#### Under the provisions of the Plan, -1 performance scores are subject to adjustment based on the next two month's performance.

Note B: All bill credits in this section are at risk each month. Any bill credits assigned to a sub-metric that has no activity or is under development will be divided proportionately among the sub-metrics in the respective critical measures.

Note C: For Critical Measure No. 5 "Hot Cut Performance." No allocation of available bill credits is made between the sub-measures. If one sub-measure warrants an adjustment, the market adjustment percentage is applied to the entire amount of bill credits available. If both sub-measures indicate that bill credits are due to CLECs, the lower score will be used to calculate the bill credits due. Note D: Metrics BI-3-04 and BI-3-05 will not be included in the Pennsylvania PAP, bill credits will not be due for these metrics, and any bill credits assigned to these metrics will be divided proportionately among the other metrics in Critical Measure No. 9, "Resolution Process," **until** all of the following conditions are met:

#### June 1, 2003

- A permanent form of Metrics BI-3-04 and BI-3-05 is approved by New York PSC order for use in the New York Guidelines and New York PAP, and
- The New York PSC approved permanent form of these metrics is also approved by Pennsylvania Commission order for use in both the Pennsylvania Guidelines and the Pennsylvania PAP, and
- The metrics are implemented by Verizon PA in accordance with Pennsylvania Commission order.

# Small Sample Size Scoring Procedures for Counted Variable Performance Measures with Absolute Standards for Use on CLEC Aggregate Results

# A. Allowable Misses:

For counted variables with benchmark standards, it is possible to have small sample sizes, such that just a single missed transaction within a report period can cause the measure to miss its benchmark. The plan recognizes that without an allowance for a single miss, the plan would effectively require perfection to avoid bill credits, which would be above the designated benchmark for the measure. Also, a single missed transaction does not demonstrate that the measure's performance warrants a performance score of either a "-1" or a "-2". Thus a "zero weight" will be assigned in any single miss situations as specified by the criteria below. This deems the measure as neither a "pass" nor a "miss" for the purposes of bill credit calculations. In addition, if there are only 2 missed transactions in any small sample situation described below, a performance score of -1 will be assigned to the measure, again due to the minimal number of missed transactions.

For Counted Variables with Benchmark Standards that have a small number of observations in a data month, the following scoring procedures will be used at the CLEC aggregate level only:

For counted variable metrics where higher performance is better ("HIB"), e.g., 95% on-time, or a 0.95 standard:

- for any HIB counted variable metric where  $n < \{1/[1-standard]\}$ , (for example, for a ~95% standard,  $n < (1/[1-0.95] \mbox{ or } n < 20)$ 

0 misses is a "0" performance score 1 miss is a zero weight with no performance score 2 misses is a "-1" performance score more than 2 misses is a "-2" performance score

For counted variable metrics where lower performance is better ("LIB"), e.g., 5% missed appts, or a 0.05 standard:

- for any LIB counted variable metric where  $n < \{1/[standard]\},$  (for example, for a 5% standard, n < (1/0.05) or n < 20)

0 misses is a "0" performance score 1 miss is a zero weight with no performance score 2 misses is a "-1" performance score more than 2 misses is a "-2" performance score Examples of what should be reported in the performance scores column for measures with a 95% or a 5% standard are shown in the table below for different combinations of misses and sample sizes:

		Number of Mis	ses	
Sample Size	0	1	2	3 or more
1	0	Blank, Zero weight	NA	NA
2	0	Blank, Zero weight	-1	NA
3	0	Blank, Zero weight	-1	-2
4	0	Blank, Zero weight	-1	-2
5	0	Blank, Zero weight	-1	-2
6	0	Blank, Zero weight	-1	-2
7	0	Blank, Zero weight	-1	-2
8	0	Blank, Zero weight	-1	-2
9	0	Blank, Zero weight	-1	-2
10	0	Blank, Zero weight	-1	-2
11	0	Blank, Zero weight	-1	-2
12	0	Blank, Zero weight	-1	-2
13	0	Blank, Zero weight	-1	-2
14	0	Blank, Zero weight	-1	-2
15	0	Blank, Zero weight	-1	-2
16	0	Blank, Zero weight	-1	-2
17	0	Blank, Zero weight	-1	-2
18	0	Blank, Zero weight	-1	-2
19	0	Blank, Zero weight	-1	-2

## **B. CLEC Exception Process**

Each month each CLEC will have the right to challenge the allowable misses or exclusions that Verizon PA may exercise pursuant to the small sample size table for performance measures with absolute standards. If a CLEC exercises this right, it must file a petition with the Commission demonstrating that the exclusion will have a significant impact on the operations of the CLEC's business and that Verizon PA should not be allowed to exclude the event pursuant to the above table. Verizon PA will have a right to respond to any such challenge by the CLEC. The Timeline for CLEC Exceptions will be the same as the Timeline for Verizon PA Exceptions under the small sample size section in Appendix D. If a CLEC's Exception Petition is granted, the appropriate bill credits will be reflected on the CLEC's bill as soon as is practical.

