

To whom it may concern

For the month of December 2022 was estimated by PPL when questioned of the bill, they stated it is a common practice. From December 2020 to December 2022, I had two bills that exceeded \$300.00. Since December 2022 I have had two months I under \$300.00. I understand that Rates have gone up however don't think they went up that month.

Thank you

Gary Phillips
