section of the company's website.

Presenting today is Chris Franklin, Aqua America's Chief Executive Officer and Dave Smeltzer, the company's Chief Financial Officer. After the presentation, we will open the call up for questions.

At this time, I'd like to pass it over to Chris Franklin, Aqua America's President and Chief Executive Officer.

## Christopher H. Franklin

*President & Chief Executive Officer*

Okay. Thanks, Brian, and thanks everyone for joining us this morning. On today's call we'll talk about some recent news on the company and I'll comment on some of the highlights from the quarter, including our acquisitions, and Dave Smeltzer, our CFO will take us through the financial results and rate activity. And then we'll conclude the formal portion of the presentation by reviewing our guidance for 2016, and then answer any questions that you might have.

So let's start with some organizational, I think we've spent a lot of the first year putting the organization together and we'll call it tweaks at this point, but I think important enough to mention here. You may have seen some of these in our recent press releases, but Stan Szczygiel was recently promoted to Vice President, Finance, and Treasurer. This is an important one for us. Stan has been with the company for 10 years now, and Stan and I have worked very closely over the last 10 years. He was the Regional Controller of the Southern Division, when I was the Regional President for Southern Division. So, we worked here a long time. Stan then went onto be Director of Planning, Vice President of Finance, and now added Treasury to his responsibilities.

He's got a vast resume of significant responsibilities including executive roles in companies such as Exxon, Foster Management Companies and NovaCare. I have to say we are very fortunate at Aqua America to have the bench we have and so when the position opened, very quickly Stan was promoted to the job as Treasurer and is well qualified and will do a terrific job.

Another new member of our team that I'm very excited about is Chris Crockett. Chris joined in mid-June as our new Chief Environmental Officer. And Chris reports up through Bill Ross, our Chief Engineer up in Rick Fox's organization. You'll recall, Rick addressed the group last time. Rick is our Chief Operating Officer. Chris is going to be responsible for overseeing water quality, environmental compliance and all of our drinking water and wastewater systems in the eight states. He'll also manage Aqua's in-house water and wastewater lab as well the company's water quality services and water resources department. He comes to our company with 20 years of experience, most recently as Deputy Commissioner for Planning and Environmental Services at the Philadelphia Water Department. This was a key pick. Chris will do its great job for us well.

And again demonstrating the strength of our bench, Shannon Becker, our former President of our Aqua Virginia Company, which is a relatively small part of our system in terms of customer count. Shannon has been appointed to President of our Aqua North Carolina Company which is our third largest state by customer count. Shannon succeeds Tom Roberts who was with us for 30 years, retired. Tom did a great job as the President of Aqua North Carolina. Now in his role as President of Aqua North Carolina, Shannon will supervise 160 employees and be responsible for overall operations. Now Shannon was previously the Controller in Aqua North, Carolina before he was President in Virginia, so he is well trained and very familiar with North Carolina, and he will, also will do a terrific job.

And finally again from our bench John Hildabrant has been named President of our New Jersey Company. John has been with the company for 11 years and previously served as our Operations Manager in that same [ph] stay (05:10) of New Jersey. He has got a great combination of skills. John has been involved with our regulatory filings, our rate cases, growth of the company and certainly operations. So I really can't say enough about the strength of this management team and I fully expect that this team will continue to deliver the operating results that we're all so proud of and that our customers have come to expect.

Now we'll take a look at the quarterly results. The Board met yesterday on a regular scheduled Board meeting and increased our dividend by 7.5%. We're very proud to say this is the 26th dividend increase in 25 years and it's our 71st year of paying a consecutive quarterly dividend, we're very proud of that. The second quarter also saw strong performance as we continue to pursue our three-pronged growth strategy. We've talked about this on previous calls, as you might remember municipal acquisitions, prong number on one; strategic M&A is prong number two; and market based activities as prong number three.

As we think about this growth strategy, we'll continue to focus on and leverage our core capabilities and among those and we've mentioned these before as well, is our ability to both financially and operationally make significant capital investments in infrastructure. Two, our ongoing regulatory relations, the work that brings to the company, strong credibility with our regulators. And finally as we think about our core capabilities, we think about our ability to operate utilities at optimal levels and of course, you're very familiar with the efficiency we bring in our O&M.

Now on growth, so far this year we've added 5,400 new customer connections, from acquisitions alone, slightly more than a 0.5%. Clearly revenues were down slightly, decreasing just less than 1% to $203.9 million in the second quarter of 2016, from $205.8 million in the same quarter last year. A large portion of this though comes from the decreased revenue from our market based activities and we've discussed that extensively in our last call. And with that said earnings per share were up, 3.1% to $0.33, compared to $0.32 reported in Q2 of 2015.

Now look at our dividend history, as I said, the company takes great pride in rewarding its shareholders with quarterly dividends. Over the past ten years, we've more than doubled the dividend and achieved the compounded annual growth rate of 7.6%. And we're going to continue on this path to achieve the Board's stated payout ratio target of between 60% and 70%. Currently, that payout ratio is right around 57%.

Now let's look to our growth activity for the year. Looking at the acquisitions completed so far in 2016, we've closed 10 deals, eight of them were water; two of them are wastewater systems. As we've mentioned, we continue clearing our small deals that have been on our list for several years and you'll notice some of these numbers are small, continue to push these out, these are the ripening deals that have been sitting there for many years as we pursued a lot of the smaller tuck-ins. But I'll tell you we remain very confident in our pipeline and the increasing size of the deals that we're reviewing in our Internal Investment Committee. We meet every two weeks to review these deals. And we remain very confident in our ability to grow in the water and wastewater space. We just think there is a lot of opportunity and we're seeing more municipal interest in selling systems than we have in many, many years.

Now to date, this growth represents more than 0.5% in growth this year from acquisitions and we've also seen an uptick of approximately 0.5% in organic growth through the second quarter. So at this point, we expect 2016 year-over-year customer growth to be in the range of our current guidance of 1.5% to 2% and this includes organic growth.

So, with that I'll hand the call over to Dave to take a look at the numbers. Dave?

## David P. Smeltzer

*Chief Financial Officer & Executive Vice President*

Thanks, Chris. Good morning everyone. Today I'll review the second quarter financial results and some of the key driving factors that impacted the company's performance; and I'll also provide a look at our rate activity for the year thus far.

In the second quarter, our revenues decreased nearly 1% to $203.9 million, down from the $205.8 million in the same period of 2015. In a moment I'll show you the waterfall chart, but when we look at Q2 2015 versus Q2 2016, much of the decrease was related to market based activities along with lower consumption through the unfavorable weather conditions, and that was mostly in Pennsylvania with also some unfavorable weather in New Jersey and North Carolina.

Operations and maintenance expenses were down about 7.2% to $74 million for the quarter compared to $79.7 million in Q2 of 2015. Again I'll touch on this in the waterfall chart, but lower production expenses, lower expenses associated with our market based businesses and several one-time events led to the decrease in O&M expense. As mentioned in the release, same-utility system O&M would have been up about 1.3% year-over-year for the second quarter.

Net income was $59.6 million, up 3.9% compared to the $57.4 million in the same timeframe of 2015. And earnings per share of $0.33 as Chris mentioned, was an increase of 3.1% compared to the $0.32 reported in Q2 of 2015. Year-to-date as of June 30, revenues were virtually flat at $396 million. You can view the year-to-date waterfall charts in the appendix, but lower consumption and decreased market based revenues offset the increased revenues from the regulated business to cause that flat revenue.

Operating and maintenance expenses were down 3.5% to $147 million for the quarter compared to $153 million in the same timeframe last year. Again several non-recurring items, lower production and lower market based expenses offset the increase in employee related and regulated acquisition expenses.

Net income was $111.4 million, which is up 5.1% compared to the $106 million at the same timeframe of 2015. Earnings per share was $0.63, an increase of 5% compared to the $0.60 reported in 2015 and the year-to-date waterfall chart on EPS in the appendix will give you more color on this as well.

Let's take a look at quarterly revenue comparisons starting with our revenue for Q2 2015. Regulated growth increased revenues by 1.5%, rates and surcharges along with other factors accounted for an additional increase of about 1%. From there, revenues related to our market based activities decreased about $3 million or 1.5% of total revenue. Then a decrease in consumption associated with the unfavorable weather we saw in this quarter lowered revenues by an additional 2%, resulting an overall decrease of 0.9% to $203.9 million.

Looking at O&M expense and starting with our O&M for the second quarter of 2015 of $79.7 million, expenses tied to regulated acquisitions and slightly higher employee related cost increased O&M by 1.9%. From there lower production costs and expenses related to market based activities decreased expenses by about $3.1 million. Additionally, there were several non-recurring events that contributed to the decreased O&M for the quarter versus 2015. Again looking at same-system utilities, O&M would have increased by about 1.3% well within our guided range of 1% to 2% for 2016.

Looking at the next waterfall of earnings per share and starting with our EPS for Q2 2015, we saw lowered expenses, regulated growth and rates and surcharges account for an increase of more than $0.03 per share. From there market based activities, lower consumption and other factors decreased the EPS by approximately $0.02, resulting in the $0.33 we reported in Q2 2016.

On to rate activity, so far in 2016, we've completed rate cases or surcharges in five states with approximately $5 million in additional revenue dollars, including $1.1 million of revenues recognized under interim rates during 2015. We also have rate cases pending in New Jersey, Indiana and Ohio requesting an additional $10.5 million of revenue. Additional rate information can be found in the appendix of this presentation.

And with that I'll turn the call back to Chris who will recap our 2016 guidance. Chris?

### Christopher H. Franklin
*President & Chief Executive Officer*

Hey, Dave, thanks. So if look at the recap of our guidance, our earnings, customer growth CapEx and expense guidance is really unchanged [ph] from the second (15:41) quarter of the year. We expect full year earnings per share to between $1.30 and $1.35. And as you heard Dave talked about weather, some ups and down, flooding in Texas and some better weather elsewhere. We get more and more comfortable with the center of that range.

Year-over-year, as we've said a couple of times, we expect to land customers growth in the targeted range of 1.5% to 2 %. We expect to invest about $350 million in infrastructure in 2016 and more than $1.1 billion of CapEx through 2018. We expect our ongoing rate base growth of approximately 6% to 7%, and on a same-system O&M basis, we expect O&M, as Dave just said, to increase between 1% to 2% for the full year. So, all in all, a good solid quarter and we expect a good solid year.

And now before we end the call, I'd like to open it up and answer any of the questions that you might have.

# QUESTION AND ANSWER SECTION

**Operator**: Thank you. [Operator Instructions] We'll go first to Agnieszka Storozynski with Macquarie.

### Agnieszka Storozynski
*Macquarie Capital (USA), Inc.*

Q

Thank you very much. So thank you for your remarks today, about especially growth opportunities within the water and wastewater segments. So in light of that, can you talk us through this possibility of maybe [ph] venturing (17:28) into non-water sectors and why would you attempt to actually diversify away from water if you see so much organic growth potential within the water sector? Thank you.

### Christopher H. Franklin
*President & Chief Executive Officer*

A

Yeah, it's a good question. And as we think about growth opportunities, let's just talk for a moment about water, because we've worked with legislators in multiple states now and we've seen the [ph] positive (17:56) legislation that really provides us an opportunity to get access to a municipal market that often was not available given the prices that we could get into rate base. Now with the new legislation and the ability to pay fair market value, we see even greater opportunity, and I know our peer companies are seeing the same thing, and the activity in municipal market is certainly on an uptick. So I want to leave you with our confidence.

Having said that, we also – and we've been talking about this on a lot of our calls, have said that, the skill sets and the core competencies that we have here would work in a lot of areas. We think that the regulated market is where we excel and certainly a regulated market where we could invest capital at high rate, which is what we do very well here, and then certainly, our regulatory relations, we work very hard on to be a very credible company that does top level service and is mindful of customer pricing and everything else. And we believe that [indiscernible] (19:09) water and wastewater in the regulated market.

And finally, as we think about how we run our company with O&M, we just think, Angie, that those among other core competencies have multiple applications. And believe me, if we see an opportunity that matches those, and would enhance our utility strength in the market, we'd look at it. Having said that, we're going to be very-very prudent in how we approach it. We have a long history of being very prudent in how we think about M&A

Agnieszka Storozynski
*Macquarie Capital (USA), Inc.*

Q

Okay. But on the back of it, I mean just looking at your market valuation, wouldn't you say that your key multiple is to a large extent reflective of the scarcity value of a water utility as an investment? I mean there're very – really few sizeable public water utilities you can invest in, there are a number of international funds looking for exposure to water. Wouldn't you agree that if you were to dilute your water focus that that multiple could erode?

Christopher H. Franklin
*President & Chief Executive Officer*

A

Well, we think the multiple is largely due to the management team, I'm kidding, of course.

I think that you make a very, very strong point and I think as you look across the general utility sector, of course, water is not the only utility that's seen an increase in valuation. And so traditionally as you've pointed out, water has traded at a premium to other utilities, whether that's scarcity, we think that that we would agree that's part of it. Whether it's the safety, particularly in this market that's a component and in fact the companies are all well run. So you make a very good point, but I'm not sure that the premium is solely based on scarcity.

Agnieszka Storozynski
*Macquarie Capital (USA), Inc.*

Q

Okay. And I'm sorry I just keep asking the same questions, but again in light of the water driven growth options, are you basically trying to grow faster or become larger quickly, as behind – and that's the strategy behind the potential M&A outside of water, or is it that basically you feel the growth in the water sector is actually less visible than you might think and thus the need to maybe get some support somewhere else as far as the growth is concerned?

Christopher H. Franklin
*President & Chief Executive Officer*

A

That's a great question too. Here is I think how we think about it. The United States right now has a vast need for investment in infrastructure and we've been a leader in that in the areas where we operate. We've been investing as you know significant amounts of capital in infrastructure, in water and wastewater.

And when you think about it, you've heard the numbers that the EPA has put out there, the need for an additional trillion dollars of investment in just this space. And if you broaden that to the broader utility market, the needs, I'm very familiar with transmission from my Board membership up at ITC, the need for investment in transmission, the need for investment in gas pipes. So it's across the general utility industry, huge need for infrastructure.

So to the extent that we could capitalize on our skill sets and be a larger player in making sure that that investment is made in a great area of need in United States, we think our skill sets are broadly applicable and specifically applicable in those infrastructure needs.

Agnieszka Storozynski
*Macquarie Capital (USA), Inc.*

Q

Okay. Thank you.

**Operator**: And we'll take our next question from Ryan Connors with Boenning & Scattergood.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Great. Good morning. Thanks for taking my question. A couple on housekeeping items, and then I had a bigger picture question if I could. First just on housekeeping, Dave, you mentioned a few times, "non-recurring" events as part of our lower O&M expenses, can you just elaborate for us on more specifically what some of those things were?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President*

A

Yeah. We had a couple of charges, kind of one-time charges and one-time bring-backs this year and last year. I'll see if I can get my hands on them all. Yeah, so for the quarter last year, we had a couple of charges, one was the leadership transition charge that we talked about on the call. We reserved some old Aqua Pennsylvania water rates that appeared, that we'd not able to put to use. So they were two big one-time charges last year, totaling about $3.5 million that obviously did not recur again this year.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Okay. So clearly non-operating stuff?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President*

A

Yeah, kind of unique one-off items in last year's numbers that caused the part of that difference.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Got it. Okay. And the other one was just can you give us a progression on the tax rate? I mean obviously we've jumped – we've been now in the single-digits for a while, can you just kind of give us an outlook on how we should think about modeling that going forward?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President*

A

Yeah, I would expect that it will be fairly consistent until the next Pennsylvania rate case and in that Pennsylvania rate case, I would see somewhat of a step-change, not more than a few percentage points, but certainly more than what we've seen recently. So I would say fairly steady until we get to that point.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Okay. That's actually a good segue into my next question which was that any update on Pennsylvania in terms of where we stand relative to go into the DSIC and ultimately to general rate case? I know you made some comments at the Analyst Day that we're helpful in that regard, so any update there?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President*

A

Yeah, I would say no. We're sticking with the guidance that we've provided at the Analyst Day, that we'd like to think of a DSIC sometime in 2017 or 2018 and then a rate increase some time in 2018 or 2019, and that's still where we see it right now.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Okay. So, a rate increase in 2018 or 2019 would imply filing either in late 2017 or early 2018, is that a right way to read that?

David P. Smeltzer
*Chief Financial Officer & Executive Vice President*

A

Yep, that's right.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Okay. Okay. And then yeah, my bigger picture question was, I mean Chris you commented on the Pennsylvania Act 12 legislation and the PUC did have some news on that front with their preliminary implementation order a couple of weeks ago. I wondered if you had a chance to look at that and if you had any – if that give you anymore granularity on the opportunity there, and whether there were aspects of that that you liked or didn't like, or any incremental feedback on that legislation with the latest developments?

Christopher H. Franklin
*President & Chief Executive Officer*

A

Yeah. I guess frankly I have not seen that particular piece come from the Commission. So, I can't comment directly on that. But I guess from what we know and what we're aware of from the legislation and our discussions at the Commission level, we remain confident that this will be a great tool for continued growth and maybe expanded growth.

Ryan Michael Connors
*Boenning & Scattergood, Inc. (Broker)*

Q

Okay. Great. That's all I had. Thanks guys.

Christopher H. Franklin
*President & Chief Executive Officer*

A

[ph] You bet (27:12).

**Operator**: [Operator Instructions] We'll go next to Jonathan Reeder with Wells Fargo.

Jonathan G. Reeder
*Wells Fargo Securities LLC*

Q

Hey, good morning gentlemen. Most of my questions have been answered, but I don't know if there's any more color you could give on the M&A progress, particularly on the targeted muni effort that's being made. Is there some deals in the second half that you expect to announce [ph] deal of that size (27:40)?

Christopher H. Franklin
*President & Chief Executive Officer*

A

The deal pipeline I will tell you is strong, but as you probably are aware, as we think about the discussion with municipals, Jonathan it's a long lead time and there is a vote and in many cases, we're seeing the need for referendum. So, I don't see in the coming few quarters a major, that's why we've given the guidance, you've seen the guidance, but we have some, I'll call it sizeable opportunities in our pipeline, and we have a relatively high level of confidence about some of those.

So, I guess I'll leave you with, we see activity, we see activity, we see greater size and we feel like the pipeline is strong for next year.

Jonathan G. Reeder
*Wells Fargo Securities LLC*

Q

Okay. So look to 2017, to really see kind of the, I guess the efforts coming to fruition.

Christopher H. Franklin
*President & Chief Executive Officer*

A

I think that's fair to say.

Jonathan G. Reeder
*Wells Fargo Securities LLC*

Q

Okay, sounds fair. Thanks guys.

Christopher H. Franklin
*President & Chief Executive Officer*

A

You're welcome.

**Operator**: And it appears we have no further questions in the queue at this time.

Christopher H. Franklin
*President & Chief Executive Officer*

All right, thank you very much. Appreciate your time.

**Operator**: Again that does conclude today's presentation. We thank you for your participation.

## Aqua America

# WTR: A Quiet Quarter

**Stock Rating/Industry View:** Equal Weight/Neutral
**Price Target:** USD 38.00
**Price (02-Aug-2016):** USD 34.40
**Potential Upside/Downside:** 10%
**Tickers:** WTR

### WTR Reported Q2 EPS of $0.33 and Reaffirmed 2016 Guidance

WTR reported Q2 EPS of $0.33 in line with the consensus estimate of $0.34 and reaffirmed 2016 guidance $1.30-$1.35 versus the consensus estimate of $1.33. The main drivers for the quarter were lower expens regulated growth and rate case impacts partially offset by consumption, which was weather driven. The company expects to offset poor weather through continued cost controls and municipal acquisitions and a such expects to be in the middle of the $1.30-$1.35 guidance range. The water system acquisitions year date have added 5,396 customers (approximately 0.6% customer growth). The expectation is for an acceleration of acquisitions resulting from the increased number of states having fair value legislation for water system acquisitions.

Yesterday WTR announced a 7.5% increase in their annual dividend, consistent with expectations.

**Mentioned Stocks (Ticker, Date, Price)**

**Aqua America** (WTR, 02-Aug-2016, USD 34.40), Equal Weight/Neutral, CE/J

**Valuation Methodology:** Our $38 price target is based on applying a 5% premium to the water group average 2018 P/E multiple of 24.1x to our 2018 EPS estimate of $1.50.
**Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target**
Risks to WTR include an inability to maintain cost control, sub-par regulatory results from pending and future rate cases, and a slowdown in acquisition activity that would impact sales growth potential.

## 2Q16 earnings in-line as lower costs offset reduced sales; Maintain Neutral.

**Investment Conclusion:** Aqua America's 2Q16 results affirm both the "good news" and the "bad news" of the story, with the good news being that Aqua is among the best run utilities in the nation from an operational perspective (O&M expense was just 36% of sales in 2Q), and the bad news being that during the ongoing rate stay-out in PA, growth remains hard to come by (revenue fell 1%). Coupled with an epic YTD run-up in P/E multiples across the entire water utility space that leaves the stock trading near the high end of its historical valuation range, this hinders the reward-risk equation in our view, and as a result we maintain our Neutral rating for shares of WTR.

