BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2015-2518438

UGI Utilities, Inc. – Gas Division

Statement No. 13-R

Rebuttal Testimony of
Angelina M. Borelli

Topics Addressed:	Capacity at the Transco City Gates
	Operational Flow Orders, Daily Flow Directive, and Interruptions of No Notice Service
	Calculation of Peak day Demands

Dated: May 10, 2016

I. INTRODUCTION

1

2 **Q. Please state your name and business address.**

3 A. My name is Angelina M. Borelli. My current business address is 2525 N. 12th

4 Street, Suite 360, Reading, Pennsylvania 19612.

5

6 **Q. By whom and in what capacity are you employed?**

7 A. I am employed by UGI Utilities, Inc. as Director – Gas & Electric Supply. In this

8 position, I am responsible for the natural gas supply portfolio and procurement

9 strategy for UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company"), UGI

10 Penn Natural Gas, Inc. ("PNG") and UGI Central Penn Gas, Inc. ("CPG"). I also

11 am responsible for directing gas control operations, and testifying in support of

12 Purchased Gas Cost and Default Service Supply Proceedings.

13

14 **Q. What is your educational and professional background?**

15 A. A copy of my resume is provided as Attachment 1 to my rebuttal testimony.

16

17 **Q. Have you been involved in other Commission proceedings?**

18 A. I have provided testimony in support of UGI Utilities, Inc. – Electric Division's

19 Default Service filing at Docket Nos. P-2016-2543523 and G-2016-2543527.

20

21 **Q. On whose behalf are you testifying in this proceeding?**

22 A. I am submitting this rebuttal testimony on behalf of UGI Gas.

23

24 **Q. Did you previously submit direct testimony in this proceeding?**

1

1   A.   No, I did not.

2

3   **Q.**   **What is the purpose of your rebuttal testimony?**

4   A.   My testimony addresses a peak day demand revision and responds to certain

5   portions of the following direct testimony submitted by intervenors and public

6   parties: the direct testimony of Orlando Magnani, RESA Statement No. 1; the

7   direct testimony of B. Tucker Schreiber, UGIII Statement No. 1; the direct

8   testimony of Robert A. Rosenthal, UGIII Statement No. 4; and OSBA Statement

9   No. 1, the direct testimony of Robert D. Knecht. Specifically, I will address the

10   concerns raised by the Retail Energy Supply Association ("RESA") regarding the

11   natural gas suppliers ("NGSs") capacity at the Transco city gates. I also will

12   address the concerns raised by UGI Industrial Intervenors ("UGIII") regarding

13   Operational Flow Orders ("OFOs"), Daily Flow Directives ("DFDs"), and

14   interruptions of No Notice Service ("NNS"). I will also address Mr. Knecht's

15   calculation of peak day demands used in his cost of service study.

16

17   **II.**   **CORRECTION TO PEAK DAY DEMAND OF RATE DS CUSTOMERS**

18   **Q.**   **Before you address the testimony of other witnesses, has the Company**

19   **updated its peak day demand for any of its customers?**

20   A.   Yes. In responding to discovery in this matter the Company determined that UGI

21   Gas's initial peak day calculation for the Rate DS customers was inaccurate.

22   Initially, the Rate DS peak day calculation was portrayed as one that was using

23   daily data, but in fact, this data was only daily for a subset of Rate DS meters,

24   and the remaining meters were pulled into our Rate DS calculation on an

1 average day basis. Therefore, UGI Gas has developed an alternative Rate DS

2 peak day calculation. The new methodology properly takes into account the

3 appropriate degree days corresponding to each customer's billing usage. Details

4 of this calculation are found in UGI Gas Exhibit AMB-1.

