

**Regarding the Proposed Rulemaking Order: Implementation of the Alternative Energy Portfolio Standards Act of 2004 (Docket No. L-2014-2404361)**

Dear Public Utility Commissioners:

A transition to solar power is critical to protecting the health of Pennsylvanians, the natural beauty of the Commonwealth, and avoiding the worst impacts of climate disruption. Net metering is one of the most important policies we have to bring about this transition. Unfortunately, the proposed changes to net metering rules would make it more expensive to install solar systems, and would allow utilities to create additional barriers to going solar. Our specific concerns with the proposal are as follows:

1. The Commission should NOT have the authority to allow utilities to charge a new special monthly fee to customers with solar. This new fee would violate the AEPS guarantee that net metered customers receive the full retail rate for all generation of their solar installation up to their annual usage. A fee would erode that right to the full retail rate.
2. The proposed new definition for "utility" threatens the third-party ownership model (such as solar leasing and power purchase agreements) for solar and other distributed generation. The Commission should amend the definition of "utility" so it explicitly excludes third-party ownership of solar.
3. New system generation should not be limited to 110% of the customer-generator's annual electric consumption. There are already size limits on net-metered systems. This additional generation limit is unnecessary and only adds additional uncertainty and regulatory cost. There is no incentive to over-size systems since any annual surplus production does not receive net metering treatment and is compensated at the lower price-to-compare rate. The new size limit would be difficult to apply (especially in new construction or gut rehab projects) and could present additional time and expense for customers. It is also unclear from the language what would happen if a customer-generator's electric demand shrinks over time due to conservation or changes in building use.

We urge you to revise the proposed rules to correct these issues.

Sincerely,  
The Undersigned