**Key Points:**

- **2Q in-line as lower O&M expenses offset soft top-line.** Aqua posted 2Q16 EPS of $0.33, in-line with consensus, as a sharp drop in Operations & Maintenance expenses offset a 1% decline in revenue that the company attributes in part to reduced volumes (our model assumed a 2% increase in sales). Management says the decline in O&M expenses was driven by a combination of market-based divestitures, lower production expenses, and other non-recurring factors, and says that on a "same system" basis, O&M expenses rose 1.3% year-over-year. Overall, it was a solid, if noisy, quarter for Aqua, though the results also underscore the challenge the company faces trying to grow during its PA rate stay-out, with EPS up just 3.8% year-over-year.

- **Rate case pipeline active, but all eyes remain on PA.** Measured by the number of rate awards, 2016 has been a banner year for Aqua, with new rates hitting the P&L in IL, OH, NC, OH, TX, and VA, and rate cases outstanding in IN, NJ, and OH. Still, new awards year-to-date total just $5 million (~0.5% of sales), and cases pending total $10.5 million (with final awards subject to the customary haircut), underscoring the vital importance of Pennsylvania (~70% of rate base) to Aqua's overall growth picture. The company continues to invest aggressively (capex targeted at $350 million for 2016), and we expect DSIC surcharges to begin in PA in 2017, with a rate filing likely by early 2018. In the meantime, consolidated growth will remain muted.

- **Tweaking 2016 estimate lower on likely 3Q weather headwinds.** July is a key swing month for demand from a weather standpoint, and July 2016 precipitation levels were heavy in Aqua's two largest territories. In Southeastern PA, there were 14 days of measurable rainfall in July for a total of 6.8 inches, versus 10 days for 2.5 inches in July 2015 (which itself was wetter than normal). In Ohio, there were 15 days of rain in July for 6.3 inches, versus 8 days for 0.9 inches in July 2015. As a result, we believe demand could be softer in 3Q16, and lower our top-line assumption (to –0.5% from +2%), and tweak our 2016 EPS estimate downward to $1.30 from $1.35 previously (management affirmed it 2016 EPS guidance range of $1.30-$1.35).

- **Maintain Neutral: Fundamentals remain compelling, but largely priced-in.** Aqua is among the best-run companies in the water space, and enjoys a structural advantage over water utility peers in that the progressive regulatory jurisdiction of Pennsylvania represents >50% of sales and ~70% of rate base. The company's new leadership is taking proactive steps to enhance the long-term growth outlook (including taking a less inhibited view of strategic M&A), and the addition of fair value legislation in PA provides the opportunity for muni acquisitions to finally gain steam. Still, these positives are largely priced in, with WTR trading at forward P/E of 24.7 times, at the high end of their historical range of 19-25 times. We rate the stock Neutral.

**COMPANY OVERVIEW**

Aqua America (Bryn Mawr, PA) is the second-largest publicly traded water utility in the US, serving about 3 million people in Pennsylvania (52% of earnings), Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

**Reason For Comment**

- On August 2, 2016, WTR reported second quarter 2016 earnings of $0.33 per share compared to $0.32 per share last year. Rate increases, customer growth, and lower operating expenses more than offset the negative impact of lower consumption. Year-to-date, WTR subsidiaries were awarded $5.0 million in annual rate increases and currently have requests totaling $10.5 million awaiting PUC decisions. In addition, WTR closed on ten acqusitions adding 5,204 water and 192 wastewater customers.

- Second quarter operating and maintenance (O&M) expenses declined -7.2% and the first-half 2016 operating efficiency ratio (O&M as a percent of operating revenues) declined to 37.2%, from 38.6%, for the same period last year.

**Table 1** **WTR Selected Financial**

*($ in millions, except per share data)*

| | Second Quarter | | | Six Months | | | Full Year | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 2015 | 2016 | Change | 2015 | 2016 | Change | 2014A | 2015A | Change | 2016E | 2017P | 2018P |
| EBITDA | $ 113.1 | $ 115.9 | 2.5% | $ 215.5 | $ 221.0 | 2.6% | $ 442.0 | $ 457.2 | 3.4% | $ 486.6 | $ 518.9 | $ 551.4 |
| Net Income | 57.4 | 59.6 | 3.9 | 105.9 | 111.4 | 5.1 | 213.9 | 223.2 | 4.3 | 240.7 | 258.0 | 274.7 |
| EPS | $ 0.32 | $ 0.33 | 3.1 | $ 0.60 | $ 0.63 | 5.0 | $1.20 | $1.26 | 4.3 | $1.35 | $1.45 | $1.55 |

- WTR affirmed 2016 EPS guidance of $1.30-1.35 per share based on 1.5-2.0% customer growth, same-sytem O&M increase of 1-2%, and more than $350 million in capital investments. Our 2016-2018 earnings estimates remain $1.35, $1.45, and $1.55 per share, respectively. Earnings growth will continue to be driven by rate base investments, acquisitions, cost controls, infrastructure surcharges, and the pipeline rehabilitation business.

- We continue to believe WTR is well positioned to continue its successful acquisition strategy given U.S. water (53,000 systems) and wastewater (16,000 systems) industries are extremely fragmented and municipally dominated (water is 85% municipally-owned; wastewater 97%). Recent legislation in IL, IN, NJ and PA encourages consolidation by allowing the purchase price in rate base or applying uniform rates state-wide. We are encouraged by the possibility that the pace of municipal acqusitions could accelerate.

- Given the use of repair tax deductions, Aqua-PA has delayed the need for a general rate case or DSIC since 2011, which has benefitted customers $10 per month. The company plans to file a ~15% rate increase in late 2017 or 2018.

- The 2016-2018 capital investment program totals $1.1 billion, including $350 million in 2016. Roughly 63% of the investment is allocated toward pipe replacement or upgrades in jurisdictions with surcharge eligible infrastructure programs (PA, IL, IN, OH, NJ, NC). The PA PUC which regulates $2.4 billion of WTR's $3.5 billion rate base allows for a quarterly distribution system improvement charge (DSIC).

- WTR is in the process of divesting or liquidating five Market-based businesses, resulting in expected annual revenue reduction of $30.5 million and immaterial impact on net income. Management plans to opportunistically pursue Market-based ventures that would provide supplementary and complementary opportunities for the regulated business.

- Given strong cash flow, infrastructure surcharges and cash from asset sales, WTR has minimal external funding needs. As of June 30, 2016, the common equity ratio was 49%, and S&P maintained its A+ credit rating for Aqua Pennsylvania.

**Valuation**

WTR is a well-managed, low-risk, high-quality conservative utility with unique growth opportunities. Shares offer a 2.1% current return on the $0.71 per share annual dividend. Shares trade at 25.0x and 23.3x our 2016 and 2017 earnings estimates and 336% of book value ($10.06 per share), which compares to group multiples of 26.9x and 25.2x earnings and 310% of book value. Over the past ten years, WTR shares have traded between 15-35x forward earnings and at significant premium multiples to the group. We consider WTR to be one of the premier water utilities in the nation with a warranted premium, given the company's national presence, strong financial condition, successful track record, and earnings and dividend outlook. Our 2016-2017 PMVs are $35 and 38 per share, respectively, based on 3.5x book value.

# Aqua America, Inc.

WTR – NYSE – Underperform-2

**Q2'16 Results from WTR; Reiterating Underperform but Raising Price Target.**

**Investment Highlights**

- Aqua America reported Q2'16 EPS of $0.33 versus $0.32 in the year-ago period. EPS in the quarter met consensus, falling a penny shy of our target. Lower operating expenses drove growth in the quarter.
- Revenue slipped 0.9% to $203.9MM in Q2, missing both our estimate and consensus. We expect nominal growth would have been positive if not for rationalization of market-based businesses, which weighed by ~$3MM in a trend we expect to persist across the balance of 2016.
- WTR has ~$10.5MM in rate and surcharge applications pending in NJ, IN, and OH, with ~$5MM extra in awards so far this year. Material rate activity in PA is still at least a couple years away, meaning dynamism to top line is likely to key off acquisitions.
- O&M expense fell 7.2% in Q2, driving our EPS beat; non recurrence of some executive severance and reduction on the market-based side were most impactful. Same system O&M is still expected to be +1% to +2% for 2016.
- The effective tax rate in Q1 ticked up to 8.5% from 7.9% in the year-ago period, as WTR continues to maximize its repair tax 'lever'.
- Management reiterated FY 2016 EPS guidance in the range of $1.30-$1.35. Our FY 2016 estimate is unchanged at $1.31; our 2017E slips $0.01 to $1.35.
- We are reiterating our Underperform rating, but raise our 1-year price target to $30, reflecting the current Utility sector valuation environment. At our $30, WTR would trade ~22x our 2016E EPS, in line with the stock's 5-yr average multiple. We still expect valuation compression on the grounds of slow growth in a falling earned-ROE environment.

**Note Important Disclosures on Pages 5-6**
**Note Analyst Certification on Page 5**

## ADDITIONAL DISCUSSION—Q2 RESULTS

Q2 was a good quarter operationally, in our view, but just a decent quarter financially. EPS growth of 3.8% marks the fifth quarter of the past six in which WTR has grown earnings per share at a rate <5%. Revenue growth remains challenging without rate activity in Pennsylvania being in the mix; however, we are actually pleased to see some of the market-based businesses being either liquidated or disposed. As has been a staple at WTR for years, Operations & Maintenance was strong, in our opinion. Market-based rationalization helped with the yr/yr decline versus an easy comp, but WTR nonetheless bettered our expectations as the company is seemingly able to efficiently search for M&A targets.

## ADDITIONAL DISCUSSION—FINAL THOUGHTS

As our hike in price target should imply, we are cognizant of the current valuation environment for the Utility sector; however, we continue to flag WTR as one of the more at-risk stocks, if/when the sector sees waning tactical and/or top down support. We identify essentially no new information that neutralizes our view that earned-ROE will fall moving forward, which could occur in tandem with what we view as only average EPS growth. We project Aqua to post a third consecutive year of sub-5% EPS growth in 2016 (and a 4$^{th}$ in 2017), which is not even competitive with the higher-end stories we target in the slower growth gas and electric utility arena. With our view toward likely multiple compression at some point, we are compelled to reiterate our Underperform rating.

## SUITABILITY

We assign WTR a suitability rating of ‘2.’ A complete description of our suitability scale is on page 5. We view Aqua America as a strong operator in the water space, and flag consistent cash flow and earnings predictability due to entrenched regulated monopoly franchises. High sensitivity to a single state (PA) versus some larger utility peers is the primary factor that pushes WTR just below our most conservative ‘1’ suitability rating. A strong history of returning capital to shareholders, low cyclicality and industry-appropriate leverage keep the company well above our more aggressive ‘3’ rating.

## CONSIDERATIONS AND RISKS

We view all companies in the Water Utilities industry as being subject to significant regulatory and political risk. Utility operations are heavily regulated; negative rate-making climates and/or new environmental restrictions may affect the company’s ability to earn a sufficient return on invested capital. Weather, natural disaster, and availability of water supplies could negatively impact sources of water, demand for water services, and a utility’s ability to supply water to customers. Risks associated with the collection, treatment, and disposal of wastewater could also impose significant costs.

Significant Cap Ex are required to maintain infrastructure and expand rate base. Should WTR suffer from the lack of ability to secure appropriate funding to make investments, or if delays are incurred in completing projects, operating results could be negatively affected. Contamination of water could result in service interruptions or cause enforcement actions. Assets can be subject to condemnation through eminent domain. The company’s non-reg businesses provide performance guarantees and have long-term contracts. Additionally, WTR is subject to all other risks that result from operating as a public company.

Our Suitability rating is 2 on a 1-to-4 scale (1 = most conservative, 4 = most aggressive).

1 Year Price History for WTR

August 3, 2016

# Aqua America, Inc. (WTR) - BUY

## 2Q16 Results Inline with Expectations; Maintain BUY Rating, Fair Value to $39

### PORTFOLIO MANAGER BRIEF

Aqua America's 2Q16 results slightly exceeded our expectations, with revenues of $204MM and EPS of $0.33. Recent strategic actions reduced OPEX materially, offsetting lower consumption. Looking forward, we've introduced (and moved to) 2018 estimates for valuation purposes, which increases our Fair Value assumption on WTR shares to $39 from $35. We continue to recommend accumulation at current price levels.

### ANALYST NOTES

- <u>2Q16 results a touch above forecasts.</u> On the top line, revenues of $204MM were actually below our $208MM forecast, before adjusting for divestitures in market-based activities. Making that adjustment, WTR came within $1MM of our estimate. More interesting though was the OPEX improvement, which decreased by 7.2% YoY. The aforementioned sales of market-based activities appears to have had a noticeable impact. Otherwise, most other income statement line items were within normal statistical bounds of what we were expecting. EPS of $0.33 was $0.01 ahead of our $0.32 estimate, which was also consensus.
- <u>Dividend increase announced.</u> The company boosted its dividend 7.5%, to $0.1913 per share, payable to shareholders of record on 8/18. This marks the 26th dividend increase in 25 years.
- <u>Guidance reaffirmed.</u> Aqua America reaffirmed its 2016 EPS guidance of $1.30 to $1.35. The company also expects in excess of $350MM of CAPEX to be deployed during the year, and customer growth of 1.5% to 2.0%. Thus far, WTR has invested $168.8MM and increased its customer count by 1.1%.
- <u>Adjusting pre-existing estimates; introducing 2018 forecasts.</u> We've made minor adjustments to our 2016 and 2017 estimates, and introduced 2018 forecasts. The move to 2018 forecasts for share valuation purposes had a material impact on our Fair Value assumption.
- <u>Summary/Valuation.</u> The move to 2018 forecasts for valuation purposes allows us to increase our Fair Value target for WTR shares from $35 to $39, based on a 26 P/E multiple. What we saw in the 2Q16 results was a widening focus on improving operational margins, in addition to solid execution against the guidance parameters laid out for 2016. We've also noted from recent activity that WTR is not content to just "work around the edges" to improve its performance; if it sees large scale opportunities to grow the business, it steps

right up to the plate and takes its swings. We differ with those that believe multiple contraction would occur should WTR move outside water/wastewater utilities; we believe most analysts would simply incorporate a "sum-of-the-parts" methodology to the various earnings streams generated, much like we do in our electric & gas utility universe. That said, we continue to recommend accumulation at current share price levels.

## Aqua America

**WTR: Quiet Q2 But What Does The M&A Future Hold?**

**Market Perform**

Sector: Water Utilities
Market Weight

- **Summary.** No change to our EPS outlook following WTR's Q2 report. The base business continues to execute – invest capital, grow rate base and seek recovery – but WTR's new mgmt team has ratcheted up the desire to grow through M&A. Investor focus/angst reflects concerns around what the M&A future holds in store for WTR. The more proactive, methodical approach to municipal deals is likely to start bearing fruit in 2017 (good!) but pursuit of a strategic acquisition outside of the water space has caused valuation concerns (bad!). Reiterate Market Perform rating and $35-36/sh valuation range. Shares trade at modest P/E discounts to water utility peers on our 2016-19E EPS which we consider appropriate given potential P/E multiple degradation from M&A outside the regulated water sector. In addition, water utilities as a whole seem to be fully valued as the group trades at P/E premiums of 35-40% to electric and 12-18% to gas utilities.

- **Results.** Q2'16 EPS were $0.33 vs $0.32 in Q2'15. Adverse weather impacted consumption causing $4.2M of lower revenues. However, the impact was muted by $4.2M of non-recurring favorable expense comparison items, including $3.5M of charges taken in Q2'15. With weather in mind, mgmt indicated comfortability with the middle of the $1.30-1.35 2016 EPS guidance range.

- **Outlook.** We continue to believe that a 5-yr EPS CAGR of 6% is achievable driven by timely rate recognition of investment, cost controls and modest M&A activity. Our 2016-19E EPS of $1.33, $1.40, $1.47 & $1.55 are predicated on $1.2B of regulated investments over the 2016-18 period, including $75M of M&A activity. Thus, we do not assume any transformational M&A despite the fact that WTR has financial flexibility and mgmt has articulated a clear desire to explore such opportunities. Barring a very sizeable deal, we do not foresee the need for new equity and, in fact, mgmt has previously indicated that roughly $750M of additional debt capacity exists. As such, we believe share buybacks and/or accelerated dividend increases (greater than 8%) may be considered to achieve a consolidated equity ratio closer to 45% and a 60-70% dividend payout ratio.

- **Strategy Update.** WTR is focused on (1) efficiently deploying capital across the regulated platform, (2) aggressively pursuing muni system deals and (3) scouring the broader utility landscape for strategic M&A as well as potential market-based opportunities. Mgmt indicated muni acquisition enabling legislation in IL, IN, NJ and PA is creating an uptick in interest and the pipeline is strong, including with deals of size. WTR's Board has set a goal of $50M/year worth of deals. Given the longer lead times for muni deals, look for efforts to bear fruit in 2017. As for strategic deals, mgmt affirmed interest and continues to believe core competencies are transferable across utility platforms. While stepping outside of water could lead to a merging of multiples (which would have to be taken into consideration), mgmt believes there could be long-term value creation if it opens up a path to attractive growth and allows fixed costs to be further spread out.

**Valuation Range: $35.00 to $36.00**

Our $35-36/sh valuation range is based on a P/E multiple (apply a modest discount to the 17E water utility median of 24.5-25.0X to our 18E of $1.47) and DDM analyses. Primary risks are regulatory and M&A related.

**Investment Thesis:**

We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations, and financial flexibility. Our Market Perform rating primarily reflects valuation considerations.

Together we'll go far

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

## Analyst's Notes

*Analysis by John Eade and Katelyn Bayone, September 13, 2016*

**ARGUS RATING: BUY**

- Recent selloff offers buying opportunity
- WTR shares have underperformed the S&P 500 over the last quarter, declining 10.2% compared to a 2.6% rise for the index.
- The company posted 2Q results that met consensus expectations for EPS but were slightly low on revenue.
- Along with the earnings release, Aqua America increased its quarterly cash dividend by 7.5%. The current yield is about 2.5%.
- WTR shares are trading at premium multiples that we feel are justified by the company's solid long-term fundamentals.

### INVESTMENT THESIS

BUY-rated Aqua America Inc. (NYSE: WTR) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns as it stands to benefit from expected investment of more than $700 billion in the nation's water and wastewater infrastructure recommended by the EPA over the next two decades. The company expects to grow its customer base not only through acquisitions but also organically, as it is well positioned in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Our 12-month target price is $36.

### RECENT DEVELOPMENTS

WTR shares have underperformed the S&P 500 over the last quarter, declining 10.2% compared to a 2.6% rise for the index. Over the past year, the shares have outperformed, gaining 21.4% compared to the S&P 500's rise of 9.6%. WTR shares have a beta of 0.38.

On August 2, Aqua America reported 2Q earnings that were in line with expectations though sales disappointed. Revenue fell 1% year-over-year to $203.9 million as growth from higher rates, surcharges and acquisitions was offset by lower water consumption and the impact of divestitures. Second-quarter net income grew 3.9% to $59.6 million, or

## Argus Recommendations

| | | | |
|---|---|---|---|
| Twelve Month Rating | SELL | HOLD | **BUY** |
| Five Year Rating | SELL | HOLD | **BUY** |
| Sector Rating | **Under Weight** | Market Weight | Over Weight |

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

**The distribution of ratings across Argus' entire company universe is: 46% Buy, 48% Hold, 6% Sell.**

## Analyst's Notes...Continued

$0.33 per share.

For the first six months, net income rose to $111.4 million or $0.63 per share from $105.9 million or $0.60 per share in the prior-year period. First-half revenues were flat at $396.5 million while same-utility operating and maintenance expenses rose 1.4%.

Along with 2Q earnings, management reaffirmed its 2016 earnings guidance. The company expects full-year EPS of $1.30-$1.35 based on total customer growth of 1.5%-2.0%, a 1%-2% increase in same-system operating costs, and $350 million in capital investments. Management expects to spend $1.1 billion on capital projects through 2018.

Earlier this year, management announced plans to reevaluate and exit some of its noncore businesses, which currently represent about 4% of revenue. This is expected to reduce full-year revenue by about $30.5 million, but to have no impact on EPS due to the offset of lower operating expenses.

Aqua America also continues to seek rate increases at its regulated utilities. Thus far in 2016, it has received rate awards and infrastructure surcharges that will generate annual revenue of $5.1 million. The company could generate an additional $10.5 million from pending rate or surcharge proceedings.

### EARNINGS & GROWTH ANALYSIS

Aqua America's second-quarter revenue decline was primarily driven by lower consumption and noncore divestitures, partly offset by a rate increase of $7.2 million.

Management was able to leverage costs, reducing operating expenses by 7.2% to $74 million, mostly through divestitures and other one-time actions. However, excluding these items, same-utility expenses rose 1.3%.