5

6 Q. **Has the Company updated its class cost of service studies to reflect this**

7 **change in peak day demand for its Rate DS class?**

8 A. Yes. This change is reflected in the rebuttal testimony of UGI Gas witness Paul

9 Herbert, UGI Statement No. 4-R, and his revised class cost of service studies.

10

11 III. **CAPACITY AT THE TRANSCO GATE**

12 Q. **On page 6 of RESA Statement No. 1, Mr. Magnani expresses concern that**

13 **for large transportation customers, "UGI [Gas] does not allocate the NGS**

14 **any space at the Transco gate." Is this statement true?**

15 A. No. All Rate XD transportation customers, whose loads are entirely located in an

16 operationally isolated portion of UGI Gas's distribution system located in the

17 Hazleton area, make all of their deliveries through Transco. Thus, their NGSs

18 are permitted to schedule deliveries at UGI Gas's Transco city gates. Currently,

19 there are four such customers.

20

21 Q. **On page 6 of RESA Statement No. 1, Mr. Magnani states that Transco "is**

22 **one of the major sources of gas supplies on the UGI system." Do you**

23 **agree with this statement?**

1   A.   No. Apart from the non-contiguous northern Hazleton segment of UGI Gas's

2   distribution system, Transco is not a major source of supply into UGI Gas's

3   distribution system. Transco provides only a minor contribution to UGI Gas on a

4   Peak Day as can be seen on UGI Gas Exhibit AMB–2. Texas Eastern

5   ("TETCO") and Columbia Gas Pipeline ("TCO") are the only major supply

6   sources for UGI Gas. Accordingly, UGI Gas requires non-choice transportation

7   customers, apart from the Rate XD customers in the isolated Hazleton area

8   segment of its distribution system, to schedule their deliveries, on an equal and

9   non-discriminatory basis, through UGI Gas gate stations on TETCO and TCO.

10

11   Q.   **On page 6 of RESA Statement No. 1, Mr. Magnani recommends "UGI [Gas]**

12   **should allocate city gate capacity to all customers on a pro rata basis." Do**

13   **you agree with this recommendation?**

14   A.   No. As stated above, Transco is a relatively minor supply source for UGI Gas,

15   and, perhaps more importantly, primarily serves a geographically isolated area of

16   its distribution system. Thus, enabling all non-choice transportation customers to

17   make deliveries on Transco could present significant balancing challenges for

18   UGI Gas as large quantities of gas could be delivered to a segment of UGI Gas's

19   distribution system that is operationally unrelated to the delivering customers'

20   points of consumption. Unlike the more integrated southern areas of its

21   distribution system, where UGI Gas has the ability to make operational

22   adjustments in order to substitute supply requirements between TETCO and

23   TCO, UGI Gas is unable to make such system adjustments to the same extent

1   with Transco supplies.   To accommodate such imbalances UGI Gas would

2   potentially have to: (1) subscribe to additional firm balancing services, leading to

3   increased balancing charges to large transportation customers; and/or (2) reduce

4   the delivery flexibility currently afforded to transportation customers on TCO and

5   TETCO.

6   Currently, in recognition of the firm balancing services and operational

7   flexibility UGI Gas has on TETCO and TCO, UGI Gas allows flexible delivery

8   entitlements on these pipelines for large transportation customers and their

9   NGSs.   Under UGI Gas's current delivery rules, NGSs supplying non-choice

10   transportation customers are permitted to deliver a minimum of 55% and up to a

11   maximum of 100% of their supplies on TETCO, and a minimum of 0% and up to

12   a maximum of 45% on TCO.   If, as advocated by Mr. Magnani, non-choice

13   transportation customers were permitted to deliver a portion of their supplies

14   currently delivered to TETCO and TCO city gates to Transco city gates and

15   incremental balancing services were not procured to handle the resulting

16   imbalances between deliveries and consumption between the isolated segments

17   of UGI Gas's distribution system, the system's current delivery flexibility could be

18   diminished.   Such diminishment would reduce the ability of many UGI Gas

19   transportation customers and NGSs to take advantage of lower cost supply

20   opportunities on one or the other of the two non-Transco pipeline systems.