# **APPENDIX H**

# **Special Provisions**

### **UNE Ordering Performance Measures:**

Verizon PA will provide an additional \$1,345,833 in monthly bill credits for UNE Order Confirmation Performance based on four POTS metrics included in the MOE category. If ontime performance falls below 90% for any month, a credit of \$336,458 for each metric missing the standard will be distributed like the bill credits under Critical Measures.<sup>1</sup> Funding for these credits will be taken from funds that are unused in 6 previous months or from the current month. No new funds are available. The metrics and standards are as follows:

Metric #	POTS Electronically Submitted	Threshold
OR-1-04-3320	% On Time LSRC/ASRC – No Facility Check	< 90%
	(Electronic-No Flow Through) – Platform and	
	Loop/Pre-Qualified Complex/LNP	
OR-1-06-3320	% On Time LSRC/ASRC – Facility Check	< 90%
	(Electronic-No Flow Through) – Platform and	
	Loop/Pre-Qualified Complex/LNP	
OR-2-04-3320	% On Time LSR/ASR Reject – No Facility	< 90%
	Check (Electronic-No Flow Through) –	
	Platform and Loop/Pre-Qualified Complex/LNP	
OR-2-06-3320	% On Time LSR/ASR Reject – Facility Check	< 90%
	(Electronic-No Flow Through) – Platform and	
	Loop/Pre-Qualified Complex/LNP	

<sup>&</sup>lt;sup>1</sup> Any bill credit amounts due for Special Provisions UNE Ordering are to be allocated between UNE-Platform and UNE-Loop in the same proportions as the totals at risk for the two modes in MOE. Then, within each mode, the amounts are to be allocated corresponding to each CLEC's UNE-Platform lines as a proportion of total UNE-Platform lines and each CLEC's UNE-Loops as a proportion of total UNE-Loops.

Revised effective [insert date of implementation of PA PAP revisions] in accordance with the PA PUC order of [insert date] in Case No. M-00011468.

### **Flow Through:**

An additional \$6.73 million per year is available for flow through performance. Two performance measures for UNE from the Carrier to Carrier Performance Guidelines will be used to measure performance with the performance scores set forth below.

Metric #		Threshold
OR-5-01-3000	% Flow Through – Total – UNE	≥ 80%
OR-5-03-3000	% Flow Through – Achieved – UNE	≥95%

For each measure, the UNE scores will be combined and reviewed on a calendar quarterly basis. If the combined score meets either target, no additional credits are due. If the combined score meets neither metric target for that calendar quarter, then one-fourth (1/4) of the annual amount will be credited to all CLECs purchasing UNEs based on the number of lines in service. Lines in service will equal: UNE Platform, and UNE Loops.<sup>2</sup>

The following table demonstrates the calculation of calendar quarterly flow through

performance:

<sup>&</sup>lt;sup>2</sup> For the calendar quarter in which the Pennsylvania PAP first becomes effective, bill credits under this section "Flow Through" will be calculated based upon the performance for the calendar month in which the Pennsylvania PAP becomes effective and the remaining calendar months (if any) in the calendar quarter in which the Pennsylvania PAP becomes effective. Any bill credits due for such calendar quarter will be pro-rated based on the duration of the measurement period (i.e., if the measurement is based on one month of performance data, the amount that would be due would be one-third of the full quarterly amount that would have been due had Verizon PA's measured performance for that month been Verizon PA's measured performance for a full calendar quarter).

Revised effective [insert date of implementation of PA PAP revisions] in accordance with the PA PUC order of [insert date] in Case No. M-00011468.

### **Quarterly Flow Through Performance:**

Total Orders that Flow Through	Month 1	Month 2	Month 3	Quarter Total
UNE	15000	18000	17000	50000
Total Orders Processed				
UNE	25000	21000	22000	68000
Total % Flow Through - UNE Combined for Quarters	:			73.5%
Total Orders Designed to Flow Through that Flow Through				
UNE	15000	18000	17000	50000
Total Orders Designed to Flow Through:				
UNE	18000	19000	18000	55000
Total % Achieved Flow Through – UNE Combined fo	or Quarter	:		90.9%

In this example, neither metric met the performance threshold, therefore, \$1.68 million would have been credited to all CLECs purchasing UNEs.

### **Additional Hot Cut Loop Performance Measures:**

An additional \$16.15 Million per year is available for Hot Cut Loop performance. This measure will be composed of two performance metrics: PR-9-01-3520 – "% On Time - Hot Cut Loop" and PR-6-02-3520 – "% Installation Troubles Reported within 7 Days – Hot Cut Loop."<sup>3</sup> If either one of these thresholds is missed, additional bill credits will be distributed to the CLECs.

