NY CWG Updates	All	5
Planning for audit - update	All	10
OP-12 Access to OSS, recurring charges and PA PUC 216	CLEC	45
Agenda items for next meeting	All	5

NOTES:
- No amendments to agenda
- May 2009 Minutes adopted
- No website comments
- No comments on reported C2C PA results
- The Group discussed an amended DL/WP proposal in redline and edited forms. All participants should review these documents to assure the proposal meets the expected change to permit an administrative payment to the CLEC as well as to provide some remedy for credits made by CLECs to their customers for listing errors beyond the CLEC's control. The objective is to reach consensus on this document at the July 7 meeting so the parties who worked so hard for a settlement can move to the next step in adoption.
- No PA regulatory updates to report
- The NY CWG is moving forward on a reassessment of the C2C measures. Proposals have been reviewed to eliminate measures based upon relevance to today's market structure, redundancy, lack of standards (used for process

monitoring), and other factors. The expectation is this work will complete at the June NY CWG meeting currently scheduled for June 22, 2009.

- No audit planning updates. No CLEC has volunteered to participate in this effort.

OP-12 Issues
A CLEC distributed information related to estimated OSS charges and a document summarizing a discussion where budget had not yet been allocated for CLEC proposed initiatives in 2009. Parties should review this documentation prior to the July 7, 2009 meeting. Carrier Group members may discuss offline if they have common concerns about this issue. An attempt will be made to provide an update relating to allocation of the IT budget for 2009, but may not have that analysis completed until mid-July.

Additional Notices:
The amended DL/WP proposal and the OSS information will be attached to the email distributing these notes.

Next Meeting:
Conference Call July 7, 2009 at 10:00 AM Call in number will be distributed via email
