Administrative Law Judges Elizabeth Barnes and Andrew Calvelli;

We are writing as concerned parents, runners, or alumni who would like to reiterate our concern regarding the proposed high voltage, 135ft tall, power lines.

As parents, we are honored that our children are able to attend Falling Spring Elementary School. In 2017, Falling Spring was one of 18 elementary schools across Pennsylvania to be recognized as a Blue Ribbon School. According to the US Department of Education, "the National Blue Ribbon School award affirms the hard work of students, educators, families, and communities in creating safe and welcoming schools where students master challenging content." Approximately 300 students, 5 to 12 years of age, spend over 180 days of each of their precious years in this school. The health risks of high voltage power lines are heavily disputed on both sides; placing a high voltage power line beside a school is extremely hard to justify when current research shows that this project is unneeded. How can you approve the construction of this power line when it could take away the "safe and welcoming" environment that has been created at Falling Spring Elementary?

As runners, we are lucky to call the Tim Cook Memorial CASD Cross Country Course our home course. The Tim Cook Memorial Cross Country Course is one of the top courses in the state of Pennsylvania. This course was dedicated to Tim Cook, a beloved CASD high school cross country and track coach who was killed in a tragic car crash in 2002. According to the Chambersburg School Board, if this power line is constructed the course will have to be moved to a new location and the meaningful course will be impossible to replicate. How can you abolish this course and prevent past and present runners from passing on the memory of Coach Cook?

As alumni, we are very proud of our school and our cross country course. Alumni of Falling Spring Elementary School purposefully move their families back to the area so that their children can now attend Falling Spring Elementary School. Past runners of the Chambersburg Area High School Cross Country team continue to frequent the Tim Cook Memorial CASD Cross Country Course. Annual races draw runners from the tri-state area to come to our town and run on our challenging and beautiful course. How can you steal this from our community; from a place that we all love and are very proud to call home?

As you read this letter, please remember all of the voices of the parents, past and present runners, and alumni who are gravely concerned about the construction of these unneeded power lines.

Respectfully Submitted and Signed by Concerned Parents, Runners, or Alumni of Falling Spring Elementary School or the Tim Cook Memorial CASD Cross Country Course;

We are writing as concerned parents, runners, or alumni who would like to reiterate our concern regarding the proposed high voltage, 135ft tall, power lines.

As parents, we are honored that our children are able to attend Falling Spring Elementary School. In 2017, Falling Spring was one of 18 elementary schools across Pennsylvania to be recognized as a Blue Ribbon School. According to the US Department of Education, "the National Blue Ribbon School award affirms the hard work of students, educators, families, and communities in creating safe and welcoming schools where students master challenging content." Approximately 300 students, 5 to 12 years of age, spend over 180 days of each of their precious years in this school. The health risks of high voltage power lines are heavily disputed on both sides; placing a high voltage power line beside a school is extremely hard to justify when current research shows that this project is unneeded. How can you approve the construction of this power line when it could take away the "safe and welcoming" environment that has been created at Falling Spring Elementary?

As runners, we are lucky to call the Tim Cook Memorial CASD Cross Country Course our home course. The Tim Cook Memorial Cross Country Course is one of the top courses in the state of Pennsylvania. This course was dedicated to Tim Cook, a beloved CASD high school cross country and track coach who was killed in a tragic car crash in 2002. According to the Chambersburg School Board, if this power line is constructed the course will have to be moved to a new location and the meaningful course will be impossible to replicate. How can you abolish this course and prevent past and present runners from passing on the memory of Coach Cook?

As alumni, we are very proud of our school and our cross country course. Alumni of Falling Spring Elementary School purposefully move their families back to the area so that their children can now attend Falling Spring Elementary School. Past runners of the Chambersburg Area High School Cross Country team continue to frequent the Tim Cook Memorial CASD Cross Country Course. Annual races draw runners from the tri-state area to come to our town and run on our challenging and beautiful course. How can you steal this from our community; from a place that we all love and are very proud to call home?

As you read this letter, please remember all of the voices of the parents, past and present runners, and alumni who are gravely concerned about the construction of these unneeded power lines.

Respectfully Submitted and Signed by Concerned Parents, Runners, or Alumni of Falling Spring Elementary School or the Tim Cook Memorial CASD Cross Country Course;

According to the US Department of Education, "the National Blue Ribbon School award affirms the hard work of students, educators, families, and communities in creating safe and welcoming schools where students master challenging content." Approximately 300 students, 5 to 12 years of age, spend over 180 days of each of their precious years in this school. The health risks of high voltage power lines are heavily disputed on both sides; placing a high voltage power line beside a school is extremely hard to justify when current research shows that this project is unneeded. How can you approve the construction of this power line when it could take away the "safe and welcoming" environment that has been created at Falling Spring Elementary?

As runners, we are lucky to call the Tim Cook Memorial CASD Cross Country Course our home course. The Tim Cook Memorial Cross Country Course is one of the top courses in the state of Pennsylvania. This course was dedicated to Tim Cook, a beloved CASD high school cross country and track coach who was killed in a tragic car crash in 2002. According to the Chambersburg School Board, if this power line is constructed the course will have to be moved to a new location and the meaningful course will be impossible to replicate. How can you abolish this course and prevent past and present runners from passing on the memory of Coach Cook?

As alumni, we are very proud of our school and our cross country course. Alumni of Falling Spring Elementary School purposefully move their families back to the area so that their children can now attend Falling Spring Elementary School. Past runners of the Chambersburg Area High School Cross Country team continue to frequent the Tim Cook Memorial CASD Cross Country Course. Annual races draw runners from the tri-state area to come to our town and run on our challenging and beautiful course. How can you steal this from our community; from a place that we all love and are very proud to call home?

As you read this letter, please remember all of the voices of the parents, past and present runners, and alumni who are gravely concerned about the construction of these unneeded power lines.

Administrative Law Judges Elizabeth Barnes and Andrew Calvelli;

We are writing as concerned parents, runners, or alumni who would like to reiterate our concern regarding the proposed high voltage, 135ft tall, power lines.

As parents, we are honored that our children are able to attend Falling Spring Elementary School. In 2017, Falling Spring was one of 18 elementary schools across Pennsylvania to be recognized as a Blue Ribbon School. According to the US Department of Education, "the National Blue Ribbon School award affirms the hard work of students, educators, families, and communities in creating safe and welcoming schools where students master challenging content." Approximately 300 students, 5 to 12 years of age, spend over 180 days of each of their precious years in this school.