21   UGI Gas is willing to discuss and address potential changes to the

22   delivery point access for all customer classes, but only to the extent that the

23   discussions are limited to operationally feasible solutions and the costs of

1   additional services needed to facilitate any change in delivery point access are

2   properly borne by the customers who benefit from the change.

3

4   Q.   **On page 6 of RESA Statement No. 1, Mr. Magnani asserts that the inability**

5   **to make deliveries on Transco causes increased costs for non-Choice**

6   **transportation customers and "has an anti-competitive effect as NGSs that**

7   **sell to smaller choice customers are forced to unfairly compete against a**

8   **lower cost to compare." Do you agree?**

9   A.   No. First, Choice suppliers are allocated a pro rata share of UGI Gas's firm

10   pipeline transportation capacity, including Transco, at the weighted average cost

11   of UGI Gas's PGC supply portfolio, and are free to maximize the value of these

12   assets in secondary markets. Thus, there is no anti-competitive effect on NGSs

13   supplying Choice customers.

14   Second, with respect to NGSs serving large customers, all NGSs,

15   affiliated and nonaffiliated alike, adhere to the same delivery rules. Thus, there is

16   no anti-competitive effect on NGSs supplying non-Choice customers.

17   There is also no evidence that UGI Gas's supplier of last resort price to

18   compare has any meaningful impact on the ability of NGSs to supply the non-

19   Choice transportation market. For calendar year 2015, UGI Gas made 9.2 Bcf of

20   firm sales to retail commercial and industrial customers, but transported 91.4 Bcf

21   for commercial and industrial transportation customers served by NGSs.

22

	Q.	On page 6 of RESA Statement No. 1, Mr. Magnani states that the inability of NGSs to deliver to Transco city gates deprives non-Choice transportation customers of "lower cost supplies." What is your reaction to this assertion?

1 Q. *On page 6 of RESA Statement No. 1, Mr. Magnani states that the inability of*

2 *NGSs to deliver to Transco city gates deprives non-Choice transportation*

3 *customers of "lower cost supplies." What is your reaction to this*

4 *assertion?*

5 A. As a result of Transco Leidy Line's physical location, it provided some of the

6 earliest access to Marcellus supplies, which often were low cost because of the

7 lack of pipeline capacity connecting these supplies to markets. However,

8 Marcellus supplies are not isolated to the Transco Leidy Line. Marcellus supplies

9 are plentiful and abundant throughout the state of Pennsylvania and are available

10 on both TETCO and TCO, providing NGSs with an abundance of low cost supply

11 options. As more natural gas production from the Marcellus Shale region has

12 been connected to these pipelines, the price of supplies on these pipelines has

13 been decreasing relative to the price of gas on Transco's Leidy system. In fact,

14 the Platts' Gas Daily Midpoint prices for Texas Eastern M-2 receipts, which is a

15 large source of Marcellus supply into TETCO, have been lower than that of

16 Transco Leidy Line receipts, which is a large source of Marcellus supply into

17 Transco, on several occasions during the past year as shown on UGI Gas Exhibit

18 AMB-3. Therefore, it is not true that Transco supply is always the lowest-cost

19 source of supply for transportation customers on the UGI Gas distribution

20 system, nor is it certain to be the lowest-cost source of supply in the future.

21

22 IV. **OPERATIONAL FLOW ORDERS, DAILY FLOW DIRECTIVE, AND NO NOTICE**
23 **SERVICE**

1   Q.   **On pages 11-13 of UGIII Statement No. 1, Mr. Schreiber expresses**

2   **generalized concerns that increased levels interruptible service**

3   **interruptions are making East Penn's planning more difficult. What is your**

4   **reaction to these concerns?**

5   A.   Under the terms of UGI Gas's tariff, customers such as East Penn may elect firm

6   service levels that UGI Gas's existing infrastructure is able to support, and may

7   make customer contributions to support expansions of UGI Gas's facilities

8   needed to support increased levels of firm service. To the extent customers such

9   as East Penn desire service above their contracted for levels of firm service, they

10   may receive interruptible service to the extent system capabilities are available.