Based on current sales and expense trends, we are trimming our 2016 estimate to $1.34 from $1.35. Our revised estimate implies 6% growth this year and assumes higher rates in the company's regulated operations along with growth in its nonregulated businesses. We are maintaining our 2017 estimate of $1.42 per share.

Our estimates assume that the company will control costs and improve the efficiency of acquired assets, invest in infrastructure projects, and grow its customer base both organically and through acquisitions. In 2Q, the company invested $73 million in infrastructure improvements, following investments of $364.6 million in 2015. It expects to invest more than $350 million in 2016. This spending will include improvements to replace pipes, enhance water quality, and strengthen service reliability.

### FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating for Aqua America is Medium, the midpoint on our five-point scale. The company achieves above-average scores on our three main criteria of debt levels, fixed-cost coverage and profitability.

The company's total debt/total capitalization ratio was 51% at the end of 2Q, flat with the end of 2015. EBITDA covered interest

## Analyst's Notes...Continued

expense by a factor of 5.7 in 2Q. As of June 30, 2016, WTR had $4.9 million in cash on hand and $75 million available on its credit lines. In the first six months, cash from operations totaled $177.7 million and covered capital expenditures of $367.4 million by a factor of 1.05.

The company pays a dividend. On August 2, it raised its quarterly payout by 7.5% to $0.1913, or $0.765 annually. The yield is about 2.5%. The company has grown its dividend at a 7.6% average rate over the last 10 years, has paid consecutive quarterly dividends for 71 years, and has raised the dividend 26 times in the past 25 years. We expect the dividend to continue to grow. Our 2016 dividend estimate is $0.73 and our 2017 estimate is $0.80.

### MANAGEMENT & RISKS

On July 1, 2015, WTR appointed Christopher H. Franklin as its new CEO, succeeding Nicholas DeBenedictis. Mr. Franklin is a 24-year veteran of the company, and was most recently the president and chief operating officer of its regulated operations. The company promoted Richard S. Fox to chief operating officer of regulated operations on July 16, filling Mr. Franklin's former role. Mr. Fox has worked at Aqua for 14 years, most recently serving as the company's regional president and overseeing operations in five states. The company also created a new position, executive vice president of strategy and corporate development, and named Daniel J. Schuller, formerly of J.P. Morgan Asset Management, to this post. Mr. Schuller will focus on growing the company's regulated and market-based businesses. David P. Smeltzer is the CFO and is a 28-year company veteran.

The U.S. water industry is extremely fragmented, with more than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put themselves up for sale. In fact, several companies have sought to be acquired by Aqua America. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTR will have the opportunity to acquire additional municipal water systems in the coming years at attractive prices.

Key risks for stocks in our water utility coverage universe include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

### COMPANY DESCRIPTION

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

### VALUATION

WTR shares appear attractively valued at current prices near

## Peer & Industry Analysis

**The graphics in this section are designed to allow investors to compare WTR versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.**

- **The scatterplot shows how WTR stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how WTR might fit into or modify a diversified portfolio.**

## Analyst's Notes...Continued

$30. Over the past 52 weeks, the shares have traded between $24 and $36. From a technical standpoint, the shares had been in a bullish pattern of higher highs and higher lows that dates to September 2015, but the trend turned bearish in July.

WTR shares are trading at premium multiples that we feel are justified by the company's solid long-term fundamentals. The shares trade at 21-times our 2017 EPS estimate, above the peer average of 19.7 but below the midpoint of the historical five-year range (19.2-26.4). The stock trades near the midpoint of its five-year historical range for price/book, at 3.0-times (versus a range of 2.4-3.5) and for price/sales, at 6.7-times (versus a range of 4.1-7.7). The shares also trade at a premium to peers based on these metrics.

In our view, the company's financial strength, favorable risk profile, visible forward earnings stream and attractive integrated structure make WTR a compelling investment. We are maintaining our target price of $36.

On September 13 at midday, BUY-rated WTR traded at $29.90, down $0.29.

## About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

**THE ARGUS RESEARCH RATING SYSTEM**

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

## Argus Research Disclaimer

## Morningstar Disclaimer

ARGUS

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

## Analyst's Notes

*Analysis by Jacob Kilstein, CFA, May 18, 2018*

**ARGUS RATING: BUY**

- Reaffirming BUY and maintaining target at $41
- WTR shares have underperformed the S&P MidCap 400 over the last quarter, declining 5% compared to a 2% increase for the index. Shares have also underperformed over the past year, rising 5% compared to the S&P MidCap 400's gain of 15%. WTR shares have a beta of 0.73, in line with peers.
- On May 8, Aqua America reported 1Q18 net income of $50.8 million or $0.29 per share, up 4% from the prior year. EPS matched the consensus estimate. Revenue rose 4% to $194.3 million, which missed the consensus estimate of $197.4 million, while regulated segment revenues, which make up over 99% of the business, also rose 4% to $193.5 million, reflecting higher consumption, organic growth, and rate increases.
- Along with 1Q earnings, management reiterated its 2018 EPS of $1.37-$1.42. Management's guidance assumes total customer growth of 2.0%-3.0%, higher than last year, and $500 million in capital spending.
- We are lowering our 2018 EPS estimate to $1.42 from $1.45, due to lower guidance than we had anticipated. Our estimate implies 4% growth this year and assumes higher rates in the company's regulated operations. We are establishing a 2019 estimate of $1.50.

**INVESTMENT THESIS**

BUY-rated Aqua America Inc. (NYSE: WTR) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns as it stands to benefit from expected investment of more than $700 billion in the nation's water and wastewater infrastructure recommended by the EPA over the next two decades. The company expects to grow its customer base not only through acquisitions but also organically, as it is well positioned in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Lastly, we like the company's consistent earnings results and rising dividend. We are maintaining our 12-month target price of $41.

## Analyst's Notes...Continued

WTR shares have underperformed the S&P MidCap 400 over the last quarter, declining 5% compared to a 2% increase for the index. Shares have also underperformed over the past year, rising 5% compared to the S&P MidCap 400's gain of 15%. WTR shares have a beta of 0.73, in line with peers.

On May 8, Aqua America reported 1Q18 net income of $50.8 million or $0.29 per share, up 4% from the prior year. EPS matched the consensus estimate. Revenue rose 4% to $194.3 million, which missed the consensus estimate of $197.4 million. Regulated segment revenues, which make up over 99% of the business, also rose 4% to $193.5 million, reflecting higher consumption, organic growth, and rate increases.

Operations and maintenance expense rose 9% to $74 million, driven by higher employee costs and overtime due to repairs to infrastructure during the winter. As a result, the operating margin declined by 220 basis points to 35.7%.

Along with 1Q earnings, management reiterated its 2018 EPS of $1.37-$1.42. Management's guidance assumes total customer growth of 2.0%-3.0%, higher than last year, and $500 million in capital spending. Management expects to spend $1.4 billion on capital projects through 2020.

### EARNINGS & GROWTH ANALYSIS

So far in 2018, WTR has completed rate cases or surcharges in seven states, providing $24 million in additional revenue. Pending rate cases in Indiana, Ohio, North Carolina, and Virginia are seeking an additional $9 million of revenue. Lastly, a rate case in Pennsylvania is expected to be filed in 3Q18 with rates taking affect in mid-2019.

During the first three months of 2018, the company completed three small acquisitions of water and wastewater systems, which added 448 customers. The company has pending acquisition agreements with six municipal systems, totaling approximately 16,000 additional customers (or connections), at a cost of $151,000. WTR plans to finance those acquisitions with debt.

We are lowering our 2018 EPS estimate to $1.42 from $1.45, due to lower guidance than we had anticipated. Our estimate implies 4% growth this year and assumes higher rates in the company's regulated operations. We are also establishing a 2019 estimate of $1.50.

Our estimates assume that the company will control costs and improve the efficiency of acquired assets, invest in infrastructure projects, and grow its customer base both organically and through acquisitions. Year-to-date, the company has already spent $105 million and expects to invest $500 million in infrastructure in 2018, following a record investment of $478 million in 2017. This spending will include improvements to replace pipes, enhance water quality, and strengthen service reliability.

### FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating for Aqua America is Medium, the midpoint on our five-point scale. Our three main criteria include

## Analyst's Notes...Continued

debt levels, fixed-cost coverage and profitability.

The company's total debt/total capitalization ratio was 53% at the end of 1Q, in line with the peer average. EBITDA covered interest expense by a factor of 5.3 in 1Q, below the peer average of 6.5. The 1Q adjusted net margin of 26% was much higher than the 14% average for peers. As of March 31, WTR had $3 million in cash, $2.0 billion in debt, and $228 million available on its credit lines. In the first three months of 2018, cash from operations totaled $88 million and covered capital expenditures of $105 million by a factor of 0.8, compared to 2.0 for peers.

WTR pays a quarterly dividend of $0.2047, or $0.8188 annually, for a yield of about 2.5%, below the 3.2% peer average. On April 25, the board of directors declared a quarterly dividend of $0.2047 per share, payable on June 1 to shareholders of record on May 18. The company has grown its dividend at a 7.5% average rate over the last 10 years, has paid consecutive quarterly dividends for 73 years, and has raised the dividend 26 times in the past 25 years. Our 2018 dividend estimate is $0.85 per share and our 2019 estimate is $0.92.

### MANAGEMENT & RISKS

Christopher Franklin has been CEO since July 2015. Mr. Franklin is a 25-year veteran of the company, and previously served as president and chief operating officer of its regulated operations.

The U.S. water industry is extremely fragmented, with more than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put themselves up for sale. In fact, several companies have sought to be acquired by Aqua America. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTR will have the opportunity to acquire additional municipal water systems in the coming years at attractive prices.

Key risks for water utilities include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

### COMPANY DESCRIPTION

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

### VALUATION

WTR shares appear attractively valued at current prices near $33. Over the past 52 weeks, the shares have traded between $31 and $40.

WTR shares are trading at premium multiples that we feel are justified by the company's solid long-term fundamentals. The

## Peer & Industry Analysis

## Analyst's Notes...Continued

shares trade at 22.9-times our 2018 EPS estimate, above the peer average of 19.1 but below the midpoint of the historical five-year range of 19.2-28.9. The stock trades below the midpoint of its five-year historical range for price/book, with a multiple of 3.0 (versus a range of 2.6-3.9) but above the midpoint for price/sales, with a multiple of 7.2 (versus a range of 5.4-8.6). The shares also trade above the peer average for both price/book (2.0 for peers) and price/sales (2.1).

In our view, the company's financial strength, favorable risk profile, visible forward earnings stream and attractive integrated structure make WTR a compelling investment. We are maintaining our 12-month price target at $41, implying a total return potential of 26% including dividends.

On May 18 at midday, BUY-rated WTR traded at $33.31, up $0.14.

## About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

**THE ARGUS RESEARCH RATING SYSTEM**

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

## Argus Research Disclaimer

## Morningstar Disclaimer

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

## Analyst's Notes

*Analysis by John Eade and Katelyn Bayone, May 31, 2016*

**ARGUS RATING: BUY**

- Raising target price by $1 to $36
- WTR shares have outperformed the S&P 500 over the last year, gaining 23% compared to the S&P 500's decline of 0.4%.
- Our EPS estimates imply growth of 6%-7% annually for the next two years for this water utility.
- Aqua America recently increased its quarterly cash dividend by 7%. The current yield is about 2.2%.
- WTR shares are trading at premium multiples that we feel are justified by the company's solid long-term fundamentals.

**INVESTMENT THESIS**

BUY-rated Aqua America Inc. (NYSE: WTR) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns as it stands to benefit from expected investment of more than $700 billion in the nation's water and wastewater infrastructure recommended by the EPA over the next two decades. The company expects to grow its customer base not only through acquisitions but also organically, as it is well positioned in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Our 12-month target price is $36, raised from $35.

**RECENT DEVELOPMENTS**

WTR shares have underperformed the S&P 500 over the last quarter, rising 5.7% compared to an 8.6% advance for the index. Over the past year, the shares have outperformed, gaining 23% compared to the S&P 500's decline of 0.4%. WTR shares, with a beta of 0.55, have historically been less volatile than the S &P.

On May 3, Aqua America reported 1Q earnings of $0.29 per share, up $0.02 over 1Q15 and a penny above the consensus estimate. Revenue missed estimates by $5 million, but still rose 1.2% to $192.6 million. Increases in rates, surcharges and regulated customer growth helped to increase revenue by approximately $7 million, while the divestiture of certain market-based activities and a decline in consumption offset the increase by $3

## Analyst's Notes...Continued

million. Net income rose 6.6% to $51.7 million.

Along with 1Q earnings, management also reaffirmed FY16 earnings guidance of $1.30-$1.45, with the total customer base expected to grow 1.5%-2%. Same-system O&M expenses are expected to increase 1%-2%. Through 2018, management expects to use $1.1 billion in capital investments, with $350 million being in FY16.

Management also announced plans to reevaluate and exit some of its non-core businesses, which currently represent about 4% of revenue. This is expected to impact revenue growth over the next year by up to $30.5 million, but have no impact on EPS due to the offset of lowered operating expenses.

Despite an earnings beat, the stock hasn't moved much since the release. Shares declined about 1%. Management issued a subdued outlook on the conference call, suggesting that 2Q results may be slightly weaker than previously anticipated, as 1Q EPS was a penny more than expected.

Aqua America's business is heavily regulated. In April, Pennsylvania legislation passed House Bill 1326, which allows a company to use 'fair market value' when acquiring municipal and wastewater systems, as opposed to the old system where acquisitions were valued at original cost minus depreciation. This is a benefit for Aqua America, given its growth through acquisition strategy. The new rule will give the company flexibility to make more valuable acquisitions. During the quarter, the company's regulated subsidiaries closed deals to acquire nine water and wastewater systems. The acquisitions added 5,250 customers and boosted the overall customer base by 0.5%.

Aqua America also continues to seek rate increases at its regulated utilities. Thus far in 2016, Aqua's regulated subsidiaries received rate awards and infrastructure surcharges totaling an estimated increase in revenue of $4.5 million annually. The company has a combined $5.1 million in rate or surcharge proceedings pending.

Aqua in 4Q recognized a noncash impairment charge of $33 million due to the reassessment of the value of its 49% stake in pipeline assets that supply raw water to natural gas and drilling operations in the Marcellus Shale. Aqua has lowered forecasts for raw water sales to operations in the Marcellus Shale due to difficult market conditions in the oil and gas market.

### EARNINGS & GROWTH ANALYSIS

Aqua America's revenue growth during the quarter was primarily due to increased rates, increased usage, and customer growth, driven by acquisitions in both regulated and nonregulated businesses.

That growth was partially offset by the divestiture of some non-core businesses which reduced revenue by $3 million. O&M expenses increased as well, up 0.5% to $73.2 million.

Based on current sales and expense trends, we are maintaining our 2016 estimate of $1.35, implying 7% growth. Our 2016 estimate assumes higher rates in the company's regulated segments

## Analyst's Notes...Continued

along with growth in its nonregulated businesses. We are also maintaining our 2017 estimate of $1.42 per share.

Our estimates assume that the company will control costs and improve the efficiency of acquired assets, invest in infrastructure projects to increase its rate base, and grow its customer base both organically and through acquisitions. In 1Q, the company invested $73 million in infrastructure improvements, following investments of $364.6 million in fiscal 2015. It expects to invest more than $350 million in 2016. This capex will include improvements to replace pipes, enhance water quality, and strengthen service reliability.

**FINANCIAL STRENGTH & DIVIDEND**

Our financial strength rating for Aqua America is Medium, the midpoint on our five-point scale. The company achieves above-average scores on our three main criteria of debt levels, fixed-cost coverage and profitability.

The company's total debt/total capitalization ratio was 51% at the end of 1Q, flat to the end of 2015. EBITDA covered interest expense by a factor of 5.4 in 1. As of March 31, 2016, WTR had $4 million in cash on hand and $249 million available on its credit lines. For the past twelve months, cash from operations totaled $375.6 million and covered capital expenditures of $367.4 million by a factor of 1.02.

The company pays a dividend. In September 2015, it increased its quarterly payout by 7.9% to $0.178, or $0.71 annually. The yield is about 2.2%. The company has grown its dividend at a 7.6% average rate over the last 10 years, has paid consecutive quarterly dividends for 71 years, and has raised the dividend 25 times in the past 24 years. We expect the dividend to continue to grow. Our 2016 dividend estimate is $0.73 and our 2017 estimate is $0.80.

**MANAGEMENT & RISKS**

On July 1, 2015, WTR appointed Christopher H. Franklin as its new CEO, succeeding Nicholas DeBenedictis. Mr. Franklin is a 24-year veteran of the company, and was most recently the President and Chief Operating Officer of its regulated operations. The company promoted Richard S. Fox to Chief Operating Officer of regulated operations on July 16, filling Mr. Franklin's former role. Mr. Fox has worked at Aqua for 14 years, most recently serving as the company's regional president and overseeing operations in five states. The company also created a new position, executive vice president of strategy and corporate development, and named Daniel J. Schuller, formerly of J.P. Morgan Asset Management, to this post. Mr. Schuller will focus on growing the company's regulated and market-based businesses. David P. Smeltzer is the CFO and is a 28-year company veteran. During the first quarter, the company hired two new executives - Susan Haindl will now serve as the new Chief Administrative Officer and Whitney Khellett will serve as the new Chief Information Officer

The U.S. water industry is extremely fragmented, with more

## Peer & Industry Analysis

**The graphics in this section are designed to allow investors to compare WTR versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.**

- **The scatterplot shows how WTR stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how WTR might fit into or modify a diversified portfolio.**

## Analyst's Notes...Continued

than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put themselves up for sale. In fact, several companies have sought to be acquired by Aqua America. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTR will have the opportunity to acquire additional municipal water systems in the coming years at attractive prices.

Key risks for stocks in our water utility coverage universe include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

### COMPANY DESCRIPTION

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia.

### VALUATION

WTR shares appear attractively valued at current prices near $32. Over the past 52 weeks, the shares have traded between $24 and $33. From a technical standpoint, the shares have been in a bullish pattern of higher highs and higher lows that dates to September 2015.

WTR shares are trading at premium multiples that we feel are justified by the company's solid long-term fundamentals. The shares trade at 22.5-times our 2017 EPS estimate, above the peer average of 20.5 times but slightly below the midpoint of the historical five-year range (16.7-32.7). The stock trades in the upper half of its five-year historical range for price/book, at 3.2-times (versus a range of 2.3-3.4) and for price/sales, at 6.9-times (versus a range of 4.1-7.1). The shares trade at a premium to peers based on these metrics as well.

In our view, the company's financial strength, favorable risk profile, visible forward earnings stream and attractive integrated structure make WTR a compelling investment. We are raising our target price to $36.

On May 31 at midday, BUY-rated WTR traded at $32.27, down $0.05.

## About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

**THE ARGUS RESEARCH RATING SYSTEM**

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

## 4Q a penny light as Aqua affirms 2017 guidance, Pennsylvania rate case timing.

**Investment Conclusion:** Aqua is among the best-run companies in the water space, and enjoys a structural advantage over peers given its majority position in the favorable regulatory jurisdiction of Pennsylvania. Still, the company's consolidated growth rate is likely to remain below its long-term average/potential until the company is able to get rate relief in Pennsylvania (rate case filing likely in 2018, with new rates benefiting the P&L in 2019). We rate WTR Neutral, with the current forward P/E of 22.4 times roughly in-line with the peer group average of 22.8 times.

**Key Points:**

- **4Q EPS below expectations, but 2017 guidance affirmed.** Aqua reported fourth quarter EPS of $0.28, a penny below consensus of $0.29, as the exiting of non-core businesses weighed on the top-line and Operations & Maintenance expenses continue to creep higher deep into the rate cycle in the company's core Pennsylvania franchise territory. Revenue slipped 0.1%, with 2.4% growth from regulated operations offset by a 2.5% headwind from the ongoing initiative to exit various market-based businesses. Regulated O&M expenses increased 5.8%, driven by labor cost inflation and acquisition-related costs, offset by a 6.2% decline in costs stemming from the divested business lines. Management affirmed its 2017 EPS guidance range of $1.34-$1.39.
- **New rates in IN, NC, OH, but PA the focus as DSIC looms.** Aqua has received $3.7 million in rates in Indiana, North Carolina, and Ohio YTD, and the company has a further $5.6 million in new rates pending in Ohio. Still, underscoring Pennsylvania's importance in the growth story, this rate activity in three key states represents an incremental growth contribution of just 0.9% (assuming a final rate award of $3.6 million, or 65% of requested, on the latest Ohio rate case). Management reiterated its planned timeline for Pennsylvania rate activity, which includes a DSIC filing in 2017, filing of a general rate case in 2018, and new rates hitting the P&L in 2019. Aqua's growth will likely remain below-trend until the company gets rate relief in PA.
- **Pipeline robust, but scale a handicap on large deals.** Aqua has four deals pending for a total of 9,000 new customers, and management expects 2017 customer growth of 1.5%-2.0%, driven by municipal acquisitions. Fair value legislation is clearly driving an uptick in muni deals in Pennsylvania, but despite its considerable size, Aqua's smaller scale relative to rival American Water **(AWK-$74.92-Neutral)** creates a disadvantage in pursuing the largest transactions (Aqua serves 1.4 million in PA vs. AWK's >2 million). The ability to obscure necessary post-deal rate increases across as large a unified tariff base as possible is key to minimizing rate impact at the individual customer level (and to getting regulators on board); in our view it is no accident that AWK has had more success in landing big fish like Scranton and McKeesport.
- **Bottom-Line: Reward/Risk balanced as PA rate case approaches.** Aqua remains the water industry's gold standard in terms of operational efficiency, and the robust M&A pipeline shows that the company is holding its own in the competitive world of "fair value" municipal M&A. After years of lackluster earnings growth following the effective pull-forward of multiple years of growth in 2013 via repair tax flow-through, the company is set to resume a more traditional growth trajectory in the years ahead as it finally gets back in for base rate relief in its core (60% of sales) Pennsylvania franchise. Still, while there is a lot to like fundamentally about the story, we believe the current in-line P/E appropriately calibrates reward and risk in the stock.