This measure has two tiers of performance standards. Tier I will be applied to a two month scenario, and Tier II will be applied to a one month scenario. The Tier I threshold is measured based on two consecutive months of performance, while the Tier II threshold is measured based on an individual month's performance. The performance thresholds are contained in the table below:

Metric #		Tier I	Tier II
		Threshold	
PR-9-01-3520	% On Time Hot Cut Loop <sup>4</sup>	< 90%	< 85%
PR-6-02-3520	% Installation Troubles Reported within 7 Days – Hot Cut Loop	≥ 3.00%	≥ 4.00%

Under Tier I, if Verizon PA does not satisfy the above standards for two consecutive months, it will distribute \$672,917 to the affected CLECs. Under Tier II, if Verizon PA does not satisfy the above standards for a single month, it will distribute \$1,345,833 to the affected CLECs. Below is an example of how this measure would work.

Example:

Metric #		Performance	Performance for	Performance for	Performance for
		For Month 1	Month 2	Month 3	Month 4
PR-9-01-3520	% On Time Hot Cut	84%	91%	91%	91%
	Loop				
PR-6-02-3520	% Installation Troubles	2%	3.5%	2%	3.5%
	Reported within 7 Days				
	– Hot Cut Loop				
	Credit for the Month	\$1,345,833	\$672,917	\$0	\$0

In month 1, Verizon PA did not satisfy the more stringent requirements of Tier II and

\$1,345,833 in bill credits would be due.

<sup>&</sup>lt;sup>3</sup> These two measures are also included in the Critical Measurements method, and additional bill credits may be due if Verizon PA does not satisfy that Critical Measure.

<sup>&</sup>lt;sup>4</sup> % On Time – Hot Cut Loop performance will be adjusted such that any missed appointment for customer reasons – due to late FOC will be counted as a miss.

Revised effective [insert date of implementation of PA PAP revisions] in accordance with the PA PUC order of [insert date] in Case No. M-00011468.

In month 2, Verizon PA satisfied the performance standard under Tier II, but not the less severe standard under Tier I. Bill credits would be due, however, because Verizon PA failed to meet the Tier I standard two months in a row. (Month 1 counts against Verizon PA.) In month 3 both the Tier I and II standards were met, Verizon PA would owe nothing. In month 4, the Tier I performance standard was not met, but no bill credits would be due since Tier I requires Verizon PA to fail these performance standards two months in a row. Verizon PA service in month 3 was satisfactory. Month 5 would determine whether bill credits would be due under either Tier I or Tier II.

	TABLE I-A – CHANGE CONTROL MEASURES	

### I. INTRODUCTION

To ensure that Verizon Pennsylvania Inc. ("Verizon PA"), will execute the Change Control process in an expeditious and non-discriminatory manner, Verizon PA will undertake the actions set forth in this Change Control Assurance Plan (the "CCAP"). A total of \$16.82 million in bill credits will be at risk to CLECs if Verizon PA provides unsatisfactory service for the four measures in this Plan.

### II. THE CHANGE CONTROL MEASURES AND BILL CREDITS

The following measures are included in this Plan:

- 1. PO-4-01-6660: % Change Management Notices Sent on Time;
- 2. PO-4-03-6600: Change Management Notice Delay 8 plus Days;
- 3. PO-6-01-6000: % Software Validation; and
- 4. PO-7-04-6000: Delay Hours Failed/Rejected Test Transactions No Workaround.

Attached hereto as Table I-A is a chart that provides the standards that will be applied to each of the above measures and the total amount of bill credits associated with each standard. If a performance measure is missed according to its standards, bill credits will be paid to all CLECs purchasing Unbundled Network Elements ("UNEs") or resold services. CLECs will receive bill credits on a prorated basis of the total credit determined using Table I-A based on their lines in service. This Plan will use the same mechanisms set forth in the Performance Assurance Plan for determining "lines in service." (*See* PAP Section II (C)(2))

Under this Change Control Assurance Plan, Verizon PA will retain the right to withdraw any proposed software release prior to the item being put into final production. If Verizon PA

exercises this right, it will not be deemed to have violated the requirements set forth in PO-4-01-6660, PO-4-03-6600, PO-6-01-6000 or PO-7-04-6000 and will not be subject to the payment of bill credits under those measures.

The initial amount of annual bill credits for all CLECs will be \$6.73 million under this Plan. If, however, the bill credits due to the CLECs under this Plan exceed \$6.73 million in any year,<sup>1</sup> an additional amount of \$10.09 million will be at risk from the bill credit amounts allocated to the Mode of Entry Categories in the Performance Assurance Plan. Thus, a total of \$16.82 million will be available for bill credits for the Change Control measures. Bill credit payments for Change Control measures will be given priority over bill credits for the MOE categories.