11   However, these customers cannot expect such service to always be available,

12   and generally must have a documented installed alternate fuel capability in place

13   that they can use during periods of interruption. They may also elect a fully

14   interruptible NNS to assist them with balancing their loads.

15   Undoubtedly, as Mr. Schreiber notes in his testimony, interruptions of

16   interruptible service, including NNS, can be inconvenient and lead to higher costs

17   as alternate fuels are burned. However, that is the nature of interruptible service,

18   and if the uncertainties of interruptible service are burdensome, then East Penn

19   always has the option of negotiating further increases in its DFR to firm-up its

20   service.

21   East Penn has benefited from its election of interruptible service by

22   receiving lower distribution charges, and needs to weigh the costs and benefits of

23   seeking to replace some or all of its interruptible service loads with firm service.

1   In making that calculation, East Penn, consistent with the terms of UGI Gas's

2   tariff designed to protect the interests of existing customers, may need to pay for

3   system upgrades needed to provide higher levels of firm service if its negotiated

4   delivery service rates do not justify the necessary investment. East Penn cannot

5   expect other UGI Gas customers to finance uneconomic extensions on its behalf.

6

7 Q. **Why has East Penn experienced more frequent interruptions?**

8 A. The only interruptions experienced by East Penn involve interruptions of service

9   above its firm entitlement. The Company has not implemented any curtailment of

10   East Penn's firm service. In that light, interruptions are implemented when UGI

11   Gas determines that expected firm and interruptible loads on a segment of its

12   distribution system are likely to exceed the delivery capabilities of that system

13   segment, thereby necessitating an interruption of interruptible service. Such

14   interruptions are to be expected, and are dependent on the consumption patterns

15   of firm service customers, such as East Penn as to its firm entitlement, who have

16   elected to receive and pay for a higher priority of service. Relevant information

17   concerning the expected duration of the interruption is communicated to

18   interruptible service customers, and large transportation customers can direct

19   questions to dedicated relationship managers.

20   It is important to note that segments of UGI Gas's system have physical

21   limitations that guide UGI Gas in deciding whether it can provide firm service to

22   new customers, or increased levels of firm service to existing customers. Once

23   firm service commitment levels are established for each segment of its system,

1   UGI Gas, as system operator, must make day-to-day decisions as to whether it

2   will need to call for interruptions of interruptible service to preserve its ability to

3   ensure firm service commitments are met. To perform this important task, UGI

4   Gas must rely on models, current real-time demands on the system and weather

5   forecasts. Mr. Schreiber's comments that increased interruptions are difficult to

6   predict and disruptive to his planning is consistent with the challenges UGI Gas

7   confronts every day. UGI Gas must rely on real-time information of its dynamic

8   distribution system and weather forecasts in order to operate its system in a

9   reliable manner. In some instances these projections turn out to be right and

10   sometimes they turn out to be wrong. However, UGI Gas cannot wait until "after

11   the fact" to call for customer interruptions.

12   Again, UGI Gas's demand models are dynamic and change over time to

13   reflect new system conditions, including the addition of new or interruptible firm

14   loads. Neither East Penn nor any other interruptible service customer has a right

15   to expect that any particular level of service interruptions will be preserved over

16   time. If interruptions levels increase, East Penn needs to consider the costs and

17   benefits of increasing its firm service levels.

18

19   Q.   On pages 11-12 of UGIII Statement No. 1, Mr. Schreiber chronicles recent

20   Operational Flow Orders ("OFOs") and Daily Flow Directives ("DFDs").

21   What are his concerns?

1   A.   Mr. Schreiber expresses concern over the increased amount of DFDs and OFOs.

2   He claims these restrictions create significant operational difficulties and financial

3   hardships for East Penn.