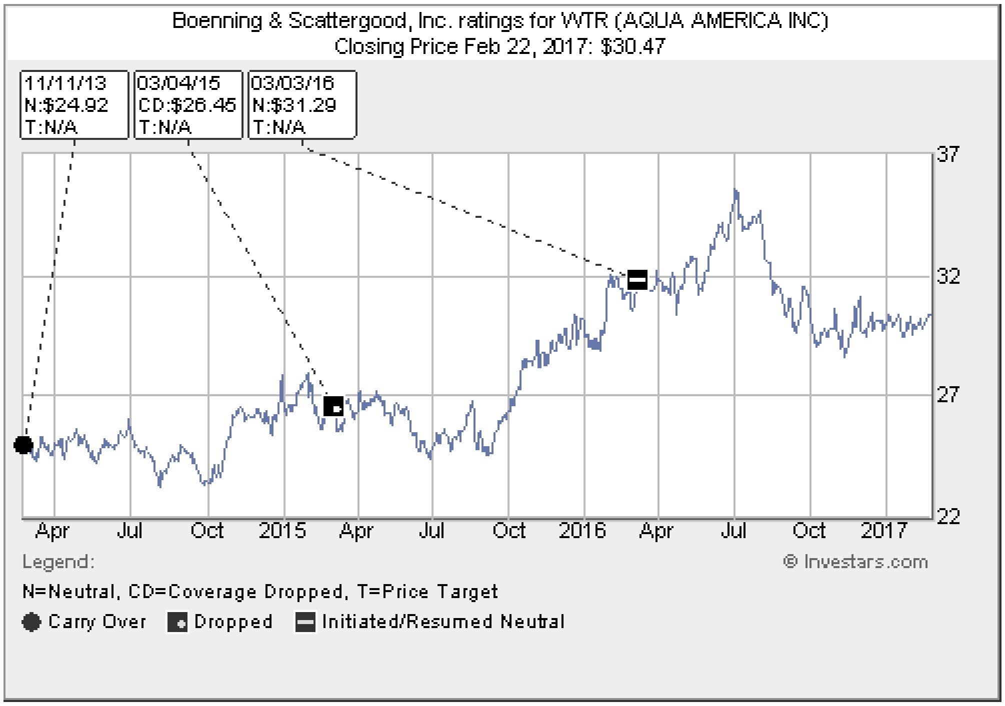
## Rating and Price Target History:



## Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

## Analyst Certification:

The research analyst whose name appears on this research report certifies that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

## Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

BOENNING & SCATTERGOOD
ESTABLISHED 1914

## Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

## Upgrade to Outperform: Sentiment bottoming as looming PA DSIC marks first step in return to normalcy; Relative reward/risk compelling as sector P/Es surge.

**Summary:** We met with Aqua at the company's Bryn Mawr, PA HQ and came away believing that the outlook is improving, with light finally visible at the end of the tunnel after years of sub-par growth. Meanwhile, sentiment appears to be bottoming, with WTR shares trading at a notable discount to the peer group. We upgrade WTR to Outperform with a price target of $36.

**Key Points:**

- **Impending Pennsylvania DSIC a key regulatory mile marker.** Aqua is getting set for a DSIC filing in Pennsylvania, marking the first time the company has been in for rate relief in its home state (>60% of sales) since 2012. While the company's repair tax flow-through settlement was a financial positive, it pulled several years of growth forward into 2012-2013, and the upcoming DSIC marks an important first step in returning to a normal (~2-3 year) rate cycle in PA that sets the stage for the company to resume a more consistent earnings growth trajectory.
- **Aqua maintaining discipline amid municipal acquisition frenzy.** The mainstreaming of "fair value" legislation (which enables IOUs to embed deal premiums into rate base) in various key states (IL, NJ, PA) is creating a privatization craze that is leading many utilities to aggressively chase municipal deals. Aqua has been among the more judicious actors in this saga so far, with the company's acquisition activity remaining mostly bolt-ons. Larger muni deals carry hidden risks that are being largely brushed aside in the current fair-value aided frenzy for acquisition-driven growth, and we believe Aqua's conservative approach is a positive for investors.
- **Willingness to acquire outside of water creates unique optionality.** When Aqua broached the idea of expanding beyond the water sector by acquisition, reaction was generally negative, with investors fearing this could erode the stock's "water premium" and drag the company into a strategic quagmire. After discussing the issue with both management and regulators, however, we believe there is merit to a multi-utility format, particularly if it creates regulatory synergies. While each individual deal must be evaluated on its own merits, the core competency of a water utility is regulatory management, not laying pipe, and arbitrarily confining the business to water risks missing out on potential transformational opportunities emerging in the utility space.
- **PA PUC turnover a (manageable) risk.** Longtime Pennsylvania Public Utilities Commission member Rob Powelson was nominated for the Federal Energy Regulatory Commission by the Trump administration last week, and if confirmed, he must resign from the PUC. This would create a notable void given Powelson's stalwart advocacy for progressive utility regulation and the water industry in particular, and with a democratic governor in charge, the odds are that his PUC replacement will tilt somewhat more toward ratepayer interests. Still, overall, we believe that PA is likely to remain among the nation's most attractive regulatory jurisdictions.
- **Discount valuation a plus as value of safety increases.** WTR trades at a forward P/E of 22.4 times, a 14% discount to the water utility peer group average (25.9 times) and 10% below peer American Water **(AWK-$75.92-Neutral)**. This discount offers the best reward/risk equation in the space, timely given the run-up in the market (which has impacted both water utilities and water equipment names). WTR would likely hold up relatively well in a short-term pullback, while a return to growth in core business provides the opportunity for upside longer term. Our $36 price target reflects a peer group average forward P/E multiple of 25.9 times.

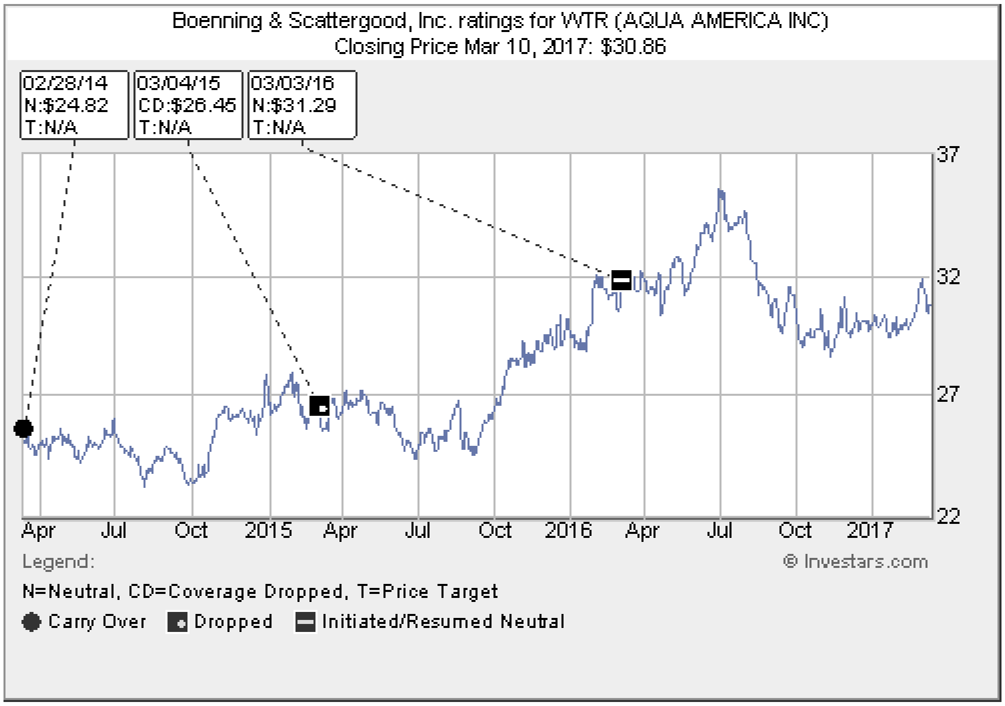
## Rating and Price Target History:



## Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock and prevent it from reaching our target price: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

## Analyst Certification:

The research analyst whose name appears on this research report certifies that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

## Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

BOENNING & SCATTERGOOD
ESTABLISHED 1914

### Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

### Ratings Distribution (12/31/16):

**Heads you win, tails we lose: PA decoupling legislation creates long-term ROE risk while affirming portfolio dilution risk inherent in FMV acquisitions.**

**Summary:** Over 60% of Aqua's business lies in Pennsylvania, and the state's attractive regulatory climate has long been a key aspect of the investment thesis. PA fell from the #1 spot in our annual rankings for the first time in 2017, and recent developments suggest the regulatory environment continues to head in the wrong direction, with the potential adoption of decoupling of particular concern. We lower WTR (which at a P/E of 25 times trades in-line with peers) to Neutral.

**Key Points:**

- **HB 1782 proposes decoupling in Pennsylvania.** House Bill 1782 (link to pdf HERE) recently emerged from committee in the PA General Assembly, focusing on "Alternative Ratemaking" for regulated utilities. While a variety of mechanisms are outlined in the bill, including formula rates, performance-based rates, and multi-year rate plans, by far the biggest development in HB 1782 is the proposed adoption of decoupling. Pioneered in California, decoupling enables water utilities to offset lower volume sales with higher rates (thereby "decoupling" the top-line from volumetric sales). Overall, while HB 1782 does have some constructive elements, the potential implementation of decoupling in PA is concerning given the precedent set in other states, where the adoption of decoupling was the catalyst for a prolonged slide in regulatory climate.
- **Evidence clear: Decoupling creates downward ROE pressure.** While decoupling is, all else equal, a good thing in that it increases earnings visibility and in particular reduces the near-term earnings impact of lower sales, all else is ***not*** equal. Decoupling has proven time and again to prompt fierce arguments from consumer advocates that the resulting reduction in business risk should be met with a corresponding cut in ROE. As a result, California, Connecticut, and other decoupling states consistently have some of the nation's lowest ROEs, and earlier this year the CA ratepayer advocate successfully applied this argument yet again, and the result was a further reduction in ROE from already low levels (see our note HERE). Our discussions with the PA OCA confirm that they are likely to push for lower ROEs if decoupling is adopted.
- **"Customers served" clause affirms portfolio dilution concerns.** HB 1782 includes language calling for decoupling to help manage "fluctuations in the number of customers served", distinct from the usual purpose of decoupling, which is managing against declining *per household* water usage (conservation). Fair market value acquisitions skew toward fiscally challenged cities with declining populations, and with the PUC insisting on separate rate districts rather than allowing IOUs to blend these acquisitions into statewide tariffs, utilities' push to include this provision implies a recognition that FMV deals are creating affordability issues and hindering customer growth. We're no fans of decoupling, but IOUs' push for protection against negative customer growth suggests that *not* getting it could create issues in integrating FMV deals into rates.
- **Pennsylvania's long-standing regulatory supremacy fading.** For many years, Pennsylvania was viewed as the most progressive state for water utility regulation, but in 2017 the state fell from the top spot in our annual rankings for the first time. The historical genius of PA's system was its elegance, and that those mechanisms that were adopted (notably single tariff and DSIC) were simple and straightforward in their application. Increasingly, PA utilities are succumbing to the temptation to "overengineer" the system, and although such efforts are well-intentioned, experience in other states confirms they typically lead to unintended consequences. Legendary former Aqua CEO Nick DeBenedictis once told us he never wanted to see decoupling come to Pennsylvania for these reasons, and in our view his words will likely prove prescient.

## 2Q earnings in-line, 2017 guidance affirmed, thesis intact; Reiterate Outperform.

**Summary:** Aqua America is a bellwether name in the attractive water utility space, which boasts a compelling reward/risk outlook in an environment where valuations for many water industrials are becoming stretched. In addition to the "flight-to-safety" benefits inherent in the water utility space, Aqua has a number of important company-specific fundamental catalysts on the horizon as well – notably including a return to rate relief in its core regulatory jurisdiction of Pennsylvania (the company has been out of rates in PA for nearly five years). Aqua offers a unique combination of defense and offense, and the stock's discount valuation further improves the risk-adjusted total return outlook. We rate shares of WTR Outperform, with our $36 target price reflecting a forward P/E multiple of 25 times, in-line with the investor-owned water utility peer group average.

**Key Points:**

- **2Q EPS in-line.** Aqua America posted 2Q17 EPS of $0.34, in-line with both our estimate and consensus and up a penny from $0.33 in 2Q16, with revenue dipping 0.2%, but operations and maintenance expenses falling 4.2% due in part to recent divestitures of non-core market-based businesses. The tax rate remains attractively low, declining 10 basis points to 8.4% from 8.5% a year ago, as the company continues to benefit on the income tax line from the repair tax flow-through accounting arrangement in Pennsylvania. Importantly, management indicates that the sales of market-based businesses are now complete, with such activities projected to contribute a miniscule ~$4 million in annual revenue going forward and Aqua now focused squarely on growing its regulated *water and wastewater* business. In addition, the company affirmed its 2017 EPS guidance range of $1.34-$1.39. Overall, it was a solid quarterly report, with Aqua demonstrating strong execution late in the rate cycle in its key Pennsylvania territory.
- **Rate activity brisk; PA looms large.** Year-to-date, Aqua has received rate relief (both base rates and infrastructure surcharges) of $11.1 million, representing an annualized revenue tailwind of 1.4% across a number of states including Indiana, Illinois, New Jersey, Ohio, and, importantly, Pennsylvania (this is the first official word of rate relief in PA, and it comes earlier than the 4Q timeframe we had expected). In addition, Aqua currently has rate requests pending in Illinois and Virginia for a total of $12.2 million. This is a notable level of activity for Aqua, providing a strong and consistent cadence of rate relief as the company prepares to file a general rate case in its critical home jurisdiction of Pennsylvania (~60% of sales). Management now expects to file the Pennsylvania rate case sometime in 2018 with a decision expected in 2019. Though recent PA-PUC testimony suggests there could be downward pressure on ROEs, the prospect of long-awaited rate relief in Pennsylvania is a critical catalyst for WTR shares.
- **Acquisitions: Balancing act continues.** Municipal acquisitions have become a central growth strategy for Aqua and its peers, with fair market value legislation and other regulatory catalysts driving an increasingly aggressive privatization push. Aqua has been a disciplined actor so far, focusing on small/mid-size deals in areas where attractive demographics minimize the negative impact on long-term customer growth and limit affordability issues. Aqua has four active muni deals in the pipeline totaling 12,000 customers and an aggregate purchase price of $126 million, and management expects municipal acquisitions to remain a core growth driver going forward. Still, Aqua's (and the industry's) privatization push is not without risks, with evidence building that ratepayer advocates are pushing hard against unified tariffs for fair value deals and arguing that recent IOU regulatory/legislative wins should be paid for in the form of lower ROEs.

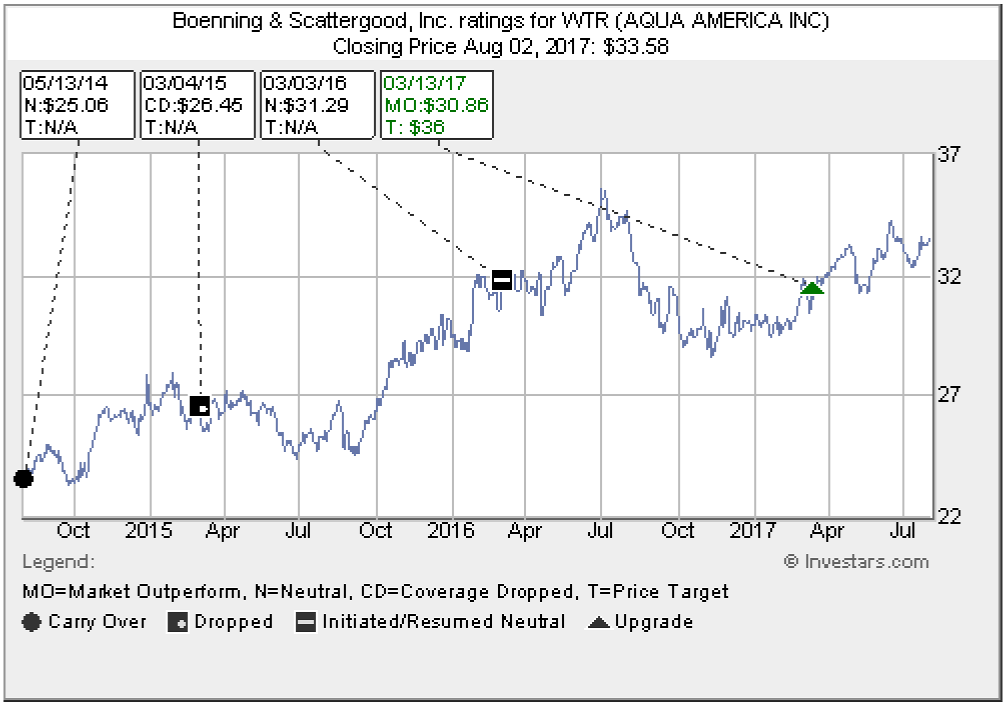
## Disclosure Appendix

### Rating and Price Target History:



### Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock and prevent it from reaching our target price: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

### Analyst Certification:

The research analyst whose name appears on this research report certifies that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

### Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

BOENNING & SCATTERGOOD
ESTABLISHED 1914

### Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

| Rating/Risk: | Outperform/Low |
| Price: | $35.48 |
| Target Price: | $43.00 |

## Third quarter EPS in-line, guidance affirmed; Maintain Outperform.

**Investment Conclusion:** Aqua is a bellwether name in the water utility space, operating in an attractive mix of regulatory jurisdictions (highlighted by OH, PA, and IL) and enjoying a well-earned reputation for operational efficiency and best-in-class profitability. Currently, there are a number of fundamental catalysts on the horizon, including a long-awaited rate case in PA and the potential for accelerated M&A activity as new laws designed to incentivize municipal asset sales kick into gear. We rate WTR Outperform, with our $43 target price based upon our proprietary regulation-weighted valuation model, under which Aqua shines given its exposure to the top three states in our latest state regulatory rankings (click HERE for rankings and valuation model).

**Key Points:**

- **3Q EPS in-line as wet weather trumps strong cost control.** Aqua reported 3Q17 EPS of $0.43, in-line with consensus, as weather-related demand headwinds weighed on the top-line. Revenue declined 5.1% on a year/year basis, with wet weather across a number of key geographies driving a 3.7% decline in regulated sales (the Mid-Atlantic region experienced 38 rainfall days in 3Q17 vs. 33 in 3Q16, and 14.9" in total 3Q17 precipitation vs. 9.1" in 3Q16) and divestitures of market-based businesses creating a further 1.5% top-line headwind. Despite the revenue decline, cost control was excellent, with O&M expense down 14.8% year/year, and the tax rate was just 4.3% versus 10.3% a year ago and 8.4% in the prior quarter. The strong cost control enabled EPS to rise 4% year/year despite the revenue decline, highlighting Aqua's well-earned reputation for operational efficiency. In conjunction with the third quarter results, the company affirmed its 2017 EPS guidance of $1.34-$1.39 (consensus is currently $1.36).
- **Rate activity picking up; PA DSIC in effect, rate case next.** After a lengthy lull exemplified by a nearly 5-year stay-out in Pennsylvania, the cadence of Aqua's rate pipeline is picking up. Year-to-date, the company has received more than $21 million in rate relief, including DSICs and base rates, across six of its eight states (Illinois, Indiana, New Jersey, North Carolina, Ohio, and Pennsylvania). Currently, an additional $14 million in rate requests is pending, including further relief in IL and NC, as well as Virginia. Most importantly, Aqua implemented DSIC surcharges in PA effective 10/1/2017, so new PA rates will roll onto the P&L in 4Q for the first time since 2012. Aqua expects to file a general rate case in PA in 2018, with resolution and new rates expected to hit the P&L in 2019. We believe that Aqua has the industry's most attractive regulatory footprint, with more than 80% of sales coming from the top three ranked states (OH, PA, IL) in our recent 2017 regulatory rankings (click HERE for full rankings).
- **Accelerating customer growth with prudent acquisitions.** Aqua currently has five municipal acquisitions pending, which together with the Tobyhanna deal ($5.1 million, 740 connections, closed in June) position the company to acquire 15,700 customer connections for an aggregate purchase price of $150 million. Though the price tag sounds high ($9,500 per customer), this is the new world of "fair market value" acquisitions, where investor-owned water utilities can offer substantially higher prices to cities looking to monetize water assets. This ability to pay-up is a clear positive for Aqua (and peers), as it not only helps to coax municipalities to the bargaining table, but also enables accelerated rate base growth that can subsequently be earned-on via unified statewide tariffs (although the carve-out of Scranton WW in American Water's **[AWK-$87.76-Neutral]** recent rate case settlement creates a worrying precedent). So far, Aqua has employed a prudent approach to municipal acquisitions, limiting regulatory risks.