The Commission will have the authority to reallocate the monthly distribution of bill credits between and among any provisions of the PAP and the CCAP The Commission will give the Company 15 days notice prior to the beginning of the month in which the reallocation will occur. Any reallocation will be done pursuant to Commission order.

#### **III. MONTHLY REPORTS**

Each month Verizon PA will issue a report on its performance on the above measures to each CLEC providing service in Pennsylvania.<sup>2</sup> The reports will be CLEC specific and will indicate the scores on the measures, the aggregate amount of bill credits, if any, that Verizon PA must provide pursuant to the standards set forth in Table I-A, and the specific amount of bill credits that will appear on the individual CLEC's bill. All CLECs with multiple bill accounts

<sup>&</sup>lt;sup>1</sup> The "year" will be measured from the first day that the Pennsylvania PAP first went into effect (April 1, 2003).

<sup>&</sup>lt;sup>2</sup> Verizon PA's performance on the other Change Control metrics will be reported in the monthly C2C reports.

Revised effective [insert date of implementation of PA PAP revisions] in accordance with the PA PUC order of [insert date] in Case No. M-00011468.

must inform Verizon PA as to which of their accounts should receive any bill credits for the Change Control measures.

### IV. REVIEWS, UPDATES AND AUDITS

Annual reviews and updates will occur under this Plan until the Commission determines otherwise. However, Verizon PA and any other interested party, after consulting with Staff, may at any time recommend to the Commission modifications, additions, or deletions to the measures in this Plan or the bill credit allocations. Verizon PA, CLECs and any other interested parties will be given an opportunity to provide comments on any recommendations. In addition, Staff will have the right from time to time, on 60-days notice to Verizon PA, to conduct an audit of data reported in the monthly reports.<sup>3</sup>

### V. EXCEPTION PROCESS

Verizon PA will have the right to file a petition with the Commission seeking to have the standards contained in Table I-A waived or modified either for future or past periods. The Commission shall grant such a request if it determines that the application of one or more of the standards contained in Table I-A would not serve the public interest. The application of one or more parts of Table I-A would not serve the public interest if Verizon PA could not, through any reasonable efforts, prevent results that do not satisfy the standards. Verizon PA's petition must include all information that demonstrates how the measure was missed. It shall also include a recalculation of the measure with the challenged information excluded from the calculations. CLECs and other interested parties will be given an opportunity to respond to any Verizon PA petition for an Exception. In the event the Commission rules in Verizon PA's favor, Verizon PA

<sup>&</sup>lt;sup>3</sup> Unlike most of the measures in the PAP, the recording of data for each of the measures in this Plan will be done manually.

Revised effective [insert date of implementation of PA PAP revisions] in accordance with the PA PUC order of [insert date] in Case No. M-00011468.

will have the right to offset any paid bill credits against any future bill credits that may come due for either the Change Control measures or Performance Assurance Plan measures.

### VI. TERM OF PLAN FOR THE CHANGE CONTROL PROCESS

The Change Control Assurance Plan will have the same term as the Performance Assurance Plan. It will remain in effect, as modified from time to time by the Commission, until the Commission rescinds the Performance Assurance Plan or develops a replacement mechanism.

### VII. FULLY INTEGRATED DOCUMENT

The terms and provisions of this Plan are submitted in their entirety to the Commission for approval. This Plan represents a fully integrated statement of the commitments Verizon PA will undertake, including the payment of bill credits for unsatisfactory performance under the measures. It is not offered to the Commission for approval on a piecemeal basis.

# TABLE I-APAGE 1

## **Change Control Performance Assurance Plan Measures**

PO-4-01-6660	0 % Change Management Notices Sent on Time				
	Performance Range (Notification and	≥95%	90 to 94.9%	< 90%	
	Confirmation for Types 3, 4 and 5 only)				
	Performance Credit	\$0	\$168,250	\$336,500	
PO-4-03-6600	<b>Change Management Notice Delay 8 plus Days</b> (Notification and Confirmation for Type 1, 2, 3, 4 and 5)				
	Performance Credit	\$16,825 per day			
PO-6-01-6000	PO-6-01-6000 % Software Validation (See Note 1)				
	Performance Range	$\leq 5\%$	5.1 to 10%	> 10%	
	Performance Credit	\$0	\$67,300	\$673,000	
PO-7-04-6000	<b>Delay Hours – Failed/Rejected Test Transactions – No Workaround</b> (See Note 2)				
	Performance Credit	\$33,650 per day Per Release			

- Note 1: Measured against releases pursuant to Change Notice Types 3, 4 and 5.
- Note 2: PO-7-04-6000 applies to failed Test Deck items executed by Verizon PA in PO-6-01-6000 and applies until all errors reported in PO-6-01-6000 are fixed.