4

5   Q.   **How many OFO and DFD orders have been issued by the Company since**

6   **2004?**

7   A.   Two OFOs have been issued since 2004. The first was issued on July 3, 2010,

8   as a result of an OFO issued by Transco. The second was issued on April 29,

9   2016, resulting from a pipeline explosion and corresponding OFO on TETCO.

10   There have been 48 DFDs issued since 2004. See UGI Gas Exhibit AMB-4 for a

11   summary of DFDs issued each year.

12

13   Q.   **Why has there been an increase in DFDs since 2011?**

14   A.   DFDs are primarily issued because of forecasted upstream supply issues due to

15   anticipated increases or decreases in demand due to weather forecasts. These

16   situations will prompt interstate pipelines to declare a warning, or an OFO or a

17   force majeure as Texas Eastern recently did as a result of an explosion on its

18   system. Additionally, pipeline constraints have increased due to changing flows

19   because of increased supply in the Northeast region of the United States,

20   increased demands from gas utilities and electric generation, and extreme cold

21   weather. For example, during the unseasonably warm month of December 2015,

22   Columbia pipeline restricted storage injections. As a result, UGI Gas issued a

1   DFD to limit transportation customers from making over-deliveries for their

2   customer accounts.

3

4 Q. **Please explain UGI Gas's expectations from customers during a DFD.**

5 A. The most common requirements for a transportation customer during a DFD are

6   to either: (1) reduce deliveries to match expected reduced customer usage: or

7   (2) increase deliveries to match expected increased customer usage.

8   Transportation customers are also reminded that no notice balancing service is

9   only available for inadvertent fluctuations.

10

11 Q. **Mr. Schreiber claims that UGI Gas provides customers very little (if any)**

12   **information about the factors prompting UGI Gas to issue an OFO or DFD**

13   **or what UGI will and can do under those circumstances. Do you agree?**

14 A. No, I do not agree. As stated above, the primary reasons for the issuance of the

15   DFDs or OFOs are directly related to upstream supply issues and dependent

16   upon the operations of the interstate pipelines. UGI Gas posts DFD and OFO

17   notices on its Gas Management Website promptly after the information is

18   available from the interstate pipelines. These notices provide reasons for the

19   DFDs and OFOs.

20   Additionally, UGI Gas receives and responds to marketer and customer

21   requests for additional information about these restrictions. UGI Gas intends to

22   continue to provide information on an informal basis as requested. UGI Gas is

1   also open to changing the language of the DFD and OFO notices, but Mr.

2   Schreiber has not proposed any specific requests in that regard.

3

4 Q. **On pages 13 and 14 of UGIII Statement No. 1, Mr. Schreiber states that UGI**

5   **Gas's proposed definitions of DFDs and OFOs "seem to allow UGI to make**

6   **calls for economic reasons." Do you agree?**

7 A. No. UGI Gas has certain statutory least cost fuel procurement and reliability

8   obligations to its core market customers, but apart from these referenced

9   obligations, UGI Gas's proposed definition of DFDs states that they will not be

10   called "solely for other economic reasons." Similarly, UGI Gas's proposed

11   definition of OFOs states that OFOs will not be called "solely for other economic

12   reasons."

13

14 Q. **On page 15 of UGIII Statement No. 1, Mr. Schreiber suggests that UGI Gas**

15   **should drop facsimile as a proper form of communication of OFOs and**

16   **DFDs, that UGI Gas should be required to identify whether the OFO or DFD**

17   **is the result of a system supply problem or a distribution problem, and that**

18   **notice should be provided by noon the day prior to the effective date of the**

19   **OFO or DFD. What is your reaction to these suggestions?**

20 A. Both UGI Gas's proposed definitions of OFOs and DFDs and its proposed Tariff

21   Rule 5.2 and 5.3 already enable the customer and the Company to agree of a

22   mutually agreeable form of communication. If East Penn wants to drop

23   facsimiles from the list of communication tools applicable to it, this is acceptable

13

1   to UGI Gas. However, if other customers still want to receive facsimiles then this

2   option should remain open.