## Aqua's $320 million bid for Chester Water back in play following board meeting.

**Summary:** Last Friday, we attended an emergency board meeting of the Chester Water Authority, called to discuss recent developments suggesting that the government of the City of Chester wants to force CWA to accept Aqua's $320 million bid. We came away feeling that the deal (previously thought dead) has new life, a plus for Aqua given CWA's potential as a needle-moving acquisition (at current rates, CWA would add 5.3% to the top-line, or 9.5% at Aqua's statewide tariff). While a legal battle looms over who has selling authority and who the beneficiaries of a sale would be (CWA serves parts of three counties), it looks likely that all or part of CWA will come to market. We rate WTR Outperform, with our $43 target price based on our regulatory valuation model.

**Key Points:**

- **Chester Water back in play as Aqua's largest acquisition target.** In May 2017, Aqua made a $320 million unsolicited bid for Chester Water Authority (CWA), which serves a population of 200,000 immediately south of Aqua's core territory in the western suburbs of Philadelphia. The bid was promptly rejected, and the issue was thought dead until last week, when the mayor of Chester issued a public letter to the CWA board asserting it had overstepped its authority in rejecting Aqua's bid without consulting the city, which he says has ultimate power over CWA. CWA is a regional system serving both the City of Chester and nearby suburbs, and while the suburban municipalities are in decent financial shape, the city is on the brink of being assigned a state emergency fiscal manager. A state-appointed fiscal manager could take over as soon as May 2018, and could move quickly to monetize CWA, which is why the city seems inclined to move proactively on Aqua's offer to avoid entering state receivership in the first place.
- **CWA board meeting heated; Legal battle likely looms.** Last Friday, we attended a special meeting of the CWA board called in response to the letter from the City of Chester, and it was clear that the CWA board will not agree to a sale without a fight. The board believes that Aqua was discussing the monetization of CWA with Pennsylvania officials more than a year prior to Aqua's bid, and voted Friday to explore legal options to block a sale. CWA lawyers suggested malfeasance by Pennsylvania officials in conferring with a private company about the sale of a municipal water system prior to a state manager even being appointed; and further complicating matters, there are indications that the City of Chester was also involved in these discussions. It remains to be seen whether there is anything illegal about the state and a city that is approaching receivership discussing potential options for stabilizing the fiscal situation, but either way, the CWA board seems intent on exploring all legal avenues in an attempt to block the sale.
- **Aqua offers 10-year rate stay-out, employment for all CWA staff.** In addition to its sizable $320 million ticket price ($250 million cash plus $70 million in assumed debt), Aqua's original offer included generous provisions, such as employment for all CWA staff and board members and keeping CWA customer rates "below Aqua's state-wide tariff" for a decade. Aqua further sweetened the pot at Friday's special meeting, saying that it would hold CWA rates flat for a decade (CWA charges $38/month vs. Aqua's $65/month), a surprising turn that makes the deal even more attractive for CWA ratepayers. While these terms make it harder for the CWA board to argue the deal is not in ratepayers' interest, they also create the risk that Aqua will underearn on the deal for an extended period. CWA had a net profit of $3.4 million on $43 million in sales in 2016, so if Aqua can't raise rates or realize employment synergies, its ROI would be just 1%. One wild card is that the state, in return for Aqua's help in rescuing Chester from receivership, would let Aqua bill existing ratepayers for the necessary ROI in its upcoming rate case.

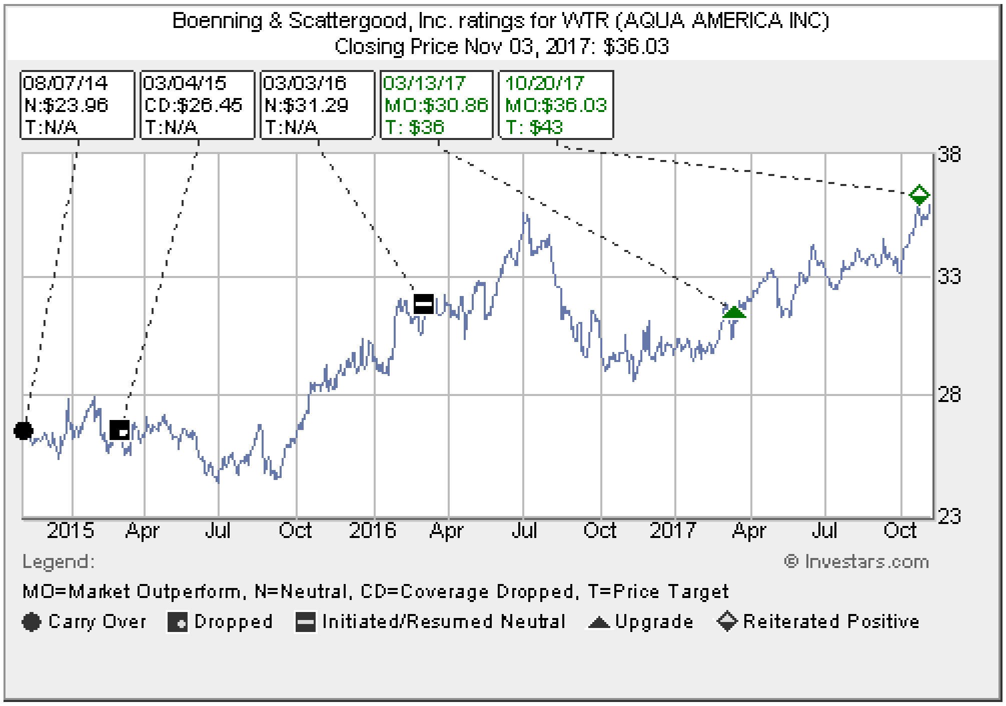
## Disclosure Appendix

### Rating and Price Target History:



### Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock and prevent it from reaching our target price: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

### Analyst Certification:

The research analyst whose name appears on this research report certifies that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

### Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

## Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

## Ratings Distribution (9/30/17):

Water & Environment

## ROE slippage continues as Pennsylvania PUC sets DSIC ROEs at 9.75%; Move increases odds of similar downward pressure in AWK, WTR rate cases.

*Yesterday the Pennsylvania Public Utility Commission set DSIC proxy ROEs for investor-owned water utilities at 9.75%, well below the 10.2% level that most water companies are earning in PA currently. Though technically not applicable to base rate cases (each of which is evaluated on its own merits), the considerable shortfall relative to prevailing ROEs skews the risks to the downside in upcoming rate cases, including for American Water (filed in April 2017) and Aqua America (to be filed in 2018). Overall, this development reinforces our view that the recent momentum toward adoption of progressive regulatory mechanisms (which companies understandably prefer to focus on) masks an important underlying shift in the tenor of the U.S. regulatory environment.*

**Key Points:**

- **PA PUC sets DSIC ROEs at 9.75%, well below prevailing levels.** Yesterday, the PA Public Utilities Commission set DSIC proxy ROEs at 9.75%, meaning that DSIC surcharge rates will now earn at this rate (as opposed to the traditional policy of earning at the ROE set in an IOU's most recent general rate case). Going forward, DSIC proxy ROEs will be reset periodically to reflect interest rate movements and other factors. Importantly, the 9.75% level set by the PUC falls well below the prevailing level for most investor-owned utilities, including Aqua America (10.2%) and American Water (10.25%). While the 9.75% technically applies only to DSIC, it provides a timely window into the PUC's current thinking on appropriate return levels.
- **9.75% approved 4-1; Lone dissenter leans harsher.** The PUC passed the 9.75% DSIC ROE with a vote of 4-1, with the lone dissenter (Commissioner Andrew Place) citing the need for case-by-case flexibility and various regulatory mechanisms favoring water IOUs, notably DSIC itself and the recent passage of fair market value acquisition legislation. Place's comments lean more harshly than the rest of the commission on where ROEs should be, continuing his recent trend of becoming increasingly hawkish on matters relating to water utility regulation (Place was a vociferous dissenter in the June 14 vote to approve Aqua's New Garden acquisition). The direction of the traditionally progressive PA PUC could be in flux going forward as Rob Powelson moves to FERC, and Place's increasingly dissident positioning merits attention.
- **Do DSIC ROEs create risk for awarded ROEs?** Technically, the 9.75% proxy ROE applies only to DSIC, a point AWK emphasized in reaction to yesterday's developments. Still, the cost of capital methodologies (CAPM, etc.) discussed yesterday mirror those used in general rate cases, and 9.75% is the latest, best update we have on the commission's view of the appropriate return for water IOUs. The magnitude of the shortfall (~50 basis points) relative to prevailing ROEs clearly suggests that ROE risks skew toward the downside in upcoming rate cases for both Aqua and American Water. While Aqua has greater PA exposure (and will be hit directly in its imminent DSIC filing), American is arguably more exposed near-term, as it has a PA rate case pending (asking for $108 million and a 10.8% ROE on $3.2 billion in rate base).
- **EPS impact minor, but is PA regulatory trend still a friend?** Assuming a 9.75% ROE, we estimate a $0.02-$0.04 EPS impact for American Water (relative to its current ROE of 10.25%), so from an earnings standpoint the issue is manageable. Still, the prospect of solidly sub-10% ROEs in Pennsylvania is a notable negative development for a state long regarded as the most favorable jurisdiction for water IOUs. Water utilities enjoyed a dramatic upward rerating after DSIC kicked off the regulatory revolution in the late 1990s, with P/Es going from 13-15 times previously to 22-24 times since (and higher at times). If the regulatory pendulum were to swing the other direction in precedent-setting Pennsylvania, water utilities' premium valuations could begin to erode, and therefore directional trends in regulation are a critical point of focus.

## Act 12 Update: PUC gets vastly different views from utilities, consumer advocate in public comments; OCA digging in on Utility Valuation Expert (UVE) setup.

**Summary:** Our analysis of public comments on Act 12 filed in recent days by PA water utilities and the state's Office of Consumer Advocate suggests an unusually spirited debate taking shape in a jurisdiction usually known for cordial and seamless adoption of progressive regulation. Much of the debate centers on how much discretion "Utility Valuation Experts" will have in conducting their fair value analysis and how they will be compensated – key issues that will have a material impact on whether Act 12 is able to successfully drive an acceleration in municipal acquisitions by investor-owned utilities. While Act 12 remains a notable positive development that will create growth opportunities for PA water utilities, we believe that the impact will be incremental rather than transformational, with deal flow starting slowly and being mostly on the bold-on side.

- **OCA: UVE system "will encourage inflation of fair market value".** In hard-hitting official feedback on the Act 12 tentative implementation order (click HERE for full document), the PA Office of Consumer Advocate requests that the PUC make a range of material changes. Issues raised by the OCA include DSIC (objecting to immediate post-deal DSIC hikes) and how "fair value" amounts will be divvied up into specific rate base plant accounts; but the most extensive pushback came on the Utility Valuation Expert (UVE) system. The OCA takes issue with various elements of the current UVE setup, including qualifications, conflicts of interest, valuation methods, fiduciary duties, jurisdiction of approvals, and (most stridently) UVE fees. The OCA notes the risk that the existing approach of capping fees at 5% of total deal value may "encourage the inflation of the fair market value by appraisers", and suggests implementing a flat fee/hours worked approach that will help mitigate the incentive to puff up valuations.

- **American Water: Hefty document belies largely benign comments.** American Water's was by far the *largest* document filed in response to the PUC's request for comments on the Act 12 tentative implementation order (click HERE for the 58 page filing), but the issues raised by the company are more procedural than structural – suggesting that American Water is generally satisfied with the current setup. On UVE fees, American Water takes a position nearly opposite that of the OCA, saying that allowing the PUC "discretion to approve fees above the (5%) cap is critically important to the successful implementation of Act 12". American Water also notes that the inclusion of traditional original cost valuation as one element of the assessment creates "an implementation process that is contrary to the language of Section 1329 (the relevant law), confusing, and administratively burdensome". In our view, these comments confirm that the principal motivation for investor-owned utilities is coaxing municipal sellers to the bargaining table, with price a secondary concern so long as the entire deal price goes into rate base.

- **Aqua America: "Presumption of Reasonableness" should prevail.** A good deal of Aqua's comments are focused on administrative aspects of the current implementation order, which the company believes are onerous (the current checklist for a typical Act 12 deal application includes 65 documents vs. five). Like American Water, Aqua objects to the requirement that cost-based valuation be included in the engineering report, stating flatly that "the language of the (Act 12) statute does not reference the use of original cost valuation". Aqua says the PUC should make a "presumption of reasonableness" on UVE fees and that extensive documentation requirements on how UVE fees are derived should be relaxed (click HERE for Aqua's entire filing). UVEs stand to become pivotal players in Act 12 transactions, and both Aqua's and American Water's comments suggest a desire to grant UVEs as much leeway and flexibility as possible in order to prevent excessively rigid rules from keeping a lid on valuations.

## MACRUC 2017 Takeaways: Are "Fair Market Value" acquisition laws over-hyped? ROEs may drift still lower near-term despite Fed tightening.

*We were in Hershey, PA last week for MACRUC (Mid-Atlantic Conference of Regulatory Utility Commissioners), an important annual event for key AWK and WTR states such as New Jersey and Pennsylvania, and our meetings yielded a number of timely takeaways. Overall, the regulatory pendulum continues to show signs of drifting back toward ratepayer interests after years of the utilities gaining ground, although utilities recognize the shift and are moving aggressively on countermeasures. Ironically, fair value legislation appears to be driving few actual transactions, and this is expected to continue, leading some to assert that utilities may have misspent valuable political capital on an effort that may ultimately lead to surprisingly few deals. In addition, channel feedback suggests awarded ROEs may slip further in the next 12-18 months despite the recent uptick in benchmark interest rates. Still, the event yielded some positive takeaways as well, notably the potential for more favorable treatment of lead service line replacement in PA and other states. Below we discuss selected takeaways from our MACRUC 2017 meetings.*

### Key Takeaways: Industry

- **Skepticism spreading as fair value deals get off to slow start.** Fair market value acquisition laws are the most hyped regulatory development to hit the water space in years, with IOUs practically giddy over their potential to act as a catalyst for privatization of the nation's tens of thousands of locally-owned water/sewer systems. Still, despite all the excitement, there have been few actual fair value transactions, and MACRUC revealed an emerging view that the new laws may ultimately fall short of proponents' expectations for reasons that vary by state. In NJ, some question whether onerous "emergent conditions" can be met by *any* system, while in PA, there is staunch OCA pushback on the implications for unified ratemaking. A recurring theme, however, is that water and sewer authorities are devising strategies to resist what they see as an attempt by the private sector to raid the municipal sector for growth – including moving toward full-cost pricing (making systems more attractive as cash flowing assets for local governments), regionalization (whereby systems unite and recapitalize with a debt offering, which happened in Allentown, PA), and getting more involved in the regulatory process (in some cases seeking to intervene directly in rate cases to point out perceived flaws with fair value legislation).
- **ROEs may drift lower near-term despite uptick in interest rates.** Awarded ROEs have been on a steady downward slide for more than five years as rock-bottom interest rates impacted the CAPM models utilized by expert consultants in rate cases, and tighter monetary policy provides a welcome light at the end of the tunnel. Still, the feedback from MACRUC is that low interest rates are just one of many factors that have been weighing on ROEs, and that while in the long-run higher interest rates will likely lead to a recovery in awarded returns, in the near-term ROEs could actually drift still lower before inflecting positively. Regulators say that the increasing prevalence of "progressive" mechanisms (such as DSIC, single tariff pricing, future test years, etc.) has led ratepayer advocates to aggressively assert that the regulated water utility business has shed risk and therefore deserves to shed return. A timely ROE skirmish is currently playing out in NJ, where Suez **(SEV.EN-€16.12-Not Rated)** is seeking to hold the line at 9.75% by arguing that this level has become "established policy" for the BPU. While the Street does see 9.75% as the prevailing and sustainable level, NJ regulators present at MACRUC noted that 9.75% is in fact <u>not</u> policy, and that each rate case undergoes its own distinct evaluation.
- **IOUs pushing for rate base treatment on lead service laterals.** Among the most prominent MACRUC panels on water pertained to devising regulatory approaches that allow IOUs to deal with lead service laterals and be appropriately recompensed for their capital outlays (despite the fact that these lines are often owned by customers). Across the board, utilities say they are

BOENNING & SCATTERGOOD
ESTABLISHED 1914

dissatisfied with the approach taken recently by York Water Company **(YORW-$35.25-Not Rated)** in PA, which allows dollar-for-dollar cost recovery, but falls short of full rate base treatment. The York Water situation was unique in that York is an older urban area which has acute lead service lateral issues, while most other IOUs predominantly serve more recently developed suburban areas, and regulators appear open to exploring different approaches that incentivize IOUs to direct valuable capital toward this issue. AWK is looking to address the issue in PA via its recently filed rate case, seeking full rate base treatment and even DSIC eligibility for replacement of customer-owned service laterals. Though it won't move the needle overnight for a company like American Water, the ability to add service lateral investments to rate base would be an important win and would enlist the private sector as a solutions provider in an issue that is becoming increasingly prominent nationally.

- **New Jersey: New legislation to level municipal/IOU playing field.** The scope of regulation is set to widen in NJ, with the Water Quality Accountability Act (S2384) needing only the Governor's signature to become law (the bill has unanimous bipartisan support, having passed the Assembly with a vote of 76-0). S2384 would subject municipal water authorities to the same rigorous (and costly) system management guidelines that the NJ Board of Public Utilities applies to investor-owned systems on issues such as equipment testing, cyber security, and establishment of a formal asset management program (including plans to get to a 150-year pipe replacement cycle). Faced with elevated compliance costs under S2384, some municipals may explore alternatives, creating acquisition opportunities for IOUs, an angle that MACRUC meetings clearly suggest companies are focused on proactively exploiting. Still, some managements say that while in *theory* the law could drive a rapid acceleration in acquisition pipelines (the bill sets a narrow 120-day compliance deadline for some provisions), in *practice* the NJ Department of Environmental Protection has been known to be "selective" in its enforcement of such laws, at times granting municipal systems extended compliance timelines via consent decrees. S2384 will likely be signed into law by Governor Christie in the weeks ahead.
- **Pittsburgh to PUC looks like a done deal; Is privatization next?** According to sources who attended a key procedural hearing last week, all signs point toward the Pittsburgh Water and Sewer Authority being placed under PUC control via HB1490. Though the law applies to only one municipal system, in theory the net effect for Pittsburgh is much the same as that of S2384 on municipal systems across NJ, with Pittsburgh now facing the same regulatory standards as IOUs. Complying with the more stringent regulatory burden will require substantial incremental investment by PWSA, and as in NJ many believe this could lead Pittsburgh to ultimately explore alternatives, including a potential asset sale to American Water (which already provides water service to significant sections of the city). The unique nature of the Pittsburgh situation, coupled with Pennsylvania's newly minted Act 12 fair market value law, could lead to Pittsburgh commanding a sizeable buy-out price well over $1 billion, which may complicate efforts to maintain local control. Still, so far the Mayor has been emphatic in stating that the city will not privatize PWSA. Relatedly, another MACRUC takeaway is that utilities are increasingly contemplating using Act 12 as a means of pressuring local governments to the bargaining table by loudly publicizing the sizeable sums left on the table by <u>not</u> doing so.
- **Atlantic City gives NJ its own high-profile privatization saga.** New Jersey is playing out its own high-profile saga in the case of Atlantic City, which is under state financial oversight under which the state is said to be considering a sale of the city's water system as a means of shoring up its finances. In June, anti-private sector advocacy group Food & Water Watch conducted a door-to-door campaign gathering signatures to force the issue to a referendum, and the press has zeroed in on the issue (largely taking the anti-privatization side). Although Atlantic City's year-round population is just 40,000, the city has 12,000 casino hotel rooms, providing a sizable seasonal commercial/industrial demand profile, and would likely approach Scranton in deal size ($195 million), with AWK seen as the logical suitor given its scale and presence in the region (including nearby Ocean City, NJ). In theory, the Water Infrastructure Protection Act (which allows systems that meet "emergent conditions" to be sold without a referendum) could streamline the deal, but the prevailing view is that although Atlantic City sits within one of the NJDEP's "Critical Water Supply Areas" (technically one of the qualifying "emergent" criteria), it is unlikely to be classified as an emergent system given the lack of egregious water quality violations and/or operational problems and the high-profile nature of the situation.

