

While I support the efforts of Lynda Farrell, executive director of the Pipeline Safety Coalition, to improve pipeline safety of the existing Mariner East Line and the proposed Alhphra Gateway and Penn East pipelines - Pipelines are not the answer!

It is inevitable that leaks and contamination will occur.

The alternative must be 100% clean energy from

solar and wind sources.
Climate change is a reality.
The 10-year window on
irreversible damage to our
planet is quickly closing.

We owe this to all future
generations and to our
planet.

Sincerely,

Barbara Sheinmel