3   With respect to providing the reason for an OFO or DFD, UGI Gas

4   includes the reason in the operational notice posted on its website, and if a

5   particular customer or marketer wants more specific information, they can

6   certainly contact UGI Gas for this information.

7   Finally, UGI Gas's proposed Tariff Rule 5.3 already provides that OFOs

8   will be communicated "as soon as reasonably practical", and UGI Gas would be

9   willing to add similar language to its proposed Tariff Rule 5.2 addressing DFDs.

10   It is not reasonable, however, to require all notices to be provided before noon

11   the preceding day because unexpected conditions can arise both on UGI Gas's

12   system and on the upstream pipelines serving UGI Gas that would require the

13   issuance of DFDs and OFOs with less advance notice. For example, the TETCO

14   explosion on April 29, 2016, impacted supply purchases from April 28, 2016, and

15   UGI Gas would not have been able to provide notice of such an event by noon

16   the preceding day. The reliability of firm service must take precedence over

17   transportation customer inconvenience in responding to DFDs and OFOs.

18

19   Q.   **On page 17 of UGIII Statement No. 1, Mr. Schreiber suggests that UGI Gas**

20   **share temperature data used in making interruption decisions and hold pre**

21   **and post winter meetings with large transportation customers so that**

22   **industrial customers can make better gas purchasing decisions. Is this a**

23   **useful suggestion?**

1   A.   UGI Gas already holds supplier collaborative meetings in the fall and spring,

2   which large industrial customers can attend, where matters such as these can be

3   discussed.   Large customers such as East Penn, also have relationship

4   managers whom they can present concerns to, and UGI Gas is also always open

5   to more informal customer meetings.   UGI Gas has no way of predicting either

6   (a) when OFOs or other restrictions might be called by interstate pipelines or

7   other supply sources upstream of its system, or (b) on-system issues such as

8   line hits or regulator station problems.   Thus, it is not clear that enough

9   actionable information can be given in advance of each winter to justify specific

10   gas purchase decisions as apparently envisioned by Mr. Schreiber.

11

12   Q.   **On pages 10-12 of UGIII Statement No. 2, Mr. Davey raises concerns about**

13   **how UGI Gas defines and uses OFOs and DFDs. Do you have a response?**

14   A.   Yes.   He uses the same arguments advanced by Mr. Schreiber, and my

15   response to his recommendations is the same as my response to Mr. Schreiber's

16   testimony concerning this issue.

17

18   Q.   **Does Mr. Rosenthal express concerns regarding the proposed definition of**

19   **OFOs and DFDs?**

20   A.   Yes.   Mr. Rosenthal argues that UGI Gas's proposed definition of OFOs and

21   DFDs may be declared for "actions necessary to comply with statutory directives

22   and obligations including the Company's obligation pursuant to 1307(f)

23   procurement activities." Mr. Rosenthal characterizes Section 1307(f) obligations

1   as "economic" concerns and suggests such economic concerns should not be

2   the basis for issuance of DFDs or OFOs.

3

4   Q.   **Does Mr. Rosenthal's recommendation have merit?**

5   A.   The proposed tariff language is simply stating a truism -- UGI Gas must comply

6   with statutory directives and obligations, whether they are found in Section

7   1307(f) or elsewhere -- and changing the tariff language would not change these

8   statutory obligations. OFOs and DFDs are designed to ensure delivery of gas

9   and discourage balancing arbitrage that threaten system reliability. These goals

10   are consistent with UGI Gas's statutory obligation, as the supplier of last resort,

11   and cannot be eliminated as a basis for issuing OFOs and DFDs.