*MACRUC revealed an emerging view that "Fair Market Value" acquisition laws may ultimately fall short of expectations.*

*Ratepayer groups are increasingly arguing that risk-reducing progressive mechanisms (DSIC, etc.) justify lower ROEs.*

*Faced with elevated compliance costs under S2384, IOUs hope New Jersey municipals will explore privatization.*

# Water Sector: Drips & Drops

June 6, 2017

Water & Environment

## PA legislators want to put Pittsburgh water/WW system under PUC control, but privatization unlikely near-term; Eversource/Aquarion deal creates multi-utility.

*Drips & Drops* provides real-time data points and insights into trends shaping the water industry.

- **PA lawmakers seek to place Pittsburgh water system under PUC control.** The Pittsburgh Water & Sewer Authority (PWSA) has suffered a series of high-profile crises over the last year, with the lowlights including water quality problems, city-wide boil water advisories, botched attempts to rectify widespread lead service line issues, and disorderly management shake-ups. In the wake of these ongoing problems, a bill seeking to put PWSA under the direct supervision of the Pennsylvania Public Utilities Commission was introduced in the Pennsylvania General Assembly last week. If passed, PA H.B. 1490 would subject PWSA to the same environmental, economic, and governance standards as investor-owned utilities, with sponsors believing this will help stabilize the situation and alleviate public health concerns. Given the magnitude of the public safety issue, heightened sensitivity after the Flint, Michigan crisis, and the fact that the bill originated locally, we believe that H.B. 1490 stands a strong chance of passing.
- **Despite AWK proximity and expertise, privatization unlikely near-term.** American Water has a strong presence in/around the city of Pittsburgh, including a number of connections within city limits, and is a natural partner as the PWSA situation unfolds given its status as a trusted local water supplier. In addition, an asset sale would likely bring a windfall under the new Act 12 fair market value rules (for perspective, AWK bought Scranton WW for $195 million, and Pittsburgh is 4x Scranton's size; with PWSA including both water *and* WW, this implies that the system could fetch upwards of $1.5 billion). Still, the mayor is emphatic that privatization is a non-starter, and appears likely to breeze to another 4-year term. Recent cases (such as Atlantic City, NJ) demonstrate that a resolute mayor can single-handedly obstruct even a highly compelling deal. As a result, while AWK could end up being involved in some capacity (for example, contract operation), a PWSA asset sale looks unlikely to materialize near-term.
- **Water & Electric combinations make no sense? Eversource begs to differ.** Last week, New England energy utility Eversource **(ES-$62.29-Not Rated)** said it will buy Connecticut water utility Aquarion (formerly owned by Macquarie-**MQG:ASX-A$86.18-Not Rated)** for an EV of $1.675 billion ($880 million in cash, $795 million in assumed debt). The sale marks the largest water utility deal in over a decade, with the outcome somewhat of a surprise, as many expected AWK (or maybe WTR) to be the buyer. Aquarion and Eversource have substantial geographic and regulatory overlap, with both firms operating systems in CT, MA, and NH. This "electric + water" deal is notable given that Aqua America has received nearly uniform criticism from the Street (though not from us) for having the audacity to say it would *consider* acquiring anything outside of water. In our view, regulatory relations (not pipe tapping or power plant operation) are the core competency of a utility holding company, and the Aquarion/Eversource deal suggests renewed momentum for the multi-utility format.
- **Could Connecticut Water be next on Eversource shopping list?** The Aquarion/Eversource deal is already prompting speculation that Connecticut Water **(CTWS-$54.41-Not Rated)** could be next on Eversource's list of targets, and on a fundamental level this makes sense. Increased scale is known to drive superior regulatory outcomes in the water industry (this was a key part of the rationale for the "asset swaps" between American Water and Aqua America in the early 2010s), and adding CTWS would augment Eversource/Aquarion's presence in both Connecticut and Maine. From a valuation perspective, however, a deal looks unlikely at CTWS' prevailing share price. CTWS serves 90,000 customers to Aquarion's 230,000, so a back-of-the-envelope calculation implies an EV of ~$650 million for CTWS at a similar deal multiple – significantly below Connecticut Water's enterprise value of $880 million.

## First quarter EPS in-line, with tax benefit offsetting lower operating earnings.

**Summary:** Aqua posted in-line 1Q EPS, but earnings were aided by tax benefits, with operating income falling short of expectations. The fundamental story remains stable, but there are a number of significant regulatory and M&A wildcards on the horizon, and the reward versus risk equation is balanced. We rate WTR (which at a P/E of 25 times trades in-line with peers) Neutral.

**Key Points:**

- **Operating earnings decline on soft top-line, margin pressure.** Aqua posted first quarter EPS of $0.29, up 4.7% year/year, in-line with our model and consensus (both $0.29), but earnings quality was poor, with an unexpected tax gain driving the quarter. Excluding the $0.04 impact of a *negative* 4.3% tax rate, EPS was $0.25 in the quarter. Revenue increased 3.5% year/year, below our estimate of +4%, while Operations & Maintenance and Depreciation expenses rose 7% and 6.3%, respectively. As a result, operating margin declined 150 bps to 35.7% from 37.2% a year ago, leading to a 0.8% year/year decline in operating income. Management notes that adjusting for costs related to severe winter weather, O&M expenses would have risen ~2.3%; normalizing for this, first quarter EPS would have been approximately $0.27.
- **Chester enters negotiations to carve out city assets.** On March 14, Chester Water Authority and the City of Chester entered negotiations on an agreement that would allow the city to sell Aqua its portion of the water system assets (click HERE for agreement). Essentially, the city is bankrupt and wants to sell, but the surrounding suburbs also served by CWA are in good fiscal shape and vehemently oppose a sale. Pro-rating Aqua's $320 million bid by the city/suburb rate base split implies a ~$60 million deal. While this would still be a sizable rate base addition, the City of Chester is among the poorest in Pennsylvania, and acquiring it as a stand-alone asset could create affordability issues under Aqua's existing unified tariff. The two primary potential outcomes seem to be (a) a severely downsized deal, or (b) Aqua walking away entirely.
- **"Customers served" decoupling legislation raises eyebrows.** House Bill 1782 (pdf HERE) is making its way through PA legislature and, among other alternative ratemaking mechanisms, proposes adopting a unique "customers served" decoupling system for water utilities. As in the case of Chester, fair market value deals skew toward troubled cities with declining populations, and with the PUC insisting on separate rate districts rather than allowing IOUs to blend these acquisitions into unified tariffs, utilities' push for this provision implies a concern that FMV deals may create affordability issues and hinder customer growth. It's a Catch-22 for utilities: the addition of decoupling in PA would almost certainly lead to ROE pressure, but IOUs' push for protection against negative customer growth suggests that *not* getting it could create issues in integrating FMV deals into rates. For more on this issue, see our April 26 note HERE.
- **Aqua notably absent from recent M&A drama.** Given its history as an aggressive player in the industry's last big round of consolidation in the early 2000s, Aqua's absence from the recent bidding activity in the water utility space is notable. The conventional wisdom has long been that Aqua (and its other large-cap peers) would eventually subsume the remaining small/micro-cap players, but so far the company has not been involved despite the fact that a number of the relevant states (Connecticut, Maine, and California) would further diversify the portfolio by adding new regulatory jurisdictions. While muni/fair market value deals remain the focus, these have been mostly smaller, and if the recent flurry of M&A activity continues, we expect Aqua would get involved, although acquiring other listed players poses valuation challenges.

## Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

## 2017 guidance so-so, but M&A pipeline heating up; PA rate case likely in 2018.

**Investment Conclusion:** Aqua is among the best-run companies in the water space, and enjoys a structural advantage over peers given its majority position in the favorable regulatory jurisdiction of Pennsylvania. Management's initial 2017 EPS guidance is modestly below the Street, but the fundamental outlook is solid as municipal acquisition activity accelerates and a rate filing in the critical Pennsylvania territory draws closer (2018). Still, we rate WTR Neutral, with the current forward P/E multiple of 22.3 times roughly in-line with the peer group average of 22.6 times.

**Key Points:**

- **Tweaking 2017 estimate lower as guidance below Street.** Aqua issued 2017 EPS guidance of $1.34-$1.39, with the midpoint of $1.365 below both our prior estimate of $1.40 and consensus of $1.39. The company maintains 2016 guidance of $1.30-$1.35, so at the respective midpoints this implies 2017 EPS growth of 3%. The 2017 guidance assumes a 1%-2% increase in same-system Operating & Maintenance expense, which coupled with the lack of rate relief in the core Pennsylvania territory (due in part to the de facto rate stay-out following the adoption of repair tax flow-through accounting in 2012), explains the below-trend bottom-line growth. Still, the company also issued a robust acquisition pipeline update, and it appears that recent legislative changes regarding municipal acquisitions are driving a tangible uptick in M&A.

- **PA rate case now seen in 2018, with new rates hitting P&L in 2019.** Aqua expects to file an infrastructure investment charge (aka DSIC) in Pennsylvania in 2017 in order to help offset the upward drift in costs in the near-term. In terms of base rates, management anticipates a rate case in 2018, with rate relief coming in 2019. Overall, the company has prudently managed through the financial benefits of the repair tax flow-through, though bottom-line growth has predictably decelerated late in the rate cycle. The 2018 Pennsylvania rate case will be closely watched, with recent positive regulatory developments in PA leading some smaller utilities to believe that the OCA/PUC could take a harder line on some elements of rate filings going forward.

- **Aqua expects banner year of municipal deals in 2017.** Despite a recent setback in New Jersey (in November, the town of Westville voted down a potential sale to Aqua), management expects 2017 to be a big year for municipal acquisitions. Anticipated 2017 closings include two sizable deals: a 5,400 connection system for $75 million and a 2,100 connection system for $30 million. All told, Aqua expects to spend more than $113 million on acquisitions (almost exclusively of municipal systems) in 2017, marking a five-fold increase over 2016 ($22 million). Management cites "fair value" legislation in key states as driving the acceleration in municipal acquisitions, the latest evidence that this regulatory trend is leading to an uptick in privatization activity.

- **Bottom-Line: Reward/Risk balanced as PA rate case approaches.** Aqua remains the water industry's gold standard in terms of operational efficiency, and the robust M&A pipeline shows that the company is holding its own in the competitive world of "fair value" municipal M&A. After years of lackluster earnings growth following the effective pull-forward of multiple years of growth in 2013 via repair tax flow-through, the company is set to resume a more traditional growth trajectory in the years ahead as it finally gets back in for base rate relief in its core (60% of sales) Pennsylvania franchise. Still, while there is a lot to like fundamentally about the story, we believe the current in-line P/E appropriately calibrates reward and risk in the stock.

# Aqua America, Inc.

**(WTR-NYSE)**

August 3, 2017

**Water & Environment**

| | |
|---|---|
| Rating/Risk: | Outperform/Low |
| Price: | $33.58 |
| Target Price: | $36.00 |

## 2Q earnings in-line, 2017 guidance affirmed, thesis intact; Reiterate Outperform.

**Summary:** Aqua America is a bellwether name in the attractive water utility space, which boasts a compelling reward/risk outlook in an environment where valuations for many water industrials are becoming stretched. In addition to the "flight-to-safety" benefits inherent in the water utility space, Aqua has a number of important company-specific fundamental catalysts on the horizon as well – notably including a return to rate relief in its core regulatory jurisdiction of Pennsylvania (the company has been out of rates in PA for nearly five years). Aqua offers a unique combination of defense and offense, and the stock's discount valuation further improves the risk-adjusted total return outlook. We rate shares of WTR Outperform, with our $36 target price reflecting a forward P/E multiple of 25 times, in-line with the investor-owned water utility peer group average.

**Key Points:**

- **2Q EPS in-line.** Aqua America posted 2Q17 EPS of $0.34, in-line with both our estimate and consensus and up a penny from $0.33 in 2Q16, with revenue dipping 0.2%, but operations and maintenance expenses falling 4.2% due in part to recent divestitures of non-core market-based businesses. The tax rate remains attractively low, declining 10 basis points to 8.4% from 8.5% a year ago, as the company continues to benefit on the income tax line from the repair tax flow-through accounting arrangement in Pennsylvania. Importantly, management indicates that the sales of market-based businesses are now complete, with such activities projected to contribute a miniscule ~$4 million in annual revenue going forward and Aqua now focused squarely on growing its regulated *water and wastewater* business. In addition, the company affirmed its 2017 EPS guidance range of $1.34-$1.39. Overall, it was a solid quarterly report, with Aqua demonstrating strong execution late in the rate cycle in its key Pennsylvania territory.
- **Rate activity brisk; PA looms large.** Year-to-date, Aqua has received rate relief (both base rates and infrastructure surcharges) of $11.1 million, representing an annualized revenue tailwind of 1.4% across a number of states including Indiana, Illinois, New Jersey, Ohio, and, importantly, Pennsylvania (this is the first official word of rate relief in PA, and it comes earlier than the 4Q timeframe we had expected). In addition, Aqua currently has rate requests pending in Illinois and Virginia for a total of $12.2 million. This is a notable level of activity for Aqua, providing a strong and consistent cadence of rate relief as the company prepares to file a general rate case in its critical home jurisdiction of Pennsylvania (~60% of sales). Management now expects to file the Pennsylvania rate case sometime in 2018 with a decision expected in 2019. Though recent PA-PUC testimony suggests there could be downward pressure on ROEs, the prospect of long-awaited rate relief in Pennsylvania is a critical catalyst for WTR shares.
- **Acquisitions: Balancing act continues.** Municipal acquisitions have become a central growth strategy for Aqua and its peers, with fair market value legislation and other regulatory catalysts driving an increasingly aggressive privatization push. Aqua has been a disciplined actor so far, focusing on small/mid-size deals in areas where attractive demographics minimize the negative impact on long-term customer growth and limit affordability issues. Aqua has four active muni deals in the pipeline totaling 12,000 customers and an aggregate purchase price of $126 million, and management expects municipal acquisitions to remain a core growth driver going forward. Still, Aqua's (and the industry's) privatization push is not without risks, with evidence building that ratepayer advocates are pushing hard against unified tariffs for fair value deals and arguing that recent IOU regulatory/legislative wins should be paid for in the form of lower ROEs.

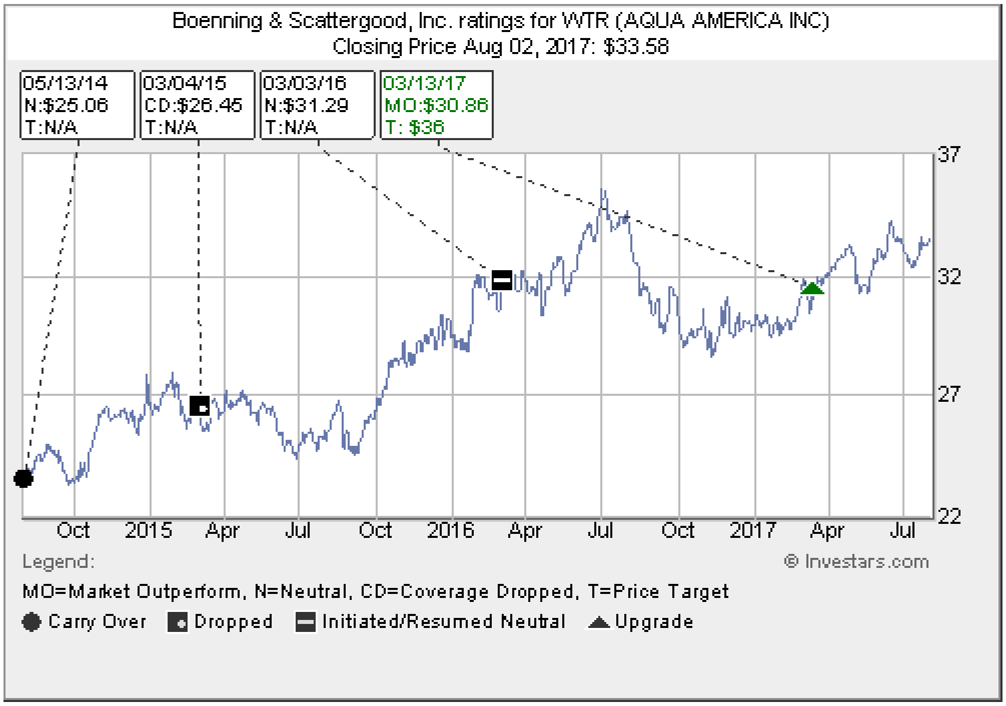
# Disclosure Appendix

## Rating and Price Target History:



## Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock and prevent it from reaching our target price: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

## Analyst Certification:

The research analyst whose name appears on this research report certifies that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

## Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

BOENNING & SCATTERGOOD
ESTABLISHED 1914

### Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy)*:** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold)*:** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell)*:** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low*:** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate*:** The security has average fundamental predictability and/or average price volatility.
- ***High*:** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative*:** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

### Ratings Distribution (6/30/17):

| Coverage Universe (a) | % of Universe |
|---|---|
| Outperform (Buy) | 26% |
| Neutral (Hold) | 53% |
| Underperform (Sell) | 9% |
| Not Rated | 11% |

| Investment Banking Clients (b) | % of Rating Group |
|---|---|
| Outperform (Buy) | 22% |

## 2Q16 earnings in-line as lower costs offset reduced sales; Maintain Neutral.

**Investment Conclusion:** Aqua America's 2Q16 results affirm both the "good news" and the "bad news" of the story, with the good news being that Aqua is among the best run utilities in the nation from an operational perspective (O&M expense was just 36% of sales in 2Q), and the bad news being that during the ongoing rate stay-out in PA, growth remains hard to come by (revenue fell 1%). Coupled with an epic YTD run-up in P/E multiples across the entire water utility space that leaves the stock trading near the high end of its historical valuation range, this hinders the reward-risk equation in our view, and as a result we maintain our Neutral rating for shares of WTR.

**Key Points:**

- **2Q in-line as lower O&M expenses offset soft top-line.** Aqua posted 2Q16 EPS of $0.33, in-line with consensus, as a sharp drop in Operations & Maintenance expenses offset a 1% decline in revenue that the company attributes in part to reduced volumes (our model assumed a 2% increase in sales). Management says the decline in O&M expenses was driven by a combination of market-based divestitures, lower production expenses, and other non-recurring factors, and says that on a "same system" basis, O&M expenses rose 1.3% year-over-year. Overall, it was a solid, if noisy, quarter for Aqua, though the results also underscore the challenge the company faces trying to grow during its PA rate stay-out, with EPS up just 3.8% year-over-year.

- **Rate case pipeline active, but all eyes remain on PA.** Measured by the number of rate awards, 2016 has been a banner year for Aqua, with new rates hitting the P&L in IL, OH, NC, OH, TX, and VA, and rate cases outstanding in IN, NJ, and OH. Still, new awards year-to-date total just $5 million (~0.5% of sales), and cases pending total $10.5 million (with final awards subject to the customary haircut), underscoring the vital importance of Pennsylvania (~70% of rate base) to Aqua's overall growth picture. The company continues to invest aggressively (capex targeted at $350 million for 2016), and we expect DSIC surcharges to begin in PA in 2017, with a rate filing likely by early 2018. In the meantime, consolidated growth will remain muted.

- **Tweaking 2016 estimate lower on likely 3Q weather headwinds.** July is a key swing month for demand from a weather standpoint, and July 2016 precipitation levels were heavy in Aqua's two largest territories. In Southeastern PA, there were 14 days of measurable rainfall in July for a total of 6.8 inches, versus 10 days for 2.5 inches in July 2015 (which itself was wetter than normal). In Ohio, there were 15 days of rain in July for 6.3 inches, versus 8 days for 0.9 inches in July 2015. As a result, we believe demand could be softer in 3Q16, and lower our top-line assumption (to –0.5% from +2%), and tweak our 2016 EPS estimate downward to $1.30 from $1.35 previously (management affirmed it 2016 EPS guidance range of $1.30-$1.35).

- **Maintain Neutral: Fundamentals remain compelling, but largely priced-in.** Aqua is among the best-run companies in the water space, and enjoys a structural advantage over water utility peers in that the progressive regulatory jurisdiction of Pennsylvania represents >50% of sales and ~70% of rate base. The company's new leadership is taking proactive steps to enhance the long-term growth outlook (including taking a less inhibited view of strategic M&A), and the addition of fair value legislation in PA provides the opportunity for muni acquisitions to finally gain steam. Still, these positives are largely priced in, with WTR trading at forward P/E of 24.7 times, at the high end of their historical range of 19-25 times. We rate the stock Neutral.

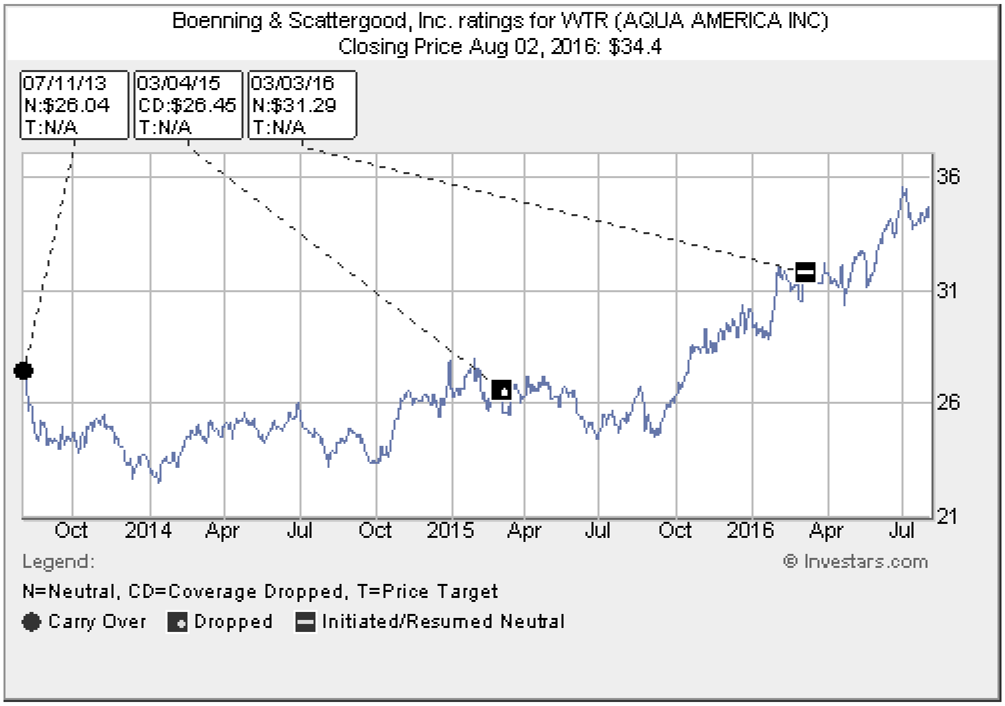
## Disclosure Appendix

### Rating and Price Target History:



### Risk Factors:

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock: regulatory lag; economic regulation; environmental law; water availability; weather; funding; and inputs.

### Analyst Certification:

The research analyst whose name appears on this research report certify that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

### Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

BOENNING & SCATTERGOOD
ESTABLISHED 1914

## Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group:

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

## Another solid quarter for Aqua; Maintain Neutral on valuation.

**Investment Conclusion:** Aqua is among the best-run companies in the water space, and enjoys a structural advantage over peers given its majority position in the favorable regulatory jurisdiction of Pennsylvania. At the moment, Aqua belies the stereotype of humdrum water utility, with a much anticipated rate case filing on the horizon in PA, and management looking to diversify the portfolio by acquiring into regulated utility sectors outside of water. We rate WTR shares Neutral, with the current P/E of 21.4 times roughly in-line with the peer group average of 21.8 times.

**Key Points:**

- **3Q in-line as top line returns to growth, margins expand.** Aqua posted 3Q16 EPS of $0.41, modestly above consensus of $0.40, with revenue increasing 2.5% year-over-year and operating margin expanding 20 basis points to 43.2% versus 43.0% in 3Q15. EPS increased 8.5%, Aqua's best growth rate since 1Q15, with the combination of revenue growth and cost control (O&M expenses rose just 1.6% in 3Q, and are actually down 1.8% YTD through September 30) enabling solid bottom-line leverage. In addition, management affirmed the full-year 2016 EPS guidance range of $1.30-$1.35. Overall, it was a solid 3Q report for Aqua America, with the company leveraging its trademark cost discipline to drive a nice acceleration in earnings growth despite being deep into its rate cycle in its dominant Pennsylvania franchise territory.
- **Rate case pipeline active, but PA filing looms on horizon.** Aqua has received annualized rate relief of $5.5 million in 2016, including new base rates and infrastructure surcharges in Illinois, North Carolina, Ohio, Texas, Virginia, and New Jersey. The company has another $8.1 million in rate requests pending across several states, but "the big one" (Aqua's long-awaited rate filing in Pennsylvania – its first since the landmark repair tax deal) likely remains more than a year away in early 2017. In the typically staid world of regulated water utilities, Aqua Pennsylvania's upcoming rate case is shaping up as an important one for both the company and industry, and channel discussions suggest it is already a topic of lively conversation in Harrisburg.
- **Acquisition pipeline active; Another New Jersey deal on Nov. 8 ballot.** Year-to-date, Aqua has added 5,700 connections via acquisition across several states, including New Jersey, where the company faces stiff competition for deals from larger rivals. Aqua appears determined to continue building its New Jersey business, with residents of Westville, NJ set to vote November 8th on whether to allow Aqua to acquire the water system for $8.4 million. With the regulatory climate in NJ improving (now a Top Five state in our rankings), the decision to expand in the state is well timed. Still, the competitive deal environment may be forcing Aqua to compromise somewhat on terms (the Westville deal would require Aqua to freeze rates for five years).
- **Ex-water acquisitions remain a wild card; Time will tell.** Aqua is unique among listed water utilities for unapologetically maintaining that it sees navigating the regulated return system as its core competency, and for its confidence that it can leverage this skill set to drive shareholder value in a multi-utility format. Parallel to its ongoing bolt-on strategy in water, Aqua is seeking deals in other utility sectors, and we expect to see a transaction at some point (with gas the most likely option). For our part, we've come around to the idea, particularly if financed as a stock deal, enabling Aqua to leverage its premium valuation as currency. While there's no way of knowing if/when a deal gets done, this is an important point of differentiation versus peers.

# Water Sector: Flash Update

August 19, 2016

Water | Environment

## Act 12 Update: PUC gets vastly different views from utilities, consumer advocate in public comments; OCA digging in on Utility Valuation Expert (UVE) setup.

**Summary:** Our analysis of public comments on Act 12 filed in recent days by PA water utilities and the state's Office of Consumer Advocate suggests an unusually spirited debate taking shape in a jurisdiction usually known for cordial and seamless adoption of progressive regulation. Much of the debate centers on how much discretion "Utility Valuation Experts" will have in conducting their fair value analysis and how they will be compensated – key issues that will have a material impact on whether Act 12 is able to successfully drive an acceleration in municipal acquisitions by investor-owned utilities. While Act 12 remains a notable positive development that will create growth opportunities for PA water utilities, we believe that the impact will be incremental rather than transformational, with deal flow starting slowly and being mostly on the bold-on side.

- **OCA: UVE system "will encourage inflation of fair market value".** In hard-hitting official feedback on the Act 12 tentative implementation order (click HERE for full document), the PA Office of Consumer Advocate requests that the PUC make a range of material changes. Issues raised by the OCA include DSIC (objecting to immediate post-deal DSIC hikes) and how "fair value" amounts will be divvied up into specific rate base plant accounts; but the most extensive pushback came on the Utility Valuation Expert (UVE) system. The OCA takes issue with various elements of the current UVE setup, including qualifications, conflicts of interest, valuation methods, fiduciary duties, jurisdiction of approvals, and (most stridently) UVE fees. The OCA notes the risk that the existing approach of capping fees at 5% of total deal value may "encourage the inflation of the fair market value by appraisers", and suggests implementing a flat fee/hours worked approach that will help mitigate the incentive to puff up valuations.

- **American Water: Hefty document belies largely benign comments.** American Water's was by far the *largest* document filed in response to the PUC's request for comments on the Act 12 tentative implementation order (click HERE for the 58 page filing), but the issues raised by the company are more procedural than structural – suggesting that American Water is generally satisfied with the current setup. On UVE fees, American Water takes a position nearly opposite that of the OCA, saying that allowing the PUC "discretion to approve fees above the (5%) cap is critically important to the successful implementation of Act 12". American Water also notes that the inclusion of traditional original cost valuation as one element of the assessment creates "an implementation process that is contrary to the language of Section 1329 (the relevant law), confusing, and administratively burdensome". In our view, these comments confirm that the principal motivation for investor-owned utilities is coaxing municipal sellers to the bargaining table, with price a secondary concern so long as the entire deal price goes into rate base.

- **Aqua America: "Presumption of Reasonableness" should prevail.** A good deal of Aqua's comments are focused on administrative aspects of the current implementation order, which the company believes are onerous (the current checklist for a typical Act 12 deal application includes 65 documents vs. five). Like American Water, Aqua objects to the requirement that cost-based valuation be included in the engineering report, stating flatly that "the language of the (Act 12) statute does not reference the use of original cost valuation". Aqua says the PUC should make a "presumption of reasonableness" on UVE fees and that extensive documentation requirements on how UVE fees are derived should be relaxed (click HERE for Aqua's entire filing). UVEs stand to become pivotal players in Act 12 transactions, and both Aqua's and American Water's comments suggest a desire to grant UVEs as much leeway and flexibility as possible in order to prevent excessively rigid rules from keeping a lid on valuations.

# Aqua America, Inc. (WTR)

## Q4 Conference Call Highlights

**Reiterate Neutral rating after WTR's Q4 conference call.** Q4 results missed our/consensus revenue estimates due to the exit of market-based businesses, but beat on the bottom line. WTR achieved the low end of its customer growth targets, and believes its municipal acquisition strategy will contribute to revenue growth in 2017. WTR plans to file for DSIC in 2017 and a full rate case in 2018, which should help EPS growth. That said, we continue to believe shares are fairly valued at current levels.

- **The exit of market-based business segments offset revenue increases in Q4, but management reiterated FY:17 guidance.** Lower revenue due to the sale of market-based business segments more than offset increased revenue from customer growth and rate recovery mechanisms in Q4. Management reiterated its FY:2017 EPS guidance of $1.34 to $1.39 and capital investment of $450M. For additional details about Q4 performance see: Q4 Results First Look.
- **WTR grew its customer base 1.6%, which is in line with its targets, but the majority of customer growth was organic.** While WTR was within its guided customer growth range, overall customer growth was down 0.3% y/y from 1.9% growth in 2015. The company added ~6,558 customers through 19 acquisitions in 2016, which represents ~0.7% customer growth, down from 1.1% customer growth via acquisitions in 2015. Organic growth was a larger percentage of total customer growth in 2016 (~8,700 customers, ~0.9% of growth) than 2015, and we would have liked to see more customers added via acquisition.
- **That said, WTR expects its strategy of focusing on larger municipal acquisitions will begin to pay off in 2017.** WTR has four municipal deals it expects will close in 2017, totaling nearly 9,000 customers. We expect the acquisition environment to remain favorable following positive legislative changes in key states (such as fair market value legislation), and WTR should benefit from its strategy emphasizing municipal water/wastewater acquisitions.
- **WTR has almost completed divestment from market-based businesses.** WTR's regulated segment made up >98% of revenues in Q4 as WTR continues to divest from market-based businesses. Management indicated the company only has one market-based business left and plans to divest shortly. While these divestments reduced revenue, management believes it should ultimately be beneficial for net income.
- **WTR tentatively plans to file for a DSIC in 2017, which may provide rate relief towards the end of the year.** WTR expects to file to recover revenue in 2017, with a full rate case in 2018. Under this timeline, new rates from a 2018 rate case filing should come into effect in 2019.
- **We will update our financial model after WTR's 10-K is filed.**

**Aqua America is a holding company for numerous regulated water/waste water utilities serving almost 3.0 million people in the eastern half of the U.S.**

# Investment Thesis

**Aqua America (WTR) is the second-largest investor-owned water utility in the US.** WTR operates in eight states largely in the eastern half of the U.S. and serves ~3 million people. WTR maintains over 12,500 miles of pipe, of which almost half are located in PA. WTR has completed over 75 acquisitions in the past five years. Known as Philadelphia Suburban Corporation until 2004, Aqua America is headquartered in a Philadelphia suburb where its corporate roots date back to 1886 for providing water/wastewater services to the suburbs of Philadelphia.

**US water infrastructure needs should drive long-term earnings growth.** The water infrastructure in the United States is in significant need of upgrade and expansion between 2013 and 2033. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

**Planned capital investment should expand rate base and generate growth for the company in the long run.** We expect Aqua America's long-term EPS growth to be fueled in part by the company's $450+ million annual capex investment. $1.2B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

**The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms.** Approximately 70% of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

**Continued acquisitions should help customer growth.** The company targets 1.5-2.0% customer growth going forward, 0.5% from organic growth and 1% through acquisitions. Aqua has successfully acquired hundreds of water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth

**M&A opportunities expand with focused growth strategy.** WTR completed 19 acquisitions in 2016, contributing to WTR's overall customer growth of 1.6%. We expect M&A to remain at heightened levels reflecting recent legislative changes in key states and WTR's realigned corporate organization and expanded executive team tasked with executing a focused growth strategy that emphasizes larger (mainly municipal) water/wastewater acquisitions

**Valuation.** Our $32 price target is 22x our 2018 EPS estimate, in line with peers when fully valued (20x-22x 2018E EPS), reflecting average EPS growth opportunities and generally more constructive regulatory mechanisms.

# Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

**Regulation.** Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

**Weather.** WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

**Acquisition risk.** WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

**Product quality.** Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

# Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

Robert W. Baird & Co. Incorporated may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

**Investment Ratings: Outperform (O)** - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

**Risk Ratings: L - Lower Risk** - Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** - Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** - Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** - High-growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

**Valuation, Ratings and Risks.** The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

**Distribution of Investment Ratings.** As of January 31, 2017, Baird U.S. Equity Research covered 699 companies, with 51% rated Outperform/Buy, 48% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 11% of Outperform/Buy-rated, 6% of Neutral/Hold-rated and 1% of Underperform/Sell rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

**Analyst Compensation.** Analyst compensation is based on: 1) the correlation between the analyst's recommendations and stock price performance; 2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; 3) the analyst's productivity, including the quality of the analyst's research and the analyst's contribution to the growth and development of our overall research effort and 4) compliance with all of Robert W. Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee.

Analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not

compensate research analysts based on specific investment banking transactions.
A complete listing of all companies covered by Baird U.S. Equity Research and applicable research disclosures can be accessed at http://www.rwbaird.com/research-insights/research/coverage/research-disclosure.aspx. You can also call 800-792-2473 or write: Robert W. Baird & Co., Equity Research, 777 E. Wisconsin Avenue, Milwaukee, WI 53202.

**Analyst Certification**

The senior research analyst(s) certifies that the views expressed in this research report and/or financial model accurately reflect such senior analyst's personal views about the subject securities or issuers and that no part of his or her compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in the research report.

**Disclaimers**

**Baird prohibits analysts from owning stock in companies they cover.**

This is not a complete analysis of every material fact regarding any company, industry or security. The opinions expressed here reflect our judgment at this date and are subject to change. The information has been obtained from sources we consider to be reliable, but we cannot guarantee the accuracy.

**ADDITIONAL INFORMATION ON COMPANIES MENTIONED HEREIN IS AVAILABLE UPON REQUEST**

The Dow Jones Industrial Average, S&P 500, S&P 400 and Russell 2000 are unmanaged common stock indices used to measure and report performance of various sectors of the stock market; direct investment in indices is not available.
Baird is exempt from the requirement to hold an Australian financial services license. Baird is regulated by the United States Securities and Exchange Commission, FINRA, and various other self-regulatory organizations and those laws and regulations may differ from Australian laws. This report has been prepared in accordance with the laws and regulations governing United States broker-dealers and not Australian laws.

**Other Disclosures**

The information and rating included in this report represent the Analyst’s long-term (12 month) view as described above. The research analyst(s) named in this report may, at times and at the request of clients or their Baird representatives, provide particular investment perspectives or trading strategies based primarily on the analyst’s understanding of the individual client’s objectives. These perspectives or trading strategies generally are responsive to client inquiries and based on criteria the analyst considers relevant to the client. As such, these perspectives and strategies may differ from the analyst’s views contained in this report.
Robert W. Baird & Co. Incorporated and/or its affiliates (Baird) may provide to certain clients additional or research supplemental products or services, such as outlooks, commentaries and other detailed analyses, which focus on covered stocks, companies, industries or sectors. Not all clients who receive our standard company-specific research reports are eligible to receive these additional or supplemental products or services. Baird determines in its sole discretion the clients who will receive additional or supplemental products or services, in light of various factors including the size and scope of the client relationships. These additional or supplemental products or services may feature different analytical or research techniques and information than are contained in Baird’s standard research reports. Any ratings and recommendations contained in such additional or research supplemental products are consistent with the Analyst’s ratings and recommendations contained in more broadly disseminated standard research reports.
Baird Research Analysts may provide incremental data points or views regarding covered companies in the form of Research Posts and Flash Reports. All Posts and Flash Reports are available to clients via www.BairdOnline.com, but not all are sent directly to clients. Baird Associates may, at their discretion, choose whether to send these Posts and Flash Reports to Baird clients after they are posted online. Such decisions are based on, among other things, client interest, coverage, stock ownership and indicated email preferences. The incremental content and/or analysis contained in these pieces may be useful to investors as part of a broader investment thesis, but is not sufficient to warrant a change in the Research Analyst’s published opinion, including rating, estimates and price targets. Access to www.BairdOnline.com is available to all Baird Clients. Contact your Baird representative if you would like access to www.BairdOnline.com.

**United Kingdom (“UK”) disclosure requirements for the purpose of distributing this research into the UK and other countries for which Robert W. Baird Limited (“RWBL”) holds a MiFID passport.**

The contents of this report may contain an "investment recommendation", as defined by the Market Abuse Regulation EU No 596/2014 ("MAR"). Please therefore be aware of the important disclosures outlined below. Unless otherwise stated, this report was completed and first disseminated at the date and time provided on the timestamp of the report. if you would like further information on dissemination times, please contact us. Please note, this report may provide views which differ from previous recommendations made by the same individual in respect of the same financial instrument or issuer in the last 12 months which is available at https://baird.bluematrix.com/sellside/MAR.action.
This material is distributed in the UK and the European Economic Area (“EEA”) by RWBL, which has an office at Finsbury Circus House, 15 Finsbury Circus, London EC2M 7EB and is authorized and regulated by the Financial Conduct Authority (“FCA”).
For the purposes of the FCA requirements, this investment research report is classified as investment research and is objective. The views contained in this report (i) do not necessarily correspond to, and may differ from, the views of Robert W. Baird Limited or any other entity within the Baird Group, in particular Robert W. Baird & Co. Incorporated, and (ii) may differ from the views of another individual of Robert W. Baird Limited.
All substantially material sources of the information contained in this report are disclosed. All sources of information in this report are reliable, but where there is any doubt as to reliability of a particular source, this is clearly indicated.
Robert W. Baird Group and or one of its affiliates may at any time have a long or short position in the company/companies mentioned in this report. Where the Group holds a long or short position exceeding 0.5% of the total issued share capital of the issuer, this will be disclosed separately by your RWBL representative upon request.
This material is only directed at and is only made available to persons in the EEA who would satisfy the criteria of being "Professional"

investors under MiFID and to persons in the UK falling within articles 19, 38, 47, and 49 of the Financial Services and Markets Act of 2000 (Financial Promotion) Order 2005 (all such persons being referred to as “relevant persons”). Accordingly, this document is intended only for persons regarded as investment professionals (or equivalent) and is not to be distributed to or passed onto any other person (such as persons who would be classified as Retail clients under MiFID).

Robert W. Baird & Co. Incorporated and RWBL have in place organizational and administrative arrangements for the disclosure and avoidance of conflicts of interest with respect to research recommendations. Robert W. Baird Group and or one of its affiliates may be party to an agreement with the issuer that is the subject of this report relating to the provision of services of investment firms. An outline of the general approach taken by Robert W. Baird Limited in relation to conflicts of interest is available from your RWBL representative upon request. Baird’s policies and procedures are designed to identify and effectively manage conflicts of interest related to the preparation and content of research reports and to promote objective and reliable research that reflects the truly held opinions of research analysts. Analysts certify on a quarterly basis that such research reports accurately reflect their personal views.

This material is not intended for persons in jurisdictions where the distribution or publication of this research report is not permitted under the applicable laws or regulations of such jurisdiction.

Investment involves risk. The price of securities may fluctuate and past performance is not indicative of future results. Any recommendation contained in the research report does not have regard to the specific investment objectives, financial situation and the particular needs of any individuals. You are advised to exercise caution in relation to the research report. If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

RWBL is exempt from the requirement to hold an Australian financial services license. RWBL is regulated by the FCA under UK laws, which may differ from Australian laws. As such, this document has not been prepared in accordance with Australian laws.

**Dividend Yield.** As used in this report, the term “dividend yield” refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer’s discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

# Aqua America, Inc. (WTR)

## Q2 First Look

**Reiterate Neutral rating after Q2 earnings release.** WTR missed estimates on the top line but was in line on EPS due to lower operating expenses. Importantly, the company reaffirmed EPS guidance of $1.34 to $1.39 for 2017, and indicated it is on track to invest more than $450M in capital improvements. WTR has received $11M in annualized revenue increases in 2017 ($14M pending) and has four additional acquisitions under contract (three expected to close by YE:17). We will look for additional information on the conference call.