12

13 Q.   **On page 10 of UGIII Statement No. 4, Mr. Rosenthal recommends that UGI**

14   **Gas "should provide the specific reason to impacted customers for each**

15   **DFD and OFO, and have greater communication and coordination with**

16   **customers throughout the year in system planning and modeling." What is**

17   **your reaction to these suggestions?**

18 A.   As previously discussed, transportation customers and/or their suppliers are

19   informed of the reason for each OFO and DFD. UGI Gas holds bi-annual

20   capacity collaborative meetings where its gas planning activities are reviewed

21   and general concerns can be discussed. UGI Gas is also open to more informal

22   communications with its large transportation customers, and has dedicated

1   relationship managers assigned to each large transportation customer to foster

2   direct communications.

3

4   **V.**   <u>**CALCULATION OF PEAK DAY DEMANDS**</u>

5   **Q.**   **On page 33 of OCA Statement No. 3, Mr. Watkins recommends allocating**

6   **80,000 Mcf to the interruptible class on design peak day. Do you agree with**

7   **this recommendation?**

8   **A.**   No. Mr. Watkins mistakenly relies on interruptible usage data during non-peak

9   day conditions to conclude that interruptible customers would use 80,000 Mcf on

10   a design peak day. Specifically, Mr. Watkins references interruptible load of

11   83,500 Dth on January 7, 2015, to show that interruptible customers "use and

12   rely upon the Company's distribution system during periods of high system

13   demand." Mr. Watkins also mistakenly relies on interruptions during non-peak

14   day conditions to conclude that interruptible customers would use gas on a

15   design peak day. Specifically, Mr. Watkins references that UGI Gas interrupted

16   "about 3% of its interruptible load" on January 13, 2015. However, Mr. Watkins is

17   clearly confusing cold winter days with a design peak day.

18   The average mean temperatures for UGI Gas's primary system on

19   January 7, 2015, and January 13, 2015, were 12 degrees and 20 degrees

20   Fahrenheit respectively, while UGI Gas's design peak day temperature is -3.6

21   degrees Fahrenheit. Since the actual mean temperature was more than 15

22   degrees warmer than UGI Gas's design peak day condition on January 7, 2015,

23   and more than 23 degrees warmer than peak day on January 13, 2015, not all

24   interruptible customers needed to be interrupted on either day. Conversely, on a

1   design peak day of -3.6 degrees Fahrenheit, UGI Gas would expect to interrupt

2   all of its interruptible customers to meet the demand requirements of its firm

3   customers. Therefore, it is incorrect and inappropriate to suggest interruptible

4   customers should be allocated any quantity of system costs on a design day

5   basis.

6

7 **Q.** **On page 20 of OSBA Statement No. 1, Mr. Knecht mentions he has**

8   **developed an alternative approach for calculating firm design day demand.**

9   **Do you agree with his alternative approach?**

10 **A.** No. First, while Mr. Knecht agrees with UGI Gas's design peak day demand for

11   Rate XD customers, it is worth mentioning that Mr. Knecht's methodology to use

12   a "simple statistical analysis that derives an estimated design day demand based

13   on design temperature conditions" is unnecessary because Rate XD customers

14   contract for a Daily Firm Requirement ("DFR") in their service agreement. Per

15   UGI Gas's tariff, the DFR represents UGI Gas's maximum firm delivery obligation

16   to the customer on any day, including a design peak day. Therefore,

17   recommending any quantity other than the sum of the DFRs for Rate XD

18   customers would be incorrect and inappropriate.

19   Second, Mr. Knecht applies "the same customer-specific statistical

20   analysis as that applied to the Rate XD class" for Rate LFD customers. For the

21   same reason discussed above for Rate XD customers, Mr. Knecht's

22   methodology is unnecessary because Rate LFD customers contract for a DFR,

23   which represents UGI Gas's maximum firm delivery obligation to the customer on

1   any day, including a design peak day. Therefore, Mr. Knecht's recommendation

2   to allocate 86,712 Mcf to Rate LFD customers on a design peak day, rather than

3   the sum of their DFRs, is incorrect and inappropriate and should be rejected.

4

5 Q.   **Mr. Knecht recommends reducing UGI Gas's design peak day quantity. Do**

6   **you agree with his reasoning?**

7 A.   No. Mr. Knecht attempts to build up to a design peak day from historical monthly

8   customer usage and performing regression analyses by rate class. His design

9   peak day is equal to the summation of each rate class's peak days. This

10   contrasts with UGI Gas's top down methodology projecting a design peak day

11   from actual daily system demand. UGI Gas's methodology is superior in that its

12   starting point is daily system usage. This information is not available for all rate

13   classes; therefore, Mr. Knect's usage of this information can immediately be

14   deemed less accurate. UGI Gas's analysis accounts for additional variables

15   such as temperature, day of week, month, and wind speed. This methodology

16   has been approved in case after case in its annual 1307(f) filings. In addition,

17   UGI Gas' actual system demand firm demand in excess of Mr. Knecht's

18   estimated peak day demand on 11 days over the past 3 winter seasons at

19   temperatures more than 10 degrees higher than the design day temperature of

20   -3.6.

21

22 Q.   **Does this conclude your Rebuttal Testimony?**

23 A.   Yes.

Angelina Borelli

EXPERIENCE

UGI Utilities, Inc.
Director – Gas & Electric Supply, December 2015- current

- Directs supply procurement strategy for ~70BCF of annual natural gas purchases.
- Develops long-term portfolio strategy designed to provide competitively priced and reliable supply to utility customers.
- Testifies in support of UGI's annual Purchased Gas Cost Proceedings at the Pa. PUC.
- Testified in support of UGI Electric Division's 2016 Default Service Petition.
- Directs Gas Control Operations with an emphasis on safety, reliability, and regulatory compliance.

UGI Energy Services, LLC.

Director – Gas Supply, October2014-December 2015

- Lead a group responsible for natural gas trading and asset portfolio management that contributes over $70MM in pre-tax income.
- Lead retail price desk responsible for maintaining accurate pricing models for sales department and providing pricing strategy to retail marketing business serving over 100BCF of annual natural gas sales.
- Responsible for supply procurement and hedging over 100 BCF annually of natural gas sales.
- Successfully negotiated major asset management agreements with producers resulting in the acquisition of 35,000dth/day of natural gas supply and transportation capacity to support new retail markets.
- Participated in sales meetings with key retail and industrial customers during contract negotiations resulting in securing and renewing more than 6BCF of natural gas sales.
- Developed supply purchase and sale proposals for new power and industrial customers in order to leverage retail and wholesale business activity with midstream initiatives.

Manager – Supply and Transportation, December 2009-September 2014

- Managed staff of 6-8 fuel coordinators responsible for the delivery of natural gas supply on over 200 BCF of transportation and 8 BCF of storage capacity.
- Managed supply, marketing and transportation of 6MMgallons of liquid fuels, storage and railcar assets which contribute $2MM of annual pre-tax income.
- Provided excellent training and employee development. Standardized pipeline scheduling process which resulted in a 20% increase in efficiency.
- Participated in optimization of company held transportation, storage and peaking capacity. Developed call options related to company assets. Member of team responsible for $50MM of annual pre-tax income.
- Worked with IT department to develop database enhancements that increase efficiency.

Administrator- Assets & Wholesale Services, April 2006-November 2009

- Participated in optimization of company held transportation, storage and peaking capacity. Developed call options related to company assets. Member of department responsible for $10MM of annual pre-tax income.
- Performed market analysis and prepared forecasts related to storage and transportation capacity.

UGI Utilities, Inc.
Gas Supply Analyst, I, II & III, October 2000-March 2006

- Provided analysis related to asset valuation and demand forecasting.
- Created monthly supply plans related with a focus on least cost procurement.
- Purchased and scheduled 35 BCF of annual natural gas supply on 11 interstate pipelines.
- Marketed idle transportation and storage related capacity.

EDUCATION

The Pennsylvania State University, MS Finance – May 2008
Albright College, BS Business Administration – December 2006
Reading Area Community College, AAS Law Enforcement Administration – June 2000