- **Q2 results missed on the top line but were in line on EPS due to lower operating expenses.** Q2 revenue was ~$203M vs. our/consensus estimates of $209M/$208M. Net income was $61M vs. $58M/$61M, and EPS was $0.34 vs. $0.33/$0.34.
- **WTR reaffirmed 2017 guidance.** WTR continues to expect $1.34 to $1.39 in EPS, same-system O&M expenses to increase 1% to 2%, and more than $450M in capital investments during 2017 (>$1.2B through 2019). WTR has invested ~$208.5M in water infrastructure through 1H:17. Additionally, WTR affirmed its expectation of 1.5%-2.0% total customer growth.
- **We believe WTR should be able to achieve its customer growth targets of 1.5%-2% in 2017.** WTR added ~1,000 customer connections in 1H:17, and its acquisitions and organic customer growth have increased WTR's customer base by 0.5%. Importantly, WTR has three additional municipalities under contract which should close by YE:17, and a fourth municipality expected to close in 2018.
- **Rate increases and surcharges continue to contribute to revenue growth.** WTR has received $11M in annualized revenue increases thus far in 2017 due to favorable decisions in rate cases and infrastructure charges in six states. Additionally, a decision on a total of ~$14M in annualized revenue increase is pending in Illinois and Virginia, although the timing of potential regulatory approvals remains unclear.
- **WTR's Q2 earnings call will be held today at 10:00 a.m. CT**. The call can be accessed at www.ir.aquaamerica.com. We will update our model following the call.

# Investment Thesis

**Aqua America (WTR) is the second-largest investor-owned water utility in the US.** WTR operates in eight states largely in the eastern half of the U.S. and serves ~3 million people. WTR maintains over 12,500 miles of pipe, of which almost half are located in PA. WTR has completed over 75 acquisitions in the past five years. Known as Philadelphia Suburban Corporation until 2004, Aqua America is headquartered in a Philadelphia suburb where its corporate roots date back to 1886 for providing water/ wastewater services to the suburbs of Philadelphia.

**US water infrastructure needs should drive long-term earnings growth.** The water infrastructure in the United States is in significant need of upgrade and expansion between 2013 and 2033. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

**Planned capital investment should expand rate base and generate growth for the company in the long run.** We expect Aqua America's long-term EPS growth to be fueled in part by the company's $450+ million annual capex investment. $1.2B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

**The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms.** Approximately 70% of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

**Continued acquisitions should help customer growth.** The company targets 1.5-2.0% customer growth going forward, 0.5% from organic growth and 1% through acquisitions. Aqua has successfully acquired hundreds of water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth

**M&A opportunities expand with focused growth strategy.** WTR completed 19 acquisitions in 2016, contributing to WTR's overall customer growth of 1.6%. We expect M&A to remain at heightened levels reflecting recent legislative changes in key states and WTR's realigned corporate organization and expanded executive team tasked with executing a focused growth strategy that emphasizes larger (mainly municipal) water/wastewater acquisitions

**Valuation.** Our $32 price target is 22x our 2018 EPS estimate, below peers (~25x 2018E EPS), which we believe will expand as WTR executes on EPS growth.

# Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

**Regulation.** Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

**Weather.** WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

**Acquisition risk.** WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

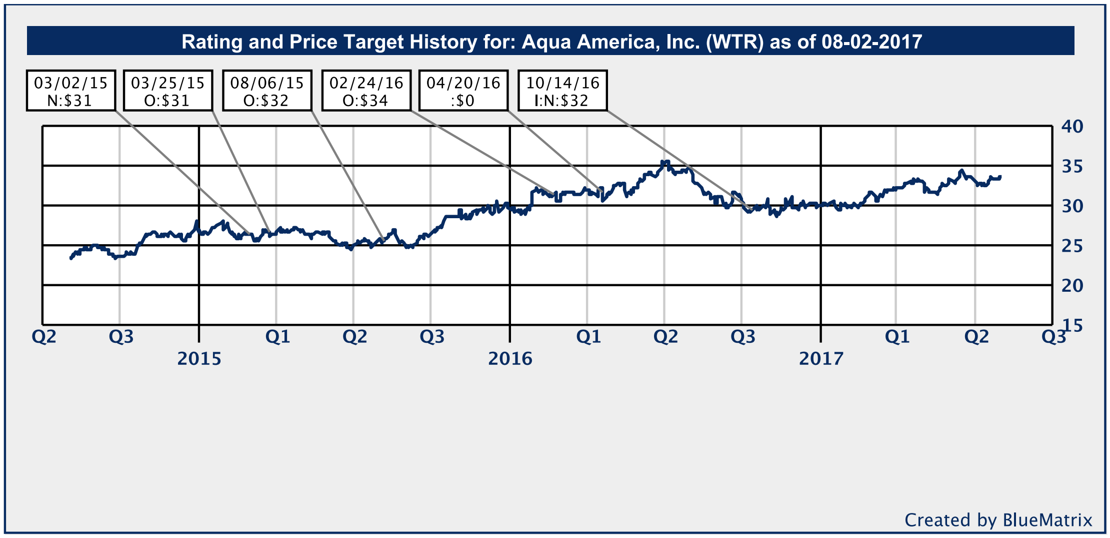
**Product quality.** Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

# Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

# Appendix - Important Disclosures and Analyst Certification

Approved on 2 August 2017 21:51EDT/ Published on 3 August 2017 01:00EDT.



1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTR.

**Appendix – Important Disclosures and Analyst Certification**

Robert W. Baird & Co. Incorporated and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months.

Robert W. Baird & Co. Incorporated may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

**Investment Ratings: Outperform (O)** - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

**Risk Ratings: L - Lower Risk** - Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** - Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** - Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** - High-growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

**Valuation, Ratings and Risks.** The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

**Distribution of Investment Ratings.** As of July 31, 2017, Baird U.S. Equity Research covered 712 companies, with 54% rated Outperform/Buy, 45% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 11% of Outperform/Buy-rated, 7% of Neutral/Hold-rated and 11% of Underperform/Sell rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

**Analyst Compensation.** Analyst compensation is based on: 1) the correlation between the analyst's recommendations and stock price performance; 2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; 3) the analyst's productivity, including the quality of the analyst's research and the analyst's contribution to the growth and development of our overall research effort and 4) compliance with all of Robert W. Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee.

Analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

A complete listing of all companies covered by Baird U.S. Equity Research and applicable research disclosures can be accessed at http://www.rwbaird.com/research-insights/research/coverage/research-disclosure.aspx. You can also call 800-792-2473 or write: Robert W. Baird & Co., Equity Research, 777 E. Wisconsin Avenue, Milwaukee, WI 53202.

**Analyst Certification**

The senior research analyst(s) certifies that the views expressed in this research report and/or financial model accurately reflect such senior analyst's personal views about the subject securities or issuers and that no part of his or her compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in the research report.

**Disclaimers**

**Baird prohibits analysts from owning stock in companies they cover.**

This is not a complete analysis of every material fact regarding any company, industry or security. The opinions expressed here reflect our judgment at this date and are subject to change. The information has been obtained from sources we consider to be reliable, but we cannot guarantee the accuracy.

**ADDITIONAL INFORMATION ON COMPANIES MENTIONED HEREIN IS AVAILABLE UPON REQUEST**

The Dow Jones Industrial Average, S&P 500, S&P 400 and Russell 2000 are unmanaged common stock indices used to measure and report performance of various sectors of the stock market; direct investment in indices is not available.

Baird is exempt from the requirement to hold an Australian financial services license. Baird is regulated by the United States Securities and Exchange Commission, FINRA, and various other self-regulatory organizations and those laws and regulations may differ from Australian laws. Such decisions are based on, among other things, client interest, coverage, stock ownership and indicated email preferences. The incremental content and/or analysis contained in these pieces may be useful to investors as part of a broader investment thesis, but is not sufficient to warrant a change in the Research Analyst's published opinion, including rating, estimates and price targets. Access to https://bol.rwbaird.com/Login is available to all Baird Clients. Contact your Baird representative if you would like access to https://bol.rwbaird.com/Login.

**United Kingdom ("UK") disclosure requirements for the purpose of distributing this research into the UK and other countries for which Robert W. Baird Limited ("RWBL") holds a MiFID passport.**

The contents of this report may contain an "investment recommendation", as defined by the Market Abuse Regulation EU No 596/2014 ("MAR"). Please therefore be aware of the important disclosures outlined below. Unless otherwise stated, this report was completed and first disseminated at the date and time provided on the timestamp of the report. if you would like further information on dissemination times, please contact us. Please note, this report may provide views which differ from previous recommendations made by the same individual in respect of the same financial instrument or issuer in the last 12 months which is available at https://baird.bluematrix.com/sellside/MAR.action.

This material is distributed in the UK and the European Economic Area ("EEA") by RWBL, which has an office at Finsbury Circus House, 15 Finsbury Circus, London EC2M 7EB and is authorized and regulated by the Financial Conduct Authority ("FCA").

For the purposes of the FCA requirements, this investment research report is classified as investment research and is objective. The views contained in this report (i) do not necessarily correspond to, and may differ from, the views of Robert W. Baird Limited or any other entity within the Baird Group, in particular Robert W. Baird & Co. Incorporated, and (ii) may differ from the views of another individual of Robert W. Baird Limited.

All substantially material sources of the information contained in this report are disclosed. All sources of information in this report are reliable, but where there is any doubt as to reliability of a particular source, this is clearly indicated.

Robert W. Baird Group and or one of its affiliates may at any time have a long or short position in the company/companies mentioned in this report. Where the Group holds a long or short position exceeding 0.5% of the total issued share capital of the issuer, this will be disclosed separately by your RWBL representative upon request.

This material is only directed at and is only made available to persons in the EEA who would satisfy the criteria of being "Professional" investors under MiFID and to persons in the UK falling within articles 19, 38, 47, and 49 of the Financial Services and Markets Act of 2000 (Financial Promotion) Order 2005 (all such persons being referred to as “relevant persons”). Accordingly, this document is intended only for persons regarded as investment professionals (or equivalent) and is not to be distributed to or passed onto any other person (such as persons who would be classified as Retail clients under MiFID).

Robert W. Baird & Co. Incorporated and RWBL have in place organizational and administrative arrangements for the disclosure and avoidance of conflicts of interest with respect to research recommendations. Robert W. Baird Group and or one of its affiliates may be party to an agreement with the issuer that is the subject of this report relating to the provision of services of investment firms. An outline of the general approach taken by Robert W. Baird Limited in relation to conflicts of interest is available from your RWBL representative upon request. Baird’s policies and procedures are designed to identify and effectively manage conflicts of interest related to the preparation and content of research reports and to promote objective and reliable research that reflects the truly held opinions of research analysts. Analysts certify on a quarterly basis that such research reports accurately reflect their personal views.

This material is not intended for persons in jurisdictions where the distribution or publication of this research report is not permitted under the applicable laws or regulations of such jurisdiction.

Investment involves risk. The price of securities may fluctuate and past performance is not indicative of future results. Any recommendation contained in the research report does not have regard to the specific investment objectives, financial situation and the particular needs of any individuals. You are advised to exercise caution in relation to the research report. If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

RWBL is exempt from the requirement to hold an Australian financial services license. RWBL is regulated by the FCA under UK laws, which may differ from Australian laws. As such, this document has not been prepared in accordance with Australian laws.

**Dividend Yield.** As used in this report, the term “dividend yield” refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer’s discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

# Aqua America, Inc. (WTR)

## Q3 First Look

**Reiterate Neutral rating after Q3 earnings release.** WTR reported results which were in-line with our/consensus EPS estimates. Importantly, the company reaffirmed EPS guidance of $1.34 to $1.39 for 2017, and indicated it is on track to invest more than $450M in capital improvements. WTR has received $21.4M in annualized revenue increases in 2017 ($14.1M pending) and has five additional acquisitions under contract. We will look for additional information on the conference call.

- **Q3 results missed our/consensus revenue estimates, but were in-line on the bottom line due to lower operations and maintenance expenses.** Q3 revenue was ~$215M vs. our/consensus estimates of $240M/$236M, largely due to lower water demand stemming from wet weather in WTR's service territory. That said, net income was $76M vs. $76M/$76M, and EPS was $0.43 vs. $0.43/$0.43, respectively, due to lower water production expenses.
- **WTR reaffirmed 2017 guidance.** WTR expects $1.34 to $1.39 in EPS, same-system O&M expenses to increase less than 2%, and more than $450M in capital investments during 2017 (>$1.2B through 2019). WTR has invested ~$337.7M in water infrastructure through Q3:17. Additionally, WTR reaffirmed its expectation of 1.5%-2.0% total customer growth.
- **We believe WTR should be able to achieve its customer growth targets of 1.5%-2% in 2017.** WTR has added ~1,000 customer connections in Pennsylvania and Indiana through Q3:17, and acquisitions and organic customer growth have increased WTR's customer base by 0.8%. Importantly, WTR has five additional municipalities under contract (totaling 15,700 customers, including the acquisition which already closed in 2017) though some deals may not close until 2018.
- **Rate increases and surcharges continue to contribute to revenue growth.** WTR has received $21.4M in annualized revenue increases thus far in 2017 due to favorable decisions in rate cases and infrastructure charges in six states. Additionally, a decision on a total of ~$14.1M in annualized revenue increase is pending in Illinois, North Carolina, and Virginia, although the timing of potential regulatory approvals remains unclear.
- **WTR's Q3 earnings call will be held today at 10:00 a.m. CT**. The call can be accessed at www.ir.aquaamerica.com. We will update our model following the call.

**Aqua America is a holding company for numerous regulated water/waste water utilities serving almost 3.0 million people in the eastern half of the U.S.**

# Investment Thesis

**Aqua America (WTR) is the second-largest investor-owned water utility in the US.** WTR operates in eight states largely in the eastern half of the U.S. and serves ~3 million people. WTR maintains over 12,500 miles of pipe, of which almost half are located in PA. WTR has completed over 75 acquisitions in the past five years. Known as Philadelphia Suburban Corporation until 2004, Aqua America is headquartered in a Philadelphia suburb where its corporate roots date back to 1886 for providing water/ wastewater services to the suburbs of Philadelphia.

**US water infrastructure needs should drive long-term earnings growth.** The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

**Planned capital investment should expand rate base and generate growth for the company in the long run.** We expect Aqua America's long-term EPS growth to be fueled in part by the company's $450+ million annual capex investment. $1.2B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

**The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms.** The majority of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

**Continued acquisitions should help customer growth.** The company targets 1.5-2.0% customer growth going forward, 0.5% from organic growth and 1% through acquisitions. Aqua has successfully acquired hundreds of water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

**M&A opportunities expand with focused growth strategy.** WTR completed 19 acquisitions in 2016, contributing to WTR's overall customer growth of 1.6%. We expect M&A to remain at heightened levels reflecting recent legislative changes in key states and WTR's realigned corporate organization and expanded executive team tasked with executing a focused growth strategy that emphasizes larger (mainly municipal) water/wastewater acquisitions.

**Valuation.** Our $32 price target is 22x our 2018 EPS estimate, below peers (~25x 2018E EPS), which we believe will expand as WTR executes on EPS growth.

# Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

**Regulation.** Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

**Weather.** WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

**Acquisition risk.** WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

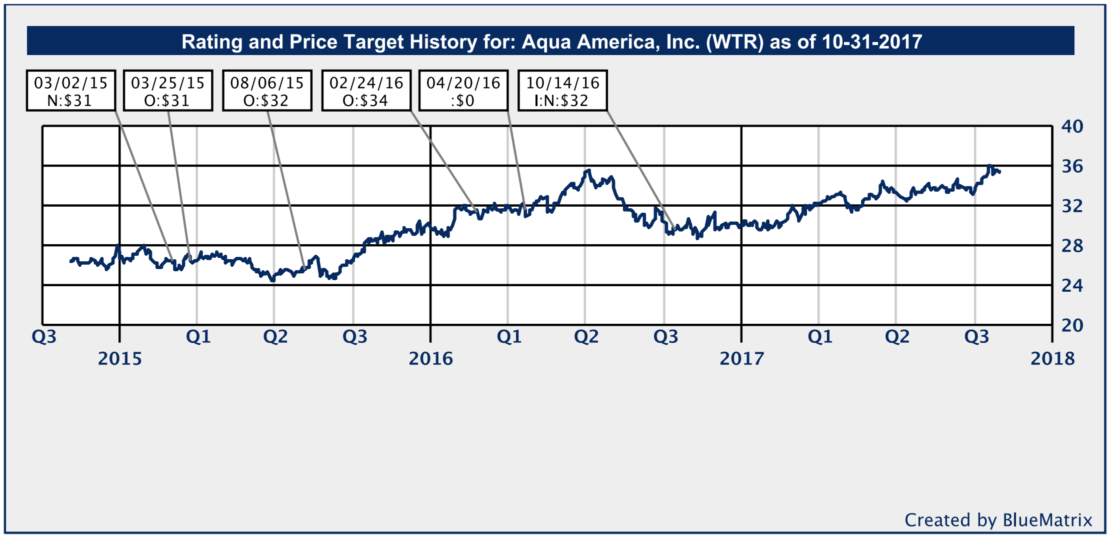
**Product quality.** Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

# Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

# Appendix - Important Disclosures and Analyst Certification

Approved on 31 October 2017 19:37EDT/ Published on 1 November 2017 01:00EDT.



1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTR.

Robert W. Baird & Co. Incorporated and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months.

Robert W. Baird & Co. Incorporated may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

**Investment Ratings: Outperform (O)** - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

**Risk Ratings: L - Lower Risk** - Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** - Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** - Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** - High-growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

**Valuation, Ratings and Risks.** The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

**Distribution of Investment Ratings.** As of October 31, 2017, Baird U.S. Equity Research covered 707 companies, with 53% rated Outperform/Buy, 45% rated Neutral/Hold and 2% rated Underperform/Sell. Within these rating categories, 12% of Outperform/Buy-rated and 6% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

**Analyst Compensation.** Analyst compensation is based on: 1) the correlation between the analyst's recommendations and stock price performance; 2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; 3) the analyst's productivity, including the quality of the analyst's research and the analyst's contribution to the growth and development of our overall research effort and 4) compliance with all of Robert W. Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee.

Analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

RWBL is exempt from the requirement to hold an Australian financial services license. RWBL is regulated by the FCA under UK laws, which may differ from Australian laws. As such, this document has not been prepared in accordance with Australian laws.
**Dividend Yield.** As used in this report, the term “dividend yield” refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer’s discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

# Aqua America, Inc. (WTR)

## In-line EPS Driven by Cost Cuts

**Reiterate Neutral rating and raising price target to $38.** WTR filed for a DSIC in Pennsylvania, and expects to file for a GRC next year, which should contribute to revenue growth. WTR has 14,925 customers in pending acquisitions, which should enable WTR to reach customer growth targets, and the company is targeting larger, municipal acquisitions with a solid pipeline. While we acknowledge WTR is trading at a discount to peers, we remain Neutral-rated and will look for execution on EPS growth before becoming more constructive.

- **Lower water demand due to wet weather across WTR's service territory offset increases in regulated revenue in Q3, but lower operations and maintenance expenses contributed to a ~5% increase in EPS, y/y.** Operating revenue fell ~5% y/y as favorable rate decisions and regulated customer growth (+$2.8M y/y) were more than offset by a $11.6M revenue headwind from reduced water consumption, particularly in Texas, Ohio, and the East Coast. For more information, please see Q3 First Look.
- **EPS increased ~5% y/y as net expense decreases, tax repair benefits, and favorable rate decisions more than offset lower consumption.** Importantly, operations and maintenance expenses fell ~15% y/y (from $79.8M in Q3:16 to $68.0M in Q3:17) due to lower production costs (~25%), lower costs for market-based activities (~35%), and reduced employee-related costs (~36%). Together, lower expenses contributed ~$0.027 to EPS in Q3.
- **WTR filed for an infrastructure surcharge in Pennsylvania effective October 1, and could file up to two more infrastructure surcharges ahead of its general rate case filing, which is expected in 2018.** WTR filed for a 2.5% infrastructure surcharge in Pennsylvania and was awarded an annualized revenue increase of ~ $9.7M. Management indicated WTR could file for up to two more surcharges ahead of its expected general rate case filing in 2018 (to take effect 2019).
- **WTR has five pending acquisitions which should contribute to growth in the intermediate term.** WTR has five municipal deals pending, totaling ~14,925 customers and a $146M purchase price (in addition to a 740-customer acquisition in Pennsylvania which already closed), but multiple deals are towards the lower end of the company's target size range (2,500-25,000 customers). We expect the acquisition environment to remain favorable following positive legislative changes in key states (such as fair market value legislation), and we expect WTR to target larger, municipal acquisitions in the intermediate term.
- **Rolling forward valuation to 2019 and raising price target to $38.** Our $38 price target is ~24x our 2019 EPS estimate, below peers (~25x 2019E EPS), which we believe could expand as WTR executes on EPS growth.

**Aqua America is a holding company for numerous regulated water/waste water utilities serving almost 3.0 million people in the eastern half of the U.S.**
